BEFORE THE INTERSTATE COMMERCE COMMISSION

Served April 21, 1953

NOTICE TO THE PARTIES

Exceptions, if any, must be filed with the Secretary, INTERSTATE COMMERCE COMMISSION, Washington, D. C., and served on all other parties in interest, within 20 days from the date of service shown above, or within such further period as may be authorized for the filing of exceptions. At the expiration of the period for the filing of exceptions, the attached order will become the order of the Commission and will become effective unless exceptions are filed seasonably or the order is stayed or postponed by the Commission. To be seasonably filed, exceptions must reach the Commission or or before the date they are due. If exceptions are filed, replies thereto may be filed within 10 days after the final date for filing exceptions. If the recommended order becomes effective as the order of the Commission, a notice to that effect, signed by the Secretary, will be served.

No. MC-29130 (Sub-No. 70)

THE ROCK ISLAND MOTOR TRANSIT COMPANY COMMON CARRIER APPLICATION

Submitted Decided

Public convenience and necessity found to require operation by applicant as a common carrier by motor vehicle, in interstate or foreign commerce, of general commodities, with exceptions, between certain points in Illinois,

Iowa, and Nebraska, over regular routes, serving designated intermediate and off-route points. Issuance of a certificate approved, and application in all other respects denied.

A. B. Howland and *J. H. Martin* for applicant.
D. C. Nolan, Henry A. Archambo, and *R. H. Heinecamp* for interveners in support of the application.
Albert B. Rosenbaum, Rex H. Fowler, Homer E. Bradshaw, Eugene L. Cohn, Joseph E. Ludden, Stephen Robinson, Walter V. Huston, and *William A. Landau* for protestant and interveners in opposition.

REPORT AND ORDER

RECOMMENDED BY T. K. CARPENTER, EXAMINER

By application filed October 26, 1951, as amended, The Rock Island Motor Transit Company, hereinafter called applicant or Motor Transit, of Chicago, Ill., seeks a certificate authorizing operation, in interstate or foreign commerce, as a common carrier by motor vehicle, of general commodities, except nitroglycerin, commodities of unusual value, household goods as defined in *Practices of Motor Common Carriers of Household Goods,* 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, [fol. 4] (1) between Chicago, Ill., and Omaha, Nebr., from Chicago over U. S. Highway 34 to junction of Illinois Highway 92, thence over Illinois Highway 92 to junction of U. S. Highway 6, and thence over U. S. Highway 6 to Omaha, (2) between Iowa City, Iowa, and Cedar Rapids, Iowa, from Iowa City over U. S. Highway 218 to Cedar Rapids, (3) between Harlan, Iowa, and Omaha, Nebr., from Harlan over Iowa Highway 64 to Council Bluffs, Iowa, and thence over U. S. Highway 6 to Omaha, (4) between Avoca, Iowa, and Atlantic, Iowa, (a) from Avoca over U. S. Highway 59 to junction U. S. Highway 6, and thence over U. S. Highway 6 to Atlantic, and (b) from Avoca over Iowa Highway 83 to Atlantic, and (5) return in each instance over the same routes, serving the intermediate points of East Moline, Silvis, Moline, and Rock Island, Ill., and Bettendorf, Davenport, Durant, Wilton,

Jct., Atalissa, West Liberty, Iowa City, Coralville, Tiffin, Homestead, Marengo, Ladora, Victor, Brooklyn, Grinnell, Newton, Colfax, Altoona, Des Moines, Dexter, Stuart, Menlo, Casey, Adair, Anita, Wiota, Atlantic, Oakland, Council Bluffs, Weston, Underwood, Minden, Neola, Corley, Walnut, Marne, and Hancock, Iowa, and the off-route points of Walcott, Muscatine, Stockton, Moscow, Oxford, South Amana, Malcom, Kellogg, Mitchellville, and Shelby, Iowa.

The application was referred to joint board No. 136 for hearing and the recommendation of an appropriate order thereon. The States of Illinois and Nebraska have waived their right to participate in this proceeding, as the joint board member from each of those States failed to appear at the hearing. The joint board member from the State of Iowa after opening the hearing waived further participation in the proceeding by that State. Hearing before an examiner was held on March 18 through April 1, 1952, and on May 20, 21, and 22, 1952, at Des Moines, Iowa. The Regular Common Carrier Conference, American Trucking Associations, Inc., and eleven motor carriers oppose the granting of the application.

Applicant is a wholly owned subsidiary of the Chicago, Rock Island and Pacific Railroad Company, hereinafter called Rock Island. It conducts motor common carrier regular-route operations in Illinois, Indiana, Iowa, Nebraska, Minnesota, Missouri, Kansas, Texas, Tennessee, Arkansas, and Oklahoma, subject in certain instances to various restrictions affecting different route segments. This proceeding primarily relates to applicant's authorized routes within the State of Iowa, (except those between Cedar Rapids and Decorah, between Muscatine and Kalona, and between Wellman and West Chester) and those extending beyond to Chicago, Ill., Omaha, Nebr., Minneapolis-St. Paul, Minn., and Kansas City, Mo. At the outset a brief history of the transactions and proceedings leading up to this proceeding will be helpful.

History

In No. MC–F–445, *Rock Island M. Transit Co.—Purchase —White Line M. Frt.*, 5 M.C.C. 451, decided April 1, 1938, Division 5 approved and authorized the purchase by Motor

Transit of the operating rights and property of White Line Motor Freight Company, Incorporated, and White Line Trucking Company, hereinafter called collectively the White Line, including the right to operate pending determination of the respective "grandfather" applications of these companies and the right, so far as operating rights the transfer of which was therein authorized was concerned, to any certificates which may be issued as a result of such applications, subject to certain conditions, including (1) that Motor Transit shall not render service from or to, or interchange traffic at, any point other than a station on the line of Rock Island, and (2) that the authority herein granted [fol. 5] shall be subject to such further limitations, restrictions, or modifications as the Commission may find necessary to impose or make in order to insure that service shall be auxiliary to or supplementary of train service of Rock Island and shall not unduly restrain competition. The acquisition of these rights gave Motor Transit its first operating authority, in interstate or foreign commerce, over the route between Chicago and Omaha, 500 miles, and over two short branch routes to Muscatine and Cedar Rapids. Motor Transit proposed to utilize such authority in the conduct of three distinct types of service, (1) a coordinated rail-truck service, to be auxiliary to existing all-rail service moving merchandise cars to certain concentration or set-out points, and then making distribution by truck, (2) an all-truck service on short hauls between stations, where feasible and economical, as a substitute for rail service, and (3) an all-truck service restricted to points on the railroad, but in addition to rather than a substitute for rail service.

In No. MC–F–445, *Rock Island M. Transit Co.—Purchase —White Line M. Frt.*, 15 M.C.C. 763, decided March 6, 1939, Division 5 approved and authorized acquisition by the Rock Island and its trustees from the Rock Island Improvement company, of control of Motor Transit by purchase of a majority of capital stock of the latter, pursuant to condition imposed in the prior report 5 M.C.C. 451.

Motor Transit consummated the authorized transaction, filed tariffs with the Commission, and took over the operation in April, 1938. A certificate was issued to Motor Tran-

sit in No. MC–29130 on December 3, 1941, authorizing the transportation of general commodities, with exceptions, and covering only that portion of the claimed "grandfather" rights between Omaha and Silvis, from Omaha over U. S. Highway 6 to its junction with Illinois Highway 92, and thence over Illinois Highway 92 to Silvis, and return over the same route, and the off-route points of Cedar Rapids, Muscatine, Bettendorf, and Oxford. The remainder of the claimed "grandfather" rights were denied. This certificate did not contain any restriction on the kind of service authorized, but did specifically provide that it was subject to the condition or reserved right of the Commission later to impose such restrictions which might be found necessary to insure that the service should be limited to that which is auxiliary to, or supplemental of, train service of Rock Island and shall not unduly restrain competition.

In No. MC–29130 (Sub-No. 2), *Rock Island Motor Transit Co., Extension—Eldon, Iowa,* 33 M.C.C. 349, decided May 6, 1942, a certificate was granted to Motor Transit under section 207 of the Interstate Commerce Act authorizing operation as a motor common carrier of general commodities, with exceptions, between Silvis and Chicago, from Silvis over Illinois Highway 92 to its junction with U. S. Highway 34, and thence over U. S. Highway 34 to Chicago, and return over same route, serving no intermediate points, and subject to five restrictions, including one limiting the authorized service to that which is auxiliary to, or supplemental of, rail service. Subsequently the certificate was issued.

In No. MC–F–2327, *Rock Island Motor Transit Co.—Purchase—Frederickson,* 39 M.C.C. 824, decided November 28, 1944, Division 4 authorized Motor Transit to purchase the general commodity operating rights of D. H. Frederickson and J. H. Frederickson, doing business as J. H. Frederickson & Son, hereinafter called the Frederickson Line, covered by the certificate issued in No. MC–530 on June 7, 1941, between Harlan and Omaha, from Harlan over Iowa [fol. 6] Highway 64 to Council Bluffs, thence across the Missouri River to Omaha, and return over same route, serving the intermediate and off-route points of Avoca, Shelby,

Minden, Neola, Underwood, Weston, and Council Bluffs, and the certificate issued in No. MC–530 (Sub-No. 1) on March 15, 1943, between Avoca and Atlantic, from Avoca over U. S. Highway 59 to its junction with U. S. Highway 6 near Oakland, thence over U. S. Highway 6 to Atlantic, and return over Iowa Highway 83 to Avoca, serving the intermediate and off-route points of Hancock, Atlantic, Oakland, Marne, and Walnut. In authorizing this transaction, Division 4 imposed no restriction on the kind of service which Motor Transit could render under the rights to be acquired, nor did it impose any condition reserving the power to impose restrictions in the future. This transaction was consummated on January 22, 1945. No certificate was issued and by order of February 5, 1945, on the Commission's own motion, this proceeding and Nos. MC–F–445 and MC–29130 were reopened for reconsideration on the existing records to determine (a) the conditions or restrictions, if any appear necessary, which should be imposed to insure that the motor-carrier service performed by Motor Transit is limited to that which is auxiliary to, or supplemental of, rail service of Rock Island, and (b) the conditions, if any appear necessary, which should be imposed so as to make the authority granted Motor Transit subject to such further conditions and restrictions as the Commission may find necessary to impose in order to insure that the service shall be auxiliary to, or supplemental of, such rail service.

In No. MC–F–445, *Rock Island M. Transit Co.—Purchase —White Line M. Frt.*, 40 M.C.C. 457, decided March 4, 1946, the Commission, Commissioners Mahaffie and Miller dissenting, imposed the following restrictions and conditions on the certificate issued in No. MC–29130 to the extent that it embraces the operating rights acquired from the White Line and on the certificate to be issued representing the operating rights acquired from the Frederickson Line:

1. The service to be performed by The Rock Island Transit Company shall be limited to service which is auxiliary to, or supplemental of, train service of The Chicago, Rock Island and Pacific Railway Company.

2. The Rock Island Motor Transit Company shall not

render any service to, or from or interchange traffic at any point not a station on the rail line of The Chicago, Rock Island and Pacific Railway Company.

3. No shipments shall be transported by The Rock Island Motor Transit Company between any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebr., Des Moines, Iowa, and collectively Davenport and Bettendorf, Iowa, and Rock Island, Moline, and East Moline, Ill.

4. All contractual arrangements between The Rock Island Motor Transit Company and The Chicago, Rock Island and Pacific Railway Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties.

5. Such further specific conditions as we, in the future, may find it necessary to impose in order to insure that the service shall be auxiliary to, or supplemental of, train service.

[fol. 7] Subsequently on June 9, 1947, these proceedings were reopened for further hearing and such hearing was held at Chicago. A proposed report was waived. In No. MC–F–445, *Rock Island M. Transit Co.—Purchase—White Line M. Frt.,* 55 M.C.C. 567, decided April 11, 1949, the Commission on further hearing, Chairman Mahaffie, and Commissioners Miller and Mitchell dissenting, affirmed its findings in 40 M.C.C. 457. At this hearing Motor Transit entered a special appearance solely to contest the Commission's jurisdiction in assigning the proceedings for such hearing. It presented no witnesses and offered no evidence.

After this last decision of the Commission, Motor Transit filed a complaint in the United States District Court N. D. Illinois E. D. to set aside, annul and enjoin the order of the Commission. The three judge statutory court unanimously set aside, annulled, and permanently enjoined the Commission from enforcing its orders of March 4, 1946, and April 11, 1949. *Rock Island Motor Transit Co.* v. *United States,* 90 F. Supp. 516, decided November 29, 1949. The matter was then appealed to the United States Supreme Court and that court reversed the judgment of the

District Court and remanded the proceeding with directions to dismiss the complaint. Justices Black, Douglas, Jackson, and Burton dissented. *United States* v. *Rock Island Co.* 340 U. S. 419, decided February 26, 1951. This decision did nothing more than hold that, under the circumstances disclosed, the Commission had the power to impose the restrictions and conditions set forth above.

A certificate was issued to Motor Transit on September 11, 1951, imposing the above-described restrictions and conditions in connection with the authorized operations over the routes of the White Line and the Frederickson Line. Prior to the issuance thereof, applicant filed an application for temporary authority for 180 days. By order of August 30, 1951, in No. MC–29130 (Sub-No. 69TA) it was granted such authority for a period of 60 days by the Commission to transport general commodities, with exceptions, over the routes here under consideration, serving the intermediate and off-route points named above, except Coralville, Weston, and Malcom, subject to a maximum weight limit of 2,000 pounds on each shipment, and the restriction that no shipment may be transported between Chicago and Omaha, nor between any of the following points, or through, or to, or from, more than one of said points: Omaha, and collectively, Davenport, Bettendorf, Rock Island, Moline, and East Moline. Thereafter, this application with respect to the remainder of 120 days was assigned for hearing, which hearing required eight days. By order (no report in this matter) of October 30, 1951, temporary authority for an additional 120 days from November 3, 1951, was granted, authorizing service at the intermediate and off-route points mentioned above and also Coralville and Weston, subject to a maximum weight limit of 5,000 pounds on each shipment, and the key point restriction just referred to. This temporary authority, by order of February 25, 1952, was continued indefinitely pending determination of the application in the captioned proceeding for permanent authority.

Prior to the imposition of the restrictions and conditions in the certificate issued September 11, 1951, applicant operated under the White Line rights for a period of 14 years, and under the Frederickson Line rights for a period

of 7½ years, in substantially the same manner as other motor common carriers operating in the Iowa area not affiliated with a railroad. The White Line rights are the heart of applicant's operations, not only in Iowa, but also in other States east, west, north, and south thereof, because it is necessary to transport all interstate traffic (1) [fol. 8] moving through the Davenport or Omaha gateways over the entire length of U. S. Highway 6 in Iowa or a segment thereof, (2) moving between the Kansas City gateway and points north, east, or west of Des Moines, over a segement of that highway, and (3) moving between the Minneapolis-St. Paul gateway and points south, east, and west of Des Moines, over a segment of that highway: The above-quoted restrictions not only affected the White Line rights, but also all other rights held by applicant in Iowa and other States which are not similarly restricted. For example, applicant, in addition to the White Line and Frederickson Line rights, holds certificates in Iowa that do not contain a key-point or the auxiliary to, or supplemental of, train service, restrictions, (1) between Homestead and Cedar Rapids, (2) between Iowa City and Wellman, (3) between Clinton and Lineville, through Davenport, Muscatine, Washington, Fairfield, Ottumwa, Eldon, Unionville, Centerville, Plano, Numa, Seymour, Promise City, Corydon, Allerton, and Clio, (4) between Des Moines and Ottumwa through Pella, Oskaloosa, Fremont, and Eddyville, (5) between Des Moines and Lamoni (the Kansas City route) through Indianola and Osceola, (6) between Des Moines and Dexter through Booneville, (7) between Casey and Menlo, on the one hand, and, on the other, Guthrie Center, over Iowa Highway 25 and also through Glendon, (8) between the junction of U. S. Highways 6 and 71, just west of Wiota, and Audubon, (9) between the junction of U. S. Highway 6 and Iowa Highway 48 southwest of Atlantic and Omaha through Griswold and Treynor, and (10) between Des Moines and Northwood (the Minneapolis-St. Paul route) Cambridge, Ames, Collins, Nevada, Iowa Falls, and Mason City. The only portions of applicant's authority in Iowa that were originally subjected to these restrictions are: (1) between Cedar Rapids and Decorah, (2) between Muscatine and

Kalona through Lone Tree, and (3) between Wellman and West Chester.

As indicated, the White Line and Frederickson Line rights, except those granted in No. MC–530 (Sub-No. 1), resulted from proceedings under section 206(a) of the Interstate Commerce Act. The excepted proceeding involved an application under section 207(a) of the act. The restrictions and conditions set forth above were imposed on the certificate and authorities previously issued or granted, and as a result thereof applicant filed the captioned application for authority under section 207(a) of the act seeking the identical authority it possessed prior to September 11, 1951, when the restrictions and conditions were imposed. The purpose of this application is to obtain operating authority not subject to restrictions or conditions that prevent applicant from operating as a motor carrier having no affiliation with a railroad.

Fitness

Applicant's operations are under the direct control of W. F. Peterson, General Manager. He is an able and experienced operator. Its balance sheet as of January 31, 1952, shows assets of $1,858,620, and liabilities of $1,758,620, excluding capital stock, but including $873,527 advances payable to Rock Island, $250,000 long term bank loan, and $149,764 unappropriated surplus. As of October 26, 1951, applicant owned and operated 152 trucks, 228 tractors, 303 trailers, 4 service trucks, and 4 busses. It is fit and able, financially and otherwise, properly to conduct the proposed operation.

Applicant's Testimony

The President, Vice-President, and Treasurer of Rock Island are the only officers of the railroad that are also [fol. 9] officers of Motor Transit. The Vice-President receives $208 a month of his salary from Motor Transit. The General Manager and General Freight Agent of Motor Transit receive one-third and one-fifth of their salaries, respectively, from Rock Island. Although Motor Transit is a subsidiary of Rock Island, it operated prior to Sep-

tember 11, 1951, under permanent authority in substantially the same manner as any independent motor carrier transporting less-than-truckload and truckloads of general freight over practically all of its authorized routes in Iowa, and in addition it also transported rail-billed freight. Since that date its operations have been conducted under temporary authority as curtailed by the maximum weight limitations of 2,000 and 5,000 pounds per shipment and the key-point restrictions above described. These restrictions naturally affected the volume of traffic transported by Motor Transit. During the first six months of 1951, it handled 1,402 truckloads and during the last six months of that year 716 truckloads were transported. A substantial part of this decline in truckload traffic is attributed to the restrictions.

Over the years Motor Transit enjoyed interstate traffic received from connecting motor carriers at various points for delivery at Iowa points involved in this proceeding. Some of this traffic, although routed for delivery at such destination points by a carrier other than applicant, was delivered to applicant by the connecting carrier because the designated delivering carrier would not accept the shipments, or the carrier in possession chose to disregard the routing. During January, February, March, and April, 1951, applicant received 233 such shipments at Chicago. Some of it was even turned over to applicant by carriers authorized to serve the destination points, because they deemed it unprofitable to handle the shipments. This occurred frequently when light or bulky articles comprised the shipment. After the weight limitations were imposed in the temporary authorities, and to some extent prior thereto by the efforts of certain connecting lines in discontinuing the delivery of interchange traffic to applicant, the volume of less-than-truckload traffic declined. For example, the traffic received by applicant during November and December, 1951, (5,000 pound weight limitation in effect) at the following points was less than the tonnage received in the same months of 1950, after elimination of all shipments weighing over 5,000 pounds, by the amounts indicated: Chicago 432,734 pounds, Davenport 136,683 pounds, Des Moines 89,357 pounds, and Omaha 55,123

pounds. During the same period there was an increase of 13,984 pounds received at Cedar Rapids. From December 1, 1951, to March 4, 1952, the 5,000-pound restriction required applicant to refuse 38 shipments ranging from 5,600 to 34,000 pounds. Some shippers have found it necessary to make more than one shipment out of one weighing in excess of 5,000 pounds in order to get it through to destination.

The gross revenue earned by applicant on motor carrier traffic originating at the terminal points of Chicago, Rock Island-Moline, Davenport, Cedar Rapids, Des Moines, and Omaha from September 1, 1951, to February 29, 1952, was 23.7 percent ($206,821) less than the revenue earned in the same period of 1950-1951. In 1950 applicant's earned profit before income was $160,586, and in 1951 it was $58,582 (deficit). The profits for the months of August, 1950 and 1951, respectively, were $35,465 and $11,629. The latter figure represent- the profit in the month immediately preceding the imposition of the weight limitation on the temporary authority granted August 30, 1951. September, October, and November are usually applicant's best revenue producing months. In those months of 1950 its profits before income taxes totaled $125,802 as compared with $18,658 (deficit) for the same period in 1951. In December, 1950, such profit was $681 (deficit) and in December, 1951, it was $51,553 (deficit).

[fol. 10] The only realty owned by Motor Transit is a garage at Des Moines, which stands on ground owned by Rock Island. Its terminals are portions of the freight house facilities of Rock Island, which were not being used owing to the decline in less-than-carload traffic. These terminals are leased at a rental of 6 percent of the depreciated value of the property. Other facilities used by applicant are purchased or leased from independent commercial enterprises. The Chicago terminal is 1,200 feet long and 90 feet wide with 28 doors. There are 12 office employees, 18 dockmen, and 24 city drivers under the agent's jurisdiction at that point. Applicant has interline arrangements with 120 motor carriers serving Chicago. Since the weight limitations were imposed the tonnage has declined about 45 percent. At Davenport there are 8 office employees

and 48 dockmen and drivers, including over the road drivers. The dock is about 250 feet long with 24 doors. This terminal serves the Tri-City area of Bettendorf, Rock Island, Moline, and East Moline, and freight is interchanged with connecting motor carriers in that area. The weight limitation has prevented applicant from accepting certain shipments of more than 5,000 pounds and in truckloads from such carriers. The employees at Iowa City are 2 in the office, 3 dockmen, 5 city and 2 road drivers. Since August 30, 1951, there has been some decline in the outbound traffic and a larger decrease in the inbound shipments amounting to a cut of approximately 25 percent in revenue. Shipments are interchanged with one motor carrier at this point. The terminal at Cedar Rapids has facilities for loading or unloading five trucks at a time and there are 20 employees, not including over the road drivers, at that point. Applicant has substantial docking facilities at Des Moines. Prior to August 30, 1951, it had 62 employees at that point. At the time of the hearing on the application for temporary authority beginning September 24, 1951, the number of employees had been reduced to 43 and by March 28, 1952, a further reduction to 27 had been made. Some interchange of freight is made at Des Moines. The freight facilities at Atlantic occupy a space about 100 feet by 40 feet and 1 clerk and 3 drivers are employed there. One of the drivers is used part time as a dockman. The Omaha terminal has 15 doors and there are 16 employees, not including over the road drivers. As of July 30, 1951, applicant had about 750 persons on its regular payroll and its peak during that year was 883 persons. On March 31, 1952, it had between 700 and 800 employees. At the time the Commission imposed the five restrictions and conditions quoted above, the General Manager of applicant estimated that it would be necessary to lay off 222 employees, but since observing the results therefrom for a period of 7 months he is of the opinion that a much greater reduction in the number of employees (up to 350) must be made in the event the instant application is not granted. The employees were represented by counsel at the hearing and they support this application.

Appendix A attached lists the points on U. S. Highway 6, (White Line) except as noted, in station order west from East Moline to Omaha, and Appendix B shows the points served by applicant under the Frederickson Line authority, which will be helpful in following the discussion of Motor Transit's operations. Insofar as here material, the daily, except Sunday, and as otherwise noted, operations of Motor Transit consist of: (1) from Chicago between 7:30 and 9:00 p.m. 2 units of equipment to Des Moines proper, 1 unit through Des Moines peddling all points west thereof to Council Bluffs, 1 unit through Des Moines to St. Paul peddling points north of Des Moines, 1 unit to Davenport proper, 1 unit to the Tri-Cities proper, 1 unit through Davenport to Iowa City peddling all points west of Davenport, and 1 unit to Cedar Rapids through Iowa City and serving that point; (2) from Davenport at 7:00 a.m. 1 unit to Atalissa with 10,000 to 14,000 pounds, of which 30 percent is rail-billed freight, peddling all intermediate and [fol. 11] off-route points on outbound trip and picking up 300 to 2,000 pounds on return trip, which is completed between 4:30 and 6:30 p.m., 1 unit to Cedar Rapids, through Iowa City, peddling Muscatine, Nichols, and Lone Tree, points on a route south of U. S. Highway 6, and 1 unit to Des Moines through Ottumwa, a route south of U. S. Highway 6, peddling all intermediate points, (3) from Iowa City at 8:00 a.m. 1 unit to Victor with 3,000 to 17,000 pounds, of which 20 percent is rail-billed freight, peddling intermediate and off-route points and picking up about 500 pounds on return trip, which is a 5 day operation unless the tonnage requires additional service on Saturday, and 1 unit at 8:00 a.m. to Wellman, serving Kalona, points south of U. S. Highway 6, with 10,000 to 20,000 pounds, of which 20 percent is rail-billed freight, and this unit returns empty except around the holidays when dressed turkeys move from Wellman; (4) from Des Moines at 7:00 a.m. 1 unit to Colfax, peddling Altoona and Mitchellville, handling 3,000 to 5,000 pounds and picking up 7,000 to 8,000 pounds on the return trip, which arrives at Des Moines between 6:00 and 7:00 p.m., (5 days a week and Saturday if freight warrants), 1 unit at 8:00 to 10:00 p.m. to Newton where the trailer is dropped and

one picked up for movement to Chicago and stops are made at Grinnell and Iowa City to pick up Chicago freight (The counterpart of this run on the westbound trip drops a trailer at Newton and picks one up for Des Moines), 1 unit at 10:00 p.m. to Grinnell, peddling Kellogg, and picking up on return trip arriving Des Moines between 4:00 and 5:00 p.m. 1 unit to Davenport serving Brooklyn, Marengo, Iowa City, Lone Tree, and Nichols, dropping the trailer at Muscatine and picking up one for movement to Davenport (There is a corresponding operation westbound), 1 unit at 7:00 a.m. to Anita with 10,000 to 12,000 pounds, peddling Stuart, Dexter, Menlo, Casey, and Adair, and it returns empty, but prior to the imposition of the restriction this unit picked up on the return trip from 16,000 to 20,000 pounds, 1 unit at 3:00 a.m. to Audubon with 10,000 to 15,000 pounds peddling Atlantic and three points on the Audubon branch north of U. S. Highway 6 and it returns with very little freight, 1 unit at 10:00 p.m. to Omaha, peddling Oakland, which is 2 units less than were operated prior to the restrictions and a peddler operation from Des Moines to Griswold and return has been eliminated for the same reason, 2 units at 9:00 p.m. to Cedar Rapids, with very little peddling enroute, and an exchange of trailers at Cedar Rapids, at or shortly after midnight, peddling Marengo, Brooklyn, Grinnell, and Newton on the return trip, 1 unit to Davenport, through Oskaloosa and Fairfield, peddling the smaller intermediate points, 1 unit to Ottumwa, 1 unit to Des Moines from Oskaloosa and return, 1 unit to Des Moines from Fairfield and return, 1 unit at 7:00 a.m. to Mason City, peddling intermediate points, 1 unit straight through to St. Paul, 1 unit to St. Paul peddling Mason City, Iowa, and Albert Lee and Owatonna, Minn., and 2 units at 9:00 to 10:00 p.m. to Kansas City, one of which peddles Indianola the only intermediate point served; (5) 1 unit at 8:00 a.m. from Atlantic peddling Marne, Walnut, Avoca, and Harlan, and return; (6) 1 unit, instead of up to 6 units, prior to August 30, 1951, from Omaha to Des Moines, and 1 unit (16 foot van body instead of a trailer) in place of two peddle operations, one to Des Moines and one to Harlan, peddling Lewis, Treynor, Carson, points on Iowa High-

way 100, south of U. S. Highway 6, Oakland, Hancock, Avoca, Shelby, Minden, Neola, Underwood, and Weston, picking up at those points and returning to Omaha as indicated over Iowa Highway 64; and (7) 3 units from Cedar Rapids to Des Moines, 2 units to Davenport, 1 unit to Chicago, and 1 unit to Ottumwa.

[fol. 12] Ten to fifteen percent of the freight peddled on the runs out of Des Moines is rail-billed freight. Sixty-six percent of the mileage on turn-around peddle runs is operated empty from the standpoint or revenue received. Prior to August 30, 1951, there were from five to seven truckloads of small shipments from Chicago to Des Moines. The restrictions have reduced this movement by one or two truckloads, and the total tonnage by approximately 45 percent. No rail-billed freight is now moving by applicant between Chicago and Des Moines. Formerly the eastbound daily traffic from Des Moines consisted of one or two truckloads of small shipments of rail-billed freight and an equal number of truckloads of like motor-billed freight. Presently the equipment is moving eastbound empty to Chicago due to the restrictions. The restrictions in the existing temporary authority prohibits applicant from transporting shipments between Chicago and Omaha. This requires applicant to deliver westbound shipments to Roberts Transfer at Des Moines for movement to Omaha. Those destined beyond Omaha to points on applicant's lines are redelivered to applicant for movement to destinations. Shipments in the opposite direction are handled in the same manner.

The predominate movement of empty box cars by Rock Island is westbound from Chicago, which means that some of this scarce equipment presently must be utilized for the transportation of eastbound rail-billed freight that formerly moved in the motor truck equipment that is now being returned empty from Omaha and Des Moines to Chicago. Pickup and delivery service is generally rendered by Motor Transit for Rock Island at most of the points involved for which it is paid, under a contract arrangement, an amount per 100 pounds depending on the commodity. At some points, such as Chicago and Minneapolis this type of service is rendered for Rock Island

by cartage companies. Shipments originating at Chicago to be billed by Rock Island are either delivered by the shipper to, or are picked up by the cartage company and hauled to, the Rock Island freight facilities in Chicago proper where they are loaded into cars for movement to Burr Oak, the transfer at Blue Island, Ill., 15 miles, for classification and billing. Prior to the imposition of the restrictions and at present in some circumstances rail-billed freight for movement by truck was and is returned from Burr Oak to Chicago proper and transferred to Motor Transit for movement to destinations. This resulted and results in a substantial delay as compared with motor-billed freight picked up in Chicago by Motor Transit and forwarded the same evening to destinations. When it is necessary, due to key-point restrictions, to move this traffic by rail to Davenport or Des Moines for movement beyond by Motor Transit, it takes two or three days and sometimes longer from Burr Oak to Davenport principally due to the working of the cars through the Silvis, Ill., yard, just east of the Tri-Cities. Similar delays occur on rail-billed freight from Minneapolis and St. Paul to Des Moines and points beyond, and at other points. These delays in handling and in transit result in rail-truck services that do not meet the needs of the public for expedited handling of less-than-truckload traffic. Part of this unsatisfactory service is attributed to the key point restrictions, which prevent Motor Transit from rendering a flexible and economic service.

At points where applicant performs pickup service for Rock Island, the freight is delivered to the railroad agent for billing and if it is to be moved out by Motor Transit, it is redelivered to applicant by employees of Rock Island. Where the dock facilities of Motor Transit are a part of the warehouse of the railroad, this redelivery consists of moving the freight from the portion of the building used by the railroad to the portions used by Motor Transit. The portion used by each carrier is delineated by a painted line on the floor or platform. The operations of Motor [fol. 13] Transit are entirely separate and distinct from those of Rock Island. Each has its own employees and facilities. Neither of these carriers solicits freight for the other. The charges on rail-billed freight delivered

to the consignee by Motor Transit are collected by the Rock Island agent and, of course, charges on motor-billed freight are collected by the Motor Transit agent.

Rail-billed freight whether moving by Rock Island or Motor Transit cannot be interchanged with other motor carriers, because Rock Island is not a party to the tariffs participated in by such motor carriers. The Middle West Motor Freight Bureau publishes the tariffs in effect in the area involved here. The policy of that Bureau is not to establish joint rates with the rail carriers. No railroad is a participating carrier in tariffs published by the Central States Motor Freight Bureau for motor carriers in the Chicago area. The witness was aware of only one agency, the Southwestern Motor Freight Bureau, publishing joint motor-rail rates.

In 1946 Class I Railroads of the United States handled 24,300,000 tons of less-than-carload freight. In 1950 that figure dropped to 10,900,000 tons. Class I truck operators (87.8% thereof) in 1946 in the United States handled 104,700,000 tons of traffic and in 1950 slightly over 200,000,000 tons. The tonnage transported by truck lines in 1941 was approximately double the tonnage transported by them in 1938. There has been a consistent increase between 1941 and 1951 amounting to almost 200 percent. During the period 1941-1946 the less-than-carload tonnage for Class I Railroads increased and then dropped substantially below the 1938 figure in 1950. In the five years from 1926 to 1930 inclusive, the Class I Railroads originated an average 1,279,196,826 tons of freight, carload and less-than-carload. In 1949 they originated 1,224,001,369 tons.

During the years 1945 to 1950, inclusive, the volume of less-than-carload tonnage handled by Rock Island over the system dropped from 496,479 tons to 264,612 tons. The motor-billed freight of Motor Transit in the comparable period varied from 112,468 tons in 1944 dropped to 97,697 tons and gradually increased to 159,348 tons in 1950.

A group of nine motor carriers serving the midwestern territory had a combined tonnage of 755,000 tons handled in 1944 and 1,852,540 tons in 1950. In the comparable period Des Moines Transportation handled 49,871 tons in 1944

and 178,000 tons in 1950. Percentagewise this carrier's volume of business handled increased to a greater extent than the composite figure of the nine selected midwestern carriers. Iowa-Nebraska tonnage in 1944 was 15,421 tons and 43,678 tons in 1950. Merchants Motor Freight, hereinafter called Merchants, a very large operator, transported 127,635 tons in 1944 and in 1950, 277,443 tons. During the period 1944 to 1950 inclusive, the average length of haul for the nine representative midwestern trucking companies rose, from 335 in 1944, to 527 miles in 1950, while the average per-car-haul of Rock Island declined from 354.1 miles to 318.35 miles in the same period, and the average haul of Motor Transit increased only from 165 miles in 1944 to 177 miles in 1950.

During the same period the average load in tons of Des Moines Transportation rose from 9.41 to 12.11 tons, Iowa-Nebraska from 10.03 to 13.35 both of which were greater than the composite average of the selected nine midwest carriers. During the same period the average load hauled by Motor Transit declined.

For the period January 29, to February 3, 1951, a comparative study of the volume of business handled at terminals of selected motor carriers doing business in Des Moines was made. In this period Motor Transit performed pickup and delivery service truckloads in Des Moines on 221,609 pounds of freight and of less-than-truckloads of 1,769,751 pounds. The pickup and delivery service included both rail-billed freight and motor carrier freight. Des Moines Transportation performed pickup and delivery service truckloads of 1,751,134 pounds of freight and less-than-truckload of 1,922,870 pounds.

[fol. 14] Applicant is the only motor carrier holding intrastate rights on the White Line and Frederickson Line routes, except that it does not possess such rights between Des Moines, on the one hand, and, on the other, Dexter, Menlo, and Stuart. Intrastate traffic and rail-billed and motor-billed interstate traffic are transported in the same vehicles used in peddle operations. No other motor carrier has attempted to furnish the type of service applicant has rendered over the years at the small points on these routes out of a feeling of obligation to provide these communities

with adequate service. To continue the quality and frequency of the peddler services maintained in the past, it will be necessary for Motor Transit to be able to transport the three classes of traffic just mentioned and also truckload traffic, without being subject to the interstate restrictions and conditions considered herein.

These peddler services are very expensive to operate and it is impossible for applicant to break even under the handicaps contained in its existing authorities. The truckload traffic is essential to support the peddler operations.

There are 24 cities and towns between Davenport and Des Moines. Eleven of these, Walcott, Stockton, Durant, Wilton, Atalissa, Coralville, Oxford, Homestead, South Amana, and Altoona, have no motor carrier service other than applicant, and it maintains the only regularly scheduled service at six other of these points, West Liberty, Marengo, Ladora, Victor, Brooklyn, and Colfax. There are ten points between Des Moines and Omaha and applicant is the only motor carrier providing regular service at eight of them, Dexter, Stuart, Menlo, Casey, Adair, Anita, Wiota, and Oakland. The same is true of Shelby and Hancock points on the Frederickson Line route. Lewis, an off-route point southwest of Atlantic, is served only by Motor Transit. Griswold, Carson, and Treynor on Iowa Highway 100 are served only by applicant and a local carrier operating between Omaha and Griswold. Brayton and Hamlin on the Audubon branch are dependent solely on the service of applicant, and the same situation prevails at Wellman and Kalona points in eastern Iowa southwest of Iowa City.

Testimony in Support of Application

Iowa State Commerce Commission. This Commission is interested in seeing that unrestricted motor carrier service is not only available but actually performed at the various smaller points here involved. It supports the instant application solely because applicant is the only carrier that for a number of years prior to September, 1951, had been rendering an adequate and efficient service on less-than-truckload freight at the many small points on the White and Frederickson Lines and certain points on its authorized routes adjacent to the former line, and the only carrier

since that date that has been providing consistent, but not adequate, service to the extent authorized under its temporary authorities. During the past two years the trend of motor carriers operating in Iowa generally has been to get away from rendering local service on small shipments. This Commission grants intrastate authority to only one motor carrier to serve points on a given route.

Chambers of Commerce and Others. The Davenport Chamber of Commerce serves approximately 175 firms in Davenport, East Davenport, and Bettendorf, Iowa. These firms manufacture many articles that move in interstate commerce. In addition several nationally known firms ship pool-carloads to Davenport for distribution from that point. Shipments in such carloads consist principally of foodstuffs, confectionary, ball bearings, cigerettes, gas meters, [fol. 15] and soap and soap products, weighing from 150 to 15,000 pounds per shipment. Rail service to the considered points on U. S. Highway 6 from Davenport takes from six to twelve days. Merchandise cars after arrival at destination, in some instances, have been held three days before being switched to the freight house for unloading. Such rail service is inadequate. Shippers and consignees must rely on the one-to-two-day service of applicant. The curtailment of applicant's service by the restrictions imposed will deprive shippers of a peddler service which is essential in the conduct of their businesses. No other motor carrier has offered or maintained service on less-than-truckload shipments remotely approximating that of applicant.

Omaha Chamber of Commerce. Many of the members of this organization are shippers of various commodities to points in Iowa on applicant's routes. The majority of such shipments are in less-than-truckload quantities, but occasionally there are truckload shipments. Applicant is the only carrier rendering service from Omaha to Buffalo, Columbus Junction, Coralville, Durant, Earlham, Eddyville, Eldon, Hancock, Kalona, Libertyville, Princeton, Washington and Wellman. This organization believes that all of the existing restrictions on applicant's operating authority involved in this proceeding should be removed so that applicant may render a comprehensive overall service in the same manner as it did for many years prior to September, 1951.

Chicago Association of Commerce and Industry. The industrial traffic council of this association consists of 400 of the large industries in the Chicago area and 2,100 shippers in the same area use its shipping guide service. A large volume of traffic moves from the Chicago area to points in Iowa considered herein. There is plenty of truck service between the Chicago area, on the one hand, and, on the other, the large Iowa cities, but the shippers, since the imposition of the restrictions on applicant's authority, have experienced difficulty in obtaining adequate service to an[illegible]n the small Iowa towns, some of which are served only by applicant. This association believes that its members' interests will best be served by applicant holding unrestricted authority to transport both less-than-truckload and truckload traffic, which is the only manner the operation can be conducted economically and efficiently.

Des Moines Chamber of Commerce has as members approximately 600 concerns interested in shipping. Applicant's service to the small towns on U. S. Highway 6 is not duplicated by any other carrier. In fact the trend on the part of many carriers is to avoid peddle-service and to operate principally from terminal to terminal. Some of its members have shipments over 5,000 pounds each. Curtailment of applicant's interstate service would be harmful to its members and in turn no doubt would result in the impairment of this carrier's intrastate service.

Chamber of Commerce of St. Joseph, Mo., represents clothing and candy manufacturers, wholesalers of hardware, producers of saddlery, sporting goods, furniture, and meat packers, who ship to points on U. S. Highway 6 in lots ranging from 100 pounds to 6,000 pounds. This traffic moves in interline service to Motor Transit at Des Moines or some other interchange point on U. S. Highway 6. Its main difficulty is to keep the large motor carriers serving the smaller points on their authorized routes because they are unwilling to render this service owing to the higher costs of handling such traffic without added revenue. This Chamber asks that the application be granted.

[fol. 16] *The Chamber of Commerce of Mason City, Iowa,* is primarily interested in retaining the services of applicant on traffic from the Tri-Cities. The majority of its members

have been relying on this service for some time for the transportation of their less-than-truckload traffic. These members deem that applicant's service is superior to the services of other motor carriers and should be retained without crippling restrictions.

The Chamber of Commerce of Muscatine, Iowa, has 300 members, including producers or manufacturers of buttons, grain alcohol, industrial water pumps, various grain products, foods, sash and doors, and vegetables. Some of them have from 250 to 450 employees. These articles and others, including those dealt in by wholesale grocers and grain and feed dealers are shipped out of Muscatine to interstate destinations, such as Omaha, and to intrastate destinations, served by applicant. Loss of applicant's unrestricted service would be catastrophic.

Ottumwa, Iowa, Chamber of Commerce, representing its members, including a meat packing plant, a farm implement manufacturer, a lawn mower company, machine shops, warehouses, and retail stores, is particularly interested in retaining the service of Motor Transit to and from Omaha, Tri-Cities, and Minneapolis-St. Paul. There are other available carriers serving such points, but their services lack satisfactory regularity and they are slow on picking up traffic. Some shipments weigh 8,000 pounds and the shipper objects to packaging them to meet the present weight limitation.

Iowa City Chamber of Commerce, is endeavoring to attract new business enterprises and the available transportation facilities are very important in this respect. The outstanding attraction to industries is the trucking facilities at Iowa City and the very nub of that is Motor Transit's interstate service.

Burlington (Iowa) Shippers Association, represents 75 shippers at Burlington, Fairfield, Ottumwa, Keosaugua, Fort Madison and Keokuk, and Monmouth, Ill., of various commodities, including steam engines, automobile chains, bakery goods, poultry and barnyard supplies, agricultural machines, furniture, desks, food products, hardware, dry goods, notions, household laundry appliances, gloves, dairy equipment, lumber and building supplies, paper items, cereals, platform trucks, coasters, carbide, bee supplies, and candles. In addition, many other commodities move into

Burlington and are subsequently shipped out by motor carriers operating over routes in Illinois to the Tri-Cities where they are delivered to Motor Transit for movement beyond to destinations served by that carrier. Traffic also moves in the same manner in the reverse direction. The need for Motor Transit's service is more pronounced now than it was years ago, because it renders regular efficient service to the small towns on small shipments and accepts so-called "balloon" freight (light and/or bulky articles) which other carriers are very reluctant to transport, or refuse to handle, or by tariff provisions, so-called "flag-outs", eliminate their participation in the rates on such traffic. In the middle 1920's the truck industry took away from the rails the less-than-carload traffic and now they do not want that traffic, because it costs too much to handle. Some carriers have even placed embargo-s on this traffic to avoid handling it. It would be impossible for Motor Transit to provide the type of service it rendered prior to September, 1951, if the 5,000-pound limitation and the key-point restrictions are retained. These should be eliminated. It is pointed out that Burlington, a subsidiary of the Chicago, Burlington and Quincy Railroad Company, which operates in adjacent territory, is not so limited and restricted. [fol. 17] *Traffic Bureau of East Moline, Moline, and Rock Island, Ill.* This Bureau has 68 members representing practically all industries in the Tri-Cities east of the Mississippi River. From this area there are daily shipments to many of the considered destinations in Iowa where applicant provided peddler service unhampered by restrictions. Discontinuance or curtailment of this service will adversely affect shippers in this area as they would have to rely on weekly or tri-weekly rail service. This type of motor service is not provided by any other motor carrier operating along the White Line and Frederickson Line routes. Owing to the 5,000 pound weight limitation some of the consignors have split one shipment into two or more shipments to stay within the limitation and in order to get service.

Minneapolis, (Minn.) Traffic Association. This association represents, insofar as here pertinent, 675 members, 32 of whom shipped to points on U. S. Highway 6 during January, 1952. The market of Minneapolis has built up its sales

on the small units to points in Iowa served by applicant because of its peddler service available thereto for many years. It desires that all restrictions on the authority of applicant here considered be removed.

Traffic Bureau of Cedar Rapids, Iowa, Chamber of Commerce. Many industries are located at Cedar Rapids, and there is a regular flow of interstate traffic to and from that point. A number of motor carriers serve Cedar Rapids and service of all of them is satisfactory to the larger towns, but all of them, except applicant, neglect service at the smaller places. Applicant's service to such smaller places is predominately superior when not hampered by restrictions. This bureau asks that applicant be authorized to operate as it did prior to August 30, 1951.

Chamber of Commerce of Atlantic, Iowa. This town has the usual run of retail stores and several manufacturing establishments and they need the service of applicant (1) to assure the continuance of good service to retail outlets, and (2) to provide the kind of service that is essential in persuading new industries to locate at Atlantic. This point is served by about six other motor carriers, but Motor Transit's service is the basic service.

Motor Carriers: The Burlington-Chicago Cartage, Inc., and *the Burlington-Chicago Cartage* operator of the Chicago-Nebraska Motor Express, Kewanee, Ill., conduct general commodity operations in Illinois, Iowa, (a few eastern points) and Nebraska. They are primarily interested in tonnage from points in northwestern Illinois to destinations on U. S. Highway 6 in Iowa interlined for a number of years with applicant through applicant's terminal at Ottumwa, Iowa. Some of this traffic was formerly interchanged at the same point with Watson Bros. Transportation Co., Inc., hereinafter called Watson Bros., but that carrier closed its terminal at Ottumwa and at times has refused to accept interline shipments at Burlington, Iowa, the logical gateway on traffic moving to points on U. S. Highway 6 by Watson Bros. or to Attumwa for delivery to applicant. Applicant's service has been entirely satisfactory and no other connecting line carrier provides the same quality and quantity of service which is essential to the prompt handling of shipments from northwestern

Illinois to points in Iowa on U. S. Highway 6, particularly the regular monthly flow of dated advertising circulars of sales to be held on a designated day, ranging in weight from 1,000 to 10,000 pounds per shipment. The existing 5,000-pound restriction has caused inconvenience to the shippers because they have had to split their shipments to observe this limitation.

[fol. 18] *Atkins Transfer Company, Inc.* This carrier's main office is at Nashville, Tenn. It holds a certificate to transport general commodities, with exceptions, between Chicago and Nashville and operates 108 pieces of equipment. There is a regular movement of less-than-truckload and truckload traffic northbound to Chicago for interline there and movement to Iowa points. Atkins prior to 1950 had considerable difficulty in finding carriers at Chicago willing to accept this traffic. Early in 1950 it began using applicant's service, which solved its problem in this respect. Restoration of the service rendered by applicant prior to September, 1951, is required to enable Atkins to again transport truckloads of the low rated freight it had to relinquish when applicant was required to discontinue the movement of truckloads west from Chicago.

Clipper Transit Co., of Manitowoc, Wis., is a common carrier serving eastern Wisconsin. It has interlined shipments weighing from 100 to 400 pounds with Motor Transit at Chicago for such points as Oxford, Nichols, Wilton Junction, Walcott, and Wellman. Discontinuance of Motor Transit's service would make it difficult, if not impossible, for Clipper to arrange for movement of this traffic west of Chicago.

H & W Motor Express Company, of Dubuque, Iowa, is a common carrier of general commodities in certain areas of Iowa, Illinois, and Minnesota. It operates 260 units of equipment and interchanges a large quantity of freight with applicant. It holds interstate authority to serve every point on U. S. Highway 6 between Davenport and Des Moines, both inclusive, but elects to interline such freight with applicant, instead of making deliveries itself because there is insufficient volume to operate at a profit. There are certain points on U. S. Highway 6, such as Newton, that carriers other than applicant serve, when it suits their con-

venience, which is primarily determined by the type of freight and size of the shipment offered. It is virtually impossible to obtain interline service on less-than-truckload shipments by carriers opposing this application to such points as West Liberty, Durant, and Grinnell and such carriers are even reluctant to handle truckloads owing to the short hauls from point of interchange, the Tri-Cities.

The Chicago-Dubuque Motor Transportation Company, of Dubuque, Iowa, operating in certain areas in Illinois, Iowa, and Wisconsin, supports the application, but the evidence adduced on its behalf has no particular significance.

Dohrn Transfer Company, of Rock Island, Ill., a common carrier of general commodities between designated points on the Mississippi River and points in Illinois has interlined with applicant during the past ten years and it delivered over two million pounds of freight, weighing less than 5,000 pounds per shipment, in 1951 to applicant at the Tri-Cities destined to various points on U. S. Highway 6 and certain points on applicant's routes in Iowa north and south of that highway. Applicant has and is delivering like shipments to this carrier for movement beyond. Less-than-truckload shipments have been refused so consistently over a period of years by other carriers serving the considered Iowa area that Dohrn always thinks of and relies on applicant for service. This carrier also needs such service for shipments in excess of 5,000 pounds. Dohrn knows of no carrier other than applicant who will render consistent local peddler service on U. S. Highway 6.

[fol. 19] *Central Transfer Co.*, of Brimfield, Ill., operating generally between Bloomington, Ill., and the Tri-Cities has a regular flow of general-commodity interline traffic with applicant. During the typical month of December, 1950, this interline business aggregated 354,610 pounds of shipments exceeding 5,000 pounds each, 34,746 pounds on 12 shipments weighing between 2,000 and 5,000 pounds, and 55,003 pounds on 146 shipments weighing under 2,000 pounds. The increase from 2,000 to 5,000 pounds in the weight limitation of the temporary authority of applicant has enabled Central to interline shipments it had serious difficulty in getting connecting carriers to accept when applicant's authority was restricted to shipments not exceed-

ing 2,000 pounds. No other carrier has offered to provide the type of service maintained by applicant prior to September, 1951.

Knox Motor Service Co., Inc., of Rockford, Ill. operates over 200 vehicles and has approximately 160 employees. It originates shipments, such as implement repair parts, hardware, and tools, for points on U. S. Highway 6. The repair parts are usually emergency shipments. There is a continuous flow of such traffic weighing from 200 to 2,000 pounds per shipment to Motor Transit at the Tri-Cities. Motor Transit is the only carrier that consistently takes these small shipments. There are some shipments that weigh 10,000 pounds and over. The carriers that refuse the small shipments are always eager to haul shipments of 10,000 pounds or more. It desires applicant's service be continued without restrictions.

Generally these carriers do not ordinarily experience any difficulty in interlining shipments destined to the larger points on U. S. Highway 6, such as Des Moines and Newton, but they are of the opinion that applicant must be in a position to serve these points and to handle overhead traffic in order to provide the required service, particularly the expensive peddle operations, at the smaller points to avoid sustaining a loss on the entire operation. Several of these carriers are members of the American Trucking Associations, Inc., which is opposing the application.

Points Served by Motor Transit But Not on Routes Directly Involved. Kansas City, Mo. Montgomery Ward & Company supplies its retail stores at Atlantic, Des Moines, Newton, Iowa City, Muscatine, and Washington, Iowa, with the numerous articles of merchandise handled by such stores and also ships merchandise ordered from its catalogue to customers located at any point on the line of Motor Transit from its regional office at Kansas City. These shipments usually range from 150 to 6,000 pounds each. Iowa City and Newton are the only points that receive shipments exceeding 5,000 pounds and recently these shipments have moved by Watson Bros. or Bruce Motor Freight, Inc., hereinafter called Bruce, in interline service because of Motor Transit's inability to transport them, but the services of these carriers have not been satisfactory due to the fact

that they do not make delivery in as short a time as did Motor Transit. This results in dissatisfied customers, who go elsewhere to make their purchases. Points on U. S. Highway 6 in Iowa are considered as two-day service points from Kansas City. Without the service of Motor Transit this shipper would be greatly handicapped to all such points east and west of Des Moines. Existing services, other than Motor Transit between Kansas City and Des Moines are adequate.

Sinclair Refining Company ships filling station supplies and equipment ranging up to several thousand pounds per shipment from Kansas City to its dealers at Adair, Atlantic, Griswold, Davenport, Harlan and Ladora and to some extent to bulk plants at Cedar Rapids, Clinton, Council Bluffs, Des Moines, Iowa Falls, Mitchellville, Monroe, Newton, Oakland, Oskaloosa, Ottumwa, Wellman, and West Liberty, [fol. 20] Iowa. The bulk plants also to some extent are supplied from East Chicago, Ind., and Omaha. Truckloads only move to bulk plants. Motor Transit service from Kansas City has been used for several years and found entirely satisfactory. Other motor carrier services from that point have resulted in delayed deliveries requiring the payment of installation or painting crews pending arrival of pumps and equipment. On truckload shipments from East Chicago, prior to the imposition of the 2,000 and 5,000 pound restrictions, Motor Transit service had been used wherever possible, because of its promptness in making pickups, which prevented congestion on the shipper's limited dock facilities. It desires a resumption of this service so that the inconvenience and difficulties experienced recently may be eliminated. Shipments from Omaha are not extensive, but they range up to 10,000 pounds each. The most direct service available has been and is used from this point, which was that of Motor Transit to many of the considered destinations and is that of this carrier on shipments not exceeding 5,000 pounds. Restoration of unrestricted service is deemed essential from Omaha.

Crooks Terminal Warehouse operates a storage and distribution business and acts as an agent of shippers. It has about 300 accounts. Small shipments not exceeding 2,000 pounds move from Kansas City to some of the considered

destinations. Motor Transit's service has been the most expeditious and should be continued.

Beatrice, Nebr. A manufacturer of implements and farm supplies, who is also a jobber of plumbing and heating equipment and supplies, employing approximately 650 persons, operates a manufacturing plant at Beatrice and distributing warehouses at Omaha, Des Moines, and Kansas City. It has dealers at most towns in Iowa and some of its shipments to points on U. S. Highway 6 weight in excess of 5,000 pounds. Applicant provides the only regular service available and the loss of this service would be injurious to its business.

Clinton, Iowa. A lumber company having 35 yards scattered throughout Iowa uses applicant's service on both intrastate and interstate traffic to eight of them, only one of which, Adel, is on U. S. Highway 6. It uses the services of other motor carriers including Burlington Truck Lines, Inc., hereinafter called Burlington, and Iowa-Nebraska Transportation, Inc., hereinafter called Iowa-Nebraska. There are some truckload movements into the yards, but the outbound movements are principally in less-than-truckloads. Some of its yards are served only by applicant. Any curtailment or termination of applicant's service would drastically affect its business.

A manufacturer and distributor of foods, employing 1,300 persons has been and is using applicant's service on both intrastate and interstate less-than-truckload shipments to destinations involved herein and to points west of Omaha and south of Kansas City and St. Louis. It occasionally has shipments in excess of 5,000 pounds. A discontinuance of all or a part of applicant's service would be "destructive to us and many of our customers".

A manufacturer of building frames, sashes and doors, employing 575 persons, uses applicant's service principally on shipments under 5,000 pounds to points south and west of Clinton. No other motor carrier provides the quality of service furnished by Motor Transit. The loss of this service would result in delays in transit and create a situation not advantageous to the proper handling of the business.

[fol. 21] *Minneapolis, Minn.* Applicant's service is used

almost exclusively by a wholesale hardware company to 14 points on the White Line and Frederickson Line routes. Shipments are made regularly to retail dealers and they usually do not exceed 1,100 pounds each. The loss of this service would place this company at a competitive disadvantage. The witness, like several other witnesses familiar with traffic movements, expressed the opinion that in order to provide efficient local service on small shipments a carrier must be able to transport volume, and overhead, traffic.

Muscatine, Iowa. One of two affiliated firms buys and sells grain and manufacturers livestock feeds, and the other grinds and crushes soy beans, and makes soy bean oil and soy bean meal. They receive equipment and machinery and parts therefor from certain eastern, western, and northern points and from St. Louis, Mo. If applicant's service is curtailed or abandoned it would mean a tremendous loss of business to this city.

Kalona, Iowa. A dealer in machinery, farm implements, washing machines, gas stoves, and refrigerators, receives shipments weighing not more than 1,000 pounds each from Illinois points by Motor Transit service, which is the only regular-route carrier operating to and from that point. In the surrounding area many turkeys are raised. A new plant at this point for dressing and shipping these turkeys has been completed within the past year. This dealer knows of no other motor carrier service to replace that of Motor Transit.

A dealer in Chevrolet automobiles and parts and in farm implements and parts receives some of the automobile parts, in shipments ranging from 100 to 2,000 pounds, from Chicago, Ill., and Janesville, Wis., almost every day. The farm implements and parts originate at Moline, Ill. Rail service is very slow and it handles only the extremely bulky articles or heavy items. Applicant is the only truck line serving Kalona. He is disturbed about applicant's situation and believes that if applicant is not allowed to continue its past excellent service he will have to purchase and operate motor equipment.

A dealer in farm implements and accessories receives frequent less-than-truckload shipments from Rockford and Streator, Ill., and Racine, Wis., by Motor Transit, the only

service presently available. The continuation of this service is urgently required.

Another farm implement and automobile dealer, including parts and supplies, uses Motor Transit on shipments of less than 5,000 pounds from Moline and Peoria, Ill., and Kansas City. No other carrier gives daily service.

Kalona and Wellman, Iowa. Turkey farms at each of these points are owned by the same firm that operates a hatchery, a feed mixing plant, and a plant in which six to eight million pounds of turkey a year are processed. This industry employs from 95 to 300 persons. Inbound shipments consist of small quantities of ingredients used in the feed mixtures and substantial quantities of repair parts, averaging about three shipments a week. Outbound shipments are from four to seven barrels of dressed turkey at a time. If Motor Transit should not be available to handle these shipments, this firm believes that it would be handicapped.

Wellman. An undertaker who is also a dealer in furniture receives all of his freight by Motor Transit both rail and motor billed. Most of his shipments originate at [fol. 22] Springfield, Ohio, Louisville, Ky., and Fond du Lac, Wis. The rail-billed shipments generally originate in the eastern or southern part of the United States. No other motor carrier provides a daily regular service.

Columbus Jct., Iowa. A stationery manufacturer receives a great amount of stock, generally not exceeding 5,000 pounds per shipment, from eastern points, which is transported from Chicago, by Motor Transit, the only carrier maintaining daily and adequate service. No other carrier has solicited his traffic.

Washington Iowa. A manufacturer of fresh-water pearl buttons sells its product nationally an employes 250 persons. Its shipments outbound weight about 500 pounds each and they have moved by Motor Transit for the past seven years. This service has been entirely satisfactory. Prior thereto the services of two other motor carriers had been utilized, but their services were so unreliable a change was made to Motor Transit. This witness also represented the Chamber of Commerce, whose members include a large calender factory, a turkey processing plant, a grain processing plant, and an eyebolt company.

Pella and Prairie City, Iowa. A manufacturer at Prairie City of farm equipment, wagon boxes, hammermill tires, and hydraulic units receives steel in lots of less than 5,000 pounds from Chicago by Motor Transit. Daily shipments are made to one or more points in seven midwestern states. These shipments range from 100 to 6,000 pounds. The present 5,000-pound restriction interfer-s with the flow of traffic. The service of Motor Transit on both inbound and outbound traffic has been satisfactory and it is the only carrier that solicits this traffic. The same witness also has a foundry at Pella, which produces castings and moldings. These articles principally move to Iowa points. Some interstate shipments of over 5,000 pounds were split up to meet the limitation hereinbefore referred to. The situation with respect to service there is the same as at Prairie City.

Pella. A manufacturer of windows, rolling window screens, venetian blinds, and folding doors ships to destinations throughout the United States. As the originating carrier applicant has been giving a service not duplicated by any other carrier. Some shipments weight over 5,000 pounds each and it is very inconvenient to split them into smaller packages to meet the existing weight limitation. Burlington, Bruce, and Watson operate through Pella and when their equipment is loaded to capacity they refuse to pickup at Pella. Their service is not regular or dependable.

Oskaloosa, Iowa. A producer of fire hydrants and gate valves used in the water systems of towns and cities throughout the United States has been using applicant on most of its outbound shipments, which usually do not exceed 5,000 pounds, per unit, and on inbound shipments of iron and steel. The services of other motor carriers, such as Burlington, are not as regular or as complete as that of applicant, which elements are essential to this shipper.

A company making trailer hitches, wire brackets, milking machines, water systems, and other things, uses applicant's service to a considerable extent and it is favored to many interstate points. Applicant affords the best available service to and from Des Moines, points west of Des Moines, Davenport, Minneapolis, and Kansas City. Usually shipments made or received by this company weight less than 5,000 pounds each. Other motor carriers provide satis-

factory service to and from other points. The curtailment of applicant's service would not be to the best interest of this company.

[fol. 23] *Fairfield, Iowa.* A manufacturer of barn equipment, employing 250 persons, ships to the entire midwest. It formerly used Motor Transit's service as the initial carrier, but the imposition of the 5,000-pound limitation forced it to use other carriers. If Motor Transit's service should become available in the future this shipper will use it the same as in the past.

Affiliate firms, one manufacturing iron castings, and the other producing guy anchors, ship to points in the midwest. The 5,000-pound limitation interfer-s with these firms normal operations. In a three-month period they made about 45 such shipments by rail. The rail service is not as satisfactory as the prior service of applicant.

Brayton, Iowa. Fencing, barbed wire, steel, mill work, and general hardware move principally from Omaha, Chicago, Rock Island, and points in Michigan to a retail lumber yard at Brayton by the service of applicant, which is the only regular service available at that point. This service has been exceptionally good and any diminition thereof would have an adverse affect on its business.

Exira, Iowa. An individual operating a retail hardware store and a separate wholesale electric appliance business receives many shipments from east coast points and Denver, Colo., weighing from 200 to 10,000 pounds. About 50 percent of them are delivered by Motor Transit and the remainder by Rock Island and Roberts Transfer. Eighty percent of his hardware supplies originate at Des Moines, and some at St. Joseph, Mo., and Omaha. The service of Motor Transit has been entirely satisfactory. Damage in transit on certain types of electrical fixtures is inevitable. Such damage has been held to a minimum on shipments transported by Motor Transit, and that carrier has always paid claims promptly. Just the opposite is true with respect to Roberts Transfer, more damage and very slow in settling claims. Any curtailment of Motor Transit's service would be detrimental to the businesses of this witness because a slower service would require a greater capital investment and impair one of the important factors in the wholesale business, a quick turnover.

A farm implement dealer, who also operates a plumbing and heating business, and a water system repair service receives interstate shipments, weighing from 400 to 5,000 pounds and usually directs that they move by Motor Transit when that service is available at point of origin and if it is not he specifies "best way". Roberts Transfer and Iowa-Nebraska also serve Exira. The latter does not provide a regular service on small shipments. It mainly handles truckloads of butter, eggs, and other dairy products from the creamery at Exira to eastern destinations. This witness has faith in the service provided by Motor Transit and states that from Omaha it is often better than the parcel post service; and that this service is particularly advantageous on emergency shipments.

Hamlin, Iowa. An operator of a grocery store, who handles some general merchandise lines, purchases work clothing in Illinois. These articles are transported by applicant. This service has been perfect and should be continued. Iowa-Nebraska service at Hamlin is intermittent and that of Roberts Transfer is satisfactory only on traffic from Omaha.

An operator of a locker plant obtains his supplies from Des Moines. This is intrastate traffic.

[fol. 24] *Audubon, Iowa.* An owner of a 5 cent to $1.00 store and of a separate dry goods store uses applicant's service in connection with small shipments from Omaha, Chicago, and Minneapolis. The services of other carriers at Audubon do not compare with that of applicant. On traffic from Minneapolis applicant gives next day delivery at Audubon and comparable service from Chicago. When similar shipments have been interlined with Roberts Transfer at Des Moines there have been delays on account of the transfers. At times Roberts Transfer does not have available space on its equipment and an additional delay of one day resulted therefrom.

Lewis, Iowa. Rock Island service has been abandoned at this point. The business interests are dependent upon the interstate service of Motor Transit. Other motor carriers having authority to serve Lewis do not ordinarily slow down at this small community.

Griswold, Iowa. A manufacturer of oil heating equipment and power mowers, receives sheet steel in 20,000 to

100,000 pound lots, controls for such equipment, and engines for power mowers in shipments exceeding 5,000 pounds from Chicago, Milwaukee and New Holsten, Wis., or Maquoketa, Iowa. The finished products move to various points. He requires fast daily service both inbound and outbound. Motor Transit has been rendering this type of service. Its average service from Chicago is 3.6 days as compared with an average service by competing carriers of 8.2 days. Tracer service by Motor Transit requires about 48 hours and of other carriers from two to three weeks. Loss of any part of the service rendered by Motor Transit prior to September, 1951, would be disasterious. Thornton Transfer and McVey Transfer operate between Omaha and Griswold and a few points in that area. Shipments from eastern points moving by either of these two carriers are transferred to them at Omaha resulting in at least 24 hours delay and an additional 100 miles or more of hauling.

Carson, Iowa. An operator of a lumber yard buys hardware at Minneapolis, some "merchandise" at Chicago, and considerable from Omaha and Waterloo and Cedar Rapids, Iowa, practically all of which moves by Motor Transit. Its service has been very satisfactory and continuance thereof is essential.

Treynor, Iowa. A cooperative hybrid seed corporation infrequently uses applicant for the transport of repair parts for corn graders from Cedar Rapids. This is an intrastate movement.

Chicago. A wholesaler of general merchandise services about 150 stores in Iowa, twelve of which are on or adjacent to U. S. Highway 6. Its shipments consist of articles usually found in variety stores or small dry-goods stores and they average about 300 pounds each, except when new stores are opened they exceed 5,000 pounds. During the first three months of 1952 the applicant, and Iowa-Nebraska did not fail to pickup shipments promptly. Des Moines Transportation Company, Inc., hereinafter called Des Moines Transportation, missed (did not pickup on day shipment should have moved) one out of every six shipments in January, 1952. It did not miss any in February and March, 1952. Four other carriers during this three-month period generally missed from one out of three to

seven out of fifteen shipments. It believes that anything reducing its field of choice as to carriers would adversely affect its business.

[fol. 25] A drug company supplies drug stores at eight points on U. S. Highway 6. Shipments average about 360 pounds each. The aggregate weight of shipments during an eight-month period to these stores was about 70,000 pounds. It uses only the service of applicant and asks that such service be continued.

A wholesale grocery corporation supplies 23 points on or adjacent to the White Line route and on the Fred-rickson Line route. It requires weekly or twice a month service. The average shipment weighs approximately 500 pounds. In the Fall it has frequent shipments in excess of 5,000 pounds. It has used the services of about four motor carriers to these points. Of these applicant's service has proved most reliable to the smaller points. Any curtailment of applicant's service as rendered prior to September, 1951, would be disasterous.

A wholesaler of school supplies, office supplies, housewares, books, and various sundries ships to small independent dealers. It has 500 accounts in Iowa, ten percent of which are on U. S. Highway 6, in practically every incorporated town and village between Davenport and Omaha. Shipments range from 350 to 500 pounds. It has used the services of Motor Transit since 1938 and it would be a matter of serious concern to lose the services of a carrier upon which it has depended for many years. No other carrier has solicited this traffic.

Points Served by Motor Transit Directly Involved in This Proceeding. Appendices A and B show the number of witnesses at each point supporting the application. *Points on White Line Route* in station order west from the Tri-Cities.

Rock Island, Ill. A fabricator of steel for buildings ships to the territory served by Motor Transit. It ships usually in quantities of 28,000 pounds, but there is some less-than-truckload traffic. In 1951, before the weight limitation of 2,000 pounds was imposed, Motor Transit handled 100 tons to Iowa City. Motor Transit was the only carrier readily available with proper equipment to handle this movement.

Moline, Ill. A manufacturer of farm implements and parts ships to dealers located primarily at small points. It has dealers located at 12 points in western Iowa on the White Line route and the Fred-rickson Line route. The shipments are of all sizes. Applicant is the only carrier serving the 12 points that has complete terminal facilities in the Tri-Cities. In eastern Iowa it has dealers at all points on U. S. Highway 6 from Davenport to Dexter. Shipments from these points range from 100 pounds to 20,000 pounds. It wants straight motor carrier service. It believes that service by applicant to the smaller points cannot be performed properly without removal of the restrictions, as many of the shipments are for handling in peddle operations which are not accepted by many of the carriers serving the larger points. It also believes that applicant should be allowed to handle overhead traffic to enable it to continue the peddle service.

A wholesaler of plumbing and heating supplies with about 15 accounts on or near U. S. Highway 6 between Davenport and Iowa City makes shipments ranging from 3,000 to 4,000 pounds by applicant. It has competition at Cedar Rapids, Des Moines, Ottumwa, and Burlington, and in order to meet this competition transportation of the character rendered by applicant is vitally essential. It is unaware of any other carrier giving comparable service.

[fol. 26] *Wolcott, Iowa.* A banker receives bank supplies about once a month from Chicago by Motor Transit, which is the only carrier providing service at this point.

A dealer in plumbing and heating appliances and pumps receives daily interstate shipments weighing less than 5,000 pounds each. Applicant has and is providing excellent service. It is the only carrier serving Wolcott.

An operator of an electrical and appliance shop purchases supplies at Chicago and Freeport, Ill. They are shipped in lots of less than 5,000 pounds about twice a month. Applicant's service has been and is very good. Without this service, he would not know how to get the shipments transported.

An automobile dealer obtains repair parts from Chicago several times a week in shipments of less than 5,000 pounds each. He needs applicant's service because there is no other available carrier.

A retail lumber dealer with yards at Wolcott (main office) and Durant stocks, in addition to lumber, farm supplies, hardware, roofing materials, paints, fencing, and millwork. He has used Motor Transit service for many years on a continuous flow of less-than-truckload interstate shipments. He assumes that if this application is not granted that his business will be affected to the extent that it will take longer to get the merchandise.

A salesman of animal feed or animal mineral products with storage facilities therefor at Wolcott appeared as a witness in support of the application, but it developed that he had no interest in any intrastate or interstate shipments.

A dealer in farm implements and general farm supplies receives shipments two or three times a week of 500 to 1,500 pounds, from points in Illinois and Wisconsin. He needs applicant's service as there is no other service available.

Stockton, Iowa. A producer of grey iron castings purchases certain of his raw materials in 500 to 8,000-pound lots at various interstate points. Ninety percent of the inbound traffic moves by truck for delivery by Motor Transit, which is the only carrier serving Stockton. Outbound shipments ranging from 100 pounds to ten tons move practically every day by the same carrier to points throughout the United States. The existing 5,000-pound limitation per shipment is inconvenient as it requires the splitting of a ten-ton shipment to one consignee into several shipments of 5,000 pounds or less each.

A cooperative elevator company doing a general elevator and feed business, and also dealing in farm equipment, hardware, fencing, seed, posts, wire, and "practically everything except groceries and clothing", receives shipments of farm implements, hog feeders, and hog and cattle oilers from points east of the Mississippi River. It also receives water-tank heaters from St. Louis, Maryville, and Kansas City, Mo. Its inbound shipments move by truck and they range in weight from 80 to 5,000 pounds each. About four deliveries a week are made at Stockton. A large part of its inbound shipments are from points in Iowa. It has no outbound interstate shipments. In 15 years Motor Transit is the only carrier that has "been to our place of business".

It is very dependent upon this service and will be more so in the future because its supplier of farm equipment is moving its repair and attachment branch from Davenport to Chicago, which means that the overnight service of Motor Transit will be essential.

[fol. 27] *Durant, Iowa.* A dealer in hardware, wire, and appliances, including stoves, refrigerators, bottle gas, bottled gas equipment, gas heaters, and water heaters, receives shipments by motor vehicle from interstate points, such as Beaverton, Mich., Odin, Pa., and Chicago. These shipments, weighing from 500 to 7,000 pounds, have been delivered by Motor Transit, the only motor carrier serving this point. Its continued service is required.

Wilton, Iowa. A dealer in automobile parts and appliances receives automobile supplies from the central warehouse at Kansas City, and storage batteries from Chicago. These articles in small shipments move to Wilton by Motor Transit, the only carrier proving service at this point.

An operator of a retail plumbing and heating business receives small shipments from Moline, Ill. Applicant furnishes the only daily service available, loss of which would hurt his business.

Atalissa, Iowa. An owner of two lumber yards, one at Atalissa and the other at Wilton, dealing also in building supplies, hardware, and farm supplies, receives three or four shipments a week from Chicago and the Tri-Cities. These shipments move by Motor Transit, the only motor carrier serving these points. He knows of no facility that could take the place of the service of Motor Transit.

West Liberty, Iowa. A dealer in lumber, hardware, and implements receives millwork from Rock Island, Ill., hardware from Chicago and Ottumwa, and implements from Omaha and Moline. The weight of these shipments vary from a few pounds up to 4,500 pounds. Motor Transit has been providing the service required by this dealer and any curtailment thereof would be detrimental because his trade has been built on service and when he places an order he wants the merchandise in a hurry. There is no other motor carrier providing the type of service desired.

A bulk oil and tire distributor uses applicant's service almost exclusively for the transportation of intrastate

traffic. If there were any interstate shipments in the past, they were negligible.

Iowa City, Iowa. Most of the shipments of a dealer in lumber, building supplies, and farm supplies at both Iowa City and Oxford, Iowa, originate at Chicago. They do not usually exceed 2,000 pounds each. Occasionally a shipment weighs over 5,000 pounds and recently it had a truckload of asphalt shingles for Chicago, but Motor Transit could not handle this movement on account of the 5,000-pound weight limitation. It has specified that shipments move by Motor Transit for a number of years because experience has demonstrated that this carrier's service is far better than the services of other motor carriers. It could exist without the service of Motor Transit, but it would be easier with that service available. It is the only carrier providing less-than-truckload service at Oxford.

A plumbing and heating wholesaler handles large quantities of pipe, fittings, boilers, valves, and any other article used in such business. Its shipments, both truckload and less-than-truckload, some weighing over 5,000 pounds, originate at points in Illinois, Ohio, Pennsylvania, New York, New Jersey, and Alabama. Motor Transit generally has been and is designated as the delivering carrier on traffic it is authorized to transport. Some shipments to small town dealers at points along U. S. Highway 6 in this wholesalers trade area and at Wellman and Kalona are routed by Motor Transit direct to those points. This designation [fol. 28] is made because the service is superior to that of other carriers and in addition Motor Transit's pickup and delivery service is excellent. Curtailment or discontinuance of this service would have a serious effect on this firm's business.

A business form printing company with plants throughout the country employs 60 persons at its Iowa City plant. At this plant forms for counter register machines, tabulating machines, and typewriting machines are produced. These articles are shipped to substantially every State, except those on the Pacific Coast. Some of the traffic, in quantities ranging from 60 to 2,000 pounds, for points west of Omaha moves by Motor Transit. Several other motor carriers are used by this shipper. The services of

all of them, except Watson Bros. have been satisfactory. One of the reasons this firm selected Iowa City for one of its plants, recently enlarged by a $100,000 addition, was due to the excellent transportation facilities. The service of Motor Transit has been superior and denial of this application would be very detrimental to this firm's operations, not only with respect to interstate traffic but also in connection with intrastate traffic as it virtually has customers in every hamlet and crossroads in Iowa.

An owner of a hardware, appliance, and farm implement store receives shipments, some exceeding 5,000 pounds, from Blair, Nebr., Minneapolis, Moline, Chicago, Warren, Ohio, South Milwaukee, Wis., and other places. He has been using the service of Motor Transit because there is no other carrier giving the same type and character of service. If this service is discontinued he would have to change his source of supply on some items from Des Moines to Cedar Rapids (intrastate traffic) and probably increase his inventory.

A wholesaler of automobile parts and equipment, who also operates a machine shop, has been using Motor Transit service ever since its predecessor, the White Line, was first established. It receives shipments of not over 4,000 pounds each from numerous interstate points. Some shipments are consigned directly to its customers in its trade area, which is within a radius of 60 miles of Iowa City. It compares Motor Transit's service of three days from Minneapolis with that of Des Moines Transportation of 49 days on one shipment. A shipment ordered December 12, 1951, and the purchaser had the bill of lading on December 24, 1951, from Cleveland, Ohio, to Marengo was routed by Watson Bros. from Chicago. Watson Bros. would not accept it and it stayed on the dock at Chicago two weeks and five days. It ultimately was moved to Marshalltown, Iowa, where it layed another five days. A rush shipment of five packages on November, 1951, routed by McCoy Truck Lines, Inc., hereinafter called McCoy, had been in transit two weeks when the purchaser called McCoy to make delivery and it had only one of the packages on hand. The purchaser waited five days more and then reordered directing routing by Motor Transit. After

the reordered shipment had arrived, McCoy delivered the original shipment. Curtailment of the service of Motor Transit would force this firm to purchase motor equipment to provide the type of service required.

Cedar Rapids, Iowa. A wholesale dealer in hardware, both "heavy and shelf" ships steel products in truckloads, from a South Chicago, Ill., mill direct to its customers in Iowa on U. S. Highway 6. Since the 5,000-pound limitation was imposed on applicant, it has not been able to get service and this has resulted in loss of part of this business, because some of the customers who require a truckload are forced to buy less frequently in carloads. He could reclaim some of this business if Motor Transit is allowed to operate as it did prior to August 30, 1951. He uses the intrastate services of this carrier extensively in the distribution of hardware from his stores at Cedar Rapids and Ottumwa.

[fol. 29] *Coralville, Iowa.* A dealer in wholesale foods receives merchandise from many points throughout the United States. Several shipments of 150 to 350 pounds are delivered every day, by Motor Transit. This carrier has been providing 24 hour service from Chicago and is the only one that makes direct deliveries at this point. Other carriers drop freight for Coralville at Iowa City and a cartage service makes the actual delivery. This type of service on shipments from Chicago takes three to four days, which is entirely too slow. If Motor Transit service should become unavailable, it would result in this dealer having to pickup his merchandise in Iowa City, a round trip distance of six miles.

Tiffin, Iowa. An operator of a hardware store is also president of the school board. Merchandise for the store is shipped from points in Minnesota and Wisconsin, and most of the supplies for the school originate at Galesburg, Ill. These shipments seldom exceed 5,000 pounds. They are delivered by Motor Transit, the only motor carrier serving this town.

Oxford, Iowa. A hardware and implement dealer receives shipments from Streator, Ill., Mansfield, Ohio, Minneapolis, and Des Moines. Most of them are small shipments. Occasionally one weighs more than 5,000 pounds.

On such shipments difficulties have been encountered since Motor Transit's authority was limited to shipments of 5,000 pounds and less, because this is the only motor carrier serving Oxford. A fast dependable service like that of Motor Transit is required to enable the merchant to meet nearby competition.

An individual sells to farmers some 360 articles distributed by a medicine company. These articles consist of such things as mineral compounds, vitamin supplements, anti-biotics, insecticides, a medicine line "everything from liniments to corn salve", spices, cleaning compounds, and wax. He receives from seven to ten truckloads a year and infrequent small shipments from Winona, Minn. Prior to September, 1951, the truckloads were handled by Motor Transit from Cedar Rapids to Oxford. Since then he never knows what carrier will make delivery but he knows it usually takes several days longer in transit than when Motor Transit's service was available. Apparently the 5,000-pound restriction has forced carriers possessing no authority to serve Oxford to make deliveries at that point in order to keep from holding the shipments for an indefinite period. There was at least one shipment of this character, needed badly by the consignee, that was delayed at Cedar Rapids because the originating carrier could not locate a connecting carrier that would accept it.

Homestead and South Amana, Iowa. A society owns and operates farms and 30 businesses in an area comprising 25,000 acres of land and seven villages. Inbound interstate shipments consist principally of farm implements and parts, and hardware. There are two motor carrier services available at these points, the applicant and A. W. Schmidt, a local operator between Cedar Rapids and the seven villages. To cut off either of these services would hinder the societies enterprises.

Marengo, Iowa. A dry goods company obtains its merchandise principally from Chicago and St. Louis in shipments of 100 to 300 pounds. It averages two shipments a week. Motor Transit furnishes the best service of the carriers authorized to serve Marengo and it desires to have that service available in the future.

An automobile agency receives a couple of shipments of

parts a month from Dearborn, Mich. Some of them are emergency repair parts. Applicant's service is essential, particularly in regard to emergency shipments.

An operator of an automobile supply store and also handling hardware receives the supplies from Davenport and the hardware from Minneapolis. Some shipments [fol. 30] originate at St. Louis. He uses the services of Motor Transit and desires to utilize this service in the future to avoid delays in deliveries.

Ladora, Iowa. A lumber and fuel company receives paints from Kansas City, shingles from Peoria, and Joliet, Ill., insulation board and insulation products from Minneapolis, slat-cribbing from Omaha, paint and fencing from Chicago, millwork from Rock Island, builder's hardware from Sterling, Ill., and steel products from Kewanee, Ill. Shipments do not exceed 5,000 pounds. They are delivered on an average of four days a week. It specifies Motor Transit as the delivering carrier in all instances on account of its excellent service, including deliveries in the daytime when the consignee's yard and office is open for business. It contrasts this service with that of Iowa-Nebraska on a shipment of reenforcing rods delivered during the night and dumped in the driveway in front of an overhead door, and that of Watson Bros. attempting to make delivery of a shipment of paint at 10:30 p.m. and asking the consignee to unload. Another time Watson Bros. tried to make a night delivery of paint, could not reach the manager, and piled it in a parking lot across the street.

Victor, Iowa. A retail lumber firm sells, in addition to lumber, building material and farm supplies, and "odds and ends other than strictly building materials". It receives hardware from St. Louis, Cedar Rapids, Burlington, and Des Moines, paints from Chicago, and aluminum windows and related products from Peoria. The 5,000-pound limit interferes with some shipments. This firm uses Motor Transit's service almost exclusively on both single-line and in connection with joint-line movements. No other motor carrier renders the same kind of efficient service as Motor Transit and any curtailment thereof would complicate its business operations, because it would not know how to route shipments in less-than-truckloads so that they would be delivered with any regularity.

The pastor of a church, who is also superintendent of a school, receives practically all of the school's books and supplies, including lunch supplies, and church supplies, by Motor Transit. These books and supplies originate at Kansas City, Chicago, St. Louis, Milwaukee, Galesburg, and New York. They range in weight from 200 to 1,000 pounds per shipment. Motor Transit is the only carrier that he has been able to get expedited service from. Rail shipments take three or four weeks in transit. No other motor carrier has solicited this traffic. He has a very definite need for applicant's service.

An implement and seed firm receives implements from Sandwich, Ill., Des Moines, Cedar Rapids, and Newton, tank heaters, tanks, elevators, and hog wateries from Morton, Ill., Kansas City and certain Iowa points. The shipments average up to over 5,000 pounds. They move into Victor by Motor Transit, which service has been superior and is required in the future, particularly for the movement of emergency implement repair parts from Sandwich. Iowa-Nebraska, during the fall and winter of 1951-1952, delivered to this firm a couple of shipments of about 200 pounds each. This carrier does not provide a regular service at Victor.

An implement and allied and sundry farm item dealer receives shipments from La Crosse, Ind., Milwaukee, West Allis, Wis., Gadsden, Ala., and Kansas City. It has no shipments over 5,000 pounds. Motor Transit service has been utilized in the past and it will be needed in the future. Iowa-Nebraska has delivered a few shipments. It makes a delivery and "you do not see them again for months".

[fol. 31] *Brooklyn, Iowa.* An owner of a hardware store receives shipments of under 1,000 pounds each from Kohler, Wis., Chicago, and St. Louis. He always specifies routing by Motor Transit, because it provides the best service. Many other motor carriers operate through Brooklyn, but they seldom stop to make deliveries.

Another hardware dealer receives small shipments from Chicago and Louisville. He directs routing by applicant, but has not been successful in having this routing observed on the Louisville traffic. For example, a shipment moved from Louisville on December 18, 1951, by Huber & Huber

Motor Express, Inc. It moved through Omaha and was delivered by Iowa-Nebraska January 23, 1952. The streets and alleys in Brooklyn are narrow and consequently semi-trailers have operating difficulties in the town. Applicant avoids this by the use of smaller pickup and delivery equipment.

An owner of a lumber yard, in addition to lumber sells millwork, hardware, building materials, farm supplies, such as water tanks, heaters, and gates. He receives some of this merchandise in small quantities from Chicago and Sterling, Ill. He prides himself on giving service to his customers and this would be impossible without the very good transportation service of applicant.

The mayor of Brooklyn supports the application because Motor Transit has dock facilities to unload large semi-trailers and it delivers the freight in smaller equipment. Other motor carriers try to make deliveries from large semi-trailers. The streets are too narrow to permit the stopping and unloading of such rigs in the middle of the street. The alleys are so narrow that semi-trailers cannot use them.

Malcom, Iowa. A dealer in hardware, plumbing and heating equipment and farm supplies receives shipments from points in Illinois and Wisconsin. Motor Transit is the only carrier rendering an east and west service at this point.

A garage operator distributes petroleum products and sells automobile parts and accessories and single unit oil burners for home, office, or business use. He receives oil and grease from Illinois points, oil burners from Grafton, Wis., pumps for trucks from Omaha, and new automobile motors from points in Illinois and Indiana. Most of these shipments are less than 1,000 pounds. He has been using the service of applicant, which has been satisfactory. If this service should be discontinued it would be necessary for him to receive shipments from the east or west at Grinnell, a point ten miles west of Malcom.

Grinnell, Iowa. A distributor of tires, hardware, and home appliances such as refrigerators, deep freeze-s, toasters, ironers, and radios receives commodities from Minneapolis, and Louisville in quantities of 200 to 2,500 pounds. Motor Transit has been providing service on these

shipments. That service is not equalled by any other motor carrier. This consignee discontinued the service of one carrier from Chicago due to excessive breakage and the slow payment of claims.

A dealer in automobile supplies, housewares, and electrical appliances receives such articles from Minneapolis and Chicago in lots ranging from 500 to 1,400 pounds by applicant. Because of poor service by certain carriers in the past, he has directed the shippers to route all shipments by Motor Transit. He believes that if he is deprived of this service it would be necessary to close the store. He has to turn his stock quickly and cannot carry a large inventory. [fol. 32] A proprietor of a drug store receives the larger packages of supplies from Chicago. A few shipments originate at New York. About twice a year he receives shipments weighing 7,000 pounds each. Motor Transit's service from Chicago is almost perfect. This service is like express but cheaper. Claims are promptly adjusted.

A manufacturer of playground equipment purchases steel plates at Gary or Indiana Harbor, Ind., and tubing at St. Louis and Clinton. The steel moves in carloads and truckloads. The tubing generally moves by truck in 8,000 and 10,000 pound lots. Outbound shipments usually weight from 260 to 850 pounds. Just recently considerable difficulty was experienced in getting a motor carrier to transport a 17 ton C.O.D. shipment. Motor Transit could not handle this shipment on account of the 5,000-pound limitation. It was ultimately transported by Keeshin Motor Express. This manufacturer "had almost as much trouble collecting the C.O.D. as we had in making the original sale". Some shipments of tubing from St. Louis are not handled promptly by the originating motor carrier and sometimes the delay at the interchange point, Des Moines, is ten days. In these instances the connecting carrier was not Motor Transit. That carrier always gives excellent service. During the latter part of December, 1951, thirty tons of steel plate was delayed about five days owing to the lack of trucking facilities at point or origin.

A dealer in hardware, appliances, plumbing, and heating supplies, receives such articles from Chicago, Louisville, St. Louis, Omaha, Milwaukee, Davenport, Des Moines, and

Kohler, Wis. Some few shipments weight in excess of 5,000 pounds. He has tried all carriers serving Grinnell and because of the better service, in all respects, Motor Transit routing is always specified where that service is available. If this service is curtailed or eliminated, he will probably purchase motor equipment.

An owner of a variety store receives 90 percent of his merchandise in shipments up to 1,000 pounds from Chicago, by applicant's service. This service can always "be counted on". He has had unfortunate experiences with other motor services especially in connection with seasonal goods.

A manufacturer of women's shoes, employing about 125 persons, receives various raw materials from many points east of the Mississippi River, which generally move by Motor Transit from Chicago. Some past shipments were in excess of 5,000 pounds and there will be like shipments in the future if market conditions are favorable. Outbound shipments average 150 pounds each and they generally are destined to points in the midwest. Some few of them move to eastern and western points. This manufacturer fills orders the same day they are received and insists that they move out of Grinnell by late afternoon of the same day. Motor Transit furnishes this kind of service and it has been and is being used exclusively. The services of three or four other motor carriers have been used and found to be unsatisfactory because the cartage agent for those carriers does not make the pickup as promptly as Motor Transit.

Kellogg, Iowa. A company manufacturing washing machines, drain tubs, and repair parts, a subsidiary of the Stamping Company, referred to in the next succeeding paragraph, ships such products to every State and to ten foreign countries. It produces 18,000 washers and from 60 to 70 thousand units of drain tubs a year. The greater part of the shipments have been moved by applicant in quantities ranging from 100 pounds to a truckload. Other motor [fol. 33] carriers serving Kellogg will handle volume shipments, but neglect the small shipments. This business has been practically built around applicant's service. The 5,000-pound limitation has been and is a detriment to its operation.

The purchasing agent for a Stamping Company employing 200 persons also buys for its subsidiary the Washing Machine Company mentioned in the preceding paragraph. Job stamping is the business of the Stamping Company. It makes parts out of steel, aluminum, copper, and brass and its customers are located throughout the midwest. The subsidiary uses certain stamping in assembling the washing machines. Another subsidiary is a lumber division. In addition to these articles, there are inbound shipments of crating, lumber, motors, castings, screw machine parts, tubes, rubber goods, and plastics principally from midwest points such as Chicago, Milwaukee, Minneapolis, and St. Louis. Some of these commodities move by rail and others, from 100 to 10,000 pounds, move by truck. More than half of this traffic arrives by Motor Transit, which is the carrier that the Stamping Company always specifies. The remainder of the shipments are those on which it does not control the routing or those such as steel that usually move by contract carriers or livestock haulers. The 5,000-pound limitation has on several occasions affected its business. Purchases of some articles, such as paint, have been in smaller quantities as a result thereof. No other motor carrier provides the excellent regular service rendered by Motor Transit. There is no other carrier to take its place.

Newton, Iowa. A lumber company with places of business at Newton, Colfax, Mitchellville, Altoona, and (Van Meter, a point about 20 miles west of Des Moines on Iowa Highway 90, which is one of applicant's authorized routes) sells lumber and general building materials, such as steel, paint, gypsum, hardware, fencing and roofing materials, steel posts, and millwork. The millwork originates along both sides of the Mississippi from Dubuque to Muscatine. Its principal sources are Rock Island and Clinton. The shipments range from a few hundred pounds to 7,000 pounds. Paint moves from Chicago in less-than-truckloads and in truckloads. Small shipments of various commodities weighing up to 700 pounds are received from interstate points. Motor Transit previously transported practically all of this traffic to the points named. Since the imposition of the weight limitation other carriers have been furnishing service on shipments of over 5,000 pounds. It has used

Motor Transit service largely because it has "taken good care of us". It is a convenience to have deliveries of both interstate and intrastate freight made by one carrier as the alleys are narrow and several carriers trying to make deliveries interfers with its normal business operations.

A manufacturer of advertising specialties receives steel, glass, wood, paper, and paint from various points, Chicago and east, Kansas City, and Minneapolis. Occasionally there is a small shipment of paint from California. Shipments from Chicago and eastern points move from Chicago by Motor Transit or Western Transportation Company. From Kansas City and Minneapolis they move mostely by Motor Transit. That carrier, in the event the 5,000-pound limitation is removed, will receive its share of the truckload glass traffic from Vincennes, Ind. Outbound shipments range up to 2,500 pounds. All of this traffic is routed Motor Transit, except in instances where it cannot handle the shipment. [fol. 34] A manufacturer of gas tractor driven, and wind driven, generators, used by hospitals and various organizations as stand-by units in the event of power failure, and by communities and farmers having no electrical service, and a complete line of specialized agricultural implements, such as post-hole diggers, trailer farm wagons, fertilizer distributors, and wagon boxes, both steel and wood, receives steel, copper, wood, and forgings, employs 132 persons. Prior to September, 1951, Motor Transit hauled 90 percent of the steel from the Chicago area, in both less-than-truckloads and in truckloads. Other carriers' service on this traffic has been poor. The forgings move from St. Paul by Motor Transit. In the past two years forgings have become very hard to get and as a result shipments rarely exceed 5,000 pounds. Its outbound shipments, ranging from 200 to 10,000 pounds, move to points in practically every State, and wherever possible Motor Transit service is utilized, because the use of one carrier results in fewer trucks at the loading platform and the certainty of good service. It is hard to get other carriers to haul some third class items when they can get first class freight. Some shipments have stayed on the carriers' docks in Kansas City for a long time. In 1950 Motor Transit handled 1,345 shipments outbound, which is about 92 percent of such

shipments. In 1951 it handled only 838 shipments due to the 2,000 and 5,000 pound limitations. The inbound and outbound tonnage handled by Motor Transit in 1950 was 249,772 and 1,048,707 pounds, respectively. On account of the restrictions this manufacturer has purchased motor equipment to provide some of its transportation requirements and if Motor Transit's service is further curtailed or eliminated it probably will buy more equipment and also ask the dealers to "come after their shipments". Motor Transit is the only carrier serving Newton that provides its own rate and dock service. If this rate service were not available this manufacturer would have to set up its own rate service at considerable expense. It points to a recent instance where a sale of 1,040-pound item would have been lost if it had not been able to immediately obtain the rate from Motor Transit's rate service.

Colfax, Iowa. A manufacturer of folding tables, benches, and chairs is presently using applicant's service both inbound and outbound on shipments under 5,000 pounds, which tends to increase the freight charges since it is necessary in some instances to split a shipment in order to come within the weight limitation. This limitation has prevented this shipper from routing truckloads of steel from Chicago by applicant. Its service is not equalled by any other motor carrier. Such other carriers do not provide regular service, often attempt to make deliveries after the plant is closed, and generally subordinate the local Colfax service to their line-haul operations.

A producer of a new type of soft drink distributes its product throughout the United States in shipments of under 2,000 pounds each. Its inbound shipments of supplies generally originate at Chicago. It has learned by experience that Motor Transit's service can be relied upon, even on shipments requiring expedited handling, which is not the case when shipments move by other motor carrier service.

An operator of two stores, a department store and a variety store, receives inbound shipments from Chicago, St. Louis, St. Joseph, and Kansas City. Prior to September, 1951, these shipments were delivered by Motor Transit. Since then his routing on these less-than-truckload (500 to 1,000 pounds) shipments have been disregarded. Watson

Bros. transport many of these shipments and transfer them to Iowa-Nebraska for delivery. This joint service takes [fol. 35] about two days longer than the former service by Motor Transit, and it is not satisfactory. Iowa-Nebraska service is slow. It does not provide regular daily service at Colfax and is very slow in settling claims. Rail service from Chicago takes about two weeks as compared with next morning delivery by applicant.

Mitchellville, Iowa. A dealer in farm implements and trucks has been using Motor Transit's service from Moline, Streator, and Morton, Ill., on small shipments. Occasionally shipments of grain elevators exceed 5,000 pounds. No other carrier provides the regular, fast, and dependable service maintained by Motor Transit. This service is needed to meet this dealer's requirements.

Altoona, Iowa. An operator of a service station and garage, who also deals in television sets, refrigerators, hot water heaters, and stoves, receives oil and grease from Des Moines and electrical appliances from points in Illinois and New York. Some of these commodities move in carload lots to Des Moines and are distributed to various dealers from that point. He has been using applicant's service in connection with shipments from St. Paul, Kansas City, and Chicago. No other carrier has solicited this traffic.

Des Moines, Iowa. A wholesale dealer in hardware and allied supplies receives shipments from Chicago and east. It ships from Des Moines to points throughout Iowa. Occasionally this dealer orders shipments delivered direct to his customers located at points on U. S. Highway 6. Some of these shipments moved by applicant and prior to September, 1951, it also handled inbound shipments exceeding 5,000 pounds, but since that limitation was imposed on applicant it has been forced to use another motor carrier. It believes that if applicant is required to limit its interstate operations it will result in a deterioration in the intrastate service of applicant, which would be a detriment to its business.

A wholesale distributor of drugs, chemicals, turpentine, linseed oil, and numerous other items has used the service of Motor Transit and also the services of several other motor carriers. Some shipments exceed 5,000 pounds. The

witness for this firm does not control the routing of interstate traffic and he had no authority to testify in this respect.

A manufacturing company buying merchandise (clothing) and distributing it from Des Moines receives interstate shipments weighing 1,000 pounds or less by Motor Transit service. This carrier also prior to September, 1951, provided overnight service on outbound shipments to Omaha and Lincoln, Nebr., but this satisfactory service was discontinued about that time and it was necessary to find another carrier. Watson Bros. since that time has been moving this traffic.

A wholesale hardware company, handling also gas stoves and paints, receives shipments from various points in the eastern part of the United States and ships outbound to Omaha, Moline, and points in Iowa and Missouri. The inbound shipments range from 10,000 pounds to minimum truckloads. The outbound shipments are usually less than 5,000 pounds. Motor Transit handled some of the inbound traffic prior to September, 1951, but since then other motor carriers have been handling this traffic satisfactorily. It is fearful that the restricting of Motor Transit's interstate traffic will cause it to curtail its excellent intrastate service from Des Moines to points on U. S. Highway 6. Occasionally interstate shipments are made direct from factory to this company's customers located on that highway and usually such shipments are routed Motor Transit because it gives the best service.

[fol. 36] A factory representative located at Des Moines sells heating and plumbing equipment manufactured at and shipped from Chicago, and Waukegan, Ill., and Hartford, Conn., (1) direct to the purchaser, or (2) a small part, five to ten percent, of the shipments are consigned to him at Des Moines. One-third of these movements are in truckloads and the remainder in less-than-truckloads, from 100 pounds up. He designated routing by applicant on most shipments destined to points on its routes, until he had to discontinue such designation on shipments exceeding 5,000 pounds. Since then some shipments have moved by rail from Waukegan to Des Moines. They were in transit from two to three weeks, which is entirely unsatisfactory service,

particularly on emergency shipments. Some other shipments, weighing more than 5,000 pounds, have moved by other motor truck lines and their services were not, in all instances, to his liking. He expresses his need as follows: "Please let me ship the way it was before the restriction went in and I will be happy about it".

Dexter, Iowa. A farm implement and automobile dealer receives automobile parts from Chicago and implement parts from Moline. He has used the service of Motor Transit on all these shipments. No other carrier makes a regular scheduled stop at this point and none of them provide the same high quality service maintained by Motor Transit. He desires continuation of this service because repair parts are usually needed promptly. Rail shipments from Moline are too slow. They take from ten to fourteen days. Motor Transit's service from Moline is overnight or second day.

Stuart, Iowa. A hardware, appliance, plumbing and heating dealer purchases these articles at Chicago, Kansas City, Omaha, Rockford, Winona, and the Twin Cities and for the transportation thereof he uses the service of Motor Transit almost exclusively, because it is very satisfactory. Certain other motor carriers' service also have been satisfactory, but he says that Iowa-Nebraska has not settled any of the three claims filed by him. He claims that curtailment of applicant's service would make it harder for him to do business.

Menlo, Iowa. An owner of a variety and dry goods store receives merchandise from Chicago, Omaha, Kansas City, and the Twin Cities, and most of it moves by Motor Transit. Some shipments from Omaha have been routed Iowa-Nebraska. She has had no complaint against either of these carriers, but the former provides daily service as compared with twice weekly by the latter. She believes that sales would be lost, particularly around Christmas, if Motor Transit's service is not available to the same extent as in the past.

Casey, Iowa. A dealer in hardware, appliances, and plumbing supplies receives shipments from Minneapolis and Omaha. Those from Minneapolis move by Motor Transit at the direction of this dealer, and those from Omaha are routed Iowa-Nebraska by the consignor. He started using Motor Transit service at the suggesting of his prede-

cessor who informed him that "it is the best available" and he has found this to be so. That carrier provides a fast daily service, and any curtailment thereof would be inconvenient. He has no complaint regarding Iowa-Nebraska service.

A merchant selling general merchandise purchases various articles, at Omaha, Kansas City, St. Louis, Morris and Chicago, Ill. These shipments are delivered to him by Motor Transit. He directs that they move by that carrier, because in the past he has had some unsatisfactory experiences with respect to shipments moved by other motor carriers. Motor Transit maintains a regular daily scheduled service at Casey. The other carriers do not provide [fol. 37] such service and some of them expect him to take delivery of merchandise after the store is closed or before it is open in the morning. Iowa-Nebraska serves this point twice weekly. Without the type of service rendered by Motor Transit he would discontinue handling linoleum and to continue the remainder of the business he would purchase and operate motor equipment.

Adair, Iowa. A dealer in farm machinery, parts, motor trucks, and refrigerators receives small farm implements and repair parts from Rock Island, St. Paul, Minneapolis, Des Moines, and Columbus and Omaha, Nebr. All of these shipments, ranging up to 1,500 pounds, are transported by applicant, except a few from Omaha and west thereof that are moved by Iowa-Nebraska. The services of both of these carriers have been very good. The 5,000-pound limitation has not affected his transportation requirements, but he needs continuation of Motor Transit's five day a week service as Iowa-Nebraska services this point only two or three times a week.

A lumber company retailing lumber, coal, fencing, hardware, paints and like items receives paints from Minneapolis and Kansas City, hardware from Omaha, Des Moines, and Chicago. These shipments move by applicant, except that some of them from Omaha are routed Iowa-Nebraska. It has no complaint with either of these services. Applicant, however, provides the better service. No other carrier gives Adair regular service five days a week. It doubts that other carriers would offer like service if applicant's operations are confined to rail-billed freight.

Anita, Iowa. The municipally owned power and water works receives barreled lubricants and greases from Omaha, pipe and fittings, wiping rags, tools, and meters, from Joplin and Des Moines. These articles have been moved predominantly by Motor Transit. This service has been excellent and it is preferred to that of Iowa-Nebraska.

A dealer in farm implements and machinery is primarily interested in applicant's service on small shipments of repair parts from Omaha and the Tri-Cities, because that service is the best available. Iowa-Nebraska handles only prepaid shipments of tires from Omaha for him. Applicant is the only carrier giving a regular daily service. Unless some other carrier would replace applicant's service, he would have to operate his own vehicles to and from Omaha practically every day, a distance of 70 miles each way.

Wiota and Atlantic, Iowa. A merchant operating two hardware, furniture, and appliance stores at Atlantic and one store at Wiota, which also stocks farm supplies and equipment, purchases hardware, paints and various other items, at Omaha, Des Moines, Ottumwa, and Chicago, and furniture and appliances at Omaha, Des Moines, Chicago, and points in Missouri. These articles move principally in lots of not over 2,000 pounds (about two shipments a year exceed 5,000 pounds) and they are transported mainly by Motor Transit. Some of them from Omaha move by Iowa-Nebraska at the direction of the consignor. Curtailment of Motor Transit's service would inconvenience these two communities, because they have become accustomed to the good service rendered by it, including prompt tracing of shipments and processing of claims. Iowa-Nebraska and Watson Bros. are very careless in handling such matters.

Atlantic, Iowa. An automobile agency receives automobile parts and supplies from Chicago, Janesville, Wis., and Flint, Mich. These shipments weigh up to 2,500 pounds and they move by Motor Transit in single-line or joint-line [fol. 38] service. It is a fast dependable service and is required to secure the quickest possible service on urgently needed parts. Such parts are ordered one day from Chicago and usually they are delivered the next day by Motor Transit.

Atlantic and Griswold, Iowa. The latter point is on Iowa Highway 100 south of U. S. Highway 6. A merchant operating stores at these points deals in farm equipment, well and water supplies, and hardware. Shipments of these articles range up to 6,000 pounds. They originate at Lexington, Ky., St. Louis, Minneapolis, Chicago, Omaha, Des Moines, Ottumwa, and St. Joseph. He specifies delivery by Motor Transit. Iowa-Nebraska, Watson Bros. and Bos Truck Lines, Inc., hereinafter called Bos, also provide service at Atlantic. In addition to applicant, Griswold is served by two other small carriers, Thornton Transfer and McVey Transfer, operating from Omaha. This merchant believes that the continuation of applicant's service without restrictions, is necessary to prevent an increase in his cost of doing business and to provide the best service available at these points.

A wholesale distributor of food, confection, and tobacco products receives shipments, ranging up to 20,000 pounds, from Chicago and east and from west coast points. Applicant's service has been used quite extensively in the movement of these commodities. Since the limitation was imposed another motor carrier has been handling shipments exceeding 5,000 pounds, but it has experienced some difficulties with this carrier's service, and believes that the limitation should be removed. Without applicant's service, it would have to figure longer in transit time for shipments and to arrange for a larger inventory.

Oakland, Iowa. A dealer in hardware, appliances, and furniture, who also operates a funeral home, receives furniture from Kansas City and hardware from Chicago. These shipments usually do not exceed 1,000 pounds each, and they move by Motor Transit, the only regular dependable service from the east. Iowa-Nebraska, in addition to Motor Transit, provides service from Omaha.

A gas plant, employing 51 persons, operates a compressor booster substation on a gas pipe line. It obtains repair parts for engines from points east of the Mississippi River. These shipments do not exceed 5,000 pounds, and they are usually delivered by Motor Transit, which is the only carrier rendering regular daily service from the east. Iowa-Nebraska makes some deliveries (on call only) from Omaha.

Council Bluffs, Iowa. A manufacturer of hammers for feed and flour grinder hammer mills receives steel in lots of 10,000 pounds or more from Erie, Pa. Prior to September, 1951, these shipments moved by Motor Transit from Chicago. Since that date they have been moving by Prucka Truck Line or On-Time Truck Line and their services have been reasonably satisfactory. Its out-bound shipments, weighing from 150 to 1,500 pounds, move to Iowa and Illinois points, Minneapolis, Kansas City, and St. Joseph and Motor Transit service is used wherever possible, because it is superior to other services. Watson Bros. have failed to pickup shipments for two days. The service to Nebraska points of Darling Truck Lines was very unsatisfactory.

Omaha, Nebr. A storage battery company ships such batteries in quantities of 250 to 750 pounds to points in the western one-fourth of Iowa and to points in Nebraska. The consignees control the routing of these shipments, [fol. 39] but the shipper is concerned because Motor Transit is the only service available to certain points in Iowa. This company in the past has received certain commodities in truckloads from interstate origins by Motor Transit and the service would be used again if it becomes available. Some of this truckload traffic formerly moved and is presently being transported by other available motor carriers.

A company operating a large coffee roasting plant and distributing hardware ships to points in Iowa, Nebraska, and southern Minnesota. For many years it has used applicant's service to points served by it, particularly those on U. S. Highway 6 in Iowa. During the period from January to August, 1951, it shipped 50 truckloads of coffee by applicant to points in Iowa, and to Minneapolis and Rock Island. These shipments are now moving by other carriers. Less-than-truckload shipments of coffee ranging from 150 to 4,100 pounds, are also transported by applicant to many points on its lines in Iowa. For example in June, 1951, fifty-seven shipments moved to fifty destinations and in August, 1951, there were about one hundred such shipments. Hardware shipments average 1,500 pounds each. They move almost as frequently as coffee to destinations on applicant's lines west and north of Des Moines. This carrier is the only one that provides a direct single-line ser-

vice to a number of points. Some other carriers possess authority to serve designated points, but they will not handle less-than-truckload traffic for such points. This shipper knows of no carrier that would completely replace the service applicant rendered prior to August 30, 1951. That type of service should be continued by this carrier. Its handling of volume traffic is necessary to a proper rendition of such complete service.

Points on Fred-rickson Line in station order west from Atlantic: *Marne, Iowa.* A general merchandise store handling dry goods, feeds, clothing, and groceries receives small shipments by Motor Transit's regular daily service. If this service should be reduced to twice weekly, he would have to buy in larger quantities instead of purchasing day to day requirements as at present. Shipments of 5,000 pounds or more are now moving by Rock Island, which carrier is now in the process of abandoning its tracks through Marne. When this is accomplished the nearest railroad station will be Atlantic, six miles distant. Iowa-Nebraska serves Marne, but this merchant does not believe that it can replace the service of Motor Transit, which he and his predecessor have relied upon for many years.

Walnut, Iowa. The mayor of this town is a dealer in medicines, insecticides, stock feeds of different kinds, wax, polish, and other items. He receives these articles from the manufacturer at Freeport, Ill., in shipments of 250 to 600 pounds. They are delivered by applicant within seven to ten days after the order is placed. He stores the articles in his home and owing to limited space he has to order frequently and require fast transportation service. He has not used Iowa-Nebraska service because more than one transfer in transit is necessary, which causes delays. When Rock Island relocates its main line, Walnut will be on a branch line.

Shelby, Iowa. An operator of a general repair garage receives batteries from Kansas City, Kans., and automotive parts from Omaha. They move principally by Motor Transit, as it is the only carrier providing daily service. Rheiner Bros. operate a twice weekly service between Omaha and Shelby. Iowa-Nebraska also serves Shelby. This operator is mayor elect and desires to retain Motor Transit's

service for the benefit of the town, particularly since Shelby will be in the same situation as Walnut regarding past and future railroad service. Personally he only receives about two shipments a year.

[fol. 40] A resident speaking on behalf of the community is of the opinion that the daily service of applicant is a necessity to the future welfare of the town.

Minden, Iowa. A dealer in hardware and supplies receives a few small shipments from Chicago and Omaha. Those from Chicago and perhaps a few from Omaha move by applicant.

Neola, Iowa. A farm implement and equipment dealer receives small shipments from Kansas City and Rock Island. The movement from Kansas City began in January, 1952. Only three shipments moved during the first three months of that year and they were transported by Motor Transit, which also hauls the four or five shipments a year from Rock Island. He does not know of any motor carrier that provides the same kind of service Motor Transit furnishes from these points. Neola like the other points just discussed above will be on a branch line of the Rock Island after the relocation of its main line.

Underwood, Iowa. The owner of a general store and locker plant receives practically all of his supplies from Omaha by Kroeger Transfer Company. Motor Transit is the only carrier rendering regular daily service from Eastern interstate origins. Abandonment by Rock Island of its rail service will leave Underwood without rail freight service.

Points on Frederickson Line in station order north from Oakland: Hancock, Iowa. A distributor of petroleum products, tires, batteries and oil, with seven outlets, obtains lubricating oils, in cans weighing less than 5,000 pounds per shipment, from Chicago by Motor Transit. It is the only regular daily motor service at this point. Hancock will be on the relocated main line of Rock Island.

Harlan, Iowa. One of the partners in the Frederickson operation, which was sold to applicant, during the past seven years has been engaged in various businesses, principally in the wholesale distribution of various products, such as candies, cigarettes, tobacco, fountain supplies, and paper

goods. He receives shipments from Chicago, St. Louis, and eastern points and they move direct by, or are interlined with, Motor Transit. He uses Motor Transit because it furnishes the best service available.

An automobile dealer purchases repair parts in Kansas City. About one shipment (under 5,000 pounds) a week of such parts is transported by applicant, because it affords the quickest delivery.

Testimony of Opposing Motor Carriers

Iowa-Nebraska maintains headquarters at Avoca, Iowa, a point on the Frederickson route between Council Bluffs and Atlantic, and terminals at Avoca, Omaha, Des Moines, Chicago, and New York City. It provides pickup and delivery service through agents (cartage companys) at Davenport, Iowa City, Cedar Rapids and five other points not here involved. Its owned equipment consists of 8 straight trucks, 22 tractors, and 23 trailers, of which 20 are refrigerated. Of this equipment eight units are used in pickup and delivery service, two at Omaha, two at Des Moines, three at Avoca, and one at Chicago. Five of the tractors are leased to owner-operators who are purchasing them and they, together with lessor and lessee owned trailers, are used exclusively in hauling dairy products eastbound to Chicago, Philadelphia, Pa., New York City, and Boston, Mass., and general commodities westbound. Nine of the units are used the same type operations. Three units are used in over-the-road service between Omaha and Des Moines. The remaining five units are used to provide service on the rest of this carrier's authorized routes. In [fol. 41] addition, it utilizes on a trip lease basis 42 tractor-trailer units. The rules prescribed in Ex Parte No. MC-43, *Lease and Interchange of Vehicles by Motor Carriers*, 52 M.C.C. 675, decided May 8, 1951, do not permit trip-leasing. The validity of these rules were tested in the District Courts of the United States for the Northern District of Alabama and for the Northern District of Indiana and both courts refused to enjoin the enforcement of such rules. These actions were appealed and the United States Supreme Court in *American Trucking Assoc.* v. *United States*, 340

U. S. 298, decided January 12, 1953, affirmed the decisions of the District Courts.

As of March 31, 1952, this carrier's assets consisted of $15,181 cash, $54,827 accounts receivable, $194,945 operating property, $4,650 special deposits, $2,500 permits, $6,066 material and supplies, and $16,502 prepayment, and its liabilities were $10,000 capital stock, $65,454 surplus, $104,215 reserve for depreciation, $42,826 accounts payable, $42,234 notes payable, and $29,940 drafts payable. During the first three months of 1952 its net operating income was $4,395 out of a total operating revenue of $255,606.

This carrier holds certificates to transport general commodities, with exceptions, (1) between Chicago and Omaha (a) over a route not involved in this proceeding, (b) so far as here pertinent over the routes under consideration west from the Tri-Cities to Omaha through Atlantic and Avoca (and also over U. S. Highway 6 from Atlantic to Omaha) and return, and (c) from Tri-Cities over U. S. Highway 6 to Iowa City and thence over routes not here involved, and return, serving all intermediate points in Iowa, (2) between Cedar Rapids and Iowa City, over the route here involved, serving all intermediate points, (3) between Marengo and Belle Plaine, Iowa, over a route not here involved, serving all intermediate points, (4) between Marshalltown, Iowa, and Des Moines, over a route not here involved, serving all intermediate points, and (5) between Avoca and Des Moines, over a route not here involved, except that portion of Iowa Highway 64 between Avoca and Harlan, serving all intermediate points, (6) to transport packing-house products and fresh meats between Omaha and Arcadia, Iowa, over a route not here involved, serving all intermediate points and 16 off-route points, including Hancock, Shelby and Walnut points directly involved in this proceeding, and Brayton, Exira, Guthrie Center, and Hamlin, Iowa, points indirectly involved here, and (7) service is authorized to and from points within 12 miles of the central post office, Des Moines, except five designated points, as intermediate and off-route points in connection with this carrier's presently authorized regular-route operations to and from Des Moines.

It also holds common carrier irregular-route authority to transport (1) fresh meats, packing-house products, and

packing-house supplies between Omaha and eleven points in Iowa, of which only one, Harlan, is on a considered route, (2) butter, eggs, and dressed poultry, minimum 16,000 pounds, from Omaha and points within 100 miles thereof to New York City, Philadelphia, and Boston, and (3) general commodities, with exceptions, from New York City to Chicago, and mica splittings and dust from New York City, Cohoes, and Utica, N. Y., to Valpar-iso, Ind. It is also certificated over regular and irregular routes to haul butter, eggs, and dressed poultry and agricultural commodities from Avoca, Harlan, and Exira to Chicago.

Prior to sometime in February, 1952, Iowa-Nebraska operated a unit of equipment from Omaha, between ten p.m. and midnight, to Des Moines. It moved to Avoca and layed over until morning, then moved through Atlantic, peddling the witness "believed" at all points on Iowa Highway 83 and U. S. Highway 6. After that time it inaugurated a [fol. 42] peddle operation from Omaha to Atlantic, serving Avoca, Walnut, Marne, and Harlan, and an operation over U. S. Highway 6 from Omaha, between ten p.m. and midnight, to Des Moines peddling Oakland and Atlantic and transporting freight for points on that highway east of Atlantic to Des Moines, where it is transferred to other equipment and peddled west the next morning as far as Anita, or Wiota if necessary, and then this unit usually proceeds to Guthrie Center, Iowa. The unit unloaded at Des Moines is reloaded and moves back to Omaha the next night. It conducts two other peddle operations, inaugurated "to best of my (witness) knowledge" in January 1949, one between Des Moines and Jefferson through Ames, Iowa, a route not here involved, and the other from Des Moines to Cedar Rapids, either (a) over U. S. Highway 6 to Marengo serving the intermediate points, and if traffic warrants thence to Cedar Rapids, if not, the equipment returns to Des Moines from Marengo, or (b) over Iowa Highway 64 to Marshalltown and U. S. Highway 30 to Cedar Rapids and return, serving the intermediate points, or (c) outbound from Des Moines over (a) above and returning to Des Moines from Cedar Rapids over (b) above, or in the reverse direction, depending on whether the greater volume of traffic on the truck is for delivery at points on the route through Marshalltown or the route through Marengo.

From Chicago to points west of Davenport in Iowa on the considered routes Iowa-Nebraska is presently providing truckload and less-than-truckload service "whenever the traffic demands". This service, including delivery, is for the most part performed by over-the-road equipment and some of this traffic has been transported in owner-operator equipment on a trip lease basis.

During the period from September 27, 1951, to April 19, 1952, Iowa-Nebraska transported (1) about 450 small shipments (only 36 of them weighed over 1,000 pounds) from Omaha, both originating and interchanged traffic, to points on the White and Frederickson Lines; (2) about 260 small shipments (only 22 of them weighed over 1,000 pounds) from Des Moines; and (3) about 235 similar shipments (only 9 of them weighed over 1,000 pounds), from Chicago. Sixty-five shipments originated at two points, Stuart and Mitchellville, on the White Line. Those from Stuart weighed 2,300 pounds and those from Mitchellville aggregated 26,527 pounds. This carrier has transported more of this traffic particularly that received from connecting lines, since the restrictions were imposed on Motor Transit's authorities, September 11, 1951. It admits that in February, 1952, it was performing more peddle service than it had been rendering prior thereto, that the peddle operation between Omaha and Des Moines has been changed, that an additional pickup and delivery truck has been added at Omaha; and that the peddle operations are losing money. Such operations, however, will be continued providing the traffic warrants such action. This carrier expresses a willingness and ability to purchase additional equipment to meet any demands for service that may result from curtailment or discontinuance of service by Motor Transit. The witness testified that 65 percent of this carrier's business is truckload traffic and did not dispute opposing counsel's observation that its annual report to this Commission showed the truckload traffic to be 80 percent.

Bruce Motor Freight, Inc. This carrier operates between St. Louis, Kansas City, Des Moines, and the Twin Cities. It serves no points on U. S. Highway 6, except Des Moines, where it crosses this highway. At this point it interchanges freight with all carriers serving any point on U. S. High-

way 6 in Iowa. It has no problem at Des Moines disposing of such interline traffic. Peddle service is provided at Pella and Oskaloosa by its line-haul equipment operating between [fol. 43] Des Moines and St. Louis and through a cartage agent at such points. It also renders service at Indianola. Some outbound shipments from Pella are hauled by Bruce's cartage agent to Des Moines for loading and movement in its line-haul equipment. This method of handling is used to give the shipper better service. From the Twin Cities to Des Moines its equipment is being loaded only to 75 percent of capacity and some times units are returned to Des Moines empty. From Des Moines to St. Louis the units are utilized only to 60 percent of capacity. The Des Moines-Kansas City operation is balanced.

Bruce's competition consists of eight common carriers between the Twin Cities and Des Moines, five between Kansas City and Des Moines, and three between Des Moines and St. Louis. It professes to believe that applicant would be "a brand new truck line starting up in business between the Twin Cities and Kansas City."

The witness for this carrier picked out ten of the shippers who supported the application located at Pella, Oskaloosa, Kansas City, Minneapolis, and Des Moines that Bruce has served and assumes such service was satisfactory since these shippers had not complained. It is his opinion that the granting of the application would seriously affect Bruce, because of many advantages, naming two; (1) difference in rates, and (2) loading equipment with rail-billed freight to prevent its being returned empty to a terminal.

Pasch Transfer. This trucker conducts a transfer and storage business at Grinnell. At that point, he performs cartage service for "Des Moines Transportation, the Van Wyk, Western, * * * M. & St. L. Railroad and their truck line". Every day he handles freight, mostly in less-than-truckload, from Chicago and western points, and less frequently from Minneapolis-St. Paul, Kansas City, and the Tri-Cities. Most of the shipments handled are from the east. He serves practically every business in Grinnell, including those firms and individuals supporting this application.

Bos Truck Lines, Inc. This carrier operates 40 tractors, 60 trailers, 17 trucks, and it uses leased equipment.

It employs slightly more than 100 persons. So far as here pertinent it possesses general commodity authority between Chicago and Kearney and Hasting-, Nebr., over designated highways, including that portion of U. S. Highway 6 in Iowa involved in this proceeding, serving all intermediate points and the off-route points of Mitchellville and Kellogg. Terminals are maintained at Chicago, Marshalltown, Des Moines, and Omaha.

Its daily operations on U. S. Highway 6 consist of over two units between Chicago and Omaha, one or two units from Omaha to Des Moines, and two or three from Chicago to Des Moines. Two or three times a week a peddle truck is operated east from Des Moines to Grinnell and return, and one is operated from Des Moines to Anita about three times a week, serving Redfield and points west thereof, and return. Mitchellville and Altoona are served by over-the-road trucks. Atlantic, Cedar Rapids, and Newton are served through cartage companies. Brooklyn is served on a "call and demand" basis. Durant traffic moved by Bos to Cedar Rapids and is transferred to an intrastate carrier for transportation to destination. Small shipments for points not served by the aforementioned peddle operations are delivered to connecting carrier for movement to destinations. During the past six months no difficulty has been experienced in getting the connecting lines to accept these small shipments. The tonnage transported by it has increased each year since 1945. Its operations are changing from pre- [fol. 44] dominately truckload to less-than-truckload owing to the contract carriers taking over the truckload business. This carrier also professes to believe that granting of the application would be detrimental to its operations.

Des Moines Transportation Company, Inc. This carrier operates approximately 300 tractor-trailer units and maintains terminals at Des Moines, Omaha, Mason City, the Twin Cities, and Chicago, and a "terminal setup" at the Tri-Cities. It holds, among others, general commodity authority from Chicago over certain highways to Moline and thence over U. S. Highway 6 to Omaha and return, serving the intermediate points of Davenport, Iowa City, Newton, Des Moines, Cedar Rapids, Marengo, Grinnell, Kellogg, Adel, Atlantic, and Council Bluffs. Traffic to and from the

Tri-Cities is picked up and delivery for Des Moines Transportation by Roederer Transfer and Storage; by a commission agent, Maher Brothers, at Iowa City; by Pasch Transfer at Grinnell; by a local cartage agent, Merchants Transfer Company, at Newton; by a local cartage agent, Smiley Transfer, at Atlantic. Marengo and Kellogg are serviced by road-haul equipment. It operates one or more trucks daily from Chicago to Omaha, and several trucks daily from Chicago to Des Moines. In the opposite direction there are daily operations, the number of trucks depends on the volume of traffic, from Omaha and Des Moines to Chicago. A daily peddle service is provided on interstate traffic at authorized points on U. S. Highway 6 east of Des Moines to Davenport. Sometimes the equipment is not returned from Davenport. It might contain freight for Chicago, Peoria, or beyond and move eastw d to such points. Peddle service is also provided in the reverse direction. Daily service on less-than-truckload and volume shipments to authorized points on U. S. Highway 6 in Iowa is provided from Chicago and Omaha. Shipments moving by Des Moines Transportation from the Twin Cities would be delivered the next day at Newton. Eighty-one percent of its less-than-truckload traffic averages less than 600 pounds per shipment. If necessary this carrier would seek authority to serve additional points on U. S. Highway 6 in Iowa so as to offset any curtailment in the service of Motor Transit.

P & W Truck Line operates 7 trucks, 14 tractors, and 22 semi-trailers. It holds a certificate to transport, among other things, machinery and farm equipment and parts thereof from Milwaukee, Wis., and Canton, Chicago, East Moline, Rock Falls, Rock Island, and San-wich, Ill., to points in the southeastern three-fourths of Iowa, including points on U. S. Highway 6 east of Stuart, binder twine from Chicago to the same area, and iron and steel products from the Chicago commercial zone to Omaha and points in southeastern Iowa on or enclosed by U. S. Highways 6 and 169, over irregular routes. Eighty-eight freight bills were presented for inspection as representative of its operations during the period February 4 through 9, 1952. All of these shipments originated in the Chicago commercial zone and 34 of them, truckloads of steel, moved to Des Moines, Kel-

logg, Newton and Davenport-Bettendorf, points on U. S. Highway 6. The remaining 54 shipments moved from Chicago to Ottumwa. At the time of the hearing, May 21, 1952, this carrier was hauling binder twine, tractors, steel, household goods, and rendering works equipment and machinery. It believes that its business would be "hurt" if the authority sought is granted.

Smiley Transfer and Storage, hereinafter called Smiley, conducts a drayage, storage, and moving business at Atlantic. It operates two trucks and one van. It picks up and delivers shipments for Watson Bros., Des Moines Transportation, Bos, and Iowa-Nebraska. These carriers' equipment are at its dock as follows: Watson Bros. on the average of three or four times daily, Des Moines Transportation on the average of four days a week, mostly from the east [fol. 45] with shipments ranging from minimum to truckload, Bos every night, except Friday, from both the east and west, and Iowa-Nebraska twice a day from Omaha and Des Moines handling about 20 to 25 shipments a day. Smiley's volume of such freight a day ranges from 10,000 to 90,000 pounds. The line-haul carriers frequently handle freight for some of the shippers at Atlantic that are supporting the instant application. Smiley has had no complaint about their services.

Maher Brothers Transfer performs local drayage at Iowa City and Coralville for Poole Transfer, Watson Bros., McCoy Truck Lines, Inc., Des Moines Transportation, Knaus Truck Lines, Motor Cargo, Inc., and Iowa-Nebraska. It owns eight pickup and delivery trucks and certain other equipment. These carriers render service at Iowa City as follows: Poole three times a day from Twin Cities, Tri-Cities, and Muscatine with overnight service from Minneapolis, next day from Chicago, same evening from Tri-Cities; Des Moines Transportation twice a day from Omaha and Chicago; Knaus about four times a week; Motor Cargo approximately three times a week, McCoy four times a week with shipments mostly from eastern points weighing less than 5,000 pounds each; Watson Bros., three times a day from Kansas City, St. Louis, Omaha, and the Twin Cities; and Iowa-Nebraska three times a week from Omaha and Chicago. Iowa City is also served by five other road-

haul carriers who use the facilities of two other local cartage operators. The shipments delivered to his dock by these carriers are predominately less than 5,000 pounds each. Service has been rendered to five of the shippers who testified in support of the application and there have been no complaints.

Gateway Transportation Co., owns 700 units of over-the-road equipment and operates between Minneapolis, Chicago, St. Louis, and Des Moines and serves Des Moines, Altoona, Colfax, Newton, Grinnell, and Iowa City on U. S. Highway 6. It established a terminal at Des Moines on February 1, 1952, and employed a drayman at Newton about May 1, 1952. It claims to be one of the largest peddle operators in the midwest area. It has daily operations between St. Louis and Des Moines, and between Des Moines and Milwaukee, but its equipment is not being utilized to capacity. It serves Newton from Des Moines at least three times a week. It has interchanged with Motor Transit for a number of years.

Roberts Transfer of Audubon owns ten units of power equipment and five trailers. It operates between Des Moines and Omaha in the transportation of general commodities over a designated route north of U. S. Highway 6 serving, insofar as here pertinent, the terminal points and Guthrie Center, Audubon, Exira, Hamlin, Avoca, Minden, Neola, Underwood, Council Bluffs, and Oakland. It has served six of the firms supporting the application, without any material complaints, through interchange with connecting carriers at Des Moines. Since sometime in October, 1951, it has had an arrangement with Motor Transit to handle some of the latter's traffic in Motor Transit trailers from Des Moines to Omaha, and to some of its Iowa stations, which Motor Transit is prohibited from transporting on account of the key-point restrictions. This traffic aggregates 150,000 pounds a month. If this carrier does not continue to enjoy this traffic and other connecting line traffic it would not be able to operate at a profit, according to the witness.

Discussion

The Motor Carrier Act, 1935, was approved August 12, 1935, and therein Congress declared its policy to be as follows:

> * * * to regulate transportation by motor carriers in such manner as to recognize and preserve the inherent advantages of, and foster sound economic conditions [fol. 46] in such transportation and among such carriers in the public interest; promote adequate, economical, and efficient service by motor carriers, * * *, improve the relations between, and coordinate transportation by the regulation of, motor carriers and other carriers; develop and preserve a highway transportation system properly adapted to the needs of the commerce of the United States and of the national defense; * * *.

The declaration of policy of Congress in the Transportation Act of 1940, approved September 18, 1940, is worded somewhat differently, but its import is substantially the same as that contained in the foregoing quotation.

Section 213(a)(1) of the Motor Carrier Act permitted a railroad to acquire a motor carrier, provided the Commission finds that the acquisition will promote the public interest by enabling the railroad to "use service by motor vehicle to public advantage in its operations", without undue restraint of competition. This section was repealed by the Transportation Act of 1940. The substance thereof was carried into Section 5 of the Interstate Commerce Act.

Early in the regulation of the motor carrier industry, the Commission, division 5, in *Pennsylvania Truck Lines, Inc.—Control—Barker*, 1 M.C.C. 101, 111, decided October 8, 1936, said:

> * * * we are not convinced that the way to maintain for the future healthful competition between rail and truck service is to give the railroads free opportunity to go into the kind of truck service which is strictly competitive with, rather than auxiliary to, their rail operations. The language of section 213, * * *, is evidence that Congress was not convinced that this should be done.

These views ripened into a policy in *Kansas City S. Transport Co., Inc., Com. Car. Application*, 10 M.C.C. 221, 240, decided November 12, 1938, which was prior to the acquisition by Motor Transit of the White Line and Fred-

erickson Line rights. Therein Division 5 imposed five conditions or restrictions upon the operating authority granted to a motor carrier subsidiary of two affiliated railways, which in most respects were substantially the same as the conditions and restrictions ultimately imposed and contained in the certificate issued to Motor Transit on September 11, 1951. After that decision, practically all grants of operating authority to motor carrier subsidiaries of railroads were made subject to like conditions and restrictions or modifications thereof required by the particular circumstances, except in a few instances, such as that here under consideration insofar as the White Line rights are concerned, the certificates contained no provisions limiting the service to that which is auxiliary to, or supplemental of, train service. The approval of the purchase of the White Line rights and the original certificate covering these rights, as before indicated, were specifically made subject to the condition or reserved right of the Commission later to impose such restrictions which might be found necessary to insure that the service would be limited to that which is auxiliary to, or supplemental of, train service of the Rock Island.

The main purpose for the policy of imposing the five above-quoted restrictions, or modifications thereof, was to prevent the railroads from acquiring motor operations through affiliates and using them in such a manner as to unduly restrain competition of independently operated motor carriers. This policy was and is sound and should be relaxed only where the circumstances clearly establish [fol. 47] (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience.

Motor Transit operated the White Line rights in Iowa under claimed "grandfather" rights from April, 1938, to December 3, 1941, and under a certificate from the latter date to February 5, 1945, that contained only the reserved right of the Commission to impose in the future such conditions that may be necessary to insure that the service shall be auxiliary to, or supplemental of, train service.

From February 5, 1945, to the present, Motor Transit has continued the operation by reason of pending litigation before the Commission or the Courts, or under temporary authority originally issued August 30, 1951, later modified, and subsequently extended to the date of the disposition of this proceeding. Although the Commission's policy of imposing the quoted restrictions established about three years prior to the issuance of a certificate to Motor Transit, the certificate of that carrier did not restrict the operation of the White Line rights in any manner. Thus, Motor Transit operated under such rights for a period of about seven years without any complaint that its operation was unduly restraining competition or indication that the Commission contemplated exercising the said reserved rights. After the Commission, on its own motion, reopened No. MC–29130 and the two related cases for reconsideration, and imposed the above-described five restrictions and conditions, the proceedings were reopened for further hearing upon petition of Motor Transit for reconsideration, oral argument, and withdrawal of the report on reconsideration. The attorneys representing Motor Transit at that time did not recognize the jurisdiction of the Commission to change or modify the orders authorizing acquisition of Motor Transit's certificates and they entered a special appearance on applicant's behalf solely for the purpose of filing the petition. At the subsequent further hearing a like appearance was entered for the sole purpose of contesting the jurisdiction of the Commission. Consequently there was no new or additional evidence before the Commission and as a result thereof the only issue was the question whether the reasoning of the prior report on reconsideration and the conclusions reached therein were sound in the face of the criticisms thereof contained in Motor Transit's petition. In the circumstances the Commission had no alternative but to impose the restrictions and conditions established in accordance with the policy enunciated in *Kansas City S. Transport Co., Inc., Com. Car. Application, supra.* This action was considered by the United States District Court for the Northern District of Illinois in a suit initiated by Motor Transit. That Court set aside and permanently enjoined enforcement of the Commission's order. This deci-

sion sustained Motor Transit's position. On appeal, however, the United States Supreme Court reversed the decision of the District Court and thereby sustained the views of the Commission. Thereafter, Motor Transit changed counsel with respect to this matter and he advised Motor Transit to seek limited temporary authority and to file an application under section 207 of the act for permanent authority. Thus, after the passage of approximately four years, Motor Transit concluded to do substantially what it had an opportunity to do in October, 1947, namely to introduce additional evidence in the reopened proceedings.

The applicant is the only carrier that for a considerable number of years has maintained daily (generally at least 5 days a week) scheduled peddle operations over the entire White Line and Frederickson Line routes regardless of the volume of traffic available for movement in such operation. Opposing motor carriers with appropriate authority have not provided such a service, except with respect to selected small segments of the routes, principally immediately east [fol. 48] of Des Moines. These carriers prior to August 30, 1951, delivered less-than-truckload freight to Motor Transit for movement to destinations they are authorized to serve. Some of this freight consisted of low-rated articles which such carriers deemed unprofitable to handle. These carriers in many instances refused to accept less-than-truckload shipments from their motor carrier connections for movement to a destination embraced in their operating authority. As a result thereof, several of these connecting carriers have had to rely upon Motor Transit to accept and make delivery of such shipments, even in cases where the delivering carrier was designated by the shipper. These experiences have convinced some of the connecting carriers that the unrestricted services of Motor Transit should continue to be available to them so that they may have a carrier that is always willing and able to accept interchange shipments destined to points on the White Line and Frederickson Line routes. One motor carrier that possesses rights on U. S. Highway 6 between Davenport and Des Moines, elects to give all its less-than-truckload freight to Motor Transit for delivery at such points, because it is not profitable for it to provide this service.

Applicant adduced testimony of a great number of public witnesses from practically every point served by Motor Transit on the routes directly involved here and also some located at certain points on its other routes that would be affected by the restrictions and conditions imposed September 11, 1951. The witnesses located at points in Iowa have used the services of Motor Transit over a period of many years and have to a considerable extent built their businesses on that service, particularly with respect to less-than-truckload shipments. With that service available, they do not have to maintain large inventories because they can order from the manufacturer or wholesaler at the supply points, such as Chicago, Minneapolis-St. Paul, Omaha, Kansas City, or Moline, early one day and be reasonably certain of delivery the next day in some instances, and in others not later than the second day. Some of them stressed their need for this service in obtaining expedited movement of repair parts, including those for farm machinery. In general, all of these witnesses, both those directly and indirectly affected, are apprehensive that if the Commission ultimately requires Motor Transit to confine its operations to the transportation of rail-billed freight their businesses will be adversely affected, as indeed some of them already have been by the weight limitations imposed in the temporary authorities. Some of the witnesses have not been able to obtain reasonably prompt pickups and delivery of shipments by carriers other than Motor Transit. A few of them could get along without the service of Motor Transit; but they would use it in preference to the service of any other authorized carrier. The great majority of these witnesses support this application because they have received satisfactory service from Motor Transit for a long time and they are not convinced that any other motor carrier will or can render the type of complete service respecting transportation, claim adjustments, rate and routing information, and tracing of shipment, that they have become accustomed to. Motor Transit is able to provide such complete service because it maintains freight agents at many points on its routes and the other motor carriers have them located at some of the larger points only.

Of the opposing motor carriers Iowa-Nebraska, Bos, and Des Moines Transportation are the only ones with inter-

state authority to serve all points or a substantial number of designated points on the routes directly involved in this proceeding. Bos has the authority to provide peddle service at all points on U. S. Highway 6 in Iowa. It has been providing such service approximately three times a week from Des Moines to Grinnell and return, and from Des Moines to Anita and return. A few other points on the [fol. 49] White Line route are served by over-the-road equipment, through cartage companies, or on a call and demand basis. These services are not comparable to the peddle services rendered by Motor Transit. Des Moines Transportation possesses interstate authority to serve only ten intermediate points on U. S. Highway 6 between the Mississippi River and Omaha. Daily peddle service is provided at six of the ten points. These six points are located east of Des Moines. This carrier's authority is insufficient to allow it to replace the interstate service heretofore rendered or presently being rendered by Motor Transit. Recognizing this it says that if necessary it will seek additional authority. Certain other opposing carriers hold authority to serve a few of the points on the routes directly and indirectly involved. There is no serious contention that either Bos or Des Moines Transportation are in a position to supplant Motor Transit operations as rendered prior to August 30, 1951.

Iowa-Nebraska is the carrier that the opposition advances as being in a position to take over the interstate traffic moving to and from points on the White Line and Frederickson Line routes which Motor Transit would have to relinquish under the conditions and restrictions imposed September 11, 1951. This carrier possesses the required interstate authority to render such service, but over the years it has not been providing any substantial peddle service on these routes. This no doubt was attributable to the small amount of this kind of traffic available to this carrier and to some extent probably by the fact that a large part of its business is the transportation of dairy products eastbound to Chicago, Philadelphia, New York City, and Boston. In February, 1952, it inaugurated certain peddle operations and together with the other opposing line-haul motor carriers and certain other motor carriers discon-

tinued, after August 30, 1951, the transfer of less-than-truckload traffic to Motor Transit for delivery to points on its lines also served by one or more of the opposing carriers, for the very obvious purpose of placing themselves in a position at the hearing on this application to show that they are endeavoring to provide services that can be expanded later to supplant those heretofore and presently provided by Motor Transit on interstate motor-billed freight. Iowa-Nebraska does not contemplate inaugurating daily scheduled peddle operations to take the place of each such operation conducted by Motor Transit, but says that it will provide this type of service as demanded by the volume of traffic. This clearly is not the kind of service that the supporting witnesses have had available in the past and their testimony demonstrates that they will not be satisfied with less in the future. The opposing motor carriers did not present one public witness to testify as the adequacy of the services being rendered by them.

Applicant's operations have been conducted in the same manner as other motor carriers operating in the same area. It has participated in the conferences of such carriers and is a party to their agency tariffs and in general throughout the years has worked for the development and betterment of the industry as a whole without regard to its being a subsidiary of a railroad. As hereinbefore indicated, the less-than-carload traffic moving by railroad over a recent five year period has consistently declined. During a comparable period the volume of traffic handled by a group of nine motor carriers serving the midwest area increased substantially. Applicant's tonnage also increased, but not to the extent of its competitors represented by this group of carriers. Thus the operations of applicant have not unduly restrained competition, and there is no evidence that its proposed operations would produce such a result.

[fol. 50] The opposing motor carriers take the position that Motor Transit's operations should be restricted, in accordance with the Commission's usual policy in this type of proceeding, to the transportation of rail-billed freight only. They indirectly imply that Motor Transit could handle freight on this type of billing just as expeditiously as that moving on motor-carrier billing. Theoretically this should be true, but in actual practice the motor-billed

freight is handled with greater dispatch and this is the reason that many of the public witnesses supporting the applicant have refused to deliver their shipments to Rock Island for billing even through the line-haul transportation thereof is performed entirely by Motor Transit. The reluctance of the shippers to use this kind of service is due to the fact that it requires longer in transit. For example, a shipment moving on rail billing from the Twin Cities to Marengo is picked up by the cartage company employed for that purpose by Rock Island and delivered to the Minneapolis or St. Paul rail terminal, worked, billed, and in one or two days turned over to Motor Transit for movement to destination. This shipment would required from two to four days more in transit than would be necessary if it moved by Motor Transit on motor billing. The situation in the reverse direction would be substantially similar: Motor-billed shipments from Chicago are picked up by Motor Transit and moved out in road-haul equipment the same night as contrasted with rail-billed shipments which are picked up by a cartage company for Rock Island and moved to Burr Oak, 15 miles, worked, billed, and returned to Chicago for transfer to Motor Transit for transportation to destination, or if it is necessary to move these shipments west from Burr Oak in box cars owing to the key point restrictions they would not reach Davenport for two or three days and sometimes longer. Similar delays occur on shipments in box cars to Des Moines. The delays in handling rail-billed shipments from Chicago are greated than from the Twin Cities. Rail-billed freight is delayed at points in Iowa on account of the method of handling these shipments before they are transferred to Motor Transit for movement. Perhaps these delays are unavoidable, but it seems that something might be done by Rock Island to eliminate or reduce the time of rail-billed shipments in transit. Another thing that shippers do not like about using rail billing is that Motor Transit cannot interchange shipments moving on such billing with its motor carrier connections, because Rock Island is not a party to the motor carrier tariffs. Its non-articipation in these tariffs is due to the policy of the motor carriers refusing to establish joint rates with railroads. This is a matter that the motor carriers could do something about.

The evidence abundently establishes that public necessity and convenience require the proposed less-than-truckload peddle operations. In addition to the testimony of the many public witnesses regarding their need for such service, there must be taken into consideration that not one of the opposing motor carriers having the requisite authority has established or offered to establish scheduled peddle operations to replace each such operation conducted by Motor Transit prior to August 30, 1951, and by refraining from doing so they no doubt realize that such peddle operations could not be profitable operated with interstate traffic only. The peddle service provided by Motor Transit has been, and to a limited extent, due to the weight limitation, is, based on interstate, intrastate, and rail-b-lled traffic. With these three kinds of traffic available it is patent that Motor Transit could provide better service to the public than the motor carriers who claim that they can take over Motor Transit's interstate motor-billed business. These carriers hold no intrastate rights on the considered White Line and Frederickson Line routes and cannot secure such rights because it is the policy of the Iowa State Commerce Commission to grant such rights to only one carrier on a given route, Motor Transit possesses such rights on these routes.

[fol. 51] There is some evidence of a public need for the proposed truckload services of applicant, but it is not as convincing as that with respect to the peddle operations, and this is understandable because the other motor carriers operating in the area have usually provided satisfactory service on truckload shipments. There is evidence that they have refused to accept truckloads of low-rated commodities. However, it is sufficient to warrant a grant of authority in this respect. This "the cream of the traffic", which to some extent has been handled by Motor Transit for many years without seriously affecting the expansion of its competitors operations, should not be handed over to such competitors and Motor Transit expected to provide the expensive peddle services.

Acceptance of the opposing motor carriers position would have the following results. They would be left to provide the peddle services on interstate motor-billed traffic, which alone will not justify the type of services heretofore

rendered by Motor Transit, and all such traffic in truckloads. Motor Transit would be left with intrastate and rail-billed traffic, which will not warrant continuance of the operations conducted by it prior to August 30, 1951. The net result is clear that the public would be left holding the bag, in that, it would have two or more carriers to provide the services and collectively they would be unable to render the quantity and quality of services maintained prior to that date by Motor Transit, and in addition a substantial number of employees of Motor Transit would be dismissed. Many of them would lose important rights resulting from years of service with Motor Transit.

The application requests, among other things, authority over designated highways between Chicago and Omaha. Applicant presently holds authority between Chicago and Silvis. Consequently, there is no reason for including this segment in the findings herein. The findings will include only the segment of this route between Silvis and Omaha, which authority may be tacked with the present authority between Chicago and Silvis.

The commodity description used in the findings hereof authorizes the transportation of dangerous explosives, except nitroglycerine. This description in its entirety is the same as that contained in the certificate issued on September 11, 1951.

The authority herein recommended supersedes and cancels all authority heretofore granted between the same points, more particularly described on "Sheets 2 and 15" of the certificate issued to applicant on September 11, 1951.

The findings hereinafter made are not to be construed as an abrogation of the policy established in *Kansas City S. Transport Co., Inc., Com. Car. Application, supra.* They represent an exception to that policy justified by the evidence in this proceeding. In other words, such findings do not establish a precedent. Each case of this character must be determined upon the facts and circumstances disclosed by the evidence.

Findings

The examiner finds that the present and future public convenience and necessity require operation by applicant,

in interstate or foreign commerce, as a common carrier by motor vehicle, of general commodities, except those of unusual value, nitroglycerine, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, (1) from Silvis, Ill., to Omaha, Nebr., over [fol. 52] Illinois Highway 92 to its junction with U. S. Highway 6, and thence over U. S. Highway 6 to Omaha, and return over same route, serving the intermediate points of East Moline, Moline and Rock Island, Ill., and Bettendorf, Davenport, Durant, Wilton, Atalissa, West Liberty, Iowa City, Coralville, Tiffin, Homestead, Marengo, Ladora, Victor, Brooklyn, Grinnell. Newton, Colfax, Altoona, Des Moines, Dexter, Stuart, Menlo, Casey, Adair, Anita, Wiota, Atlantic, Oakland, and Council Bluffs, Iowa, and the off-route points of Wolcott, Muscantine, Stockton, Moscow, Oxford, South Amana, Malcom, Kellogg, and Mitchellville, Iowa, (2) from Iowa City, Iowa, to Cedar Rapids, Iowa, over U. S. Highway 218 and return over same route, serving no intermediate points, and (3) from Harlan, Iowa, to Omaha, Nebr., over Iowa Highway 64 to Council Bluffs, and thence over U. S. Highway 6 to Omaha, and return over same route, serving the intermediate points of Corley, Minden, Neola, Underwood, and Weston, Iowa, and the off-route point of Shelby, Iowa, and (4) from Avoca, Iowa, to Atlantic, Iowa, (a) over U. S. Highway 59 to Oakland, and thence over U. S. Highway 6 to Atlantic, and (b) over Iowa Highway 83 to Atlantic, and return over either route, serving the intermediate points of Hancock, Walnut, and Marne, Iowa; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder; that a certificate authorizing such operations should be granted; and that the application in all other respects should be denied.

It is recommended that the appended order be entered.

ORDER

At a Session of the INTERSTATE COMMERCE COMMISSION, Division 5, held at its office in Washington, D. C., on the day of , A. D., 1953.

No. MC–29130 (Sub-No. 70)

THE ROCK ISLAND MOTOR TRANSIT COMPANY COMMON CARRIER APPLICATION

Investigation of the matters and things involved in this proceeding having been made, said application upon due notice having been heard by the examiner, who has made and filed a report herein containing his findings of fact and conclusions thereon, which report is hereby made a part hereof, and said proceeding having been duly submitted:

It is ordered, That upon full compliance with the requirements of sections 215 and 217 of the Interstate Commerce Act, and with the rules and regulations thereunder, a certificate be issued to applicant authorizing operations, in interstate or foreign commerce, as a common carrier by motor vehicle, of the commodities, and in the manner, described in the findings of said report, and that the application in all other respects be, and it is hereby, denied;

It is further ordered, That this order shall be effective on , 1953.

By the Commission, division 5.
George W. Laird, Acting Secretary.

v.

UNITED STATES OF AMERICA and INTERSTATE COMMERCE COMMISSION, Washington 25, D. C., Defendants

COMPLAINT—Filed July 20, 1955

Come now American Trucking Associations, Inc., its Regular Common Carrier Conference Iowa-Nebraska Transportation Company, Des Moines Transportation Company, Inc., Bruce Motor Freight, Inc., Western Transportation Company, McCoy Truck Lines, Inc., Brady Transfer and Storage Company, Motor Cargo, Inc., Gateway Transportation Company, and Bos Truck Lines, Inc., plaintiffs herein, and for their cause of action state:

I

Jurisdictional Statement

This is an action to suspend, enjoin, annul and set aside the report and order of the defendant, Interstate Commerce

Commission, in Docket No. MC-29130 (Sub. No. 70), *The Rock Island Motor Transit Company Common Carrier Application*, dated November 22, 1954, and reported at 63 M.C.C. 91, a copy of which is attached hereto and made a part hereof as Appendix A. This action arises under the provisions of Section 205(g) of the Interstate Commerce Act, 49 U.S.C. §305(g), Section 10 of the Administrative Procedure Act, 5 U.S.C. §1009, and Sections 1336, 1398, 2284, and 2321 to 2325 of the Judicial Code 28 U.S.C. §§1336, 1398, 2284 and 2321 to 2325. The United States of America is named as a defendant pursuant to Section 2322 of the Judicial Code, 28 U.S.C. §2322.

II

Parties

American Trucking Associations, Inc., is the national organization of the trucking industry, representing all types of motor carriers of property. Organized and existing as a non-profit corporation under the laws of the District of Columbia, American Trucking Associations, Inc., maintains offices at 1424 Sixteenth Street, Northwest, Washington 6, D. C.

The Regular Common Carrier Conference of American Trucking Associations, Inc., is an unincorporated association of regular route motor common carriers engaged in the interstate transportation of general commodities. The Conference maintains offices at 1424 Sixteenth St., Northwest, Washington 6, D. C.

Iowa-Nebraska Transportation Company, a corporation, doing business at Avoca, Iowa, is a common carrier by motor vehicle engaged in the transportation of general commodities in interstate commerce pursuant to authority granted by the defendant, Interstate Commerce Commis-
[fol. 58] sion.

Des Moines Transportation Company, Inc., a corporation, having its principal place of business at Des Moines, Iowa, is a common carrier by motor vehicle engaged in the transportation of general commodities in interstate commerce pursuant to authority granted by the defendant, Interstate Commerce Commission.

Bruce Motor Freight, Inc., a corporation, having its principal place of business at Des Moines, Iowa, is a common carrier by motor vehicle engaged in the transportation of general commodities in interstate commerce pursuant to authority granted by the defendant, Interstate Commerce Commission.

Western Transportation Company, having its principal place of business at Chicago, Illinois, is a common carrier by motor vehicle engaged in the transportation of general commodities in interstate commerce pursuant to authority granted by the defendant, Interstate Commerce Commission.

McCoy Truck Lines, Inc., a corporation, having its principal place of business at Waterloo, Iowa, is a common carrier by motor vehicle engaged in the transportation of general commodities in interstate commerce pursuant to authority granted by the defendant, Interstate Commerce Commission.

Brady Transfer and Storage Company, having its principal place of business at Des Moines, Iowa, is a common carrier by motor vehicle engaged in the transportation of general commodities in interstate commerce pursuant to authority granted by the defendant, Interstate Commerce Commission.

Motor Cargo, Inc., a corporation, having its principal place of business at Akron, Ohio, is a common carrier by motor vehicle engaged in the transportation of general commodities in interstate commerce pursuant to authority granted by the defendant, Interstate Commerce Commission.

Gateway Transportation Company, having its principal place of business at LaCrosse, Wisconsin, is a common carrier by motor vehicle engaged in the transportation of general commodities in interstate commerce pursuant to authority granted by the defendant, Interstate Commerce Commission.

Bos Truck Lines, Inc., a corporation, having its principal place of business at Marshalltown, Iowa, is a common carrier by motor vehicle engaged in the transportation of general commodities in interstate commerce pursuant to authority granted by the defendant, Interstate Commerce Commission.

Said plaintiffs were intervenors in opposition in the proceeding before the defendant, Interstate Commerce Commission, in Docket No. MC–29130 (Sub. No. 70), *The Rock Island Motor Transit Company Common Carrier Application*, and the above-named motor carrier plaintiffs as well as the motor-carrier members of plaintiffs American Trucking Associations, Inc., and its Regular Common Carrier Conference, which constitute a class too numerous to name individually and for which they customarily appear in proceedings before the Interstate Commerce Commis-
[fol. 59] sion and the courts, will be adversely affected and sustain continuing and irreparable injuries unless the Commission's report and order of November 22, 1954, (Appendix A) is suspended, enjoined, annulled and set aside.

III

Statement of the Case

By application filed under Section 207 of the Interstate Commerce Act, 49 U.S.C. §307, the Chicago, Rock Island and Pacific Railway Company, through its wholly-owned motor-carrier subsidiary, The Rock Island Motor Transit Company, sought authority from the defendant, Interstate Commerce Commission, to engage in all-out trucking operations in competition with its train service and the service of independent motor carriers between Chicago, Illinois, and Omaha, Nebraska, including service to and from the intermediate points of Moline, Illinois, Iowa City, Iowa, and Cedar Rapids, Iowa, among others, all of which points The Rock Island Motor Transit Company was then authorized to serve in trucking supplementary to the train service of the parent railroad company. The application was docketed as MC–29130 (Sub. No. 70), *The Rock Island Motor Transit Company Common Carrier Application*, and hearings on the application were held on March 18, through April 21, 1952, and on May 20, 21 and 22, 1952, at Des Moines, Iowa. The examiner's recommended report and order was served on April 21, 1953. After the filing of exceptions and replies thereto oral argument was had before the Commission on March 8, 1954. On November 22, 1954, the Commission rendered its report and order (Ap-

pendix A). In substance it grants the application for completely unrestricted trucking, subject only to the conditions that there may be attached from time to time to the privileges granted such reasonable terms, conditions and limitations as the public convenience and necessity may require, and that the contractual arrangements between applicant and the parent company be subject to revision to assure their being fair and equitable to the parties.

Petition of the plaintiffs herein dated February 16, 1955, for reconsideration of said report and order of the Interstate Commerce Commission having been denied by the Commission by order of July 6, 1955, served July 14, 1955, a copy of which is attached and marked Appendix B, plaintiffs have exhausted their administrative remedy before the Commission, and certificate of public convenience and necessity authorized by the assailed report and order will be issued by the Commission unless the report and order is suspended, enjoined, annulled and set aside and the issue of the certificate enjoined by this Court.

IV

Allegations of Error

The defendant, Interstate Commerce Commission in making and issuing the report and order complained of (Appendix A) and in denying reconsideration thereof by order of July 6, 1955 (Appendix B), exceeded its powers [fol. 60] and authority delegated under law and erred as a matter of fact and as a matter of law in the following particulars:

(a) The finding at 63 M.C.C. 108 that the present and future public convenience and necessity require unrestricted operation by The Rock Island Motor Transit Company, in interstate or foreign commerce, as a common carrier by motor vehicle, as more fully described in the report, is unsupported by and contrary to the evidence of record and is contrary to the law, to wit, the National Transportation Policy and Sections 5(2)-(b) and 207 of the Interstate Commerce Act, 49 U.S.C.A. preceding §1, §5(2)(b) and §307.

(b) The finding at 63 M.C.C. 96 that the shippers need the unrestricted service of The Rock Island Motor Transit Company, such as they enjoyed prior to August 30, 1951, is unsupported by and contrary to the evidence of record.

(c) The finding at 63 M.C.C. 96 that there are no other transportation facilities available that can replace the unrestricted service of The Rock Island Motor Transit Company, such as it rendered prior to August 30, 1951, is unsupported by and contrary to the evidence of record.

(d) The finding at 63 M.C.C. 96 that the existing weight limitation of 5,000 pounds per shipment is burdensome is unsupported by and contrary to the evidence of record.

(e) The finding at 63 M.C.C. 96 that the imposition of the auxiliary and supplemental to rail service restrictions would adversely affect The Rock Island Motor Transit Company is unsupported by and contrary to the evidence of record.

(f) The finding at 63 M.C.C. 96 that 11 points would have no motor peddle service if the application of The Rock Island Motor Transit Company were not granted is unsupported by and contrary to the evidence of record.

(g) The finding at 63 M.C.C. 107 that the public convenience and necessity require the less-than-truckload operations of The Rock Island Motor Transit Company is unsupported by and contrary to the evidence of record.

(h) The finding at 63 M.C.C. 107 that there is a need for the truckload service of The Rock Island Motor Transit Company is unsupported by and contrary to the evidence of record.

[fol. 61] (i) The finding at 63 M.C.C. 100 that the National Transportation Policy and Sections 5(2)(b) and 207 of the Interstate Commerce Act do not proscribe the authority of the Interstate Commerce Commission to grant The Rock Island Motor Transit Company an unrestricted certificate is contrary to the law as expressed therein.

(j) The finding at 63 M.C.C. 100 that the Interstate Commerce Commission may issue certificates of public convenience and necessity to motor carrier affiliates of railroads, with or without restrictions in its discretion, is contrary to the law as expressed in the National Transportation Policy and Sections 5(2)(b) and 207 of the Interstate Commerce Act.

(k) The finding at 63 M.C.C. 108 that the Commission may grant unrestricted motor-carrier authority to The Rock Island Motor Transit Company without departing from the Commission's past policy is contrary to the law as expressed in the decisions of the Commission interpreting the National Transportation Policy and Sections 5(2)(b) and 207 of the Interstate Commerce Act.

(l) The finding at 63 M.C.C. 100 that the Commission has in the past issued to railroad subsidiaries and now may issue to The Rock Island Motor Transit Company certificates of public convenience and necessity with only the "reservation to impose in the future any limitations, restrictions, or modifications that may appear necessary" is contrary to the law as expressed in the decisions of the Commission interpreting the National Transportation Policy and Sections 5(2)(b) and 207 of the Interstate Commerce Act.

(m) The finding at 63 M.C.C. 102 that the Commission need not impose auxiliary and supplemental restrictions upon grants of motor-carrier authority to railroad subsidiaries "where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience" is contrary to the law as expressed in the provisions of the National Transportation Policy and Sections 5(2)(b) and 207 of the Interstate Commerce Act.

[fol. 62] (n) The report of the Commission fails to give proper effect to the provisions of Sections 208 and 212 of the Interstate Commerce Act and the National Transportation Policy.

(o) The report of the Commission fails to give proper effect to the Commission's policy opposing the common ownership or control of competing transportation media.

(p) The report of the Commission fails to give proper effect to the Commission's obligations under the provisions of Sections 204(a)(6) and 216(b) of the Interstate Commerce Act and the National Transportation Policy.

(q) The report of the Commission fails to give proper effect to the economic realities confronting the independent motor carriers striving to compete with the railroad-subsidized Rock Island Motor Transit Company.

(r) The report and order of the Commission for the foregoing and other reasons is unreasonable, arbitrary, capricious, discriminatory and in abuse of discretion.

V

Prayer for Relief

WHEREFORE, Plaintiffs respectfully pray:

(a) That in accordance with Section 2284(1) of Title 28 of the United States Code this Court immediately notify the Chief Judge of the United States Court of Appeals for the District of Columbia Circuit who shall designate two other judges, at least one of whom shall be a circuit judge, to serve as members of the court to hear and determine this action.

(b) That in accordance with Rule 4 of the Federal Rules of Civil Procedure this Court order process to issue against the defendant, United States of America, and thereafter upon not less than five days' notice to the Attorney General of the United States, to the United States Attorney for the District of Columbia and to the Interstate Commerce Commission, a hearing to be held; and an interlocutory injunction be issued staying and suspending the said order of the defendant, Interstate Commerce Commission, dated November 22, 1954 (Appendix A), and the order of July 6, 1955, denying reconsideration (Appendix B).

[fol. 63] (c) That in accordance with Section 2284(3) of Title 28 of the United States Code this Court issue a temporary restraining order, to remain in force until the hearing and determination of the full Court, to prevent the Interstate Commerce Commission from issuing the certificate of public convenience and necessity to The Rock Island Motor Transit Company as contemplated by the assailed report and order of November 22, 1954 (Appendix A).

(d) That upon final hearing of this action judgment be entered enjoining, annulling and setting aside the assailed report and order of November 22, 1954, of the Interstate Commerce Commission (Appendix A), and the order of July 6, 1955 (Appendix B).

(e) That the Court grant such further relief as it deems just and proper.

Respectfully submitted,

[fol. 64] APPENDIX A TO COMPLAINT

No. MC-29130 (SUB-NO. 70)

THE ROCK ISLAND MOTOR TRANSIT COMPANY
COMMON CARRIER APPLICATION

Submitted March 8, 1954. Decided November 22, 1954

Public convenience and necessity found to require operation by applicant as a common carrier by motor vehicle in interstate or foreign commerce, of general commodi-

ties, with exceptions, between certain points in Illinois, Iowa, and Nebraska, over regular routes, serving designated intermediate and off-route points, subject to conditions. Issuance of a certificate approved, and application in all other respects denied.

A. B. Howland and *J. H. Martin* for applicant.

D. C. Nolan, Henry A. Archambo, Ernest Porter, and *R. H. Heinecamp* for interveners in support of the application.

Albert B. Rosenbaum, Rex H. Fowler, Homer E. Bradshaw, Eugene L. Cohn, Bernard G. Colby, Edgar Watkins, William B. Adams, James F. Pinkney, Joseph E. Ludden, Stephen Robinson, Walter V. Huston, and *William A. Landau* for protestant and interveners in opposition.

Report of the Commission

By the Commission:

Exceptions to the order recommended by the examiner were filed by a protestant and nine motor-carrier interveners in opposition. Applicant and interveners in support of the application replied to the exceptions. The case was orally argued before us. Our conclusions differ slightly from those recommended.

By application filed October 26, 1951, as amended, The Rock Island Motor Transit Company, hereinafter called applicant or Motor Transit, of Chicago, Ill., seeks a certificate authorizing operation, in interstate or foreign commerce, as a common carrier by motor vehicle, of general commodities, except nitroglycerin, commodities of unusual value, household goods as defined in *Practices of Motor Common Carriers of Household Goods,* 17 M. C. C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, (1) between Chicago, Ill., and Omaha, Nebr., from Chicago over U. S. Highway 34 to junction of Illinois Highway 92, thence over Illinois Highway 92 to junction of U. S. Highway 6, and thence over U. S. Highway 6 to Omaha, (2) between Iowa City, Iowa, and Cedar Rapids, Iowa, from Iowa City over U. S. Highway 218 to Cedar Rapids, (3) between Harlan, Iowa, and Omaha, Nebr., from Harlan over Iowa Highway 64 to Council Bluffs,

[fol. 65] Iowa, and thence over U. S. Highway 6 to Omaha, (4) between Avoca, Iowa, and Atlantic, Iowa, (*a*) from Avoca over U. S. Highway 59 to junction U. S. Highway 6, and thence over U. S. Highway 6 to Atlantic, and (*b*) from Avoca over Iowa Highway 83 to Atlantic, and (5) return in each instance over the same routes, serving the intermediate points of East Moline, Silvis, Moline, and Rock Island, Ill., and Bettendorf, Davenport, Durant, Wilton Junction, Atalissa, West Liberty, Iowa City, Coralville, Tiffin, Homestead, Marengo, Ladora, Victor, Brooklyn, Grinnell, Newton, Colfax, Altoona, Des Moines, Dexter, Stuart, Menlo, Casey, Adair, Anita, Wiota, Atlantic, Oakland, Council Bluffs, Weston, Underwood, Minden, Neola, Corley, Walnut, Marne, and Hancock, Iowa, and the off-route points of Walcott, Muscatine, Stockton, Moscow, Oxford, South Amana, Malcom, Kellogg, Mitchellville, and Shelby, Iowa. The Regular Common Carrier Conference, of the American Trucking Associations, Inc., and 11 motor carriers oppose the granting of the application.

Applicant is a wholly owned subsidiary of the Chicago, Rock Island and Pacific Railroad Company, hereinafter called Rock Island. It conducts motor common carrier regular-route operations in Illinois, Indiana, Iowa, Nebraska, Minnesota, Missouri, Kansas, Texas, Tennessee, Arkansas, and Oklahoma, subject in certain instances to various restrictions affecting different route segments. This proceeding primarily relates to applicant's authorized routes within the State of Iowa (except those between Cedar Rapids and Decorah, between Muscatine and Kalona, and between Wellman and West Chester) and those extending beyond to Chicago, Ill., Omaha, Nebr., Minneapolis-St. Paul, Minn., and Kansas City, Mo.

The history of the transactions and circumstances leading to the instant proceeding and the evidence adduced herein are set forth in the examiner's report in much detail. On exceptions, protestant and interveners opposing the application challenge the examiner's findings of fact and conclusions drawn therefrom; however, in no instance has specific reference been made to the page or pages of the transcript upon which they rely to refute the examiner's findings. Although we may not agree in every instance

with the emphasis which the examiner has given certain of the evidence submitted in this proceeding, our review of the record indicates that basically his findings of fact are sound, and no useful purpose would be served by repeating them once again. Under these circumstances we adopt substantially the statement of issues and the evidence as reported by the examiner with such modifications and added discussion thereof as appear necessary and proper.

Prior to August 30, 1951, applicant operated over U. S. Highway 6 under a certificate, subject to the condition or reserved right of the Commission later to impose such re- [fol. 66] strictions which might be found necessary to insure that the service should be limited to that which is auxiliary to, or supplemental of, train service of Rock Island and shall not unduly restrain competition, and as to the remainder of the authority sought under an approved purchase without any provision for the issuance of a certificate containing such condition or reserved right. On September 11, 1951, it was issued a certificate specifying operations over the described routes, containing the following restrictions:

1. The service to be performed by The Rock Island Motor Transit Company shall be limited to service which is auxiliary to, or supplemental of, train service of The Chicago, Rock Island and Pacific Railway Company.

2. The Rock Island Motor Transit Company shall not render any service to, or from, or interchange traffic at any point not a station on the rail line of The Chicago, Rock Island and Pacific Railway Company.

3. No shipments shall be transported by The Rock Island Motor Transit Company between any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebr., Des Moines, Iowa, and collectively Davenport and Bettendorf, Iowa, and Rock Island, Moline, and East Moline, Ill.

4. All contractual arrangements between The Rock Island Motor Transit Company and The Chicago, Rock Island and Pacific Railway Company shall be reported to us and shall be subject to revision, if and as we

find it to be necessary in order that such arrangements shall be fair and equitable to the parties.

5. Such further specific conditions as we, in the future, may find it necessary to impose in order to insure that the service shall be auxiliary to, or supplemental of, train service.

Our power to impose these restrictions pursuant to the reserved condition was affirmed by the United States Supreme Court in *United States* v. *Rock Island Motor Transit Co.*, 340 U. S. 419. However, Motor Transit in this proceeding seeks by the testimony of numerous witnesses to establish that its continued operation unencumbered by these restrictions is necessary in the public interest. The route over U. S. Highway 6 in Iowa is the heart of Motor Transit's operations in that State, and such restrictions not only affect that route but also a number of other routes which are not similarly restricted.

Prior to the issuance of the certificate dated September 11, 1951, containing the above-described 5 conditions, applicant was issued certain temporary authorities and pursuant thereto may transport general commodities, with exceptions, over the routes described in the application, subject to a maximum weight limitation of 5,000 pounds, and further subject to the restriction that no shipment may be transported between Chicago and Omaha, nor between any of the following points, or through, or to, or from, more than one of said points: Omaha, and collectively, Davenport, Bettendorf, Rock Island, Moline, and East Moline. This presently effective temporary authority ex-
[fol. 67] pires concurrently with the final decision in this proceeding, and applicant has been and is now operating pursuant to it, which is less restrictive in the conditions to which it is subject than those contained in applicant's certificate of September 11, 1951.

Applicant's balance sheet as of January 31, 1952, shows assets of $1,858,620, and liabilities of $1,758,620, excluding capital stock, but including $873,527 advances payable to Rock Island, $250,000 long-term bank loan, and $149,764 unappropriated surplus. As of October 26, 1951, applicant owned and operated 152 trucks, 228 tractors, 303 trailers, 4 service trucks, and 4 buses. It is fit and able,

financially and otherwise, properly to conduct the proposed operation.

Prior to discussing the arguments raised on exceptions and oral argument, a brief resume of the evidence for and against the granting of the application will be helpful. The Iowa State Commerce Commission supports the application. It is the view of that body that applicant is the only carrier that, for a number of years prior to September 1951, had been rendering an adequate and efficient service on less-than-truckload freight at the many small points on the considered routes and certain points on its authorized routes adjacent thereto, and the only carrier since that date that has been providing consistent service to the extent authorized under its temporary authorities. Because of the weight and "key point" limitations contained in the temporary authorities, the service rendered thereunder is not regarded as adequate. During the 2 years preceding the hearing in the spring of 1952, the trend of motor carriers operating in Iowa generally has been to refrain from rendering local service on small shipments. This State commission grants intrastate authority to only one motor carrier to serve points on a given route.

Chambers of commerce and other commercial organizations at Davenport, Omaha, Chicago, Des Moines, St. Joseph, Mo., Mason City, Muscatine, Ottumwa, Iowa City, Burlington, Cedar Rapids, and Atlantic, Iowa, and Minneapolis, Minn., and East Moline, Moline, and Rock Island, Ill., representing in excess of 2,300 members, ship various commodities in lots of less than 15,000 pounds and sometimes in truckloads to the destinations here involved. It is the view of their membership that rail service is too slow and that the unrestricted service proposed by applicant is essential to the proper conduct of their members' businesses as there is no other motor carrier maintaining the complete peddle service rendered by applicant prior to the imposition of the restrictions. Pool-car distribution is made from some of the described points.

Eight motor carriers have been and are interlining traffic with applicant, principally at Chicago and the Tri-Cities. Generally these carriers do not ordinarily experience any difficulty in interlining shipments destined to the larger

[fol. 68] points of population on U. S. Highway 6, such as Des Moines and Newton, but they are of the opinion that applicant must be in a position to serve these points and to handle overhead traffic in order to provide the required service; particularly the expensive peddle operations, at the smaller points to avoid sustaining a loss on the entire operation. Several of these carriers are members of the American Trucking Associations, Inc., which is opposing the application.

Thirty-eight shippers and receivers of a large variety of commodities located at Kansas City, Mo., East Chicago and Chicago, Ill., Beatrice and Omaha, Nebr., Minneapolis, Minn., and Clinton, Muscatine, Kalona, Wellman, Columbus Junction, Washington, Pella, Prairie City, Oskaloosa, Fairfield, Brayton, Exira, Hamlin, Audubon, Lewis, Griswold, Carson, and Treynor, Iowa, points served by Motor Transit but not on routes directly involved in this proceeding support the application for a variety of reasons. Some grounds given are: (1) restoration of applicant's unrestricted authority is considered essential to eliminate inconvenience and difficulties experienced since August 30, 1951, in the conduct of their businesses, (2) applicant is providing the only regular service available and the loss thereof would be injurious, (3) the loss of this service will result in delays and will place shippers at a competitive disadvantage, (4) curtailment or abandonment of Motor Transit service would mean a tremendous loss of business, (5) other carriers' services are not regular or dependable, and (6) many years of dependence upon applicant's service, and the effect the loss of such service would have on their business activities.

There are 45 points of service on the routes of White Line Freight Company, Incorporated, and White Line Trucking Company, applicant's predecessors, hereinafter collectively called the White Line route and 11 such points on the routes of J. H. Frederickson and D. H. Frederickson, doing business as J. H. Frederickson & Son, also applicant's predecessor, hereinafter called the Frederickson Line route, in addition to certain points that are on both routes.

One hundred and one public witnesses, both consignors and consignees, hereinafter collectively called shippers,

from points on the White Line route and 10 public witnesses of the same category from points on the Frederickson Line route testified in support of the application. These shippers were from every point on the White Line route, except Silvis, Bettendorf, and Moscow, and from every point on the Frederickson Line route, except Weston, Avoca, and Corley. They ship or receive a variety of commodities in less-than-truckload quantities, and some of them receive shipments in truckload lots. Their testimony relates principally to the former, which prior to August 30, 1951, was handled by applicant in peddle operations in a [fol. 69] very satisfactory manner, and since that date in the same manner to the extent that the weight limitations in the temporary authorities issued to applicant permit. Applicant's service on truckloads also has been satisfactory, but admittedly competing motor carriers generally provide prompt service on this type of traffic. In some instances, they have refused to accept truckload shipments of low-rated commodities. In one instance, applicant was the only carrier readily available with proper equipment to transport the commodity. In general the shippers' evidence is to the effect (1) that they had, prior to August 30, 1951, very efficient and dependable peddle service by applicant, which they need in the operation of their various businesses and which to a large extent have been built upon applicant's service, (2) that peddle shipments are not accepted by many motor carriers serving the larger points, (3) that owing to competition the service of applicant is vitally essential as there are no other transportation facilities available that can replace this service, (4) that experience has demonstrated that such service is superior to that provided by other motor carriers, (5) that curtailment of applicant's service would force some shippers to purchase and operate their own equipment, (6) that a few shippers would have to pick up shipments at points from 3 to 10 miles from their places of business, (7) that the existing weight limitation of 5,000 pounds per shipment is burdensome, (8) that imposition of the supplemental and auxiliary to rail service restriction would result in deterioration of the intrastate services rendered by applicant, (9) that certain opposing carriers' services have been unsatisfactory due to attempted night deliveries, delays,

erroneous rate information, and slow payment of claims, and (10) that 11 points on the White Line route would have no motor peddle service if this application is not granted and others would have no scheduled peddle service. Generally these supporters of the application desire a return to the service rendered by Motor Transit prior to the time that the five conditions, designed to insure that its service should be auxiliary or supplemental to the train service of the parent railway, were imposed.

Ten motor carriers oppose the application. Two of them possess authority to serve all points on the White Line route, and one of these also holds authority to serve all points on the Frederickson Line route. Neither has been furnishing any substantial amount of peddle service on less-than-truckload shipments on these routes. Others of these 10 carriers render some peddle service to and from a few points principally to the immediate east of Des Moines, but the record is unconvincing that this service is adequate. Those having interstate authority on U. S. Highway 6 assert that they are anxious to provide peddle service as the traffic warrants. All believe that a grant of [fol. 70] authority in this proceeding would be detrimental to their operations principally by depriving them of traffic that they might transport if applicant's operations are subjected to the five conditions previously discussed. These opposing carriers concede that during the approximate 14-year period in which time applicant was operating over the involved routes without restricting its service, the volume of traffic handled by each of these carriers has increased substantially and generally to a greater extent than did the volume transported by applicant.

The examiner recommended that the application be granted. On exceptions the protestant and interveners in opposition allege that the examiner erred (1) in construing the decision in *United States* v. *Rock Island Motor Transit Co., supra,* (2) in stating the purpose of the application, (3) in his interpretation of our policy respecting the imposition of restrictions on operating authorities issued to motor-carrier subsidiaries of railroads, and in finding (4) that the White Line route rights had been operated for several years without complaint that such opera-

tions unduly restrained competition, (5) that applicant is the only carrier that for many years has maintained daily scheduled peddle operations over the entire White Line route and Frederickson Line route, (6) that other carriers provide such service only on small segments of these routes, (7) that opposing carriers delivered less-than-truckload freight to applicant for movement to destinations they are authorized to serve, (8) that the supporting witnesses from points in Iowa have built their businesses on applicant's service, particularly with respect to less-than-truckload shipments, (9) that such witnesses deem applicant's service very satisfactory and are not convinced that other motor carriers can or will render the same type of service, (10) that Iowa-Nebraska Transportation Co., Bos Truck Lines, and Des Moines Transportation Company, hereinafter called Iowa-Nebraska, Bos, and Des Moines Transportation, respectively, are the only motor carriers that hold appropriate authority to serve all points or a substantial number of points on the routes directly involved, (11) that there is no serious contention that Bos and Des Moines Transportation are in a position to supplant applicant's operation, (12) that Iowa-Nebraska is the carrier that the opposition advances as being in a position to take over the interstate traffic moving to and from points on the White Line and Frederickson Line routes which applicant would have to relinquish, (13) that Iowa-Nebraska inaugurated certain peddle operations for the purpose of placing the opposing carriers in a position at the hearing to show that they are endeavoring to provide service, (14) that Iowa-Nebraska does not contemplate inaugurating daily scheduled peddle operations to take the place of each such operation conducted by applicant, (15) [fol. 71] that opposing motor carriers did not present one public witness to testify as to adequacy of their service, (16) that applicant has in general, throughout the years, worked for the development and betterment of the motor-carrier industry, (17) that the reluctance of shippers to ship under rail billing is due to the fact that the shipments require longer time in transit, (18) that the operations of applicant have not unduly restrained competition, (19) that the nonparticipation of the railroad in motor-carrier

tariffs is due to the policy of the motor carriers refusing to establish joint rates, (20) that the evidence abundantly establishes that public necessity and convenience requires the proposed less-than-truckload peddle operations, (21) that not one of the opposing carriers having the requisite authority has established or offered to establish scheduled peddle operations to replace the type of service rendered by applicant, (22) that with three kinds of traffic available to applicant it could provide better service than those carriers who claim they can take over applicant's interstate motor-billed freight, (23) that the opposing motor carriers cannot obtain intrastate rights, (24) that there is evidence that opposing motor carriers have refused to accept truckloads of low-rated commodities, (25) that the truckload traffic which is "the cream of the traffic" has been handled by applicant for many years without seriously affecting the expansion of its competitors, (26) that opposing motor carriers would be under a public duty to provide the peddle service on interstate motor-billed freight, which traffic alone will not justify the type of service heretofore rendered by applicant, (27) that applicant would still be tendered intrastate-and-rail-billed traffic, which would not warrant continuance of the operations conducted by it prior to August 30, 1951, (28) that the net result would be injury to the public, (29) that a substantial number of employees of applicant would be dismissed, (30) that the conclusions reached in his report are not an abrogation of the policy established in *Kansas City S. Transport Co., Inc., Com. Car. Application*, 10 M. C. C. 221, 240, decided November 12, 1938, and in concluding (31) that the application should be granted in its entirety.

As noted, protestants and interveners challenge practically every material statement of fact and conclusion reached therefrom, in the report of the examiner. Briefly their position is that the evidence does not establish a public need for the proposed service of applicant other than a supplementary or auxiliary service to the rail service of the Rock Island, and that several of them are able, ready, and willing to provide all the types of service that Motor Transit would have to discontinue under the restrictions we have imposed on applicant's permanent au-

thority. In addition they allege that we have no jurisdic-[fol. 72] tion to grant applicant a certificate without restrictions. This will be discussed later herein.

In general protestant and interveners argue that the grant recommended by the examiner would give applicant an advantage over them by reason of its affiliation with the Rock Island through (1) financial assistance, if necessary, (2) the transportation of rail-billed freight under a contractual agreement with Rock Island, (3) the movement of traffic in merchandise cars and by truck between the same points, (4) the possibility that applicant might solicit traffic to be moved between identical points at either the rail or motor-carrier rates, (5) the ignoring by Rock Island and applicant of tariff provisions regarding packing and loading, (6) the use by applicant of dock and terminal facilities leased from Rock Island, and (7) the removal of the key-point restriction, which would permit eastbound rail-billed traffic to move by truck.

Rock Island has rendered applicant financial assistance, traffic has been moving and would continue to move as indicated in (3) and (7) above, but there is no substantial evidence that these things have during the past several years materially affected the operations of the opposing motor carriers. From the past history of Motor Transit's operations there is little reason to believe that future operations would be conducted in any radically different manner from those in the past. The contention in (4) above is a possibility but applicant has not done so in the past. No explanation of (5) above is advanced, but carriers may not legally disregard tariff provisions. Applicant has and would enter into contractual agreements as indicated in (2) and (6) above with Rock Island. The record is vague regarding the terms of such agreements and Rock Island through these agreements could secure transportation of its freight at less than reasonable charges for the service rendered and lease to applicant dock and terminal facilities at rents in excess of their actual value. Therefore, we are of the opinion that any grant of authority herein should be subject to a condition that all contractual agreements between applicant and Rock Island should be reported to us and should be subject to revision if and as we find it

to be necessary in order that such agreements shall be fair to the parties and to the public.

The contentions advanced by protestant and interveners on oral argument with respect to the facts are for all practical purposes the same as those set forth in their exceptions. In both their exceptions and on oral argument they insist that we are without statutory authority to grant applicant the type of certificate here sought. They arrive at this conclusion from our policy since the enactment of the Motor Carrier Act, 1935, of generally imposing restric- [fol. 73] tions on certificates granted to motor-carrier subsidiaries of railroads, which restrictions usually have provided, among other things, that the service of the motor carrier shall be supplemental of, or auxiliary to, the service of the railroad. Such restrictions were first imposed in *Pennsylvania Truck Lines, Inc.—Control—Barker M. Frt.*, 1 M. C. C. 101 and 5 M. C. C. 9 and 49, and *Kansas City S. Transport Co., Inc., Com. Car. Application*, 10 M. C. C. 221, and 28 M. C. C. 5. Opposing carriers concede that section 207 of the Interstate Commerce Act, hereinafter called the act, the section under which this application was filed, does not contain any provisions requiring imposition of restrictions on certificates issued to motor-carrier subsidiaries of railroads, but nevertheless argue that the national transportation policy, congressional intent, and the provisions of section 5 (2) (b) of the act governing "Combinations and consolidations of carriers" (formerly section 213 of the Motor Carrier Act, 1935), require that the various forms of transportation be kept distinct so that each can operate in its own sphere independently of the other. It is claimed that these considerations mean that we do not have statutory authority to grant applicant an unrestricted certificate. We do not subscribe to this view. Our statutory authority to impose terms and conditions on a grant of authority under section 207 is derived from section 208 of the act. We have always construed these two sections in the light of the national transportation policy to require, where the circumstances warranted, the imposition of restrictions on certificates issued to motor-carrier subsidiaries of railroads. Where the circumstances did not require such action, we have issued cer-

tificates subject to a reservation to impose in the future any limitations, restrictions, or modifications that may appear necessary, and in some instances certificates have been issued without restrictions or even a reservation as just described. These two types of certificates, if protestant's and interveners' theory is sound, would be null and void, because, according to them, we possess no statutory authority to issue certificates to carriers such as applicant unless they are limited to services that are supplemental to, or auxiliary of, the service of a railroad. All certificates of this character have been issued strictly in accordance with the applicable statute.

Protestant and interveners also contend that the decision of the United States Supreme Court in *United States* v. *Rock Island Motor Transit Co., supra,* supports their position that we are without jurisdiction to grant the kind of certificate sought. We find nothing in that decision that warrants such a conclusion. Therein the Court affirmed our power to impose the restrictions hereinbefore quoted. It did not directly or by reasonable implication say that we have no statutory power to issue certificates of the character here considered without restrictions. In our opinion the decision does not require any change in the [fol. 74] interpretation heretofore placed on the statute and the national transportation policy. In other words we may issue certificates to motor-carrier affiliates of railroads with or without restrictions as the circumstances may require.

A review of the development of our policy of granting motor-carrier operating authorities to rail affiliates and the applicability of these precedents to this application is set forth in the examiner's report, but is worthy of repetition.

The Motor Carrier Act, 1935, was approved August 12, 1935, and therein Congress declared its policy to be as follows:

> to regulate transportation by motor carriers in such manner as to recognize and preserve the inherent advantages of, and foster sound economic conditions in, such transportation and among such carriers in the public interest; promote adequate, economical, and

> efficient service by motor carriers, * * * improve the relations between, and coordinate transportation by and regulation of, motor carriers and other carriers; develop and preserve a highway transportation system properly adapted to the needs of the commerce of the United States and of the national defense; * * *.

The declaration of policy of Congress in the Transportation Act of 1940, approved September 18, 1940, is worded somewhat differently, but its import is substantially the same as that contained in the foregoing quotation.

Section 213 (a) (1) of the Motor Carrier Act permitted a railroad to acquire a motor carrier, provided we find that the acquisition will promote the public interest by enabling the railroad to "use service by motor vehicle to public advantage in its operations," without undue restraint of competition. This section was repealed by the Transportation Act of 1940. The substance thereof was carried into section 5 of the act.

Early in the regulation of the motor-carrier industry, division 5, in *Pennsylvania Truck Lines, Inc.—Control—Barker. M. Frt., supra,* said:

> we are not convinced that the way to maintain for the future healthful competition between rail and truck service is to give the railroads free opportunity to go into the kind of truck service which is strictly competitive with, rather than auxiliary to, their rail operations. The language of section 213, * * *, is evidence that Congress was not convinced that this should be done.

These views ripened into a policy in *Kansas City S. Transport Co., Inc., Com. Car. Application, supra,* which was prior to the acquisition by Motor Transit of the White Line and Frederickson Line rights. Therein division 5 imposed 5 conditions or restrictions upon the operating authority granted to a motor-carrier subsidiary of 2 affiliated railways, which in most respects were substantially the same as the conditions and restrictions ultimately imposed and contained in the certificate issued to Motor Transit on September 11, 1951. After that decision, practically all [fol. 75] grants of operating authority to motor-carrier

subsidiaries of railroads were made subject to like conditions and restrictions or modifications thereof required by the particular circumstances, except in a few instances, such as that here under consideration insofar as the White Line rights are concerned, the certificates contained no provisions limiting the service to that which is auxiliary to, or supplemental of, train service. The approval of the purchase of the White Line rights and the original certificate covering these rights, as before indicated, were specifically made subject to the condition or reserved right later to impose such restrictions which we might find necessary to insure that the service would be limited to that which is auxiliary to, or supplemental of, train service of the Rock Island.

The main purpose for the policy of imposing the five above-quoted restrictions, or modifications thereof, was to prevent the railroads from acquiring motor operations through affiliates and using them in such a manner as to unduly restrain competition of independently operated motor carriers. This policy was and is sound and should be relaxed only where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience.

Motor Transit operated the White Line rights in Iowa under claimed "grandfather" rights from April 1938, to December 31, 1941, and under a certificate from the latter date to February 5, 1945, that contained only the reserved right to impose in the future such conditions that may be necessary to insure that the service shall be auxiliary to, or supplemental of, train service. From February 5, 1945, to the present, Motor Transit has continued the operation by reason of pending proceedings before us or litigation before the courts, or under temporary authority originally issued August 30, 1951, later modified, and subsequently extended to the date of the disposition of this proceeding. Although our policy of imposing the quoted restrictions was established about 3 years prior to the issuance of a certificate to Motor Transit, the certificate of that carrier

did not restrict the operation of the White Line rights in any manner. Thus, Motor Transit operated under such rights for a period of about 7 years without any complaint that its operation was unduly restraining competition or indication that we contemplated exercising the said reserved rights. After we, on our own motion, reopened No. MC-29130 and the 2 related cases for reconsideration, and imposed the above-described 5 restrictions and conditions, the proceedings were reopened for further hearing upon petition of Motor Transit for reconsideration, oral argument, [fol. 76] and withdrawal of the report on reconsideration. The attorneys representing Motor Transit at that time did not recognize our jurisdiction to change or modify the orders authorizing the acquisition of Motor Transit's certificates, and they entered a special appearance on applicant's behalf solely for the purpose of filing the petition. At the subsequent further hearing a like appearance was entered for the sole purpose of contesting our jurisdiction. Consequently there was no new or additional evidence before us and, as a result thereof, the only issue was the question whether the reasoning of the prior report on reconsideration and the conclusions reached therein were sound in the face of the criticisms thereof contained in Motor Transit's petition. In the circumstances we had no alternative but to impose the restrictions and conditions established in accordance with the policy enunciated in *Kansas City S. Transport Co., Inc., Com. Car. Application, supra.* This action was considered by the United States District Court for the Northern District of Illinois in a suit initiated by Motor Transit. That court set aside and permanently enjoined enforcement of our order. This decision sustained Motor Transit's position. On appeal, however, the United States Supreme Court reversed the decision of the district court and thereby sustained our views. Thereafter, Motor Transit requested limited temporary authority and filed this application under section 207 of the act for permanent authority. Thus, after the passage of approximately 4 years, Motor Transit concluded to do substantially what it had an opportunity to do in October 1947, namely to introduce additional evidence in the reopened proceedings.

Applicant is the only carrier that for a considerable number of years has maintained daily (generally at least 5 days a week) scheduled peddle operations over the entire White Line and Frederickson Line routes regardless of the volume of traffic available for movement in such operations. Opposing motor carriers with appropriate authority have not provided such a service, except with respect to selected small segments of the routes, principally immediately east of Des Moines. These carriers prior to August 30, 1951, delivered less-than-truckload freight to Motor Transit for movement to destinations they are authorized to serve. Some of this freight consisted of low-rated articles which such carriers deemed unprofitable to handle. These carriers in many instances refused to accept less-than-truckload shipments from their motor-carrier connections for movement to a destination embraced in their operating authority. As a result thereof, several of these connecting carriers have had to rely upon Motor Transit to accept and make delivery of such shipments, even in cases where the delivering carrier was designated by the shipper. These experiences have convinced some of the connecting carriers that the unrestricted services of [fol. 77] Motor Transit should continue to be available to them so that they may have a carrier that is always willing and able to accept interchange shipments destined to points on the White Line and Frederickson Line routes. One motor carrier that possesses rights on U. S. Highway 6 between Davenport and Des Moines, elects to give all of its less-than-truckload freight to Motor Transit for delivery at such points, because it is not profitable for it to provide this service.

Applicant adduced testimony of a great number of public witnesses from practically every point served by Motor Transit on the routes directly involved here and also some located at certain points on its other routes that would be affected by the restrictions and conditions imposed September 11, 1951. The witnesses located at points in Iowa have used the services of Motor Transit over a period of many years and have, to a considerable extent, built their businesses on that service, particularly with respect to less-than-truckload shipments. With that service available,

they do not have to maintain large inventories because they can order from the manufacturer or wholesaler at the supply points, such as Chicago, Minneapolis-St. Paul, Omaha, Kansas City, or Moline, early one day and be reasonably certain of delivery on the next day in some instances, and in others not later than the second day. Some of them stressed their need for this service in obtaining expedited movement of repair parts, including those for farm machinery. In general, all of these witnesses, both those directly and indirectly affected, are apprehensive that, if we ultimately require Motor Transit to confine its operations to the transportation of rail-billed freight, their businesses will be adversely affected, as indeed some of them already have been, by the weight limitations imposed in the temporary authorities. Some of the witnesses have not been able to obtain reasonably prompt pickup and delivery of shipments by carriers other than Motor Transit. A few of them could get long without the service of Motor Transit, but they would use it in preference to the service of any other authorized carrier. The great majority of these witnesses support this application because they have received satisfactory service from Motor Transit for a long time, and they are not convinced that any other motor carrier will or can render the type of complete service respecting transportation, claim adjustments, rate and routing information, and tracing of shipments to which they are accustomed. Motor Transit is able to provide such complete service because it maintains freight agents at many points on its routes and the other motor carriers have them located at some of the larger points only.

Of the opposing motor carriers, Iowa-Nebraska, Bos, and Des Moines Transportation, are the only ones with interstate authority to serve all points or a substantial number of designated points on the routes directly involved in this [fol. 78] proceeding. Bos has the authority to provide peddle service at all points on U. S. Highway 6 in Iowa. It has been providing such service approximately three times a week from Des Moines to Grinnell and return, and from Des Moines to Anita and return. A few other points on the White Line route are served by over-the-road equip-

ment, through cartage companies, or on a call-and-demand basis. These services are not comparable to the peddle services rendered by Motor Transit. Des Moines Transportation possesses interstate authority to serve only 10 intermediate points on U. S. Highway 6 between the Mississippi River and Omaha. Daily peddle service is provided at 6 of the 10 points. These 6 points are located east of Des Moines. This carrier's authority is insufficient to allow it to replace the interstate service heretofore rendered or presently being rendered by Motor Transit. Recognizing this it says that if necessary it will seek additional authority. Certain other opposing carriers hold authority to serve a few of the points on the routes directly or indirectly involved. There is no serious contention that either Bos or Des Moines Transportation is in a position to supplant Motor Transit operations as rendered prior to August 30, 1951.

Iowa-Nebraska is the carrier that the opposition advances as being in a position to take over the interstate traffic moving to and from points on the White Line and Frederickson Lines routes, which Motor Transit would have to relinquish under the conditions and restrictions imposed September 11, 1951. This carrier possesses the required interstate authority to render such service, but over the years it has not been providing any substantial peddle service on these routes. This, no doubt, was attributable to the small amount of this kind of traffic available to this carrier and to some extent probably by the fact that a large part of its business is the transportation of dairy products eastbound to Chicago, Philadelphia, New York City, and Boston. In February 1952, it inaugurated certain peddle operations, and together with the other opposing line haul motor carriers and certain other motor carriers discontinued, after August 30, 1951, the transfer of less-than-truckload traffic to Motor Transit for delivery to points on its lines also served by one or more of the opposing carriers. Iowa-Nebraska does not contemplate inaugurating daily scheduled peddle operations to take the place of each such operation conducted by Motor Transit, but says that it will provide this type of service as demanded by the volume of traffic. This clearly is not the kind of

service that the supporting witnesses have had available in the past, and their testimony demonstrates that they will not be satisfied with less in the future.

Applicant's operations have been conducted in the same manner as other motor carriers operating in the same area. [fol. 78-A] It has participated in the conferences of such carriers and is a party to their agency tariffs, and in general throughout the years has worked for the development and betterment of the industry as a whole without regard to its being a subsidiary of a railroad. The less-than-carload traffic moving by railroad over a recent 5-year period has consistently declined. During a comparable period the volume of traffic handled by a group of nine motor carriers serving the Midwest area increased substantially. Applicant's tonnage also increased, but not to the extent of its competitors represented by this group of carriers. Thus the operations of applicant have not unduly restrained competition, and there is no evidence that its proposed operations would produce such a result.

The opposing motor carriers take the position that Motor Transit's operations should be restricted, in accordance with our general policy in this type of proceeding, to the transportation of rail-billed freight only. They indirectly imply that Motor Transit could handle freight on this type of billing just as expeditiously as that moving on motor-carrier billing. Theoretically this should be true, but in actual practice the motor-billed freight is handled with greater dispatch; and this is the reason that many of the public witnesses supporting applicant have refused to deliver their shipments to Rock Island for billing even though the line-haul transportation thereof is performed entirely by Motor Transit. The reluctance of shippers to use this kind of service is clearly due to the fact that it requires longer time in transit. For example, a shipment moving on rail billing from the Twin Cities to Marengo is picked up by the cartage company employed for that purpose by Rock Island and delivered to the Minneapolis or St. Paul rail terminal, worked, billed, and, in 1 or 2 days, turned over to Motor Transit for movement to destination. This shipment would require from 2 to 4 days more in transit than would be necessary if it moved by Motor Transit on

motor billing. The situation in the reverse direction would be substantially similar. Motor-billed shipments from Chicago are picked up by Motor Transit and moved out in road-haul equipment the same night, as contrasted with rail-billed shipments which are picked up by a cartage company for Rock Island and moved to Burr Oak, 15 miles, worked, billed, and returned to Chicago for transfer to Motor Transit for transportation to destination, or if it is necessary to move these shipments west from Burr Oak in boxcars owing to the key-point restriction they would not reach Davenport for 2 or 3 days and sometimes longer. Similar delays occur on shipments in boxcars to Des Moines. The delays in handling rail-billed shipments from Chicago are greater than from the Twin Cities. Rail-billed freight is delayed at points in Iowa on account of the [fol. 78-B] method of handling these shipments before they are transferred to Motor Transit for movement. Perhaps these delays are unavoidable, but it seems that some course of action might be undertaken by Rock Island to eliminate or reduce the time of rail-billed shipments in transit.

The evidence abundantly establishes that public convenience and necessity require the proposed less-than-truckload peddle operations. In addition to the testimony of the many public witnesses regarding their need for such service, there must be taken into consideration that not one of the opposing motor carriers having the requisite authority has established or offered to establish scheduled peddle operations to replace each such operation conducted by Motor Transit prior to August 30, 1951, and, by refraining from doing so, they no doubt realize that such peddle operations could not be profitably operated with interstate traffic only. The peddle service provided by Motor Transit has been, and to a limited extent, due to the weight limitation, is, based on interstate, intrastate, and rail-billed traffic. With these three kinds of traffic available it is patent that Motor Transit could provide better service to the public than the motor carriers who claim that they can take over Motor Transit's interstate motor-billed business. These carriers hold no intrastate rights on the considered White Line and Frederickson Line routes and cannot obtain such rights because it is the policy of the Iowa State Commerce Com-

mission to grant such rights to only one carrier on a given route. Motor Transit possesses such rights on these routes.

There is some evidence of a public need for the proposed truckload services of applicant, but it is not as convincing as that with respect to the peddle operations, and this is understandable because the other motor carriers operating in the area have usually provided satisfactory service on truckload shipments. There is also some evidence that the latter have refused to accept truckloads of low-rated commodities. In any event we feel that there is sufficient basis to warrant a complete grant of authority to applicant. This truckload "cream of the traffic," which to some extent has been handled by Motor Transit for many years without seriously affecting the expansion of its competitors' operations, should not be handed over to its competitors and Motor Transit expected to provide the expensive peddle services.

Acceptance of the opposing motor carriers' position would have the following results. They would be left to provide the peddle services on interstate motor-billed traffic, which alone will not justify the type of services heretofore rendered by Motor Transit, and all such traffic in truckloads. Motor Transit would be left with intrastate and rail-billed traffic, which will not warrant continuance [fol. 79] of the operations conducted by it prior to August 30, 1951. The net result is clearly not in the public interest.

Applicant seeks unrestricted authority and we are satisfied that the grant of authority hereinafter made should be free of restrictions, except the one previously discussed and, in addition, one whereby we shall retain jurisdiction to impose in the future whatever restrictions or conditions, if any, appear necessary in the public interest by reason of material changes in conditions or circumstances surrounding applicant's operations in relation to those of competing motor carriers. Accordingly such a restriction will be imposed.

The application requests, among other things, authority over designated highways between Chicago and Omaha. Applicant presently holds authority between Chicago and Silvis. Consequently, there is no reason for including this segment in the findings herein. The findings will include

only the segment of this route between Silvis and Omaha, which authority may be tacked with the present authority between Chicago and Silvis.

The commodity description used in the findings herein authorize the transportation of dangerous explosives, except nitroglycerin. This description in its entirety is the same as that contained in the certificate issued on September 11, 1951.

The authority herein set forth in our findings supersedes and cancels all authority heretofore granted between the same points, more particularly described on "Sheets 2 and 15" of the certificate issued to applicant on September 11, 1951.

The findings hereinafter made are not to be construed as an abrogation of the policy established in *Kansas City S. Transport Co., Inc., Com. Car. Application, supra.* They represent an exception to that policy justified by the evidence in this proceeding. In other words, such findings do not establish a precedent. Each case of this character must be determined upon the facts and circumstances disclosed by the evidence.

FINDINGS

We find that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle, of general commodities, except those of unusual value, nitroglycerin, household goods as defined in *Practices of Motor Common Carriers of Household Goods, supra,* commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, (1) from Silvis, Ill., to Omaha, Nebr., over Illinois Highway 92 to its junction with U. S. Highway 6, and thence over U. S. Highway 6 to Omaha, and return over same route, serving the intermediate points of East Moline, Moline, [fol. 80] and Rock Island, Ill., and Bettendorf, Davenport, Durant, Wilton Junction, Atalissa, West Liberty, Iowa City, Coralville, Tiffin, Homestead, Marengo, Ladora, Victor, Brooklyn, Grinnell, Newton, Colfax, Altoona, Des Moines, Dexter, Stuart, Menlo, Casey, Adair, Anita, Wiota, Atlantic, Oakland, and Council Bluffs, Iowa, and the off-route points of Walcott, Muscatine, Stockton, Moscow,

Oxford, South Amana, Malcom, Kellogg, Lewis, and Mitchellville, Iowa, (2) from Iowa City, Iowa, to Cedar Rapids, Iowa, over U. S. Highway 218 and return over same route, serving no intermediate points, (3) from Harlan, Iowa, to Omaha, Nebr., over Iowa Highway 64 to Council Bluffs, and thence over U. S. Highway 6 to Omaha, and return over same route, serving the intermediate points of Corley, Minden, Neola, Underwood, and Weston, Iowa, and the off-route point of Shelby, Iowa, and (4) from Avoca, Iowa, to Atlantic, Iowa, (*a*) over U. S. Highway 59 to Oakland, and thence over U. S. Highway 6 to Atlantic, and (*b*) over Iowa Highway 83 to Atlantic, and return over either route, serving the intermediate points of Hancock, Walnut, and Marne, Iowa, subject to the conditions (1) that there may be attached from time to time to the privileges granted herein such reasonable terms, conditions, and limitations as the public convenience and necessity may require, and (2) that all contractual arrangements between The Rock Island Motor Transit Company and the Chicago, Rock Island and Pacific Railroad Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and our rules and regulations thereunder; that a certificate authorizing such operations should be granted; and that the application in all other respects should be denied.

Upon compliance by applicant with the requirements of sections 215 and 217 of the act, and with our rules and regulations thereunder, an appropriate certificate will be issued.

An appropriate order will be entered.

COMMISSIONER FREAS concurs in the result.

ALLDREDGE, *Commissioner*, dissenting:

The majority decision authorizes a railroad subsidiary to enter the motor-carrier field for the purpose of rendering a straight, unrestricted service in the transportation of freight over extensive highway routes, although power is reserved to the Commission to attach to the privileges

granted such reasonable terms, conditions, and limitations as the public convenience and necessity may require in the [fol. 81] future. The decision so far as its immediate effect is concerned, will thus permit the railroad in question to perform a motortruck service which is not merely complementary to, or supplemental of, its railroad operations, but which is, in many instances at least, directly competitive therewith. The authorized service will be competitive also with independent motor-carrier operations.

It is true, according to the record, that applicant may, and probably will, for a time, be in position to render a superior motor-carrier service to that afforded numerous shippers by the regular motor carriers. The deep concern of these shippers for an efficient and reliable transportation service is understandable; but other important considerations must be resolved before an application of this kind may lawfully be granted.

In determining questions of public interest in such proceedings as this the Commission must be guided by the standards prescribed by Congress. Although the majority report apparently rests its ultimate conclusions upon sections 207 and 208 of the Interstate Commerce Act, other provisions of statutory law, including the specially enacted national transportation policy, are involved and should have decisive influence in determining the issues. One of these provisions is section 5 (2) (b) of the act. That subsection states, in effect, that where a carrier by railroad, or any person controlled by such a carrier, or affiliated therewith, is an applicant in any proposed transaction involving certain intercarrier relations (which unquestionably includes the transaction here before the Commission) the Commission shall not enter an order of approval "unless it finds that the transaction proposed will be consistent with the public interest and will enable such carrier to use service by motor vehicle to public advantage *in its operations* and will not unduly restrain competition." [Italics supplied.] The Supreme Court, in the *Rock Island* case cited in the majority report, construed this provision of law along with others and then reviewed the practice of the Commission in restricting certificates issued to railroads or their subsidiaries to conduct motortruck service so as to

keep such service, auxiliary or supplemental to railroad operations.

The Court pointed out, at pages 443 and 444 of its opinion, that such restrictions as the Commission had been imposing "hamper railroad companies in the use of their physical facilities—stations, terminals, warehouses—their personnel and their capital in the development of their transportation enterprises to encompass all or as much of motor transportation as the roads may desire." After thus stating the necessary effect of the Commission's customary restrictions, the Court said, "The announced transportation policy of Congress did not permit such development." This means, of course, that Congress has not established [fol. 82] a policy of free and unlimited employment of motor carriers by railroads; that restrictions are necessary in order to confine each transport agency to a sphere where it may have an opportunity to develop its own inherent advantages to the fullest possible extent. This established policy of Congress was also discussed, explained, and elucidated by the Supreme Court in another important decision preceding the one in the *Rock Island* case, namely *McLean Trucking Co.* v. *United States*, 321 U. S. 67.

The majority seems to pay some homage to this policy by declaring it to be sound and subject to relaxation "only where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience." Congress, however, has not provided for any exclusions from its declared policy. That is a prerogative of Congress itself. The Supreme Court did point out in the *Rock Island* case that restrictions might well vary from time to time; but there is no indication that Congress intended to confer power upon the Commission to issue *carte blanche* authority to a railroad to perform unrestricted motor-carrier service, subject, as here stated, only to such terms, conditions, and limitations as the public convenience and necessity may require in the future. The phrase "public convenience and necessity," in the context in which it is used in the act, does not compre-

hend the full public interest in transportation envisaged by congressional policy.

There may be a good reason for this policy which goes beyond the protection of different modes of transportation. It may be needed to protect the railroads against themselves. Without restraining influences in the law, it would not be too difficult, for instance, for one railroad, through the purchase of an independent motor-carrier operation, to invade the territory of another railroad without complying with the public-convenience-and-necessity provisions of part I of the act. *Cf. Texas & P. Ry. Co.* v. *Gulf, C. & S. F. Ry. Co.*, 270 U. S. 266.

I cannot agree that a proper balance between the contending interests in the light of congressional policy has been reached by the majority in this proceeding. Some of the restrictions presently contained in applicant's certificates and temporary authorities could well be modified, such as the elimination of certain, but not all, key points and the removal of the quantity restriction on motortruck shipments; but this record does not call for such drastic changes in operating authorities as the majority has approved. Unquestionably, the shippers in this area are entitled to adequate and efficient transportation service. To the extent [fol. 83] that such a relaxation of the present restrictions in applicant's operating authorities as I have suggested does not accomplish this objective, then the independent motor carriers should be required to see that the necessary service is furnished. The existing law seems to be adequate for that purpose.

ARPAIA, *Commissioner*, dissenting in part:

In considering the legal and policy questions involved in this application by a railroad affiliate for unrestricted motor-carrier authority, the majority seems to have lost sight of the more elementary question concerning the adequacy of proof of public convenience and necessity. Apparently the majority has been overwhelmed by the quantity of the evidence in this proceeding. In previous cases, we have not allowed ourselves to be persuaded by the number of witnesses or by general statements, but rather have been motivated by the quality of the evidence. See, for example *Hancock Trucking, Inc., Ext.—Gulf and West Coast Routes*,

62 M. C. C. 513, and *T. S. C. Motor Freight Lines Extension —New York*, 62 M. C. C. 499.

A careful analysis of the record is convincing that applicant has failed to prove that public convenience and necessity require its proposed service, at any of the routes and points except those on U. S. Highway 6 (the White Line route). Indeed, there is considerable doubt in my mind that applicant has met its burden of proof of need for service along that segment which runs from Iowa City to Cedar Rapids. The only justification for a grant of authority to serve that portion is as a necessary adjunct to the remainder of the White Line route.

With respect to the other authority sought by applicant, the proof does not meet the standard which we have applied heretofore, and I see no reason for deviating from our established requirements.

The majority has concluded that a condition reserving our power to impose restrictions at a later date is necessary. Because of the language used on page 108 of the report in describing the need for reserving that power, I have some doubt as to the efficacy of the condition prescribed. It should be clear and unequivocal. I feel that condition (1) in the findings is neutralized by the language in the discussion insofar as it adds any qualifications to those set forth in section 208 of the act. To be more specific, the words in the discussion after "public interest," to wit: "by reason of material changes in conditions or circumstances surrounding applicant's operations in relation to those of competing motor carriers," are not only too general and unnecessary, but, to my mind, could be construed to limit our power to attach such subsequent limitations as may be found necessary in the public interest.

[fol. 84] APPENDIX A TO COMPLAINT

ORDER

At a General Session of the INTERSTATE COMMERCE COMMISSION, held at its office in Washington, D. C., on the 22nd day of November, A. D., 1954.

No. MC-29130 (Sub. No. 70)

THE ROCK ISLAND MOTOR TRANSIT COMPANY COMMON CARRIER APPLICATION

Investigation of the matters and things involved in this proceeding having been made, and the Commission, on the date hereof, having made and filed a report herein containing its findings of fact and conclusions thereon, which report is hereby made a part hereof:

It is ordered, That said application, except to the extent granted in said report, be, and is hereby, denied.

By the Commission.

George W. Laird, Secretary.

[fol. 85] APPENDIX B TO COMPLAINT

ORDER

At a General Session of the INTERSTATE COMMERCE COMMISSION, held at its office in Washington, D. C., on the 6th day of July, A. D. 1955.

No. MC-29130 (Sub. No. 70)

THE ROCK ISLAND MOTOR TRANSIT COMPANY COMMON CARRIER APPLICATION (Des Moines, Iowa)

No. MC-29130 (Sub. No. 2)

ROCK ISLAND MOTOR TRANSIT COMPANY EXTENSION OF OPERATIONS—SILVIS—CHICAGO, ILL.

Upon consideration of the record in the above-entitled proceedings, and of:

(1) Petition of Railway Labor Executives' Association for leave to intervene and for certain other relief, dated February 16, 1955.

(2) Petition of protestant motor carriers, American Trucking Associations, Inc., and the Regular Common Carrier Conference thereof, for reconsideration of the report of the Commission herein, dated February 16, 1955.

(3) Reply (resistance) of applicant and intervenors in (2) above.

(4) Petition of applicant and certain interveners for interpretation of present certificate in No. MC–29130 (Sub. No. 2), or, in the alternative, for modification of the report of the Commission in the title proceeding, dated May 16, 1955.

(5) Reply of protestant motor carriers, American Trucking Associations, Inc., and the Regular Common Carrier Conference thereof, to (4) above, dated May 26, 1955.

(6) Reply of Railway Labor Executives' Association to (4) above, dated May 26, 1955.

and good cause appearing therefor:

It is ordered, That the Railway Labor Executives' Association be, and it is hereby, permitted to intervene in said proceedings with the right to appear and participate in all further proceedings therein:

It is further ordered, That the petition in (2) above be, and it is hereby, denied, for the reason that the evidence adequately justifies the conclusions and findings in the report and order of November 22, 1954;

It is further ordered, That the petition in (4) above be and it is hereby, denied, for the reason that the relief sought is not warranted.

By the Commission.

Harold D. McCoy, Secretary

UNITED STATES OF AMERICA and INTERSTATE COMMERCE COMMISSION, Washington 25, D. C., Defendants

ROCK ISLAND MOTOR TRANSIT CO. Intervener on the Side of Defendant INTERSTATE COMMERCE COMMISSION.

MOTION OF ROCK ISLAND MOTOR TRANSIT COMPANY FOR LEAVE TO INTERVENE—Filed August 26, 1955

Rock Island Motor Transit Company respectfully states and shows the court as follows:

1. That it is a corporation organized under the laws of the State of Illinois; that it is engaged as a regular route common carrier of commodities, generally in the states of Illinois, Iowa, Minnesota, Nebraska, Missouri, Kansas, Arkansas, Oklahoma and Texas, by virtue of certain certificates of public convenience and necessity issued to it by the Interstate Commerce Commission under the terms and provisions of the statutes of the United States commonly known and referred to as the Interstate Commerce Act. Rock Island Motor Transit Company was applicant for a

certificate of public convenience and necessity before the Interstate Commerce Commission in a certain proceeding known and designated by the Commission as MC–29130, Sub. #70; in that proceeding applicant applied for, and was granted by the Interstate Commerce Commission, a certificate of public convenience and necessity authorizing it to operate as a motor carrier of commodities generally between Silvis, Illinois, and Omaha, Nebraska, over regular [fol. 87] routes, serving all intermediate stations as well as certain off-route points. The certificate, authorized to be issued in the proceedings above referred to, has not been issued but is being withheld by the Interstate Commerce Commission pending the determination of this suit.

2. As the successful applicant before the Interstate Commerce Commission for a certificate of public convenience and necessity, Rock Island Motor Transit Company has a substantial interest in this litigation and under the provisions of Title 28, Section 2323, USCA, is entitled to intervene and become a party to this proceeding to support and sustain the order of the Commission under review in this action.

3. Rock Island Motor Transit Company as an intervener in this action desires to file in this proceeding its intervening petition and answer to the bill of complaint in accordance with the copy thereof which is attached hereto marked Exhibit A and by this reference made a part of this petition for leave to intervene.

Wherefore petitioner, Rock Island Motor Transit Company, prays that an order be entered authorizing it to become a party to this action, as an intervener on the side of and in support of the order of the Interstate Commerce Commission, that it be granted leave to file its answer to the bill of complaint and for such other and additional relief as may be just and proper.

Rock Island Motor Transit Company

IN THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

Civil Action No. 3171-55

[Title omitted]

ANSWER TO COMPLAINT OF ROCK ISLAND MOTOR TRANSIT COMPANY, APPLICANT BEFORE THE COMMISSION—Filed October 26, 1955

Comes now Rock Island Motor Transit Company and states and shows the court as follows:

1. That it is a corporation organized under the laws of the State of Illinois, with its principal place of business at 139 West Van Buren Street, Chicago, Illinois, and with its principal operating office in the Plymouth Building, 10th & Walnut Sts., Des Moines, Iowa.

That it has been authorized, by order of this court, to become a party to this action as an intervener on the side of defendant, Interstate Commerce Commission, and as such intervening party it answers the complaint as follows:

ANSWER

Intervener, Rock Island Motor Transit Company, for answer to the complaint filed herein on or about July 29, 1955, states and shows the court as follows:

[fol. 89] 1. Intervener concedes that this cause is within the jurisdiction of this court and makes no other answer to the allegations and conclusions set forth in the Paragraph number "I" of plaintiff's complaint.

Intervener admits that American Trucking Assns., Inc. is a nonprofit corporation organized under the laws of the District of Columbia; that its principal office is maintained at 1424—16th Street N.W., Washington 6, D.C., and that it is an organization of the trucking industry.

2. Intervener denies that the so called Regular Common Carrier Conference of American Trucking Assns., Inc., is entitled to be named as a party plaintiff in this action and

avers that said organization is merely a department or branch of American Trucking Assns., Inc.

Intervener admits that Iowa-Nebraska Transportation Co., Des Moines Transportation Company, Bruce Motor Freight, Inc., Western Transportation Company, McCoy Truck Lines, Inc., Brady Transfer and Storage, Motor Cargo, Inc., Gateway Transportation Company and Bos Truck Lines, Inc. are corporations or partnerships engaged in the transportation of general commodities in interstate commerce and that each of said partnerships or corporations was a party to the proceeding before the Interstate Commerce Commission in Docket #MC29130, Sub. #70.

This intervener denies that the above named motor carriers will be adversely affected in the event that the Commission's order of November 22, 1954 is not suspended, enjoined, annulled or set aside.

3. Intervener admits that Rock Island Motor Transit Company duly filed with defendant, Interstate Commerce Commission, an application for a certificate of public convenience and necessity over certain designated routes extending between Chicago, Illinois and Omaha, Nebraska and with certain routes extending between Atlantic, Iowa and Council Bluffs, Iowa, via Avoca, in said state, on or about the 26th day of October, 1951, and said application was docketed as MC29130, Sub. #70, before said Commission.

[fol. 90] Intervener admits that hearings on said application were held at Des Moines, Iowa, beginning on March 18, 1952 and extending to, and including, April 1, 1952, and that said hearings were resumed on May 20, 1952 and continued until May 22, 1952, and that the Examiner's Proposed Report and Order was served on April 21, 1953; intervener admits that exceptions thereto were filed by plaintiffs and replies were filed by the applicant and other parties to said cause. Oral argument was had before the entire Commission on March 8, 1954; intervener further admits that the Commission rendered its report and order in said proceeding on November 22, 1954 by which applicant was granted, subject to certain conditions thereto attached, a certificate of public convenience and necessity authorizing operation by it over specified routes as a com-

mon carrier of commodities generally between Silvis, Illinois and Omaha, Nebraska, with the right to serve intermediate and off-route points as specified therein.

Intervener admits that plaintiff in this action filed a petition for reconsideration of said report and order by the Commission and that same was denied by the Commission, by order dated July 6, 1955, served on or about July 14, 1955.

Intervener admits that plaintiffs have exhausted their administrative remedies and that a certificate in accordance with the report and order of the Commission will be issued unless said report and order are annulled, set aside and issue of a certificate enjoined by a court of competent jurisdiction.

Intervener denies each, all and every allegation set forth in the paragraph designated "III" of the plaintiffs complaint except those hereinbefore expressly admitted.

4. Intervener denies that defendant, Interstate Commerce Commission, in making and issuing the report and order and in denying the reconsideration thereof, exceeded its jurisdiction and authority, and denies that the Commission was guilty of any errors, either of fact or of law, in [fol. 91] the consideration and determination of the proceeding before them in which intervener was applicant, designated as MC29130, Sub. #70.

Without in any manner waiving the effect of the foregoing denial, intervener answers Paragraphs (a) to (r) inclusive of Paragraph IV of plaintiffs complaint as follows:

(a) Intervener denies the allegations of the paragraph designated (a), and alleges and shows the court that the finding of the Commission, that present and future public convenience and necessity require operation by Rock Island Motor Transit Company in interstate commerce as a common carrier by motor vehicle over the routes described in the report, is supported by substantial evidence, and that said report and order are in accordance with the law, with the National Transportation Policy and Sections 5 (2)(b) and 207 of the Interstate Commerce Act.

(b) Intervener denies that the finding of the Commission that the shippers need unrestricted service of Rock Island

Motor Transit Company such as that enjoyed prior to August 30, 1951 is unsupported and contrary to the record and on the contrary alleges that the finding of the Commission is supported by substantial evidence and is in accordance with the record before the Commission.

(c) Intervener denies each and all of the allegations set forth in the sub-paragraph (c) of Paragraph IV of the complaint and alleges that the finding of the Commission is supported by substantial evidence and is in accord with the great weight of the evidence before the Commission.

(d) Intervener denies each, all and every allegation set forth in the sub-paragraph (d) of Paragraph IV of the complaint and alleges and shows the court that the conclusion of the Commission is supported by the evidence of numerous witnesses who testified to a need for service on shipments in excess of five thousand pounds maximum weight. The finding and conclusion of the Commission is directly in accord with the evidence before it.

[fol. 92] (e) Intervener denies each, all and every allegation set forth in sub-paragraph (e) of Paragraph IV of the complaint and alleges and shows the court that the finding and conclusion of the Commission is directly supported by substantial evidence that numerous witnesses testified to a need for service on interline shipments originating on the lines of other motor carriers and as to which the service of the Rock Island Motor Transit Company is the only service available at the point of destination. The finding and conclusion of the Commission is in accord with the great preponderance of the evidence found in the record.

(f) Intervener denies each, all and every allegation set forth in sub-paragraph (f) of Paragraph IV of the complaint and states and shows the court that the undisputed evidence discloses that eleven (11) towns and communities between Davenport and Des Moines, Iowa are served by no other motor carrier except applicant. These communities are:

Walcott	Coralville
Stockton	Oxford
Durant	Homestead
Wilton	South Amana
Atalissa	Altoona
Tiffin	

and that in addition thereto applicant's service is the only regularly scheduled service to at least six (6) other communities between the same points. The finding and conclusion of the Commission is the only finding that could have been made under the record.

(g) Intervener denies each, all and every allegation set forth in sub-paragraph (g) of Paragraph IV of the complaint and states and shows the court that the finding and conclusion of the Commission are supported by substantial evidence and in accord with the record before the Commission.

(h) Intervener denies each, all and every allegation set forth in sub-paragraph (h) of Paragraph IV of the complaint and states and shows the court that the finding and conclusion of the Commission are supported by substantial evidence and in accord with the record before the Commission.

[fol. 93] (i) Intervener denies each, all and every allegation set forth in sub-paragraph (i) of Paragraph IV of the complaint and states and shows the court that the finding and conclusion of the Commission are strictly in accord with the National Transportation Policy and with Sections 5 (2)(b) and 207 of the Interstate Commerce Act and in accord with the record before the Commission.

(j) Intervener denies that the finding and conclusion of the Commission referred to in sub-paragraph (j) of Paragraph IV of the complaint is a correct statement of the law and states and shows the Commission that upon application the Interstate Commerce Commission may, in its discretion, issue certificates of public convenience and necessity to motor carriers affiliated with or controlled by railroads and nothing contained in the National Transportation Policy or in Sections 5 (2)(b) and 207 of the Interstate Commerce Act prohibits the issuance of certificates to such persons under the conditions and circumstances found by the Commission and disclosed by the record.

(k) Intervener denies each, all and every allegation set forth in sub-paragraph (k) of Paragraph IV of the com-

plaint and states and shows the court that the decision of the Commission in the present case involved no departure from the Commission's past policy as evidenced by its prior decisions and that in rendering its decision in the instant case the Commission correctly construed and applied the National Transportation Policy and Section 207 of the Interstate Commerce Act, as well as Section 5 (2)(b) although the portion of Section 5 above referred to is not applicable to this controversy.

(l) Intervener denies each, all and every allegation set forth in sub-paragraph (l) of Paragraph IV of the complaint and states and shows the court that the decision of the Commission in the present case involved no departure from the Commission's past policy as evidenced by its prior decisions and that in rendering its decision in the instant case the Commission correctly construed and applied the [fol. 94] National Transportation Policy and Section 207 of the Interstate Commerce Act, as well as Section 5 (2)(b) although the portion of Section 5 above referred to is not applicable to this controversy.

(m) Intervener denies each, all and every allegation set forth in sub-paragraph (m) of Paragraph IV of the complaint and states and shows the court that the finding and conclusion of the Commission is in accord with the Interstate Commerce Act and consistent with the prior decisions of the Commission and violates no provision of the Interstate Commerce Act.

(n) Intervener denies each, all and every allegation set forth in sub-paragraph (n) of Paragraph IV of the complaint and states and shows the court that the opinion, findings, conclusions and order of the Commission all disclose that the Commission gave full consideration and proper effect to all provisions of the law including Sections 208 and 212 of the Interstate Commerce Act and the National Transportation Policy as expressed therein.

(o) Intervener denies each, all and every allegation set forth in sub-paragraph (o) of Paragraph IV of the complaint and alleges and shows the court that the Commission has not heretofore adopted a policy which would

prevent the rendition of service by a motor carrier to any point and that under the Interstate Commerce Act the extent to which there may be common ownership or control of railroads and truck lines is a matter solely within the discretion of the Commission with which the courts may not interfere.

(p) Intervener denies each, all and every allegation set forth in sub-paragraph (p) of Paragraph IV of the complaint and states and shows the court that the opinion of the Commission discloses that it gave proper effect to Commission's obligations and to the provisions of the law as set forth in the Interstate Commerce Act and National Transportation Policy.

(q) Intervener denies each, all and every allegation set forth in sub-paragraph (q) of Paragraph IV of the complaint and alleges that the report of the Commission shows that the Commission considered "economic realities" con- [fol. 95] fronting independent motor carriers as well as "economic realities" of the receivers and shippers of freight in the territories involved and that the Commission gave full consideration and effect to the facts with respect to the operation of independent motor carriers.

(r) Intervener denies each, all and every allegation set forth in sub-paragraph (r) of Paragraph IV of the complaint and alleges and shows the court that the whole record before the Commission establishes that the Commission's order was neither unreasonable, arbitrary, capricious, discriminatory or an abuse of discretion and on the contrary alleges that the report and order of the Commission are supported by substantial evidence well within the powers of the Commission and in no manner constitutes an abuse of the Commission's discretion.

5. WHEREFORE, intervener, Rock Island Motor Transit Company, respectfully prays as follows:

(a) That in accordance with Section 2284, Title 28, USCA, a three judge United States District Court be assembled.

(b) That a hearing of this cause be promptly had on its merits.

(c) That this court upon hearing, find, adjudicate and determine that the opinion, findings, conclusion and order of the Interstate Commerce Commission in this cause are lawful, are within the discretion of said Commission and, that the plaintiffs' complaint is without merit.

(d) That the judgment be entered in favor of the defendant and that the order of the Interstate Commerce Commission be, in all respects, sustained and confirmed; that [fol. 96] the complaint of plaintiffs be dismissed and that this intervener have such other and further relief as to the court may seem just and proper and for costs of this action.

s/ Arthur L. Winn, Jr., 743 Investment Building, Washington, D. C., s/ A. B. Howland, s/ J. H. Martin, 500 Bankers Trust Building, Des Moines, Iowa, Attorneys for Rock Island Motor Transit Company, Intervener

IN THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

[Title omitted]

ANSWER OF THE INTERSTATE COMMERCE COMMISSION—

Filed September 15, 1955

The Interstate Commerce Commission, one of the defendants in the above-entitled case, hereinafter called the Commission, for answer to the complaint, says:

1.

Answering the allegations of paragraph I of the complaint, entitled "Jurisdictional Statement," the Commission admits the jurisdiction of this Court in the premises.

2.

[fol. 98] Answering the allegations of paragraph II of the complaint, entitled "Parties," the Commission admits all of the allegations therein except for the last subparagraph, and in answer thereto the Commission admits that the plaintiffs were interveners in opposition in the described proceeding before the Commission but denies that the motor carrier plaintiffs as well as the motor-carrier members of plaintiffs American Trucking Associations, Inc., and its Regular Common Carrier Conference will be adversely affected or will sustain continuing or irreparable injuries unless the Commission's report and order of November 22, 1954 (Appendix A to the complaint) are suspended, enjoined, annulled, and set aside.

3.

Answering the allegations of paragraph III of the complaint, entitled "Statement of the Case," the Commission admits that an application was filed before it on October 26, 1951, in the Commission's docket No. MC–29130 (Sub No. 70) by The Rock Island Motor Transit Company, which is a wholly-owned motor carrier subsidiary of the Chicago, Rock Island and Pacific Railroad Company, which application, as amended on March 7, 1952, sought authority from the defendant Commission as a common carrier by motor vehicle as described on pages 91 and 92 of the Commission's report of November 22, 1954, attached as Appendix A to the complaint of the plaintiffs; the Commission avers that hearings were held on such application on fourteen different days during the periods from March 18 through April 1, 1952, and from May 20 through May 22, 1952, at Des Moines, Iowa; the Commission admits that its Examiner's recommended report and order were served on April 21, 1953, that after the filing of exceptions and replies thereto, oral argument was had before the entire Com-[fol. 98a] mission at Washington, D. C., on March 8, 1954, that on November 22, 1954, the Commission rendered its report and order as set forth in Appendix A to the complaint of the plaintiffs, that the plaintiffs herein on February 16, 1955, filed with the Commission a petition for recon-

sideration of said report and order, that said petition for reconsideration was denied by the Commission by order of July 6, 1955, which was served July 14, 1955, and that Appendix B to the complaint of the plaintiffs is a true copy of that order as served; the Commission avers, however, that a Corrected Order denying said petition for reconsideration was issued under date of July 6, 1955, which was served on July 27, 1955, and that a true and correct copy of such corrected order is attached hereto and marked Appendix A to this answer; and the Commission admits that the plaintiffs have exhau ted their administrative remedy before the Commission, that a certificate of public convenience and necessity as authorized by the report and order of November 22, 1954, will be issued by the Commission unless the report and order of November 22, 1954, are suspended, enjoined, annulled and set aside and the issuance of the certificate to the applicant is enjoined by this Court. The Commission hereby informs the Court that no certificate will be issued to the Rock Island Motor Transit Company in its Docket No. MC-29130 (Sub No. 70) pending final decree of this Court in this action. For answer to the last sentence of the first subparagraph of paragraph III of the complaint, the Commission denies that statement as alleged, and particularly denies that the application in question was granted without qualification, and respectfully refers the Court to the text of the report and order of November 22, 1954, for a correct statement of the decision of the Commission on the application filed in Docket No. MC-29130 (Sub No. 70).

4.

[fol. 99] Answering the allegations of paragraph IV of the complaint, the Commission denies the allegations therein contained, and particularly denies that in making and issuing the report and order of November 22, 1954, and in denying reconsideration thereof by the corrected order of July 6, 1955, it exceeded its powers and authorities delegated by law, and denies that it erred as to matters of fact or matters of law in any of the particulars set forth in subparagraphs (a) to (r), inclusive, of said paragraph IV of the complaint, or in any other particulars whatsoever.

5.

Further answering the complaint of the plaintiffs, the Commission avers that its report and order of November 22, 1954, and its corrected order of July 6, 1955, denying reconsideration thereof were within the scope of the statutory powers and authority delegated to it by the Interstate Commerce Act, and particularly within sections 207(a) and 208(a) thereof (49 U.S.C. 307(a) and 308(a)), and avers that its findings and conclusions therein were and are fully supported and justified by substantial evidence in the record made before the Commission in the proceeding in Docket No. MC-29130 (Sub No. 70); and the Commission further avers that in making and in denying reconsideration of the report of November 22, 1954, it gave careful consideration to the National Transportation Policy and to all of the contentions called to its attention in said proceeding by counsel for the plaintiffs, that the said report and orders were and are not unreasonable, arbitrary, capricious, discriminatory, or in abuse of discretion, and that no constitutional or statutory rights, powers, privileges, or immunities belonging to the plaintiffs, or either of them, [fol. 100] were infringed in any manner by said report and orders of the Commission.

WHEREFORE, having fully answered the complaint of the plaintiffs, the defendant, the Interstate Commerce Commission, prays that the relief sought in the complaint be denied and that the complaint be dismissed.

s/ James Y. Piper, Assistant General Counsel, Interstate Commerce Commission, 12th St. and Constitution Ave., N.W., Washington 25, D.C.

s/ Samuel R. Howell, Acting General Counsel, Interstate Commerce Commission, Of Counsel.

[fol. 101] APPENDIX "A" TO ANSWER OF I.C.C.

BEFORE THE INTERSTATE COMMERCE COMMISSION

No. MC-29130 (Sub. No. 70)

THE ROCK ISLAND MOTOR TRANSIT COMPANY—COMMON CARRIER APPLICATION (Des Moines, Iowa)

No. MC-29130 (Sub. No. 2)

ROCK ISLAND MOTOR TRANSIT COMPANY EXTENSION OF OPERATIONS—SILVIS—CHICAGO, ILL.

CORRECTED ORDER—July 6, 1955

Upon consideration of the records in the above-entitled proceedings, and of:

(1) Petition of Railway Labor Executives' Association, for leave to intervene and for reconsideration, dated February 16, 1955;
(2) Petition of protestant motor carriers, American Trucking Associations, Inc., and the Regular Common Carrier Conference thereof, for reconsideration of the report of the Commission herein, dated February 16, 1955;
(3) Reply (resistance) of applicant and interveners in (2) above;
(4) Petition of applicant and certain interveners for interpretation of present certificate in No. MC-29130 (Sub. No. 2), or, in the alternative, for modification of the report of the Commission in the title proceeding, dated May 16, 1955;
(5) Reply of protestant motor carriers, American Trucking Associations, Inc., and the Regular Common Carrier Conference thereof, to (4) above, dated May 26, 1955;
(6) Reply of Railway Labor Executives' Association, to (4) above, dated May 26, 1955;

and good cause appearing therefor:

It is ordered, That the Railway Labor Executives' Association be, and it is hereby, permitted to intervene in said

proceedings with the right to appear and participate in all further proceedings therein, and that its petition in all other respects be, and it is hereby, denied, for the reason set forth in the next succeeding paragraph;

It is further ordered, That the petition in (2) above be, and it is hereby, denied, for the reason that the evidence adequately justifies the conclusions and findings in the report and order of November 22, 1954;

It is further ordered, That the petition in (4) above be, and it is hereby denied, for the reason that the relief sought is not warranted.

By the Commission.

Harold D. McCoy, Secretary.

[Title omitted]

ANSWER OF THE UNITED STATES—Filed September 16, 1955

Comes now the defendant the United States of America, and for its answer to the complaint of plaintiffs filed in the above-entitled cause, admits, denies and alleges as hereinafter set forth:

1. Admits the allegations of Paragraph I of the complaint.

2. Admits the allegations of Paragraph II of the complaint, except that this defendant denies that the motor carrier plaintiffs named in the caption of the complaint, as well as the motor carrier members of plaintiffs American Trucking Association, Inc., and its Regular Common Carrier Conference, will be adversely affected or sustain continuing or irreparable injuries unless the report and order of November 22, 1954, issued by the defendant Interstate

Commerce Commission are suspended, enjoined, annulled or set aside.

3. Admits the allegations of Paragraph III of the complaint, except that this defendant denies that the Chicago, [fol. 104] Rock Island and Pacific Railway Company, through its wholly owned motor carrier subsidiary, The Rock Island Motor Transit Company, sought authority from the defendant Interstate Commerce Commission to engage in "all-out trucking operations" in competition with its train service and with the service of independent motor carriers between the points mentioned in said Paragraph III; and except that this defendant denies the characterization and epitomization of the report and order of the defendant Commission of November 22, 1954, as set forth in the sixth sentence of said Paragraph III, and respectfully refers to said report and order for a full and complete statement of the operating authority which they grant and the terms upon which the same is granted.

4. Denies each and every allegation contained in Paragraph IV of the complaint, and particularly and categorically denies that the defendant Interstate Commerce Commission in making the report and order, of which a copy is annexed to the complaint as Exhibit A, and in denying reconsideration thereof by its order of July 6, 1955, of which a copy is annexed to the complaint as Exhibit B, exceeded its power and authority delegated under law or erred as a matter of fact or as a matter of law in the particulars set forth in sub-paragraphs (a) to (r), inclusive, of said Paragraph IV.

5. This defendant alleges that all of the parties to the proceedings before the defendant Interstate Commerce Commission were given a full and complete hearing; that the findings and conclusions contained in the report dated November 22, 1954, and the order entered on the same date, and the order denying the petition for reconsideration entered July 6, 1955, were and are fully supported and justified by the evidence submitted in said proceedings; that in making said report the defendant Commission carefully considered the National Transportation Policy and considered and weighed carefully, in the light of its own knowl- [fol. 105] edge and experience, each fact, circumstance and

condition called to its attention on behalf of the parties to said proceedings by their respective counsel or otherwise; that said report and orders were not made or entered either arbitrarily or unjustly or contrary to law; that in making said report and orders the defendant Commission did not exceed the authority conferred upon it by law; and this defendant denies each and every allegation contained in the complaint in conflict with the allegations of this paragraph; and, except as expressly admitted in this answer, this defendant denies each and all of the allegations of the complaint.

WHEREFORE, having fully answered, this defendant, the United States of America, prays that the relief sought in the complaint be denied and that the complaint be dismissed with cost-, assessed against the plaintiffs, and that it have such other, further and different relief as to the Court may seem meet, just and equitable in the premises.

s/ James E. Kilday, s/ Charles S. Sullivan, Jr.,
Special Assistants to the Attorney General.

Stanley N. Barnes, Assistant Attorney General, Leo A. Rover, United States Attorney, Attorneys for the Defendant the United States of America.

[fol. 108] IN THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

[Title omitted]

MOTION OF RAILWAY LABOR EXECUTIVES' ASSOCIATION TO INTERVENE AS PLAINTIFFS—Filed September 16, 1955

Now comes the Railway Labor Executives' Association, comprised of the eighteen standard national and inter-

national railway labor organizations listed below, and moves the Court for leave to intervene as plaintiffs in the above-captioned case. In support thereof movants state that:

I

Movants Railway Labor Executives' Association are a voluntary unincorporated association, with which are affiliated the following standard national and international railway labor organizations:

Switchmen's Union of North America
Order of Railroad Telegraphers
American Train Dispatchers' Association
Railway Employes' Department, A. F. of L.
International Association of Machinists
International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers
Sheet Metal Workers' International Association
International Brotherhood of Electrical Workers
Brotherhood Railway Carmen of America
International Brotherhood of Firemen & Oilers
Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes
Brotherhood of Maintenance of Way Employes
Brotherhood of Railroad Signalmen of America
International Organization Masters, Mates & Pilots of America
National Marine Engineers' Beneficial Association
Hotel & Restaurant Employees and Bartenders International Union
Railroad Yardmasters of America
Brotherhood of Sleeping Car Porters
Brotherhood of Locomotive Firemen & Enginemen

[fol. 109] The principal office of the Association is located at 10 Independence Avenue, S. W., Washington, D.C.

II

Certain of the labor organizations listed above who are members of the Railway Labor Executives' Association,

are the duly designated representatives under the Railway Labor Act for purposes of collective bargaining of employees of the Chicago, Rock Island and Pacific Railroad Company and have agreements with said company concerning rates of pay, rules and working conditions of such employees. The Rock Island Motor Transit Company, a wholly-owned subsidiary of said Railroad, was an applicant before the Interstate Commerce Commission in the proceeding known as *The Rock Island Motor Transit Company Common Carrier Application* (Docket No. MC–29130, Sub-No. 70) which involved a request of the motor trucking company for the removal of certain restrictions on its certificates of public convenience and necessity which were designed to make the trucking operations auxiliary and subsidiary to the rail operations of the parent Rock Island & Pacific Railway Company. The granting of such request by the Interstate Commerce Commission adversely affects employees represented by the movants since it enables the Railroad to substitute truck service for rail service in certain areas to the consequent injury of rail operations and jobs of railroad employees represented by labor organizations affiliated with movants. In order to protect the employees of the Rock Island & Pacific Railroad from these adverse effects, the movants petitioned the Interstate Commerce Commission for leave to intervene as parties in opposition to the application of the Rock Island Motor Transit Company. The petition of the movants Railway Labor Executives' Association was granted (Appendix B of Complaint). The orders under review in the subject court case granting the application of the Rock Island Motor Transit Company were entered in such Commission proceedings on November 22, 1954 and July 6, 1955 (Appendices A and B of Complaint). Movants clearly [fol. 110] have a substantial interest in the Court's action with respect to said orders not represented by any other party in the case.

III

Movants ask to intervene as parties plaintiff in the subject case pursuant to Sec. 2323 of the Judicial Code

(28 U.S.C. 2323); Rule 24 of the Federal Rules of Civil Procedure; section 10(a) of the Administrative Procedure Act (5 U.S.C. 1009(a)); and section 205(g) of the Interstate Commerce Act (49 U.S.C. 305(g)).

28 U.S.C.A. 2323 provides that any party in interest to a proceeding before the Commission in which an order is made may appear as a party of his own motion and as of right in any court action involving the validity of such order and the interest of such party. The present case involves the validity of an order of the Interstate Commerce Commission entered in a proceeding in which movants were admitted as a party in interest and affects such interest of movants. The movants therefore have a clear legal right to intervene in the present case.

Rule 24 of the Federal Rules of Civil Procedure permits intervention in an action in a Federal District Court (1) when a statute of the United States confers a right to intervene, or (2) when the representation of the applicant's interest by existing parties is inadequate and the applicant is or may be bound by a judgment in the action. 28 U.S.C.A. 2323, quoted above, gives movants a right to intervene in the present proceedings. In addition, the movants' interest as representatives of employees of the Rock Island Railroad is not represented by the present parties plaintiff while a judgment in favor of the defendants will have a binding effect upon such employees and their representatives.

Section 10(a) of the Administrative Procedure Act (5 U.S.C. 1009(a)) provides that, except as statutes preclude judicial review or agency action is by law committed to agency discretion, any person suffering legal wrong because of any agency action or adversely affected or aggrieved by such action within the meaning of any relevant statute, shall be entitled to judicial review thereof. On the basis of the facts set forth above, movants come within [fol. 111] the purview of this section.

The orders of the Interstate Commerce Commission involved in the present court proceedings were entered in part pursuant to Part II of the Interstate Commerce Act (49 U.S.C. 305). Paragraph (g) of that section makes any

final order of the Commission under such Part II subject to the same right of relief in court by "any party in interest" as is now provided in respect to orders of the Commission under Part I of the Interstate Commerce Act. The movants are clearly a party in interest with respect to the orders of the Commission involved in the present proceedings. Sec. 17(11) of the Interstate Commerce Act recognizes the interests of labor organizations representing employees in proceedings arising under the Interstate Commerce Act by providing that such organizations may intervene and be heard in any proceeding arising under the Act affecting such employees. This provision is made applicable to proceedings under Part II of the Interstate Commerce Act by Paragraph (h) of that section. Clearly movants are a party in interest within the meaning of such section.

IV

The granting of this motion will not broaden the issues herein nor unduly delay or prejudice the adjudication of the rights of the original parties.

WHEREFORE, the Railway Labor Executives' Association prays that it be permitted to intervene as plaintiffs herein and that it be granted leave to file the Complaint attached hereto.

Respectfully submitted, s/ Clarence M. Mulholland, 741 National Bank Building, Toledo 4, Ohio, s/ Edward J. Hickey, Jr., s/ William G. Mahoney, s/ James L. Highsaw, Jr., 620 Tower Building, Washington 5, D.C., Attorneys for the Railway Labor Executives' Association.

Of Counsel, Mulholland, Robie & Hickey, 741 National Bank Building, Toledo 4, Ohio.

September 16, 1955.

IN THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

[Title omitted]

COMPLAINT OF RAILWAY LABOR EXECUTIVES' ASSOCIATION— Filed October 24, 1955

Comes now the Railway Labor Executives' Association, comprised of eighteen national and international railway labor organizations, intervening plaintiffs in the above-captioned case, and for their cause of action against defendants complain and allege as follows:

I

JURISDICTIONAL STATEMENT

1. This action is brought to suspend, enjoin, annul, and set aside orders of the defendant Interstate Commerce Commission dated November 22, 1954 and July 6, 1955, in an administrative proceeding before that Commission designated as "*The Rock Island Motor Transport Company Common Carrier Application*", Docket No. MC-29130 (Sub-No. 70). A copy of said orders and the accompanying report of the Commission, made a part thereof, are attached to the Complaint filed in this case on July 20, 1955 by the American Trucking Associations, Inc., *et al.*, and designated Appendices A and B. These orders and accompanying report are incorporated herein by reference and made a part hereof. The corrected order of July 6, 1955 is attached hereto as Appendix 1. This Complaint is filed pursuant to provisions of Title 49, United States Code, Section 205(g), Title 28, United States Code, Sections 1336, 1398, 2284, and 2321-2325, and Section 10 of the Administrative Procedure Act, 5 U.S.C., Section 1009.

[fol. 116] 2. The jurisdiction and venue of this Court is established by the above-cited provisions of the United States Code, Title 28, which includes the requirement of a three-judge court to hear and determine the action.

II

Parties

3. The intervening plaintiffs, the Railway Labor Executives' Association, are a voluntary unincorporated association with which are affiliated the following standard national and international railway labor organizations:

Switchmen's Union of North America
Order of Railroad Telegraphers
American Train Dispatchers' Association
Railway Employes' Department, A. F. of L.
International Association of Machinists
International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers
Sheet Metal Workers' International Association
International Brotherhood of Electrical Workers
Brotherhood Railway Carmen of America
International Brotherhood of Firemen & Oilers
Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes
Brotherhood of Maintenance of Way Employes
Brotherhood of Railroad Signalmen of America
International Organization Masters, Mates & Pilots of America
National Marine Engineers' Beneficial Association
Hotel & Restaurant Employees and Bartenders International Union
Railroad Yardmasters of America
Brotherhood of Sleeping Car Porters
Brotherhood of Locomotive Firemen & Enginemen

4. The principal place of business of the Association is located in the District of Columbia at 10 Independence Avenue, S.W.

5. Certain of the labor organizations listed in Paragraph No. 3 above, which are members of the Railway Labor Executives' Association, are the duly designated collective bargaining representatives under the Railway Labor Act for most of the employees of the Chicago, Rock Island and Pacific Railroad Company, the parent company of the Rock Island Motor Transit Company, and have

agreements with said railroad carrier concerning rates of pay, rules and working conditions of such employees. Said [fol. 117] agreements confer upon such employees valuable property rights in relation to their employment. By virtue of the foregoing the intervening plaintiffs represent the interests of said employees.

6. The United States of America is made a defendant in this Complaint pursuant to the provisions of Section 2322 of Title 28 of the United States Code.

III

Nature of the Case

7. The Chicago, Rock Island and Pacific Railroad Company, through its wholly-owned motor carrier subsidiary, the Rock Island Motor Transit Company, filed with the Interstate Commerce Commission an application under Section 207 of the Interstate Commerce Act (49 U.S.C., Section 307) for authority to engage in unrestricted motor carrier operations between Chicago, Illinois, and Omaha, Nebraska, including service to and from the intermediate points of Moline, Illinois, Iowa City, and Cedar Rapids, Iowa, among others. All of the above-named points were being served at the time of the application by the Rock Island Motor Transit Company pursuant to an authorization from the Interstate Commerce Commission which limited such operations to service which was auxiliary to and supplemental of the train service of the parent railroad company. This application resulted in the report and orders of the Commission referred to in Paragraph No. 1 above, which grants the application for unrestricted motor carrier operations, subject only to the conditions that there may be attached from time to time to the authority granted such reasonable terms, conditions and limitations as the public convenience and necessity may require, and that the contractual arrangements between the motor carrier company and the parent railroad company be subject to revision to assure their being fair and equitable to the parties. By these orders the Rock Island Motor Transit Company is authorized in substance to operate an unre- [fol. 118] stricted motor carrier service along routes paral-

leling the tracks of the parent Chicago, Rock Island and Pacific Railroad Company, to the detriment of the rail operations of that company and of the employees thereof.

8. The Commission issued its initial order in the proceedings before it on November 12, 1954. The intervening plaintiffs were granted permission by the Commission to intervene in the proceedings before the Commission and urge that agency to reconsider its action and condition the authority granted the Rock Island Motor Transit Company so as to effectively make the motor carrier operations auxiliary to and supplemental of the train operations of the parent railroad company (Appendix 1 hereto). The Commission, in its order dated July 6, 1955, denied reconsideration of its prior order on the ground that the evidence adequately justified the conclusions and findings in its report and order of November 22, 1954 (Appendix 1 hereto).

9. The intervening plaintiffs have exhausted their administrative remedies before the Interstate Commerce Commission and the certificate of public convenience and necessity authorized by the report and orders of the Commission on November 22, 1954 and July 6, 1955 will be issued by the Commission and operations performed thereunder to the injury of the employees represented by the intervening plaintiffs unless such report and orders are suspended, enjoined, annulled, and set aside, and issuance of a certificate authorized thereunder be enjoined or, if issued, be declared invalid.

IV

Allegations of Error

10. The report and orders of the Interstate Commerce Commission of November 22, 1954 and July 6, 1955, referred to above, are illegal and void for the following reasons:

(a) Said orders erroneously interpret Section 5(2)(b) of the Interstate Commerce Act (49 U.S.C. 5(2)(b)) as au- [fol. 119] thorizing the Commission to approve transactions subject thereto in which a motor carrier owned or controlled by a railroad carrier and subject to Part I of the Interstate Commerce Act, is an applicant, without requir-

ing that the operations of the motor carrier subsidiary be restricted to service which is auxiliary and supplemental to the rail operations of the parent railroad company.

(b) Said orders failed to comply with the requirements of Section 5(2)(b) (49 U.S.C. 5(2)(b)) that the Commission must condition orders entered thereunder in which a motor carrier owned or controlled by a rail carrier is an applicant so as to restrict the operating authority of the subsidiary motor carrier to trucking operations which will enable the railroad carrier to use the service by motor vehicle to public advantage in its rail operations and will not unduly restrain competition.

(c) Said orders erroneously interpret Section 207 of the Interstate Commerce Act (49 U.S.C. 307) as authorizing the Commission to issue certificates of public convenience and necessity to a motor carrier which is wholly owned or controlled by a railroad carrier, without conditioning such certificates so as to require that the motor carrier operations effectively be auxiliary and supplemental to the rail operations of the parent railroad company.

(d) Said orders erroneously conclude that the statutory authority of the Commission to impose terms and conditions on a grant of a certificate of public convenience and necessity pursuant to Section 207 of the Interstate Commerce Act (49 U.S.C. 307) is derived entirely from Section 208 of said Code (49 U.S.C. 308) without reference to Section 5(2)(b) of said Act (49 U.S.C. 5(2)(b)).

(e) Said orders erroneously interpret the authority of the Interstate Commerce Commission as permitting the Commission to issue orders in transactions subject to Section 5(2)(b) (49 U.S.C. 5(2)(b)) involving applicants who are wholly-owned subsidiaries of railroad carriers permitting motor carrier operations by the motor carrier sub-
[fol. 120] sidiary which are unrestricted except for the reservation of jurisdictions by the Commission to impose in the future limitations, restrictions and modifications that may appear necessary.

(f) Said orders erroneously interpret the authority of the Interstate Commerce Commission as permitting the Commission to issue orders, in transactions subject to Section 207 (49 U.S.C. 307) involving applicants who are

wholly-owned subsidiaries of railroad carriers permitting motor carrier operations by the motor carrier subsidiary which are unrestricted except for the reservation of jurisdictions by the Commission to impose in the future limitations, restrictions and modifications that may appear necessary.

11. The report and orders of the Interstate Commerce Commission dated November 22, 1954 and July 6, 1955, referred to in Paragraph No. 1 above, are, in the particulars set forth in Paragraph No. 10, based on an erroneous and improper and illegal construction of the Interstate Commerce Act, as amended, and are contrary to the requirements of the statute, in excess of the Commission's statutory powers, and amount to an abuse of the Commission's authority and discretion.

V

Injury

12. The intervening plaintiffs and the employees represented by them are threatened with irreparable injury by the erroneous and unlawful actions of the Interstate Commerce Commission as enumerated in Paragraph No. 10 above, in that they are subject to loss of employment, displacement and other economic detriment if the Commission's orders are allowed to stand.

VI

Prayer for Relief

Wherefore, intervening plaintiffs respectfully pray:

First: That, as provided by Section 2284 of Title 28, United States Code, this Court immediately notify the [fol. 121] Chief Judge of the United States Court of Appeals for the District of Columbia Circuit who shall designate two other judges, at least one of whom shall be a circuit judge, to serve as members of a three-judge court to hear and determine this action.

Second: That process issue against the defendant, the United States of America; that service of a copy of the complaint be made upon the Attorney General of the United

States, the United States Attorney for the District of Columbia, and the Interstate Commerce Commission; and that after answer by the defendants and after not less than five days' notice to the parties the application herein be given precedence and assigned for hearing at the earliest practicable day as provided by Section 2284 of Title 28, United States Code.

Third: That upon hearing of this action, judgment issue enjoining, annulling and setting aside as unlawful and void the challenged report and orders of the Interstate Commerce Commission dated November 22, 1954, and July 6, 1955, as corrected July 6, 1955.

Fourth: That the intervening plaintiffs be given such other, further, general and different relief as the nature of the case may require and as the Court may deem just and proper.

Respectfully submitted, s/ Clarence M. Mulholland, 741 National Bank Building, Toledo 4, Ohio, s/ Edward J. Hickey, Jr., s/ William G. Mahoney, s/ James L. Highsaw, Jr., 620 Tower Building, Washington 5, D.C., Attorneys for the Railway Labor Executives' Association.

Of Counsel, Mulholland, Robie & Hickey, 741 National Bank Building, Toledo 4, Ohio

PETITION OF INTERVENTION AND ANSWER TO COMPLAINT BY INTERVENORS, TRAFFIC BUREAUS OF AND/OR CHAMBERS OF COMMERCE OF DAVENPORT, IOWA, ET AL.
—Filed September 19, 1955

COME NOW the above named parties and persons as Intervenors, and state and show the Court as follows:

BASIS FOR INTERVENTION

Par. 1. That the above named Intervenors were participants and parties of record in the proceedings before the Interstate Commerce Commission, in Docket No. MC-29130, sub. No. 70, the Rock Island Motor Transit Company [fol. 124] Common Carrier Application, as Intervenors in support of said Application and are interested in sustaining the Order of the Interstate Commerce Commission entered therein and which the Plaintiffs herein are seeking to annul, set aside and enjoin the Report and Order of the aforesaid Commission entered in said proceedings on the 22nd day of November, 1954, and the Order of the Commission dated July 6, 1955.

Par. 2. That these Intervenors intervene in the above entitled cause pursuant to Title 28, Section 2323 USC.

ANSWER

That the aforesaid Intervenors, for Answer to the Complaint filed herein on or about the 29th day of July, 1955, state and show the Court as follows:

Par. 1. Intervenors admit the jurisdictional statement contained in Paragraph one (1) of Plaintiffs' Complaint.

Par. 2. Intervenors admit the identity of the parties set forth in Paragraph two (2) of said Complaint and concede that they appeared as Intervenors in opposition in the proceedings before the Interstate Commerce Commission in Docket No. MC-29130 (Sub. 70), The Rock Island Motor Transit Company Common Carrier Application, but specifically deny that said Plaintiffs or any persons or parties represented by them which constitute a class represented by said Plaintiffs are or will be adversely affected by the Report and Order of November 22, 1954, of the Interstate

Commerce Commission, Appendix A, to Plaintiffs' Complaint, or that any of said persons or parties or any persons or parties represented by them or forming a class or part of class represented by said Plaintiffs will sustain or suffer any injury or damage of any kind or character by reason of the aforesaid Report and Order sought to be suspended, enjoined, annulled and set aside in this cause.

[fol. 125] Par. 3. Intervenors admit the allegations contained in Paragraph three (3), Statement of the Case, in Plaintiffs' Complaint.

Par. 4. Intervenors specifically deny that the Defendant, Interstate Commerce Commission, in making and issuing the Report and Order complained of, (Appendix A of the Complaint), and in denying reconsideration thereof by Order of July 6, 1955, (Appendix B of the Complaint) exceeded its powers and authority or that it erred as a matter of fact or as a matter of law in any way or manner.

For further Answer thereto, these Intervenors state and show to the Court that the Defendant, Interstate Commerce Commission, had jurisdiction of the parties and subject matter involved in the proceedings before it and was vested under Part two (2) of the Interstate Commerce Act with power and authority to make the Report and enter the Order it did on the aforesaid Application of The Rock Island Motor Transit Company, Docket No. MC-29130, Sub. 70.

Further answering Paragraph four (4) of said Complaint and particularly the specifically alleged errors, Paragraphs A to R, inclusive, these Intervenors state:

(a) Intervenors specifically deny each and every allegation contained in each and all of said alleged errors.

(b) For further answer, Intervenors state that the findings of the Interstate Commerce Commission in the granting to The Rock Island Motor Transit Company in Docket No. MC-29130, Sub. 70, the right to operate as a common carrier by motor vehicle was fully sustained by the record evidence in accordance with Part two (2) of the Interstate Commerce Act.

[fol. 126] (c) That the record evidence conclusively established that the services proposed by the Rock Island Motor Transit Company in Docket No. MC-29130, sub. 70, did

promote the public convenience and necessity and was in the public interest and that it was mandatory upon the Commission, under Section 207 of Part 2 of the Interstate Commerce Act to grant said Application and issue the authority requested to the Rock Island Motor Transit Company.

(d) That the Report and Orders of the Interstate Commerce Commission assailed by the Plaintiffs herein were in conformity with and not contrary to the National Transportation Policy or of Sections 5(2)(b) and 207 of the Interstate Commerce Act.

(e) Further answering the alleged specifications of error in the Report and Order of the Interstate Commerce Commission assailed in Paragraph four (4) of Plaintiffs' Complaint, these Intervenors state that the sole issue involved and question to be determined by the Interstate Commerce Commission, were the transportation needs and requirements of the territory and communities to be served by The Rock Island Motor Transit Company in the aforesaid Application, and these Intervenors as representatives of such territory and communities state and show the Court that the record evidence conclusively establishes that the transportation needs and requirements of such territory and communities could only be served and fulfilled by the granting of the aforesaid Application of the Rock Island Motor Transit Company as an unrestricted motor carrier of general commodities.

(f) Further answering Paragraph four (4) of Plaintiffs' Complaint and particularly sub-paragraph M thereof, these Intervenors show the Court that the record evidence conclusively establishes that the granting of authority to the Rock Island Motor Transit Company will not result [fol. 127] in restraint of competition or be detrimental to the public interest in any respect, but in fact will provide a transportation need not otherwise provided by any existing carriers.

WHEREFORE, Intervenors, aforesaid, having fully answered Plaintiffs' Complaint, pray that this Court upon hearing find that said Complaint is without merit and further find and determine that the Report and Orders of the Interstate Commerce Commission sought to be enjoined

and set aside are fully sustained by the record evidence, and lawful and within the power vested in said Commission under Part two (2) of the Interstate Commerce Act.

Intervenors further pray that judgment be entered in favor of the Defendant and that the Report and Orders of the Interstate Commerce Commission be in all particulars sustained and confirmed.

Further Intervenors pray for such other and further Orders as may be just, equitable and proper in the premises.

(Sgd) D. C. Nolan, 405 Iowa State Bank Building, Iowa City, Iowa; Attorney for Intervenors, Traffic Bureaus of and/or Chambers of Commerce of Davenport, Iowa City, Cedar Rapids, Newton, Des Moines, Atlantic, Harlan, Ottumwa, and Mason City, Iowa; Shippers' Committee composed of Paul Monroe, President of Monroe Company, Colfax, Iowa; A. C. Holmdahl, President of Mid-West Stamping Company, Kellogg, Iowa; P. H. Kuyper, President of Rol Screen Company, Pella, Iowa; Sharp Lannon, General Manager, Grinnell Shoe Company, Grinnell, Iowa; G. L. Engle, Traffic Manager, Wind Power Mfg. Company, Newton, Iowa; R. L. Cocklin, Vice-President, Laco-Oil Burner Company, Griswold, Iowa; C. C. Vieth, General Merchandise, Oakland, Iowa; and Employees' Committee of Rock Island Motor Transit Company composed of: John F. Morrison, Dan Quinn, Ross Johnson, Lillian McKenna and P. J. Doyle.

(Sgd) Arthur L. Winn, Jr., 743 Investment Building, Washington, D. C., Of Counsel for Intervenors.

[fol. 131] IN THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

[Title omitted]

MOTION OF BROTHERHOOD OF RAILROAD TRAINMEN AND ORDER OF RAILWAY CONDUCTORS AND BRAKEMEN OF AMERICA TO INTERVENE AS PLAINTIFFS—Filed October 3, 1955

Now come the Brotherhood of Railroad Trainmen and the Order of Railway Conductors and Brakemen of America, standard railway labor organizations, and move the Court for leave to intervene as plaintiffs in the above-captioned case. In support thereof movants state that:

I.

Movants, the Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America, are voluntary unincorporated associations and are two of the standard railway labor organizations of the country. The principal office and place of business of the former is Cleveland, Ohio. The principal office and place of business of the latter is Cedar Rapids, Iowa.

II.

Movants are the duly designated representatives under the Railway Labor Act for purposes of collective bargaining of certain of the employees of the Chicago, Rock Island and Pacific Railroad Company and have agreements with said company concerning rates of pay, rules and working conditions of such employees. The Rock Island Motor Transit Company, a wholly owned subsidiary of said Railroad, [fol. 132] was an applicant before the Interstate Commerce Commission in the proceeding known as *The Rock Island Motor Transit Company Common Carrier Application* (Docket No. MC–29130, Sub-No. 70), which involved a request of the motor trucking company for the removal of certain restrictions on its certificates of public convenience and necessity which were designed to make the trucking operations auxiliary and subsidiary to the rail operations of the parent Rock Island & Pacific Railway Company. The granting of such request by the Interstate Commerce Commission adversely affects employees represented by the movants since it enables the Railroad to substitute truck service for rail service in certain areas to the consequent injury of rail operations and jobs of railroad employees represented by movants. In order to protect the employees of the Rock Island & Pacific Railroad from these adverse effects, the movants petitioned the Interstate Commerce Commission for leave to intervene as parties in opposition to the application of the Rock Island Motor Transit Company. The petition of the movants was granted (Appendix 2 of Complaint attached hereto). The orders under review in the subject court case granting the application of the Rock Island Motor Transit Company were entered in such Commission proceedings on November 22, 1954 and July 6, 1955 (Appendices A and B of original Complaint of American Trucking Associations, et al.). The order denying movants' petition for reconsideration was entered by the Commission on September 9, 1955 and received by movants September 28, 1955. Movants clearly have a substantial interest in the Court's action with respect to said orders not represented by any other party in the case.[1]

[1] They are not affiliated with the Railway Labor Executives' Association as intervenor in the case.

III.

Movants ask to intervene as parties plaintiff in the subject case pursuant to Sec. 2323 of the Judicial Code (28 [fol. 133] U.S.C. 2323); Rule 24 of the Federal Rules of Civil Procedure; section 10(a) of the Administrative Procedure Act (5 U.S.C. 1009(a)); and section 205(g) of the Interstate Commerce Act (49 U.S.C. 305(g)).

28 U.S.C. 2323 provides that any party in interest to a proceeding before the Commission in which an order is made may appear as a party on his own motion and as of right in any court action involving the validity of such order and the interest of such party. The present case involves the validity of orders of the Interstate Commerce Commission entered in a proceeding in which movants were admitted as parties in interest and affects such interest of movants. The movants therefore have a clear legal right to intervene in the present case.

Rule 24 of the Federal Rules of Civil Procedure permits intervention in an action in a Federal District Court (1) when a statute of the United States confers a right to intervene, or (2) when the representation of the applicant's interest by existing parties is inadequate and the applicant is or may be bound by a judgment in the action. 28 U.S.C. 2323, quoted above, gives movants a right to intervene in the present proceedings. In addition, the movants' interest as representatives of employees of the Rock Island Railroad is not represented by the present parties plaintiff while a judgment in favor of the defendants will have a binding effect upon such employees and their representatives.

Section 10(a) of the Administrative Procedure Act (5 U.S.C. 1009(a)) provides that, except as statutes preclude judicial review or agency action is by law committed to agency discretion, any person suffering legal wrong because of any agency action or adversely affected or aggrieved by such action within the meaning of any relevant statute, shall be entitled to judicial review thereof. On the basis of the facts set forth above, movants come within the purview of this section.

The orders of the Interstate Commerce Commission involved in the present court proceedings purported to be

entered in part pursuant to Part II of the Interstate [fol. 134] Commerce Act (49 U.S.C. 305). Paragraph (g) of that section makes any final order of the Commission under such Part II subject to the same right of relief in court by "any party in interest" as is now provided in respect to orders of the Commission under Part I of the Interstate Commerce Act. The movants are clearly parties in interest with respect to the orders of the Commission involved in the present proceedings. Sec. 17(11) of the Interstate Commerce Act recognizes the interests of labor organizations representing employees in proceedings arising under the Interstate Commerce Act by providing that such organizations may intervene and be heard in any proceeding arising under the Act affecting such employees. This provision is also made applicable to proceedings under Part II of the Interstate Commerce Act by Paragraph (h) of that section. Clearly movants are parties in interest within the meaning of such section.

IV.

The granting of this motion will not broaden the issues herein nor unduly delay or prejudice the adjudication of the rights of the original parties.

WHEREFORE, the Brotherhood of Railroad Trainmen and the Order of Railway Conductors and Brakemen of America pray that they be permitted to intervene as plaintiffs herein and that they be granted leave to file the Complaint attached hereto.

Respectfully submitted, Clarence M. Mulholland, 741 National Bank Building, Toledo 4, Ohio, Edward J. Hickey, Jr., s/ William G. Mahoney, s/ James L. Highsaw, Jr., 620 Tower Building, Washington 5, D. C., Attorneys for the Brotherhood of Railroad Trainmen and the Order of Conductors and Brakemen of America.

Of Counsel, Mulholland, Robie & Hickey, 741 National Bank Building, Toledo 4, Ohio

BEFORE THE INTERSTATE COMMERCE COMMISSION

ORDER—September 9, 1955

No. MC–29130 (Sub-No. 70)

THE ROCK ISLAND MOTOR TRANSIT COMPANY COMMON CARRIER APPLICATION
(Chicago, Ill.)

Upon consideration of the record in the above-entitled proceeding, and of:

(1) Petition of the Brotherhood of Railroad Trainmen, dated June 30, 1955, for leave to intervene;
(2) Petition of the Brotherhood of Railroad Trainmen, dated June 30, 1955, for reconsideration;
(3) Request of applicant for waiver of Rule 23 and reply to both petitions, filed July 22, 1955;
(4) Petition of the Order of Railway Conductors and Brakemen of America, dated August 17, 1955, for leave to intervene;

and good cause appearing therefor:

It is ordered, That said petitioners, the Brotherhood of Railroad Trainmen and the Order of Railway Conductors

and Brakemen of America, be, and they are hereby, permitted to intervene in said proceeding with the right to appear and participate in all further proceedings herein;

It is further ordered, That said late-tendered reply of applicant be, and it is hereby, filed;

It is further ordered, That said petition for reconsideration in (2) above be, and it is hereby, denied, for the reason that other petitions seeking like relief were denied on July 6, 1955.

By the Commission.

Harold D. McCoy, Secretary.

Civil Action No. 3171–55

[Title omitted]

COMPLAINT OF BROTHERHOOD OF RAILROAD TRAINMEN AND THE ORDER OF RAILWAY CONDUCTORS AND BRAKEMEN OF AMERICA—Filed October 24, 1955

Come now the Brotherhood of Railroad Trainmen and the Order of Railway Conductors and Brakemen of America, standard railway labor organizations and intervening plaintiffs in the above-captioned case, and for their cause of action against defendants complain and allege as follows:

I.

Jurisdictional Statement

1. This action is brought to suspend, enjoin, annul, and set aside orders of the defendant Interstate Commerce Commission dated November 22, 1954, July 6, 1955, and September 9, 1955, in an administrative proceeding before

that Commission designated as *"The Rock Island Motor Transport Company Common Carrier Application"*, Docket No. MC-29130 (Sub-No. 70). A copy of said orders and the accompanying report of the Commission, made a part thereof, are attached to the Complaint filed in this case on July 20, 1955 by the American Trucking Associations, Inc., et al., and designated Appendices A and B. These orders and accompanying report are incorporated herein by reference and made a part hereof. The corrected order of July 6, 1955 is attached hereto as Appendix 1, and the order of September 9, 1955 is attached as Appendix 2. This Complaint is filed pursuant to provisions of Title 49, United [fol. 141] States Code, Section 205(g), Title 28, United States Code, Sections 1336, 1398, 2284, and 2321-2325, and Section 10 of the Administrative Procedure Act, 5 U.S.C., Section 1009.

2. The jurisdiction and venue of this Court is established by the above-cited provisions of the United States Code, Title 28, which includes the requirement of a three-judge court to hear and determine the action.

II.

Parties

3. The intervening plaintiffs are voluntary unincorporated associations.

4. The principal place of business of the Brotherhood of Railroad Trainmen is Cleveland, Ohio. The principal place of business of the Order of Railway Conductors and Brakemen of America is Cedar Rapids, Iowa.

5. Movants are the duly designated collective bargaining representatives under the Railway Labor Act for certain employees of the Chicago, Rock Island and Pacific Railroad Company, the parent company of the Rock Island Motor Transit Company, and have agreements with said railroad carrier concerning rates of pay, rules and working conditions of such employees. Said agreements confer upon such employees valuable property rights in relation to their employment. By virtue of the foregoing the intervening plaintiffs represent the interests of said employees.

6. The United States of America is made a defendant

in this Complaint pursuant to the provisions of Section 2322 of Title 28 of the United States Code.

[fol. 142] III.

Nature of the Case

7. The Chicago, Rock Island and Pacific Railroad Company, through its wholly-owned motor carrier subsidiary, the Rock Island Motor Transit Company, filed with the Interstate Commerce Commission an application under Section 207 of the Interstate Commerce Act (49 U.S.C., Section 307) for authority to engage in unrestricted motor carrier operations between Chicago, Illinois, and Omaha, Nebraska, including service to and from the intermediate points of Moline, Illinois, Iowa City, and Cedar Rapids, Iowa, among others. All of the above-named points were being served at the time of the application by the Rock Island Motor Transit Company pursuant to an authorization from the Interstate Commerce Commission which limited such operations to service which was auxiliary to and supplemental of the train service of the parent railroad company. This application resulted in the report and orders of the Commission referred to in Paragraph No. 1 above, which grants the application for unrestricted motor carrier operations, subject only to the conditions that there may be attached from time to time to the authority granted such reasonable terms, conditions and limitations as the public convenience and necessity may require, and that the contractual arrangements between the motor carrier company and the parent railroad company be subject to revision to assure their being fair and equitable to the parties. By these orders the Rock Island Motor Transit Company is authorized in substance to operate an unrestricted motor carrier service along routes paralleling the tracks of the parent Chicago, Rock Island and Pacific Railroad Company, to the detriment of the rail operations of that company and of the employees thereof.

8. The Commission issued its initial order in the proceedings before it on November 12, 1954. The intervening plaintiffs were granted permission by the Commission to intervene in the proceedings before the Commission and

[fol. 143] urge that agency to reconsider its action and condition the authority granted the Rock Island Motor Transit Company so as to effectively make the motor carrier operations auxiliary to and supplemental of the train operations of the parent railroad company (Appendix 2 hereto). The Commission, in its order dated July 6, 1955, denied reconsideration of its prior order on the ground that the evidence adequately justified the conclusions and findings in its report and order of November 22, 1954 (Appendix 1 hereto). In its order of September 9, 1955, the Commission denied movants' petition for reconsideration of its prior action by reference to its order of July 6, 1955 (Appendix 2 hereto).

9. The intervening plaintiffs have exhausted their administrative remedies before the Interstate Commerce Commission and the certificate of public convenience and necessity authorized by the report and orders of the Commission on November 22, 1954, July 6, 1955, and September 9, 1955 will be issued by the Commission and operations performed thereunder to the injury of the employees represented by the intervening plaintiffs unless such report and orders are suspended, enjoined, annulled, and set aside, and issuance of a certificate authorized thereunder be enjoined or, if issued, be declared invalid.

IV.

Allegations of Error

10. The report and orders of the Interstate Commerce Commission of November 22, 1954, July 6, 1955, and September 9, 1955, referred to above, are illegal and void for the following reasons:

(a) Said orders erroneously interpret Section 5(2)(b) of the Interstate Commerce Act (49 U.S.C. 5(2)(b)), applicable to Docket No. MC-29130 (Sub-No. 70), as authorizing the Commission to approve transactions subject thereto in which a motor carrier owned or controlled by a railroad carrier and subject to Part I of the Interstate [fol. 144] Commerce Act, is an applicant, without requiring that the operations of the motor carrier subsidiary be

restricted to service which is auxiliary and supplemental to the rail operations of the parent railroad company.

(b) Said orders failed to comply with the requirements of Section 5(2)(b) (49 U.S.C. 5(2)(b)), applicable to the proceeding in which the orders were entered, that the Commission must condition orders in which a motor carrier owned or controlled by a rail carrier is an applicant so as to restrict the operating authority of the subsidiary motor carrier to trucking operations which will enable the railroad carrier to use the service by motor vehicle to public advantage in its rail operations and will not unduly restrain competition.

(c) Said orders erroneously interpret Section 207 of the Interstate Commerce Act (49 U.S.C. 307) as authorizing the Commission to issue certificates of public convenience and necessity to a motor carrier which is wholly owned or controlled by a railroad carrier without conditioning such certificates so as to require that the motor carrier operations effectively be auxiliary and supplemental to the rail operations of the parent railroad company.

(d) Said orders erroneously conclude that the statutory authority of the Commission to impose terms and conditions on a grant of a certificate of public convenience and necessity pursuant to Section 207 of the Interstate Commerce Act (49 U.S.C. 307) is derived entirely from Section 208 of said Code (49 U.S.C. 308) without reference to Section 5(2)(b) of said Act (49 U.S.C. 5(2)(b)).

(e) Said orders erroneously interpret the authority of the Interstate Commerce Commission as permitting the Commission to issue orders in transactions subject to Section 5(2)(b) (49 U.S.C. 5(2)(b)) involving applicants who are wholly owned subsidiaries of railroad carriers such as here involved permitting motor carrier operations by the motor carrier subsidiary which are unrestricted except [fol. 145] for the reservation of jurisdictions by the Commission to impose in the future limitations, restrictions and modifications that may appear necessary.

(f) Said orders erroneously interpret the authority of the Interstate Commerce Commission as permitting the Commission to issue orders in transactions subject to Section 207 (49 U.S.C. 307) involving applicants who are

wholly owned subsidiaries of railroad carriers permitting motor carrier operations by the motor carrier subsidiary which are unrestricted except for the reservation of jurisdictions by the Commission to impose in the future limitations, restrictions and modifications that may appear necessary.

11. The report and orders of the Interstate Commerce Commission dated November 22, 1954, July 6, 1955, and September 9, 1955, referred to in Paragraph No. 1 above, are, in the particulars set forth in Paragraph No. 10, based on an erroneous and improper and illegal construction of the Interstate Commerce Act, as amended, and are contrary to the requirements of the statute, in excess of the Commission's statutory powers, and amount to an abuse of the Commission's authority and discretion.

V.

Injury

12. The intervening plaintiffs and the employees represented by them are threatened with irreparable injury by the erroneous and unlawful actions of the Interstate Commerce Commission as enumerated in Paragraph No. 10 above, in that they are subject to loss of employment, displacement and other economic detriment if the Commission's orders are allowed to stand.

VI.

Prayer for Relief

WHEREFORE, intervening plaintiffs respectfully pray:

First: That, as provided by Section 2284 of Title 28, United States Code, this Court immediately notify the Chief Judge of the United States Court of Appeals for [fol. 146] the District of Columbia Circuit who shall designate two other judges, at least one of whom shall be a circuit judge, to serve as members of a three-judge court to hear and determine this action.

Second: That process issue against the defendant, the United States of America; that service of a copy of the complaint be made upon the Attorney General of the

United States, the United States Attorney for the District of Columbia, and the Interstate Commerce Commission; and that after answer by the defendants and after not less than five days' notice to the parties the application herein be given precedence and assigned for hearing at the earliest practicable day as provided by Section 2284 of Title 28, United States Code.

Third: That upon hearing of this action, judgment issue enjoining, annulling and setting aside as unlawful and void the challenged report and orders of the Interstate Commerce Commission dated November 22, 1954, July 6, 1955, as corrected July 6, 1955, and September 9, 1955.

Fourth: That the intervening plaintiffs be given such other, further, general, and different relief as the nature of the case may require and as the Court may deem just and proper.

Respectfully submitted, s/ Clarence M. Mulholland, 741 National Bank Building, Toledo 4, Ohio, s/ Edward J. Hickey, Jr., s/ William G. Mahoney, s/ James L. Highsaw, Jr., 620 Tower Building, Washington 5, D. C., Attorneys for the Brotherhood of Railroad Trainmen and the Order of Railway Conductors and Brakemen of America.

Of Counsel, Mulholland, Robie & Hickey, 741 National Bank Building, Toledo 4, Ohio.

October 3, 1955.

ANSWER OF UNITED STATES OF AMERICA TO COMPLAINT IN INTERVENTION OF RAILWAY LABOR EXECUTIVES' ASSOCIATION—Filed November 16, 1955

Comes now the defendant the United States of America, and for its answer to the complaint of Railway Labor Executives Association, intervener as plaintiff herein, filed in the above-entitled cause, admits, denies and alleges as hereinafter set forth:

I

Admits the allegations contained in Paragraphs 1, 2, 3, 4, 5, and 6 of the complaint in intervention.

II

Admits the allegations contained in Paragraph 7 of the complaint in intervention, except that this defendant denies the interpretation placed upon the report and orders of the defendant Interstate Commerce Commission and refers to the copies of the report and orders as attached to the original complaint filed by American Trucking Associations, Inc., and designated therein as Appendices A and B, [fol. 151] for a full and complete statement of the tenor and import of said report and orders; and except that this defendant denies that, by virtue of said orders, detriment will result to the rail operations of Chicago, Rock Island and Pacific Railroad Company and of the employees thereof; and on this point this defendant alleges that the intervening plaintiff, Railway Labor Executives' Association, failed to present any evidence of such detriment in the hearings before the defendant Interstate Commerce Commission.

III

Admits the allegations contained in Paragraph 8 of the complaint in intervention.

IV

Denies the allegations contained in Paragraph 9 of the complaint in intervention that injury will result to the employees represented by the intervening plaintiff unless said report and orders are suspended, annulled and set aside and issuance of a certificate authorized thereunder be enjoined or, if issued, be declared invalid.

V

Denies each and every allegation contained in Paragraph 10 of the complaint in intervention, and particularly and categorically denies that said report and orders of the defendant Interstate Commerce Commission of November 22, 1954 and July 6, 1955, are illegal and void for the reasons assigned in sub-paragraphs (a) to (f), inclusive, of said Paragraph 10, or for any other reason or reasons.

VI

Denies the allegations contained in Paragraphs 11 and 12 of the complaint in intervention.

[fol. 152] VII

This defendant alleges that all of the parties to the proceedings before the defendant Interstate Commerce Commission were given a full and complete hearing; that the findings and conclusions contained in the report dated November 22, 1954, and the order entered on the same date, and the order denying the petition for reconsideration entered July 6, 1955, were and are fully supported and justified by the evidence submitted in said proceedings; that in making said report the defendant commission carefully considered the National Transportation Policy and considered and weighed carefully, in the light of its own knowledge and experience, each fact, circumstance and condition called to its attention on behalf of the parties

Civil Action No. 3171–55

IN UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

AMERICAN TRUCKING ASSOCIATIONS, INC., ET AL., Plaintiffs

v.

UNITED STATES OF AMERICA and INTERSTATE COMMERCE COMMISSION, ET AL., Defendants

MEMORANDUM OPINION—January 11, 1956

Before PRETTYMAN, Circuit Judge, and PINE and HOLTZOFF, District Judges, sitting as a statutory three-judge court.

PRETTYMAN, *Circuit Judge*: The Chicago, Rock Island and Pacific Railroad Company is a through trunk-line railroad operating, so far as is here pertinent, across the State of Iowa from Davenport to Council Bluffs. It owns a subsidiary, called herein "Motor Transit", which owns operating rights and property as a motor carrier on routes paralleling or stemming from the Railroad route. The motor carrier certificates have heretofore contained limitations requiring that the motor service be auxiliary or supplementary to the rail service, but those limitations were stayed and have never been enforced. The motor carrier applied [fol. 178] for a certificate without the restrictions. The application was opposed by other motor carriers. After extensive proceedings the Interstate Commerce Commission granted the application, subject to the conditions that there might be attached such reasonable terms, conditions and limitations as the public convenience and necessity might require and that all contractual arrangements with the Railroad should be reported to the Commission and be subject to its revision. Petition for reconsideration having been denied, this action to set aside the order was brought by motor carriers operating in the same general area as Motor Transit.

to said proceedings by their respective counsel or otherwise; that said report and orders were not made or entered either arbitrarily or unjustly or contrary to law; that in making said report and orders the defendant Commission did not exceed the authority conferred upon it by law; and this defendant denies each and every allegation contained in the complaint in intervention in conflict with the allegations of this paragraph; and, except as expressly admitted in this answer, this defendant denies each and all of the allegations of the complaint in intervention.

WHEREFORE, having fully answered, this defendant, the United States of America, prays that the relief sought in the complaint in intervention be denied and that the complaint in intervention be dismissed with costs, assessed against the intervening plaintiff, and that it have such other, further and different relief as to the Court may seem meet, just and equitable in the premises.

Stanley N. Barnes, Assistant Attorney General, Leo A. Rover, United States Attorney, s/ James E. Kilday, s/ Charles S. Sullivan, Jr., Attorneys, Attorneys for the Defendant the United States of America.

[Title omitted]

ANSWER OF UNITED STATES OF AMERICA TO COMPLAINT IN INTERVENTION OF BROTHERHOOD OF RAILROAD TRAINME. AND ORDER OF RAILWAY CONDUCTORS AND BRAKEMEN OF AMERICA—Filed November 16, 1955

Comes now the defendant the United States of America, and for its answer to the complaint of Brotherhood of

The nub of the controversy is in two parts, (1) whether the Commission has power to grant a certificate to a motor carrier wholly owned by a railroad without a restriction that the service shall be auxiliary or supplementary to the railroad service and (2), if so, whether the findings of the Commission to the effect that the public convenience and necessity justified the grant in the present case were supported by evidence in the record.

Two sections of the Interstate Commerce Act, as now amended, are involved. Section 5(2)(b)[1] provides that, whenever a carrier by railroad, or its subsidiary, is an applicant for approval of a transaction involving a motor carrier, the Commission shall not approve unless *if* finds, *inter alia,* that the transaction will enable the carrier to use service by motor vehicle to public advantage in its operations. This section governs the acquisition of motor [fol. 179] carriers by railroads. Section 207(a) of the Act[2] provides that a certificate shall be issued to any qualified applicant therefor if it is found, *inter alia,* that the proposed service is or will be required by the present or future public convenience and necessity. This latter section (207-(a)) does not contain the requirement which appears in the former section (5(2)(b)) that the proposed service must be used in the operation of the railroad if a railroad is the applicant. It is agreed that the requirement that the service be used in the operation of the railroad applicant means that the service must be auxiliary or supplementary to the rail service.

Plaintiffs say that the requirement which appears in Section 5(2)(b) must be read into Section 207(a) and therefore controls in the issuance of certificates where a railroad, or its subsidiary, is the applicant. The Commission says the requirement is notably omitted from the terms of Section 207(a); that the policy, not the terms, of the requirement applies to the issuance of certificates under 207(a). It says a policy requirement is not so rigid as a flat requirement in terms but is flexible and permits a grant

---

[1] Formerly Sec. 213(a)(1), amended Aug. 2, 1949, 63 STAT. 485, 49 U.S.C.A. §5(2)(b).

[2] As enacted Aug. 9, 1935, 49 STAT. 551, 49 U.S.C.A. §307(a).

Railroad Trainmen and Order of Railway Conductors and Brakemen of America, interveners as plaintiffs herein, filed in the above-entitled cause, admits, denies and alleges as hereinafter set forth:

I

Admits the allegations contained in Paragraphs 1, 2, 3, 4, 5, and 6 of the complaint in intervention.

II

Admits the allegations contained in Paragraph 7 of the complaint in intervention, except that this defendant denies the interpretation placed upon the report and orders of the defendant Interstate Commerce Commission and refers to the copies of the report and orders as attached to [fol. 155] the original complaint filed by American Trucking Associations, Inc., and designated therein as Appendices A and B, for a full and complete statement of the tenor and import of said report and orders; and except that this defendant denies that, by virtue of said orders, detriment will result to the rail operations of Chicago, Rock Island and Pacific Railroad Company and of the employees thereof; and on this point this defendant alleges that the intervening plaintiffs, Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America, failed to present any evidence of such detriment in the hearings before the defendant Interstate Commerce Commission.

III

Admits the allegations contained in Paragraph 8 of the complaint in intervention.

IV

Denies the allegations contained in Paragraph 9 of the complaint in intervention that injury will result to the employees represented by the intervening plaintiffs unless said report and orders are suspended, annulled and set aside and issuance of a certificate authorized thereunder be enjoined or, if issued, be declared invalid.

V

Denies each and every allegation contained in Paragraph 10 of the complaint in intervention, and particularly and categorically denies that said report and orders of the defendant Interstate Commerce Commission of November 22, 1954, July 6, 1955, and September 9, 1955, are illegal and void for the reasons assigned in sub-paragraphs (a) to (f), inclusive, of said Paragraph 10, or for any other reason or reasons.

[fol. 156] VI

Denies the allegations contained in Paragraphs 11 and 12 of the complaint in intervention.

VII

This defendant alleges that all of the parties to the proceedings before the defendant Interstate Commerce Commission were given a full and complete hearing; that the findings and conclusions contained in the report dated November 22, 1954, and the order entered on the same date, and the order denying the petition for reconsideration entered July 6, 1955, and the order of September 9, 1955, were and are fully supported and justified by the evidence submitted in said proceedings; that in making said report the defendant Commission carefully considered the National Transportation Policy and considered and weighed carefully, in the light of its own knowledge and experience, each fact, circumstance and condition called to its attention on behalf of the parties to said proceedings by their respective counsel or otherwise; that said report and orders were not made or entered either arbitrarily or unjustly or contrary to law; that in making said report and orders the defendant Commission did not exceed the authority conferred upon it by law; and this defendant denies each and every allegation contained in the complaint in intervention in conflict with the allegations of this paragraph; and, except as expressly admitted in this answer, this defendant denies each and all of the allegations of the complaint in intervention.

in exceptional circumstances where the Commission finds that the public interest, convenience and necessity require the grant.

We agree with the contention of the Commission in the foregoing respect. The case concerns the issuance of a certificate.[3] Certainly the terms of the requirement as to auxiliary and supplementary service do not appear in Section 207(a). It is equally certain that the policy of the [fol. 180] requirement, being a basic policy in the statute, does apply. The difference between a rigid requirement and an applicable policy is one of flexibility and permits the Commission to be governed in exceptional circumstances by the needs of the public convenience and necessity.

This brings us to the second main part of the controversy. The traffic consists of intrastate traffic, rail originated traffic, and interstate "peddle" traffic. The rail originated traffic goes, through natural course of events, to Motor Transit. That service is largely auxiliary or supplementary to the train service and is not actually involved in the controversy. Certificates for the intrastate traffic are issued by the State of Iowa, and that State follows the usual rule of public utility regulation that where the business makes economically feasible only one carrier it will certificate only one. It has certificated Motor Transit for the intrastate traffic along the routes here involved, and so that traffic is not actually involved in the present controversy. The so-called interstate peddle operation is one in which the motor carrier, starting with a full truckload, moves interstate and distributes that load at various points of destination; or, in reverse, a truck picks up parts of loads at various points of origin and eventually transports interstate a full truckload. This is really the traffic which is involved in the pending case. The Commission found, in effect, that this peddle operation, standing alone, is not a profitable one and that the trend of motor carriers operating in Iowa has been to refrain from rendering this service;

---

[3] See Interstate Commerce Comm'n v. Parker, 326 U.S. 60, 89 L.Ed. 2051, 65 S. Ct. 1490 (1945); United States v. Rock Island Co., 340 U.S. 419, 428, 431, 442, 95 L.Ed. 391, 71 S. Ct. 382 (1951); United States v. Texas & Pac. Co., 340 U.S. 450, 95 L.Ed. 509, 71 S.Ct. 422 (1951).

that the business communities along the routes need this sort of service; and that Motor Transit, already having rail originated and intrastate traffic, can readily render this additional service. As a matter of fact Motor Transit has [fol. 181] operated since its first acquisition in 1938 without the restrictions here in issue. During that period it satisfactorily performed this particular service. Actually the result of sustaining the motor carriers' position would be a privilege to them of giving the service now rendered by Motor Transit if they so desire and refusing to give it when it is economically not feasible. That would not appear to serve the public interest.

We think the position of the Commission is well taken on the evidence. Voluminous testimony was produced. The findings are extensive. The conclusion that the grant appears necessary in the public interest is well founded. Judgment will be rendered for the defendants.

s/ E. Barrett Prettyman, s/ David A. Pine, s/ Alexander Holtzoff.

ANSWER OF INTERVENER ROCK ISLAND MOTOR TRANSIT COMPANY TO COMPLAINT IN INTERVENTION OF RAILWAY LABOR EXECUTIVES' ASSOCIATION— Filed November 17, 1955

Intervener Rock Island Motor Transit Company for answer to the complaint in intervention of Railway Labor Executives' Association states and shows the Court as follows:

1. This intervener admits the allegations of the paragraphs designated 1 and 2 of Division I of the complaint except that it alleges that its correct name is Rock Island Motor Transit Company and not Rock Island Transport Company.

2. This intervener admits the allegations in paragraphs designated 3, 4, 5 and 6 of Division II of the complaint in intervention except that this intervener alleges that the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees also represents employees of Rock Island Motor Transit Company and is

2284 and 2321-2325, Title 28, United States Code, consisting of the undersigned judges; and the Court having considered the pleadings and evidence, and the briefs and arguments of counsel for the respective parties; and being fully advised in the premises; and having on January 11, 1956, filed herein its opinion holding that the order of the Interstate Commerce Commission herein assailed is valid and that judgment will be rendered for defendants; now in accordance with the said opinion,

[fol. 183] IT IS HEREBY ORDERED, ADJUDGED AND DECREED That the relief sought herein be, and the same hereby is, denied, and judgment be, and the same hereby is, rendered for the defendants, with costs assessed against the plaintiffs and intervening plaintiffs.

This 27th day of January, 1956.

s/ E. Barrett Prettyman, United States Circuit Judge, s/ David A. Pine, United States District Judge, s/ Alexander Holtzoff, United States District Judge.

Approved as to form:

s/ Fritz R. Kahn, Attorney for American Trucking Associations, Inc., Regular Common Carrier Conference and Motor Carrier Plaintiffs.

s/ James L. Highsaw, Jr., Attorney for Railway Labor Executives' Association, Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen.

the duly designated collective bargaining representative under the Railway Labor Act for office and clerical em- [fol. 159] ployees by this intervener. This intervener alleges that under the Railway Labor Act it is the duty of said Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees to represent the best interests of its members who are employees of this intervener and that the best interests of said employees of this intervener who are members of said Brotherhood of Railway and Steamship Clerks will be in having the order of the Commission upheld and sustained.

3. This intervener admits it filed with the Interstate Commerce Commission an application under Section 207 of the Interstate Commerce Act for authority to engage in unrestricted motor carrier operations between Chicago, Illinois, and Omaha, Nebraska, including service to and from all intermediate points on U. S. Highway 6 between Silvis, Illinois, and Omaha, Nebraska, and certain other off-route points located on other highways including Cedar Rapids and Muscatine; denies that all of the named points were served at the time of the application by this intervener under authorization from the Interstate Commerce Commission which limited such operations to service auxiliary and supplemental to train service of the railroad company and alleges that this intervener continuously from and after April 1, 1938, served such points under authority issued by said Commission.

This intervener admits that the application resulted in a report and order of the Commission granting the application for unrestricted motor carrier operations between Silvis, Illinois, and Omaha, Nebraska, subject to the conditions referred to in paragraph 7 of the complaint in intervention. This intervener denies that said order results in any manner to the detriment of the rail operations of the Chicago, Rock Island and Pacific Railroad Company and the employees thereof.

[fol. 160] 4. This intervener alleges that the order of the Commission upon original submission was issued November 22, 1954, and admits that thereafter plaintiffs were granted permission by the Commission to intervene in the proceedings; admits that the Commission by its order dated July 6, 1955, denied reconsideration of its prior order.

5. This intervener admits that the intervening plaintiffs have exhausted their administrative remedies and that a certificate of public convenience and necessity in conformity to the report and orders of the Commission will be issued unless the order of the Commission be suspended, annulled or set aside as alleged in paragraph 9 of the complaint in intervention. This intervener denies that the issuance of a certificate to this intervener or operations thereunder will in any manner injure or damage the employees of Chicago, Rock Island and Pacific Railroad Company represented by the intervening plaintiffs and specifically alleges that the suspension and annulment of the order of the Commission will result in direct injury to employees of this intervener who are represented by the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

6. This intervener denies all and every allegation set forth in the paragraphs of the complaint in intervention designated as 10 and 11 embraced in Division IV of the complaint in intervention and alleges that the report and orders of the Interstate Commerce Commission are in accord with the statutes of the United States, are based upon substantial evidence and are in all respects lawful, proper and within the discretion of the Commission.

7. This intervener denies each, all and every allegation set forth in paragraph No. 12 of the complaint in inter- [fol. 161] vention and affirmatively alleges that the employees of this intervener who are employees of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees are subject to loss of employment, displacement and other economic detriment if the Commission's orders are set aside or annulled and that said organization is obligated to represent the best interests of said employees of this intervener under the terms and provisions of the Railway Labor Act.

8. This intervener for further answer to the complaint in intervention alleges that all parties to the proceeding before the Interstate Commerce Commission were given a full and complete hearing, that all findings and conclusions of the Commission were and are fully supported and justified by the evidence before the Commission in said proceed-

NOTICE OF APPEAL BY AMERICAN TRUCKING ASSOCIATIONS, INC., ET AL. TO THE SUPREME COURT OF THE UNITED STATES— Filed March 23, 1956

I

Notice is hereby given that American Trucking Associations, Inc., its Regular Common Carrier Conference, Iowa-Nebraska Transportation Company, Des Moines Transportation Company, Inc., Bruce Motor Freight, Inc., Western Transportation Company, McCoy Truck Lines, Inc., Brady Transfer and Storage Company, Motor Cargo, Inc., Gateway Transportation Company, and Bos Truck Lines, Inc., the plaintiffs above named, hereby appeal to the Supreme Court of the United States from the final judgment dismissing the complaint entered in this action on January 27, 1956.

This appeal is taken pursuant to 28 U.S.C.A. §1253.

II

The clerk will please prepare a transcript of the record in this cause for transmission to the clerk of the Supreme Court of the United States, and include in said transcript the following:

(a) Complaint of July 20, 1955, of plaintiffs, American Trucking Associations, et al., including Appendices A and B attached thereto, being the report and order, respectively, dated November 22, 1954, of the Interstate Commerce Commission in Docket No. MC–29130 (Sub-No. 70), *The Rock Island Motor Transit Company Common Carrier Application*;

(b) Motion of August 26, 1955, of Rock Island Motor Transit Company for leave to intervene as defendant, and answer (see Docket entry of October 26, 1955);

[fol. 184a] (c) Answer of September 15, 1955, of the Interstate Commerce Commission, including Appendix A, attached thereto, being the Commission's order dated July 6, 1955, in said Rock Island proceeding;

(d) Answer of September 16, 1955, of the United States of America;

(e) Motion of September 16, 1955, of Railway Labor Executives' Association for leave to intervene as plaintiff, and complaint (see Docket entry of October 24, 1955);

(f) Motion of September 19, 1955, of Chamber of Commerce of Davenport, et al., for leave to intervene as defendants, and answer (see Docket entry of October 27, 1955);

(g) Application of September 26, 1955, for designation of three-judge court;

(h) Motion of October 3, 1955, of Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America for leave to intervene as plaintiffs, and complaint, including Appendices 1 and 2, attached thereto, being the Commission's orders dated July 6, 1955, and September 9, 1955, respectively, in said *Rock Island* proceeding (See Docket entry of October 4, 1955);

(i) Order of October 4, 1955, signed September 30, 1955, convening a three-judge court for trial of the case;

(j) Order of October 24, 1955, granting leave to Railway Labor Executives' Association to intervene as plaintiff;

(k) Order of October 24, 1955, granting leave to Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America to intervene as plaintiffs;

(l) Motion of October 26, 1955, of Iowa State Commerce Commission for leave to intervene as defendant, and answer (See Docket entry of October 26, 1955);

(m) Order of October 26, 1955, granting leave to Rock Island Motor Transit Company to intervene as defendant;

(n) Order of October 26, 1955, granting leave to Iowa State Commerce Commission to intervene as defendant;

(o) Order of October 27, 1955, granting leave to Chamber of Commerce of Davenport, et al. to intervene as defendants;

(p) Answer of November 16, 1955, of the United States of America to complaint of intervener, Railway Labor Executives' Association;

ings; that in arriving at its findings and conclusions the Commission considered and carefully weighed in the light of its own knowledge and experience and the evidence, all facts, circumstances and conditions called to its attention in said proceeding; that in making and entering its report and orders defendant Commission acted within the authority conferred upon it by law and that said report and orders of the Commission were in all respects proper and in accord with the statutes of the United States.

WHEREFORE, having fully answered the complaint in intervention of Railway Executives' Association this intervener prays that the relief sought by the complaint in intervention be denied; that said complaint in intervention be dismissed; that the costs of the proceedings be assessed against the intervener Railway Labor Executives' Association and that the defendant and interveners on the side of defendants have such other and further relief as to the [fol. 162] Court may seem just and equitable in the premises.

ANSWER OF INTERVENER ROCK ISLAND MOTOR TRANSIT COMPANY TO COMPLAINT IN INTERVENTION OF BROTHERHOOD OF RAILROAD TRAINMEN AND ORDER OF RAILWAY CONDUCTORS AND BRAKEMEN OF AMERICA—Filed November 17, 1955

Intervener Rock Island Motor Transit Company for answer to the complaint in intervention of Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America states and shows the Court as follows:

1. This intervener admits the allegations of the paragraphs designated 1 and 2 of Division I of the complaint except that it alleges that its correct name is Rock Island Motor Transit Company and not Rock Island Transport Company.

2. This intervener admits it filed with the Interstate Commerce Commission an application under Section 207 of the Interstate Commerce Act for authority to engage in unrestricted motor carrier operations between Chicago, Illinois, and Omaha, Nebraska, including service to and from all intermediate points on U. S. Highway 6 between Silvis, Illinois, and Omaha, Nebraska, and certain other off-route points located on other highways including Cedar [fol. 164] Rapids and Muscatine, Iowa; denies that all of the named points were served at the time of the application by this intervener under authorization from the Interstate Commerce Commission which limited such operations to service auxiliary and supplemental to train service of the railroad company and alleges that this intervener continuously from and after April 1, 1938, served such points under authority issued by said Commission.

This intervener admits that the application resulted in a report and order of the Commission granting the appli-

(q) Answer of November 16, 1955, of the United States of America to complaint of interveners, Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America;

(r) Answer of November 17, 1955, of the intervener, [fol. 184b] Rock Island Motor Transit Company to complaint of intervener, Railway Labor Executives' Association;

(s) Answer of November 17, 1955, of the intervener, Rock Island Motor Transit Company to complaint of interveners, Brotherhood of Railroad Trainmen and Order of Railroad Conductors and Brakemen of America;

(t) Answer of November 19, 1955, of the Interstate Commerce Commission to complaint of intervener, Railway Labor Executives' Association;

(u) Answer of November 19, 1955, of the Interstate Commerce Commission to complaint of interveners, Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America;

(v) Notice setting the case for trial on December 15, 1955;

(w) Transcript of testimony, and exhibits, before the Interstate Commerce Commission in said *Rock Island* proceeding;

(x) Certified copy of proposed report, served April 21, 1953, of Examiner T. K. Carpenter of the Interstate Commerce Commission in said *Rock Island* proceeding;

(y) Opinion of January 11, 1956;

(z) Judgment of January 27, 1956; and

(aa) This notice of appeal.

III

The following questions are presented by this appeal:

1. Whether the record before the Interstate Commerce Commission in Docket No. MC-29130 (Sub-No. 70), *The Rock Island Motor Transit Company Common Carrier Application* supports the Commission's report (63 M.C.C. 91) and order of November 22, 1954, authorizing unrestricted motor carrier operations by the Rock Island Motor Transit Company, a wholly-owned subsidiary of the Chi-

cago, Rock Island and Pacific Railroad Company, throughout the entire territory served by the parent railroad?

2. Whether the Interstate Commerce Commission, after authorizing the performance of restricted motor-carrier service by a railroad affiliate over routes acquired by purchase under Section 5(2)(b) of the Interstate Commerce Act (49 U.S.C. §5(2)(b)) may void such restrictions and authorize the performance of an unlimited motor-carrier service over the same routes through approval of an application subsequently filed by the same rail affiliate under Section 207 of the Interstate Commerce Act (49 U.S.C. §307)?

3. Whether, in any event, the Interstate Commerce Commission, in authorizing the performance of motor-carrier service by railroads or their affiliates, is required by the [fol. 184c] provisions of the Interstate Commerce Act and the National Transportation Policy to limit the motor service to be rendered to that which is auxiliary to or supplemental of the rail service of the parent railroad?

cation for unrestricted motor carrier operations between Silvis Illinois, and Omaha, Nebraska, subject to the conditions referred to in paragraph 7 of the complaint in intervention. This intervener denies that said order results in any manner to the detriment of the rail operations of the Chicago, Rock Island and Pacific Railroad Company and the employees thereof.

4. This intervener alleges that the order of the Commission upon original submission was issued November 22, 1954, and admits that thereafter plaintiffs were granted permission by the Commission to intervene in the proceedings; admits that the Commission by its order dated July 6, 1955, denied reconsideration of its prior order.

5. This intervener admits that the intervening plaintiffs have exhausted their administrative remedies and that a certificate of public convenience and necessity in conformity to the report and orders of the Commission will be issued unless the order of the Commission is suspended, annulled or set aside as alleged in paragraph 9 of the complaint in intervention. This intervener denies that the issuance of a certificate to this intervener or operations thereunder will in any manner injure or damage the employees of [fol. 165] Chicago, Rock Island and Pacific Railroad Company represented by the intervening plaintiffs.

6. This intervener denies all and every allegation set forth in the paragraphs of the complaint in intervention designated as 10 and 11 embraced in Division IV of the complaint in intervention and alleges that the report and orders of the Interstate Commerce Commission are in accord with the statutes of the United States, are based upon substantial evidence and are in all respects lawful, proper and within the discretion of the Commission.

7. This intervener denies each, all and every allegation set forth in paragraph 12 of the complaint in intervention.

8. This intervener for further answer to the complaint in intervention alleges that all parties to the proceeding before the Interstate Commerce Commission were given a full and complete hearing, that all findings and conclusions of the Commission were and are fully supported and justified by the evidence before the Commission in said proceedings; that in arriving at its findings and con-

NOTICE OF APPEAL BY RAILWAY LABOR EXECUTIVES' ASSOCIATION TO THE SUPREME COURT OF THE UNITED STATES—Filed March 26, 1956

I.

Notice is hereby given that the Railway Labor Executives' Association, et al., intervening plaintiffs in the above captioned case, hereby appeal to the Supreme Court of the United States from the final judgment entered in this action on January 27, 1956, denying plaintiffs the relief sought therein and rendering judgment for the defendants.

This appeal is taken pursuant to 28 U.S.C., Section 1253.

[fol. 184g] II.

In a notice of appeal filed in this case on March 23, 1956, the plaintiffs, American Trucking Associations, Inc., et al., have requested the Clerk to prepare a transcript of the record in this cause for transmission to the Clerk of the Supreme Court of the United States and have designated the items for inclusion therein.

The intervening plaintiffs adopt such designation of record for purposes of appeal as their own and hereby incorporate it herein. In order to avoid sending two records to the Supreme Court covering the same items, the intervening plaintiffs, whose notice of appeal is hereby given, state that they will rely on appeal on the transcript of record in this cause which the plaintiffs, American Trucking Associations, Inc., et al., have already requested be transmitted to the Clerk of the Supreme Court of the United States. The intervening plaintiffs request that there be

clusions the Commission considered and carefully weighed in the light of its own knowledge and experience and the evidence, all facts, circumstances and conditions called to its attention in said proceedings; that in making and entering its report and orders defendant Commission acted within the authority conferred upon it by law and that said report and orders of the Commission were in all respects proper and in accord with the statutes of the United States.

WHEREFORE, having fully answered the complaint in intervention of Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America this intervener prays that the relief sought by the complaint in intervention be denied; that said complaint in intervention [fol. 166] be dismissed; that the costs of the proceeding be assessed against the intervener Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America and that the defendant and interveners on the side of defendants have such other and further relief as to the Court may seem just and equitable in the premises.

included in the transmission to the Supreme Court this notice of appeal.

III.

The following questions are presented by this appeal:

1. Where the Interstate Commerce Commission has approved the acquisition of independent motor carriers and their operating rights by a wholly owned subsidiary of a railroad subject to restrictions on the operating rights thus acquired limiting the operations of the railroad subsidiary thereunder to services which are auxiliary to or supplemental of the railroad's train service in accordance with the requirements of the former Section 213 and present Section 5(2)(b) of the Interstate Commerce Act, does the Interstate Commerce Commission have authority thereafter to remove those restrictions without regard to the requirements of such sections of the statute and authorize the railroad subsidiary to operate an unrestricted motor carrier service over the same routes through the guise of a certificate proceeding under Section 207(a) of the Act? [fol. 184h] 2. Whether, in any event, the Interstate Commerce Commission, in authorizing the performance of motor carrier service by a railroad subsidiary, pursuant to either Section 5(2)(b) of the Interstate Commerce Act or Section 207(a) of such Act, is required by the provisions of the Interstate Commerce Act and the National Transportation Policy to limit such motor service to that which is auxiliary to or supplemental of the rail service of the parent.

Respectfully submitted, s/ Edw. J. Hickey, Jr., s/ James L. Highsaw, Jr., Clarence M. Mulholland, 620 Tower Building, Washington 5, D. C., Attorneys for Intervening Plaintiffs, National Labor Executives' Association, et al.

ANSWER OF INTERSTATE COMMERCE COMMISSION TO COMPLAINT IN INTERVENTION BY RAILWAY LABOR EXECUTIVES' ASSOCIATION—Filed November 19, 1955

Comes now the defendant the Interstate Commerce Commission, hereinafter called the Commission, and for its answer to the complaint of Railway Labor Executives' Association, intervener as plaintiff herein, filed in the above-entitled cause on September 16, 1955, admits, denies and alleges as hereinafter set forth:

I.

Admits the allegations contained in Paragraphs 1, 2, 3, 4, 5, and 6 of the complaint in intervention.

[fol. 168] II.

Admits the allegations contained in Paragraph 7 of the complaint in intervention, except that the Commission denies the allegations of the second sentence of said Paragraph 7, and alleges that at the time of the filing of the application in question, on October 26, 1951, the points involved in said application were being served by, and are still being served by, The Rock Island Motor Transit Company pursuant to temporary authorization by the Commission, pending the outcome of the instant action, which temporary authority was and is subject to a maximum weight limitation of 2,000 pounds per shipment, later changed to 5,000 pounds per shipment, and subject to a restriction that no shipment may be transported by applicant between Chicago, Illinois, and Omaha, Nebraska, nor

ORDER AS TO CERTIFIED TRANSCRIPT, EXHIBITS AND PROPOSED REPORT—Filed March 27, 1956

This cause came on to be heard on motion of Peter T. Beardsley, attorney for plaintiffs (appellants), that the transcript of testimony and exhibits before the Interstate Commerce Commission and the proposed report, served April 21, 1953, of Examiner T. K. Carpenter of the Interstate Commerce Commission, as duly certified by the Secretary of the Interstate Commerce Commission, used at the hearing of the action, be sent to the Supreme Court of the United States in lieu of a copy thereof, and it appearing to the court that the certified transcript, exhibits and proposed report should be inspected by the Supreme Court of the United States,

IT IS ORDERED that the original transcript, exhibits and proposed report be forwarded to the Supreme Court as part of the record on appeal in lieu of copies thereof.

David A. Pine, Judge.

Dated: This 27th day of March, 1956.

[fol. 184m] Clerk's Certificate to foregoing transcript omitted in printing.

between any of the following points, or through, or to, or from, more than one of said points: Omaha, and collectively, Davenport, Bettendorf, Rock Island, Moline, and East Moline. The Commission further denies the interpretation placed by the intervening plaintiff in the fourth sentence of said Paragraph 7 upon the report and orders of the Commission and refers the Court to the copies of the report and orders as attached to the original complaint filed by American Trucking Associations, Inc., and designated therein as Appendices A and B, for a full and complete statement of the tenor and import of said report and orders. The Commission further denies that, by virtue of said orders, detriment will result to the rail operations of Chicago, Rock Island and Pacific Railroad Company [fol. 169] and of the employees thereof, on which point the Commission alleges that the intervening plaintiff, Railway Labor Executives' Association, failed to present any evidence of such detriment in the hearings before the Commission.

III.

Admits the allegations contained in Paragraph 8 of the complaint in intervention.

IV.

Denies the allegations contained in Paragraph 9 of the complaint in intervention that injury will result to the employees represented by the intervening plaintiff unless said report and orders are suspended, annulled and set aside and issuance of a certificate authorized thereunder be enjoined or, if issued, be declared invalid.

V.

Denies each and every allegation contained in Paragraph 10 of the complaint in intervention, and particularly and categorically denies that said report and orders of the Commission of November 22, 1954 and July 6, 1955, are illegal and void for the reasons assigned in sub-paragraphs (a) to (f), inclusive, of said Paragraph 10, or for any other reason or reasons.

ORDER NOTING PROBABLE JURISDICTION—Filed October 8, 1956

The statements of jurisdiction in these cases having been submitted and considered by the Court, probable jurisdiction is noted. The cases are consolidated and a total of two hours allowed for oral argument. Counsel in No. 110 are invited to discuss the issue of standing to sue.

[fol. 185] BEFORE THE
INTERSTATE COMMERCE COMMISSION

Docket No. MC–29130, Sub-No. 70.

In the Matter of the Application of THE ROCK ISLAND MOTOR TRANSIT CO., 135 West Van Buren Street, Chicago 5, Ill. Common Carrier, Regular Routes.

TRANSCRIPT OF PROCEEDINGS OF MARCH 18, 1952

Met pursuant to notice, at 9:30 a. m.

BEFORE:
T. K. Carpenter, Examiner.

ALSO PRESENT:
David B. Long, State Commerce Commission, State of Iowa, Member, Joint Board No. 136.

VI.

Denies the allegations contained in Paragraphs 11 and 12 of the complaint in intervention.

VII.

The Commission further avers that its report and order of November 22, 1954, and its corrected order of July 6, [fol. 170] 1955, denying the petition of the intervening plaintiff for reconsideration thereof were within the scope of the statutory powers and authority delegated to it by the Interstate Commerce Act, and particularly within sections 207(a) and 208(a) thereof (49 U.S.C. 307(a) and 308(a)), and avers that its findings and conclusions therein were and are fully supported and justified by substantial evidence in the record made before the Commission in the proceeding in Docket No. MC–29130 (Sub No. 70); and the Commission further avers that in making and in denying reconsideration of the report of November 22, 1954, it gave careful consideration to the National Transportation Policy and to all of the contentions called to its attention in said proceeding by counsel for the intervening plaintiff, that the said report and orders were and are not unreasonable, arbitrary, capricious, discriminatory, or in abuse of discretion, and that no constitutional or statutory rights, powers, privileges, or immunities belonging to the intervening plaintiff were infringed in any manner by said report and orders of the Commission.

Wherefore, having fully answered the complaint of the intervening plaintiff, the defendant, the Interstate Commerce Commission, prays that the relief sought in the intervening complaint be denied and that the said complaint be dismissed.

s/ James Y. Piper, Assistant General Counsel, Interstate Commerce Commission, 12th St. and Constitution Ave., N.W., Washington 25, D.C.

ANSWER OF INTERSTATE COMMERCE COMMISSION TO COMPLAINT IN INTERVENTION BY BROTHERHOOD OF RAILROAD TRAINMEN AND ORDER OF RAILWAY CONDUCTORS AND BRAKEMEN OF AMERICA—Filed November 19, 1955

Comes now the defendant the Interstate Commerce Commission, hereinafter called the Commission, and for its answer to the complaint of Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America, interveners as plaintiffs herein, filed in the above-entitled cause on October 3, 1955, admits, denies and alleges as hereinafter set forth:

I.

Admits the allegations contained in Paragraphs 1, 2, 3, 4, 5, and 6 of the complaint in intervention.

[fol. 173]

II.

Admits the allegations contained in Paragraph 7 of the complaint in intervention, except that the Commission denies the allegations of the second sentence of said Paragraph 7, and alleges that at the time of the filing of the application in question, on October 26, 1951, the points involved in said application were being served by, and are still being served by, The Rock Island Motor Transit Company pursuant to temporary authorization by the Commission, pending the outcome of the instant action, which temporary authority was and is subject to a maximum weight limitation of 2,000 pounds per shipment, later changed to 5,000 pounds per shipment, and subject to a restriction that no shipment may be transported by applicant between Chicago, Illinois, and Omaha, Nebraska, nor between any of the following points, or through, or to, or from, more than one of said points: Omaha, and collec-

Q. And are you connected in any way with the applicant in this case, the Rock Island Motor Transit Company?

A. Yes; I am also president of the Rock Island Motor Transit Company.

Q. What is the relationship between the Rock Island Railroad and the Rock Island Motor Transit Company?

A. The Rock Island Motor Transit Company is a wholly owned subsidiary of the Rock Island Railroad.

Q. Mr. Farrington, will you just outline your experience in the transportation field and give us generally the positions which you have held and the duties which you have performed in connection with railroad companies?

A. Well, I started with the Chicago, Burlington and Quincy Railroad in 1910 in the track department. I held various positions as a foreman, roadmaster, trainmaster, superintendent, general superintendent, and general manager of the Texas lines.

I left the Burlington in 1936, came to the Rock Island as operating officer and continued in that capacity until July 1942 when I was made chief executive officer under the trustee and January 1, 1948, I was made president of the Rock Island Railroad.

[fol. 189] Q. You were chief operating officer for the trustees of the Chicago, Rock Island and Pacific Railway Company in the years 1936 to 1942, I believe.

A. That is correct; yes.

Q. And during that time one of the things that was done by the trustees was to acquire what was known as the White Line Motor Freight, a company operating across the State of Iowa and into Chicago, as I recall?

A. That is true.

Q. That acquisition was accomplished with Interstate Commerce Commission approval and the new owner took over, as I recall, on or about the 1st day of April 1938, is that correct?

A. That is approximately the date, as I recall it. I think the negotiations started sometime in 1937. Final acquisition took place in April 1938.

Q. Later during the period of your service as chief executive officer for the trustees, was there an additional acquisition known as the Fred-rickson acquisition?

tively, Davenport, Bettendorf, Rock Island, Moline, and East Moline. The Commission further denies the interpretation placed by the intervening plaintiffs in the fourth sentence of said Paragraph 7 upon the report and orders of the Commission and refers the Court to the copies of the report and orders as attached to the original complaint filed by American Trucking Associations, Inc., and designated therein as Appendices A and B, for a full and complete statement of the tenor and import of said report and orders. The Commission further denies that, by virtue of said orders, detriment will result to the rail operations of Chicago, Rock Island and Pacific Railroad Company and of the employees thereof, on which point the Commission alleges that the intervening plaintiffs, Brotherhood of Railroad Trainmen and Order of Railway Conductors and Brakemen of America, failed to present any evidence of [fol. 174] such detriment in the hearings before the Commission.

III.

Admits the allegations contained in Paragraph 8 of the complaint in intervention.

IV.

Denies the allegations contained in Paragraph 9 of the complaint in intervention that injury will result to the employees represented by the intervening plaintiffs unless said report and orders are suspended, annulled and set aside and issuance of a certificate authorized thereunder be enjoined or, if issued, be declared invalid.

V.

Denies each and every allegation contained in Paragraph 10 of the complaint in intervention, and particularly and categorically denies that said report and orders of the Commission of November 22, 1954, July 6, 1955, and September 9, 1955, are illegal and void for the reasons assigned in sub-paragraphs (a) to (f), inclusive, of said Paragraph 10, or for any other reason or reasons.

VI.

Denies the allegations contained in Paragraphs 11 and 12 of the complaint in intervention.

VII.

The Commission further avers that its report and order of November 22, 1954, and its corrected order of July 6, 1955, and its order of September 9, 1955, denying reconsideration thereof were within the scope of the statutory [fol. 175] powers and authority delegated to it by the Interstate Commerce Act, and particularly within sections 207(a) and 208(a) thereof (49 U.S.C. 307(a) and 308(a)), and avers that its findings and conclusions therein were and are fully supported and justified by substantial evidence in the record made before the Commission in the proceeding in Docket No. MC–29130 (Sub No. 70); and the Commission further avers that in making and in denying reconsideration of the report of November 22, 1954, it gave careful consideration to the National Transportation Policy and to all of the contentions called to its attention in said proceeding by counsel for the intervening plaintiffs, that the said report and orders were and are not unreasonable, arbitrary, capricious, discriminatory, or in abuse of discretion, and that no constitutional or statutory rights, powers, privileges, or immunities belonging to the intervening plaintiffs, or either of them, were infringed in any manner by said report and orders of the Commission.

Wherefore, having fully answered the complaint of the intervening plaintiffs, the defendant, the Interstate Commerce Commission, prays that the relief sought in the intervening complaint be denied and that the said complaint be dismissed.

s/ James Y. Piper, Assistant General Counsel, Interstate Commerce Commission, 12th St. and Constitution Ave., N.W., Washington 25, D. C.

s/ Robert W. Ginnane, General Counsel, Of Counsel.

[fol. 176] Certificate of Service (omitted in printing).

A. Yes. I don't recall at the moment the date of that acquisition.

Q. Now, Mr. Farrington, I will ask you to state in general the objects and purposes which you sought to accomplish in connection with the acquisition of the White Line Motor Freight Company and to a lesser extent with the Fred-rickson line in western Iowa.

[fol. 190] Mr. Fowler: That is objected to on the ground it is immaterial.

Exam. Carpenter: Objection overruled.

A. I would say by that time it became pretty apparent that the handling of l. c. l. traffic was a very expensive operation from a railroad standpoint, that to provide the necessary service in an economical manner it required a coordination of rail and truck operation.

I gave a good deal of thought to it and recommended to the trustees that we enter the trucking business to that extent. I assume that in the past nothing has been more or a greater economic waste than to take a 2,000- or 1,500-ton freight train and hold it at a station while they unloaded 4 or 5 hundred pounds of freight.

It was becoming more and more impossible to give the type of service to the local communities from the standpoint of merchandise handling through strictly rail operation. Both from the standpoint of economy and service, I felt that there were great possibilities of a coordinated service through the acquisition of truck lines.

By Mr. Howland:

Q. Now, generally, during the period that these properties have been owned and operated, has there been any effort to concentrate the l. c. l. business or secure control of the l. c. l. business in this territory to the exclusion of other carriers?

[fol. 191] A. We have never made any effort to go outside our own territory and do other than to hold the business which we had been handling by rail and which properly belonged, I felt, to the Rock Island Railroad and the Rock Island Motor Transit Company.

Q. In connection with that phase of the matter, Mr. Farrington, what is the fact as to whether the traffic solicitation forces of the railroad have solicited motor carrier freight for the Rock Island Motor Transit Company over these routes?

A. The rail traffic department has not in any way through their organization or otherwise attempted to solicit any freight for the motor transit. I am talking about our common carrier freig it.

Q. That is on motor carrier billing?

A. Yes.

Q. Then to what extent, if any, have the solicitation forces of the Rock Island Motor Transit Company solicited railroad freight to move by railroad?

A. You have got the same situation there. The two organizations are entirely separate. The motor transit traffic solicitors have not in any way attempted to solicit any or influence business to the Rock Island Railroad.

Q. Now, as a result of certain of the proceedings had before the Interstate Commerce Commission there have been imposed here certain so-called key-point restrictions on the rail freight operation; as I recall, all the key points [fol. 192] on the Fred-rickson and White Line routes have been imposed at Omaha, Des Moines, and collectively at the Quad Cities of Davenport and Bettendorf, Iowa, Rock Island, Moline, and East Moline, Ill. Are you familiar in a general way with those key-point restrictions?

A. In a very general way I am. I can't say that I understand them nor did I understand the purpose particularly. They have done this. They have prevented the flexibility, freedom of operation that would permit economical operation. They have affected to some extent the class of service we have been able to render.

Q. Will you explain in a little more detail how that has come about?

A. Well, for instance, you take the present moment, I think generally the truck operation, the volume of traffic flows from the east to the west and our trucks are running eastbound, say out of Des Moines or running out of Omaha, many times empty.

Your rail operation is just about the opposite. Your loaded movement is from the west to the east and your empty movement is largely from the east to the west. That is particularly true of boxcars.

In other words, we are hauling boxcars generally empty from the east to the west for loading eastbound. We are in a position where, for instance, at Des Moines our eastbound l. c. l. volume is not heavy. Running trucks practically empty. We could handle that l. c. l. which belongs to [fol. 193] the railroad on railroad billing from Des Moines to Chicago, but on account of the key-point restrictions we are not permitted to do that. We have to haul empty boxcars at a time of boxcar shortage from Chicago out here or a car which may be made empty here and should move on west or should move into this territory for grain loading, flour loading, cement loading, and so forth, but we are required to take these empty cars and move them against the normal tide with merchandise and light load merchandise from Des Moines to Chicago.

All that car movement, those car days, the handling of the delay and everything else is just a straight economic waste, and here we have gone through periods of car shortage when every car we had on the railroad was vitally needed, but because of this restriction we have been required to use them to handle light loads of merchandise from Des Moines to the east at the same time we are operating empty trucks in that direction.

I think that is about as good an example as I can give you on that.

Q. Now, during the recent months, the Rock Island Motor Transit Company has been given authority to continue operations on motor carrier billing with a maximum of 5,000 pounds for any one shipment. In your judgment, is an operation on motor carrier billing with a 5,000-pound maximum restriction a practical and feasible operation?

A. I think our experience speaks for itself. I think it is [fol. 194] absolutely impractical. I don't see any reason for that type of restriction. If we are going to operate a truck line and service these people the way we should serve them, we have to have enough flexibility and enough supporting overhead traffic to help pay for the operation.

The peddler operations, as you know, are very expensive operations. You need a certain amount of overhead traffic to support it. You need to be in a position to take shipments that are offered and permitted under the normal authority and a 5,000-pound limitation on any one shipment is just quite beyond my understanding. I don't know what the purpose is. We are here to perform service, take the business that is offered.

Q. Now, you have performed this service in the recent months with the 5,000-pound restriction. Without going into detail as to the figures at this time——

Mr. Howland: And I may say to the examiner and those present, the figures will be shown in detail.

By Mr. Howland:

Q. —but generally what have the results of the operation under the present authority shown from the standpoint of operating figures; that is, have they resulted in a deficit or a profit?

A. They have resulted in the worst financial deficit, reduction in revenue of about 30 percent, as I recall it. I don't know whether that is revenue or tonnage. I will let somebody else testify to that. The result has been most [fol. 195] unsatisfactory and gives every indication that it is impossible to support an operation of this character on that basis.

Q. Is there in prospect any increase in costs or has any increase in costs recently taken place which will continue into the future, to your knowledge?

A. The recent increase in wages was very substantial. I am not too familiar with the details other than the report that was made to me and the statement it would actually require around a 16-percent increase in rates just to cover the cost of these recent wage increases. Whether that is accurate or not I can't say.

Q. I would like to ask you, Mr. Farrington, in your judgment as a transportation man, whether it is practically feasible to operate a motor common carrier service and a coordinated rail service under the present restrictions im-

posed on the Rock Island Motor Transit Company, both with respect to weight limitations and key-point restrictions.

A. No; I would say that it would be impossible to operate on a profitable basis, anywhere near profitable basis. We have reached the point where we have not anticipated any great profit out of these operations. It has become more of a service operation, trying to take care of the territory and the people that we have been serving for years. We would like to be able to at least break even on the thing.

Q. What is your position with respect to being willing or [fol. 196] otherwise to perform the service if the restrictions are lifted to the extent that the service will be able to carry itself without incurring substantial deficits?

A. Well, naturally we would feel an obligation—I have felt an obligation—to provide the so-called peddler service to all these little communities up and down the line of our operations and we have spent since we have been in the business some $1,700,000 in equipment, and we would plan to continue to provide the service we have in the past and improve it as we could if conditions permit, if we could operate with a reasonable degree of flexibility and just on the same basis as ordinary common carriers can operate.

Q. In your opinion, can an adequate transportation service be given to these intermediate communities on authority which is restricted to rail billing and at rail rates alone?

A. I don't think from what I have been able to develop and my knowledge of the operation, and so forth, any of the truck lines have in the past, with one or two very minor exceptions, or have in recent years given what we call peddler service, this local service that we provide in these small towns which we have felt it was our obligation to assume and to provide to these communities.

There are two things that we can do, as I see it. We can operate strictly on rail billing without any key-point restrictions, which would be a somewhat reduced operation, cut [fol. 197] out all interchange with other truck lines—in other words, all interline business. That would hardly, from the cost standpoint, I would say, permit us to carry on the local service to the extent we have in the past.

If we are to carry on that type of service, local peddler service, take care of all these communities, we need the interline business, we need the overhead through business, the privilege to carry that load and help pay the cost of that operation.

Mr. Howland: You may cross-examine. Pardon me just a moment.

By Mr. Howland:

Q. Mr. Farrington, is there anything further you wish to add to your testimony other than as has been developed here?

A. Well, I think I would simply like to say that we have assumed this responsibility from the time our certificate was granted in 1938, we have tried to serve these communities and serve them well. We have tried to improve our equipment and have not stinted in providing the things necessary to provide this service. Why there will be some degree of restrictions, of course, is another matter, but I think we have the loyalty and the support of the communities that we have been serving. I think they appreciate it. I am sure they want the service to continue.

Exam. Carpenter: Cross-examine.

Cross-Examination.

[fol. 198] By Mr. Fowler:

Q. Mr. Farrington, if my memory serves me rightly, when the Rock Island Railroad originally initiated a program of truck operation, the request for authority from the regulatory bodies was based upon the statement that the purpose of it was to eliminate the expense of the way-freight operation and substitute trucks for way-freight service, supplemented by the further statement that there was very substantial saving to the railroad by reason of a substitution of truck for way-freight service. Is that your recollection of the situation when the railroads initially inaugurated this sort of a program?

[fol. 220] Q. Are you familiar with the application which has been filed here by the Rock Island Motor Transit Company for authority to operate as a motor carrier in this territory?

A. Yes; I am.

Q. You have been familiar with the service rendered by the Rock Island Motor Transit Company and its predecessor, the White Line Motor Freight Company, in the Davenport area ever since that service was inaugurated, have you not?

A. Yes; that is true. I filed some of the first tariffs for the White Line, helped them file and to comply with the law when it first went into effect in 1935.

Q. What is the fact as to whether the White Line Motor Freight Company was the first motor carrier to operate from Davenport westward to Des Moines and from Des Moines into Davenport on highway 6?

Mr. Fowler: Wait a minute.

By Mr. Fowler:

Q. You claim you know whether it was on the first certificated carrier in interstate commerce?

A. I haven't claimed anything yet.

Q. Do you have personal knowledge of it?

A. I can't say definitely that it was the first. I could say it was one of the first operating west of Davenport.

Mr. Fowler: The question is objected to on the ground that it isn't the best evidence, calls for hearsay, calls for the incompetent conclusion of the witness.

[fol. 221] Exam. Carpenter: Objection overruled. Let the answer stand.

By Mr. Howland:

Q. Mr. Cummins, I will ask you this: In what manner and in what respect are the shippers and receivers of freight at Davenport or in the Davenport area affected by the application which is here being heard?

Mr. Fowler: It is objected to for the reason it calls for an incompetent conclusion and opinion of the witness, no proper foundation having been laid.

A. I couldn't tell you frankly whether that basis was the primary basis of the application that was presented. I assume that there were statements that were included in the application to that extent.

Q. It is true, is it not, that by the substitution of trucks for way-freight service the Rock Island Railroad has realized very substantial savings?

A. To what extent do you mean, through the elimination of train miles?

Q. That is right.

A. I would say that generally the answer to that is "no." To the extent of elimination of car miles, the delay of cars, possibly some over-time on the locals, I would say the answer were "yes." There are some cases on some branch [fol. 199] lines where the service may have been somewhat reduced.

Q. Well, isn't it a fact that when you did inaugurate truck service that you eliminated a lot of the way-freight service on your railroad?

A. Not too much of it. I would say that we are providing pretty much the same local service today from the standpoint of switching, setting out, picking up cars, and so forth.

Q. Do you at the present time in this immediate territory which is involved in this application have a daily rail service to all of these points?

A. We have daily rail service through all of these points. We have some tri-weekly operation and some daily operations.

Q. Then I am mistaken when I assumed that the original purpose of your program to inaugurate truck service was based upon a substantial savings that the railroad would accrue by reason of the curtailment of its way-freight service?

A. No; you are not mistaken entirely on that. As I stated originally, there were two things that I think motivated our entering into the truck operation. One was the economic waste in handling peddler l. c. l. from the local freight train or freight train of any character, and the other was the need for improving the service because of the fact that a great deal of our business was being taken away by some of the truck lines that were operating.

Exam. Carpenter: Can you qualify the witness?

By Mr. Howland:

Q. Mr. Cummins, are you familiar with the transportation conditions which exist in the vicinity of Davenport, Iowa, at the present time?

A. Yes; I am.

Q. Are you familiar with the operations now conducted by the Rock Island Motor Transit Company into and out of Davenport, Iowa?

A. Yes, sir; I certainly am.

Q. Are you familiar with the proposals that are set forth in this application?

A. Yes, sir.

Q. And are you familiar with the operations of the Rock Island Motor Transit Company in Davenport as they have been conducted from 1938 up until about the month of August 1951 when the restrictions were imposed?

[fol. 222] A. Yes; I am.

Mr. Howland: I will repeat the question.

Exam. Carpenter: Let the reporter read it, or do you want——

Mr. Howland: I will ask the reporter to read that question to which the objection was interposed.

(Question read.)

Mr. Fowler: I want to renew the objection previously made and also the objection it is immaterial to the main issue in the case.

Exam. Carpenter: Objection overruled.

A. Davenport is interested in this application from an interstate standpoint in the movement of freight out of Davenport to points proposed in the application to be served in the application by the Rock Island Motor Transit, particularly on pool cars, the distribution of pool cars.

We have two firms with whom I am very closely associated and whose records from time to time I have inspected personally, who handle a large movement of pool cars, breaking bulk at Davenport, and shipped out, a large portion of it, over the Rock Island Motor Transit to the vari-

Q. Now, is this not also a fact, that in the early develop-
[fol. 200] ment of truck operations by the Rock Island Railroad, your position was that you wanted authority to enter the truck field purely as an auxiliary or supplemental service to the rail service?

A. We wanted to establish a coordinated service. We made an application to acquire the White Line with all its certificates which existed at the time as far as I can recall, and we were granted that authority which had certain restrictions on rail traffic, but we were granted, as I recall it, practically the full authority on motor billing that the White Line had.

Q. I appreciate your position in that respect. However——

A. We felt we needed both of them to support an operation of that character.

Q. What my question was, in the early development of this program, was it not a fact that the railroads were suggesting to the regulatory bodies that the only reason they wanted to enter the transportation field by motor truck was to conduct an operation which would be auxiliary and supplemental to the rail service?

A. Of course, I can't answer for the railroads as a whole. The Rock Island.

Q. Answer for the Rock Island.

A. That is what I did. I attempted to tell you what our purpose was. Yes; we wanted a coordinated operation to protect our l. c. l. traffic and because we felt we could generally handle the local business in a much more economical manner.

[fol. 201] Q. Do you feel that the application which is now pending before the Commission, giving effect to the amendment which you have just filed, is an application for an authority to enter into a motor carrier service which is supplemental and auxiliary to rail service?

A. Yes; I think it is a combination of both rail service and common carrier truck service. You must look back to the fact that these communities have been served for years by rail service. Business which has gone to the various truck lines which you represent, going to and from these communities——

ous points covered by U. S. highway 6 and the other routes in this application. That is interstate traffic and from an interstate standpoint we need that service.

Now, from the other angle, the Rock Island Motor Transit Company has been giving us daily service to a lot of these small points starting immediately west of Davenport [fol. 223] along U. S. highway 6. I made a check of that to Council Bluffs. I believe there are some 25 or 28 points that are entirely local to the Rock Island Motor Transit.

We have our immediate trade territory such as Durant, Walcott, Stockton, other points immediately west, and then distribution further west that is important to Davenport.

The service, as I say, has been daily. That has not been true with many of the truck lines recently in Iowa and also in Illinois.

If the restrictions are placed upon the Rock Island Motor Transit to the extent that interline shipments are not possible, that certain interstate traffic is taken from the operation and the operation, as Mr. Farrington indicated, becomes unprofitable and that service is curtailed, our daily service out of Davenport, it is going to be a very unhappy situation for us. We depend upon that. We want it for the future.

By Mr. Howland:

Q. I think I omitted to ask you, though, what generally is the type and character of your businesses that are particularly interested in this continuation of this service in the Davenport territory there.

A. Well, we have what we term distribution—that is the wholesalers. We have a large pool-car break at Davenport from many national concerns who break their pool cars there and distribute—I don't care to disclose certain trade secrets, but nationally advertised products are broken there. [fol. 224] In addition to that, we have quite an extensive manufacturing center there. Our manufacturing is quite diversified. We used to say we manufactured everything from a button to a locomotive. However, we lost the button plant, but we still make the locomotive.

We have a food industry, flour mills. We have foundries. We have many steel-working plants, fabricating plants.

Q. Yes, sir; we could have quite an argument about that.

A. —at one time was rail business which you have taken.

Q. Let me ask you this question: Is it your interpretation of this application, as you now have filed it, that it seeks authority to conduct a truck operation which is auxiliary and supplemental to the rail service?

A. Yes; I would say it was.

Q. And it is your position that you want to conduct an operation which is auxiliary and supplemental to rail service?

A. We want to conduct an operation of a character that will be supplementary to our rail service and at the same time will permit us to provide all of the necessary service to these particular communities that they ask us to provide.

Q. I assume there is no secret about the fact that the Rock Island Motor Transit Company has consistently lost money?

[fol. 202] A. No secret about the fact; yes. They have not consistently lost money.

Q. What is the situation at the present time?

A. They are consistently losing at the present time.

Q. Now, to what extent does the Rock Island Railroad subsidize the Rock Island Motor Transit Company? What I have reference to, does the Rock Island Railroad assume a certain part of the overhead of Rock Island Motor Transit which an independent motor carrier would have to assume out of its operating revenue?

A. The Rock Island Railroad assumes no expense of the Rock Island Motor Transit other than possibly what we might say would be chargeable to the Motor Transit. Probably, just from my knowledge of truck operations, that wouldn't involve too much.

Q. For example, the station facilities of the railroad are made available to Rock Island Motor Transit Company——

A. The station facilities are——

Q. —isn't that correct?

A. Yes; certain parts of them are leased.

Q. Is there any charge made for that?

A. In some cases, parts of the station facilities are leased to the Motor Transit.

Quite a diversified manufacturing in addition to the distribution such as food products and various merchandise.

Now, of course, the merchandise is the principal item we ship over the Rock Island Motor Transit Company.

Q. Has the Rock Island Motor Transit Company performed a regular transportation service in interstate commerce between Chicago and Davenport over the years?

A. Yes; that is correct.

Q. And, generally, what is the type and character of the service to your knowledge which the Rock Island Motor Transit Company has rendered, both from Chicago and the local service, to points west of Davenport that you have referred to?

A. Well, it is a daily service and to a large extent from Chicago overnight and west probably so far as Des Moines overnight or 24 hours.

Q. Has that been a satisfactory service as far as the shippers are concerned?

[fol. 225] A. It has been a satisfactory service, and we want it to continue as a daily service. Anything that will hurt that is going to jeopardize our interests.

Q. Do you know of any other transportation agency by motor carrier there at the Tri Cities which has given as satisfactory a service, both interstate and intrastate, into this territory west of Davenport and extending along U. S. highway 6 other than the Rock Island Motor Transit Company? Is there any other carrier that you know of that has given as——

Mr. Fowler: Just a moment, please. That is objected to as calling for an incompetent conclusion of the witness.

Exam. Carpenter: Objection overruled.

Mr. Robinson: I object further to receiving from this witness an answer with reference to intrastate service, comparing that with interstate service.

Exam. Carpenter: Objection overruled. Answer the question.

A. My answer is "no" as to daily service, quality of service, and the full number of points served. In other words, these peddle runs take in everything. We have lines out of Davenport to certain points where they give daily service overnight and then on certain of their peddle runs

Q. At any cost to Rock Island Motor Transit Company?
A. They have certain lease arrangements with them; yes.

Mr. Fowler: Mr. Howland, are you going to have an accountant on the stand who is familiar with this situation?

[fol. 203] Mr. Howland: Yes; there will be an accountant on the stand. I will show the situation with respect to the leasing of the facilities. There will be some other——

Mr. Fowler: I have a feeling, you understand, that the Rock Island Railroad is subsidizing the Rock Island Motor Transit Company to some extent, and if you are going to have an accountant I won't bother Mr. Farrington with it.

The Witness: Let's explore that to an extent. The Rock Island Motor Transit pays— They have very few joint officers. Those that they do, the Motor Transit pays a fair proportion of their salary. We compensate the Rock Island Motor Transit for all service they perform for the railroad either on a mileage basis or on the established scale basis. They rent what property they use of ours. We pay them for the use of any trucks in case of any work they perform for us.

I don't know of a single case where we really subsidize the Motor Transit except that we have advanced money in the early stages to acquire lines.

By Mr. Fowler:

Q. Well, Mr. Farrington, it must be a fact that certain of your physical facilities of the railroad are made available to the Rock Island Motor Transit either at no compensation or at a very inadequate compensation.

Mr. Howland: Now just——

Mr. Fowler: I didn't bother you, Mr. Howland, and I think Mr. Farrington and I can get along all right.

[fol. 204] Mr. Howland: I object to the question as argumentative, if the examiner please.

Exam. Carpenter: Had you finished the question?

Mr. Fowler: Read it, please.

(Question read.)

will give us only 1 day a week when we connect with that particular point for their overnight service or daily service from Davenport, so I would say that my answer would be that I know of no other one that so completely gives that satisfactory service.

[fol. 226] Mr. Howland: I think you may cross-examine. First, I will ask——

By Mr. Howland:

Q. Mr. Cummins, is there anything you wish to add as a transportation man to your testimony here?

A. None other except that we feel that it would be burdensome upon us to have the restrictions such as the limitation of weight or the key points or the other restrictions that have been proposed or are in effect today. We feel if those are continued, it will materially hurt our service.

Mr. Fowler: I move to strike the answer of the witness for the reason that it is an incompetent statement. He is incompetent to express an opinion, that it is merely hearsay and of general application.

Exam. Carpenter: Let the answer stand.

Cross-examine, Mr. Fowler.

I presume you are through.

Mr. Howland: Yes; I am through. Thank you.

Cross-examination.

By Mr. Fowler:

Q. Who are these pool-car shippers?

A. Well, two of the principal ones are the Merchants Transfer and Storage Company and the Roederer Transfer and Storage Company.

Q. Merchants Transfer and Storage Company of Davenport?

A. Both are at Davenport.

Q. Is the Merchants Transfer and Storage Company at Davenport?

[fol. 227] A. Yes, sir.

Q. What is the chief executive's name of the company?

By Mr. Fowler:

Q. For the value of the services?
A. I would say——

Mr. Howland: Just a minute. That is objected to as argumentative——
Exam. Carpenter: Objection overruled.
Mr. Howland: —in form. It is not proper cross-examination.
Exam. Carpenter: Objection overruled.

A. I would say this, that I am not really in a position to testify as to the details of some of these leases and arrangements, and so forth, but generally there are certain leases in effect and they pay certain rentals. There may be some cases where they make use of a few feet of space at a local station temporarily. I am not too positive. Mr. Peterson will give you all of that when he gets on the stand.

By Mr. Fowler:

Q. There is one thing more I would like to visit with you about. You made the statement, I think, that this peddle operation serving these small towns could not be conducted at present rates and under present costs profitably, in your opinion, as a transportation man.
A. That is right.
[fol. 205] Q. If that situation continues, it means then that the Rock Island Motor Transit Company will undergo a continuing loss on this particular operation that is involved here.
A. I said it could not be continued with the present restrictions. If it is supported by an overhead traffic, why, in all probability there will be sufficient revenue in it to continue it.
Q. Do you think that this operations, such as you are proposing here, could be continued by an independent motor carrier that did not have the advantages of a parent corporation such as this applicant has?
A. That I don't think I am in a position to answer. I don't know just how the independent motor carrier's costs are and under what circumstances they operate. It might

A. A. C. Schick is president.

Q. And the name of the other pool-car distributor?

A. Roederer Transfer and Storage Company.

Q. And that is located at Davenport?

A. Yes, sir.

Q. And the chief executive of that company?

A. J. Francis Roederer.

Q. Is that all?

A. Those are the principal ones.

Q. Now, as I understand it, that consists of a rail pool car originating at some eastern origin point and destined to Davenport where it is redistributed?

A. That is correct.

Q. By both rail and motor carrier to various points?

A. That is correct.

Q. And the shipments you have reference to are these aggregate shipments in a pool car to points located on highway 6?

A. Yes, sir.

Q. How far west would that sort of an operation go?

A. Well, generally, Des Moines or a little bit west of there. In some instances, all the way across the State.

Q. Largely, however, on the eastern end?

A. Well, I would say as far as Des Moines would be the [fol. 228] preponderance of it.

Q. What are these commodities, groceries?

A. Well, I don't like to give the individual names because I have some information that——

Q. I am not asking you for that.

A. It is foodstuffs, candies, confectionary. Oh, there are others.

Q. What are those?

A. I can't think of them right now. We had ball bearings, for example.

Q. What I am anxious to find out, is this a fair assumption, that it principally consists of foodstuffs, candies, and confectionary, confections?

A. Cigarettes, meters.

Q. Electric meters?

A. No; gas meters.

Q. Gas meters.

A. Soap and soap products.

be that some individual that was an owner-operator and operated his own truck could carry on an operation of that kind. I doubt if any of your large motor transit operators would enjoy having that type of business.

Q. Do you feel that the independent carriers who hold certificated authority over this route could compete on an even basis with the Rock Island Motor Transit Company in view of its relationship with its parent company?

A. What are you talking about now, this peddler service or general operation?

Q. I mean, to put it bluntly, could these independent motor carriers stay in business in competition with——

[fol. 206] A. They have, very successfully.

Q. All of the capital requirements of the Rock Island Motor Transit Company are supplied by the Rock Island Railroad?

A. All the capital requirements, the initial capital requirements.

Q. For instance, the equipment that is being purchased now, is that financed directly?

A. The equipment being purchased now, the Rock Island Motor Transit recently borrowed on their own note from the First National Bank of Chicago to finance certain equipment. On the other hand, there have been cases where the Rock Island Railroad has lent them the money on a note to buy equipment.

Q. Now, if I understood you correctly, you made the statement insofar as you knew that there was no physical transfer of freight which had been delivered to you on truck billing to rail car for transportation to destination, is that correct?

A. No; I don't understand your question. I don't think I made any such statement.

Q. Is this a fact, it is our understanding that freight which is tendered to the Rock Island Motor Transit Company on truck billing is frequently physically transported from origin to destination by freight car?

A. In the past we have handled a certain amount of freight to points such as Des Moines for distribution beyond by truck; yes.

Q. Now, I presume that those shipments are handled in that manner because of the fact that there is some saving in transportation charges?

A. Well, there are two factors involved. One is the matter of service and the other is the matter of charges, that is true. It is natural that as far as they can, they use carload and then distribute. That is good traffic practice.

[fol. 229] Q. All right, now, with respect to motor carrier service between Chicago and the Tri-City area at the present time, how many carriers are there operating between those two points rendering a daily service between Chicago and the Tri Cities in interstate commerce?

A. I think my last count was 27.

Q. Are those substantial carriers?

A. Yes; there are some.

Q. Are they giving a good service?

A. Yes.

Q. Now, with respect to such communities located on highway 6 west of Davenport, for instance Grinnell, do you have a substantial motor carrier service now from Davenport or in an interstate movement through Davenport and Moline to such a place as Grinnell, Iowa?

A. Yes; there are certain points on No. 6 where we do have other interstate service.

Q. That is a daily service, is it not?

A. In some instances it is. Others not.

Q. And such points as Grinnell?

A. Yes. Grinnel- has additional service.

Q. Newton?

A. I can give them all to you if you want them, Mr. Fowler.

Q. No.

A. Newton.

[fol. 230] Q. Suppose we develop that. The only point——

A. There are some. There was 28 on my count on 6 that did not have other service. I made a special study of that.

Q. Now——

A. Council Bluffs and Des Moines and others hav:.

Q. Now, perhaps you had better give us those 28 that you— Just a moment, so we can keep the record straight. What you are giving me now is a list of 28 points involved

Q. So there has been some intermingling of that sort?

[fol. 207] A. There has been some, but the Rock Island Motor Transit has paid the rail freight charges.

Q. I understand, but is that the practice now?

A. I doubt if we are doing very little of that now. The volume has diminished to such an extent that——

Q. Do you regard that sort of an arrangement as a tremendous competitive advantage?

A. No; I don't. Generally, the business of that character that we have handled has been railroad business that we have brought in by rail car and distributed locally by truck. I think there is no great advantage to that. That is open to anybody, any truck line. I think the railroad commercial rate on handling that business——

Q. Now, I understand this application as it now stands, the Rock Island Motor Transit Company and the Rock Island Railroad want to establish an integrated motor carrier service, in other words, a free and unrestricted motor truck operation, as well as a free and unrestricted railroad operation in this territory, is that correct?

A. I don't know how far your mean. g of "unrestricted" is concerned. The railroad operation is far from unrestricted.

Q. Let's forget the railroad for a minute then. What you are asking for here is an unrestricted motor carrier operation?

A. We are asking substantially for the authority that we previously had and operated under for some 10 years as far as the Motor Transit is concerned.

[fol. 208] Q. You are speaking again, I presume, of the litigation which has been going on over the old White Line certificates. Now, what I am asking you now is whether or not you aren't asking here——

Mr. Howland: Just a minute. Did you finish that last question?

Mr. Fowler: I beg your pardon.

Mr. Howland: Had you finished your last answer? I thought Mr. Fowler cut you off.

Mr. Fowler: If I did, I am sorry.

The Witness: If he did, I am sorry.

in this application which you have determined from the study you have made do not have any daily service in interstate commerce from your area in the Tri Cities?

A. From Davenport to this area.

Q. When you use the word "Davenport," you are talking about an interstate movement?

A. Yes.

By Mr. Howland:

Q. Except by the applicant's lines, is that right?

A. Except by the applicant's line; yes.

Adair, Altoona, Anita, Atalissa, Atlantic, Brooklyn, Casey, Colfax, Coralville, Dexter, Durant, Kellogg, Ladora, Lewis, Marengo, Menlo, Mitchellville, Oakland, Oxford, Stockton, Stuart, Tiffin, Victor, Walcott, West Liberty, Wilton, sometimes known as Wilton Junction, and Wiota.

By Mr. Fowler:

Q. Those are the points that you feel are now being presently served by the Rock Island Motor Transit Company only?

[fol. 231] A. That is right, out of Davenport.

Q. Now, what sort of rail service do you have on shipments originating from the Tri-City area to these points you have just named?

A. The rail service on the Rock Island to these points generally throughout Iowa is very poor.

Q. That isn't what I asked you, Mr. Cummins. Now, will you go back and tell me what is the rail service between the Tri-City area available for shipments originating in that area moving to the 28 points just mentioned by you, in interstate commerce?

A. From the checks I have had in the past, complaints we have had in the past, it will run from 6 to 12 days.

Q. Is it a fact that there is a daily rail service available from the Tri-City area to these points?

A. Now when you figure the over-all service; no. There are daily trains running on the line, but I am talking about the over-all service, Mr. Fowler.

Q. I understand. Now, I wish you would just answer the

Exam. Carpenter: Read the last answer; Mr. Reporter, please.

(Answer read.)

By Mr. Fowler:

Q. Then I wanted to ask this question: Be that as it may, the fact remains that what you are seeking here is authority to conduct a free and open and unrestricted motor carrier operation?

A. I don't think any operation is free and open and unrestricted. We want an operation with sufficient flexibility as we have outlines in our application so we can operate successfully and economically and serve the territory that we do serve in the manner that we should serve it.

Q. Well, what I have reference to is this. For instance, [fol. 209] I have here a copy of the certificate of convenience and necessity which was issued by the Commission to Rock Island Motor Transit Company on September 11, 1951, and it contains, with respect to this particular authority which you seek here, conditions or qualifications to this effect, first, that the service to be performed by the carrier should be limited to service which is auxiliary to or supplemental to rail service of the Chicago, Rock Island and Pacific Railroad. Now, are you asking to have that condition eliminated?

A. I don't know as I can answer. Is that the complete request we are making under that application?

Q. I don't believe I understand you. That is merely——

A. Have you read it all or is that——

Q. There are some more. I will read them.

A. That sets out our application, the purpose, as I understand it.

Q. My question was, is it your request here that that condition be eliminated, that qualification?

Mr. Howland: Mr. Examiner, the application, I submit, as amended, speaks for itself. It shows the authority that we seek, and I don't believe this is proper cross-examination of this witness to go into the details of what may have been imposed under the temporary operating authority. For that reason I object.

Exam. Carpenter: What certificate are you reading from, [fol. 210] Mr. Fowler?

Mr. Fowler: From the one issued on the 11th of September 1951, and the only purpose of my inquiry of Mr. Farrington was to ascertain——

Exam. Carpenter: In what docket number?

Mr. Fowler: In this docket number.

Exam. Carpenter: It is the sub-69 TA?

Mr. Rosenbaum: It is the certificate issued in the Lee docket.

The Witness: I am fairly unfamiliar with that certificate.

Mr. Fowler: I have a right, I think, Mr. Examiner, to ask Mr. Farrington, who represents both the railroad and the subsidiary truck outfit, whether or not it is his understanding what sort of an operation he hopes he will be authorized to conduct, whether this type of a condition which I have just read is to be eliminated or is to remain in the certificate which he hopes to get, which I have a perfect right to inquiry. I am not going to quibble about it.

Mr. Howland: Isn't that a legal conclusion about it, if the examiner please?

Mr. Fowler: There is nothing legal about it.

Exam. Carpenter: What he is trying to do is to determine what Mr. Farrington thinks the present application covers.

Mr. Fowler: That is not true at all. I don't know what type of operation he will have after he gets the authority [fol. 211] he hopes to get. Will it be supplemental and auxiliary to rail service?

Exam. Carpenter: Motion overruled. Go ahead and answer if you can.

A. Part of it will be; yes.

By Mr. Fowler:

Q. All right, it will serve no point that is not presently served by the Rock Island Railroad?

A. Not that I know of. If there are any off-line points in that application— We were asked to serve one or two small communities. I don't know whether there are or not.

Mr. Fowler: In other words, you do have authority now to conduct a motor truck operation on Chicago traffic from Chicago, say to Iowa City?

Mr. Howland: That is right. We are performing the service.

Mr. Fowler: Okay. I didn't understand it.

The Witness: I didn't know what you were talking about there, whether the present temporary authority or whether you were talking about the service they had rendered in the past prior to that.

Mr. Fowler: That is all I have.

By Mr. Cohn:

Q. As I understand it, Mr. Cummins, your association does not represent shippers on the Illinois side but is [fol. 235] confined——

A. No; we do not.

Q. That is, its members are within the Davenport community or Bettendorf or East Davenport, is that correct?

A. That is correct.

Q. What percentage of your members are shippers, in the shipper category, would you say?

A. Are you talking about the Chamber of Commerce or the traffic bureau?

Q. I am talking about the Chamber of Commerce.

A. That is pretty hard to say. We have what we call multiple membership. One firm may have 15 members. It is pretty hard to say that.

Q. Mr. John H. Logan testified previously, and he is your assistant, is he not——

A. That is correct.

Q. —in the traffic bureau, and if he stated that 25 percent of the members are shippers, would you agree to that figure as being substantially correct?

A. Eliminating what we call our multiple membership, the firms represented, I would say "yes."

Q. What is the membership of the Chamber of Commerce itself at the present time?

A. Around 17 or 18 hundred. If you want the figures, we service directly about 175 firms there that use our services.

Mr. Howland: There are a few places such as Griswold and Coralville and one or two others that I can't now recall that are not presently stations on the railroad. Griswold was once a station on the railroad and the rail line was abandoned. Coralville, I think the rail line has been taken up at that point.

By Mr. Fowler:

Q. Then I believe, Mr. Farrington, you have already testified you are seeking to have these key-point restrictions eliminated which have the effect of prohibiting a complete truck service from, say, Chicago to Omaha?

A. Yes. Particularly burdensome so far as a restriction on rail billing. That is the thing, as I explained, that restricts us from taking advantage of the equipment that is available and utilizing it.

Q. Well, what this restriction means, as I understand [fol. 212] it, is that the railroad could not originate freight at Chicago destined to Omaha and transport it throughout the route by truck; is that your understanding of it?

A. I think we are primarily interested in some of these intervening key points from the railroad standpoint. One of the outstanding things is—I think it did apply at Omaha as well as at Des Moines—the fact that we have an empty eastbound movement on these trucks and we might just as well utilize the available space in those empty trucks to bring back this rail l. c. l. Instead of that, we are forced to use boxcars for an eastbound movement which is contrary to the normal movement.

I am pointing out your empty movement of boxcars is westbound for grain loading, flour loading, loading in the territory, and moves east. We are making a counter move. We are using a lot of car days unnecessarily when we utilize boxcars for the purpose of handling this comparatively light l. c. l. movement from west to east, in view of the fact we have empty trucks going over that same route and in the same direction.

Q. I think that is true. Now that, of course, is true of all of the transportation agencies. They all have an awful time getting back to Chicago, don't they, from this territory?

[fol. 236] Q. They are either shippers or receivers of freight, is that correct?

A. That is correct; yes, sir.

Q. Now, as I understand it, in the distribution of the pool cars, the shipments that are involved, the individual shipments, are relatively small in size or weight, are they not?

A. Not always. There are some that will run to 10 or 12 or 15 thousand pounds.

Q. What would be the average weight of one shipment that would be distributed in the pool car distribution service?

A. I don't believe I could estimate that, Mr. Cohn. It will vary.

Q. Well, would you estimate it as less than 2,000 pounds, the average weight?

A. I wouldn't know about the average, but the range would be from oh, probably 200 pounds, 150 pounds, up to 12 or 15 thousand pounds.

Q. What percentage of the shipments, if you know, would be over 2,000 pounds in size?

A. I couldn't say. I have inspected the trip sheets, records, and so forth, but I can't remember those details.

Q. Isn't it a fact that 90 percent of the shipments or more would be of a weight of 2,000 pounds or less in the pool car distribution service?

A. Well, as I say, I can't say. I can't give you an average [fol. 237] on it. I know the range.

Q. You wouldn't say whether that is a correct statement or not?

A. I couldn't say. No, sir; I don't know.

Q. Now, these 28 points that you mentioned in your testimony, as I understand, are points where you stated there is no daily motor carrier transportation service other than that rendered by the applicant in interstate transportation, is that right?

A. That is correct.

Q. There are, however, motor carriers with whom you are familiar who perform some transportation services from the Davenport area to some of these points, isn't that true?

A. Well, I don't believe there are any shown as performing any service. Of course, there may be service that you

A. No. On the railroad, we have a fine time because we load them up and we take them eastbound.

Q. I am talking about the motor carrier.

A. There is an opportunity that is offered and denied to [fol. 213] save a lot of boxcars, save a lot of economic waste in handling.

Q. You would, of course, have a terrific advantage over your competition if you were permitted to integrate your operations to that extent.

A. Why.

Q. You would be utilizing your facilities both ways while your competitor motor carriers would still have the problem of getting back to Chicago, wouldn't they, with pay freight?

A. You have opportunities which you take advantage of and which we go into a good deal of detail on, probably just as well we don't discuss, where you utilize your eastbound movement of your trucks. All we want to do—it isn't establishing an operation. It is an operation that is in existence. We can't take advantage of it. We are prevented from taking advantage of it.

Q. Were you familiar with the proceeding which the Commission had sometime ago in which they reopened your authority for the purpose of exploring what modifications should be made in these restrictions we have been talking about? It is my understanding that the Rock Island Railroad never responded to that invitation. Are you familiar with that situation?

A. No; I am not. I know nothing about it.

Mr. Fowler: That is all I have.

Exam. Carpenter: Any further cross-examination?

By Mr. Cohn:

Q. Mr. Farrington, I would like to inquire, if I may at this point, whether you are able to state at this time who [fol. 214] the common officers are of the railroad and of the applicant truck line. I understand you are president of both.

A. I am one of them, and then we have a fellow by the name of Swanson who is assistant to the operating vice president of the Rock Island Railroad and has a title, I

believe, of vice president of the Motor Transit. His salary is divided. Mr. Peterson, who is our general manager of our truck operations, holds no office actually. I think that is correct, isn't it, Mr. Peterson?

Mr. Peterson: I hold no office other than general manager in the Motor Transit.

The Witness: I don't think we have got any other joint officers——

By Mr. Cohn:

Q. Are there joint directors?

A. —except we may have some of our legal officers act jointly.

Q. Are there joint directors, to your knowledge, Mr. Farrington?

A. That is, directors that are also directors of the Rock Island Railroad?

Q. Yes, sir.

A. I think I am the only one.

Q. Are there joint employees, without naming specific ones, but are there joint employees of the railroad and of the trucking company?

A. I don't think so. There may be one or two. There isn't over one or two.

[fol. 215] Q. By filing of the application in its present form, Mr. Farrington, isn't the applicant actually seeking to do something more than the railroad had been doing in connection with rendering a transportation service to the various communities involved?

A. How far back——

Q. You went back to 1937 or thereabouts before the acquisition of the White and Fred-rickson lines. At that time you stated the railroad was performing a service to these various communities.

A. As I look at this picture, years ago we performed practically all the service to these communities. Then as the development on the trucks came on, of course the situation changed and changed for the better to a great extent like all developments.

It became very obvious that there were certain forms of transportation that you could perform with trucks much

more economically and expeditiously than you could by rail. We recognized that and we entered the trucking business with the idea of providing that type of service, so if you go back far enough we performed all the service in that territory.

There was a period, and there is a period today, we don't perform all truck service. We are trying to perform as much of the service as we can and hold the business which we have had.

Q. Well, as I understand it, you want to do more than just handle the traffic which would ordinarily or would [fol. 216] have moved over the rail facilities of the Rock Island Railroad; you also want to handle traffic which originates on and is probably transported by other truck lines, isn't that correct, independent truck lines?

A. You are talking about inter-line business?

Q. Yes.

A. Of course, that goes back to ancient history, too. That inter-line business was at one time inter-line freight business inter-lined by various railroads. As you go through this period of transition from rail to truck of this local service, your interchange changes from rail to rail to truck to truck.

Q. Well, what would prevent you from handling that type of service under a rail billing?

A. Well, we are not permitted, as I understand it. We have no such established arrangement.

Q. You are not permitted under the law, is that your understanding, Mr. Farrington?

A. I think we have no joint rates established:

Q. In other words, you have not filed any joint rates that would permit that type of handling, isn't that correct?

A. That may be the answer. I am no rate expert.

Q. You are not stating that you cannot lawfully handle that type of traffic by the filing of joint rates with motor carriers?

A. I would be afraid to give you a definite reply on that. I assume we could.

[fol. 217] Q. Are you familiar with the handling of the freight that moves over the applicant's lines on the docks at the various points where the docks are maintained by the applicant?

A. No; I am not except in a very general way. I couldn't give you any details.

Q. You would not know, for example, whether the handling, docking of the freight, would be performed by rail or by the trucking employees on the dock?

A. I know generally that there is a very strict division as to just how far each can handle what.

Mr. Cohn: I believe that is all I have, Mr. Farrington.

Exam. Carpenter: Any further cross-examination?

Any redirect?

Redirect Examination.

By Mr. Howland:

Q. Mr. Farrington, is it not true that with the decline in the l. c. l. rail traffic that some of the rail freight house facilities are unused or might not be used except for the use made of them by the Rock Island Motor Transit Company?

A. Yes. We have had far more capacity in most of our freight houses in recent years than we required. In fact, we have leased many to outside operations.

Q. Outfits such as feed concerns?

A. For storage.

[fol. 218] Q. General warehouse storage purposes?

A. Yes.

Q. And in some instances to truck lines?

A. Yes.

Q. Freight forwarders?

A. That is correct.

Mr. Howland: That is all I have.

Exam. Carpenter: Any re-cross?

You are excused, Mr. Farrington. Thank you.

(Witness excused.)

Exam. Carpenter: We will take a 5-minute recess.

(Short recess.)

Exam. Carpenter: We will proceed.

GEORGE M. CUMMINS was sworn and testified as follows:

Direct Examination.

By Mr. Howland:

Q. Will you state your name, please, so that we may all get it?

A. George M. Cummins.

Q. You live in Davenport, Iowa?

A. I do.

Q. And you have made your home there about how long?

A. About 40 years.

Q. And what has been your occupation during the period you have lived in Davenport the last 40 years?

[fol. 219] A. I came to Davenport as freight traffic manager of the Iowa and Illinois Railway, later succeeded by the Clinton, Davenport and Muscatine Railway, and 35 years ago next July 1 I went to the Chamber of Commerce as traffic commissioner and have been in that capacity ever since.

Q. What has been your position there with respect to handling traffic matters for the members of the Chamber of Commerce? Just describe what your duties have been and what work you have done.

A. Well, the duties of our department, the traffic bureau, have had to do with all forms of transportation; that is, rail, water, air, and motor. We have had two types of services in our bureau; one, the direct service and the quoting of freight rates, routing, recommending service, general traffic problems as they are brought to us daily. We quote in the neighborhood of 17 or 18 thousand rates—that includes rail and truck—a year.

In addition to that, we have what we call our general service, civic service, which has to do with the improvement of transportation facilities to serve the community. That is generally our work.

Q. Generally, are you familiar with the motor carrier service that is available to Davenport and the area of Davenport there?

A. Yes; I think I can say that I am pretty well familiar with it.

questions. Is there, to your knowledge, a scheduled rail service from the Tri-City area to these 28 points you have just mentioned?

A. Yes; there are trains daily. On the main line, there are trains daily; yes.

Q. So then there is available to these 28 stations that you [fol. 232] have named a rail service daily by the Rock Island Railroad as well as a daily express service, is that correct?

A. Now, I don't want to quibble——

Exam. Carpenter: What do you mean by "express service"?

Mr. Fowler: Well, American Railway Express, the usual express service.

A. I don't want to quibble, Mr. Fowler, but I want to get the facts here and I think you want to, too. When I say there is a daily rail service, I mean there are scheduled trains, but that does not mean that we get a daily service to these points. It may be 6 days in some instances.

I have traced shipments to Iowa City that have taken 6 days by rail, whereas your truck is the same day. Now, there are trains running on this main line daily, that is true. The only car that we have on the main line of the Rock Island that we load direct is West Liberty. That is 40 miles. Then it has got to be transferred into another car to peddle along west of there or if it is going maybe this side of Des Moines, maybe loaded into a Des Moines car and then loaded back on a local from there.

By Exam. Carpenter:

Q. You said "this side of Des Moines"; you meant east of Des Moines?

A. East of Des Moines.

Where there are daily freight trains, that is what I am trying to answer when you said scheduled. We don't get [fol. 233] the daily service. We don't get the service out of Davenport by rail.

By Mr. Fowler:

Q. In other words then, as I understand it, despite the fact that there is a paper-scheduled rail operation to these

points, you don't get the service from the Rock Island Railroad?

A. That is correct. We have delays at the terminals. I have traced some where we have had cars get to destination, a merchandise car, and lay there for 3 days before it is switched to the freight house.

Q. But they could be handled by rail except for the delayed service?

A. It could be; yes. Certainly, they can be handled by rail.

Q. In other words, the commodity such as soap and foodstuffs and candy that come out of these pool shipments you have been talking about could be handled to all these points by rail?

A. They could be, but the operation wouldn't last very long, I can tell you that.

Mr. Fowler: I move to strike that last part of that answer as not responsive to the question.

Exam. Carpenter: It will be stricken.

By Mr. Fowler:

Q. Does the Rock Island Motor Transit Company at the present time conduct an operation for the transportation of interstate freight from Chicago to a point such as Iowa City, Iowa, handled entirely by truck?

A. I can't say, Mr. Fowler.

[fol. 234] Mr. Fowler: I would like to ask Mr. Howland, this key-point restriction that is in your present certificate, does that prohibit you from operating a through truck service through the Tri Cities?

Mr. Howland: No; except from Omaha.

Mr. Fowler: In other words, then——

Mr. Howland: You see, the key points are Omaha and the Tri Cities collectively. Now, the result of that operation is that we can operate on motor carrier freight, not rail freight. There is an additional key point at Des Moines on rail freight, but we can operate from the Tri Cities as far as Council Bluffs westbound, but eastbound we are restricted to Walcott as the most easterly point we can move anything to out of Omaha.

have in mind from other interstate points. Now, they do serve them from other interstate points, but I am speaking now of Davenport.

Q. Well, is it your testimony then, Mr. Cummins, that there are no other motor carriers other than the applicant who performs any transportation service——

A. No; I wouldn't say that.

Q. —to these points?

A. I wouldn't say that. There are irregular-route services. There is irregular route authorities that I didn't check.

Q. You have motor carriers members of your traffic bureau, do you not?

A. No; we do not.

[fol. 238] Mr. Cohn: You don't. That's all.

Exam. Carpenter: Any further cross-examination?

Redirect.

Redirect examination.

By Mr. Nolan:

Q. Mr. Cummins, what is the fact as to whether or not you are familiar with the motor carriers who have authority to serve many of these points and who do operate through these points but do not give a local service?

Mr. Fowler: That of course is objected to.

By Mr. Nolan:

Q. If you are familiar with that fact.

Mr. Fowler: That of course is objected to as leading.

Exam. Carpenter: Objection overruled.

Mr. Fowler: Just a moment. It is also objected to on the ground that it calls for an incompetent conclusion and opinion of the witness, no proper foundation having been laid for the expression.

Exam. Carpenter: Read the question.

(Question read.)

Exam. Carpenter: Qualify the witness.

By Mr. Nolan:

Q. Are you familiar with such conditions as that, Mr. Cummins?

A. I am familiar with some; yes.

Q. As a matter of fact, have you not represented motor carriers as practitioner in some instances; not only have you contact with motor carriers from the shipper's standpoint, but also as a practitioner before the Commission?

[fol. 239] A. Yes; I have represented motor carriers in my private practice in addition to my work at the Chamber.

Q. Then answer the question as to whether or not there are carriers that you know who have authority and who do operate through these various points, but who do not serve them out of Davenport on a regular basis.

Mr. Fowler: Just a moment. Objected to on the ground it is immaterial; also objected to on the ground it calls for a general incompetent conclusion of the witness.

Exam. Carpenter: Objection overruled.

A. Yes; there are carriers, some who have interstate authority, that will operate from Chicago to Illinois points with authority to these points but still don't give us the daily service out of Davenport or a service out of Davenport.

By Mr. Nolan:

Q. Now, for the purpose of the record, what is the fact as to whether or not the Rock Island Motor Transit Company isn't the only company that holds Iowa intrastate operating authority west out of Davenport to the points involved in this application?

Mr. Fowler: Objected to for several reasons. First, it is immaterial to any issue in this case; second, it isn't the best evidence.

Mr. Cohn: I am going to object also on the ground this witness has not been properly qualified in connection with that question.

[fol. 240] Exam. Carpenter: Overrule both objections.

A. Generally, that is true. There are certain points on

U. S. highway 6 like Des Moines, Cedar Rapids, where other carriers do have intrastate authority, but generally for the larger number of points along U. S. highway 6 the Rock Island Motor Transit is the only one that has the intrastate authority.

By Mr. Nolan:

Q. Is that particularly true to the smaller points?
A. That is correct; yes, sir.
Q. One more question. State whether or not such points as Wellman and Kalona, which are on the Rock Island Motor Transit system, have any other transportation facilities from Davenport and the Tri-City area other than the Rock Island Motor Transit Company, if you know.

Mr. Fowler: Objected to for the reason that the witness hasn't shown himself competent to testify with respect to service to those points. Objected to as calling for an incompetent conclusion of the witness.
Exam. Carpenter: Objection overruled.

A. I didn't check those two points, Mr. Nolan. I know they serve them, but I didn't check them as to the exclusive——

By Mr. Nolan:

Q. Do you know of any motor carrier, Mr. Cummins, who is serving the towns of Wellman and Kalona other than the Rock Island Motor Transit Company?
[fol. 241] A. No; I do not.

Mr. Fowler: Just a moment, please. I object to that as leading and suggestive, on the ground that it is repetition of the previous question to which the witness responded that he did not know, objected to as calling for the incompetent conclusion of the witness.
Exam. Carpenter: Objection overruled.

By Mr. Nolan:

Q. I am referring to out of the Tri Cities, Davenport and the Tri-City area.

A. That is what I am talking about, too.

Q. You say you do not know of any other carrier serving those points?

A. No.

Mr. Nolan: That is all.

Exam. Carpenter: Any re-cross? Thank you, Mr. Cummins.

(Witness excused.)

Exam. Carpenter: We will recess for lunch until 1:30.

(At 12 noon, a recess was taken until 1:30 p. m. of the same day.)

• • • • • • •

AFTERNOON SESSION

1:30 p. m.

Exam. Carpenter: We will proceed. Call your next witness.

Mr. Howland: I would like to ask Mr. Maurer to come forward and be sworn, please.

[fol. 242] ARTHUR J. MAURER was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. You may state your name and place of residence, please, and in giving your evidence speak up so that all in the room will have no difficulty in hearing you.

A. My name is Arthur J. Maurer, Chicago, Ill.

Q. Your business is what?

A. Assistant Traffic Director of the Chicago Association of Commerce and Industry.

Q. What is the nature of the organization known as the Chicago Association of Commerce and Industry?

A. It is what would ordinarily be known as the Chamber of Commerce.

Q. About what is the membership of that organization?

A. Approximately 4,500.

Q. And does that include manufacturers and wholesalers and processors of various types——

A. That is right.

Q. —of goods?

A. That is right.

Q. In other words, it is a general representative of the commercial and industrial interests of the City of Chicago?

A. That is correct.

Q. And how long have you been associated with that organization?

[fol. 243] A. 24 years.

Q. Are you familiar with the problems involved in making provision for transportation service to and from Chicago to serve the commercial interests of that community?

A. Yes, sir; I am.

Q. Are you familiar, at least in a general way, with the application as amended in this case?

A. I am.

Q. By what authority are you appearing here at this hearing?

A. This application was considered by our industrial traffic council meeting held on March 7, 1952. We were authorized to appear here in support of the application, not only on behalf of the smaller shippers but to handle the l. t. l. and the truckload shipments.

Q. I wish you would describe in a general way the number and character of the shippers whom you represent who are interested in service from Chicago into what might be termed the Iowa area.

A. Well, the number would be rather difficult to say. Our industrial traffic council consists of approximately 400 of the large industries of the Chicago area. I would estimate those 400 would ship 85 or 90 percent of the tonnage in and out of Chicago, and in addition to that we publish a shipping guide service that contains a rail routing guide and since 1922 we started on a truck routing guide, and we have approximately 2,100 shippers in the Chicago [fol. 244] area that use that guide, and I would assume practically all of them ship into the Iowa area.

Q. Have you familiarized yourself with the service which has been rendered by the Rock Island Motor Transit Company from Chicago in interstate commerce into the Iowa territory?

A. I am familiar; yes, sir.

Q. You are familiar with the present restriction of 5,000 pounds?

A. Yes, sir.

Q. Maximum on the authority of the——

A. Yes, sir.

Q. —Rock Island Motor Transit Company. How, if at all, does that maximum limitation affect the shippers or some of the shippers whom you represent in the Chicago area?

A. Well, it was the feeling of our shippers that the Rock Island Motor Transit is performing a necessary service and that they should be permitted to perform a full common carrier operation. That means to handle not only the smaller towns but the larger towns on their route and to handle truckload as well as the less-than-truckload traffic. In other words, to have an operation which is economically sound.

Q. What is the fact as to whether there are points on the route of the Rock Island Motor Transit Company in Iowa between Davenport and Council Bluffs as to which the Rock Island Motor Transit Company has been the only motor carrier regularly serving those points, particularly [fol. 245] with the so-called smaller shipments of less than, say, 2 to 3 or 5 thousand pounds?

Mr. Fowler: That is objected to on the ground it is calling for the incompetent conclusion of the witness, and hearsay.

Exam. Carpenter: Objection overruled.

A. Well, as I previously mentioned, we publish a truck guide in which we show routing from Chicago via the approximately 122 long-distance motor carriers that are members of our association. I have checked the Iowa listings on that guide and I find there are 22 points to which Rock Island is the only carrier who is offering a service or who at least has told us they are rendering service to those

points, and there are two other shipping guides published in Chicago which we also checked, and I find that, checking those guides, there are still five points in the State of Iowa in which Rock Island is the only one shown as having service.

I might add that there are several other points in which the carrier having service from Chicago, that is, shown in these other guides as having service, is a carrier that doesn't even maintain offices in Chicago. There are three of those.

From what I have been able to determine—in fact, I know; I checked myself—they do not belong to or participate in the Midwest Motor Freight tariff. They publish their own tariffs. I don't know what their charges are. They do not maintain an office in the Chicago area. They have no pickups there, no terminal there.

[fol. 246] Q. Do they publish interline tariffs?

A. I don't know.

Q. Now, are the members of your association and the shippers in the Chicago area interested in the continuation of service into this Iowa territory on highway 6 by the Rock Island Motor Transit Company?

A. Definitely, we are. Certainly a large volume of traffic moves from Chicago into the State of Iowa, and we realize the importance of motor carrier transportation to the Chicago market.

Q. Under present-day conditions, is it your opinion that a territory such as this Iowa territory where there are numerous small towns separated by distances of from 10 to 20 miles, in an agricultural area, would an all-rail service on rail billing, in your judgment, adequately serve the needs of that territory?

Mr. Fowler: That is objected to on the ground that it calls for a speculative answer and an incompetent conclusion of the witness.

Mr. Cohn: Objected to, the witness not being properly qualified.

Exam. Carpenter: He is asking for his opinion only. Objection overruled.

A. We have a well-established interest in motor carrier transportation. We also have a very vital interest in rail

[fol. 247] transportation. There is rail package car service into about 31 destinations in the State of Iowa, but the only points involved are the very large points. There are none of these small points that are involved in the Rock Island application. The package cars are to the larger points, and service beyond would be way freight, which definitely is not anywhere near as satisfactory a service as a motor carrier service.

Q. Have you had occasion to observe in recent months or in recent years the general policy of the motor carriers with respect to either curtailing or extending service to the intermediate points in Iowa or other territory which has come under your observation as to the policy that the carriers generally are following? What have you observed, if anything, in that respect?

Mr. Fowler: Just a moment, please. That is objected to as immaterial to any issue in the case. It is also objected to on the ground that it is calling for speculation and an incompetent conclusion and opinion of the witness.

Exam. Carpenter: Objection overruled.

A. The only way I could answer that is that we have had complaints from shippers. It seems to be the difficulty is getting service into the smaller points. To your larger points, there is adequate truck service from Chicago. We have approximately 400 common carrier truck lines out of Chicago and there is plenty of service to the larger points. It is the small destination where the shippers are experi-
[fol. 248] encing difficulty in having their shipments handled.

Q. Have you noticed any trend in that respect in recent months?

A. I couldn't answer that.

Mr. Fowler: Just a moment.

Mr. Howland: He said he couldn't answer that.

By Mr. Howland:

Q. Mr. Maurer, what is the position taken by you with respect to the application of the Motor Transit Company here as evidenced by the action of your committee, I believe you said?

A. Council, industrial traffic council.

Q. Industrial council, I believe you described it, with respect to this particular application?

Mr. Fowler: Mr. Examiner, may I ask a question preparatory to an objection?

Exam. Carpenter: Yes, sir.

By Mr. Fowler:

Q. Was there written minutes of this meeting?

A. There were. I don't have them with me, but I could present them as a late-filed exhibit if you desire.

Mr. Fowler: Objected to as not the best evidence, calling for hearsay.

The Witness: I was present at the meeting and I know that the minutes——

Mr. Fowler: I understand that.

Mr. Howland: We will ask the witness to answer the [fol. 249] question and to furnish upon his return to Chicago, to be made an exhibit, a copy of the minutes so far as it pertains to this application.

Mr. Fowler: The question is objected to on the ground it is immaterial, on the ground it is hearsay, on the ground that it is not the best evidence.

Exam. Carpenter: Objection overruled.

The Witness: Would you repeat your question, please?

(Question read.)

A. We appear in support of it.

By Mr. Howland:

Q. Particularly with reference to this restriction to 5,000 pounds which is found in the certificate presently issued by the Interstate Commerce Commission, in your judgment, based upon your experience, is it feasible for a common carrier serving a widespread area of the type and character of the Rock Island Motor Transit Company to operate with such a maximum limitation?

Mr. Fowler: Just a moment. It is objected to on the

ground that it calls for an incompetent conclusion of the witness without any qualification.

Exam. Carpenter: Read the question.

(Question read.)

Exam. Carpenter: Objection overruled.

A. In the past few years, I personally have attended scores of rate committee hearings, motor carrier rate committee hearings, and the carriers have repeatedly reported at those hearings that the smaller shipments are not paying [fol. 250] their way, that it is not a profitable operation.

By Mr. Howland:

Q. What would your conclusion be?

A. My answer would be that it would not be a practical operation.

Q. Do you have any knowledge of any carrier among the carriers that serve the City of Chicago that operate with a maximum restriction of 5,000 pounds handling general commodities?

A. I don't know of any; no.

Mr. Howland: You may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. This document you were referring to is headed, "The Chicago Association of Commerce and Industry, Transportation Committee Bulletin No. 233, Package Car Service from Chicago, January 1952." What is this?

A. That is a monthly bulletin we put out showing the performance record of the package cars leaving Chicago. We have put that publication out for the past, I would say, 30 years, we have been publishing that.

Q. In checking this over, you found that there was package-car service to how many of the Iowa points involved in this application?

A. To the key points. I don't know how many. I have them checked there. Not to the smaller points.

Q. Referring entirely to a rail shipment from Chicago, [fol. 251] as I understand it, the package-car service will deliver the traffic to this key point and then it would be redistributed on way freight, is that it?

A. Way freight ordinarily would be the method of handling it; yes. Unload it from one car very often and transfer it across the platform and load it into a way freight, which might be on a bi-weekly or tri-weekly schedule.

Q. I presume you do use rail service, don't you, on a lot of your shipments to these Iowa points?

A. Yes; they do use rail. They use truck service, too.

Q. But you do use rail service? A. Oh, certainly, our shippers use rail service.

Q. And I assume your shippers intend to continue to use it?

A. They use rail service and they also use truck service and they hope to continue to use that, too.

Q. Now, I believe you stated that your committee had reviewed this application on March 7, 1952.

A. Yes.

Q. You reviewed the original application, did you?

A. We reviewed the original application, but, as you will read from the minutes when they are furnished, the action was that we not only supported that application but any subsequent application that may be filed which would ask for a full common carrier authority to handle both truckload and less-than-truckload. That was embodied in the minutes of that meeting.

[fol. 252] Q. I believe you said you checked several guides or directories.

A. Yes.

Q. And you discovered that there were 22 points that did not indicate any daily service by motor carrier other than Rock Island?

A. I said in our guide there were 22.

Q. What is the name of your guide?

A. Way to Ship, Motor Truck Section.

Q. Way to Ship, Motor Truck Section?

A. That is right.

Q. That is put out by the Chicago Association of Commerce and Industry?

A. Chicago Association of Commerce and Industry.

Q. Do you have a copy of that?

A. I do.

Q. The document which you have just handed me is a printed document, designated "Way to Ship From Chicago, Motor Truck Section, No. 62, published by the Chicago Association of Commerce and Industry Transportation Department," is that correct?

A. That is correct.

Q. And the Iowa points are listed in that directory commencing on page 71?

A. That is right.

Q. Continuing through page 77?

A. Correct.

[fol. 253] Q. What was the other guide you referred to?

A. I also checked Shipper's Guide.

Q. By whom is that published?

A. That is published, I believe the proper name is Shipper's Guide Company in Chicago.

Q. You don't have a copy of that?

A. No; I don't have a copy.

Q. What was the other?

A. The other was Leonard's Guide, published by G. R. Leonard Company.

Q. You don't have a copy of that?

A. No; I don't have a copy of that with me.

Q. Now, I think you testified in response to a question Mr. Howland asked you that as to these larger points involved in this application you now have adequate motor truck service, is that correct?

A. We do have truck service. We have several carriers serving the larger points, but the smaller points we do not have. Rock Island is the only one that we show as serving them.

Q. How many motor carrier services do you have available to you at the present time, say, from Chicago to the Davenport area?

A. We have 10 of our member companies that serve Davenport.

Q. 10 of your member companies?

A. That's right.

Q. Are motor carriers members of your association?

[fol. 254] A. Oh, yes; they are.

Q. In addition to the members, do you have any idea how many motor carriers there are operating between those two points?

A. These other guides I checked would indicate there are 12 others serving Davenport.

Q. Would you say that the present service then between Chicago and Davenport via motor carrier is adequate?

A. No.

Q. Let me put it another way. Do you think you need any additional motor carrier service between Chicago and Davenport?

A. I couldn't answer that.

Q. All right; from Chicago to Iowa City.

A. We only show two in our guide, McCoy and Rock Island.

Q. You know, of course, that there are many more, don't you?

A. Yes; there are others. Other guides show eight, but as I mentioned before, one of these, Tallcorn Motor Express, from what I have been able to determine, does not maintain a Chicago office.

Q. Let's take Chicago to Grinnell.

A. Grinnell, we only show Rock Island Motor. The other publications I checked show Iowa-Nebraska, Des Moines Transportation, Tallcorn Motor Express, and Western Transportation. Tallcorn again is the one——

Q. Take Chicago to Newton, Iowa.

A. Newton, Iowa, we show Keeshin, McCoy, Rock Island, [fol. 255] and Watson as member companies.

Q. When you say "member companies," you refer to members of your own association?

A. Of our own association; that is right.

Q. And of course your publication wouldn't show any other carrier that is not a member of your association?

A. Not the service. We show their names in the guide, but we don't show the service.

Q. Have you got at the present time adequate truck service between Chicago and Omaha, in your opinion?

A. There are several lines operating into Omaha, but I couldn't say whether it was adequate or not.

Q. So far as you know, there isn't any demand for any additional motor carrier service between Chicago and Omaha?

A. Probably not.

Mr. Fowler: I think I will have these identified and put in the record.

(The documents referred to were marked as interveners' exhibits Nos. 1 and 2, Witness Maurer, for identification.)

OFFERS IN EVIDENCE

Mr. Fowler: I would like, Mr. Examiner, to offer in evidence an instrument which has been identified by the reporter as exhibit No. 1, bearing the identification, "Chicago Association of Commerce and Industry, Way to Ship," published in January 1952, and the document which been iden-[fol. 256] tified by the reporter as exhibit No. 2, being a guide bearing the identification, "Way to Ship from Chicago, published by the Chicago Association of Commerce," both of which documents have been identified by this witness.

Mr. Howland: Are you willing to have those made a part of the record, Mr. Maurer?

The Witness: I personally have no objection. They are published documents. They are distributed widely.

Exam. Carpenter: You have no objection, Mr. Howland?

Mr. Howland: I have no objection.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: As long as there is no objection, the one that has been identified as exhibit No. 1 will be received in evidence as exhibit No. 1. The other one, identified as exhibit No. 2, will be received in evidence as exhibit No. 2. That is, as of this witness.

(Interveners' Exhibits Nos. 1 and 2, Witness Maurer, were received in evidence.)

Mr. Fowler: That concludes my cross-examination.
Exam. Carpenter: Any further cross-examination?
Mr. Cohn: Yes.

By Mr. Cohn:

Q. Mr. Maurer, as I understand, the basis for your support of this application is that the members of your industrial traffic council to whom you have referred desire a ser-
[fol. 257] vice through this applicant which would eliminate the necessity of shipping into the smaller points through reliance upon way-freight service of the railroads, am I correct in that assumption?

A. No. The Rock Island is the only carrier offering a motor carrier service into those points, and I would say the motor carrier service is better for the benefit of the Chicago market, and they want the more expeditious service.

Q. Then you are interested then in a service into all of these points that the applicant is serving?

A. We are interested in the truck service.

Q. In the State of Iowa?

A. That's right.

Q. Now, if the shipments then are handled by the trucks of the applicant on rail billing, how would any of your members be adversely affected?

A. I couldn't answer that question.

Q. You are not stating for the purposes of this record in this proceeding that they would be adversely affected if the shipments were made on rail billing?

A. It has never been discussed so I couldn't answer for the shippers on that.

Q. Now, you mention that there were three carriers of those that you find on your guide lists that operate into Iowa points that do not maintain terminal facilities in Chicago?

[fol. 258] A. Their own terminals.

Q. And I believe you named one, the Tallcorn.

A. Another one is Scotts Transportation Company and Thurwanger Transport Company. They are shown in the other guides to some points in addition to Rock Island Motor, and, incidentally, I might add of those three there

is one that does have a terminal in Chicago shown at certain points competing with Rock Island, but that is Eldon Miller, Incorporated. Now, they do maintain a Chicago terminal; but I checked the American Trucking Association's guide and they are shown in there as an irregular-route common carrier.

Q. Now, are the other three that you mentioned shown as regular-route common carriers?

A. These other guides don't state whether they are regular or irregular, and they are not listed in the American Trucking Association guide, none of the three.

Q. How many additional carriers did you find that serve other points involved in this application out of Chicago who do maintain terminals or offices in Chicago?

A. They vary with the different points, of course.

Q. Let's take a point like Des Moines, Iowa. How many carriers do you have listed there?

A. We have eight of our member companies and there are seven shown in other guides that are not members.

Q. In addition to the eight?

[fol. 259] A. Yes.

Q. A total of 15?

A. Yes. That also includes that Tallcorn I previously mentioned.

Q. How many do you show as serving Iowa City, between Iowa City and Chicago?

A. We show McCoy and Rock Island.

Q. That is, you show that in your own guide?

A. That's right.

Q. How many are shown in the other guides to which you have referred?

A. Eight, including, incidentally, Eldon Miller, Tallcorn, and Scotts Transportation.

Q. That would be a total then of 10 that would be shown in your guide and the other guides to which you have made reference?

A. That's right.

Q. How many carriers are shown serving Newton, Iowa, from Chicago?

A. We show four. Four member companies. Other publications show five.

Q. For a total of nine?
A. Yes.
Q. How many as to Grinnell?

Mr. Howland: Objected to as repetition. That has already been answered once.

By Mr. Cohn:

Q. Have you answered as to Grinnell?
[fol. 260] A. Yes.
Mr. Cohn. I will withdraw it.

By Mr. Cohn:

Q. Did you answer in connection with Grinnell as to both your member carriers and also the carriers shown in the other guides?
A. I don't know whether I did or not, but I will be glad to. Our own members, we show just Rock Island. Nonmember companies, we show four, including Tallcorn Motor that was previously mentioned.
Q. I would like to ask you one other point, and that is Atlantic, Iowa. What do you show as to service to Atlantic, Iowa, from Chicago?
A. Atlantic, Iowa, we show two.
Q. And how many are shown in the other guides?
A. Four.
Q. A total of six?
A. That's right.

Mr. Cohn: That is all I have.
The Witness: Incidentally, on this, in checking the other guide, we show two. They also show Brady. We don't list Brady on that point. They are a member of our association so whether Brady actually is serving Atlantic, Iowa, but they are a member company so it still nevertheless would be six carriers.

By Mr. Cohn:

Q. Six carriers, including Brady?
A. That's right.

[fol. 261] Exam. Carpenter: Any further cross-examination?

Mr. Fowler: Just one thing.

By Mr. Fowler:

Q. Referring, Mr. Witness, to this document which we have identified as exhibit No. 1 and purely so that I may qualify it a little more, is the material contained in this document material which you obtained from your members and then compiled in this document?

A. Oh, no. In compiling that bulletin, we get loading sheets from every freight house in Chicago every day, and we have our own forms with each destination and route on each and we show the date, we take the car initial and car number. At the end of the month, it is sent to the local freight agent at destination, who fills in the hour and date of arrival and the hour and date of placement for unloading and returns it back to us, and from that we compile that bulletin every month.

Q. You are satisfied that this document was accurate insofar as the information——

A. I am. As accurate as any publication could be.

Exam. Carpenter: Redirect.

Mr. Howland: That is all unless Mr. Maurer has something he wishes to add.

The Witness: No; I haven't.

Exam. Carpenter: Thank you, Mr. Maurer.

(Witness excused.)

Mr. Nolan: Mr. Gans, please.

[fol. 262] Paul E. Gans was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. State your name, place of residence, and occupation, please.

A. My name is Paul E. Gans, located in Moline, Ill., and employed by Deere and Company.

Q. What is your position with Deere and Company?

A. I am supervisor of truck transportation for Deere and Company and its subsidiaries.

Q. What territory does your duty take in?

A. United States and Canada.

Q. Now, Mr. Gans, would you briefly state for the record your experience in traffic details?

A. I was employed with three motor common carriers and a forwarder prior to coming to Deere and Company approximately 6 years ago, a total transportation experience of 19 years.

Q. And state whether or not you are familiar with the proposition proposed here by the Rock Island Motor Transit Company.

A. I am, sir.

Q. You have a statement you wish to make in connection with the application of the Rock Island Motor Transit Company?

A. I have a statement I would like to make to this effect, that we gave due and careful consideration to whether or not we had a valid interest in the application made here today and since amended and covered in the testimony here, [fol. 263] and we find or believe that we do have such a valid interest.

As a manufacturer of implements, we have some 7,500 dealers in this country that are located primarily in small communities. Like Mr. Maurer, the previous witness, I have participated in a good many rate hearings and I have had a private audience with a good many of the truck owners in this country. I have listened to their problems. We have seen a general trend on the part of the motor common carriers today to go to point-to-point operations. They advise us in a general way that owing to rising costs, labor, smaller volume to the smaller communities, that they are unable to maintain service to what we commonly know as the peddle runs or small communities.

Mr. Cohn: Just a moment. I am going to object to the general nature of the testimony. It is very interesting, but it is immaterial and irrelevant to any issue in this proceeding. We are concerned here with a specific area of operation, not with the United States and Canada and

other points where these 75,000 customers of this company might be located.

The Witness: Mr. Cohn, if I said 75,000 I meant 7,500, if that is the case.

Exam. Carpenter: Objection sustained.

Mr. Nolan: I might say, Your Honor, we will tie it in with the instant application.

[fol. 264] Exam. Carpenter: Go ahead with questions and answers.

Mr. Fowler: Wouldn't it be better to ask the witness a question and let him answer and give us a chance to object? He is reciting a lot of hearsay.

By Mr. Nolan:

Q. Mr. Gans, have your made in the course of your duties an observation and investigation of the trend of service being performed by independent motor carriers with respect to service to the small point, the small town?

A. I have, sir.

Q. What have you found in that respect, and particularly insofar as it affects the territory involved in this instant application?

Mr. Fowler: Object to that on the ground it is immaterial and on the ground it calls for the incompetent conclusion of the witness.

Exam. Carpenter: Objection overruled.

A. I have ascertained that carriers operating in what we might term here as the Middle West—Illinois, Iowa, Nebraska—that there is a tendency on the part of those carriers to discontinue service or curtail it to the smaller communities. I have evinced that information or secured it from the operators themselves who have come to me to tell me of their plights.

Mr. Fowler: I move that the answer be stricken on the ground it is purely hearsay.

Exam. Carpenter: Motion overruled.

By Mr. Nolan:

Q. State whether or not, Mr. Gans, you have participated

[fol. 265] at various times with motor carriers in their rate-making conferences and in their transportation conferences and things of that character in the territory affected by this application?

Mr. Fowler: Objected to on the ground it is immaterial to any issue in the case.

Exam. Carpenter: Read the question, please.

(Question read.)

Exam. Carpenter: Objection overruled.

A. I have, sir.

By Mr. Nolan:

Q. Now, Mr. Gans, state whether or not you are familiar and have been familiar with the transportation services afforded by the Rock Island Motor Transit Company prior to any restriction or limitation on its operations.

A. I am familiar and have been familiar with it.

Q. What was the character of the service in the territory served by them?

A. The character of the service was satisfactory.

Q. And state whether or not, so far as your company's needs are concerned, if there is a reasonable need for a continuation of the same type and character of service as was performed by the *by the* Rock Island Motor Transit Company before there was any restriction or limitation placed on its operations in the territory involved in this case.

A. We believe there is a necessity for it.

[fol. 266] Q. Would you state why you have that belief?

A. As an opinion, we feel that Rock Island Motor service has served our interests in the smaller communities and to the larger communities, and further that we as one shipper need very definitely the service to the smaller communities, and it is our opinion that no motor common carrier, whether it be Rock Island or any other, can long survive without traffic to the so-called key points in order to support the over-all service.

Q. Now, Mr. Gans, I believe you stated prior to going

to John Deere and Company you had had independent truck experience.

A. Yes, sir.

Q. In the answer that you have just given, state whether or not that opinion is based upon your experience in the trucking business as well as your experience with John Deere and Company.

A. Predicated on both experiences.

Q. Is there anything else, Mr. Gans? Just a minute.

Now, Mr. Gans, state what your opinion is, if you have an opinion, as to the effect that a limitation, say, of 5,000 pounds maximum shipment would have upon the operations of the Rock Island Motor Transit Company or any other carrier who attempted to perform an over-all service in this territory.

Mr. Fowler: Objected to on the ground that it is immaterial, calls for an incompetent conclusion of the witness unless it is confined to his own knowledge of the application of the restriction to the shipments of his own company.

[fol. 267] Exam. Carpenter: Objection overruled.

A. It is my opinion, and I believe I made that statement a few minutes ago, that no carrier could long exist with a restriction of 5,000 pounds.

By Mr. Nolan:

Q. And state what are the sizes of the shipments made by your company in the territory involved in this application.

A. We make anything from a minimum shipment to a volume truckload shipment.

Q. Is there another traffic department connected with the John Deere organization?

A. We have any number of traffic departments as to factories and to branches over which I have supervision.

Q. And how about the John Deere Plow Company; does that have a traffic department?

A. For a matter of clarification, all of our sales branches are known as John Deere Plow Company. We have one at Moline, Ill., that embraces perhaps 60 to 75 percent of the

State of Iowa in the instant hearing and the John Deere Plow Company of Omaha has the western or remaining portion.

Q. As I understand it, then, the John Deere Plow Company of Moline, Ill., serves the eastern part of the State insofar as the dealers are concerned, is that correct?

A. Well, Mr. Nolan, a little more than the eastern part of the State, but just to confine it, yes, sir.

[fol. 268] Q. What is the fact as to whether or not Mr. Stevens is a traffic manager for that segment of the organization?

A. Yes, sir; Mr. H. H. Stevens.

Q. What is the fact as to whether or not many dealers out in the small communities do not have shipped direct from the factory many parts and implements rather than getting them through their district offices?

A. Well, the branch for the most part is to supply its own dealers. Where, for one reason or another, it is better to ship directly from the factory, it is sometimes done. That is the exception rather than the rule on the small shipments. I am qualifying it to the small shipments rather than the rule.

Q. What is the fact as to whether or not some do go out; there is a general flow of shipments from the factory to your small points?

A. That is right.

Q. For special parts?

A. That is right.

Q. Or where the branch doesn't have it in stock or something like that?

A. That is right.

Q. Now, insofar as this present application is concerned, what particular points are you familiar with that, in your opinion, require the service as proposed by the applicant?

A. Specifically, from the Tri-City area, which is composed of Moline and East Moline, Ill., in part, where we [fol. 269] have factories and a branch house, we find that we primarily require service to the following points—if you wish them named.

Q. Would you name them, please?

A. Adair, Iowa, Anita, Atlantic, Audubon, Avoca, Gris-

wold, Guthrie Center, Hancock, Harlan, Minden, Neola, Oakland, and Stuart. We have dealers located at those 13 points.

I am embracing in those points specifically, Mr. Nolan, the points covered by the sales branch at Omaha, Nebr. I will have a man here from the John Deere Plow Company to later testify to the so-called eastern half of Iowa as to his problems, experiences, and so forth.

Q. Now, Mr. Gans, the fact that the Rock Island Motor Transit Company has facilities it does have for handling claims and things of that character, does that have any particular interest to your company?

A. Yes; I think it does to any company. I mean the matter of how a company handles its claims.

Q. Do you know of any company that provides the same local service between the Tri-City area and these so-called small towns that the Rock Island Motor Transit Company has provided your company in the past?

Mr. Fowler: Objected to as repetition. It is objected to because the question is too broad, the witness having testified already as to the points to which he felt that there wasn't adequate service.

[fol. 270] A. No, sir.

Exam. Carpenter: Do you want to reframe your question?

Mr. Nolan: I think the question is all right: I asked him if he knows of any other transportation, motor common carrier that provides the same service that the Rock Island Motor Transit Company has provided in the past to these small towns he has named from the Tri-City area.

Exam. Carpenter: Does he know anything about it other than to the small towns he has mentioned?

Mr. Nolan: That is what I said, to those he has named.

Exam. Carpenter: Can you answer to the towns you have named?

The Witness: We have no service to the cities that I have mentioned other than Rock Island Motor Transit Company with complete terminal facilities in the Tri Cities.

Mr. Nolan: You may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. On that last answer, you did qualify your statement. What you meant to say was that insofar as you know there is no present motor carrier service to the points you have indicated from Moline, Ill., by carriers that maintain a regular terminal facility at Moline?

A. That is right, Mr. Fowler.

Q. Now, as I understand it, the product which you ship, [fol. 271] generally speaking, are assembled farm implements?

A. And parts.

Q. First, assembled farm implements?

A. I would say for the most part in what is being considered here, it would be parts.

Q. As I understand it, your assembled implements are handled by truck direct to your dealer or to the customer by carriers other than those that are involved here.

A. You mean others handle it, too?

Q. I am talking about your assembled implements. Most of those move into the Iowa territory by truck, don't they?

A. That is right.

Q. And they are not common carrier truckers, are they, most of them?

A. Primarily everything we move is by common carrier.

Q. Does Rock Island Motor Transit handle for you any assembled farm implements into this territory?

A. Assembled in the sense if you mean knocked down. Very few set up, Mr. Fowler. I would like to qualify it as to what you mean by assembled.

Q. What I mean by assembled is not knocked down.

A. Very few set-up implements.

Q. Now, I still don't understand your answer. Do they or do they not handle assembled farm implements? When I say "assembled" I mean ready to run off the platform on the field.

[fol. 272] A. For the most part, no, Mr. Fowler.

Q. That is, in other words, that type of transportation service is rendered by carriers other than the type we are talking about here?

A. Primarily so.

Q. So far as your need for common carrier service from the Moline area into the territory involved in this application, it consists largely of repair parts, is that correct?

A. Repair parts and knocked-down implements.

Q. And knocked-down implements. Now, with respect to volume, to what points involved in this application would you have any need for volume service from Moline and when I am using the term "volume," let's take it first at 2,000 pounds and then take it next at 5,000 pounds?

A. We would need service in both cases to all points.

Q. Now, what would a shipment exceeding 2,000 pounds consist of that was moving from Moline, Ill., to Moscow, Iowa?

A. I don't believe I testified as to Moscow, Iowa.

Q. Maybe you didn't. All right, from Moline, Ill., to Stuart, Iowa.

A. It could consist of knocked-down implements or parts, Mr. Fowler.

Q. It would be a shipment in excess of 2,000 pounds?

A. It could be.

Q. As a matter of fact, ordinarily it would not be, would it?

[fol. 273] A. I would say that 2,000 might be an average or above average. I mean for the so-called parts shipments.

Q. Let me put it this way: In the ordinary course of business, the shipments which would move from Moline to Stuart would be less than 2,000 pounds?

A. I would say that is probably true.

Q. And I think that would be generally true to all of these other points which you named, would it not?

A. There is the possibility there might be Atlantic in there for one that I am aware of that would receive, generally speaking, larger shipments than 2,000.

Q. Wouldn't it be exceptional if you had a shipment of as much as 5,000 pounds from Moline to any one of these points you have named?

A. I would say it would be the exception rather than the rule; yes.

Mr. Fowler: I have no further questions.

Exam. Carpenter: Any further cross-examination?

By Mr. Cohn:

Q. I would like to inquire as to the contract carrier motor service available to your company into these Iowa points you have named.

A. We don't use, Mr. Cohn, the contract carrier to any great extent at all, none to these points here that I have mentioned, and the over-all percentage we would use a contract carrier to dealers would be less than 2 percent of a $300,000-a-year volume on the part of the contract carrier [fol. 274] to whom I think you refer.

Q. Now, all of the shipments that would be involved in this application would be to your dealers, am I correct?

A. No; not necessarily. They would also go to warehouses or transfer houses or sub-branches, as you might designate them.

Q. Now, are any of your dealers supplied through branches or warehouses that you maintain in the State of Iowa?

A. They can be, Mr. Cohn.

Q. Where are those branches at?

A. At Des Moines and Cedar Rapids.

Q. What are the nature of the facilities you maintain at Des Moines and Cedar Rapids?

A. They are warehouses, what we commonly know as transfer houses. They carry a stock.

Q. You also maintain a factory or other type of manufacturing facility at other points in the State of Iowa, do you not?

A. We do. We have a plant at Ottumwa, Iowa, and we have one at Waterloo, Iowa. We have one here at Des Moines and one at Dubuque as well as six or seven in the Tri Cities.

Q. What are the nature of the articles that are manufactured or supplied from those plants that are maintained at the latter points that you named?

A. You mean the Iowa points or the——

Q. Let's take Ottumwa. What do you have at Ottumwa? [fol. 275] A. We make, for one product, a hay baler and

of course parts that would go with it would be shipped, too.

Q. What is your Dubuque factory?

A. Dubuque makes tractors.

Q. Is that also true of Waterloo?

A. Waterloo makes tractors.

Q. You also maintain stocks of repair parts at your factories located at these Iowa points?

A. Very small. What I mean, they are shipped out in shipments to the transfer houses or branches, but they do carry a small stock.

Q. Is it your practice to ship your products into the warehouses and then supply your dealers from the warehouses in Iowa?

A. No. As a general rule, on our over-all picture, Mr. Cohn, the general proposition is to ship all completed goods, I believe the assembled type goods Mr. Fowler was referring to, direct from factory to dealer wherever possible.

Mr. Cohn: I believe that is all I have.

Exam. Carpenter: Any further cross-examination? Redirect.

Redirect examination.

By Mr. Nolan:

Q. Mr. Gans, what are the farm implements that are manufactured in the Tri-City area which would move into this territory in interstate commerce?

A. Plows, wagons, spreaders, combines—to mention a few.

By Exam. Carpenter:

Q. Those articles are manufactured by the John Deere [fol. 276] Company?

A. Yes; at the Tri Cities.

By Mr. Nolan:

Q. Those implements can either move assembled or knocked down, can they not?

A. With the exception of the combine, Mr. Nolan.
Q. They all move in set up?
A. That is right.

Mr. Nolan: That is all.
Mr. Fowler: No further questions.
Exam. Carpenter: You are excused.

(Witness excused.)

D. R. MacDonald was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please, and in giving your testimony speak up so that all may hear.
A. D. R. MacDonald.
Q. You live where, Mr. MacDonald?
A. Palatine, Ill., a suburban town about 25 miles northwest of Chicago, Ill.
Q. You are employed by whom, Mr. Macdonald?
A. Employed as traffic manager, Chicago branch of Butler Brothers.
Q. What is the business in which Butler Brothers is engaged?
A. Wholesale general merchandise.
[fol. 277] Q. And in what territory does the Chicago branch house of Butler Brothers sell or service accounts?
A. Well, to name the States it would be Ohio, Michigan, Wisconsin, Indiana, Illinois, Iowa, Nebraska, Colorado, Wyoming, Utah, Nevada, Arizona, California, Oregon, Washington, and Idaho, Alaska, Hawaiian Islands, and once in a while a few of the overseas islands, Marianas, and so on.
Q. As traffic manager of the Butler Brothers branch, I take it you have supervision over making shipments, routings, and matters of that sort?
A. For shipments from the Chicago branch, that is right, or for customers of the Chicago branch.
Q. About what volume of shipments would you have

moving from that branch in number on a weekly basis or in any other way that you could estimate it?

A. To what points?

Q. To the points in this western territory such as Iowa, Nebraska, and the points you have referred to here.

A. Well, we handle roughly 15,000,000 pounds of freight a year and what comes in goes out, so I couldn't confine that to States.

Q. Well, about how many stores or dealers do you service in the State of Iowa? Break it down a little.

A. About 150.

Q. And are some of those dealers or accounts located on or adjacent to U. S. highway 6?

[fol. 278] A. They are.

Q. About how many would you say would be on or adjacent to U. S. highway 6?

A. About a dozen.

Q. Now, Mr. Macdonald, about what is the volume of your shipments on an average, about what size will they run or between what limits will they normally run?

A. Well, I would say an average day in and day out shipment would probably weigh approximately 300 pounds.

Q. What type and character of merchandise is it in which you deal and which you have occasion to ship?

A. The biggest portion of our type of merchandise is what is normally found in a variety store or a small dry-goods store.

Q. And do you have occasion to make shipments of more than 5,000 pounds normally in your business?

A. Only, frankly, on store openings.

Q. That is everything a new store——

A. That is when a new store is being established at some point; yes, sir.

Q. So ordinarily you would not be interested from a day-to-day basis in shipments in excess of 5,000 pounds?

A. Frankly, no.

Q. What has been your experience with respect to the handling of these smaller shipments of 3 to 5 hundred or a thousand pounds from your Chicago house to destinations on U. S. highway 6 in Iowa?

[fol. 279] A. Well, from some carriers we are receiving

excellent service and some carriers very poor service. I think that is what you are getting at.

Q. What points are you particularly interested in at present located on or adjacent to U. S. highway 6 where service is provided from Chicago?

A. Audubon, Brooklyn, Colfax, Exira, Grinnell, Marengo, Newton, Oakland, Shelby, Stuart, and Victor.

Q. Places like Victor, have you had experience with any carriers other than the Rock Island Motor Transit Company at that particular point?

A. As far as I know offhand, they are the only carrier serving Victor.

Q. What has been your experience generally with respect to getting service to these points that you have listed as being on or adjacent to U. S. highway 6 from carriers other than the Rock Island Motor Transit Company?

A. Well, I can best answer that by a pickup survey that I have here. Bos has a hundred-percent response to pickups for January. For February they missed us on 33 percent of the calls. They missed us 4 days out of 12 calls.

Q. When you say they missed you, what do you mean?

A. I mean they did not respond for a pickup, for calls placed prior to 9 a. m. in the morning.

[fol. 280] Q. That is at your Chicago house?

A. That is at our Chicago house. March, they have missed us 1 day out of 3 calls.

Brady for January, 69 percent missed. They missed 4 out if 16—5 out of 16, pardon me. Brady for February missed us 40 percent of the time. They missed us 2 out of 5 calls. We have not been able to secure a pickup from them in the month of March.

Des Moines Transportation missed us once out of six for January. Perfect all calls on February and all calls on March.

Iowa-Nebraska, a hundred percent on all 3 months so far.

McCoy missed 3 out of 13 calls for January, 4 out of 12 calls for February, 3 out of 8 calls for March.

Rock Island Motor has been a hundred percent in all 3 months so far.

Watsons missed 7 out of 15 calls for January, 5 out of

16 calls for February, 3 out of 10 calls for March, and that seems to be all of the carriers that I have shown here serving points on highway 6.

Keeshin is shown as a carrier serving many of those points. However, we have had to discontinue them. We were advised, I should say, by Keeshin about February or thereabouts of last year that they were not accepting shipments for Iowa and we have never rechecked to see whether they since have changed.

Q. Now, with respect to these shipments, when you say that the particular carrier missed the call, does that mean [fol. 281] that the carrier either failed to get it that day or failed to get the shipment entirely? What is the situation?

A. No; that meant that he failed to get that shipment that day.

Q. That day.

A. It is entirely possible in most cases they picked up the following day or maybe in some cases it has been 2 days later or 3 days later.

Q. Now, have you made any investigation during that period with respect to the time in transit from point of origin to destinations by these various carriers?

A. In the time covered by these pickup reports, no.

Q. Have you done that from time to time in the past, Mr. Macdonald?

A. It was made the last time in, I believe it was September of last year.

Q. Can you tell us anything about the results that were shown there with respect to the time in transit between origin points and destination?

Mr. Fowler: Just a moment. That is objected to as immaterial, the time being too remote.

Exam. Carpenter: Objection overruled.

A. I could substantiate it with figures, but I unfortunately left it in Chicago.

By Mr. Howland:

Q. You didn't bring that out with you?

A. I did not.

Q. You don't recall?

[fol. 282] A. I would not want to be quoted on exact times; that is right.

Q. All right, sir. Do your records which you have here reflect the points of destination of the shipments for which these calls were made to the various carriers?

A. Not day by day. The only thing that I would be able to do would be to go through the complete list of customers that I have here and this complete list also shows the name of the carrier serving that particular account, but as to saying that a particular shipment was missed on a particular day, I can't do that.

Q. For instance, those shipments for which Iowa-Nebraska was called for service and which you say the service was a hundred percent——

A. That is right.

Q. —or for which the Rock Island Motor Transit response was a hundred percent, can you tell us what the destinations of those shipments were?

A. Well, again I would only have to read off all the names of the towns that Iowa-Nebraska is serving our customers in and also Rock Island Motor.

Q. Have you within the past 6 months had any request from the customers in the territory that is here involved on or adjacent to U. S. highway 6 for a change in the carrier to handle shipments to that particular destination?

A. Well, there again I, by process of elimination, could [fol. 283] give it. I have had all of the customer routing change requests along with me here, but it is sorted out by carriers.

Q. By that do you mean——

A. In other words, shall I say if you gave me a particular carrier I could tell you whether in the last 6 months we have had a requested change to that carrier.

Q. Change to that or from that carrier?

A. No; to that carrier. From the carrier I couldn't tell you. We don't make that a part of our record.

Q. The record is kept with respect to the carrier to which the request for change is made——

A. That is right.

Q. —by the customer?

A. That is right, and there is no prior impression made on the routing request change.

Q. What generally has been the service rendered, character of the service rendered by the Rock Island Motor Transit Company to Butler Brothers in the territory in Iowa on or adjacent to U. S. highway 6?

A. Well, I personally have heard no complaints from our customers with reference to their service, and, as I say, our own experience in January has been a hundred percent response to our pickup requests.

Q. In the event of a discontinuance or substantial curtailment of the present service rendered by Rock Island [fol. 284] Motor Transit Company to these Iowa points, would that in any way adversely affect your business, Mr. Macdonald?

Mr. Fowler: Just a moment, please. That is objected to as immaterial for the reason that I haven't heard anybody say that the Rock Island is going to curtail its service. It is objected to as immaterial as this record now stands.

Mr. Howland: I thought you heard Mr. Farrington testify.

Exam. Carpenter: Objection overruled. Go ahead.

Mr. Fowler: Just a moment. I do want to make the objection on the ground that it is immaterial, and I don't find any basis in this record which would justify a conclusion that the Rock Island Motor Transit Company has any intention of curtailing its service no matter what may be the outcome of this application.

Exam. Carpenter: Go on, Mr. Macdonald; go ahead.

Mr. Howland: Do you have the question in mind, Mr. Macdonald?

The Witness: As I recall, the question was, what effect would——

Exam. Carpenter: Read the question.

(Question read.)

Mr. Rosenbaum: Does he mean the operation under the temporary authority, Mr. Howland?

Mr. Howland: Curtailment of service presently rendered.

Exam. Carpenter: That is under the temporary authority?

Mr. Howland: Yes.

A. Of course, I can only answer that by stating that any [fol. 285] curtailment of service, frankly, any place in our territory is detrimental to us because it eliminates the free choice of routing our shipments. We, frankly, continually find ourselves searching for new and better means of transportation. Anything that reduces that choice naturally we feel would adversely affect us.

Mr. Howland: I think you may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. I have just one question, Mr. Macdonald. At the time that freight is picked up at your Chicago dock by Rock Island Motor Transit Company, is the rail-billed freight and truck-billed freight taken up at the same time?

A. No.

Q. There is a separate——

A. We have a separate shipping room for rail and for motor.

Q. You have a separate shipping room for rail freight?

A. Yes.

Q. You do use rail service out into this territory?

A. We do.

Q. As well as motor carrier service?

A. We do.

Q. By several carriers?

A. By several carriers.

Mr. Fowler: That is all.

By Mr. Rosenbaum:

Q. You like to have as many carriers available to you as [fol. 286] possible, don't you?

A. That is right, sir.

By Mr. Cohn:

Q. What are the communities in Iowa where Iowa-Nebraska Transportation is presently serving your company?

A. You are serving us to one customer—Frankly, this list of customers is by customer name alphabetically, and I may repeat the towns as I go along. You have one customer here in Des Moines. Here is another at Colfax. Belle Plaine. Nevada. Ogden.

Mr. Nolan: Those are off-route points.

Mr. Howland: Those are off highway 6, those last three.

The Witness: You put the question of what towns was Iowa-Nebraska serving us.

Mr. Howland: Go ahead.

A. Winterset. Louden, Jefferson. Another at Des Moines. Scranton. Another at Des Moines. Cedar Rapids. Another at Des Moines. Sioux City, Guthrie Center. This one I am going to have to spell, O-n-a-w-a. Ames. Victor. Nevada. Tama, and Marion.

Mr. Cohn: That is all.

Exam. Carpenter: Redirect.

Mr. Howland: Nothing further.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: We will take a 5-minute recess.

[fol. 287] (Short recess.)

Exam. Carpenter: Call your next witness.

D. R. Macdonald, recalled, testified further as follows:

Further Direct Examination.

By Mr. Howland:

Q. Mr. Macdonald, just one or two questions further. You have referred to the fact that on certain occasions that you have had requests for service via particular motor carriers.

A. That is right.

Mr. Howland: I will ask the reporter to mark this as exhibit No. 3, and we will ask leave to substitute a copy for the document so that you can withdraw it and keep it as a part of your files.

(The document referred to was marked as "Applicant's Exhibit No. 3, Witness Macdonald," for identification.)

By Mr. Howland:

Q. Is this exhibit No. 3 one of the requests for routing that you have reference to?

A. That is right. It is a letter received on October——

Mr. Fowler: Just a moment, please.

OFFER IN EVIDENCE AND OBJECTION THERETO

Mr. Howland: We will offer and introduce in evidence the applicant's exhibit 3.

Mr. Fowler: Objected to on the ground it is immaterial, on the ground it is a self-serving declaration, on the ground [fol. 288] that it is hearsay, no opportunity to cross-examine to ascertain the underlying reasons for the letter.

Exam. Carpenter: For the purposes of the record, you may read the letter into the record, but the exhibit will be rejected; just to show what it covered, that is all, Mr. Fowler. I am not accepting it as a part of the record at all. I just want it in the record to show what was rejected.

(Applicant's Exhibit No. 3, Witness Macdonald, was rejected.)

Mr. Howland: Just read the letter to the reporter.

The Witness: It is a letter of October 20, 1951, from R. M. Hildman, Hildman's 5-to-a-Dollar Store, Marengo, Iowa. It is addressed to Butler Brothers, Chicago, Ill., attention traffic department, and reads as follows: "Would like to have merchandise come by Rock Island Motor. Rock Island delivers merchandise to us daily. Iowa-Nebraska line only twice a week and merchandise leaves your house Wednesday, arrives in Marengo the following Tuesday. Yours truly, (signed) R. M. Hildman."

By Mr. Howland:

Q. That is the original letter received by you?

A. That is the original received by us; that is right.

Mr. Howland: There is no further examination.

Exam. Carpenter: Mr. Fowler.

Mr. Fowler: That is all.

(Witness excused.)

[fol. 289] Mr. Nolan: Mr. Lussa.

BERNARD J. LUSSA, was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. State your name, place of residence, and occupation please.

A. Bernard J. Lussa, Chicago, Ill.

Q. What is your occupation?

A. Traffic manager, Rexall Drug Company, Chicago branch.

Q. Do you understand the general scope covered by the instant application?

A. Generally speaking, yes.

Q. That is, for the interstate traffic service from Chicago into the middle section across Iowa?

A. That's right.

Q. What shipments does your company have occasion to make into the Iowa territory on or adjacent to the line served by the Rock Island Motor Transit in this case?

A. There are approximately eight points involved, Brooklin, Iowa, Colfax, Des Moines, Grinnell, Iowa City, Marengo, Victor, and West Liberty, Iowa.

Q. Are your company's shipments of drugs and sundries ordinarily handled by drug stores?

A. Yes; that is correct. In other words, every consignee is a druggist; as a matter of fact, before we give the [fol. 290] account a franchise, there must be a registered pharmacist involved.

Q. They are locally owned drug stores who handle the Rexall lines of pharmaceuticals and sundry supplies?

A. Yes, sir; that is correct.

Q. What are the ordinary size of your shipments into this territory?

A. As a general average, it would approximate about 360 pounds. In other words, there is a range, but as an average.

Q. With what frequency do your shipments move into these particular stores in the towns you have named from your Chicago warehouse?

A. That would be hard to say. It depends on the particular account. I would say over a period of 8 months to those particular destinations named, it would approximately be about 70,000 pounds.

Q. I say, with what frequency——

A. It depends, of course, on the orders of the account. In certain cases, the account may order twice a week or once a week, depending on the account. In other words, we don't have any set shipment schedule except maybe in sale shipments which may be received at a prior time and will ship maybe when more or less convenient just to be sure that the sale dates are respected.

Q. Has your company used the service of the Rock Island Motor Transit Company for handling those shipments to those Iowa points you have named from Chicago?

[fol. 291] A. Yes, sir.

Q. What has been the nature of that service? A. That has been very favorable. I have been with the company 4 years and Rock Island Motor Transit was used formerly also. In other words, those routings were employed before my employment with the organization also.

Q. And have you had routing from your dealers in these towns specifying any particular carriers to serve those stores in those towns?

A. No; I haven't. In other words, I mean we have had those routings in effect and there hasn't been any changes or any complaints whatsoever.

Q. Now, why are you here in support of this application?

A. Well, in our particular business, as mentioned by previous witnesses, a good portion of our business is done with accounts located in these smaller towns and involving these peddle runs and therefore we have found that the services of Rock Island Motor Transit have been favorable in that respect; and we are afraid that if their service is discontinued or curtailed in any way it would jeopardize our position or our interest.

Q. Do you know of any other carrier that will give the same regularity of service to these small towns that you have enumerated in this application as that given by the Rock Island Motor service?

Mr. Fowler: Objected to as calling for the incompetent [fol. 292] conclusion of the witness.

Exam. Carpenter: Objection overruled.

A. Offhand, I don't know of any other carrier that would be able to do it. In other words, I am not saying it can be done or can't be done.

By Exam. Carpenter:

Q. You are just giving that as your opinion, is that right?

A. Yes; that is right, that is my opinion.

By Mr. Nolan:

Q. What would be the effect on your company's business in regard to its sales our outlet for its products to these towns you have named along this route if the services of the Rock Island Motor Transit Company were stopped?

Mr. Fowler: Objected to as immaterial, calling for an incompetent conclusion of the witness, calling for pure speculation and conjecture.

Exam. Carpenter: Objection overruled. You may answer.

A. In my opinion, it would be a question, of course, of the community being involved because of the nature of our item. In other words, I mean these drug lines include pharmaceuticals and it is a question also of competition. I mean there may be local jobbers that they would probably swing most of their business to in contrast to ours. In other words, when we give this franchise, that doesn't mean that they are precluded from buying from other jobbers, so to speak.

By Mr. Nolan:

Q. Let me ask you this: Does the Rexall store, say for

[fol. 293] instance in West Liberty, Iowa, have any other source of supply of Rexall products other than from the Chicago warehouse of the Rexall company?

A. We have of course other distribution warehouses, but for the Middle West part of that territory, it is serviced by the Chicago branch, that is right. In other words, I mean we have exclusive control over our items and we don't deal with any other wholesaler, so to speak.

Q. I mean, there isn't any other source of supply for Rexall products for eastern Iowa except out of your Chicago house, is that right?

A. Yes, sir.

Mr. Nolan: That is all. You may cross-examine.

Exam. Nolan: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, you have used Rock Island Motor Transit Company for several years?

A. Yes.

Q. And you are still using them——

A. Yes.

Q. —to the exclusion of any other common carrier serving these points?

A. Yes, sir.

Q. You want that service continued?

A. Yes, sir.

[fol. 294] Q. And you control the traffic and direct the routing?

A. On the outbound distribution.

Q. From your Chicago office?

A. Yes, sir.

Q. And your shipments consist largely of drugs in shipments of somewhere around 350 pounds?

A. Approximately. That is the general average.

Q. You haven't used any other carrier?

A. For these particular points? No; we haven't.

Mr. Fowler: That is all.

Exam. Carpenter: Any further cross-examination?

Any redirect? You are excused.

(Witness excused.)

ROBERT OZINGA was sworn and testified as follows:

Direct Examination.

By Mr. Nolan:

Q. Will you please state your name, place of residence, and occupation, please?

A. Place of residence also?

Q. Yes.

A. Robert Ozinga, residing in La Grange Park, Ill., employed by Sprague-Warner, a division of Consolidated Grocers Corporation, Chicago, Ill.

Q. What are your duties with Sprague-Warner Company, Mr. Ozinga?

A. I am the traffic manager.

[fol. 295] Q. What products does your company manufacture or distribute?

A. Wholesale groceries.

Q. Are you familiar with the territory covered by the instant application?

A. Yes.

Q. And does your company have accounts in the territory covered by the present application?

A. Yes, sir; we do.

Q. Are you able to enumerate, locate some of those towns?

A. Well, I could read from the list, of course. Would that be permissible?

Q. Surely.

A. Those embraced in the application, I did check to see the recent accounts that we have. We are shipping groceries from Chicago to the following points in Iowa, based on a survey within the last 6 months: Adel, Atlantic, Audubon, Avoca, Brayton, Colfax, Council Bluffs, Davenport, Des Moines, Dexter, Durant, Grinnell, Harlan, Iowa City, Marengo, Minden, Neola, Newton, Oakland, Redfield, Stuart, Victor, and Wilton Junction, and to clarify that,

that list as I said—I want to specify again—that was just the last 6 months' period.

Q. Would you say that you have had accounts in those points or towns for many years?

A. Quite substantially for quite a number of years, long before I came to Sprague-Warner.

[fol. 296] Q. What is the frequency of shipments to those various towns or points, Mr. Ozinga?

A. It will vary according to the number of times, of course, our sales representative calls on the account and the size of the account, but, generally speaking, the minimum would be twice a month and in many cases it is a weekly shipment.

Q. What would you say would be the average size of your shipments going into those points that you have enumerated?

A. About 500 pounds.

Q. What facilities has your company used to get merchandise from your Chicago place of business to these points in the past?

A. Exclusively by common motor carrier as far as the retail stores are concerned in the State of Iowa.

Q. And what particular carrier or carriers have handled shipments from your company in Chicago to these points in Iowa you have enumerated?

A. The points enumerated would be Rock Island Motor, Des Moines Transportation Company, Prucka Transportation Company, Takin Brothers—if Cedar Rapids is in there. Is that included?

Exam. Carpenter: Omit Cedar Rapids.

A. I don't think I read Cedar Rapids. I don't see it listed on this particular list, so scratch out Takin Brothers so far as Cedar Rapids is concerned.

Rock Island Transfer and Storage Company. That would cover the list, I am quite sure.

[fol. 297] By Mr. Nolan:

Q. Have you made any observation with regard to service to what we call the so-called smaller towns or non-key-point towns?

A. Yes; I have.

Q. What company has handled your traffic to those points that you have enumerated?

A. By and large, the Rock Island Motor has proved to be the most reliable carrier to these smaller towns.

Q. Have you had any experience and made any observation of the service offered by some highway carriers in serving only the so-called key towns or bigger points?

Mr. Fowler: Objected to as immaterial, calling for the conclusion and opinion of the witness in the territory involved.

Exam. Carpenter: Objection overruled. Go ahead.

By Mr. Nolan:

Q. In the territory involved?

A. Not recently. We have had some bitter experiences in the past, within the last 3 or 4 years, and now because of the fact the routings have been set up on many of these small towns that I enumerated as moving exclusively by Rock Island Motor Transit Company, through my surveys and correspondence with customers in the Iowa territory and our sales representatives in the State of Iowa.

Q. Do you know of any other facility other than the Rock Island Motor Transit Company who offers the same type of service to these small towns that you have enumerated in the application involved in this case?

[fol. 298] A. I know of none. For broad coverage, I know of none.

Q. What would be the effect upon your company's business if there was a cessation of the Rock Island Motor Transit Company in the Iowa territory and the points you have enumerated?

Mr. Fowler: Objected to as immaterial for the reason that there is no showing in this record upon which any satisfactory conclusion could be based that the Rock Island Motor Transit Company intends to terminate its service irrespective of the outcome of this application.

Exam. Carpenter: Objection overruled.

A. It would be very disastrous due to the fact that our business is based on the selling of groceries to the inde-

very recent ruling of the Iowa Commerce Commission we were forced to make a 6 months' study of one particular strictly peddle operation.

Mr. Fowler: Now I am going to move to strike the last [fol. 320] part of the answer as not responsive to the question, voluntary statement, not the best evidence.

Exam. Carpenter: It is stricken.

Mr. Fowler: Make your speeches in response to the questions, please.

By Mr. Nolan:

Q. Mr. Grice, for the record, what experience have you had in association work insofar as the motor carrier industry is concerned?

Mr. Fowler: That is objected to as immaterial.

Exam. Carpenter: Objection overruled.

A. I have been a member of the Western Trunk Line Motor Common Carrier Bureau from its inception on the so-called rate committee. One other member and myself are the two oldest members of the Midwest Motor Freight Tariff Bureau. I have been president and secretary of the Illinois-Minnesota Carriers Conference over a period of about 6 years. I am not an official there at the present time.

I was chairman of the Iowa Motor Carrier group for a period of approximately 10 years. At one time I was quite involved in Central States Motor Freight Tariff Bureau. I was also involved in the organization of the Minnesota Regulated Motor Transportation Association and have held other minor capacities such as treasurer or secretary of other so-called group meetings.

By Mr. Nolan:

Q. In your work in these various bureaus and organiza- [fol. 321] tions, state whether or not you do come in contact with the operating problems, the operating conditions of other motor carriers in the Iowa territory.

A. I do.

pendent food store throughout the country, the independent retail merchant by and large. We do have other institutional accounts, but some of those, of course, are located in the smaller towns, too. We need reasonable and consistent service to every points in which we are shipping groceries because, of course, of the local competition.

By Mr. Nolan:

Q. Mr. Ozinga, does a limitation in regard to the size of shipment—would it have any adverse effect upon your company's ability to use the facilities of the Rock Island Motor Transit Company in this case?

Mr. Fowler: Objected to on the ground it calls for an incompetent conclusion of the witness.

[fol. 299] A. Yes; it would.

Exam. Carpenter: Objection overruled.

A. While our average perhaps is 500 pounds, on many occasions throughout the year, perhaps in the fall on new pack items, as we call them, volume shipments over 5,000 pounds go out quite frequently to many of the stores in the Iowa section embraced by this application.

Q. Would those so-called volume shipments go to these small towns or small points?

A. Not necessarily. Some of them do. It just depends upon the sales ability of our salesmen in complete coverage within a store. It has happened consistently.

Q. Then, as I understand your testimony, Mr. Ozinga, so far as your company is concerned, you have established your service based and predicated upon the service the Rock Island Motor Transit Company was giving prior to any restriction or limitation on its operation, is that correct?

Mr. Fowler: Objected to on the ground it is leading.

Exam. Carpenter: Objection overruled.

The Witness: May I have that question again?

Exam. Carpenter: The question was a statement. Read it, please.

Mr. Nolan: Kind of a summary.

Mr. Fowler: That is objected to as immaterial to any issue in this case.

Exam. Carpenter: Objection overruled.

By Mr. Nolan:

Q. Now, Mr. Grice, a member of what different trucking associations is your company?

A. American Truck——

Mr. Fowler: Just a moment; please. Objected to as immaterial.

Exam. Carpenter: Objection overruled.

A. We belong to the American Trucking Association, Central States Motor Truck Association, Minnesota Regulated, Illinois Motor Carriers Conference. Probably several others. Iowa Motor Carriers Association.

By Mr. Nolan:

Q. You say the Iowa Motor Carriers?

A. Yes.

Q. Now, Mr. Grice, are you familiar with the operations of the Chicago-Dubuque Motor Transportation Company?

A. Very much so.

Q. Just state briefly for the record what operations are conducted by the Chicago-Dubuque Transportation Company.

A. They conduct an operation between Chicago, Ill., and [fol. 322] Dubuque, Iowa, and Dubuque, Iowa, and La-Crosse, Wis., and all intermediate points.

Q. Who is the managing officer of that company?

A. A. A. Burgmeier is president.

Q. How long have you been personally acquainted with the operations of the Chicago-Dubuque Motor Transportation Company?

A. Since about 1926.

Q. That company is a competitor of yours, is it not?

A. Certain of its operations are competitive between Dubuque and Chicago and the intermediate points.

Q. Now, are you acquainted with the operations of that company insofar as this present application would be af-

Exam. Carpenter: That is right.

(Question read.)

[fol. 300] A. That is correct.

Mr. Nolan: You may cross-examine.

Cross-Examination.

By Mr. Fowler:

Q. You don't mean to leave the impression that you have very many shipments exceeding 2,000 pounds to these small towns, do you?

A. I possibly could find one. I can't testify at the moment to any particular town; no.

Q. Generally speaking, your shipments are less than 2,000 pounds?

A. Generally speaking, they are.

Q. At the present time, to satisfy your transportation requirements to these Iowa points, you are using about four motor common carriers, including the Rock Island Motor Transit Company?

A. To these points named or point, in many cases that is true. Four. I think I noticed Iowa City. That is why I was thinking of Takin Brothers at the time and perhaps a correction should be made, so I think that will make five.

Q. You use Des Moines Transportation Company?

A. That is correct.

Q. To points, I presume, in Iowa west of Davenport?

A. That is correct.

Q. And you use——

A. By and large, Des Moines. There may be exceptions to that.

Q. —use Proucka?

[fol. 301] A. We use Proucka to Council Bluffs.

Q. You use the Rock Island Transfer and Storage Company, I suppose that is, to Davenport?

A. That would be the Tri-City area; yes.

Q. Takin to Cedar Rapids and Iowa City?

A. That's right.

Mr. Fowler: That is all I have.

Exam. Carpenter: Any further cross-examination? Any redirect? You are excused.

(Witness excused.)

W. R. Hoppe was sworn and testified as follows:

Direct Examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, Mr. Hoppe?

A. W. R. Hoppe. My residence, Chicago, Ill. I am a traffic manager for A. C. McClurg and Company.

Q. What is the nature of the business of the A. C. McClurg company?

A. We are wholesalers in school supplies, office supplies, housewares, books, and various sundries.

Q. And to whom does your company ship its products?

A. We supply principally small dealers. That is, the small independent dealer in small communities. We also serve schools and libraries and, furthermore, different types of institutions.

[fol. 302] Q. Now, are you familiar with the services performed by the Rock Island Motor Transit Company between Chicago and Omaha through the Tri Cities, Des Moines, over U. S. highway No. 6?

A. Yes, indeed.

Q. Has your company used the services of the Rock Island Motor Transit Company in that territory and over that route?

A. Yes, sir; we have used that service, as far as I recall, since about 1938 up to now.

Q. Prior to that did you use the White Line Transfer and Storage service or White Line Motor Truck Company service?

A. Prior to that time, if I may explain, there was really no need for White distribution since 1937 because we were principally governed by book distribution and school supplies alone and then in 1937 and 1938 we took over a varied

line of housewares and glassware and earthenware. In fact, we bought several concerns of that nature, so for that reason our distribution had to be more intense and we went into these smaller communities in Iowa and consequently our transportation problem became a more important one.

Q. Do you have salesmen in the territory involved in this case?

A. Yes, sir. We have a sales department right here in Des Moines with two representatives.

Q. State whether or not your company has regular customers in the towns along U. S. highway No. 6 and towns tributary to U. S. highway 6 between Davenport and Omaha, Nebr.

[fol. 303] A. Yes; we have. I could repeat the towns like the other gentlemen have done, and I may say also that we have about 500 accounts in Iowa. Of those 500 accounts about 10 percent are located along highway 6, distributed among these smaller towns, Brooklyn—as I say, I have the list here. I would be glad to repeat it if you wish me to.

Q. For the sake of brevity, would it be safe to say that your company has customers in practically every incorporated town and village between Davenport and Omaha, Nebr.?

A. That is right, because of the diversity of our mode of distribution.

Q. State whether or not your company has a regular flow of shipments into practically all these towns throughout the year.

A. Yes, sir; because the will more or less depend on the season. For instance, at this time of year we will supply principally hardware stores and variety stores with garden implements and housewares, and so forth. Then as the summer goes along, the school supply needs and book needs will develop and then further in the season, of course, our trade will principally concentrate on merchandise intended for the holidays.

Q. Now, what would you say would be the average size shipment going into these small towns, the intermediate points or small communities?

A. The average size shipment is very much based on the ability of the small dealer and consequently the shipments [fol. 304] are limited to between 350 and 500 pounds.

not responsive to the question and ask that the question be read to him.

[fol. 325] Exam. Carpenter: The answer is stricken. Read the question.

(Question read.)

A. Yes.

Exam. Carpenter: Proceed.

By Mr. Nolan:

Q. Now, you may answer my question.

The Witness: Will you read the question?

Exam. Carpenter: Read the question, please.

(Question read.)

A. Mr. Burgmeier advised me that the reason he was interested in this application was that it was the only ways and means that they had available of disposing of certain freight which they originated through an interchange with the Rock Island Motor Transit.

Mr. Fowler: I move to strike the answer of the witness on the ground it isn't responsive to the question, on the ground that he is restating hearsay evidence as to what Mr. Burgmeier told him.

Mr. Nolan: That may go out.

Exam. Carpenter: Objection sustained.

By Mr. Nolan:

Q. Mr. Grice, state whether or not you know of your own personal knowledge if the Chicago-Dubuque Transportation Company originates any freight on any points on its system to points destined in Iowa served by the Rock Island Motor Transit.

[fol. 326] A. Why, I would assume from the points that they serve they do. I do not have any definite knowledge of any particular movement or any particular origin or any particular destination that is involved.

Q. I will put it this way. Your company runs side by side with the Chicago-Dubuque Transportation Company between Dubuque and Chicago, doesn't it?

Q. Does your company ever have occasion to ship single shipments to any of the dealers in excess of 5,000 pounds?

A. Rarely. Perhaps only at the time that a new store is opened or at a time when a school supply order is shipped, which may be used for various consolidated schools within the district.

Q. What transportation facilities has your company been using now since 1938 when you expanded your business to serve these points in Iowa between Davenport and Council Bluffs and also points close along that line?

A. We have been principally guided by a service feature which has also been coupled with safety and experience, and for that reason we have used Rock Island Mofor Transit quite exclusively.

Q. What has been the nature of that service as to being satisfactory or otherwise?

A. It has been without fault for, I should say, the 15 years during which we have used the service, and I am saying that without any exaggeration.

Q. Do you know of any other carrier that offers the same type and character of service to these small towns for your company's distribution of its products into the Iowa territory?

A. If such carriers exist, they have made no attempt to solicit our business.

Q. What would be the effect upon your company's business and its operations in particular if there was a cessa- [fol. 305] tion of the operation of the Rock Island Motor Transit Company in the type of service it has been giving in the past into the Iowa territory covered by this application?

Mr. Fowler: That is objected to as immaterial, calling for an incompetent conclusion of the witness, for the same reason that I have given with respect to similar questions asked previous witnesses.

Exam. Carpenter: Objection overruled.

A. Of course, it is difficult to predict such a situation, but in rendering my opinion I would say that we are seriously concerned should such a situation take place because it stands to reason that it has taken considerable amount

of effort and money to develop that market. If we were to lose a carrier whom we have been depending on for years, it would no doubt interfere with a successful operation.

By Mr. Nolan:

Q. Do you know where you could replace the Rock Island Motor Transit Company by another carrier who would give you the same type of service you have been getting in the past?

Mr. Fowler: Objected to as repetition.
Exam. Carpenter: Objection sustained.
Mr. Nolan: This is just another final wind-up.
Exam. Carpenter: Let's wind up.
Mr. Nolan: You may cross-examine.

Cross-Examination.

By Mr. Fowler:

Q. As I understand it, you have been using Rock Island [fol. 306] Motor Transit for years?
A. That is right.
Q. You are satisfied with their service?
A. Yes, sir.
Q. You haven't had occasion to use any other common carrier by motor vehicle?
A. No, sir.

Mr. Fowler: That is all.
Exam. Carpenter: Any further cross-examination? Any redirect?

Redirect Examination.

By Mr. Nolan:

Q. Have you ever been solicited by any other carrier that offers you the same type of service?

Mr. Fowler: That is objected to as repetition.
Exam. Carpenter: Objection overruled.

A. That is correct.

Q. State whether or not the Chicago-Dubuque company handles general commodities over that route.

A. They do.

Q. And from your experience in the motor carrier business, do you have an opinion as to whether or not the Chicago-Dubuque Transportation Company would reasonably have shipments originating on its line to points destined in the Iowa territory served by the Rock Island Motor Transit?

Mr. Fowler: Objected to on the ground it is immaterial, calls for hearsay.

Exam. Carpenter: Objection sustained.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

Exam. Carpenter: Any cross-examination? You are excused.

(Witness excused.)

OFFER IN EVIDENCE

Mr. Nolan: In connection with the testimony and identification of the witness, the interveners whom I represent [fol. 327] offers applicant's exhibit 4 into evidence.

Exam. Carpenter: The document is received as exhibit No. 4.

(Applicant's Exhibit No. 4, Witness Grice, was received in evidence.)

C. A. KINNER was sworn and testified as follows:

Direct Examination.

By Mr. Howland:

Q. Will you state your name, please, and in answering the questions speak so that everyone in the hearing room will have no difficulty in hearing you.

A. C. A. Kinner; my home is in Chicago, Ill.

Q. What is your business, Mr. Kinner?

A. I am terminal agent for the Rock Island Motor Transit Company in Chicago.

A. I mentioned previously that we have not been solicited.

Mr. Nolan: I just wanted to get the last question.

Exam. Carpenter: You just wanted to get in the last word.

Mr. Nolan: That is all.

(Witness excused.)

GEORGE V. BISHOP was sworn and testified as follows:

Direct Examination.

By Mr. Howland:

Q. Will you state your name, and speak so we can all get your answers to the questions, please.

[fol. 307] A. George V. Bishop.

Q. Where do you live, Mr. Bishop?

A. Chicago.

Q. What is your business?

A. I am assistant manager of the Clipper Transit Company at Chicago.

Q. What is the business of the Clipper Transit Company?

A. We haul common carrier out of Wisconsin from Chicago.

Q. The Clipper Transit Company is a motor carrier holding authority from what points in Wisconsin to Chicago?

A. From Green Bay, we take in all the principal cities down.

Q. Down to Chicago?

A. That is right, on the eastern part of the State.

Q. Eastern Wisconsin?

A. That is right.

Q. Does that include service to and from points on Lake Michigan such as Manitowoc?

A. That is our home office.

Q. Your home office is at Manitowoc, Wis.?

A. That's right.

Q. I take it Sheboygan and Two Rivers and Milwaukee are points served by your operation?

A. Milwaukee is out.

Q. And how long have you been employed by that company?

A. Since December 1, 1939.

Q. And in what capacities have you worked for the Rock Island Motor Transit Company?

A. Approximately 5 years as a rate clerk and 7 years as terminal agent.

Q. And does the Rock Island Motor Transit Company have a terminal in the City of Chicago, Ill.?

A. They do.

Q. Where is that terminal facility located and about what is the size of it and extent of the facilities that you have there?

[fol. 328] A. It is located at 1159 South Well Street. The length of the terminal is approximately 1,200 feet. We have 28 doors and the dock is 90 feet in width.

Q. Now, this terminal facility is in a building that is owned by the Rock Island Railway Company, is it?

A. That is right.

Q. And how long has the Rock Island Motor Transit Company had its Chicago terminal at this particular place?

A. Well, to my knowledge, since December 1, 1939, and I know that they had it prior to that time.

Q. Do you have an office there in connection with that terminal also?

A. Yes, sir.

Q. And about how many people are employed in the office?

A. At the present time, there are 12.

Q. Now, do you also have some regularly assigned employees on the dock at the terminal?

A. We have 18 dock men at the present time.

Q. Who is it performs pickup and delivery service on your motor carrier shipments in the City of Chicago?

A. We maintain all of our own city equipment.

Q. About how many pickup and delivery units does that include?

A. We have 12 straight trucks, 12 city tractors, and 18 trailers.

Q. And the size of the trailers is approximately what?

A. They vary from 20 feet to 32.

Q. Milwaukee is not, but the other points are?

A. That's right.

[fol. 308] Q. Do you have shipments originating on your lines that are destined to points in Iowa along U. S. highway 6?

A. I do.

Q. What has been your experience, Mr. Bishop, with respect to finding motor carriers in Chicago to handle the smaller shipments in interline service to those destinations?

A. Well, whenever there is a movement coming down and we are having trouble in order to get it off, it is handed to me to find a carrier.

Q. What is your experience as to having had some difficulty in finding carriers to handle those shipments?

A. Well, I look up the guide and if I see a line in there I get in touch with them. I have a few towns here that I brought along with me that we have given to Rock Island Motor.

Q. Would you mind giving us those destinations to which you have customarily made deliveries in interline service to the Rock Island Motor Transit Company?

Exam. Carpenter: Pardon me a minute. I don't think he answered your prior question, Mr. Howland.

Mr. Howland: He didn't fully answer it.

Exam. Carpenter: No; he didn't. Better follow that one up.

Mr. Howland: Thank you. I will withdraw this question.

By Mr. Howland:

Q. What experience have you had with respect to experiencing difficulty, if any, in finding carriers who are [fol. 309] willing to handle shipments of, say, 500 pounds or less into the Iowa territory to destinations, the smaller intermediate points, not points like Davenport or Des Moines, but say points like Marengo or Durant or Ladora or West Liberty or Victor or Grinnell or Kellogg, have you had experience of that kind?

A. I have been with Clipper for 16 years. I opened them up in Chicago, so I know.

[fol. 329] Q. And your straight trucks that you have referred to have about what capacity?

A. In length, they run from 12 to 18 feet.

Q. About what is the physical capacity of your trucks with respect to the load that can be transported by each of those truck units?

A. By weight?

Q. Yes.

A. The straight trucks are licensed to haul 4 tons. The tractors and trailers are licensed to handle 10 tons.

Q. About how many employees do you have; that is, truck drivers or helpers who are assigned to pickup and delivery service in the Chicago area?

A. We have 24 city drivers.

Q. And that is in addition to your dock employees?

A. That is right.

Q. Now, these units that you have been telling us about, are these units used, particularly the trailer units, in over-the-road service or inter-city service?

A. No; those are strictly in the city.

Q. Those are assigned——

A. And suburban territory.

Q. —to the City of Chicago and its immediate territory?

A. That is right.

Q. In what parts of the City of Chicago has the Rock [fol. 330] Island Motor Transit Company performed pickup and delivery service for motor carrier business?

A. The whole metropolitan area, which includes as far east as Gary, Ind., west to Proviso, north as far as the Wisconsin State line.

Q. That is beyond Waukegan, Ill.?

A. Waukegan is right.

Q. And those points are the limits, generally speaking, of the Chicago commercial zone as defined by the Interstate Commerce Commission?

A. That is right. Well, we have interstate permits to points outside of the zone also.

Q. In any event, you have, and are now serving, the Chicago commercial zone with pickup and delivery service?

A. That is right.

Q. Have you operated any peddler service outside of the

Q. All right, tell us what your experience has been.

A. Well, we have had quite a time getting our freight in Chicago not only in your territory in Iowa but all over, and it keeps me busy trying to get it routed.

Q. Keeps you busy trying to get it routed to destination?

A. That is right.

Q. Just tell us what the experience has been with carriers along U. S. highway 6 other than the Rock Island Motor Transit.

A. I am not familiar with highway 6. I don't know just where it is, where it runs.

Q. Well, what are the destinations with which you are familiar? Have you had any difficulty in getting rid of your shipments destined to Iowa points within the period of the last year or two to get service into destinations in Iowa?

A. No; I haven't had any trouble because whenever I have a point that Rock Island makes, I call them up and they have served us very well.

Q. What points are those?

A. These particular points are Oxford, Nichols, Wilton [fol. 310] Junction, Walcott, Wellman, and I believe they are off-line points.

Q. Wellman is an off-line point.

A. Yes.

Mr. Nolan: Served by U. S. No. 6.

By Mr. Howland:

Q. What organization or association of motor carriers is Clipper Transit Company a member of?

A. We are a member of the Central group——

Q. The Central——

A. —the Wisconsin group.

Q. The Wisconsin and Central States?

A. That is right.

Q. That is your tariff-publishing authority for that service?

A. That is right.

Q. Now, what common carrier organizations does your company belong to?

City of Chicago on U. S. 34 between Chicago and any other Illinois points? That is, do you operate a peddle run to serve Illinois points on U. S. 34?

Mr. Cohn: Objection. It isn't involved in this proceeding, what his peddle run is on U. S. 34.

Mr. Howland: I think the witness should answer as to what the service is.

Exam. Carpenter: Of course, it isn't involved here, Mr. Howland, in Illinois.

[fol. 331] Mr. Howland: It isn't directly involved; no.

Exam. Carpenter: Objection sustained.

By Mr. Howland:

Q. What service have you since about November 1, 1951, operated out of Chicago west into the Iowa territory?

A. We operate units to Des Moines proper.

Q. And about how many is that?

A. That runs about two a day.

Q. Is that on a daily basis?

A. That is a daily basis.

Q. How many days a week?

A. That is 6 days, daily except Sunday.

Q. Six days a week; that is two units to Des Moines proper?

A. Two units.

Q. What is loaded into those units?

A. That is for Des Moines proper, and for connecting line freight that is transferred to——

Q. Interlined at Des Moines?

A. That is right.

Q. All right. Now, what other service have you maintained since about November 1, 1951?

A. We operate a trailer from Chicago to Des Moines which moves overhead and peddles from Des Moines west to Council Bluffs. We load one trailer to Des Moines that peddles north from Des Moines to St. Paul, and that is the extent of our operation over route 6 with the exception of our Kansas City business which also moves through Des [fol. 332] Moines.

Q. How about the service rendered to Davenport and points intermediate between Davenport and Des Moines?

A. Common carrier organizations?

Q. Yes. Do you belong to the ATA organization?

A. No; I couldn't vouch for that. Everything like that is handled at Manitowoc and I couldn't say that we do.

Q. About how long a period has your experience covered with respect to having difficulty in getting a shipment into the hands of an interline carrier for destination in Iowa?

Mr. Fowler: Objected to——

A. I can't answer that because I don't remember of any instance that has come up.

[fol. 311] By Mr. Howland:

Q. About what size are these shipments that you have referred to that have been delivered to the Rock Island Motor Transit?

A. The largest shipment was 400 pounds. They range from 100 up to 400. There were five different shipments.

By Mr. Fowler:

Q. How many shipments?

A. Five. Those are the ones that I just——

Mr. Fowler: I understand.

Mr. Howland; You may cross-examine.

Mr. Fowler: I have no cross.

Exam. Carpenter: No cross. You are excused.

(Witness excused.)

V. G. Grice was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you please state your name, place of residence, and occupation?

A. My name is V. G. Grice, 966 Victoria Street, Dubuque,

A. We load one truck a day to Davenport proper, to the Tri Cities proper. We load one to Davenport that peddles west on route 6 from Davenport to Iowa City.

Q. What service do you have to Cedar Rapids, Iowa?

A. We operate a truck daily except Sunday from Chicago to Cedar Rapids via Iowa City.

Q. What freight is customarily loaded into that truck?

A. Cedar Rapids and Iowa City.

Q. Does that serve any points intermediate between Davenport and Iowa City?

A. Occasionally it handles West Liberty, but the peddle freight between Davenport and Iowa City is handled primarily on a truck that is loaded into Davenport.

Q. Now, what other service have you customarily operated from Chicago in a westerly direction since about November 1, 1951? Have you described it all to this territory on U. S. highway 6?

A. Over 34 and 92 and 6 in Illinois we operate——

Q. That is outside of the scope of this application.

A. I believe it does involve route 6 in a part of Illinois but not in Iowa.

Q. But not in Iowa?

A. That's right.

[fol. 333] Q. All right. About what times of day do these schedules customarily depart from the City of Chicago? About how are the schedules arranged for the operation of these units into the Iowa territory?

A. Between 7:30 and 9 p. m. is the leaving time.

Q. Do you have any service into Atlantic, Iowa, by separate unit or is that handled in some other manner?

A. That is handled in the truck that goes overhead to Des Moines and breaks bulk at the first point west of Des Moines and moves from there on to Council Bluffs.

Q. You haven't been handling any Chicago-to-Omaha traffic since August 31, 1951, as I understand it.

A. Not direct over our own line; no, sir.

Q. About what is the usual running time from your terminal in the City of Chicago to Davenport, Iowa?

A. Between 5 and 6 hours.

Q. Now, are you familiar with the interline arrangements between the Rock Island Motor Transit Company and other

Iowa, general manager of H & W Motor Express Company also of Dubuque, Iowa.

Q. How long have you been engaged in the motor carrier business, Mr. Grice?

A. 23 years, 21 with H & W Motor Express Company.

Q. And for the record, what are the operations of H & W, equipment and personnel?

[fol. 312] A. Well, the operating authority of H & W Motor Express Company, as contained in certificate MC-69224 and subs, briefly, is Chicago to Waterloo and Cedar Falls, Iowa, all intermediate points, the Tri Cities, consisting of Davenport, Moline, and Rock Island to the Twin Cities and all intermediate points; and another sub from Clinton to Dubuque and intermediate points; Dubuque to Des Moines and intermediate points, and various segments connecting these various operations.

Q. State whether or not your company is authorized and does engage in both inter- and intrastate operations over these routes?

A. Interstate operations for the most part on general commodities without exceptions and intrastate in the States of Iowa and Illinois. Minnesota is strictly interstate.

Q. You have all Iowa authority, too, do you not?

A. Yes.

Q. Now, Mr. Grice, tell us the personnel and equipment of the H & W Motor Express Company.

A. We have approximately 260 employees, about 260 units of equipment.

Q. State whether or not you are familiar with the service proposed by the Rock Island Motor Transit Company in this case.

A. I am.

Q. And are you appearing here in support of the application?

A. I am.

[fol. 313] Q. Why are you appearing here in support of the application? How does the proposed service affect your company's operation?

A. We have a large amount of interchange with the Rock Island Motor Transit, both on freight that we originate and freight that they originate. We have common points

carriers coming into Chicago from the north or from the east with respect to with whom you have interline arrangements at Chicago?

A. Yes; I am familiar with that.

Q. Have you handled those matters since you have been terminal agent at Chicago, Ill.?

A. For the past 3 years.

Q. About how many carriers are there, to your knowledge, whose lines terminate at Chicago and who have in-
[fol. 334] terline arrangements in interstate commerce with the Rock Island Motor Transit Company at that point?

A. Approximately 120.

Q. Can you tell us anything about the experiences that you have had of receiving from interline carriers at Chicago shipments destined into the Iowa territory either on U. S. highway 6 or on other routes where the shipments have averaged, say, less than 500 pounds in weight?

A. We handle a good many of those shipments.

Q. What is the fact as to whether those shipments are on occasion delivered to you even though they are routed via other lines out of Chicago originally on the billing?

A. Our files are full of bills, connecting line bills, that show a route other than Rock Island Motor which has been scratched off and our name put in.

Mr. Fowler: I want to object to that on the ground that it isn't responsive to the question, but more particularly for the reason that it isn't the best evidence, and I didn't have an opportunity to interpose an objection.

The Witness: I have got it.

Mr. Fowler: Your lawyer will tell you how to proceed.

Exam. Carpenter: Objection overruled.

By Mr. Howland:

Q. At the time of our last hearing, I think that I requested you to produce certain interline bills and there
[fol. 335] were produced at that time certain interline bills. Have you made an effort to produce interline bills bearing dates within the last 6 months involving somewhat similar——

A. No; not the last 6 months.

of interchange at Des Moines, Cedar Rapids, and the Tri Cities, and in some respects we are competitive to the Rock Island Motor Transit.

Q. Are there any points served by the Rock Island Motor Transit that your company has authority to serve at which you interline traffic for those destination points?

A. There is.

Q. What points?

A. We have authority to serve every point on U. S. highway 6 from the Tri Cities to Des Moines.

Q. Why do you interline? Why do you exchange that traffic with the Rock Island Motor Transit Company instead of delivering it yourself?

A. Insufficient volume to conduct the operation at a profit.

Q. Now, you said you have been in the motor carrier business 23 years. Has that been in the Iowa territory?

A. That is correct; it has all been in the Iowa territory.

Q. And of course, in connection with your operation in Illinois and Minnesota?

A. In Illinois and Minnesota.

Q. Mr. Grice, has there been any change from your [fol. 314] observation and experience in the so-called peddle runs of motor carrier operation, including your own company's operation?

Mr. Fowler: Just a moment. Objected to as immaterial to any issue.

By Mr. Nolan:

Q. In recent years.

Exam. Carpenter: Read the question.

(Question read.)

Exam. Carpenter: Objection overruled.

A. From the standpoint of, roughly, five carriers predominantly in the State of Iowa, as compared to 15 years ago, you would never recognize the same set-up of service.

Mr. Fowler: I move to strike the answer of the witness as not responsive to the question.

Q. These bills that you have are the same bills that you produced then in September 1951?

A. That is right, sir.

Q. What is the fact as to whether the experience that you have had with respect to that has continued beyond September 1951 up to the present time?

Mr. Fowler: Objected to as not the best evidence.

Exam. Carpenter: Objection overruled.

A. There has been no decided change. We are still getting bills daily that are routed via other carriers, particularly on merchandise that is of a bulky nature or freight that is hard to handle or to points that are other than key points.

Mr. Fowler: I move to strike the answer of the witness on the ground that it isn't responsive to the question, it was voluntary, and not the best evidence.

Exam. Carpenter: Read the question and the answer.

(Question and answer read.)

Exam. Carpenter: Objection overruled.

By Mr. Howland:

Q. I would like to ask for you to explain the term, "key points," that you used in connection with your last answer, Mr. Kinner.

[fol. 336] A. I mean the larger towns like Davenport, Iowa City, Newton, Des Moines, Atlantic, and Council Bluffs.

Q. Mr. Kinner, since about November 3, I believe it is, 1951, the Rock Island Motor Transit Company has been operating with a maximum restriction of 5,000 pounds on any shipment moving in interstate commerce, is that true?

A. That is right.

Q. And can you tell us what experiences you have had with respect to having requests for service from your customers or from interline accounts in the Chicago area for shipments in excess of the 5,000-pound——

Mr. Fowler: Now, wait a minute——

A. I have some records here on that.

By Mr. Nolan:

Q. Now, you might detail that more, Mr. Grice, so we will know more specifically what you mean.

Mr. Fowler: Better give me a ruling on my motion to strike.

Exam. Carpenter: Motion denied.

A. Well, at one time roughly 15 years ago, the set-up on the so-called peddle operations was about as good in the State of Iowa as you could find any place. As time has gone on, the peddle operations, for the most part and with exceptions, has deteriorated to the point where there is no service left on peddle operations.

Mr. Fowler: I move to strike the answer of the witness on the ground it is immaterial to any issue in the case. It is [fol. 315] merely a statement of his own opinion, has no bearing on any issue in this case, and I had no chance to interpose the objection at the time the question was asked.

Mr. Cohn: It isn't responsive, Mr. Examiner. If you will have the question read back, he asked him about his own company.

Exam. Carpenter: No, he didn't. It was a broader question than that. Read the question and answer, please.

(Question and answer read.)

Mr. Nolan: Maybe we can expedite this.

By Mr. Nolan:

Q. Mr. Grice, you say that your company has interlined traffic with the Rock Island Motor Transit to points where your company has authority to serve.

A. That is correct.

Q. And that is particularly between Davenport and Des Moines?

A. That is right.

Q. Now, from your observation has a similar situation prevailed between other carriers in the State of Iowa in the territory covered by this application, if you know?

Mr. Fowler: That is objected to on the ground it is im-

Mr. Fowler: Go ahead.

Exam. Carpenter: All right, answer the question.

A. We get a good many calls from shippers and we are tendered many shipments for points on route 6 that we turn down due to the fact that the weight is over 5,000 pounds.

By Mr. Howland:

Q. Do you have some references with you to such shipments?

A. I have some data that our dispatcher compiled showing the date, shipper or connecting line, whichever the case may be, the destination, and the weight.

Q. Between what dates does that——

A. I have the months of January, February—There is [fol. 337] December, January, February.

Q. December 1951 and January and February 1952?

A. Yes, sir.

Q. And did you ask your dispatcher to make up such a record, or do you keep it in the ordinary course of business, or how come these three sheets to be made up?

A. We kept that in the interest of solicitation. We hope that if we get full authority we can contact these shippers and connecting lines and advise them of the fact that the restriction has been lifted and that we are able to handle those shipments that we have been turning down.

By Exam. Carpenter:

Q. Were they made at your direction?

A. Yes, sir.

(The documents referred to were marked as applicant's exhibits Nos. 5 thru 7, Witness Kinner, for identification.)

By Mr. Howland:

Q. Referring to a paper which has been marked by the reporter as applicant's exhibit 5, Kinner, I notice that there appears on this list some eight different items and they all seem to bear dates 12-3, 12-5, 12-6, or similar items. For what month do the items appearing on exhibit 5 cover?

material to any issue in the case, calling for an incompetent conclusion of the witness.

Exam. Carpenter: Objection sustained. I will sustain the other objection ahead of that.

By Mr. Nolan:

Q. Mr. Grice, have you had any experience so far as your [fol. 316] company is concerned with carriers who have authority to operate over particular routes in the State of Iowa and routes which may be entailed in this present application where they have refused to take so-called smaller shipments or drop shipments to these peddle-run points?

Mr. Fowler: Just a minute. That is objected to as immaterial, objected to for the reason it is calling for hearsay evidence; it is objected to for the reason it is calling for an incompetent conclusion of the witness, and there is no foundation in the record to justify the question or the answer.

Exam. Carpenter: It is restricted to his own operation.

Mr. Nolan: That is right. He has had experience along that line.

Exam. Carpenter: Objection overruled.

The Witness: Will you read that question back?

(Question read.)

Mr. Fowler: I will withdraw my objection and object to it on the ground it is immaterial.

Exam. Carpenter: Objection overruled.

A. Yes.

By Mr. Nolan:

Q. Now, Mr. Grice, do you know of any carrier who has authority to handle interstate shipments serving the Iowa territory and particularly the territory involved in this application who perform the over-all service to intermediate points, peddle points and so-called key points, that the Rock [fol. 317] Island Motor Transit has been serving?

Mr. Fowler: That is objected to as immaterial.

Exam. Carpenter: Objection overruled.

A. December 1951.

Q. Now, what about exhibits 6 and 7?

A. Exhibits 6 and 7 cover the period from January 14, 1952, to March 4, 1952.

[fol. 338] Q. And I notice on these exhibits that in some instances under the designation of shipper there seems to be what I would take to be other trucking lines. For instance, Federal Truck appears on exhibit 7.

Mr. Fowler: Now, Mr. Howland, I don't want you to read from the exhibit until we get it admitted.

Mr. Howland: I will withdraw that question in view of the objection.

By Mr. Howland:

Q. I will ask this, under the designation of shipper on these exhibits 5, 6, and 7, what appears on those exhibits?

A. First is the date, then the shipper or connecting line, as the case may be, then the destination and then the weight.

Q. In other words, if the entry under the column "Shipper" appears to be another truck line, that indicates that it was a shipment tendered by an interline account?

A. That is right.

Q. And if it is the name of a company, not a truck line, for instance, Ryerson Steel Company or something that way, that indicates the name of the shipper who tendered the shipment?

A. That is right.

Q. Are these exhibits 5, 6, and 7 actual shipments so tendered to the Rock Island Motor Transit Company in Chicago during the months of December, January, and February, and up to March 4, 1952?

[fol. 339] A. That is right.

Mr. Cohn: What is the period covered on exhibit 7? I am not quite clear.

Mr. Howland: February 1 to March 4.

Mr. Fowler: February 14 to March 4.

Mr. Howland: 1952.

Mr. Fowler: I would like to interrogate the witness in connection with these exhibits if they are going to be offered.

A. There are certain points where other lines will accept the freight, dependent upon the type of freight and the size of the shipment. There are other points where we would have no alternative but to use the Rock Island Motor Transit Company. I have in mind particularly Newton. There are some carriers that will accept a Newton shipment from us at the Tri Cities. As far as a shipment destined to a point like West Liberty or Durant or Grinnell, unless the shipment was a full truckload you couldn't get anybody to take it and then they would be very reluctant to take the full load to Grinnell or Iowa City due to the shortness of the haul.

Mr. Fowler: Just a moment. I move to strike that part of the answer in which he is attempting to say what the other carriers would do as an incompetent conclusion of the witness and hearsay.

Mr. Nolan: I might qualify that question and answer a little bit.

Mr. Fowler: I am not worried about your question. I am now worried about his answer. I move to strike that part of the answer where he is undertakin- to testify as to what some other carrier will do.

Mr. Nolan: I ask the examiner to reserve ruling until this [fol. 318] next question is asked and answered.

Mr. Fowler: Just for the record, to keep the record straight, I think you should rule on that motion. I am just trying to keep this orderly. This thing is going to be looked at.

Exam. Carpenter: Go ahead; ask your next question.

By Mr. Nolan:

Q. Mr. Grice, your company has had experience in the particular instances which you have referred to about other companies taking traffic where it was desirable and refusing to take traffic to the so-called smaller points and particularly the smaller shipments that you referred to in your previous answer?

Mr. Rosenbaum: Mr. Examiner, you realize that this carrier has authority to serve the point.

Mr. Howland: I will make the offer of exhibits 5, 6, and 7 at this time.

Exam. Carpenter: I will withhold ruling on them.

Mr. Fowler: Are you going to withhold ruling on them or do you want me to go ahead?

Exam. Carpenter: You want to interrogate him before I accept them?

Mr. Fowler: Yes.

Exam. Carpenter: Go ahead.

By Mr. Fowler:

Q. With reference to the exhibits 5, 6, and 7, I think you testified they were prepared by the dispatcher.

A. That is right.

Q. They are not in your handwriting?

A. No, sir.

Q. You don't have any personal knowledge of these transactions?

A. No, sir.

Q. These were made up apparently from what the dis- [fol. 340] patcher told you, he would call up this connection and then he would make a note of it?

A. He filled out that sheet as the calls came in.

Q. Are there any other notations other than these or are these merely copies of some telephone calls that he took down?

A. No; that is the original copy as called in.

Q. In other words, he kept this sheet on his dispatcher's desk?

A. That is right.

By Mr. Howland:

Q. As I understand it, you directed that that record be kept?

A. That is right.

Mr. Fowler: Are they offered?

Mr. Howland: They are offered in evidence.

Mr. Fowler: Exhibits 5, 6, and 7 are objected to for the

Exam. Carpenter: I sure do. I am also presuming he has had experience of offering them to other carriers, too. Whether that is correct or not I don't know. I hope it will be brought out. I will overrule both objections.

A. We have that problem almost every day, continuously.

By Mr. Nolan:

Q. Now, Mr. Grice, I will ask you whether or not in your opinion, from your many years of experience in motor-carrier business if——

Mr. Nolan: I wonder if we could have some semblance of quietness in the room.

By Mr. Nolan:

Q. I started to say, from your many years of experience in the motor carrier business as an operator, based solely [fol. 319] upon interstate traffic without any local intrastate traffic, will support and sustain a local peddler delivery service to small points.

Mr. Fowler: That is objected to on the ground it is immaterial, for the reason that it calls for an incompetent conclusion of the witness, for the reason that it calls for pure speculation and conjecture.

Mr. Nolan: In response to the objections, we are asking this witness to express an opinion and a conclusion based upon his experience in the very situation we have confronting us here.

Mr. Fowler: Same objection.

Exam. Carpenter: Objection overruled.

A. From my experience with our own company and being a member of committees for a good many years where I hear all the troubles of all the carriers, I would say, roughly, that we have about six or seven distinct so-called peddle operations over which we have both the interstate and the intrastate authority for points involved, where there is no manufacturing involved in those points, there is no carrier could operate successfully on interstate business alone.

I can further substantiate that by the fact that under a

reason that they are hearsay, not the best evidence, the witness who is attempting to sponsor them admits he has no personal knowledge of the transactions recorded thereon, we have no opportunity of cross-examination of the editor of the documents for the purpose of ascertaining the underlying circumstances pursuant to which these notations were made. They are incompetent.

Exam. Carpenter: The objections are overruled. The documents will be received in evidence as exhibits Nos. 5, 6, and 7.

(Applicant's Exhibits Nos. 5 thru 7, witness Kinner, were received in evidence.)

[fol. 341] Mr. Fowler: Now, may I request, Mr. Examiner, that counsel for the applicant furnish us within a reasonable time with copies of those exhibits?

Exam. Carpenter: Mr. Howland.

Mr. Howland: I will undertake it.

Exam. Carpenter: How soon can you furnish them with copies?

Mr. Howland: I will try to do it by tomorrow noon.

Mr. Fowler: That is all right.

Exam. Carpenter: All right, you will so furnish them. Anybody else want copies?

Mr. Cohn: Yes, sir.

Exam. Carpenter: Everybody.

Mr. Howland: There will be 5 or 6 copies.

Exam. Carpenter: I suppose you had better make six to be sure.

Mr. Howland: All right, we will make 6 copies. We will have that completed.

By Mr. Howland:

Q. Mr. Kinner, have you had personal knowledge of some instances in which, whether they are recorded here or not, in which requests to perform transportation service on shipments in excess of 5,000 pounds in weight have been made to you for handling business from Chicago into this Iowa territory?

A. Yes, sir; I have.

Q. And what has been the fact with respect to the general

[fol. 342] volume of the business of the Rock Island Motor Transit Company in the last 3 months of 1951 and the first 2 months and up to the present time of 1952, as to the volume of business that you have handled compared with that previously handled before these restrictions were imposed?.

Mr. Fowler: I am going to object to that on the ground it isn't the best evidence.

Mr. Howland: We will have some further information on that in the way of exhibits.

Exam. Carpenter: Objection overruled.

A. There has been a decrease of between 42 and 45 percent; that is, in weight.

By Mr. Howland:

Q. What has been the decrease in revenues——

Mr. Fowler: Same objection——

By Mr. Howland:

Q. —if any?

Mr. Fowler: —as not the best evidence and hearsay.

By Mr. Howland:

Q. In your judgment, as an estimate?

Mr. Fowler: Same objection.

Exam. Carpenter: I understand you are going to have another witness go into it more in detail.

Mr. Howland: We will have some billing figures on the revenue that will show the comparative figures for the last 3 months of 1951 and the last 3 months of 1950, but that does not extend clear up to the present time.

Exam. Carpenter: What are you trying to accomplish [fol. 343] by this witness, just the percentage, is that all?

Mr. Howland: Approximate percentage and that it has continued to date.

Mr. Fowler: My objection still goes on the ground it is not the best evidence, calls for hearsay.

Exam. Carpenter: Objection overruled.

A. I am really not qualified to determine the percentage in revenue. I am in tonnage because we keep a daily tonnage report which is accumulated over a period of a month and the monthly total is shown in one figure.

By Mr. Howland:

Q. All right, I will ask you this, Mr. Kinner: What is the fact as to whether the decline in tonnage that you have referred to has continued up to the present time——

Mr. Fowler: That is objected to——

By Mr. Howland:

Q. —as compared with the preceding year?

Mr. Fowler: Objected to as not the best evidence, for the reasons just stated. There was a written record of it. Calling for hearsay.

Exam. Carpenter: Can you produce the written record of it?

Mr. Howland: I expect we can if the examiner rules that we have to.

Exam. Carpenter: I expect it would be better.

Mr. Howland: All right, we will make a note of that and try to produce that.

By Mr. Howland:

Q. Could you arrange——

[fol. 344] A. The tonnage records?

Q. The tonnage record of interline or originating at Chicago, to have that furnished to us during the course of this hearing?

A. Yes, sir.

Exam. Carpenter: Of course, you will have a witness who can stand cross-examination on it, will you?

Mr. Howland: We will arrange for the production of a witness who keeps that record.

By Mr. Howland:

Q. Can you arrange for the attendance of the person who keeps that tonnage record?

fected by their operation or this present application would affect the operation of the Chicago-Dubuque Motor Transportation Company?

A. To some degree; yes.

Q. In what particular?

A. Of course, shipments that they would originate in the Wisconsin area that would be destined to points on the operation of the Rock Island Motor Transit.

Q. Have you been authorized by Mr. A. A. Burgmeier, president of the Chicago-Dubuque Motor Transportation Company, to speak on behalf of that company in this proceeding?

A. He has so authorized me because he couldn't be available today or tomorrow.

(A document was marked as "Applicant's Exhibit No. 4, Witness Grice," for identification.)

By Mr. Nolan:

[fol. 323] Q. Calling your attention to what has been marked here for identification "Applicant's Exhibit 4," and I will ask you to state if that——

Mr. Fowler: Go ahead and finish.

By Mr. Nolan:

Q. —if you recognize what that is, the signature on it.

A. Yes. That is a letter addressed to whom it may concern by Mr. A. A. Burgmeier——

Mr. Fowler: Just a moment. Don't read it yet. Just tell him what it is.

A. —authorizing me to speak in behalf of the hearing that is being held here today.

By Mr. Nolan:

Q. Do you identify the signature on that as Mr. A. A. Burgmeier's signature?

A. Yes, sir.

Q. You have seen it a good many times?

A. I have seen it a good many times.
Q. Now——

Mr. Fowler: Just a minute, Mr. Nolan. Let me read this, will you?

By Mr. Nolan:

Q. Mr. Grice, are you able to state from your personal knowledge of the operations of the Chicago-Dubuque Motor Transportation Company in what particular way the operations of the Rock Island Motor Transit Company are related?

Mr. Fowler: Mr. Examiner, may I ask Mr. Grice a question?
[fol. 324] Exam. Carpenter: Yes, sir.

By Mr. Fowler:

Q. Mr. Grice, Chicago-Dubuque Motor Transportation Company apparently has their home office at Dubuque.
A. That is correct.
Q. And they operate between Chicago, Dubuque, Freeport, LaCrosse, and Rockford?
A. That is correct, and the intermediate points.
Q. Are you identified officially in any way with the company?
A. No, sir.
Q. Are you an employee of the company?
A. No, sir.
Q. An officer?
A. No, sir.
Q. A shareholder?
A. No, sir.
Q. Do they have their terminal at your place of business with you?
A. No.
Q. You are not personally familiar with their operations, are you?
A. After living in Dubuque all my life and knowing the operation.

Mr. Fowler: I move to strike the answer of the witness as

A. Well, that is under my supervision. I check it from time to time.

Mr. Howland: Well, we will determine that.

Mr. Fowler: Bring them out here. We won't have any trouble about that.

By Mr. Howland:

Q. Mr. Kinner, you have been a terminal agent for the Rock Island Motor Transit Company for a considerable period. During that time, have you solicited business for the Rock Island Railroad, freight business?

A. No, sir.

Q. And have you during the time that you have been terminal agent known of any instances where Rock Island Railroad traffic representatives have solicited business for the Motor Transit Company on motor carrier billing?

A. No, sir.

[fol. 345] Q. Do you have an abstract of the freight bills showing the shipments tendered to you for points in Iowa on the lines of the Rock Island Motor Transit Company where the shipments originally carried a carrier other than the Rock Island Motor Transit Company?

A. I don't have an abstract of that at this time. I believe there is one printed up in our local Des Moines office, but I don't have a copy of that here.

Q. Can you make an effort to get that in the course——

A. Yes; that can be done. If we don't have a copy, one can be made. It is just a copy of this.

Q. Will you make up an abstract of those so that we can substitute that for the bills themselves.

Who is your immediate superior in the organization of the Rock Island Motor Transit Company?

A. Mr. W. F. Peterson is general manager, Mr. D. E. Jenkins superintendent of operation. Walter Hitchen is the general traffic manager, Mr. O. Paul Fischer is in charge of sales.

Q. Have you received any directions or instructions from any officers of the railroad with respect to the handling of any motor carrier business?

A. No, sir.

Q. The men you refer to are the heads of the departments of the Rock Island Motor Transit Company?

A. That is right.

[fol. 346] Q. And of course Mr. Jenkins is in charge of the operating department with respect to the dispatching of trucks and personnel and matters of that sort, that is under his jurisdiction?

A. That's right.

Q. Traffic matters as far as rates and matters of that sort are in charge of Mr. Hitchen, and matters of solicitation and sales under Mr. Fischer?

A. That's right.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Mr. Fowler.

Mr. Fowler: Is this witness going to be here in the morning?

Mr. Howland: Yes; I think so, although he wants to get away.

Mr. Fowler: The only reason I suggest that, I can kill some time here, but there are one or two questions I want to ask him, but——

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Cohn: I have a few questions.

Cross-examination.

By Mr. Cohn:

Q. Mr. Kinner, as I understand it, your terminal facilities in Chicago are located on Well Street and extend from approximately Taylor Street on the north to Roosevelt Road on the south, is that correct?

A. That is right, sir.

Q. And those facilities are adjacent to the Rock Island [fol. 347] Railroad's facilities in Chicago, are they not?

A. I just don't know what you mean by "facilities."

Q. Where is the right-of-way of the Rock Island Railroad located in connection with the location of your terminal?

A. Their tracks, you mean?

Q. Yes.

A. Well, it is adjacent.

Q. Yes. Do you accept at your terminal in Chicago freight which is billed on rail billing of the Rock Island Railroad?

A. No, sir; we don't.

Q. You do not accept that at your terminal, is that correct?

A. No, sir.

Q. You have 16 dockmen, I believe——

A. Yes.

Q. —that you say are employed by your company in Chicago in connection with the operation of your Chicago terminal?

A. That is right.

Q. Are those dockmen connected with the railroad brotherhood?

A. No; they belong to the Chicago local 710.

Q. Of the IBT?

A. IBT; that is right.

Q. Do you rent your terminal from the Rock Island Railroad at Chicago?

A. I am not qualified to answer that. I understand that it is railroad property, but that is merely hearsay. I have [fol. 348] never seen a lease.

Mr. Howland: We will have some figures on that.

Mr. Cohn: Including the arrangement for the rentals of the property?

Mr. Howland: We will have the monthly rental.

Mr. Cohn: Then that is all I have of this witness.

Exam. Carpenter: Any further cross-examination?

Mr. Fowler: I may say, Mr. Howland, for his benefit you are going to have an operating witness?

Mr. Howland: Yes, sir; Peterson.

Mr. Fowler: Then I won't have any questions of him.

Mr. Howland: That is all that I have available right now.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Cohn: I do have a question on exhibits 5, 6, and 7.

By Mr. Cohn:

Q. Do you know how that traffic moved that is represented on those exhibits?

A. No; I don't know how it moved.

Mr. Cohn: That is all.

Exam. Carpenter: Any redirect?

Mr. Howland: There is nothing further at this time, Mr. Examiner.

Exam. Carpenter: Well, we will excuse him. If you want to bring him back——

(Witness excused.)

* * * * * * * * *

[fol. 349] TRANSCRIPT OF PROCEEDINGS OF MARCH 19, 1952

Exam. Carpenter: If you are ready, gentlemen, we will proceed.

Mr. Howland: I guess we are ready to proceed.

Exam. Carpenter: Call your first witness.

Mr. Howland: Mr. Frank J. Schunter will be the next witness.

FRANK J. SCHUNTER was sworn and testified as follows:

Direct Examination.

By Mr. Howland:

Q. Will you state your name, please, and in giving your evidence speak up so that all in the hearing room can hear you clearly.

A. My name is Frank J. Schunter.

Q. You live where, Mr. Schunter?

A. At 1107 East 29th Street, Davenport.

Q. What is your business?

A. I am salesman for May Company, wholesale plumbing and heating.

Q. Where is the May Company located?

A. At 1611 Third Avenue, Moline.

Q. In what business is the May Company engaged?

A. Wholesale plumbing and heating.

Q. And generally, in what territory does the May Company have customers who purchase its products and require transportation service?

[fol. 350] A. We operate west as far as Iowa City. We go into Washington, some of those smaller towns down in there, Kalona occasionally. We go east as far as Sterling, Rock Falls—I don't know just how far; we are a branch office. I don't know how far south the Galesburg office goes.

Q. Generally, your line of business in which the May Company is engaged is the wholesale plumbing and heating supplies?

A. That is right.

Q. Just what generally is included within the scope of that business; that is, is it purely plumbing? Do you have heating?

A. No; we have a complete line of plumbing and heating. That includes boilers, pipe, fittings, fixtures, and so on and so forth.

Q. Do you sell furnaces?

A. Furnaces; yes.

Q. All plumbing and heating supplies?

A. That is right.

Q. That would be a proper designation of your business. Do you sell to dealers in the territory or direct to the customer?

A. No; we deal only with the dealers.

Q. About how many accounts do you have in the territory between Davenport and Iowa City, Iowa, along or adjacent to U. S. highway No. 6?

A. About 15, I would say.

Q. And you are, of course, interested in the transporta-

[fol. 351] tion service available to these communities?

A. Very much.

Q. That is an important part of your business. Do you sell on the basis of your goods delivered or are your sales made f. o. b. Moline?

A. Our business is all done open account.

Q. Open account, but I mean do you pay freight to destination?

A. We pay freight into Iowa City, which is a jobbing point. That is customary, paying freight into a jobbing point. The other points we do not.

Q. In the other towns the dealer who orders the merchandise——

A. That is right.

Q. —pays the freight. Do you have a jobbing branch at Iowa City?

A. No.

Q. About how often do you make this territory?

A. I make it every 2 weeks.

Q. Do you have accounts in each of the towns of Walcott, Durant, Wilton, Atalissa, West Liberty, and Iowa City?

A. In all but Atalissa.

Q. In all but Atalissa. I don't know whether I omitted West Liberty in there.

A. No; you included West Liberty.

Q. Do you also have dealers located at other points off of highway 6 in that same general territory? I refer par- [fol. 352] ticularly to the points such as Kalona and Wellman and towns lying north and south of Iowa City?

A. We have a very good account at Riverside. Kalona and Wellman, we ship occasionally. That territory still has to be developed.

Q. Riverside, of course, is a town of about 1,000 population or perhaps a little less located almost directly south of Iowa City, as I recall.

A. Right.

Q. And generally speaking, about what is the weight of the shipments which your company has occasion to make into this general territory, Mr. Schunter?

A. That would vary a great deal.

Q. Give us the minimum and the maximum limits.

A. From minimum to probably 3 or 4 thousand, sometimes occasionally 5,000 pounds.

Q. Now, what truck service have you used in connection with the making of delivery of shipments into these communities?

A. We depend almost entirely on Rock Island.

Q. Rock Island Motor Transit Company?

A. That is right.

Q. The applicant here. What character of service have you experienced from the Rock Island Motor Transit Company in the delivery of your shipments in the past?

A. On the whole, it has been excellent.

[fol. 353] Q. Is there any other common carrier truck line which performs a comparable service, to your knowledge, into these smaller intermediate points other than the Rock Island Motor Transit Company?

A. Not to my knowledge.

Q. Have you had any experience with shipments via other truck lines or other agencies in that territory?

A. Only on through hauls, terminal to terminal.

Q. At Iowa City what has been your experience? You use Rock Island Motor Transit to that point?

A. Yes; we do. Overnight service.

Q. Overnight service from your distributing point at Moline. About how often do you have occasion to make shipments from Moline, Ill., into this territory, would you say?

A. It would come very near to being every day.

Q. To some one or more of these points?

A. That's right.

Q. Is that a continuous flow of traffic that you have——

A. That is right.

Q. —of the character that you have described. If the Rock Island Motor Transit Company were to discontinue this service or to substantially curtail it, would that have any effect, in your judgment, on the ability of your company to handle its business?

Mr. Fowler: That is objected to on the ground it is immaterial to any issue in the case, and for the further rea-[fol. 354] son that there is nothing in this record to indicate or justify any conclusion the service of the Rock Island Motor Transit Company will be curtailed.

Exam. Carpenter: Objection overruled.

By Mr. Howland:

Q. You may answer my question—if you have it in mind; if not, we will have it read.

A. Yes; it would make a considerable difference.

Q. Will you explain in what way?

Mr. Fowler: Same objection.

Exam. Carpenter: Objection overruled.

A. In this respect, that actually a jobber has little to sell other than service. I mean that in this respect. You can buy not the same brand, but you can buy the same material from our competitor that you can buy from us. It will do the same job. Probably won't cost any more money. The May Company has always prided itself in being able to get the material into the dealer's hands before our competitor.

By Mr. Howland:

Q. Have you built up business largely on the service basis to your dealers?

A. Very much so.

Q. Where are your principal competitors for business in this territory located?

A. In the Tri-Cities, Cedar Rapids, Des Moines, Ottumwa, Burlington, although Burlington doesn't bother us too much.

Q. And in each of these places, Ottumwa, Des Moines, [fol. 355] Cedar Rapids and the Tri Cities, you do have wholesalers who are in competition with your business?

A. That is right.

Q. In addition to your plumbing and heating supplies, are there any hardware lines that you handle or sell in this territory, mill supplies or anything?

A. A certain amount of mill supply. We don't go in too heavily into the mill supply.

Q. You don't what?

A. We don't go too heavily into the mill supply angle.

Q. What is included in mill supplies, what general type of articles?

A. Well, the tools we handle are all light tools. We don't get into the heavy sort of thing at all.

Q. Would it be to supply elevators or garages?

A. No.

Q. What general type?

A. Just the run-of-the-mill valves, traps, packinghouse equipment, that sort of thing.

Mr. Howland: You may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, Mr. Schunter, you have dealers located in Walcott, Durant, Wilton, Iowa City, and West Liberty.

[fol. 356] A. That is right.

Q. And that you are interested in service on shipments to the dealers located at those points.

A. Correct.

Q. And that your place of business is at Moline, Ill.

A. That is right.

Q. And that you have been using the Rock Island Motor Transit truck service to these points?

A. Right.

Q. Now, ordinarily, what will a shipment consist of to a dealer at Wilton?

A. It might be heating equipment, furnace, boiler, pipe, pipe fittings, valves, plumbing fixtures.

Q. On an average, what will those shipments weigh, talking now about a normal shipment to a small dealer out in a small town?

A. They should average 500 pounds.

Q. When you spoke about a larger volume shipment in excess of, say, 3,000 pounds, under what circumstances could that come about?

A. It might be a large boiler.

Q. That is a very rare thing going out into these points, isn't it?

A. Rare perhaps; yes.

Q. Have you had one this year, since January 1, to any of these points?

[fol. 357] A. No; I haven't.

Q. The fact of the matter is that you are supplying these dealers with the ordinary stock of plumbing and heating supplies and they keep their stock up by ordering from you when you come aro-nd and the average shipment is not over 500 pounds, isn't that right? generally speaking.

A. Generally speaking, probably yes.

Q Do you know whether there is any other common carrier service available to you from Moline to these points?

A. No one that we depend on.

Q. Have you made any inquiry lately to determine what other service might be available to you?

A. Between Moline and Iowa City, I know of no one who is making peddler service thro-gh there.

Q. My question was, have you made any inquiry lately to determine whether or not there is any service?

A. We have had no occasion to.

Q. In other words, you have been satisfied with the service of the Rock Island?

A. That's right.

Q. You haven't made any inquiry to determine whether or not there might be other service available?

A. No; I haven't.

Mr. Fowler: I think that is all.

Exam. Carpenter: Any further cross-examination?

[fol. 358] Off the record.

(Discussion off the record.)

Exam. Carpenter: Any redirect?

Redirect examination.

By Mr. Howland:

Q. Have you, Mr. Schunter, in years past checked up or made inquiry to determine whether there has been any other carrier in the field providing this peddler service that you have referred to?

Mr. Fowler: Objected to as immaterial for the reason that it is too remote in time.

Exam. Carpenter: Please read the question.

(Question read.)

Mr. Howland: I will withdraw the question in that form.

By Mr. Howland:

Q. You referred to peddler service between Moline and Iowa City. Will you explain to the examiner what you mean by peddler service?

A. By that I mean someone who will handle the small drop shipments into the small towns.

Q. That is, making regular pickup and delivery service——

A. That's right.

Q. —to these communities?

A. Between terminals.

Q. Have you within the last 2 years had occasion to investigate as to whether there was any other service available?

Mr. Fowler: Objected to for the reason that it is im- [fol. 359] material, being too remote in time.

Exam. Carpenter: Objection overruled.

A. Yes.

By Mr. Howland:

Q. What was the result of that investigation?

Mr. Fowler: Same objection.

Exam. Carpenter: Overruled.

A. The account who switched truck lines is now back with Rock Island Motor.

By Mr. Howland:

Q. And was that at one of these intermediate points?

A. No; that was at Iowa City.

Q. At Iowa City. Anything further that you wish to add to your evidence here with respect to this continuation or the curtailment of this service?

Mr. Fowler: That is objected to for the reason that there is no question to the witness. I have no opportunity to interpose an objection.

Mr. Howland: I will withdraw that.

Exam. Carpenter: Objection sustained.

Mr. Howland: I will withdraw that and I will ask this:

By Mr. Howland:

Q. Is there any other way other than what you have testified to in which your company might be affected by

the elimination or curtailment of this service of the Rock Island Motor Transit Company in this territory?

Mr. Fowler: That is objected to on the ground it is [fol. 360] immaterial, and for the same reason that I interposed with respect to the previous question on the same thing.

Mr. Rosenbaum: It is repetitious.

Exam. Carpenter: I will sustain the objection on the ground that it is repetitious.

Mr. Fowler: Then add repetitious.

Mr. Howland: That is all. Thank you, Mr. Schunter.

(Witness excused.)

GROVER SCHNECKLOTH was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?
A. Grover Schneckloth.
Q. Mr. Schneckloth, you live where?
A. Davenport, Iowa.
Q. In what business are you engaged?
A. Primarily in the lumber business.
Q. In what phase of the lumber business?
A. Retail.
Q. In the retail lumber business. Is your business located in Davenport?
A. No.
Q. Or at other points?
A. It is located in Walcott, Durant, and Sunbury, Iowa.
Q. Sunbury is a town located approximately north of [fol. 361] the town of Durant and a little bit east, I believe, is it not?
A. It is directly north of Durant.
Q. Straight north. You say that you have retail lumber establishments in each of these communities?
A. That is correct.
Q. Where is your office located?
A. I use the Walcott lumberyard as my office.

Q. Maintain an office there?

A. That is right.

Q. But your residence is in Davenport?

A. That is right.

Q. What lines of merchandise do you sell in these retail outlets?

A. Farm supplies, hardware, builder's hardware.

Q. Roofing material?

A. That is right.

Q. Do you deal in paints?

A. Yes.

Q. And when you say farm supplies, what type of farm supplies do you have reference to?

A. We have a John Deere agency at Durant.

Q. At Durant.

A. And farm supplies such as hay carriers, hay tools, pitchforks, shovels—whatever you want.

Q. Both farm tools and smaller farm implements?

[fol. 362] A. That is right.

Q. Would that also include such items as wire or gates or fencing materials and matters of that sort?

A. Yes.

Q. Now, where are the principal suppliers located from whom you acquire the merchandise that you handle and sell?

A. Mostly east of Davenport or in Davenport or Rock Island or Moline.

Q. Your wholesalers are in the Tri-City area?

A. Some of them are. We do a good deal of business with Armstrong of Clinton. That is where we buy our small builder's hardware from.

Q. That is a wholesale hardware supply concern?

A. It is a wholesale hardware.

Q. In connection with the sale of lumber, do you also handle millwork?

A. That is correct.

Q. And sash and doors and matters of that sort?

A. Yes.

Q. Are the goods in which you deal delivered to your retail stores by the wholesalers or is it handled in some other way?

A. I don't understand that question.

Q. Well, you buy your stuff on an f. o. b. at point of origin or is it delivered to you freight paid?

A. It is f. o. b. the origin usually.

[fol. 363] Q. It is f. o. b. the origin?

A. Yes; we pay the freight bill.

Q. And your company pays the freight?

A. That's right.

Q. What has been your practice with respect to the type of carriers that you have been using in performing delivery service to your retail stores?

A. It has been the Rock Island Motor Transit.

Q. About how long have you been doing business with the Rock Island Motor Transit Company?

A. Ever since the service was offered to us.

Q. Going back to a matter of sometime prior to World War II or maybe as far back as 20 years ago?

A. No; about 20 years ago. My father started the business at that time.

Q. Now, to your knowledge is there any other regular service by motor carrier on a daily basis into Walcott and Durant and Sunbury other than the service of the Rock Island Motor Transit Company?

A. Not to my knowledge.

Q. Have you had any experience in having shipments from the Tri-City area delivered by any other truck line?

A. No.

Q. About how frequently would you say that you have occasion to receive shipments to these branch stores or branch lumberyards that you operate?

[fol. 364] Mr. Fowler: That is objected to unless it is restricted to interstate commerce.

Exam. Carpenter: Do you wish to so restrict it?

Mr. Howland: I will qualify that.

By Mr. Howland:

Q. I will add to that, from the Tri Cities located on the Illinois side of the Mississippi River.

Exam. Carpenter: Now, do you understand the question?

Mr. Howland: Withdraw it and I will start over.

By Mr. Fowler:

Q. Mr. Riley, what you are here for today is to testify that insofar as your company is concerned, you want to continue this interline arrangement you have with Rock Island Motor Transit——

A. That is right.

Q. —is that correct?

A. That is correct.

Q. And you want to continue the mutual interchange agreement you have with them with respect to shipments originating on their line destined to points on your line?

A. That is right.

Q. And you are perfectly willing to let the carriers who [fol. 387] are immediately affected by this application run their own show up here?

A. Oh, yes; that is true.

Q. You are not telling them what to do about this application?

A. No, sir. I am telling you what my position is.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. Now, Mr. Riley, I assume you have made complaints against other carriers and other carriers have made complaints against the Dohrn operation, isn't that true?

Mr. Fowler: Objected to as leading and suggestive.

Mr. Nolan: I am asking what the fact is.

Mr. Fowler: It is a fine way to ask it.

By Mr. Nolan:

Q. What is the fact?

Mr. Fowler: Now, just a moment, please, Mr. Examiner. I object to that on the ground it is leading and suggestive.

Exam. Carpenter: Reframe your question.

By Mr. Howland:

Q. This hearing is devoted solely to the interstate business as contrasted with the intrastate transportation within the State of Iowa, and so the question is now, about how frequently do you have occasion to use this service from points outside of the State of Iowa to Walcott or Durant or Sunbury?

A. I would say daily, whenever the service is available to us.

Q. Do you have a more or less continuous flow of shipments coming in from outside the State?

A. That is correct.

Q. Mr. Schneckloth, would the business of your company be affected in any way in the event that the service of the Rock Island Motor Transit Company from points outside the State of Iowa was eliminated or curtailed?

Mr. Fowler: That is objected to for the reason that it is immaterial, for the reason that it assumes a fact which is [fol. 365] not established by the record.

Exam. Carpenter: Objection overruled.

A. I would say that our business would be affected.

By Mr. Howland:

Q. And in what way?

Mr. Fowler: Same objection.

Exam. Carpenter: Same ruling.

The Witness: You said the same ruling?

Exam. Carpenter: Same ruling. Go ahead.

A. It would take longer for us to receive the merchandise that we have ordered. I assume that that would be the case.

By Mr. Howland:

Q. Have you had any experience with having shipments delivered to these points of destination by truck lines other than the Rock Island Motor Transit Company?

Mr. Fowler: Objected to as repetition. I think you asked him that.

By Mr. Nolan:

Q. What is the fact, Mr. Riley, as to whether or not your company has had occasion to make complaints against carriers other than the Rock Island Motor Transit in respect to the scope of their operation and as to whether or not carriers have made complaints against your company's operation?

Mr. Fowler: Same objection.

Exam. Carpenter: Objection overruled. Go ahead and answer.

A. This complaint that is being bandied about here is the [fol. 388] only one we have ever been involved in for or against, that reached a formal stage. If you would like the details, I would be glad to give them to you.

By Mr. Nolan:

Q. Mr. Riley, so far as the Rock Island Motor Transit being a subsidiary of the Rock Island Railroad Company, does that, in your opinion, have anything to do insofar as the public service is connected in this case?

A. No.

Mr. Fowler: Just a moment, please. That is objected to as immaterial; objected to on the ground it is calling for an incompetent conclusion and opinion of the witness. This witness has testified his company has no interest in any service out in here in Iowa except through interline with the Rock Island Motor Transit Company.

Exam. Carpenter: Just asking him for his opinion, Mr. Fowler. You may answer.

A. No; it makes no difference to me.

By Mr. Nolan:

Q. Now I will ask you, Mr. Riley, if some other carrier provided the same type of service as the Rock Island Motor Transit Company, would your company be just as willing to interline with them as the Rock Island Motor Transit Company?

A. Yes; that is true.

Mr. Howland: I don't think I have covered it. I may have.

Exam. Carpenter: Go ahead and cover it if you haven't covered it before. I don't think you have covered it before.

Mr. Fowler: I beg pardon.

By Mr. Howland:

Q. You may answer.

A. Not l. c. l. shipments.

Q. Now, at some of these points I take it you make carload shipments by rail?

A. That's right.

Q. Have you had any experience in handling less-than-[fol. 366] carload shipments by rail to any of these points?

A. Yes; we have.

Q. How does the service of the Motor Transit Company, the truck service, compare with that of the delivery by rail?

A. I am speaking of split cars of lumber, say a stopover at some other place; that is the only experience I have had.

Q. Well, you have not had occasion in recent months or years——

A. That is right.

Q. —I take it to have shipments, l. c. l. shipments, delivered by rail?

A. That is right.

Mr. Howland: I think you may cross-examine.

Mr. Fowler: No cross-examination.

Exam. Carpenter: Anybody else wish to cross-examine? You are excused.

Mr. Howland: I would like to ask Mr. Schneckloth one or two additional questions.

Exam. Carpenter: All right; go ahead.

By Mr. Howland:

Q. Mr. Schneckloth, in connection with the handling of roofing materials particularly, in what quantities do you customarily buy materials of that kind?

Q. Now, there was some reference made to an agreement that your company had with Rock Island Motor Transit for [fol. 389] the interline of freight at the Tri Cities. State whether or not that is only an arrangement that you have by reason of participating in the same tariffs.

A. That arrangement is no different than we have with all other carriers. When we have freight for you, we take it to your terminal and when you have freight for us, you bring it to our terminal. That is the extent of the interline arrangement.

Q. It is no more than participating in the same tariff?

A. That is right. It is just the usual set-up we have with all joint-line carriers where we have joint-line traffic.

Q. There isn't any special arrangement or anything like that?

A. No.

Mr. Nolan: That is all.

Exam. Carpenter: Is there any further cross-examination?

You are excused.

(Witness excused.)

LESTER LUND was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation?

A. Lester Lund.

Q. Where do you live, Mr. Lund?

A. Walcott, Iowa.

Q. What is your business.

[fol. 390] A. Farm implements.

Q. What line of farm implements do you handle?

A. John Deere.

Q. You are a local dealer there for the John Deere company?

A. Yes.

A. Either carload or truckload.

Q. From what source, what source of supply, that is?

A. Either Kansas City or Chicago Heights.

Q. Chicago Heights or Kansas City. At least, it would [fol. 367] be outside the State of Iowa?

A. That's right.

Q. In the event that the Rock Island Motor Transit Company was in a position to handle truckload shipments of materials of that kind, would you use that service from either Kansas City, Chicago or other points?

A. We are getting truckload service that is being routed and originated at the source now which is very good. We possibly would specify Rock Island delivery if it would expedite the delivery of it.

Q. What type of truck service is being rendered to you at present; that is, is that a contract carrier or what arrangement is that?

A. Oh, it is usually some cattle truck coming back from Chicago that is leased to someone else, I imagine is the arrangement that is used.

Q. One of these livestock haulers coming back with a load of roofing material or wire or fenci-g or something of that sort?

A. That's right.

Mr. Howland: That is all. Thank you.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. The point is that on your roofing that you get from Chicago, it comes by a carrier other than the Rock Island Motor Transit, the carrier selected by the roofing company? [fol. 368] A. Right.

Q. The same thing is true of Kansas City?

A. Yes.

Q. Either get it in carload lots by rail or in truckload lots through some other carrier?

A. That's right.

Mr. Fowler: That is all.

Q. Have your own place of business?

A. That's right.

Q. That is not a company store?

A. No.

Q. How long have you been in the farm implement business at Walcott?

A. Six years in Walcott.

Q. Had you had experience at some other place before you went to Walcott in the farm implement business?

A. That is right.

Q. Where was that?

A. Clinton, Iowa.

Q. Now, you handle a general line of John Deere farm implements, is that correct?

A. That is right.

Q. Do you handle any other line of farm implements?

A. Yes; there are a few.

Q. For instance, what are they?

A. Oh, Morton elevators and post-hole diggers of different brands, wagon boxes.

[fol. 391] Q. I assume now—to shorten this up—you get your farm implements, your John Deere implements, from Moline, Illinois, is that correct?

A. That is right.

Q. Where do you get other farm supplies from?

A. Oh, some of them come from Wisconsin; some of them from Morton, Il., Peoria.

Q. Do they come in in so-called small shipments or less-than-carload quantities?

A. That's right.

Q. Less-than-truckload quantities. What transportation service do you have available at Walcott, Iowa, for bringing in your out-of-State shipments?

A. Rock Island Motor Transit Company.

Q. Do you have any other carrier that provides a local, regular service for less-than-truckload shipments into Walcott?

A. No.

Q. What would you say would be the average size of a shipment that you receive at Walcott?

By Mr. Rosenbaum:

Q. You don't control the routing of that shipment, do you?

A. No.

Redirect examination.

By Mr. Howland:

Q. Do you mean by that the shipper reserves the right to control the routing or that you just don't do it?

A. We usually feel that the shippers knows more about routing that we do.

Q. What service may be available?

A. That is right.

Q. And you haven't been specifying that?

A. That is right.

Mr. Howland: That is all.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: We will take a 5-minute recess.

[fol. 369] (Short recess.)

Exam. Carpenter: We will proceed, gentlemen.

Mr. Howland: Mr. Kerr.

E. C. KERR was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. E. C. Kerr.

Q. You live where, Mr. Kerr?

A. West Liberty.

Q. In what business are you engaged?

A. In that town, lumber, hardware, and implements.

A. Oh, an average one would run in the neighborhood of 500 to 1,500 pounds.

Q. What regularity do you get shipments into Walcott into your place of business there from out-of-State points?

A. Oh, from out of State, I would say two to three times a week.

[fol. 392] Q. State whether or not you have occasion to get shipments in in excess of 5,000 pounds.

A. No; not too often.

Q. Well, would you infrequently get such shipments, and if so, what would they consist of and where would they come from?

Q. I don't think we have ever had any large shipment like that shipped by motor freight because we send our own truck for it then.

Q. Now, I think I asked you if there is any other carrier that provided a local service there outside of the Rock Island Moto. Transit.

A. No; there isn't.

Q. What would be the effect upon your business if the Rock Island Motor Transit Company ceased doing business or if its operations were curtailed so it couldn't perform this regular daily motor carrier service?

Mr. Fowler: That is objected to as immaterial. Objected to for the reason that it assumes a fact not established by this record

Exam. Carpenter: Objection overruled. Go ahead and answer.

A. In the first place, a customer comes in, if we call to a certain place for a piece of equipment and they can get it out the same afternoon, we can have it the next morning, and if we didn't have that service, why, it would probably be a week before we would get it.

[fol. 393] By Mr. Nolan:

Q. Now, Mr. Lund, Walcott is located a short distance off of highway No. 6, is it not?

Q. That is right.

Q. And how far is it off highway No. 6?

A. Oh, about a quarter of a mile.

Q. How long have you been engaged in that business?

A. 52 years this last fall.

Q. What particular sources do you get your merchandise that you sell in your store there at West Liberty, Mr. Kerr?

A. Well, with the lumber, most of it, of course, is carload. Our millwork and stuff like that is from the Tri Cities and that comes out, a lot of it, with Rock Island Motor Transit Company.

Q. Now, when you say the Tri Cities, what particular points do you refer to? Do you buy from the Illinois side?

A. Rock Island.

Q. Rock Island, Ill.?

A. Rock Island.

[fol. 370] Q. There is at least one large sash, door, and millwork concern located at Rock Island?

A. Yes, sir.

Q. And that is a manufacturer of that type of merchandise?

A. Of those products.

Q. Now, with respect to hardware and implements, what is your source of supply for those?

A. Chicago, Des Moines, Omaha, and we get some—well, we get some from Ottumwa, quite a little from Ottumwa. That is on the hardware.

Q. What type of implements do you sell?

A. John Deere.

Q. Does that include the full line of John Deere implements?

A. Yes, sir.

Q. From what point do you get the——

A. Most of that comes from Moline.

Q. From the main plant?

A. Yes, sir; from the main office.

Q. Now, on your less-than-carload shipments, what service have you been using to get your shipments into West Liberty?

A. Rock Island Motor.

Q. About what is the fact as to how often you have occasion to have shipments coming in?

A. In the last 15 months, we have had 379 bills of lading.

Mr. Nolan: You may cross-examine.
Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. Do you use Rock Island rail service?
A. Yes; we do.
Q. And you also use the Rock Island truck service?
A. That is right.
Q. And how many shipments have you had received from out-of-the State points since January 1, 1952, approximately?
A. I would say we run approximately two or three a week.
Q. And those shipments are of an average volume of 200 pounds?
A. I would say around 2 to 5 hundred pounds.
Q. And consist largely of what?
A. Mostly either small hardware or farm repairs.
Q. And they originate at what point?
A. Many from Moline.
Q. On your implements, do you take your own truck to Moline and pick up your implements?
A. That is right.
Q. And if you have any substantial volume of freight, [fol. 394] you go and pick it up in your own truck?
A. That is right.

Mr. Fowler: That is all.
Exam. Carpenter: Any further cross-examination? Any redirect?

Redirect Examination.

By Mr. Nolan:

Q. Is it fair to say, Mr. Lund, in addition to handling farm implements, you also handle general farming supplies?
A. That is right.

Mr. Nolan: That is all.
Exam. Carpenter: Any re-cross? You are excused, Mr. Lund.

Q. 379 inbound shipments?

[fol. 371] A. Yes, sir; from different points.

Q. In the last 15 months?

A. Yes, sir.

Q. And have a very large proportion of those been from points outside the State of Iowa?

A. Well, yes; comes from central Nebraska, some of it. We handle land rollers we can't get from Deere.

Q. In any event, you are interested in the interstate transportation?

A. Yes, sir.

Q. That is available as well as transportation——

A. That is right.

Q. —from points within the State of Iowa to West Liberty. About what will be the size and weight of the shipments that you have occasion to make to your company?

A. You mean just in Iowa or all?

Q. No; interstate.

A. That will vary. It will vary from a few pounds up to oh, 4,000 or 4,500 pounds sometimes.

Q. And is there, to your knowledge, any other truck carrier other than the Rock Island Motor Transit Company that provides a regular daily service to West Liberty, Iowa?

A. No, sir.

Q. Have you made inquiry to determine whether there is anybody else that serves the town of West Liberty?

[fol. 372] A. No; I haven't.

Q. Well, on what do you base the answer that you made that there is no other carrier?

A. In the first place, it is a small town.

Mr. Fowler: Just a moment. That is objected to as immaterial. He said he made no investigation.

Exam. Carpenter: Objection sustained.

Mr. Howland: Very well.

Mr. Fowler: I move to strike the answer for the same reason.

Exam. Carpenter: Read the answer, please.

(Answer read.)

(Witness excused.)

GEORGE A. HIRL was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. What is your name, please?

A. George A. Hirl.

Q. Where do you live, Mr. Hirl?

A. My residence is in Davenport, Iowa. I have my business storage place in Walcott, Iowa.

Q. What kind of business do you have at Walcott?

A. I am a salesman for Walnut Grove Products Company, Atlantic, Iowa.

Q. Now, is that an animal feed?

[fol. 395] A. Yes, sir.

Q. Or animal mineral product, is it not?

A. Yes.

Q. And do you handle anything other than the Walnut Grove Products?

A. No; I don't.

Q. You understand that this hearing, although it involves the Iowa State operation, it is primarily directed towards interstate operations of the Rock Island Motor Transit Company?

A. Yes, sir.

Q. Do you have occasion to have any interstate shipments come into your warehouse or your house at Walcott?

A. No; I haven't.

Q. Your shipments, I would assume, would all come from Atlantic to your sales place?

A. It is delivered there under consignment. It is delivered by their trucks under consignment.

Q. The Walnut Grove Products Company is located At Atlantic, Iowa?

A. Yes.

Q. But you would like to be able to get Walnut Grove products from Atlantic to Walcott, is that right?

By Mr. Howland:

Q. Do you know what service there is to West Liberty by trucks other than the Rock Island Motor Transit Company?

A. No. I thought I just answered that, that there are none which stops there to my knowledge. Of course, we are right on No. 6 and there are a lot of trucks go through, but they are through trucks.

Q. Is there any other motor truck that renders a regular service to the merchants at West Liberty other than the Motor Transit Company?

Mr. Fowler: That is objected to for the reason that the witness has testified at least twice he doesn't know.

Mr. Howland: Why, he hasn't.

Mr. Fowler: It is my opinion he so testified, and I object [fol. 373] to it on that ground.

Exam. Carpenter: You may answer it, if you know.

The Witness: Ask that question again.

Exam. Carpenter: Read it.

(Question read.)

Exam. Carpenter: To your knowledge.

A. Not to my knowledge.

Exam. Carpenter: All right.

By Mr. Howland:

Q. Now, if this service that is now being rendered by the Rock Island Motor Transit Company was entirely eliminated from interstate points or was cut down to the point where maybe it was only twice a week, would that have any effect on your business, Mr. Kerr?

A. Yes, sir.

Mr. Fowler: Just a moment.

Exam. Carpenter: Don't answer.

Mr. Fowler: That is objected to as immaterial. Objected to for the reason that it assumes a fact not established in this record.

Exam. Carpenter: Objection overruled. Go ahead and answer it.

A. No; they have their own truck, see. They deliver to me.

Q. What interest do you have in this case?

A. Well——

[fol. 396] Mr. Fowler: Just a moment. That is objected to as immaterial, doesn't give me any opportunity to interpose an objection before the question.

Mr. Nolan: That is what I am trying to find out.

Exam. Carpenter: Reframe it.

By Mr. Nolan:

Q. Mr. Hirl, when I say what interest do you have in this case, do you have anything that is shipped by truck in and out of Walcott?

Mr. Fowler: From points outside of the State of Iowa.

Mr. Nolan: No; I never asked him that. I am just asking him if he does have.

Mr. Fowler: Just a moment, please. That is objected to unless the question is limited to interstate shipments.

Exam. Carpenter: Objection sustained. It wasn't limited to interstate shipments. I presume, Mr. Nolan, what you are trying to get at is whether he has any shipments in interstate commerce into or out of Walcott or Atlantic.

Mr. Nolan: I was hoping his answer would be "yes." Then I would find out where from.

Exam. Carpenter: Let's limit it to interstate commerce.

By Mr. Nolan:

Q. Do you have any shipments come in by truck to Walcott, Iowa, that originate or come from outside the State of Iowa?

A. No.

Q. What is your interest, if you have——

[fol. 397] Mr. Fowler: Now——

Mr. Nolan: Just a minute. There may be something we don't know about. He may be representing some company that is affected here.

By Mr. Howland:

Q. Now you may answer the question.
A. Yes; it would.
Q. In what respect?
A. Service. We built our trade on service and when we [fol. 374] order something we want it and we want it in a hurry.
Q. Do you know of any other concern presently in the field that can supply that service to you?

Mr. Fowler: That is objected to as repetitious.
Exam. Carpenter: It is repetitious. Objection sustained. He said he doesn't know of any other service.
Mr. Howland: You may cross-examine.
Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. Mr. Kerr, you operate a lumberyard?
A. Yes, sir.
Q. Your lumber comes to you in carload lots by rail?
A. Most of it; yes, sir.
Q. And cement carload——
A. The same way.
Q. —by rail and all of your rough material comes to you by rail car?
A. What do you mean, the rough material, fencing and stuff like that?
Q. Talking about cement, coal.
A. We don't handle coal, but we handle cement and wire fencing, barbed wire.

By Exam. Carpenter:

Q. You don't handle cement at all?
A. Yes; we handle cement.

By Mr. Fowler:

Q. But I suppose the fencing and lumber and that sort [fol. 375] of thing comes to you by rail car, is that correct?

By Mr. Nolan:

Q. Why are you here as a witness? Let's put it that way.

Mr. Fowler: Objected to as immaterial to any issue in the case, calls for a speech from the witness, and doesn't give me a chance to interpose an objection to the question.

Exam. Carpenter: Objection sustained.

By Exam. Carpenter:

Q. Do you have any shipments moving out of Walcott to points in States other than Iowa?

A. No.

By Mr. Nolan:

Q. Do you represent anybody that is interested in having shipments come into Walcott from outside the State of Iowa or shipments that originate in Walcott that go to points outside the State of Iowa?

Mr. Nolan: Well, I guess that is all then.

Mr. Fowler: That is all. Thank you, sir.

(Witness excused.)

Mr. Fowler: Let's take a couple of minutes' recess.

Exam. Carpenter: All right.

(Short recess.)

M. J. Riley, recalled, testified further as follows:

[fol. 398] Direct examination.

By Mr. Nolan:

Q. Mr. Riley, you are the same M. J. Riley that was on the stand here a few minutes ago?

A. I am; yes.

Q. You were asked by counsel for the interveners in opposition to the application whether or not you had an occasion to file a complaint against some operation of the Rock Island Motor Transit in the State of Illinois. Now, for the purpose of the record, would you detail the facts in that situation?

A. Yes, sir.

Q. Now, your source of supply for your miscellaneous hardware is at what point?

A. Chicago, Hibbard, Spencer, Bartlett And Company.

Q. How frequently since the first of January 1952 have you had a shipment of hardware from Chicago, approximately?

A. Well, seven or eight—I am just guessing at that a little now. I would have to check that up.

Q. That is all right. What was the weight of those shipments?

A. They vary from small packages to——

Q. From a small package up to not exceeding 500 pounds?

A. It will run to a ton, a small package to a ton.

Q. From a small package up to a ton?

A. Yes, sir.

Q. Now, your implements, most of them I suppose you receive from the John Deere plant at Moline?

A. The most of them; yes, sir.

Q. And the complete implements are shipped to you by trucks other than the Rock Island Motor Transit, aren't they?

A. Well, yes and no. We may have an order in there now—to explain this a little; we have an order in for five or ten articles, complete units. They can't ship them all at once. They will call us up and say, "We can ship two today." We try to get that there with Rock Island Motor Transit because we can get the quicker service.

[fol. 376] Q. I thought generally they had their own trucks that deliver their——

A. We do. We have our own trucks, but they may be busy and we have to depend on someone else.

Mr. Howland: Mr. Fowler, were you referring to trucks of the supplier or trucks of Mr. Kerr's own firm?

Mr. Fowler: I was referring to trucks furnished by the supplier; that is what I had reference to.

By Mr. Fowler:

Q. Do we understand one another?

A. Let's get that again.

Mr. Fowler: Objected to as immaterial to any issue in this case.

Exam. Carpenter: Objection overruled. It was raised on that side of the table, Mr. Fowler.

Mr. Rosenbaum: The proceeding is a matter of record before the Commission, Mr. Examiner. I don't know why you want to burden this record with it.

Exam. Carpenter: I don't want the whole thing. If he wants to put a short synopsis of the thing in, I have no objection.

A. Several years ago, possibly 10 years ago, the Rock Island Motor Transit Company filed an application based on convenience and necessity for operating authority as a common carrier by motor vehicle between Peoria, Ill., on the one hand, and what we term the Tri Cities, Davenport, Iowa, Rock Island, Ill., and Moline, Ill., on the other hand.

That case was heard and Dohrn Transfer Company and [fol. 399] a number of other operators opposed it. However, when the decision came down on the case, it granted to the Rock Island Motor Transit Company a restricted operating authority between the points that I have just named, restricting them to coordinated rail service.

The carriers, including Dohrn, who had opposed the application thought we had half way won our case because we felt that the Rock Island Motor Transit was going to be allowed to operate only in the joint capacity with the railroad.

However, it developed that the Rock Island Motor Transit Company began to handle pure truck traffic by truck only on truck billing from and to Peoria, Illinois, and from and to the Tri Cities. We felt that that operation as conducted was in violation of the restricted authority given to them by the Commission.

We took up with the Rock Island Motor Transit Company our views of their violation of their authority, and they didn't agree that we were right. I filed a complaint before the Commission and that complaint was heard on a somewhat abbreviated record, conceded that they were doing such and such a thing, and left up to the Commission to decide whether or not the stipulated facts were or were not in violation of the operating authority.

Q. It is my understanding that ordinarily John Deere, in shipping assembled implements out to its dealers, furnish a transportation service themselves. It comes to you assembled on a truck, doesn't it?

A. Yes; but not from John Deere service. That is all f. o. b. the factory, if you understand the——

By Exam. Carpenter:

Q. Does John Deere send them out on their trucks or do you send your trucks in to get them?

A. No; we send our trucks in. They don't send trucks out.

By Mr. Fowler:

Q. In other words, you go in and get them yourself with your own trucks?

A. Yes, sir.

Q. About how far is West Liberty from Moline?

A. About 45 miles.

[fol. 377] Q. Then, as I understand your picture, you use both rail and motor service furnished by the Rock Island Motor Transit Company?

A. Yes, sir.

Q. You have been satisfied with the service?

A. Yes, sir.

Q. And you haven't had occasion to find out whether there is some other carrier who can give it to you since the first of the year, is that correct?

A. Yes, sir.

Mr. Fowler: That is all.

Exam. Carpenter: Any further cross-examination? Any redirect? You are excused.

(Witness excused.)

* * * * * * *

The Commission handed down a decision that it was in violation of their authority, and a cease-and-desist order was entered. That concerned only the operating authority [fol. 400] between the Tri Cities and Peoria, which was issued to them on the basis of a showing of convenience and necessity at a formal hearing.

After the cease-and-desist order, I have had no complaint whatever that they were in any way whatever violating the authority as the definition was reemphasized in the cease-and-desist order.

By Mr. Nolan:

Q. Now, Mr. Riley, you say you have been with the Dohrn Transfer Company since 1937?

A. Yes, sir.

Q. And during that period of time I believe you testified that your company has been actively engaged in the interlining of freight with the Rock Island Motor Transit Company at least since it started operating as successor to the White Line?

A. That is right.

Q. State whether or not in your duties you have attended various meetings for rate purposes, operating policies and things of that character in which representatives of the Rock Island Motor Transit Company participated.

A. I have; yes.

Mr. Fowler: Just a moment. Objected to as immaterial.

Exam. Carpenter: I will withhold the ruling on it, Mr. Fowler, at the present time.

What do you propose to develop by that, Mr. Nolan?

Mr. Nolan: I propose to develop that insofar as the operations of the Rock Island Motor Transit Company are [fol. 401] concerned over the years that the policies as followed by the management of the Rock Island Motor Transit Company have been solely in the interest of motor carrier operation, that there is no evidence of any domination or influence of the railroad management demonstrated or shown; in other words, to show that the Rock Island Motor Transit Company in its operations has been strictly in the interest of motor carrier operations without any

[fol. 378] M. J. RILEY was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation?

A. My name is M. J. Riley.

Q. And where do you live, Mr. Riley?

A. Rock Island, Ill.

Q. What is your occupation?

A. I am vice president and traffic manager of Dohrn Transfer Company?

Q. And how long have you been connected with the Dohrn Transfer Company.

A. Since 1937.

Q. And what is the work or the business of the Dohrn Transfer Company?

A. Dohrn Transfer Company is a common carrier of general commodities by motor freight.

Q. In what territory does it operate?

[fol. 379] A. Dohrn operates generally in a territory bounded by the Mississippi River points of Clinton, Iowa, Bettendorf, Iowa, Davenport, Iowa, East Moline, Ill., Moline, Ill., Rock Island, Ill., Burlington, Iowa, Keokuk, Iowa, Quincy, Ill., and then to the extreme south of St. Louis, Mo., on the east by Indianapolis, Ind., and north by Chicago and Rockford, Ill.; also serving such points as Abingdon, Ill., Galesburg, Ill., Peoria, Ill., Rock Falls, Ill., and Sterling, Ill.

Q. Now, Mr. Riley, state what the fact is as to whether or not the Dohrn Transfer Company is one of the older motor carriers in the Midwest.

A. Yes; Dohrn Transfer Company has been operating since 1921 or 1922.

Q. Would you state for the record the approximate number of employees of the Dohrn Transfer Company and the approximate number of units of equipment owned and operated by them?

A. Yes. Dohrn Transfer has slightly in excess of 600

domination or influence of the parent railroad company in the truck line management.

Mr. Fowler: Most certainly it is immaterial to this record, upon the statement of counsel. Calls for an incompetent conclusion and opinion of the witness.

Exam. Carpenter: I will sustain the objection.

Mr. Nolan: In connection with the testimony of the witness, Mr. Riley, the interveners represented by me propose to show, and offer to show by him, that throughout the years since 1938 that he has been active in the management of the Dohrn Transfer Company and that in his occupation with the Dohrn Transfer Company he has had numerous occasions to participate with representatives of the Rock Island Motor Transit Company and other motor carriers in rate-making policies, in policy generally affecting the motor carrier industry in the Midwest, and that at no time in his participation with representatives of the Rock Island Motor Transit Company and others has there been any evidence of any domination or influence ex- [fol. 401] ercised by the Rock Island Railroad Company in seeking to interject into the operations of the Rock Island Motor Transit Company or other motor carriers any railroad policies in regard to motor carrier operations or with respect to rate matters, and if the witness were permitted to testify he would so testify in that respect.

Mr. Fowler: The offer of proof is objected to for the reason it is immaterial to any issue in this case.

Exam. Carpenter: The offer of proof will stand. The objection is overruled.

Mr. Nolan: That is all.

Mr. Fowler: No cross-examination.

(Witness excused.)

GAIL C. HUGHES was sworn and testified as follows:

Direct Examination.

By Mr. Howland:

Q. State your name, please, and in giving your evidence speak so that we can all get it.

employees and as to equipment we have 452 pieces of equipment.

Q. Now, Mr. Riley, state whether or not the Dohrn Transfer Company is active in motor carrier activities such as being a member of various motor carrier associations, traffic bureaus, and things of that character.

Mr. Fowler: Objected to as immaterial.

Exam. Carpenter: Objection overruled.

A. Yes; Dohrn Transfer Company is a member of ATA. [fol. 380] I personally am a member of the national traffic committee. Dohrn Transfer Company belongs to various chambers of commerce in the towns they operate in. Our personnel also belongs to the various traffic clubs. I personally am president of the Tri-City traffic club. Mr. Dohrn and myself both hold memberships in the Chicago traffic club.

Q. What is the fact as to whether or not the Dohrn Transfer Company also is a participating member of the various tariff publishing bureaus?

A. Yes. Dohrn participates in the tariff publications of the Central States Motor Freight Tariff Bureau and the Midwest Motor Freight Bureau, Eastern Central Bureau, and the Central and Southern Bureau, the Rocky Mountain Tariff Bureau—I believe that is most of them.

Q. Mr. Riley, state whether or not you are familiar in a general way with the territory covered by the Rock Island Motor Transit application in this case?

A. Yes; I am.

Q. Particularly between the Tri Cities and Omaha, Nebr., and intermediate points?

A. That is my understanding of it; yes.

Q. State whether or not your company has during the past years interlines with the Rock Island Motor Transit Company at the Tri-City gateway.

A. Yes; we have interlined considerable traffic with the [fol. 381] Rock Island Motor Transit Company at the Tri Cities.

Q. Do you have any data covering any period of time showing typical interline operations between your company and the Rock Island Motor Transit Company for territory

A. My name is Gail C. Hughes.

Q. Your home is where?

A. 2933 Grand Avenue, Davenport, Iowa.

Q. Your business is what, Mr. Hughes?

A. I am terminal manager at Davenport for the Rock Island Motor Transit Company.

Q. How long have you worked for the Rock Island Motor Transit Company and in what capacities?

[fol. 403] A. In 1939 I started with the company as a driver. In 1946 I went on the road as a road supervisor, and in 1948 I was made terminal manager of Davenport.

Q. And you have continued in that post to the present time?

A. That is right.

Q. The Tri-City terminal of the Rock Island Motor Transit Company, I take it, is located in Davenport?

A. Yes, sir.

Q. And where in Davenport is it that the terminal is located?

A. It is located at 505 Iowa Street.

Q. Is that a facility that is owned by the Rock Island Railroad?

A. Yes, sir.

Q. Or otherwise. Does the Rock Island Motor Transit Company use a part of the Davenport freight house of the Rock Island Railroad?

A. Yes, sir.

Q. What size facilities do you have there? Room for how many trucks to dock and the size of your loading platform and matters of that kind.

A. We have 16 doors on our outbound dock and 8 doors on our inbound city dock.

Q. About what is the length of the platform where you handle, transfer your freight?

A. I would say close to 250 feet.

Q. Now, Mr. Hughes, how many employees do you have [fol. 404] in the Tri-City terminal? First, is this Davenport terminal the only one that you have for all the Tri-City area?

A. It is the only terminal; yes, sir.

served either directly or in the course of to destination the line involving the Rock Island Motor Transit Company in this case?

A. Yes; I do have. In the last few days, I made a personal survey of our records and found that in the year 1951 we gave to the Rock Island Motor Transit Company something over 2 million pounds of freight.

Q. Where was that exchange made?

A. At the Tri Cities.

Q. And would you state for the record the typical shipments between origin and destination on which interline was made?

A. I have noted some of the shipments moving in the early part of March. For example——

By Mr. Fowler:

Q. Is that March 1951?

A. March 1952.

—from St. Louis, Mo., to Columbus Junction, Iowa. St. Louis, Mo., to Ames, Iowa. St. Louis to Iowa City. Galesburg, Ill., to Fairfield, Iowa. Rockford, Ill., to West Liberty, Iowa. Galesburg, Ill., to Ames, Iowa. Sterling, Ill., to Oakland, Iowa. Abingdon, Ill., to Atlantic, Iowa. St. Louis, Mo., to Wilton Junction, Iowa. Quincy, Ill., to Grinnell, Iowa. St. Louis, Mo., to Washington, Iowa. Mor- [fol. 382] rison, Ill., to Audubon, Iowa. St. Louis, Mo., to Des Moines. Galesburg, Ill., to Cedar Rapids, Iowa. Peoria, Ill., to Mason City, Iowa. Indianapolis, Ind., to Ainsworth, Iowa. Abingdon, Ill., to Iowa City. Indianapolis, Ind., to Ainsworth, Iowa.

Those are just towns called hit and miss and I think are typical of what we have been doing in the past with Rock Island Motor.

By Mr. Nolan:

Q. You say that covered the fore part of this month?

A. Early part of March 1952.

Q. Now, on the reverse order, state whether or not the Rock Island Motor Transit Company interlines freight originating in the Iowa territory to points on your system.

Q. In other words, you don't have anything on the Illinois side of the Mississippi River in the Tri-City area?

A. That is right.

Q. How many employees do you have under your supervision there at the Tri-City terminal?

A. I have 56 employees.

Q. In what types of employment?

A. I have eight office employees—is that what you mean?

Q. Yes.

A. —and 48 drivers and dockmen.

Q. And how many pickup-and-delivery drivers do you employ?

A. 18.

Q. And they serve the whole Tri-City area, I take it?

A. Tri Cities.

Q. Now, I take it that this figure which you have given us does not include the over-the-road drivers, or does it include——

A. That included the over-the-road drivers.

Q. That included the over-the-road drivers under your supervision?

A. That is right.

Q. Now, I would like for you to state what peddle runs you have operating westerly from Davenport along high [fol. 405] way 6 and to Cedar Rapids and Iowa City and those points immediately west of Davenport, just how the trucks are dispatched and what traffic they handle and how they are operated and the times.

A. We have what we call a west peddle operation that runs as far as Atalissa. At that point he turns and returns to Davenport, peddling all intermediate points.

Our Cedar Rapids units is a daily operation, peddling towns Lone Tree and Nichols and Muscatine occasionally on his trip to Cedar Rapids.

We also have what we call a south peddle operation operating between Davenport, Ottumwa, and Des Moines, peddling intermediate points.

Q. That is not on U. S. highway 6?

A. That is not on U. S. highway 6; no, sir.

Q. Now, you refer to a Cedar Rapids— First, you referred to what you call your west peddler. You said, I

which was given your company at the Tri-City gateway.

A. There has been freight moving from points in Iowa originating by the Rock Island Motor Transit Company. However, I didn't tabulate them.

Q. Now, these shipments that you have referred to as typical shipments, they were under the 5,000-pound specification, were they not?

A. Yes; that is true.

Q. Mr. Riley, do you know of any other carrier that performs a local peddler service to the points in Iowa served by the Rock Island Motor Transit between the Tri Cities and Omaha, Nebr., other than Rock Island Motor Transit?

[fol. 383] A. Excepting one or two smaller points. For instance, West Liberty, Iowa, I think we could get service by Poole Transfer, but taking the towns one after the other over highway 6 from the Tri Cities to Omaha, I know of no one who will render consistent peddler service to those points.

Q. How about on truckload shipments; do you have an outlet for those with other carriers?

A. To the larger points, Des Moines, we have an outlet, of course. Watson Bros. will handle truckloads to Des Moines.

Q. Have you had any experience of some of the other carriers refusing the so-called l. t.-l. shipments to some of these intermediate or small towns?

A. Yes. That record has built itself up over a period of years until it has reached such a stage that when we are dealing with small shipments we don't think of the other carriers. If it is a Rock Island Motor point, we can depend on their service, so we no longer offer it to the other carriers because we have learned from experience what the outcome will be.

Q. From your experience, Mr. Riley, over the years in connection with motor carrier transportation service, state whether or not in your opinion there is a need for the continuation of the Rock Island Motor Transit as it has operated in the past years.

Mr. Fowler: That is objected to— Oh, let it go. Withdraw it.

believe, that that proceeds west on highway 6 as far as Atalissa. What intermediate points does that serve? Does it serve all points on U. S. highway 6 or adjacent thereto?

A. Yes, sir.

Q. All right, name those points that are served by that run.

A. Walcott, Stockton, Durant. Sunbury is off highway 6. Wilton Junction, Moscow, and Atalissa.

By Exam. Carpenter:

Q. Did I understand correctly that those points were served on the return trip?

[fol. 406] A. They are served both ways.

Q. They are served both ways?

A. Yes.

By Mr. Howland:

Q. What time does that truck customarily leave the Davenport terminal?

A. Seven o'clock.

Q. In the morning?

A. That's right.

Q. And about what time does the run customarily return back to Davenport?

A. Usually between the hours of 4:30 and 6:30.

Q. Now, does this truck on its westward trip perform both a delivery and a pickup service or is it confined to a delivery service?

A. It is store-door service.

Q. Well, but I mean do you both pick up freight and deliver freight——

A. That is right.

Q. —at the same time or do you run on out to Atalissa and then come back and make your pickups?

A. No; he usually makes his deliveries and makes his pickups on his return trip.

Exam. Carpenter: Wait a minute. I think we are mixed up there.

Mr. Howland: I want to straighten that out.

[fol. 384] Exam. Carpenter: Go ahead and answer.

A. Yes. So far as our operation is concerned, the necessity exists for the operation of the Rock Island Motor Transit to give us an outlet into those small towns in Iowa on traffic originating in our territory.

By Mr. Nolan:

Q. Is there anything else, Mr. Riley? Just a minute. Now, Mr. Riley, you understand that the Rock Island Motor Transit Company is now restricted to a 5,000-pound shipment?

A. I do; yes.

Q. State whether or not in the course of business of your company if there would be occasions when there would be shipments to some small town or some point along the line which would exceed 5,000 pounds——

Mr. Fowler: That is objected to——

By Mr. Nolan:

Q. —which your company would tender to the Rock Island Motor Transit Company.

Mr. Fowler: That is objected to as immaterial, calling for evidence which is purely speculation on this record.

Exam. Carpenter: Objection overruled.

A. Basing my answer on our experience in the past, there are numerous volume shipments going into Iowa and should the restriction not apply against the Rock Island Motor Transit we would have need for their service on the larger shipments when they happen to come our way.

[fol. 385] By Mr. Nolan:

Q. Is there anything else, Mr. Riley?

A. I believe not.

Mr. Nolan: You know more about this than I do.

Exam. Carpenter: Cross-examine, Mr. Fowler.

[fol. 407] Exam. Carpenter: Read it, Mr. Reporter, please.

(Record read.)

By Mr. Howland:

Q. As I understand it then, and I want to be sure and we want to have this definite——

Exam. Carpenter: I think you see what the trouble is.
Mr. Howland: Yes. The trouble is with my question.

By Mr. Howland:

Q. As I understand it then, the truck leaves Davenport in the morning with a load of freight and delivers that freight out to these towns as far as Atalissa, then returns on highway 6 and on the return trip stops at each of these towns and picks up any shipments that are being made from those towns to some other destination.

A. Yes.

By Exam. Carpenter:

Q. That is contrary to the answer you gave me a while ago, is it not, to a question I asked you, whether he made the pickups on the return trip only?

A. We make pickups on the return trip.

Q. You answered me you made pickups both going out and coming in.

Mr. Howland: I think we have got it straight.
Exam. Carpenter: I think so.

By Mr. Howland:

Q. On this run, what freight is handled by the truck? and by that I mean if you have any rail freight or any freight originating at Davenport, intrastate, or any interstate freight, is it all handled in the same truck?

[fol. 408] A. Yes, sir.

Q. Now, on occasion does this truck that makes the west peddle run go beyond Atalissa to West Liberty?

Cross-examination.

By Mr. Fowler:

Q. As I understand it, you have an interchange agreement with the Rock Island Motor Transit Company at Rock Island?

A. Freight moving from our line to their line is given to them at their Davenport terminal and freight which comes to us is given to us at our Rock Island terminal.

Q. It is a mutual interline agreement at Davenport?

A. That is right.

Q. And most of the shipments are l. t. l. shipments?

A. Of necessity, yes, at the present time.

Q. Very few of them are in excess of 2,000 pounds?

A. I would say that the average of them runs 2,000 pounds or less; yes.

Mr. Fowler: That is all.

Exam. Carpenter: Any further cross-examination?

By Mr. Rosenbaum:

Q. Are those points that you mentioned, Mr. Riley, points that you don't have the authority to serve?

A. We don't have authority to serve the inland Iowa points; that is true.

Q. Are you willing to see the subsidiary of the Rock [fol. 386] Island Railroad operate as an all-out motor carrier in this territory?

A. I wouldn't be concerned with the scope of their operation at all. It isn't competitive to us so I wouldn't feel free to express any opposition to it at all.

Q. You did have some opposition to it in your own territory at one time?

A. I did have; yes.

Q. You did file a complaint that they were operating beyond the scope of their authority?

A. I did; yes.

Mr. Rosenbaum: That is all I have.

Exam. Carpenter: Any further cross-examination?

Mr. Fowler: Wait a minute.

A. It has.

Q. On what occasions does it do that.

A. Previously, the contract drayman at West Liberty would call our terminal, asking us to dispatch this truck in for a large pickup at West Liberty.

Q. When you say "previously," is that still done?

A. We handle the pickup and delivery now in West Liberty with our own truck.

Q. You have your own truck?

A. That's right.

Q. On the street in West Liberty?

A. That's right.

Q. Instead of haying a contract——

A. Contract drayman.

Q. —a contract drayman to handle your business there?

A. That's right.

Q. How is the West Liberty freight picked up? By what truck is eastbound freight which may be at West Liberty for movement to Davenport or beyond, how is that handled?

A. Trucks leaving Des Moines drop at Iowa City and are dispatched into West Liberty to pick up eastbound freight.

Q. And they bring it on into——

[fol. 409] A. Davenport.

Q. —to Davenport. So that at the present time there is no occasion for this so-called west peddler to go beyond Atalissa?

A. That is right.

Q. And it is a turn-around service?

A. That is right.

Q. Now, which direction is the traffic heavier? Is it in the outbound movement from Davenport to Atalissa? Is the tonnage heavier?

A. It is heavier westbound.

Q. About what tonnage does your truck pick up on the return trip for Davenport or beyond?

A. They are small, usually from 800 to 2,000 pounds.

Q. Would that be the total volume——

A. That's right.

Q. —on the return trip?

[fol. 430] A. What transportation agency have you been using on your inbound shipments into your foundry at Stockton?

A. Rock Island does it all, Rock Island Motor.

Q. Why is that?

A. There isn't any other truck comes to Stockton.

Q. Stockton is located off of U. S. highway 6, is it not?

A. That is right.

Q. With what frequency would you say you have shipments coming into your plant there at Stockton by the Rock Island Motor Transit?

A. Practically every day.

Q. Now, on your outbound shipments, how do they move?

A. All Rock Island Motor.

Q. What frequency do you have outbound shipments?

A. Every day.

Q. Now, are you able to tell us what would be the average size of your inbound shipment from out-of-State points?

A. You mean the average amount?

Q. Yes.

A. Well, it runs anywhere from— Well, 500 pounds up to 2 or 3 or 4 ton. Sometimes a carload, but it comes by car.

Q. I am talking about truck shipments.

A. That is right.

Q. Your outbound shipments, what are the size of those shipments?

[fol. 431] A. Well, I ship them from a hundred pounds up to the limit.

Q. Now, the fact that there is a limit or there would be a limitation upon the size of shipments that the Rock Island Motor Transit Company, say, for instance, 5,000-pound limitation on a shipment, what effect does that have upon your inbound and outbound shipments?

A. Well, inbound not too much trouble, but outbound, a lot of instances that I have 10 tons going out at one time that goes to one stop, and I got to split it all up and ship it at different times the way it is. Iron is very heavy. It don't take much of it to weigh 5 ton and I got to split it up to——

Q. To the 2 and a half ton maximum, is that right?

A. That is it.

A. That is right.

Q. Unless you had some unusual volume of business

A. That is right.

Q. And about what would your volume be on the west bound movement, the average tonnage?

A. I would say approximately from 10 to 14 thousand pounds.

Q. How many days a week do you operate that west peddler?

A. Five days.

Q. Now, can you tell us about how much of the freight [fol. 410] that is handled on that west peddler truck constitutes freight moving on railroad billing?

A. I would say about 30 percent.

Q. Mr. Hughes, since the 3rd of November 1951, the Rock Island Motor Transit Company has been operating with a maximum restriction upon any one shipment of 5,000 pounds. What is the fact as to whether you have had requests for service for shipments exceeding 5,000 pounds, either into Davenport or out of the Davenport area in interstate commerce?

A. Well, we have had numerous requests.

Q. You have had numerous requests, and what type and character of shipments have you been asked to furnish transportation service for where the weight was in excess of 5,000 pounds?

A. Farm implements.

Q. On Farm implements?

A. Yes, sir.

By Exam. Carpenter:

Q. You have answered Mr. Howland's question as to inbound and outbound; you said "yes." You mean both or just what did you mean, whether it is inbound or outbound?

A. It is outbound.

Exam. Carpenter: All right.

By Mr. Howland:

Q. Do you have any particular industries located at points on this west peddle run between Davenport and

Q. You say the Rock Island Motor Transit Company is the only trucking company that affords you any transportation service?

A. That is the only one I have ever seen in the town.

Q. What would be the effect on your business if the Rock Island Motor Transit Company were compelled to cease operation or was materially curtailed in its operations with regard to size of shipment?

Mr. Fowler: Objected to as immaterial; for the further reason no such fact has been established in this record.

Exam. Carpenter: Objection overruled. Answer the question.

A. I have shipments that I have to make every day. Well, my business is founded on quick delivery and I am [fol. 432] very sure I am going to get it when I ship it out of there and I specify what I want done with it and it is always done.

Q. What do you say as to the quality of the service given by the Rock Island Motor Transit Company in the past?

A. Well, I haven't had any other, but I haven't got any complaints on what I have had.

Q. Would you say it was satisfactory?

A. Very much so.

Q. Do you know of any other transportation agency that would give you the same service that the Rock Island Motor Transit has been giving you in the past?

A. No; I don't.

Mr. Nolan: You may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, you get your pig iron, you said, from Duluth, Minn.?

A. Right.

Q. How is that shipped from Duluth?

A. It is in carload lots.

Q. It is in carload lots?

Atalissa that have occasion to require service for shipments in excess of 5,000 pounds?

[fol. 411] A. Yes, sir.

Q. At what points have you experienced that?

A. Durant and Stockton.

Q. Durant and Stockton?

A. Yes, sir.

Q. And what is the nature of the shipments at those points?

A. Aluminum pigs.

Q. That is aluminum castings?

A. That is bars. They melt them down.

Q. Those aluminum pigs or aluminum bars, what type of industry uses those?

A. Foundries.

Q. The foundries?

A. Yes, sir.

Q. And are there foundries both at——

A. Stockton and Durant.

Q. Stockton and Walcott?

A. Yes; and there is one at Walcott, too.

Q. And Durant, I believe there is a small foundry at Durant?

A. That's right.

Q. Have the foundries in those towns, or some of them, requested service on shipments in excess of 5,000 pounds?

A. You mean outbound?

Q. Well, moving either way.

A. Well, yes.

[fol. 412] Q. Well, tell us about the movement. What service you have been asked to perform and haven't been able to perform because of the weight restriction.

A. The Durant foundry is very interested in getting these aluminum pigs in and their service inbound to the plant has been irregular. That is the larger account on that run.

Q. That is the Durant foundry?

A. That is right.

Q. And when you say the service has been irregular, what do you mean by that? Haven't you been able to perform the service subject to the restriction?

A. That is right.

Q. In other words, you get your pig iron from Duluth, Minn., in rail car lots?

A. That is right.

[fol. 433] Q. How about your pig iron from Milwaukee?

A. We get our coke from Milwaukee.

Q. Coke?

A. That is right.

Q. And in what quantities do you get that?

A. Well, when they can give us carload lot, we get carload lot.

Q. So that generally comes in in rail car, does it?

A. That is right.

Q. Your outbound shipments, you say that you have a shipment practically every day?

A. That's right.

Q. And it would range anywhere from a hundred pounds up to a car, is that right?

A. Sometimes I would have a carload ready; yes.

Q. And the Rock Island is the only carrier you have been using at least?

A. Yes; that is the only one.

Q. And is Stockton located on the rail line of the Rock Island Railroad?

A. It is.

Q. But it is off U. S. highway 6 about how far?

A. I would say about a mile, a mile and a half.

Q. How large a place is it?

A. What?

Q. How large is stockton? How large is it?

[fol. 434] A. I think about 150 people live there.

Q. With respect to your outbound shipments, what are your principal points of shipment?

A. Well, all over the country.

Q. All over the country.

A. Last night I shipped to San Antonio, Texas, Virginia, Pennsylvania, and Cleveland, Ohio, last night, four different shipments.

Q. You shipped those Rock Island Motor Transit or Rock Island Railroad?

A. Motor Transit.

A. These aluminum pigs move truckload and in excess of 5,000 pounds.

Q. Well, what do you mean by the service had been irregular, that you hadn't been able to handle it or what?

A. We can handle up to 5,000, but that was the limit.

Q. But there have been times when they needed service for more than 5,000?

A. That is true.

Q. Now, you interline freight at the Tri-City terminal with other carriers located at Rock Island and Moline and East Moline, Ill., as well as some carriers at Davenport, I take it?

A. That is right.

Q. What has been your experience in your employment there that you have received shipments from carriers at [fol. 413] Davenport who themselves have the authority to serve points between Atalissa and Davenport, but these carriers have delivered shipments to you to perform the transportation service between Davenport and the destination point?

A. We have had occasional shipments.

Q. About how frequently has that occurred?

A. I would say almost daily.

By Exam. Carpenter:

Q. Over what period of time?

Mr. Howland: The examiner propounded a question.

A. Over what period of time?

By Exam. Carpenter:

Q. Yes, sir.

A. I could find some recently.

By Mr. Howland:

Q. Well, how far back does that extend?

A. Well, it extends ever since I have been agent at Davenport.

Q. Has it continued up to the present time?

A. Yes, sir.

Mr. Fowler: That is all.

Exam. Carpenter: Any further cross-examination? Any redirect?

Redirect examination.

By Mr. Howland:

Q. I would like to ask one or two questions, Mr. Crumly. How many employees do you have at your foundry?

A. I think there is 25 right now.

Q. Some of them live in Davenport or other nearby points?

A. Most of them do, yes; from Muscatine to Davenport.

Q. Is your business increasing or otherwise?

A. I would say it was increasing. In the last 2 years we have more than tripled our production.

Q. And that is a grey iron foundry?

A. Right.

[fol. 435] Q. Making castings of various types and kinds to specification. Are the castings made in accordance with specifications furnished by the buyer?

A. That is right; yes.

Mr. Howland: That is all I have.

Exam. Carpenter: Re-cross? You are excused.

(Witness excused.)

Mr. Nolan: The next witness is Mr. Turner.

Lester Turner was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Mr. Turner, give us your name and place of residence and occupation.

A. Lester Turner, Durant, Iowa, manager, Farmers Co-operative Elevator Company, Stockton, Iowa.

Q. About what is the size or weight of these shipments so tendered by other carriers having authority to serve the destination point?

A. They are usually shipments which are small, a minimum of possibly 2 or 3 hundred pounds.

Q. Either minimum shipments taking the minimum charge——

A. That's right.

Q. —or not more than 3 to 4 hundred pounds?

A. That's right.

[fol. 414] Q. What is the general type of the commodities that are tendered in that respect; that is, any particular kind that you have in mind?

A. Well, there are drugs and miscellaneous farm implements.

Q. When you say miscellaneous farm implements, to what are you referring, Mr. Hughes? What do you mean by miscellaneous farm implements, small implements?

A. Repair parts.

Q. Repair parts?

A. Yes, sir.

Q. A part for a plow or a tractor or any other farm implement that would probably not weigh over the 3 or 4 hundred pounds that you have been talking about?

A. That is right.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. Are the freight docks of the Rock Island Motor Transit Company and the freight dock of the Rock Island Railroad located in the same building at Davenport?

A. Yes, sir.

Q. And as I understand it, you handle freight under rail billing on your trucks?

A. Yes, sir.

Q. As well as freight under Rock Island Motor Transit billing?

[fol. 415] A. Yes, sir.

Q. In the same truck?

A. Yes, sir.

Q. And by the same token, do you handle by rail car out of there freight that is under truck billing?

A. Pardon?

Mr. Fowler: Read the question.

(Question read.)

A. Rail car?

By Mr. Fowler:

Q. Well, for instance, you have assembled some freight at Davenport that is tendered to you under truck billing. Do you physically transport that by rail car?

A. No, sir.

Q. In no event?

A. No, sir.

Q. What is the reason for putting the rail-billed freight on the motor truck?

A. The rail-billed freight? We make rail pickups and deliveries at these towns.

Q. In other words, your pickup and delivery service there is a combined pickup and delivery service?

A. Yes, sir.

Q. The same pickup is both for rail-billed freight as well as truck-billed freight?

A. Yes, sir.

[fol. 416] Q. And then you have the choice of physically transporting that freight either by truck or by rail car, as you choose?

A. I am not—I don't quite understand what you mean by rail car.

Mr. Fowler: Well, what was that question?

(Question read.)

Exam. Carpenter: That is both motor carrier and rail-billed freight?

Mr. Fowler: Yes.

A. These are l. c. l. shipments.

By Mr. Fowler:

Q. I understand.

A. We handle them.

Q. In other words, then, the operation there is an integral operation both as to rail and motor truck?

A. Yes, sir.

By Exam. Carpenter:

Q. If it was on rail billing, you move it into Davenport and turn it over to the railroad?

A. That is right.

Q. And if it is on motor carrier billing, it will move all the way through by motor carrier?

A. That is right.

Mr. Fowler: Wait a minute. Let me find this out.

Exam. Carpenter: Go ahead.

By Mr. Fowler:

Q. Let me ask you about this: Supposing you got a shipment originating at Moline destined to Atalissa. Let's [fol. 417] say it is on rail billing. Will you handle it by truck?

A. It will move by truck on rail billing.

Q. Is that right?

A. That is right.

Q. Now, let's suppose the same shipment moves under truck billing, will it ever be handled by rail car?

A. No.

Q. Doesn't the Rock Island Railroad have a way-freight service out to these points?

A. A way-freight service?

Q. I mean a local freight service out to these points by rail?

A. No.

Q. They have no rail service at all?

A. No. l. c. l.

Q. On l. c. l.?

A. Just carload.

Q. Is that true? How far west is that true?

Q. I am talking about some out-of-State points. Do you use any of the hog feeders or hog waterers?

A. We get quite a few hog feeders from the—I believe their headquarters in Coldwater, Ohio—I wouldn't be certain of that—the PaxCo. Those are shipped out then from their distributing point in East Moline.

Q. How about hog oilers or cattle oilers, things like that?

A. There is some of that that originates in Ohio and points of that kind, but—well, we buy mostly Iowa products.

Q. How about like tank heaters, do you handle those?

A. What?

Q. Do you handle any water-tank heaters?

[fol. 439] A. Oh, yes.

Q. Where do they originate?

A. We get some stuff from Maryville, Mo. That is mostly tractor chains and stuff of that kind comes out of Maryville, and some originates from Butler, Kansas City. Of course, they are sold through maybe some firm in Iowa, but the shipments are shipped from Kansas City, and also we get some from St. Louis.

Q. They are shipped direct either from the factor- or from some distributing point outside the State, is that right?

A. That is right.

Q. I assume those shipments you referred to as farm tools and farm implements and farm supplies, those come in in less-than-truckload quantities?

A. Oh, yes. Practically all, the majority of our shipments, I would say the majority of our shipments are what you might call drop shipments, from 80 pounds up to 5,000 pounds.

Q. With what frequency do you get shipments into Stockton from various out-of-State points?

A. By Rock Island Motor.

Q. I mean how often do you get them.

A. How often?

Q. Yes.

A. I would say practically every—I would say the truck is there at least four times a week. Hardly a day when we are not having stuff delivered to us.

[fol. 440] Q. Do you have occasion to have shipments in

A. These l. c. l. shipments are handled by truck as far, on my operation, as Brooklyn.

Q. Insofar as you know, there is no local freight service by rail to those points?

A. No, sir.

Q. On l. c. l. or l. t. l. shipments?

A. That is right.

Q. But you do have a rail service out there for carload? [fol. 418] A. Yes, sir.

Q. Now, the aluminum business at Durant, how are you dling that now?

A. How are we handling it? We have lost that business.

Q. What other carrier is handling it?

A. I don't know.

Q. But some other carrier is handling it?

A. I would assume.

Q. Now, who are the carriers that have authority to serve points on U. S. highway 6 that have tendered to you shipments destined to points which they themselves have authority to serve?

A. Merchants.

Q. That is the Merchants Motor Freight?

A. Yes.

Q. Is that the outfit that has its headquarters in Minneapolis?

A. Yes.

Mr. Howland: St. Paul, as a matter of fact, Mr. *Howland.*

By Mr. Fowler:

Q. Merchants Motor Freight.

A. Keeshin.

Q. Keeshin Motor Express, I suppose that is. And what other?

A. H & W.

Q. What other?

A. Offhand, that is all that I know of.

Q. What points on U. S. highway 6 between Davenport and Iowa City does Merchants Motor Freight have au- [fol. 419] thority to serve, if you know?

A. Well, I am almost certain they have authority into Wilton Junction——

excess of 5,000 pounds coming into your place of business?

A. Not very often that we have anything larger than that coming in.

Q. Have you had occasion to have shipments come in before there was any limitation on the Rock Island Motor?

A. Yes; we have had seed from the company when it would have to be broken down into maybe two shipments.

Q. What transportation facilities do you have to bring in these out-of-State shipments to your place of business?

A. Transportation?

Q. Yes; what transportation.

A. Well, I would say Rock Island Motor Transit and, of course, Rock Island Railroad, which is about 3 blocks from the place of business.

Q. Do you know of any other truck company that serves Stockton other than the Rock Island Motor Transit for these less-than-truckload shipments?

A. I don't think in my recollection since I have been there, I don't think any other truck in 15 years has ever called, has ever been to our place of business—that is, that was a regular carrier of freight. Might have been a private-owned truck like Central States Steel or something like that, but these are for their own delivery only.

Q. How about any of the so-called regular trucking com-
[fol. 441] panies like Watson or Des Moines Transportation Company or Western Transportation Company or Merchants Motor Freight, have those companies ever served you?

A. I don't think so.

Q. And then is it fair to say you are dependent upon the Rock Island Motor Transit Company for less-than-truckload shipments coming into your place of business?

A. We are very dependent on them and are going to be very much more so in a very short time.

Q. Why is that?

A. Because International Harvester is closing their Davenport repair and attachment branch and are moving that to Chicago. In other words, they are setting up these larger parts depots and all of our parts and attachments for machinery and such as that we will have to look to the Chicago depot for the origin of them, and that is going

Q. And have they——

A. —and Durant.

Q. And have they tendered you shipments destined to Wilton Junction and Durant?

A. Yes, sir.

Q. Of the type you have described?

A. Yes.

Q. Small implement parts and small shipments of drugs?

A. Yes.

Q. Now, getting back again to your terminal operation, which seems to be a combination of rail and motor truck terminal operation, do you intermingle your dockmen for that?

Mr. Holland: Just a minute. That is objected to as argumentative, improper cross-examination, assuming facts not shown.

Mr. Fowler: I will withdraw the question and ask you this:

By Mr. Fowler:

Q. In handling the rail and truck freight at your Davenport terminal, is it done by the same men?

A. We maintain separate forces.

Q. I asked you if it was the same man, same individual.

A. No.

Q. So that you have a dock force that handles exclusively [fol. 420] your truck freight?

A. The rail tenders our merchandise to us and we handle it.

Q. Well, do you care to answer my question? Do you have a dock force that handles exclusively your truck freight?

A. Yes, sir.

Q. And then you have a dock force that handles exclusively railroad?

A. No, sir.

Q. Pardon?

A. No, sir.

Q. Then how do you do it? It isn't a trap question. I am trying to find out.

to require overnight service almost to us there. That is what we are very much going to be dependent upon.

Q. Your company is the franchise International dealer at Stockton?

A. Yes, sir.

Q. And you have a territory served by your company for Internatio-al equipment and parts, is that right?

A. That is right. International farm equipment and refrigeration—well, all the line except their truck line.

[fol. 442] Q. What is the fact as to whether or not the International Harvester Company has gone into the home appliance business in addition to the farm implement business?

A. How is that?

Mr. Nolan: Read the question.

(Question read.)

A. Well, the only thing that I know of that they went into the home appliances is in refrigeration only.

Q. Does that consist of both refrigerators and deepfreezes?

A. Refrigerators, deepfreezers, milk coolers—of course, they are not home appliances, milk coolers, but refrigerators and deepfreezes.

Q. Do you handle refrigerators and deepfreezes?

A. Yes, sir.

Q. Milk coolers?

A. Yes, sir.

Q. Where do you get those appliances?

A. Well, we usually get those direct from the Davenport branch, but if we don't call at a specified time we are under agreement, we have an agreement whereby they can ship those to us by freight or motor truck and we have the right to specify which way we want that stuff delivered, and we have always specified motor truck.

Q. What I was trying to get at, Mr. Turner, where are the deepfreezes and refrigerators made that the Inter-[fol. 443] national Harvester Company supplies to its dealers?

A. They are made in— You have kind of got me at that. Cincinnati, Ohio, is it? I forget where it is.

A. This freight is handed to us by rail employees and then it is loaded into our trucks by our employees.

Q. And by the same token, freight tendered to the railroad would be handled by their dock force——

A. That is right.

Q. —is that the way it is handled?

A. That is true.

Mr. Fowler: I believe that is all.

Exam. Carpenter: Any further cross-examination? Any redirect?

Redirect examination.

By Mr. Howland:

Q. Now, in order that we can clear up this rail and truck business, the Rock Island Motor Transit Company [fol. 421] in the Tri-City area does perform a pickup and delivery service not only on shipments tendered to it on motor carrier billing but also picks up and delivers shipments moving on rail billing that are tendered to it by the Rock Island Railroad, is that correct?

A. That is right.

Q. Now the Rock Island Railroad has an agent, local freight agent, at the freight house in Davenport?

A. Yes, sir.

Q. And the Rock Island Motor Transit Company has a terminal agent in Davenport?

A. Yes, sir.

Q. Now, if you get directions from the Rock Island Railroad to pick up a shipment at some point in the Tri-City area, tell us about the physical handling, what your employees do with it and how it is handled.

A. We maintain separate trucks to handle rail pickup and delivery, and we maintain other trucks to handle motor transit billed freight, and we under no circumstances mix the two together.

This freight is picked up on the rail trucks and is unloaded by rail employees at their platform.

Q. They are made at out-of-State points?

A. They are made, I believe it is, in Ohio though. We don't go into that too strong, not too much interest in that angle, where they come from, because we deal directly with the Davenport branch.

Q. Have you had shipments come into your place direct from out-of-State points instead of through the Davenport branch?

A. Oh, yes; maybe not so much the freezers, we have been in that just the last year, but we have had them come in — They are shipped carload lots, as a usual thing, to some distributing point and they may be shipped to Iowa City, Muscatine, Davenport, and then reconsigned to us. Either we have got to go with one of our trucks and pick them up or have them come in— If we can't run in to pick them up, then they can consign them motor freight.

Q. In other words, they may ship a rail carload of freezers or refrigerators into, say, Iowa City?

A. That is right.

Q. And part of that carload is destined to your place——

A. That is right.

Q. —is that right?

A. That is right.

[fol. 444] Q. And then they are relayed or taken from Iowa City or some other point?

A. They can be, and there has been a case where we would have to have done that if there hadn't been an adjoining dealer picked one up for us at Iowa City; we would have had this special one reconsigned by motor freight.

Q. In other words, they do ship in by pool car for dealers in a certain area?

A. That is right.

Q. Now, Mr. Turner, state whether or not the service as rendered by the Rock Island Motor Transit in the past is essential and necessary for the proper conduct of your business at Stockton.

A. Well, we consider it very essential.

Q. Do you know of any service that would take the place of the Rock Island Motor Transit service if it should cease to do business?

A. Well, that would have to be proven. I don't know of

By Mr. Fowler:

Q. At what?

A. At their platform. Then they will distribute it as they see fit.

[fol. 422] By Exam. Carpenter:

Q. When you use the word "we," who are you speaking of, both motor transit and the rail?

A. I mean the motor transit drivers turns this freight over to rail employees at their platform to be billed——

Q. In other words, all pickups are made by the equipment of the Rock Island Motor Transit Company?

A. That is right.

By Mr. Howland:

Q. Now, when the shipment is delivered at the railroad freight house, if it is a shipment moving on rail billing, who handles the billing?

A. The rail.

Q. If the shipment is determined it is going to be handled on rail billing and moves in motor transit truck, what happens to that shipment?

A. We have our dock set up in blocks. These blocks cover each individual town in our operation, and the rail employee places that merchandise into our block and from then on it is handled by our employees.

Q. In other words, the rail employee brings it to the proper destination, that is, if it is Walcott or if it is——

A. That is right.

Q. —Durant, the rail employee brings it and places it there and from then on it is loaded and handled by the motor transit employee?

A. That is right.

[fol. 423] Q. Now, do you solicit any freight for the Rock Island Railroad?

A. No, sir.

Q. Are you under the directions of the Rock Island agent, the railroad agent, there?

A. No, sir.

any and there is no service in operation through our town or even, as far as I know, servicing any place along highway 6 there that would satisfactorily do the job.

Mr. Nolan: You may cross-examine.
Mr. Fowler: No cross-examination.
Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Lamp.

[fol. 445] H. R. LAMP was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Is that name H. R. Lamp?
A. Yes, sir.
Q. Where do you live?
A. Durant.
Q. What is your business?
A. Hardware, hardware and appliances.
Q. And how long have you been in business in Durant?
A. 32 years.
Q. And you have a general line of hardware, do you?
A. That is right.
Q. What appliances?
A. Stoves, refrigerators, bottled gas equipment and bottled gas, and so on.
Q. What is your source of supply of hardware?
A. Chicago, Hibbard, Spencer, Bartlett.
Q. What is your source of supply of home appliances?
A. We get gas stoves from Beaverton, Mich., and from the Odin Stove Company from Odin, Pa.
Q. Now, what are the size of your shipments of hardware ordinarily into Durant?
A. They usually run from 500 to 1,500 pounds, unless we get wire. Of course, a lot of wire out of Chicago some-
[fol. 446] times will run 5 or 6 or 7 thousand pounds. That may be only once a year or so. That comes from Hibbard out of Chicago.

Q. Does the Rock Island Railroad agent solicit any freight on motor carrier billing?

A. No, sir.

Q. Now, if you have a shipment moving on rail billing destined, we'll say, to Wilton or Durant, what does your peddle driver do with that shipment when he gest to destination?

A. At Wilton he makes his delivery direct.

Q. Direct to the consignee?

A. Direct to the consignee.

Q. If it is a C. O. D. shipment, does he make the collection?

A. It is handled by the rail agent.

Q. Does he collect the monty? Who collects the money?

A. The rail agent collects the money. He makes his own collections.

Q. Is that the practice at all of the stations or is there a difference?

A. At our terminal in Davenport——

Q. No; at these——

A. At these small stations?

Q. Yes.

[fol. 424] A. Yes, sir.

Q. Which places is there a difference, and describe the difference?

A. At these small stations merchandise is delivered off the way bill and not the expense bill. At Davenport the bills are expensed.

Q. I don't understand exactly what you mean by being delivered off the way bill and off the expense bill. Just tell us how it is handled, how the shipments are made to Walcott, Durant, Atalissa, and how in any of those places the practice varies from what you have told us about at Wilton.

A. Well, the agent at Wilton makes his collections.

Q. Makes his what?

A. Makes his own collections.

Q. Makes his own collections; all right. What about the other points?

Exam. Carpenter: That is only on C. O. D.'s, is it?

The Witness: That is on freight charges, too.

Q. What is the ordinary size of your appliance shipments?

A. Oh, stoves alone will weigh 5 or 6 hundred pounds. Usually get two or three stoves.

Q. Do you handle deepfreezes?

A. No.

Q. Refrigerators?

A. That's right.

Q. What other type of home appliances?

A. Well, we have got gas heaters, water heaters; electric water heat--s come from Beaverton, too.

Q. What transportation facilities have you been using for these inbound shipments to your place of business?

A. All motor freight.

Q. What company?

A. Rock Island Motor Transit.

Q. And why has it been you have been using the Rock Island Motor Transit Company for these shipments?

A. Never knew of anybody else to give us any service. I have never known of any other truck company bringing us anything besides Rock Island Motor Transit.

Q. Has that been true since the Rock Island Motor Transit Company has been in business?

A. That is right.

[fol. 447] Q. You say you know of no other company that would give the same type of local service?

A. I never had any other company bring anything in that I know of as long as I have been there because we used to have our own local freight line that was absorbed by the Rock Island Motor Transit a number of years ago.

Q. That was what?

A. Sold out to the Rock Island Motor Transit a number of years ago.

Q. Have you ever been solicited by any other motor truck company to handle your business?

A. No, sir.

Q. What would be the effect on your business if the Rock Island Motor Transit Company would be required to cease operating?

Mr. Fowler: Just a moment. Objected to on the ground

By Mr. Howland:

Q. On all freight charges?
A. That is right.
Q. All right. What is the situation at other points?
A. At Davenport, our driver——
Q. No; not at Davenport. These other small points.
A. So far as I know, they are the same.
Q. The practice is the same?
[fol. 425] A. Yes.

By Exam. Carpenter:

Q. In other words, when it is rail-billed freight and moves into one of these small places, the agent of the Rock Island collects the charges regardless of whether they are C. O. D. or not?
A. That is right.

By Mr. Fowler:

Q. Supposing they don't have an agent there; then what happens?
A. They have a collection station.
Q. That collects both motor freight and rail?
A. No. Our drivers collect our own.
Q. They have a freight collection station where they don't have any agent?
A. That is right.

Mr. Howland: I think that is all I have.
Exam. Carpenter: Go ahead.

Re-cross-examination.

By Mr. Fowler:

Q. Let me see if I understand this. I am a shipper in Moline, Ill., so I want to ship 500 pounds of freight out to Atalissa, Iowa.
A. Yes.
Q. So I call up the Rock Island Railroad and I tell them I have got 500 pounds of freight there I went to ship to Atalissa, Iowa, and I prepare a rail bill of lading. I de-

that it is immaterial; for the further reason that no such fact has been established in this record.

Exam. Carpenter: Objection overruled.

A. It would be quite a problem. I don't know how we would get our merchandise in there. It would mean we would have to buy some big trucks and get some of that stuff or find some other source, I suppose.

Q. Do you know of any other source at the present time?

A. I would not now.

Mr. Nolan: You may cross-examine.

[fol. 448] Mr. Fowler: No cross-examination.

Exam. Carpenter: No cross-examination. You are excused.

(Witness excused.)

Harold C. Woodard was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, Mr. Woodard?

A. Harold C. Woodard, traffic manager, Traffic Bureau of East Moline, Moline, and Rock Island, Incorporated.

Q. Now, how long have you been so engaged, Mr. Woodard?

A. Three years.

Q. What experience have you had in the transportation field, in traffic work?

A. About 37 years.

Q. 37 years. Would you just briefly state for the record what that experience consists of?

A. Chief rate clerk for the North Western Railway at Cedar Rapids 10 years, 15 years at Clinton, Iowa.

Q. What were you doing at Clinton?

A. Rate clerk. Six years as general traffic manager, Pillsbury Mills.

Q. Where was that?

liver it to a railroad pickup truck, is that correct?
[fol. 426] A. That is right.

Q. The railroad pickup truck takes it to your terminal, to the door marked "Atalissa" and unloads it there, substantially so, is that correct?

A. Well, Moline is a different set-up. The rail freight is picked up and taken to Moline station and is handled by Rock Island Railroad employees at that station.

Exam. Carpenter: Let's get back to a station, Mr. Fowler, where we can come through Davenport and find out what——

Mr. Nolan: That is all right; why don't you follow that on through?

By Mr. Fowler:

Q. In other words, that 500 pounds of rail-billed freight finally gets into your truck going to Atalissa the next morning?

A. That is right.

Q. Now, I am the same shipper. I call you up and say, "I have got 500 pounds going to Atalissa," but I call up the Rock Island Motor Transit this time instead of the Rock Island Railroad. I prepare a bill of lading on the Rock Island Motor Transit and call it. Your Motor Transit pick-up truck goes over and gets the shipment——

A. That is right.

Q. —brings it to the Davenport terminal, I assume——

A. That is right.

Q. —and that is put on the same truck going to Atalissa [fol. 427] the next morning?

A. That is right.

Q. In one situation that 500 pounds is riding under truck billing and in the next situation it is riding under rail billing?

A. That is right.

Mr. Fowler: I see.

Exam. Carpenter: And you have no jurisdiction over the truck that picks up the rail-billed freight, is that correct or not?

The Witness: We dispatch them and that is all.

A. Clinton, Iowa. That is the feed and soy division.

Q. Then with the Traffic Bureau there at Moline and East [fol. 449] Moline, Silvis, and what other point?

A. East Moline, Moline, Rock Island.

Q. Oh, Rock Island. Then you represent the shipping interests through your association of the Tri Cities east of the river, is that right?

A. That is right.

Q. Now, what is the general population of the Quad-City area, excluding Davenport and other points or towns west of the river, Mr. Woodard?

A. I would say around a hundred thousand.

Q. What organizations comprise your bureau? You don't have to give us the name and number of each one, but in general the nature of their business and the number of your members.

A. I have 68 members.

Q. What industries do they represent, generally?

A. They represent practically all of the industries.

Q. I know, but what general type of industry—I will put it that way—do they represent?

A. Machinery, rubber boots and shoes; candy.

Q. In addition to the so-called large implement companies such as Deere, International, companies of that character, do you have smaller implement companies making parts and different kinds of farm implements and tools in the Tri-City area?

A. Not that I know of.

Q. Now, Mr. Woodard, are you speaking here on behalf [fol. 450] of the bureau which you are traffic manager of?

A. I am; yes.

Q. Have you been authorized to attend this hearing on behalf of your bureau?

A. Oh, yes.

Q. You are familiar, are you not, with the general scope of the application here and the territory involved?

A. Yes.

Q. Would you tell, Mr. Woodard, for the examiner and those present what interest your members have in this particular hearing?

A. Well, my members would like to get service to all these points.

Mr. Fowler: They dispatch them. In other words, they tell them where there is a shipment to be picked up, I assume.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Fowler:

Q. To clean up the record, this particular foundry has found some other carrier to handle its stuff for it and you don't get any of it now?

A. That is right.

Exam. Carpenter: All right, thank you.

Mr. Nolan: Let's straighten that record out there.

Redirect Examination.

By Mr. Howland:

Q. Mr. Hughes, is the ~~Rock~~ Island Motor Transit Company handling these aluminum shipments of less than 5,000 pounds for the Durant foundry company at the present time?

A. I talked to the gentleman at Durant and he gets them [fol. 428] strictly truckload. There have been occasions.

Q. The aluminum pigs?

A. That is right, but there are shipments outbound from Durant we still get.

Q. Outbound shipments?

A. That is right.

By Exam. Carpenter:

Q. Are they pigs?

A. No; they are castings, aluminum castings.

Exam. Carpenter: Any further cross-examination? You are excused.

(Witness excused.)

Exam. Carpenter: We will recess for lunch until 1:45.

(At 12:15 p.m., a recess was taken until 1:45 p.m. of the same day.)

Q. And what points in particular do you have reference to?

A. Well, the main points are those served by the Rock Island Motor Transit Company who are not served by any other truck line.

Q. Does that include the territory from Rock Island to Omaha, Nebr.?

A. Yes.

Q. And the side points off of No. 6, is that correct?

A. That is right.

Q. I will ask you, Mr. Woodard, if there is a normal flow of traffic from the towns which your traffic bureau serves into the Iowa territory served by the Rock Island [fol. 451] Motor Transit Company.

A. Oh, yes.

Q. And is that a daily flow——

A. Yes.

Q. —you might say?

A. Yes.

Q. Have you made an investigation of the carriers serving that territory other than the Rock Island Motor Transit Company?

A. I have not.

Q. I mean, have you made——

By Mr. Ludden:

Q. What was that answer?

A. "I have not."

By Mr. Nolan:

Q. Are you familiar with the operations of the motor carriers in operating through the territory served by the Rock Island Motor Transit Company?

A. Say that again, please.

Exam. Carpenter: Read the question.

(Question read.)

By Mr. Nolan:

Q. I mean of their general operation.

AFTERNOON SESSION.

1:45 p.m.

Mr. Howland: If the examiner please, I would like the record to show that at this time counsel for applicant is tendering and delivering to counsel for protestants copies of exhibits 5, 6 and 7.

Exam. Carpenter: The record will so show.

LESTER CRUMLY was sworn and testified as follows:

Direct Examination.

By Mr. Nolan:

Q. You are Mr. Lester Crumly?

[fol. 429] A. That is right.

Q. You live at Stockton, Iowa?

A. I live in Wilton Junction.

Q. What business are you in?

A. Foundry business.

Q. Where is your foundry?

A. In Stockton, Iowa.

Q. How long have you been in that business?

A. Three years.

Q. What is the nature of the products made by your foundry?

A. It is grey iron castings used in all types of industry.

Q. Where do you get your raw supplies for that?

A. Well, some of it comes out of Duluth, Minn., our raw iron does. Some from Milwaukee. It is from all over.

Q. And what inbound interstate shipments do you have coming into the plant at Stockton?

A. Well, Like I say, our pig iron and coke.

Q. Does that come in carload quantities or less?

A. No; we don't buy carload quantity because we are not of a size to warrant that kind of an inventory so we purchase more on the 2-ton and 3-ton delivery, stuff like that.

Q. How do those inbound shipments come in, by rail, by truck, or just how?

A. Oh, I would say 90 percent of them by truck and once in a great while we will have a car.

Exam. Carpenter: Do you understand the question?
The Witness: Could you phrase that a little different?

By Mr. Nolan:

Q. Are you familiar with the truck operations, say, of the so-called overhead carriers, motor truck operators operating between the Tri Cities, Des Moines, and Omaha? Do you know who they are and what their general operations are?

[fol. 452] A. No.

Q. Well, I will put it this way: Do you know of any carrier offering a local peddler service west from Davenport along U. S. highway No. 6 other than the Rock Island Motor Transit?

A. I have had none call on me.

Q. Have you had occasion to determine whether or not there are any carriers that give a local peddler service along there other than the Rock Island Motor Transit Company? Have you had occasion, had any inquiry from your shippers?

A. Oh, yes, yes, yes.

Q. Have you made inquiry as to whether or not there are any other carriers?

A. Yes; I have.

Q. What was the results of those inquiries made by you as to whether or not there were carriers, any other carriers, serving the so-called small towns?

A. When I called these transportation companies, they didn't want to handle it.

Q. You have had that experience?

A. Yes.

Q. What companies did you call and found they didn't want to handle such shipments.

A. Well, there has been various carriers who have done that.

Q. Well, can you name some of them, or would you rather not?

A. I would rather not.

[fol. 453] Q. Now, Mr. Woodard, state whether or not the cessation of operation by the Rock Island Motor Transit Company in the Iowa territory, particularly between the

Tri Cities and Omaha, and the off-route points served by the Rock Island Motor Transit, would have an adverse effect upon the companies represented by you in the Tri Cities east of the river.

Mr. Fowler: Just a minute. That is objected to as immaterial; for the further reason that it is assuming facts not established in this record; for the further reason that it calls for an incompetent conclusion and opinion of the witness.

Exam. Carpenter: Objection overruled.

The Witness: Would you repeat that again?

Exam. Carpenter: Read the question.

(Question read.)

A. It certainly would.

By Mr. Nolan:

Q. Would you just state in what way?

Mr. Fowler: Same objection.

Exam. Carpenter: Same ruling.

A. Well, they wouldn't have the service. They would either have to ship by rail—and it would be weekly service or tri-weekly.

By Mr. Nolan:

Q. With what regularity would you say your customers, clients, require service from Moline, East Moline, Rock Island, and Silvis into the Iowa territory involved in this case?

[fol. 454] A. Daily.

Q. Now, Mr. Woodard, these 68 members that make up your bureau, are they all large shippers or some of them are what you might call small shippers?

A. Well, I have the largest.

Q. What did you say?

A. I have the largest.

Q. Do you have some of the smallest?

A. I have the smallest, too.

Q. Do you represent in your bureau—I mean is your

bureau a representative of the implement companies or farm machine companies there, or do they have their own?

A. They all belong to the Traffic Bureau.

Q. But they also have their own traffic departments, is that right?

A. That is right.

Q. Now, you understand do you not, that the Rock Island Motor Transit Company is presently operating under a 5,000-pound limitation?

A. Yes.

Q. And what effect does that have upon the ability of your customers to get shipments into the Iowa territory?

A. Well, they have to split them up if they run over 5,000 pounds.

Q. Have they been required to do that in order to get [fol. 455] service to destination?

A. Yes.

Q. Are you familiar with that fact?

A. Yes.

Q. State whether or not in your opinion, from your experience in the transportation field, if there is a need for a greater volume of service by the Rock Island Motor Transit Company in this particular territory.

Mr. Fowler: That is objected to as immaterial and calling for an incompetent conclusion of this witness.

Exam. Carpenter: He may give his opinion.

Mr. Nolan: You may answer.

The Witness: Repeat the question.

Exam. Carpenter: Read the question.

(Question read.)

A. Oh, yes.

By Mr. Nolan:

Q. What I mean by volume, I mean authority to handle larger shipments than 5,000 pounds.

A. That was my understanding.

Exam. Carpenter: Did you say something, Mr. Fowler?

Mr. Fowler: I object to it for the same reason.

Exam. Carpenter: Objection overruled.

By Mr. Fowler:

Q. You live at Durant?
A. That's right.
Q. And your company is located——
A. At Stockton.
Q. At Stockton. What is the name of the company?
A. Farmers Cooperative Elevator Company.

Mr. Fowler: Thank you.

By Mr. Nolan:

Q. How long have you been connected with the elevator company there?
A. 15 years.
[fol. 436] Q. Now, do you buy and sell grain, soybeans, and things of that character?
A. Yes. We are in the general elevator and feed business; also other lines, too.
Q. All right, now, so far as your merchandising of anything, what merchandise does your company handle?
A. We handle a full line, practically a full line, International Harvester in farm equipment, also hardware, fencing, feed, seed, posts, wire, practically everything but groceries and clothing.
Q. Now, is it fair to say that your outbound shipments are in carload quantities?
A. Yes. What outbound shipments there are. There hasn't been practically any outbound shipments in the last few years because we are primarily in an importing section. In other words, we don't ship scarcely any grain or anything out at all.
Q. The grain raised around there is mostly fed in that area, is that right?
A. That is right.
Q. How about soybeans?
A. Soybeans, well, that would be in any quantity for the last few years; we have been transporting them by truck to local storage located close to us there, and we haven't done any shipping of those because we have trucked that. We operate trucks of our own for that, and we have been transporting our beans out in that way.

[fol. 437] Q. Now, on your inbound shipments, where do they generally come from, what point?

A. Well, International Harvester shipments may originate at any one of their plants, and that is Louisville, Ky., Chicago, the Albany plant, the various plants anywhere over the eastern part of the country there although, of course, the tractors, the larger tractors, they come out of Rock Island and they are transported direct from the factory. We pick those up direct, but most of the other shipments are either direct from the branch house or come by freight from the different plants, whatever plant they originate from.

Q. When you speak about by freight, do you mean rail car freight or motor truck freight?

A. I mean truck is always specified if possible because it is much more convenient.

Q. Where do you get your hardware supply?

A. Hardware, the main companies are Harper-McIntire, Cedar Rapids, Haw Hardware of Ottumwa, and we have some stuff out of Des Moines, from Consumer's Cooperative here. That comes usually in by truck, too.

Q. How about any out-of-State points as points of origin for hardware?

A. Out-of-State origin. Well, there isn't at the present time a whole lot that we get out of the State other than the International Harvester products.

[fol. 438] Q. You handle paints or seeds or anything like that?

A. We handle those seeds, but those come from Standard Seed Company and Sexauer Seed Company here in Des Moines or Standard's branch house at Davenport. Paints, we don't handle paints in any volume at all, so that is——

Q. Then, as I understand your testimony, you are dependent mostly for out-of-State supply of your farm implements?

A. That is right.

Q. In addition to handling International Harvester implements, do you handle any other type of farm tools?

A. We buy some of Hamilton, Cedar Rapids, and Biltmire Manufacturing at Manning, Iowa, and also of McCullough at Webster City. Mostly all that is——

Q. How does a 500-pound shipment now move from Moline to Atalissa, Iowa, over the Rock Island?

A. Well, I am not sure about that. I would have to have my guide on that.

[fol. 461] Q. You don't know what the service is now?

A. No.

Q. You don't know what it is going to be in the event this application is granted?

A. I do not.

Mr. Fowler: That is all.

Mr. Nolan: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

L. L. Cole was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. My name is L. L. Cole.

Q. And your home is where, Mr. Cole?

A. In Des Moines, Iowa.

Q. Your age is what?

A. 39.

Q. And what is the position which you hold with the Rock Island Motor Transit Company at the present time?

A. I hold position of auditor.

Q. Speak a little louder, Mr. Cole, please, in making responses to the questions.

What experience have you had in accounting work, Mr. Cole?

A. I have been employed in motor carrier accounting work since 1934.

[fol. 462] Q. In what capacities and by what concern?

A. I was employed with the Santa Fe Trail Transportation Company in Wichita, Kansas., 1934 to 1939, came with the Rock Island Motor Transit Company June 1, 1939.

Q. You have been continuously employed in Des Moines with the Rock Island Motor Transit Company since that date?

A. That is correct.

Q. Are you a certified public accountant?

A. No, sir.

Q. You are familiar with the principles of accounting and particularly as applied in the motor carrier field?

A. That is right.

Q. Now, Mr. Cole, you have made certain accounting studies in connection with the operations of the Rock Island Motor Transit Company and certain other selected carriers in this Midwest territory which you have placed in graph form, have you not?

A. I have.

Q. Will you produce those, please?

Mr. Howland: We will make this as Exhibit 8.

(The document referred to was marked as "Applicant's Exhibit No. 8, Witness Cole," for identification.)

By Mr. Howland:

Q. Now, Mr. Cole, directing your attention to the paper which has been marked for identification by our reporter [fol. 463] as applicant's Exhibit No. 8, I notice that that consists of a series of graphs or lines and it is headed, "Tons Transported in Inter-City Service." Was this document prepared by you?

A. It was.

Q. The first line, I observe, is a black line and it moves in a general direction of from left to right on the sheet, and at various points along the course of it there are various figures shown. What is shown by that upper black line?

A. That line indicates at the various stages the aggregate tonnage hauled by motor carriers listed on the graph during each of the years indicated by the graph.

Q. In other words, the years are shown by the figures 1944, 1945, and so forth, concluding with the year 1950?

A. That is right.

Q. Now, the source of the information that is shown on

Q. Were you aware that Merchants Motor Freight has extended its operations within the last 2 years over what they were in 1946? Did you know that or give any influence to that in developing your exhibit?

A. No; I didn't.

Q. You are aware, of course, that the Ringsby Truck Line, Inc., for instances, does 99 percent of its business outside of the territory that is involved in this application, are you not?

A. No; I am not.

Q. What was the purpose of selecting these nine carriers you have listed on exhibit 8 for the purpose of this exhibit?

A. We felt that they were representative carriers in this territory.

Q. Well, Merchants Motor Freight is principally a north-and-south operation, is it not?

[fol. 470] A. Well, I really don't know about the operations of these individual companies.

Q. Ringsby is principally a Chicago-to-Denver operator, aren't they, and on out to the coast?

A. They interline with us.

Q. Watson is an operation extending from Chicago to Los Angeles, is it not, or were you aware of that?

A. No; I wasn't.

Q. Then all that your exhibit No. 9 shows—and I have particular reference now to your black line—the figure 1,852,540 represents millions of tons?

A. That is 1,852,540 tons.

Q. 1 million—

A. 1,852,540 tons.

Q. You mean that these eight carriers in 1950 collectively only handled 1,852,540 tons of freight?

A. That is correct.

Q. As shown by their reports on file with the Commerce Commission?

A. That is correct.

Q. Now in what respect are those eight carriers comparable with Rock Island Motor Transit Company?

A. They all operate across the general lines of this application. That is my understanding.

Q. Well, there are a lot of other carriers that operate [fol. 471] across here. Why didn't you include them?

A. We picked what we thought were representative carriers.

Q. That is it. You don't claim to know the influences that were responsible either for decreases or increases in tons of freight billed by any of these carriers in any one of these years?

A. We just took their annual reports.

Q. Please answer my question.

Exam. Carpenter: Read the question, please.

(Question read.)

A. I do not.

By Mr. Fowler:

Q. Now, the red line, according to the legend on the exhibit, is supposed to depict the consolidated CRI&P l. c. l. traffic and the Rock Island Motor Transit motor-billed freight. Now, is that for the whole railroad system?

A. That is right.

Q. And for the whole Rock Island Motor Transit system?

A. That is correct.

Q. Supposing that the Rock Island Motor Transit would increase in tons and the Rock Island Railroad would decrease in tons of l. c. l, traffic, that would have a result of showing a declining curve, wouldn't it?

A. Would you repeat the question?

Exam. Carpenter: Read the question.

(Question read.)

[fol. 472] A. Which line are you referring to?

By Mr. Fowler:

Q. The red line.

A. It depends upon the extent of the increase and the decrease.

Q. But I am supposing that the Rock Island Railroad lost a million tons of l. c. l. traffic in a year.

Mr. Howland: We don't have that much.

Mr. Nolan: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Mr. Woodard, you don't claim to have any personal [fol. 456] knowledge of these shipments that your members actually transported?

A. I audit the freight bills and I see those.

Q. Other than that, you don't claim to have any personal knowledge——

A. No.

Q. —of this situation.

Exam. Carpenter: Pardon me a minute. Mr. Reporter, read that question, please.

(Question read.)

Mr. Fowler: "Actually shipped" is better.

By Mr. Fowler:

Q. Now, what points are there on U. S. highway No. 6 that you are having difficulty getting service to?

A. On highway 6?

Q. Yes.

A. That I am having difficulty?

Q. Yes. You are here, as I understand it, contending that you don't have any service to certain points on U. S. highway 6 out of the Tri Cities, is that what you are here for?

A. I didn't say that.

Q. All right, I misunderstood you then. What did you say?

A. I said that I was here for the reason that I wanted my shippers to receive adequate transportation to all points covered by the Rock Island Motor Transit Company.

Q. That is what you are here for?

[fol. 457] A. Yes.

Mr. Fowler: That is all.

Exam. Carpenter: Any further cross-examination? Any redirect?

Redirect examination.

By Mr. Nolan:

Q. By the way, Mr. Woodard, are you familiar in a general way with the type and character of service provided by the Rock Island Motor Transit Company to the territory served by it west of Davenport?

A. Yes.

Q. And state whether or not, from your work with the Traffic Bureau and the members of your bureau, if that service has been satisfactory in the past.

A. It has.

Q. With the exception of limitation on the size of shipments handled?

Mr. Fowler: Of course, that is objected to as leading.

Exam. Carpenter: It is a leading question. Objection sustained.

By Mr. Nolan:

Q. I will put it this way: With the limit of the size of shipment, is that service satisfactory, considering only the limitation in size of shipment?

A. I would say no.

Q. But so far as the service that they are authorized to render, that type of business and that type of service, has that been satisfactory?

[fol. 458] A. Yes.

Mr. Nolan: That is all.

Recross-examination.

By Mr. Rosenbaum:

Q. Did you support the application when Rock Island asked for that 5,000-pound restriction?

A. Did I support it?

Q. Weren't you here supporting that application when they asked for the 5,000-pound restriction?

A. Yes, sir.

Mr. Rosenbaum: That is all.

Exam. Carpenter: Any further cross-examination?
Mr. Fowler: Yes.

By Mr. Fowler:

Q. Now, since the 1st of January 1952, what instance do you have personal knowledge of where anybody had a shipment of 5,000 pounds or over moving out to any point on U. S. highway 6 that they were unable to get some transportation service to handle?

A. I have none.

Q. And as far as you know, all of the members of your association that have occasion to make shipments to points on U. S. highway 6 in interstate commerce are being taken care of?

A. To my knowledge; yes.

Mr. Fowler: That is all.

Redirect examination.

[fol. 459] By Mr. Nolan:

Q. Now, Mr. Woodard, you told me just a few minutes ago you had had complaints made to you that your shippers had to split up their shipments in order to stay within the 5,000 pounds. Have you had such complaints?

Mr. Fowler: Just a minute. I want to object to that as leading and repetitious.

Exam. Carpenter: Objection overruled.

A. He said from the first of the year.

By Mr. Nolan:

Q. What?

A. He said from the first of the year.

Q. Don't pay any attention to what he said.

A. I don't have any knowledge of any since the first of the year.

Q. How about before the first of the year?

A. Yes.

Q. Are you able to give us any names of the companies who have so complained to you, if you recall?

A. I wouldn't recall that. There are so many of them call up I don't pay any attention to who they are, just give them an answer over the telephone and that is it.

Q. Did that occur more than once before the first of the year?

A. Oh, yes, sir.

Q. How many times would you say?

A. Probably half a dozen times before the first of the year.

Q. And that came to you in the regular course of your [fol. 460] duties as manager of the Traffic Bureau; is that right?

A. That is right; yes.

Mr. Nolan: That is all.

Recross-examination.

By Mr. Fowler:

Q. Now, Mr. Woodard, let's assume a typical shipment of 500 pounds from one of your shippers in Moline which is going to Atalissa, Iowa.

A. Yes.

Q. What is the difference in the service that you obtain from the Rock Island Railroad under the permanent authority which it holds as distinguished from the service you are going to have in the event this application is granted?

A. Repeat that again.

Exam. Carpenter: Read the question.

(Question read.)

Exam. Carpenter: Just a minute. Off the record.

(Discussion off the record.)

A. Well, we would have to get another carrier, that is all.

By Mr. Fowler:

Q. Is that the only answer you can give me to that question?

A. Yes.

the document marked for identification as exhibit No. 8 was what?

A. Would you tell me which line you are referring to?

Q. For that black line?

A. The black line, the information was secured from copies of annual reports of those carriers that are on file with the Iowa Commerce Commission.

Q. Here in the Iowa Commerce Commission office in Des Moines?

A. That is right.

Q. And those reports on file with the Iowa Commerce [fol. 464] Commission, constitute a public record, do they not?

A. That is correct.

Q. Now, I notice that these figures, 1944, 1945, and 1946, and so forth, what is shown by those figures; that is, how do you get the years? Is that a year-end proposition or just explain how that tabulation at the bottom operates to show the years.

A. Each of the carriers are required to file an annual report covering their activities for the year just passed. From those reports during each of the years listed, we have obtained this information.

Q. Well, what I wanted particular was, for instance, at the bottom you show 1944 immediately to the right of a certain vertical line; is that the end of the year 1944 or the beginning or what?

A. That indicates that that vertical line above 1944 is used as an index whereupon we have placed our lines resulting from the tabulation of the tonnage carried by these various trucking companies.

Q. But what I want to get at, Mr. Cole, is that at the right of each of these columns you have a figure, 1944, 1945, 1946, 1947, 1948, 1949, and 1950; now, do those figures represent the year-end of the year designated?

A. That is correct.

Q. Yes. So as I understand it, the document marked for identification as exhibit No. 8, the latest information that [fol. 465] appears here is as of the year-end of the year 1950?

A. That is correct.

Q. Now, the companies whose tonnage is included in the black line on the document marked for identification as exhibit No. 8 are listed on the right-hand side of the sheet?

A. That is correct.

Q. And the figure which entered into this composite graph was the composite of the figures as reported by those companies in the reports filed with the Iowa State Commerce Commission?

A. That is right.

Q. Now, what is the significance of the red line, which is the second line from the top on this graph?

A. The red line indicates the volume of tonnage handled by the CRI&P railroad, l. c. l. traffic, and the Rock Island Motor Transit Company motor-billed freight.

Q. L. c. l. traffic, you said, consolidated CRI&P railroad l. c. l. traffic; in what territory is that figure taken from?

A. That is our system figure.

Q. The system figure for the Rock Island Railroad?

A. That is right.

Q. And that includes also as a composite figure the Rock Island Railroad system l. c. l. traffic and the Rock Island Motor Transit motor carrier freight?

A. That is correct.

Q. So, as a matter of fact, beginning at the left-hand [fol. 466] side of the graph, the tonnage of the Rock Island Railroad system l. c. l. freight and the Rock Island Motor Transit shows at the end of 1946 a high figure of 748,260 tons and a decline to a figure of 423,960 tons at the year-end of 1950?

A. That is right.

Q. Whereas, these selected truck lines show a tonnage commencing at 755,000 tons in 1944 and increasing to 1,852,540 tons at the year-end of 1950?

A. That is right.

Mr. Rosenbaum: Is that in the territory here in question, covered by this application, or is this the over-all operation?

Mr. Howland: Yes; certainly. These truck lines that are listed, I will go into that; I will show that.

Mr. Rosenbaum: I'm sorry.

By Mr. Howland:

Q. These truck lines which are listed here are truck lines operating in this general territory, including those having authority to operate on U. S. highway 6?

A. That is right.

Q. Of course, in filing their reports with the Iowa State Commerce Commission, these truck lines don't list the volume of the tonnage handled on highway 6 separately from tonnage handled over the balance of their system, do they?

A. They do not.

Q. So that you have taken the total tonnage of these carriers as shown by the report and used that as the figure for the purpose of making this graph?

[fol. 467] A. That is right.

Q. But those motor carriers which are there shown are regular-route operators, all of them having authority to operate on U. S. highway 6?

A. That is my understanding.

Q. Now, you have a figure in blue on the graph marked for identification as Exhibit No. 8, just below the red figure, which is quite closely parallel with it, and that, I notice, shows from 1944 a tonnage of 496,479 and a tonnage of 264,612 with the year-end 1950; what is shown by that blue line?

A. The blue line represents the Chicago, Rock Island and Pacific l. c. l. freight.

Q. And is that the system figure?

A. That is our system figure.

Q. In all territories served by the Rock Island Railroad?

A. That is correct.

Q. That is not limited, of course, to the territory involved in this particular area?

A. That is right.

Q. Now, you have at the bottom of the sheet marked for identification as exhibit No. 8 a green line which shows a variation beginning with 112,468 and a drop to 97,697 and thence a gradual increase to 159,348 at the year-end of 1950; what is indicated by that green line on the exhibit marked for identification as Exhibit 8?

[fol. 468] A. That line represents the Rock Island Motor Transit Company motor-billed freight.

Q. That would be the traffic of the Rock Island Motor Transit Company as a system figure moving on motor carrier billing?

A. That is correct.

Q. Is there anything further that you wish to offer in explanation of the graph marked for identification as exhibit No. 8?

A. I believe not.

OFFER IN EVIDENCE

Mr. Howland: At this time we offer and introduce in evidence the graph heretofore marked for identification as exhibit No. 8 and now offered as exhibit No. 8.

Mr. Fowler: Do you want me to examine on this exhibit now or reserve my cross-examination until his direct testimony is concluded?

Exam. Carpenter: Whichever you prefer.

Mr. Fowler: We might as well take these exhibits one at a time.

Mr. Howland: That is all right.

By Mr. Fowler:

Q. As I understand it, you selected a group of carriers you have listed on your exhibit No. 8 for the purposes of developing this exhibit?

A. That is correct.

Q. And the figures that you have used were taken from the annual reports filed by these carriers with the Iowa State Commerce Commission?

[fol. 469] A. That is correct.

Q. And you don't have any knowledge of the changes in the scope of operations of these various carriers from the year 1944 to 1950, do you?

A. I do not.

Q. For instance, you may or may not be advised that the Bos Truck Line, Inc., have extended their operations quite substantially since 1945 in other areas.

A. I would have no knowledge of that in my business.

By Mr. Fowler:

Q. And the Rock Island Motor Transit Company gained back 500,000 of it, the curve would still go down, wouldn't it?

A. There was a net deficit there; yes.

Q. What is the purpose of hooking together the l. c. l. railroad traffic and then taking all of the Rock Island Motor Transit Company, both truckload and l. t. l.?

Mr. Howland: That is objected to as purely argumentative and not proper cross-examination. If he is going to have an argument in this case, I think I can demonstrate the object and purpose, but I don't believe it is proper cross-examination.

Mr. Fowler: Now, if you will listen to my question, I don't believe you will say it is argumentative.

Exam. Carpenter: I will overrule the objection.

Mr. Fowler: Now, read the question.

(Question read.)

A. You have got me confused. I would like to have it again.

Exam. Carpenter: Read the question again.

(Question re-read.)

[fol. 473] A. It is my opinion that the CRI&P l. t. l. traffic——

Exam. Carpenter: L. c. l.

A. —l. c. l. traffic is comparable to the motor-billed freight of the Rock Island Motor Transit Company.

By Mr. Fowler:

Q. That is the reason you have shown it on this exhibit?

A. That is right.

Q. Now, on the exhibit you have got a green line down at the bottom which apparently is supposed to show the Rock Island Motor Transit motor-billed freight in 1944 to 1950.

A. That is right.

Q. Throughout its system?

A. That is correct.

Q. And that has no direct relation to the stations that are involved in this particular application?

A. Only that they are involved in it.

Q. I mean you haven't undertaken to make any separation?

A. No.

Q. Did you, in connection with the development of the material which you used in preparing this exhibit 8, did you make an analysis of your station records at points involved in this application to determine whether or not your tons handled had not increased substantially in the last three or four years?

A. We will offer an exhibit——

Q. You have prepared such an exhibit?

[fol. 474] A. —covering the last——

Q. Related to these stations?

A. Not for this same period of time, however.

Q. But related to these stations we are talking about in this application?

A. Yes, sir.

Mr. Fowler: Well, the exhibit is objected to for the reason that it is immaterial, for the reason that it does not have any bearing on any issue involved in this proceeding, for the reason that the figures there shown could not possibly be analyzed and adjusted to prove anything in connection with the matters which are before the Commission in this hearing.

Mr. Ludden: We join in that objection.

Mr. Howland: Obviously, if the examiner please, no comparison is possible of the direct tonnage involved in the particular routes and over the particular territory. The objection manifestly goes to the weight to be accorded to the exhibit rather than to its admissibility as such, and I submit that the proper foundation has been laid for the introduction of the exhibit for the purposes of comparison of the volume of traffic transported by the agencies shown.

Now, the examiner knows and the record shows that carriers in making their reports do not break down the traffic over any particular highway or over any particular route.

The exhibit is offered for the purpose of showing that the [fol. 475] tonnage billed by Rock Island Motor Transit Company has not shown a comparable increase with the volume of business of other motor carriers operating in the territory and some of whom are objectors and protestants in this proceeding.

Mr. Fowler: I want to add one further basis for my objection. It is hearsay and that there has been no underlying data developed from which you could determine the value of the information which is attempted to be shown on the exhibit 8.

Exam. Carpenter: The objection is overruled. The document is received in evidence as exhibit No. 8.

(Applicant's Exhibit No. 8, Witness Cole, was received in evidence.)

Mr. Howland: I want to ask one or two questions for the purpose of showing, further developing the information which was contained on exhibit No. 8.

By Mr. Howland:

Q. Do you have the data with you on which Exhibit No. 8 was made up, a memo of the tonnage figures?

A. Yes; I do have.

Q. Take Des Moines Transportation Company, Inc., what was the tonnage of Des Moines Transportation Company at the inception of the period covered by the graph, exhibit No. 8?

Exam. Carpenter: That is by the black line; I take it.

Mr. Howland: Yes.

A. 1944, Des Moines Transportation Company hauled 49,871 tons.

By Mr. Howland:

Q. What did they haul at the end of 1950?

[fol. 476] A. 178,540 tons.

Q. All right. What about Merchants Motor Freight?

A. 1944——

Q. Just a minute. Now, with those figures in mind, is it

not true that Des Moines Transportation Company has shown an increase in the tonnage handled in the period covered by the graph, exhibit 8, approximately the same as that shown by the composite figure of the carriers named for the years in question? In other words, 49,000-plus tons to 178,000, whereas the composite figure for all carriers is 755,000 to a total of 1,852,000?

A. Percentage-wise, Des Moines Transportation Company increased to a greater extent.

Q. To a greater extent than the composite figure?

A. That is correct.

Mr. Nolan: This is off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Howland:

Q. Now, what about the Iowa-Nebraska Transportation Company?

A. Do you want the tonnage figure?

Q. The tonnage figure at the beginning and the end.

A. In 1944, 15,421 tons; in 1950, 43,678 tons.

Q. How about Western Transportation Company?

A. 1944 was 61,667 and 1950 165,668.

Q. And Merchants Motor Freight? I don't believe we [fol. 477] have that. I mean it isn't in the record here.

Exam. Carpenter: No; it isn't.

By Mr. Howland:

Q. Will you give that?

A. 1944 was 127,635 tons; in 1950 it was 277,443 tons.

Mr. Howland: That is all I wish to offer at this time with respect to this exhibit.

Exam. Carpenter: Any further cross-examination?

We will take a 5-minute recess.

(Short recess.)

(Witness withdrawn)

KEITH CECIL was sworn and testified as follows:

Direct Examination.

By Mr. Nolan:

Q. Will you please state your name, place of residence, and occupation, Mr. Cecil?

A. Keith Cecil, general manager, secretary-treasurer of Central Transfer Company, an Illinois corporation, Brimfield, Ill.

Q. State whether or not the Central Transfer Company is engaged in the handling of freight by motor vehicle in interstate and foreign commerce?

A. We are.

Q. Does your company hold authority from the Interstate Commerce Commission for that purpose?

A. Yes, sir.

By Mr. Rosenbaum:

Q. Do you have your docket number, sir?

[fol. 478] A. MC 60393.

Q. Any subs?

A. I think they run to 8, No. 8, I think, is the last one.

By Mr. Nolan:

Q. Describe briefly for the record, Mr. Cecil, the general scope of the operation of your company, what points it serves.

A. We operate from Bloomington, Ill., to the Tri Cities, serving all intermediate points, some 80 points. I have in my briefcase some maps of our operation.

Q. Just generally outline the general—

A. Galesburg, Monmouth, Kewanee, Tri Cities, Peoria, Bloomington, are our major points.

Q. Do you operate outside the State of Illinois?

A. Yes, sir; into Davenport, Iowa.

Q. And any other States or territory?

A. We hold authority in the State of Wisconsin.

Q. Now, how many pieces of equipment does your company operate?

A. 59.

Q. How many people are there on its payroll?

A. 43.

Q. How long has your company been so engaged?

A. Incorporated in 1931. We have been in business since 1928.

Q. Now, state whether or not your company has shipments originating on its line for destination to points in Iowa.

A. We do.

[fol. 479] Q. How long have you been with the company?

A. Since 1928.

Q. And state whether or not you are familiar with the flow of traffic originating on your system for points destined on the Rock Island Motor Transit Company in Iowa.

A. I am.

Q. State whether or not there is a regular flow of that type of traffic.

A. There is.

Q. Do you have any figures, Mr. Cecil, in regard to the volume of that traffic?

A. I have here some figures for the month of December 1950, before Rock Island had any restrictions placed upon them.

Q. Do you have any typical shipment point of origin and destination in those figures?

A. Yes, sir.

Q. Will you produce that for us, please?

A. Yes, sir. These bills are copies of bills that I made that are on file in our office at Peoria and they can be used and kept as evidence if you so wish.

Q. Do you have an outline or an abstract of the number of shipments and the volume involved?

A. Yes; I have.

Q. Would you give us that information?

A. Yes, sir. On shipments of 5,000 pounds and over—[fol. 480] this is for the month of December 1950—shipments of 5,000 pounds and over, we had 8 shipments. The weight of those shipments was 354,610 pounds.

Q. Were those shipments originated on your line and interlined with the Rock Island Motor Transit at Davenport?

A. I believe all of those are. In the general sense, they are from both ways. They are between.

Q. Between the two companies?

A. Yes.

Q. Interlined at Davenport?

A. Yes.

Q. You say that was for the month of December 1950?

A. Right.

Q. That is shipments that exceeded 5,000 pounds in weight?

A. The total weight was 354,610 pounds.

Q. And how about your shipments under 5,000 pounds for the same period?

A. Shipments 2,000 pounds to 5,000, we had 12 and the weight on those was 34,746 pounds.

Q. And that was for the same period of time?

A. Right.

Q. And how about for shipments under 2,000 pounds for the same period interlined between the two companies?

A. We had 146. The weight was 55,003 pounds.

Q. That was for the same period interlined between your [fol. 481] company and the Rock Island Motor Transit Company?

A. That's right.

Q. You don't have the destination points, or point or origin on those?

A. No; I don't, I have the copies of the bills that I can leave as evidence.

Q. Now, state whether or not the shipments that you have reference to during the month of December 1950, interlined between the Rock Island Motor Transit and your company, were typical of shipments subsequent to December 1950 up to the time that there were restrictions placed on the Rock Island Motor Transit Company.

A. That was the general run of freight between the two companies.

Q. How about since the time that the Rock Island Motor Transit has been restricted in its operations, if your company has had shipments in excess of 5,000 pounds which they had to find some other source of delivery?

A. We have.

Q. Now, Mr. Cecil, going back a minute, is your company a member of various trucking organizations? Do they participate in the regularly recognized tariff bureaus?

A. We do.

Q. Rate publishing organizations in this area?

A. Yes.

Q. State whether or not in your opinion there is a need [fol. 482] for the continuation of the same type of service that the Rock Island Motor Transit was giving prior to the time of any restrictions placed upon its operations.

A. I believe there is.

Q. These freight bills which you have produced here, or rather copies of freight bills, for what period of time do they cover?

A. The month of December 1950.

Q. These are just the freight bills for that particular month?

A. Yes.

Q. And do these freight bills show the points of origin and points of destination of these various shipments?

A. Right.

Mr. Nolan: This is off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Nolan:

Q. Just a couple more questions. Mr. Cecil, would you tell us in general the type of merchandise that is shipped and originated on your line for destination to Iowa points? What industries does your company serve which have shipments going into the Iowa territory?

A. We have general commodities, of course. To the smaller off-line points, I think agricultural implements and their parts. We have a manufacturing concern in Kewanee that makes steel window sash, drain traps and commodities of that type which go to lumberyards in all small communities. Tractor parts. Everything from alcoholic liquor on [fol. 483] down.

Q. And the alcoholic liquors generally originate in Peoria, do they not?

A. Right.

Q. Mr. Cecil, do you know of any other transportation agency other than the Rock Island Motor Transit Company that is available to handle shipments interlined to your company at the Tri Cities for destination in the so-called small towns in Iowa served by the Rock Island Motor Transit?

A. I know that during the period of time that they were restricted we had a terrible time with merchandise, getting it to those small towns. I didn't have a complete abstract of each bill, I couldn't tell the reason every one of them was re-routed or maybe returned to the shipper or converted to rail even at the time that they were restricted, so I didn't bring that with me.

Q. Now, has your company had shipments refused at Davenport by other transportation companies other than Rock Island Motor Transit for transfer to destination of shipments to small towns in the State of Iowa?

A. We have.

Q. Has that situation changed any for the better or worse in recent months?

A. On shipments of less than 5,000 pounds, we can get rid of them by Rock Island Motor Transit now and it has cleared up quite a bit.

[fol. 484] Q. Has that been brought about by the Rock Island Motor Transit Company being increased to 5,000 pounds?

A. It has.

Q. Have any other carriers come into the field which are offering the same type of service to these destination points in the small towns other than Rock Island Motor Transit Company that you know of?

A. Not to my knowledge.

Q. You say the exhibits, the freight bills which you have tendered here for the month of December 1950, are typical of the flow of traffic, the type of merchandise, that your company has interlined with the Rock Island Motor Transit for many years and has since December 1950 up to the present time?

A. At the present time, I think our average month's business with Rock Island Motor Transit amounts to around

50,000 pounds a month, which is greatly reduced due to the restrictions that they have.

Q. But I say, so far as the points of origin, the destinations, the type of shipments, these freight bills which you have tendered here for examination are typical of the flow of traffic between your company and the Rock Island Motor Transit on interchange at Davenport, is that correct?

A. It is.

Q. State whether or not you, as a representative of your company and from your experience, if there is a need for [fol. 485] the continuation of the service offered by the Rock Island Motor Transit Company in the Iowa territory as covered by this application as the company operated prior to any restrictions?

A. There is.

Q. Now, Mr. Cecil, I will ask you whether or not the imposition of the existing restrictions on the Rock Island Motor Transit has caused any adverse effect on the operations of your company.

A. Definitely.

Q. What are those adverse effects?

A. Lost a lot of tonnage due to the restrictions of 5,000 pounds which we were handling before, that the shipments were over 5,000 pounds.

Q. Has that been due to the fact that you haven't been able to interline with other carriers giving the same quality of service as the Rock Island Motor Transit?

A. In some cases.

Mr. Nolan: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Mr. Cecil, I don't believe I understand you. You want to tell us that you cannot make an interline connection with a carrier at Davenport for Cedar Rapids other than the Rock Island Motor Transit Company?

A. Cedar Rapids is a key point, sir. We can make interline shipments for there.

Q. There wouldn't be any difficulty about that?

[fol. 486] A. Not on Cedar Rapids itself. It is a point involved in this application, though, I believe.

Q. You wouldn't have any difficulty making interline arrangements with another carrier at Davenport for Mason City, Iowa?

A. To some extent, yes.

Q. There are other carriers operating?

A. Not with the service that Rock Island Motor Transit could give us.

Q. Sir?

A. Not with the service that Rock Island Motor Transit could give us.

Q. That isn't what I asked you. I asked you if you couldn't get an interline carrier that would take that traffic to Mason City at Davenport.

A. Yes, sir.

Q. You wouldn't have any trouble arranging an interline arrangement at Davenport for traffic to be destined to Des Moines, Iowa, would you?

A. No, sir.

Q. How about Muscatine?

A. No, sir.

Q. In other words, you wouldn't have any trouble getting another interline arrangement there. Have you ever had occasion to ascertain whether you could enter into an interline arrangement with carriers in the Tri-City area for shipments destined to Iowa City?

[fol. 487] A. Yes, sir.

Q. Other than Rock Island Motor Transit?

A. Yes, sir.

Q. There are other carriers serving the point, I believe.

A. Right.

Q. So you could make another interline arrangement on Iowa City.

A. It is a key point.

Q. Have you ever undertaken to make any interline arrangements with other carriers for Atlantic, Iowa?

A. Yes, sir.

Q. Were you able to do it?

A. I believe the shipments of over 5,000 pounds, we had trouble on when Rock Island Motor was restricted to that certain point.

Q. What did you finally do with them?

A. I believe they were moved by line to Des Moines and thence another line to destination.

Q. They were moved all right?

A. After a certain amount of delay; yes, sir.

Q. Do you know just what towns are involved in this particular application?

A. I can't name them town for town. I know they lie along——

Q. As a matter of fact, Mr. Cecil, in the bunch of bills which you produced here there are only two shipments moving into these smaller towns, aren't there?

[fol. 488] A. I believe that the bills are all along route 6.

Q. That isn't what I asked you.

Exam. Carpenter: Read the question.

(Question read.)

By Mr. Fowler:

Q. On U. S. highway 6.

A. I can't answer that question, sir.

Q. These figures you have given us, that is the total interline exchange between Rock Island Motor Transit to your line and your line back to Rock Island Motor Transit, isn't it?

A. It is, sir.

Q. You are aware, are you not, that the permanent authority which the Rock Island Motor Transit now has restricts the operation to an auxiliary and supplemental rail service?

A. Yes.

Q. And that means that the shipments must be transported, as I understand it, on rail billing, is that correct, or do you know?

A. I don't know.

Q. Now, couldn't you as a common carrier by motor vehicle enter into some arrangement with the Rock Island Railroad Company under that restricted operation under joint-rate agreement and you get the same service?

A. I couldn't answer that.

Q. I don't know just exactly why you are here. You bring

in a bunch of bills here which show an interchange between Rock Island Motor Transit Company and yourself. Over [fol. 489] half of those bills are on shipments moving Peoria, Ill., and Cedar Rapids, Iowa, in one direction or the other.

Mr. Nolan: That is a misstatement of the record.

Mr. Fowler: That is my opinion.

Mr. Howland: Now, if the examiner please, I want to object to the interrogatory, if it is an interrogatory, as not proper cross-examination and purely argumentative. I have no objection to Mr. Fowler cross-examining this witness. I don't believe he ought to argue with him.

Mr. Fowler: Go back and read my last question.

(Question read.)

By Mr Fowler:

Q. What bearing could that have on this situation?

A. I was under——

Mr. Howland: Just a minute. Same objection.

Exam. Carpenter: I will overrule the objection and let him answer.

Mr. Howland: I will clear that up on my redirect examination.

Mr. Fowler: I didn't interfere with you fellows. I thought I was pretty decent this morning while you were examining these witnesses. I would like to have the same courtesy, if you please.

Exam. Carpenter: Read the question.

(Question read.)

[fol. 490] A. I was under the impression that Cedar Rapids was involved.

By Mr. Fowler.

Q. But Cedar Rapids is not one of these smaller towns that you were talking about on U. S. highway 6, is it?

A. No; it isn't a smaller town, but it is involved in the application.

Q. And Cedar Rapids is one you could readily make an interchange agreement with such other carrier, isn't it?

A. Right.

Q. Did you say "right"?

A. Right.

Q. You don't give any thought or attention to a proposed joint rate or joine-line agreement between your company and the Rock Island Motor Transit Company operating under a restricted certificate in connection with your testimony, do you?

A. I didn't know it was possible.

Q. You are aware, aren't you, that in some parts of the country they have such agreements between common carriers and railroads and railroad-owned subsidiaries?

A. Personally, no.

Q. Mr. Cecil, just what is it that you want to tell the Commission about this application?

A. You want my personal thought on the thing?

Q. As it is applied to the service.

A. Well, sir, I feel that a carrier serving a small community should be entitled to serve the larger community also. Lots of our common carriers are today serving what [fol. 491] I call key points. Lots of them are serving key points and peddle points, too. I personally believe that a party that serves a peddle point should be allowed to serve the key points with no restrictions on either one.

Q. Was that why you are here, for that reason?

A. I am here to see if we can't get unrestricted service to these peddle-point towns which we do have quite a bit of freight for. That means a hardship on us when we have to divert traffic to two or three different lines where we could deliver it all to one carrier.

Q. You still could get it, could you not, even under a restricted operation, if the railroad or Rock Island Motor Transit would enter into the proper arrangement with you?

A. If that is possible, sir.

Q. All you want is, you want the Rock Island to interchange freight with you?

A. Absolutely.

Q. You are satisfied to do it under any kind of arrangement they are willing to make with you

A. As long as it is profitable.

Mr. Fowler: That is all.
Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Mr. Cecil, do you have an opinion from your experi-
[fol. 492] ence in the transportation business as to whether or not it is feasible or practical for a company to serve only the peddle points or small towns and exclude from that operation the so-called overhead operation between the larger points?

A. It is not.

Q. Now, assuming that there were a key-point restriction on a rail operation, on a rail-truck operation on rail billing at the Tri Cities and at Des Moines so that the transit company could not handle freight tendered by your company to it even on rail billing to points west of Des Moines, would that——

Mr. Howland: Or to Des Moines, Iowa.

By Mr. Nolan:

Q. Or to Des Moines, Iowa, direct or proper, would that interfere with the interchange of your traffic with the Rock Island Motor Transit Company?

Mr. Fowler: That is objected to as immaterial, and for the further reason it assumes facts not established in this record.

Exam. Carpenter: Objection overruled.
Would you restate the question?

By Mr. Nolan:

Q. Under the present restrictions, as I understand them, the Rock Island Motor Transit Company, on its permanent authority at the present time, it is required to handle traffic moving solely on rail billing with key-point restrictions at the Tri Cities, Des Moines, and Omaha, traffic in

flowing between the key points or through more than one key point; would such restrictions, even though the Rock Island Motor Transit Company could interline with you on [fol. 493] an arrangement whereby their rail billing would be on the same basis as your truck billing through a participation in a joint-tariff arrangement, would those restrictions, such key-point restrictions, interfere with the interchange of your traffic with the Rock Island Motor Transit Company for Des Moines and points west of Des Moines?

Mr. Fowler: Same objection that I made with respect to the previous question.

Exam. Carpenter: Same ruling.

By Mr. Nolan:

Q. Would such an arrangement as that be satisfactory to your company?

Mr. Fowler: Same objection.

Exam. Carpenter: Same ruling.

A. Well, I am not familiar with that arrangement. I really can't answer it.

Exam. Carpenter: If you can't answer the question, say you can't answer the question.

By Mr. Nolan:

Q. Now, Mr. Cecil, I will ask you whether or not you know of any railroad subsidiaries who are engaged in the trucking business in the Midwest territory who have joint rates with truck lines or who have participated in any truck rates.

A. I do not.

Q. And these freight bills which you refer to as representing shipments from your company during the month of December 1950 interlined with the Rock Island Motor [fol. 494] Transit, although some of them do show shipments going to or from the so-called larger points in the State of Iowa and others showing shipments to or from the smaller points in the State of Iowa served by the Rock

Island Motor Transit, state whether or not it is your opinion that it is necessary to have the business to the larger towns or from the larger towns in order to enable your company to serve the smaller towns in Iowa, either to or from those points.

Mr. Fowler: Objected to as immaterial, calling for pure speculation and conjecture on the part of the witness.

Exam. Carpenter: It calls for the same answer he gave you, Mr. Fowler. Objection overruled.

A. It does.

By Mr. Nolan:

Q. State whether or not the reason you are here is to maintain the same type of service with the Rock Island Motor Transit Company that you had into the Iowa territory and from the Iowa territory prior to the time restrictions were placed on the Rock Island Motor Transit; state whether or not that is or is not the purpose of your being here.

Mr. Fowler: Objected to as leading, assuming a fact not established in the record.

Mr. Nolan: You asked him why he was here and I am just asking him what was that reason.

Exam. Carpenter: Let him answer.

Mr. Fowler: Objected to as leading.

[fol. 495] Exam. Carpenter: Overruled.

A. It is.

By Mr. Nolan:

Q. Is there anything else, whether I have asked you or Mr. Fowler has asked you or anybody else, about this application that you want to make a statement on concerning why you are here or the effect of any curtailment of the Rock Island Motor Transit Company service?

Mr. Fowler: I am going to object to that for the reason that it calls for a statement, voluntary statement, of the witness.

Exam. Carpenter: Objection sustained, Mr. Fowler.

Mr. Nolan: That is all.

(Witness excused.)

Mr. Howland: I would like to recall Mr. Cole.

L. L. Cole resumed his testimony as follows:

Direct examination (resumed).

By Mr. Howland:

Q. Mr. Cole, you were on the stand and temporarily stepped aside to permit the testimony of Mr. Cecil to be taken.

Did you also prepare a graph which embodies the information in composite form disclosed by the reports that you have referred to which are on file with the Iowa State Commerce Commission, showing the average haul in miles of the Rock Island Motor Transit Company, the average miles per ton hauled for the Rock Island Railroad, and the composite figure of average haul in miles for the selected [fol. 496] Midwestern trucking companies that were referred to on exhibit 8?

A. I did.

Mr. Howland: I will ask that this document now be marked for identification purposes as exhibit 9.

(The document referred to was marked as "Applicant's Exhibit No. 9, Witness Cole," for identification.)

By Mr. Howland:

Q. Now, referring to the document marked for identification as exhibit 9, will you tell us what the figure shown by the upper graph line, which is in blue, represents and how that graph was prepared and the figure secured?

A. The blue line represents the average haul in miles at the end of each year indicated by the graph, the composite figure for the representative trucking companies listed.

Q. How did you get it?

A. The information was secured from copies of the ICC reports on file with the Iowa Commerce Commission.

Q. Did the information on file in those reports give the figure of average haul in miles or was it necessary for you to make some other computations?

A. In some instances, they gave the average haul. In others they did not, and it was necessary to use other information contained in the report in order to compute this composite figure.

Q. What other information did you use for that purpose? [fol. 497] A. The ton miles reported by the carriers during the year and the tonnage reported by the carrier.

Q. And that would give you the same information as was directly disclosed in the reports of certain other of the carriers?

A. It would be necessary to go through that procedure to get a composite figure in any event.

Q. What is the lower of the two upper figures?

A. The black line?

Q. Yes; the black line.

A. The black line represents the average miles per ton, Chicago, Rock Island and Pacific Railroad Company, all cars.

Q. Is that the average movement on the Rock Island Railroad of all cars on the ton-mile basis?

A. That is my understanding. This is information contained in their annual reports to the Interstate Commerce Commission.

Q. And that is also on file over here at the State House?

A. I didn't get it from there. I got it from the general office of the railroad company.

Q. Is that report also filed with the Iowa State Commerce Commission?

A. I didn't inquire.

Q. Do you know, as a matter of fact, that that is true?

A. I did not inquire.

Mr. Howland: Is there any question about that?

Mr. Fowler: I don't know anything about that. There [fol. 498] is no question about the figures.

Mr. Howland: Well, the ICC report is filed with the Iowa State Commerce Commission.

By Mr. Howland:

Q. Now, the red line was what?

A. The average haul in miles per year for the Rock Island Motor Transit Company, all freight handled.

Q. Now, the purpose of this exhibit marked for identification as exhibit 9 was what?

A. To give a comparison between the average haul in miles for the representative carriers, Chicago, Rock Island and Pacific Railroad, and the Rock Island Motor Transit Company.

Q. And as shown by the exhibit, the average haul in miles by the representative Midwest trucking companies rose from 335 miles in 1944 to 527 miles in 1950?

A. That is correct.

Q. Whereas, the average haul of the Rock Island Railroad in cars declined from 354.1 miles to 318.35 miles in the same period of time?

A. That is correct.

Q. And the average haul of the Rock Island Motor Transit Company for all freight handled rose only from an average of 165 miles in 1944 to 177 miles in 1950?

A. That is correct.

OFFERS IN EVIDENCE

Mr. Howland: We will offer and introduce in evidence at this time exhibit No. 9.

[fol. 499] Mr. Fowler: May I examine?

Exam. Carpenter: Cross-examine on the exhibit.

By Mr. Fowler:

Q. What does average haul in miles mean?

A. It is the average distance a ton of freight is hauled over the year it is experienced.

Q. Well, again you have used the same carriers——

A. That is correct.

Q. —as you did on exhibit 8?

A. That is correct.

Q. And again you don't know what influences or circumstances may have caused an increase or decrease in their average haul in miles?

A. That is correct.

Q. Does this include intrastate traffic as well as interstate traffic?

A. It does.

Q. Is that also true with respect to exhibit No. 8?

A. That is correct.

Q. Again, why did you select these particular carriers?

A. We thought they were representative carriers in this territory.

Q. Of course, you are aware of many carriers in this territory that have a so-called short-haul peddle operation. Why didn't you include those?

A. I don't get your question.

[fol. 500] Q. You have got some carriers operating out of Des Moines here that are purely intrastate carriers with short hauls. Why didn't you include them?

A. We thought that these were representative carriers.

Q. You didn't arrive at the result first and then pick out the carriers, did you?

A. No.

Mr. Fowler: The exhibit is objected to for the reason that it develops hearsay evidence, it is incompetent, no proper foundation has been laid for its introduction, it is immaterial.

Exam. Carpenter: Objection overruled. The document is received in evidence as exhibit No. 9.

(Applicant's Exhibit No. 9, Witness Cole, was received in evidence.)

Mr. Howland: I will ask that the sheet in graph form headed, "Average Load in Tons 1944-1950," be marked for identification as applicant's exhibit No. 10.

(The document referred to was marked as "Applicant's Exhibit No. 10, Witness Cole," for identification.)

By Mr. Howland:

Q. I will ask you, Mr. Cole, with respect to the graph marked for identification as applicant's exhibit No. 10, how the information there depicted in graph form was

secured and what you did in making up the graph to transfer that information to the exhibit itself.

[fol. 501] A. The basic information was obtained from copies of the ICC report on file with the Iowa Commerce Commission. In order to obtain a composite figure yearly for the representative motor carriers, we divided their ton miles by miles operated—that is, the aggregate figures—to secure this annual figure for the average loaded tons during that year as depicted at the bottom of the graph. The Rock Island Motor Transit Company figures were taken from the annual reports also on file.

Q. And all of the figures then were taken from the reports on file with the Iowa State Commerce Commission, but they are ICC reports, as I understand?

A. That is correct.

Q. Now, you used, of course, the same eight trucking companies that were used in connection with the compilation of exhibits 8 and 9?

A. I did, except there are nine carriers.

Q. Nine carriers instead of eight, and as far as the nine operators are concerned, this is a composite figure?

A. That is correct.

Q. But the lower figure, the lower line, shows the average load in tons of the Rock Island Motor Transit Company for the period in question?

A. That is correct.

Exam. Carpenter: Pardon me a minute. You said the period in question. You mean the period shown?

[fol. 502] Mr. Howland: The period shown on the face of the document.

Exam. Carpenter: Change it.

By Mr. Howland:

Q. Did you so understand my question——

A. Yes.

Q. —that the period is from 1944 until the end of 1950?

A. That is right.

Q. I will ask you to refer to the data that you have from which the composite figure was prepared and give us the

average load in tons of Des Moines Transportation Company for the period from 1944 to 1950.

A. For each year?

A. No; the—well, give it to us each year so we can see the trend of that individual carrier.

Mr. Fowler: Of course, I am going to object to this line of inquiry as being immaterial, and, with the examiner's permission, just let it be understood that that objection stands.

Exam. Carpenter: We will give you a continuing objection, and it will be overruled.

Mr. Howland: That will be argeeably entirely.

A. In 1944 Des Moines Transportation Company had an average load of 9.69 tons. Do you want it for 1950?

By Mr. Howland:

Q. 1945, 1946, 1947, 1948, 1949 and 1950.

A. 1945 was 9.41. 1946, 11.17. 1947, 11.95. 1948, 10.81. 1949, 10.86. 1950, 12.11.

Q. In other words, both at the beginning of the period [fol. 503] and at all points between 1944 and the end of 1950, the average load in tons handled by Des Moines Transportation Company was substantially above the composite figure, was it not?

A. That is correct.

Q. What about Iowa-Nebraska? Give us the figures on Iowa-Nebraska Transportation Company beginning in 1944 and running through to 1950.

A. In 1944, 10.03. 1945, 10.86. 1946, 12.58. 1947, 12.55. 1948, 12.66. 1949 was 11.88, and 1950, 13.35.

Q. Again in that case, Iowa-Nebraska Transportation Company's average load in tons was substantially in excess of the composite figure?

A. That is correct.

Mr. Howland: At this time we offer and introduce in evidence the document in graph form marked for identification as exhibit No. 10.

Exam. Carpenter: Cross-examine, Mr. Fowler.

By Mr. Fowler:

Q. Again you picked out the same carriers you used in connection with exhibits 8 and 9?

A. That is correct.

Q. And again you don't have any knowledge of the influences which may affect the result of the exhibits you have developed?

A. That is correct.

Q. And again these include intrastate shipments, as well as interstate commerce?

[fol. 504] A. That is correct.

Q. Now, to arrive at what you termed average load in tons, what did you do, take their total tonnage and then divide it by what?

A. Are you speaking of average load of tons?

Q. Yes.

A. That is arrived at by dividing the ton miles—you don't have any graphs of ton miles—by the number of miles operated.

Q. Where did you get the figure, the ton-mile figure?

A. That is also included in the reports.

Q. Did you compute that independently or was it in the report?

A. It is in the report.

Q. So you took the ton miles as reported by these carriers to the Interstate Commerce Commission and divided that into the——

A. Divided that by the number of miles.

Q. Divided that by the number of miles operated in order to arrive at what you call average load?

A. That is correct. That formula, by the way, is set out in the annual reports.

Q. I assume, Mr. Cole, that exhibit No. 10, the same as exhibits 8 and 9, reflects the system operations of these typical carriers you have included in the exhibit?

A. That is correct.

Q. It has no relation to any particular territory?

A. No; it does not.

Q. Or even the territory involved here in this application?

[fol. 505] A. That is correct.

Mr. Fowler: The exhibit is objected to as incompetent and immaterial, for the reason it calls for hearsay evidence, no proper foundation has been laid for its introduction, and that it cannot be of any value in the determination of any issue in this proceeding.

Exam. Carpenter: Objection overruled. The document is received in evidence as exhibit No. 10.

(Applicant's Exhibit No. 10, Witness Cole, was received in evidence.)

By Mr. Howland:

Q. Mr. Cole, have you caused to be prepared a balance sheet statement showing assets and liabilities of the Rock Island Motor Transit Company as of January 31, 1952?

A. That is correct.

Q. And is that the last available balance sheet of the Rock Island Motor Transit Company?

A. It is.

Mr. Howland: Now, I will ask at this time that the statement headed, "Rock Island Motor Transit Company Balance Sheet Statement, January 31, 1952," be marked for identification as exhibit No. 11.

(The document referred to was marked as "Applicant's Exhibit No. 11, Witness Cole," for identification.)

By Mr. Howland:

Q. Is the document marked for identification as exhibit [fol. 506] No. 11 the balance sheet statement of the applicant here, Mr. Cole, as of January 31, 1952?

A. That is correct.

Q. Are the accounts which are included therein kept in the manner prescribed by the Interstate Commerce Commission?

A. They are.

Q. And does this document marked for identification as exhibit No. 11 correctly reflect the assets and liabilities of the Rock Island Motor Transit Company as of January 31, 1952, in accordance with established accounting practices and the accounting rules of the Interstate Commerce Commission?

A. They are.

Mr. Howland: At this time we offer the document marked for identification as exhibit No. 11 in evidence and ask that it be received.

Exam. Carpenter: Any cross-examination, Mr. Fowler?

Mr. Fowler: I am going to cross-examine him, but I have no objection to the exhibit.

Exam. Carpenter: The document will be received in evidence as Exhibit No. 11. I presume no one else has any objections to it down that side of the table. All right.

(Applicant's Exhibit No. 11, Witness Cole, was received in evidence.)

Mr. Howland: Do you want to cross-examine on that now?

Mr. Fowler: I might as well.

[fol. 507] Cross-examination.

By Mr. Fowler:

Q. Referring, Mr. Cole, to exhibit 11, on the asset side you have an item 1100, receivables from affiliated companies, 289-thousand plus. Tell me generally what that involves.

A. That represents bills versus the CRI&P Railroad Company for services performed.

Q. Services performed by the Rock Island Motor Transit Company for the Chicago, Rock Island and Pacific Railroad Company?

A. That is correct.

Q. What would those services consist of?

A. That would be for the hauling of inter-city freight and also for some local services.

Q. All right, what do you mean by hauling inter-city freight?

A. Well, from one point to another.

Q. You mean over the road?

A. Over the road.

Q. If the Rock Island Motor Transit Company is handling all railroad-billed freight on its trucks over the highway from one point to another, does it make a charge against the Rock Island Railroad for that?

A. Oh, yes.

Q. On a stipulated unit basis?

A. It is on so much per hundredweight.

Q. And it is based upon so much per hundred pounds of freight?

A. That is correct.

[fol. 508] Q. Not on any mileage basis?

A. That is correct.

Q. What is that?

A. It does not depend upon mileage.

Q. Then as I understand it, if the Rock Island Railroad tenders to the Rock Island Motor Transit freight to be hauled from point A to point B on the trucks of the Rock Island Motor Transit Company, the Rock Island Motor Transit Company then makes a charge against the Chicago, Rock Island and Pacific Railroad at an agreed unit price, based upon 100 pounds of freight irrespective of the mileage it is hauled?

A. That is correct.

Q. Now, what would be the other services that you spoke of?

A. It would be performing pickup-and-delivery service for the railroad in various communities, various cities. That is why I referred to it as local service.

Q. How do you compute that item, on what basis?

A. It is based upon a charge per hundredweight.

Q. And again then, the Rock Island Motor Transit Company performs a pickup-and-delivery service for the Rock Island Railroad at certain points?

A. That is correct.

Q. For which it receives reimbursement from the railroad at a stipulated price per hundred pounds?

A. That is correct.

[fol. 509] Q. Again, irrespective of the miles or the class of traffic?

A. That is correct.

Q. Doesn't the Rock Island Railroad perform any pickup-and-delivery service of its own in this territory?

A. I am not able to answer that question; no.

Q. But the fact is that the Rock Island Motor Transit Company does perform pickup-and-delivery service for the railroad?

A. That's right.

Q. How did you arrive at this unit cost or did you have anything to do with it?

A. That is a contractual arrangement.

Q. But you didn't sit in on the figures when that was arrived at?

A. I did not.

Q. But you say it is just so much a hundred pounds irrespective of the class of freight and irrespective of the distance that the pickup truck was traveling?

A. In the various communities.

Q. In the various communities.

Mr. Howland: Just so counsel is informed, is that on the uniform rate or does that vary from community to community?

The Witness: It varies from community to community.

By Mr. Fowler:

Q. Now, you have an asset item, 1200, carrier operating property. What does Rock Island Motor Transit Company own in the way of real estate?

A. It owns the garage building in Des Moines.

[fol. 510] Q. Anything else?

A. No.

Q. Then all of the terminal facilities it occupies are leased buildings and on leased land?

A. They are leased buildings.

Q. In other words, they don't own any of the property except the garage building in Des Moines?

A. That is correct.

Q. And I think that Rock Island Motor Transit has leases with the Rock Island Railroad, does it not, for the facilities owned by the railroad which it does occupy?

Mr. Fowler: Read the question.

(Question read.)

A. Do you have any particular point in mind?

By Mr. Fowler:

Q. Well, I guess I have every point in mind; all you own is the garage building in Des Moines. Who owns the rest of the stuff you use?

A: We lease it from the railroad. The answer would be "yes."

Q. Do you have written leases?

A. We do have.

Q. On each piece of property?

A. I believe so, I don't keep those in my custody.

Mr. Howland: There will be another witness on that.

By Mr. Fowler:

Q. Looking at the liability side, item 2050, accounts payable, is that your ordinary operating normal accounts pay-
[fol. 511] able or is it something special?

A. There is nothing special in there that I know of.

Q. Your liability item, 2200, advances payable associated companies, $873,000, is that money that you owe the railroad company?

A. That is correct.

Q. In other words, Rock Island Railroad has advanced to Rock Island Motor Transit funds from time to time and the balance unpaid as at January 31, 1952, was $873,000?

A. That is correct.

Q. You have a liability item, 2360B, other than long-term obligations, a quarter of a million dollars; what is that?

A. That is a loan which was obtained from the First National Bank in Chicago.

Q. For equipment?

A. I wasn't informed as to what it was to be used for.

Q. Don't you make this statement up?

A: Yes, but when they borrowed the money they didn't tell me what they were going to borrow it for.

Q. They just told you they owed the bank $250,000?

A. They got the money. It was recorded on the books.

Q. Did you ever see the $250,000?

A. No. That is in the treasurer's office.

Q. You don't have that?

A. No, sir.

Q. Where is the treasurer of the Rock Island Motor Transit Company?

[fol. 512] A. In Chicago, Ill.

Q. Does he have his office in the office of the Rock Island Railroad?

A. That is correct.

Q. He doesn't happen to be the treasurer of the Rock Island Railroad, too, does he?

A. He does.

Q. So all you know about the item 2360B appearing on exhibit 11 under the liability side you were told to record on the books a loan of $250,000?

A. We obtained the loan.

Q. You were told to record it on the books, weren't you?

A. That is right.

Q. And the $250,000 was turned over to the treasurer in Chicago?

A. That is correct.

Q. You assume he put it in the bank to the credit of the Rock Island Motor Transit Company?

A. That is right.

Mr. Fowler: Are we going to have an income statement here?

Mr. Howland: I haven't assumed that we would use that. We can get it. We will have an income statement for 1950 and 1951, but not for any later period.

By Mr. Fowler:

Q. Mr. Cole, the fact is that your operations during the last, we will say, 6-month period are developing a loss, [fol. 513] aren't they?

A. That is correct.

Mr. Fowler: That is all.

Mr. Howland: Are you through with the cross-examination?

Exam. Carpenter: Any further cross-examination? Redirect.

Redirect-examination.

By Mr. Howland:

Q. Mr. Cole, the accounts of the Rock Island Motor Transit Company are kept by you—that is, the books and the accounts are kept by you—in accordance with established accounting practices?

A. That is correct.

Q. You are neither the president, the vice president, nor the treasurer of the Rock Island Railroad—I mean the Rock Island Motor Transit Company; those are the three offices Mr. Farrington referred to where the officers were common to the Rock Island Railroad and the Rock Island Motor Transit Company, is that not right?

A. I wasn't present when he made that statement.

Q. Is it not true that the president of the Rock Island Motor Transit Company and the treasurer of the Rock Island Motor Transit Company are the same as the president and treasurer of the Rock Island Railroad?

A. That is correct.

Mr. Howland: All right.

Mr. Fowler: There is one other question I would like to ask.

Exam. Carpenter: Just a minute. Are you through?

[fol. 514] Mr. Howland: I am through.

Exam. Carpenter: All right, go ahead.

By Mr. Fowler:

Q. Are the general books of the Rock Island Motor Transit Company kept in the treasurer's office in Chicago?

A. No; they are not.

Q. Your general ledgers are kept here at Des Moines?

A. The general ledgers are kept in the general auditor's office in Chicago. We prepare the entries and submit them to them.

Q. That is it then. In other words, the general books of the Rock Island Motor Transit Company are kept in the office of the Rock Island Railroad in Chicago, Ill.?

A. That is correct.

Q. And all that you have to do with it is to record transactions that they tell you to record out here in your sub-ledger?

A. They never tell us what to record.

Q. How did you know they borrowed $250,000? Who told you to put that on the books?

A. Sir?

Q. Who told you to put that on the books?

A. Well, I don't recall who. That is recorded in the general ledger——

Q. I understand.

A. —and we obtained the money and when you deposit the money you have to make entries.

Q. Do you undertake to keep a set of general books [fol. 515] out here, too, that are duplicative of the Chicago books?

A. On most of the accounts we do, but not on all of them.

Q. What would be the normal procedure when the treasurer of the Rock Island Railroad Company would go over to the bank and borrow $250,000 for the Rock Island Motor Transit Company and he wanted to tell you he had done it, what would he do, send you a memorandum or how would he let you know he had borrowed the money?

A. That would be recorded in an entry on the cash book.

Q. Yes, but you record it in the cash book, don't you?

A. No.

Q. How do you find out it has been recorded on the cash book? Who tells you that?

A. The cash book is kept in Chicago and the general ledger is kept in Chicago. They actually recorded this entry.

Q. Then you didn't record it out here on your books?

A. That's right.

Q. That is right, you didn't?

A. I did not.

Q. And of course you didn't prepare this statement?

A. I asked for it to be prepared.

Q. You did not prepare it and the information you have here in Des Moines is not sufficient to prepare this statement, is it? In other words, the records that are necessary to prepare the type of a statement such as exhibit 11 would have to be taken from the general books in Chicago?

[fol. 516] A. We have the other statements that would enable us to prepare such a statement. However, if they were to be taken from the general ledgers, they would have to be made in Chicago.

Q. In other words, the general ledgers are kept in Chicago?

A. That is right.

Mr. Fowler: All right.

By Mr. Howland:

Q. Now, do you have a study of certain figures that were made up by you some year or two ago in tabular form? Mr. Cole, did you early in the year 1951 have occasion to make a study of the operations of the Rock Island Motor Transit Company and certain other trucking companies doing business in the City of Des Moines, Iowa?

A. I assembled such a study. However, I only prepared the figures for the Rock Island Motor Transit Company.

Q. Well, you were furnished figures by certain other motor truck companies doing business in the City of Des Moines and that was included in a sheet showing the results of the tabulation of the business and the costs of the various concerns that participated in the study?

A. That is correct.

Q. What was the occasion for making up that terminal cost survey?

A. It was occasioned by a desire on the part of the trucking companies of Des Moines in obtaining information concerning their costs compared one company to another.

Q. And what were the items that were reported to you by [fol. 517] the various companies and what report was made as to the details for which information was furnished?

The Witness: Would you read the question, please?

(Question read.)

A. The information was obtained from each carrier as to the hours of service on their platform, the amount of wages covering those hours, the number of hours pickup-and-delivery service in less-than-truckload quantities, and the applicable wages, the hours pickup-and-delivery service on truckload quantities, the wages applying to those hours, the number of pounds of platform handling on inbound freight, the number of pounds platform handling on outbound freight, the number of pounds pickup-and-delivery service less than truckload; the number of pounds of pickup-and-delivery service, truckload. That was the basic information that was furnished.

Q. And who were the carriers that participated in that study or survey?

A. Rock Island Motor Transit Company, Des Moines Transportation Company, Watson Bros., Bruce Motor Freight, Burlington Transportation Company, and the Bruce Transfer Company.

Q. And those are all motor carriers operating in the City of Des Moines, Iowa?

A. With the exception of the Bruce Transfer. I am not certain as to their— They participated in the study, but I am not certain about their certificate.

[fol. 518] Q. That is not the Bruce Transportation Company?

A. No; it is Bruce Transfer.

Mr. Howland: All right. I will ask that the exhibit embodying the information referred to and headed, "Terminal Cost Survey, Des Moines Motor Carriers," be marked for identification as applicant's exhibit 12.

(The document referred to was marked as "Applicant's Exhibit No. 12, Witness Cole," for identification.)

By Mr. Howland:

Q. Now, I notice here that——

Mr. Fowler: Wait a minute, Mr. Howland. I think before you read anything from the exhibit into the record, I would like to have an opportunity to examine the witness a minute and make an objection.

Exam. Carpenter: All right, go ahead.

By Mr. Fowler:

Q. Mr. Cole, as I understand it, the figures in the first column on this exhibit 12, with the heading, "Rock Island Motor," was prepared by you——

A. That is correct.

Q. —personally?

A. That is correct.

Q. The figures for the other carriers listed on that exhibit were given to you by them?

A. That is correct.

Q. And when was this?

[fol. 519] A. That was some recent day following February 3. I don't know the exact date. February 3, 1951.

Q. Do you have those reports that were given to you by these carriers here?

A. I don't have them with me.

Q. Do you have them in the office?

A. I believe I still have them.

Q. They are still in existence then, so far as you know?

A. I would have to check to say that.

Q. The Burlington Transportation Company, is that a subsidiary of the Burlington railroad?

A. I understand that it is.

Q. It isn't involved in this territory we are talking about here in this proceeding, is it?

A. I don't know where their operations are.

Q. And the Bruce Transfer and Storage is not a common carrier at all, is it?

A. As I stated a minute ago, I wasn't certain about their category in this.

Mr. Fowler: Mr. Examiner, I think before counsel starts reading in the record information that appears on the exhibit he ought to offer the exhibit in evidence and let me object to it.

Mr. Howland: I am perfectly willing to do that. I thought I had to qualify it a little more.

Mr. Fowler: We know what it is. It is objected to on the [fol. 520] ground it is immaterial, incompetent, no proper foundation has been laid for its introduction, it is hearsay and secondary.

Exam. Carpenter: Objection overruled. The document is received in evidence as exhibit No. 12.

(Applicant's Exhibit No. 12, Witness Cole, was received in evidence.)

By Mr. Howland:

Q. Mr. Cole, the concern known as Bruce Motor Freight is a motor carrier doing business in the City of Des Moines, is it not?

A. Yes.

Q. And all of the concerns shown here on the document identified as exhibit 12 are motor carriers with the possible exception of the one referred to as Bruce Transfer, the status of which you were uncertain about?

A. That is right.

Q. Now, you show here on this statement under the first heading, "Platform employees," and then there appears certain figures as to each of these carriers, including Bruce Transfer, opposite the designation or tabulation "Hours." What is shown by this "Platform employees," "Hours," that you show on exhibit 12? What is included there?

A. That is the number of hours reported for the amount of labor—not the amount of labor, but the number of hours spent by platform employees during the week January 29-February 3, inclusive.

[fol. 521] Q. Is that man hours of platform labor——

A. That is man hours.

Q. —at the freight house of the Rock Island Motor Transit Company in Des Moines during the period January 29 to February 3, 1951?

A. In the first column, that is right.

Q. Yes. The second column is the same figure as reported by Des Moines Transportation Company?

A. That is right.

Q. The third figure is that reported by Watson Bros. Transportation Co.?

A. That is right.

Q. The next one is Bruce Motor Freight and the next one is Burlington Transportation Company.

A. That is right.

Q. In other words, the total number of man hours of the employees at the dock or engaged in handling, loading and unloading of motor truck units?

A. That is correct.

Q. And below that in dollars is shown the reported cost by each of the carriers for those man hours?

A. That is correct.

Q. Now, what is included under your pickup and delivery? First, I notice you have less-than-truckload and you have hours. Then you have truckload and wages under each one of those items.

[fol. 522] A. For the purposes of this study, we made a breakdown of the man hours spent in pickup-and-delivery service, breaking that down between the number of man hours spent in less-than-truckload and the number of man hours in truckload pickup-and-delivery service.

Q. And was that reported to you by each of the carriers and by Bruce Transfer and by Rock Island Motor Transit?

A. That's right.

Q. In other words, as I understand it, the Rock Island Motor Transit Company during the period covered by the survey had 1,185 and a half man hours of labor employed in less-than-truckload pickup-and-delivery service?

A. That is correct.

Q. And for that 1,185 and a half hours they paid in wages $1,660.91?

A. That is correct.

Q. And the corresponding figures with respect to the other *con* concerns are the corresponding items?

A. That is correct.

Q. Now, what would be pickup-and-delivery service on truckloads? How come you would have pickup-and-delivery service on truckloads?

A. It was occasioned by the fact that truckload freight comes into the dock, the road driver is relieved of his duties, and the pickup-and-delivery man takes that unit and makes the delivery.

[fol. 523] Q. Do I understand then if a truckload of freight consigned to a concern in Des Moines, Iowa, arrives at the dock in Des Moines, that the over-the-road driver gets off the truck and you put a local driver on who handles the load to the consignee's place of business?

A. That is right.

Q. And there helps in the unloading, if necessary, or unloads it?

A. That is correct.

Q. And it is that type and character of service that the hours and wages were reported on the document marked as exhibit 12?

A. That is correct.

Q. Now this matter of platform handling that appears next in the exhibit, what is disclosed under that category in each of the columns?

A. You mean the platform pounds per man hour?

A. Well, what is it? You see, you show platform handling inbound weight (pounds) and outbound weight (pounds) and then you have total inbound and outbound which seems to be the sum of the two figures thus handled. Now, what appears under that?

A. That figure, that is broken down between inbound and outbound because of the nature of the forms which we use in making this accumulation.

Q. Does that show the total number of pounds of freight handled on the particular days involved, inbound freight for each of the concerns listed and the outbound freight?

[fol. 524] A. That is correct.

Q. And the composite figure is the two, is that right?

A. Total handled across the platform in that week; the total of those two.

Q. Now, you have next some weight figures under "Pickup and Delivery." What is indicated there?

A. That represents the number of pounds freight given pickup-and-delivery service in the two categories, less-than-truckload and truckload.

Q. For the period shown by the exhibit?

A. For the period shown.

Q. In other words, during that period, which I take would be approximately 6 days' time, the Rock Island Motor Transit Company performed pickup-and-delivery service on truckloads of 221,669 pounds of freight, am I correct in that?

A. That is correct.

Q. While on less-than-truckload freight, they performed pickup-and-delivery service on 1,769,751 pounds.

A. That is correct.

Q. And with Des Moines Transportation the figure was 1,758,134 pounds of truckload freight and 1,922,870 pounds of less-than-truckload freight?

A. That is correct.

Q. Now, what is referred to under the heading of "platform—pounds per man hour," and "Platform—cost per hundredweight"?

[fol. 525] A. Those are the figures that were obtained from the basic data included in the earlier part of the

report. In other words, the number of pounds given platform handling and the number of hours put in by platform employees produced pounds per man hour for the Rock Island Motor Transit Company of 1,120 pounds per man hour.

Q. In other words, for each man hour of labor performed at the— Each man hour of labor performed resulted in the handling of 1,120 pounds on the dock at a cost per hundredweight of 13 cents in the case of the Rock Island Motor Transit Company and at the other rates shown on the exhibit in the case of the other carriers?

A. That is correct.

Q. Now, what about your pickup-and-delivery figures shown below?

A. Those again are figures which were obtained from computations made from the basic data secured.

Q. What is the significance of them? Can you explain a little more in detail what the meaning of the figures shown would be?

A. The first figure under that category, 1,493 represents the number of pounds in the less-than-truckload category that would be picked up and delivered by the Rock Island Motor Transit Company in Des Moines for this period. The next figure is the cost of the picking up and delivery of that same category. The next figure is the number of stops made in performing that service.

[fol. 526] Q. You mean that is the total number of stops made by the pickup-and-delivery truck?

A. That is correct.

Q. In other words, to pick up this total freight it took 2,218 stops by the trucks of the Rock Island Motor Transit Company?

A. That is correct.

Q. The rest of the figures are on the same basis?

A. They are statistics that were furnished us in our earlier work.

Q. Now, I call particular attention to the figures here with respect to the truckloads in pickup-and-delivery service, that the Rock Island Motor Transit Company had 34½ man hours of pickup-and-delivery service for truckload quantities while Des Moines Transportation had 183

man hours of similar service in the 6-day period covered by the survey. What does that indicate?

Mr. Fowler: That is objected to as calling for an incompetent conclusion of the witness if he is attempting to testify as to Des Moines Transportation Company.

Mr. Howland: I will withdraw the question and I will ask it this way:

By Mr. Howland:

Q. What is the significance or the comparison between the figures under "Truckload, hours," for pick up and delivery of 34 and a half in the case of the Rock Island Motor Transit Company, 183 in the case of Des Moines Transportation, 90 in the case of Watson Bros., and 48 in [fol. 527] the case of Bruce Motor Freight, and 26½ in Burlington Transportation Company?

Mr. Fowler: Are you asking him to testify what the exhibit shows and is intended to show? You are not asking him to testify about the Des Moines Transit——

Mr. Howland: I am asking what the significance——

Mr. Fowler: Go ahead.

Mr. Howland: —of the difference in those figures indicates as to the quantity of pickup-and-delivery service performed in man hours by the Rock Island Motor Transit and the other carriers, indicates to him.

A. It clearly indicates that the Rock Island Motor Transit Company had a lesser amount of work in that category than the other carriers, consequently having a less volume.

By Mr. Howland:

Q. In other words, they were not handling the same quantity of truckload business?

Mr. Fowler: That week.

By Mr. Howland:

Q. In that particular week.

Mr. Fowler: That is right.

By Mr. Howland:

Q. Now, what is the significance of the figures on platform handling combined inbound and outbound weight handled over the platform for these carriers? Can you explain that?

A. The Rock Island Motor Transit Company handled a comparable amount of platform tonnage as two of the carriers involved and yet — Pardon me, I will have to ask that question be read.

[fol. 528] Mr. Howland: All right, read the question.

(Question read.)

A. The only comparison, the only significance I see in this, is that Rock Island Motor Transit Company handled 2,747,539 pounds across their platform and in pickup-and-delivery service we had a total weight of——

Mr. Howland: Withdraw the last question. I will ask it in this way:

By Mr. Howland:

Q. Do the figures under the column and opposite the column, "Platform handling, inbound and outbound," indicate the quantity of freight in pounds handled by each of these carriers for that period?

A. It represents the amount handled across their platform, but it doesn't necessarily indicate the volume of business in the City of Des Moines proper.

Q. Why not, because of the fact that it does not include truckloads?

A. No; because of the freight inbound that has to be transferred to other units.

Q. Well, inbound has to be transferred to what units?

A. Inbound freight, much of it on the part of the Motor Transit at least, is transferred to peddle trucks.

Q. Rather than merely picked up and delivered?

A. That is right.

Q. All right. Now, do you have an exhibit showing the

[fol. 529] results of the operation of the Rock Island Motor Transit Company by months in the years 1950 and 1951?

Mr. Fowler: I suggest we adjourn. We can't get through with this.

Exam. Carpenter: How much have you got?

Mr. Howland: I expect in the neighborhood of 20 minutes to a half hour.

Exam. Carpenter: Let's cut it off. We will adjourn until 9:30 tomorrow morning at the same place.

(At 5:05 p. m., March 19, 1952, an adjournment was taken until 9:30 a. m. on Thursday, March 20, 1952.)

[fol. 530] TRANSCRIPT OF PROCEEDINGS OF MARCH 20, 1952

Exam. Carpenter: We will proceed whenever you are ready, Mr. Howland.

Mr. Howland: We are ready.

Mr. Nolan: Mr. Hess.

Mr. Howland: If the examiner please, at the time of the adjournment we were examining Mr. Cole on direct examination and had come to sort of a breaking point. We have several witnesses here this morning who are quite anxious to get back to their businesses and if there is no objection from counsel, I would like to call them at this time.

Exam. Carpenter: Any objection? All right, proceed.

VICTOR HESS was sworn and testified as follows:

Direct examination:

By Mr. Nolan:

Q. Give your name, place of residence, and occupation, Mr. Hess.

A. Victor Hess, manager of the Ladora Lumber and Fuel Company, Ladora, Iowa.

Q. Is that a line yard?

A. Yes, sir; United Lumber Company, Clinton.

Q. How long have you been connected with the company at Ladora, Iowa?

A. At Ladora?

Q. Yes.

[fol. 531] A. 7½ years.

Q. Does your company handle all building products, materials, and so forth?

A. Yes.

Q. Including paints?

A. Yes.

Q. Farm supplies, wire?

A. Yes.

Q. Things of that character. You will have to answer so the reporter can get your answer.

Mr. Howland: The answer was "yes."

The Witness: Yes.

By Mr. Nolan:

Q. Now, Mr. Hess, just tell us your source of supplies of less-than-carload shipments, what points do you get supplies from, and what are the supplies?

A. Kansas City, paint. Peoria, shingles.

Q. Where?

A. Peoria, Ill. Joliet, shingles. Kewanee, steel products. Chicago, paints. Minneapolis, insulation board and insulation products. Omaha, corn-cribbing, slat cribbing. Chicago, fencing. Rock Island, millwork. Sterling, Ill., builder's hardware.

Q. Now, with what regularity do you have shipments from these out-of-state points coming into your place of business at Ladora?

A. I will average 4 days a week getting something in.

[fol. 532] Q. Ladora is located on U. S. highway 6, is it not?

A. Yes, sir.

Q. And about 40 miles west of Iowa City?

A. Right.

Q. What is the population of Ladora?

A. 316.

Q. Is your lumber company the only lumber company located at Ladora?

A. Yes.

Q. And what is the fact as to whether or not you handle practically all the building materials and supplies and things of that character at Ladora?

A. Yes.

Q. Now, what service have you been using, or what transportation service have you been using to get these out-of-State shipments into your place of business?

A. I specify Rock Island Motor truck on my orders when I make them out.

Q. Why do you do that?

A. Well, they give a regular service. They are in there between 11:30 and 1:30 every day while I am open for business and while my help is there to unload, and very seldom —once in a while they will have something that they have in the front of the truck and they will have to catch me on the way back, but they still get in there before 3 o'clock. [fol. 533] Of course, it is loaded with my stuff in the back because it comes out first.

Q. You say you get it between 11:30 and 1:30; you mean that is delivered during the daytime?

A. Yes, sir.

Q. During business hours, and if they have to come back they come back by 3 o'clock in the afternoon, is that right?

A. Yes.

Q. Have you had any experience with other transportation companies bringing merchandise to your place of business from out-of-State points?

A. Yes.

Q. And just tell us what experience you have had in that respect.

A. I had reinforcing rods coming in one time, about 2 ton of them, and they came in during the night, and when I came down the next morning they had unloaded them in front of my big overhead door in the driveway, and we——

Q. When was that?

A. That was last year, during last summer.

Q. And what company brought that shipment in?

A. Iowa-Nebraska.

Q. Where did that shipment originate?

A. Seco Steel.

Q. Where?

A. Seco Steel.

Q. I know, but where was Seco Steel plant located?

[fol. 534] A. Oh. In Illinois, Sterling, Ill.

Q. Sterling, Ill.?

A. Yes.

Q. Have you had any other experience with any other transportation company bringing you in merchandise?

A. Watson Bros. brought in paint.

Q. How many shipments and when?

A. They have brought me in two shipments of paint from Kansas City. One was just a year ago this time. They came in there about 10:30 at night and called me down to unload it.

Q. And you say they brought in another shipment at another time then?

A. And then they brought in my second spring order and they couldn't get hold of me that time. I guess I was out of town.

Q. Was that during the nighttime?

A. Yes. There is a parking lot across the street, across highway 6, and they unloaded it in a pile over in the parking lot south of highway 6.

Q. Was that in unprotected territory?

A. Oh, yes. Anybody could have picked up a box of enamel worth over $30.

Q. But they didn't happen to do that?

A. No. Pretty good people.

Q. Around Ladora. Now, what are the size of your shipments ordinarily, Mr. Hess, that you refer to?

[fol. 535] A. Well, I am a rural yard, small town, and we buy most of our merchandise l. c. l., small shipments. So many things customers want in a small yard like that, you can't carry a big inventory so we do more l. c. l. business than we do carload business.

Q. Do you ever have occasion to have shipments in excess of 5,000 pounds brought in?

A. Very seldom.

Q. Well, do you ever have?

A. Yes.

Q. Now, what has been the service of the Rock Island Motor Transit Company in the past; has it been satisfactory or otherwise?

A. They have always been very satisfactory so far as we are concerned.

Q. State whether or not, so far as your company's needs are concerned at Ladora, if you need the continuation of the service of the Rock Island Motor Transit.

A. Yes; it is very important in our business that we have that service.

Q. Now, highway No. 6 runs right through the main street of Ladora, does it not?

A. Yes.

Q. I assume you see a great number of trucks every day of other trucking companies moving through Ladora, both day and night, is that right?

[fol. 536] A. Yes, sir.

Q. Do you know of any one of those trucking companies that makes a regular daytime stop or even a regular nighttime stop at Ladora, daily stop?

A. No.

Mr. Nolan: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Does the Rock Island Railroad have a station agent at Ladora?

A. Yes.

Q. Does the Rock Island agent handle matters for you in connection with your dealings with Rock Island Motor Transit?

A. Yes.

Mr. Fowler: That is all.

Exam. Carpenter: Any further cross-examination? Redirect.

Redirect examination.

By Mr. Nolan:

Q. Now, Mr. Hess, if a shipment comes in on the Rock Island Motor Transit on Rock Island motor freight billing state whether or not that goes to the depot or comes directly to your place of business.

A. If it is Rock Island billing, Rock Island Motor truck, I pay the truck driver. If they pick up a rail shipment for me, then I just sign a waybill and the Rock Island agent collects the freight bill.

Q. Do you have shipments coming in both on Rock Island [fol. 537] motor freight billing and on Rock Island Railroad billing?

A. Most of my Rock Island Railroad business is all carload business, coal mostly, and a car of lumber.

Q. Do you have some less-than-carload shipments that come in on rail billing but handled by Rock Island Motor Transit company truck?

A. The last 2 years I have quit ordering stuff that way. I order Rock Island Motor Transit because I can get something from Chicago in 24 or 48 hours where I have had to wait 2 months for stuff from Waterloo by having it shipped rail. I have had a shipment go out of Waterloo and go clear to California and back before it gets to Ladora.

Q. You mean by the Rock Island Railroad?

A. Yes.

Q. Now, have you ever had a shipment where you specified Rock Island Motor Transit to come by rail?

A. No.

Q. They recognize and honor your specification of routing, is that right?

A. Yes.

Mr. Nolan: That is all.

Exam. Carpenter: Re-cross.

Re-cross-examination.

By Mr. Fowler:

Q. As I understand it, no matter whether it is Rock Island Railroad billing or motor truck billing, it all comes [fol. 538] to you by truck?

A. Yes.

Q. And they——

A. No, excuse me. If you have Rock Island rail shipments, they will bring it in in a freight car sometimes and set it on a sidetrack and then you go down with your truck and unload that out of the boxcar.

Q. Isn't it also true that the Rock Island Motor Transit Company truck delivers merchandise to your place of business that is on rail billing?

A. Yes; if you order rail billing, they will bring it.

Q. In other words, you can specify Rock Island Motor Transit or you can specify Rock Island Railroad and it will come in the same truck?

A. Yes.

Q. When you want a pickup and you have got something you want picked up to go outbound, you notify the Rock Island agent to have the truck stop at your place of business. I am talking about your outbound shipments.

Exam. Carpenter: When you said "Rock Island agent," you mean the rail agent, not the truck agent?

Mr. Fowler: Yes.

A. No. I never ship anything out. We used to ship cement sacks and barrels back, but there is no return on those any more.

[fol. 539] By Mr. Fowler:

Q. If you did have an outbound shipment, you would call the Rock Island agent there and tell him to have the truck stop and pick it up, wouldn't you?

A. I never did when I used to have outbound shipments. I would tell the driver. He stops there every day.

Q. You mean if he stopped to deliver you something.

Mr. Fowler: All right; that is all.

Exam. Carpenter: You are excused.

(Witness excused.)

DON SCHEETZ was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Give us your name, where you live, and what you do.
A. I live at Oxford, Iowa, and I am a rural Watkins dealer.

By Mr. Fowler:

Q. What?
A. A rural Watkins dealer.
Q. Watkins medicine company?
A. Watkins dealer, Watkins products.

By Mr. Nolan:

Q. How long have you been engaged in that business, Mr. Scheetz?
A. 12 years.
Q. What territory do you have?
A. I work everything south of highway 6 south to the Washington county line and from the Iowa river west to [fol. 540] the Iowa County line.
Q. The Iowa River in Johnson County to the Iowa County line west, the Poweshick County line, is that right, on the west or just in Johnson County?
A. Just in Johnson County.
Q. Now, for the purpose of the record will you tell us generally the nature of your business, what you do and what products you handle?
A. Well, we have about 360 different articles which we sell.
Q. Those are sold retail?
A. Retail, direct to the farmer.
Q. To the farmers?

A. And I load these products up as I go out in the morning.

Q. Describe briefly what those products are.

A. Well, we have a farm line which consists of mineral compounds, vitamin supplements, anti-biotics.

Q. That is for animals, hogs, cattle?

A. Insecticides such as fly spray, dips, mange oils, and garden dust. We had a medicine line—everything from linaments to corn salve, and then our household line consists of extracts and spices, cleaning compounds, wax, and things like that.

Q. And that is sold retail to the farmer or the farmer's wife, is that right, in that territory?

A. Whichever one happens to be there.

Q. Now, you are the Watkins dealer. Where is the Wat-
[fol. 541] kins Company located?

A. At Winona, Minn.

Q. What is the name of the Watkins Company?

A. The J. R. Watkins Company.

Q. That is one of the old-line home-remedy companies, isn't it?

A. About 84 years, I guess.

Q. You get your merchandise from Watkins from Winona, Minn., and then you sell retail to the farmer?

A. That is right.

Q. How do your shipments come in to you? Where do you get them at, your home, or do you have a store?

A. I have a warehouse and part of them go to the warehouse and part of them go to my home.

Q. Where is your warehouse located?

A. My warehouse is located in the south end of town.

Q. At Oxford, Iowa?

A. At Oxford, Iowa.

Q. And with what regularity or frequency do you get shipments from Winona, Minn., to Oxford, Iowa?

A. Well, I get about oh, 7 to 10 loads a year.

Q. Does those come in in truck——

A. It varies in the time of the year. In January I had 2 loads. There will be another load the latter part of this month.

Q. Are those truckloads or carload?

A. Truckloads.

[fol. 542] Q. Do you have any less-than-truckload shipments come in?

A. Very, very little. Not any more than I can help.

Q. But do you occasionally have to replenish your stock?

A. Once in a while.

Q. What transportation service have you been receiving on those shipments from Winona, Minn.?

A. Well, for the last 8, 9, or 10 months, it is just hard to tell who is going to bring them in. I never know.

Q. What service did you have before that?

A. Rock Island Motor always.

Q. How was the Rock Island Motor Transit service?

A. Very, very good.

Q. Now, you said the last few months it has been hard to tell how you get it, is that right?

A. That is right.

Q. What experience have you had with regard to any particular company other than Rock Island Motor Transit Company bringing in your shipments?

A. I always order my orders shipped by Rock Island Motor, but other companies have brought the loads in and it is usually several days later than what my Rock Island Motor shipment would come in.

Q. You understand that the Rock Island Motor Transit Company at present is limited in the size shipments it can handle?

A. That is right.

[fol. 543] Q. What company particularly have you had any experience with where there has been any delay or anything of that nature?

A. I have had Des Moines Transportation, Cordle, and a company from Cedar Rapids has brought loads in there which I have got pretty good service from.

Q. What company is that?

A. Gateway.

Q. Have you had any experience where it has been held over or delayed by Gateway?

A. This last load I had, Gateway called me and said they had in Cedar Rapids for me and wanted to know what to do with it. I says, "I don't care what you do with it; I

want the merchandise. I am waiting for it. The customers are waiting for it." They said, "We can't hardly bring it down." I said, "Call Rock Island Motor." They said, "We have, but they have refused it." They said, "What will we do with it?" I said, "Get the merchandise down here to me. That is your job, not mine."

Q. Do you know whether Gateway has any authority to run into Oxford?

A. I don't know.

Q. You have never seen their trucks there on the streets at any time, have you?

A. No; you never see them before.

Q. Now, Oxford is located off U. S. highway 6, is it not?

A. That is right.

[fol. 544] Q. About a mile and a half south?

A. Just a mile.

Q. Just a mile. What size are these loads that you have shipped in from Winona, Minn.?

A. From 20,000 on up.

Q. And state whether or not, so far as your business concerned, if there is a need for service by the Rock Island Motor Transit to handle truckload shipments into your place of business from out-of-State points and particularly Winona, Minn.?.

A. Yes; it is very necessary, I would say.

Q. Do you know of any other company that would provide you the regularity and quality of the service that you did receive from the Rock Island Motor Transit Company?

A. I wouldn't know where they would be located.

Q. By the way, how did you get that shipment down from Cedar Rapids.

A. Gateway boys brought it down and I was sure glad to have them do it because I had customers in the country waiting for the merchandise and that merchandise, they had to have it.

Q. You don't know whether they had authority to do it or not, but they finally did, is that right?

A. He told me, "Gosh, we didn't know what to do. We had to get it out of there, and we knew you needed it."

Mr. Nolan: I think that is all.

Exam. Carpenter: Cross-examine.

[fol. 545] Cross examination.

By Mr. Fowler:

Q. Does the Rock Island Railroad serve Winona, Minn.?
A. I don't believe so.
Q. Your shipment requires an interchange between carriers, doesn't it, from Winona?
A. You mean if a load would leave Winona, Minn., it would have to be reloaded on another truck before it is brought to my place?
Q. Not necessarily reloaded, but it would have to be handled by two or more carriers, wouldn't it?
A. Yes.
Q. So no matter what you did, you would have to have some other carrier originate it at Winona and turn it over to the Rock Island Railroad?
A. That is right.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. Mr. Scheetz, originally, do you know whether or not Gateway originated the shipment and then turned it over to Rock Island Motor Transit to deliver to you? Do you have any recollection of that?
A. Gateway picks the load up at Winona, Minn., and brings it to Cedar Rapids, but what I want is something to get it from Cedar Rapids to Oxford.
[fol. 546] Q. They would turn it over to Rock Island before this limitation of service, is that right?
A. That is right.
Q. And I believe the Rock Island Motor Transit is the only company that has authority in Oxford and Gateway has authority to Winona.
A. Gateway has a big office there in Winona.

Mr. Nolan: That is all.

Exam. Carpenter: Anything further, Mr. Fowler? You are excused.

(Witness excused.)

VICTOR F. NIEBUHR was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation, please?

A. Victor F. Niebuhr of Oxford.

Q. Where do you live, Mr. Niebuhr?

A. In Oxford.

Q. What is your occupation?

A. Hardware and implement business, Oxford Hardware and Implement Company.

Q. How long have you been so engaged?

A. 11 years.

Q. And you handle a general line of hardware, do you not?

[fol. 547] A. Yes.

Q. Are you the successor of the Scanlon Hardware?

A. There was one man between. Van Buren was in there for a short time.

Q. I believe you have the only hardware line in Oxford, do you not?

A. Yes; that is right.

Q. How big a town is Oxford?

A. Around 500.

Q. Oxford is located about 15 miles west of Iowa City, is it not?

A. Approximately.

Q. And off U. S. No. 6?

A. That is right.

Q. You however do have a paved highway from U. S. No. 6?

A. Fortunately.

Q. Now, what implement line do you handle, Mr. Niebuhr?

A. We have the G. and D. elevators of Streator, Ill., and the Dunham line, Mansfield, Ohio.

Q. What do you mean by the Dunham line?

A. They build culti-mulchers, rotary hoes, disks, and harrows, and we have Turley seeders out of—they are shipping them now from a distributor here in Des Moines. They are made in Illinois.

Q. You don't handle any tractor or plow line?

A. Not any more. I sold the International Harvester [fol. 548] line to Zimmerman last year.

Q. These other farm implements are generally used in that community by the farmers?

A. That is right.

Q. They are what you might call special lines not made by the regular farm implement company who manufacture tractors and plows and things like that?

A. That is right.

Q. Now, Mr. Niebuhr, you have these out-of-State points. How have these shipments been coming into your place of business?

A. Rock Island Motor has been taking care of it very well.

Q. Do you have any other truck line or motor carrier service into Oxford other than Rock Island Motor Transit?

A. I haven't seen them.

Q. What are the ordinary size of your shipments?

A. We have a lot of drop shipments, local l. t. l.

Q. They are from these out-of-State points you have referred to?

A. Yes.

Q. Where does your hardware come from?

A. Janney-Semple-Hill, Minneapolis.

Q. Now, what are the average size of your shipments insofar as these special farm lines are concerned?

A. Well, in the hardware, most of those shipments would run under 5,000 excepting wire, of course, or fencing line and baling wire. That runs usually heavier than 5,000 pounds.

[fol. 549] Q. Now, how about these farm elevators; do they run over?

A. Yes. They are truckloads usually.

Q. Then come in in larger quantities?

A. Large quantities; that is right.

Q. Now, Mr. Niebuhr, do you have occasion to have shipped in then shipments in excess of 5,000 pounds?

A. Yes; we do occasionally.

Q. And the fact that the Rock Island Motor Transit has been restricted to 5,000-pound shipments, has that had any adverse effect on your business?

A. It certainly will on those shipments when I need them.

Q. Do you know of any trucking agency that would provide that service to Oxford?

A. No; I don't.

Q. Shipments in any quantity, as a matter of fact?

A. No; I really don't. I wouldn't know who to ask to bring it in.

Q. What has been the calibre of the service of the Rock Island Motor Transit in and out of Oxford so far as your experience has been?

A. Well, that is the nice part about it, when you can get a shipment brought in there six times a week or five times a week, pardon me, that is really service, and that is what we are looking for, is that quick delivery and in the daytime when we are there to put it in our warehouse.

Q. You have competitors no doubt in Iowa City and [fol. 550] Ma.engo and even at Homestead, do you not?

A. Oh, yes. We need fast shipments because that helps give us better service.

Q. And Oxford is located in a typical Iowa farm community, is it not?

A. Yes.

Mr. Nolan: That is all.

Exam. Carpenter: Mr. Fowler.

Cross examination.

By Mr. Fowler:

Q. Does the Rock Island Railroad have an agent at Oxford?

A. Yes; they do.

Q. In connection with your rail shipments, how do you handle that? In other words, I presume you are the same as the rest of these fellows. Shipments, no matter whether they are billed Rock Island billing or Rock Island Motor Transit billing, they all come in on the same truck, don't they?

A. I don't think that there is a local freight line through there; I mean a daily route on the rail, so no doubt they would bring it up from Iowa City by truck.

Q. That is what I mean. No matter whether it is Rock Island Railroad freight or Rock Island Motor Transit freight, it comes to you in the same truck, doesn't it?

A. Yes.

Q. And you deal with the local Rock Island agent at Oxford?

[fol. 551] A. On rail shipments, he comes up and collects his bills.

Q. And I presume your heavy stuff comes in by rail car?

A. I haven't had a rail shipments now for some time.

Q. But there is no local rail service on l. c. l. shipments into your town?

A. I don't think so.

Q. It is all handled by truck?

A. Yes.

Q. Irrespective of whether it is railroad freight or motor carrier freight?

A. I think they deliver it to our door for the rail either from Iowa City or from the depot, I don't know.

Q. In other words, the Rock Island Motor Transit then delivers freight to your door even though it may be rail freight?

A. Yes.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Do you have any recollection upon the number of

shipments that come in on rail billing as against motor truck billing?

A. It is practically all motor truck billing now.

Q. And do you specify the way it comes?

A. Motor truck always.

Q. You specify motor truck?

[fol. 552] A. Yes.

Q. Is that specification honored by the shipper?

A. Yes.

Q. And by the company?

A. In fact, most of our wholesalers like to find the quickest way of delivery, too, and they usually cooperate with us in finding the quickest way.

Mr. Nolan: That is all.

Exam. Carpenter: Any re-cross, Mr. Fowler?

Mr. Fowler: No.

Exam. Carpenter: You are excused, sir.

(Witness excused.)

H. H. Stevens was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Give us your name, Mr. Stevens, place of residence, and occupation.

A. H. H. Stevens, John Deere Plow Company, traffic manager, Moline, Ill.

Q. How long have you been so engaged, Mr. Stevens?

A. As traffic manager, 11 years.

Q. And what experience in addition to that have you had in traffic work?

A. Seven years with the general company, Deere and Company, traffic besides that.

[fol. 553] Q. That has been 18 years in the traffic department of the John Deere——

A. That is right.

Q. —organization. Has all that been at the Moline plant?

A. At the Moline plants, let's put it that way.

Q. Plants all right. Now, just tell us what jurisdiction you have in your work as traffic manager of the John Deere Plow Company; just what phase of the traffic do you handle?

A. We handle to three fourths of Iowa, particularly in this area here, up to Stuart on highway 6 from all of our plants which are located at Moline, East Moline, Horicon, Wis., Syracuse, N. Y., Yakima, Wash., Los Angeles, Calif., Ottuma, Iowa, Waterloo, Iowa, to 196 dealers.

Q. In the area that you supervise the traffic for the various companies?

A. That is right, in Iowa.

Q. Now, when you speak of the John Deere companies, you are referring to separate departments of the parent company, is that right?

A. That is right. Deere and Company is the general holding company and the John Deere Plow Company is the sales agency for all the factories, and of course we have seven factories in East Moline and Moline and those various other points I have listed, Ottuma, Waterloo, and so forth.

Q. Now, Mr. Stevens, you are familiar with the applica- [fol. 554] tion on hearing here and the territory involved, are you not?

A. Yes, sir.

Q. Would you state what interest this application has and the service proposed here has to your company in taking care of your dealers?

A. Well, it is the only service that we have really got at the present time to some of these smaller dealer points. Now, we have a lot of lines that make the Tri Cities and of course there is a lot of lines that would accept freight to Des Moines, but they will not accept shipments on a peddle run, which is our main shipments. I mean they are going to dealer points.

Q. Mr. Stevens, there are not very many tractors or parts or implements used in the City of Des Moines, are there?

A. No; not very many, but we have a warehouse here.

Q. I mean within the corporate limits of the city.

A. That's right.

Q. In other words, the farm implements are used out in the agricultural area?

A. That is right.

Q. What is the fact as to whether or not the John Deere Company has a local dealer in virtually every hamlet and village and city and town in the State of Iowa?

A. I would say that in almost every city and hamlet, as you say, we do have a dealer.

Q. Take along highway No. 6 going west from Davenport, [fol. 555] do you have a dealer at Walcott?

A. We have one at Walcott; yes. We have one at Durant. We have one at West Liberty. Let's take a look at the map here.

Q. Of course, you have one at Iowa City?

A. Iowa City. Cedar Rapids.

Q. How about down at Kalona?

A. Marengo. Kalona, yes.

Q. How about Wellman?

A. Wellman, yes. Brooklyn, Grinnell, Newton, Colfax, and Ivy.

Q. How about west of Des Moines?

A. We have dealers all the way across. I mean our jurisdiction ends at Stuart.

Q. Yes. Do you include Stuart in your territory?

A. No; that is Omaha territory.

Q. That is Omaha territory?

A. Yes. There is Dexter, Dallas Center. Of course, that isn't on 6, but it is just right above.

Q. You say that you can get service to such key points, or overhead service to such points as Des Moines and Omaha?

A. That's right.

Q. But it is service to the intermediate points?

A. That is what we want.

Q. Do you know of any company other than the Rock Island Motor Transit Company that provides a regular daily service from the Tri-City area along U. S. highway No. 6——

[fol. 556] A. No, sir.

Q. —to these peddle or small towns?

A. No, sir.

Q. Do you know of any company that serves the towns of Kalona and Wellman?

A. No, sir.

Q. And your territory also includes points north of Des Moines, does it not?

A. That is right.

Q. And south of Des Moines?

A. That is right.

Q. State whether or not you have had occasion to make shipments by the Rock Island Motor Transit Company from the Tri Cities through the Des Moines gateway both north and south on the Rock Island Motor Transit?

A. We have.

Q. State whether or not from the interest of your company and the dealers you serve if it is necessary for a continuation of the same type and character of service that the Rock Island Motor Transit performed prior to any limitation or restriction?

A. It is, definitely.

Q. From your experience, Mr. Stevens, do you have an opinion in regard to the necessity of a carrier having overhead service and authority to serve as well as local service?

A. Certainly. They should be able to have the overhead [fol. 557] points just as well as the peddle points.

Q. Have you seen truck lines go and come during the past 18 years?

A. Yes; I have seen——

Mr. Fowler: Just a moment, what is that?

Mr. Nolan: I asked him if he has seen truck lines come and go during the past 18 years.

Mr. Fowler: Read the last question, will you, please?

(Question read.)

Mr. Fowler: Objected to as immaterial.

Exam. Carpenter: Objection sustained.

By Mr. Nolan:

Q. Then as I understand your testimony, Mr. Stevens, you feel that it is necessary for the continuation of a

local service that the carrier have the right to haul overhead service?

A. That is right.

Q. And how about in regard to restrictions in volume of shipments, do you have an opinion on that?

A. Yes; I do. I don't think there should be any restriction, to tell the truth about it. It works a hardship on the shipper and the dealer both. In our line of machinery, for instance, if a dealer has got five grain drills coming, each one of them weighs 2,000 pounds apiece; all right, at the present time, with the restriction and everything, we have got to break it down into three or four bills of lading, and it is costing the dealer money; rather than to be able to get a 10,000-pound rate, he is paying a regular [fol. 558] l.t.l. rate on that stuff.

Q. Are these people willing to pay that additional rate in order to get the service?

A. They don't like it, but they are getting the service. They are paying it, but they don't like it.

Q. When you say it imposes a burden upon the shipper as well as the receiver, do you have occasions where you have shipments going out, smaller items to the same dealer in connection with bigger items?

A. Definitely.

Q. So that if you had a limitation on a carrier you would have to ship the big items by one carrier and the smaller items by another?

A. No; we don't do that. We are using Rock Island Motor Transit service. We break the darned things down. We make three bills of lading instead of just one.

Q. Why do you do that?

A. Because of the restriction.

Q. No, but I mean do you do that because there isn't any other service available?

A. That is right, outside of rail service.

Q. What would you say would be the average size shipments that you make into this territory?

A. Oh, that can run from a hundred pounds up to 20,000 pounds.

Q. And that is year-around, isn't it?

[fol. 559] A. That is year-around, 12 months a year.

Q. Now, do you have occasion to have shipments from the territory back to your plant?

A. Yes, sir.

Q. For replacement?

A. Yes; we do, and we have what we call return-goods proposition where we recondition the machinery and then send it back to the dealer again.

Q. Insofar as assembled units such as a tractor or a combine, those go out already set up, do they not?

A. I wouldn't say they were completely. The tractors do, yes, but not combines. They have to be assembled at the dealer's place.

Q. How about cornpickers?

A. Cornpickers is just about the same thing as a combine. They have to be assembled.

Q. They go out knocked down, do they?

A. That is right.

Q. And then they can move on ordinary motor carrier lines?

A. Oh, yes; cornpickers can.

Q. What will a cornpicker weigh, a 2-row model?

A. A 226 weighs pretty close to 2,100 pounds.

Q. A cornpicker?

A. Yes.

Q. Weigh more than that, won't it?

[fol. 560] A. No, sir.

Q. How about a combine?

A. Combine, yes. Combines will run around 5,000 pounds. In fact, we have got some combines that will weigh more than 5,000 pounds.

Q. Do you put out a combine with a power unit on it?

A. Yes, sir.

Q. One of those so-called mounted combines will weigh more than that?

A. Self-propelled?

Q. Self-propelled.

A. Yes.

Q. What will they weigh?

A. They will run around 8,000, 8,500. All depends on how it is equipped.

Q. Is there a number of cornpickers and combines shipped into the territory served by the Rock Island Motor Transit?

A. Oh, yes.

Q. What effect would it have upon your company and upon your dealers in this territory if the Rock Island Motor Transit Company was required to cease serving this territory?

Mr. Fowler: Just a moment. Objected to as immaterial, for the reason that it assumes a fact not established in this record.

Exam. Carpenter: Objection overruled. Answer.

The Witness: May I have that question again?

[fol. 561] Exam. Carpenter: Read the question, please.

(Question read.)

A. It would just mean that some of our dealers wouldn't even have truck service, period.

By Mr. Nolan:

Q. You say you know of several trucking companies that operate an overhead service between the Tri Cities and Des Moines and Omaha and points like that?

A. Yes, sir.

Q. Do you know of any trucking company that is giving a regular local service to all points between the Tri Cities and Omaha, including all these points?

A. No, sir; there is not.

Mr. Nolan: You may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. What did you mean to say, that if you didn't have the Rock Island service as it is now, you wouldn't have any truck service?

A. You wouldn't have, at some of the smaller points.

Q. What is the difference now between the service that they are presently authorized to furnish under their pres-

ent authority and the service they hope to render under the application pending here, so far as you are concerned?

A. If they have to make it a rail subsidiary, we are going to have to bill stuff on the rail, and after all we want motor [fol. 562] truck service to those points. We don't want rail service.

Q. Do you make any distinction between motor truck service generically and motor truck service physically? In other words, that is all going to be handled on motor truck; you understand that?

A. It can and it can't. We have had——

Q. Just a moment.

Mr. Nolan: Just a minute. Let the witness finish.

A. We have had a little experience before on what we call coordinated service. We don't want any coordinated service or making any service subsidiary to a rail service.

By Mr. Fowler:

Q. Well, now, you are talking about two things. I am talking about the service. You are here complaining particularly, as you have before, about the inability to get into these smaller places.

A. That is right.

Q. It is service that is your first concern?

A. That is right.

Q. Now, you understand that as far as the service is concerned, the Rock Island Railroad now has the authority to furnish that service?

A. The railroad does, yes, but we do not want rail service. We are after truck service to those points.

Q. What do you mean by truck service?

A. Overnight service to the dealer's place of business. [fol. 563] Q. The Rock Island Railroad has that authority now, doesn't it, in conjunction with the Rock Island Motor Transit, as far as service is concerned?

A. Rail service does not definitely mean it is going to move by truck.

Q. The Rock Island Railroad are now moving it by truck, aren't they?

A. I wouldn't say all the time, no.

Q. They are to these smaller towns; you know that, don't you?

A. No; I wouldn't say I do definitely know they are moving it by Rock Island Motor truck.

Q. Aren't you familiar with the fact that there isn't any way freight service today to any of these little towns by rail car?

A. Yes. At Kalona or Wellman, there is what you call a way freight; yes.

Q. Kalona and Wellman. How about the towns of——

A. Marengo, Grinnell.

Q. How about Oxford and Ladora?

A. Oxford, I do not have a dealer at Oxford or Ladora. I am not familiar with them.

Q. How about Walcott?

A. That is handled by motor truck.

Q. As a matter of fact, isn't this a fair statement, that as to points between Iowa City and Davenport served by the Rock Island Railroad, all deliveries in there of less-[fol. 564] than-carload weight are by motor truck?

A. I wouldn't say that; no.

Q. Do you know what authority the Rock Island Railroad has now in connection with its subsidiary, the Rock Island Motor Transit Company?

A. I think I am familiar with it; yes.

Q. What is your understanding of it? Now, let's take a shipment that is moving from your terminal at Moline to one of these small points that you are complaining about. Let's take Colfax, Iowa.

A. Yes.

Q. Now, at the present time that would undoubtedly move to Des Moines and then be peddled back to Colfax by truck, wouldn't it?

A. I don't say it would; no.

Q. How would it?

A. If that shipment is routed by Rock Island Motor Transit, it shouldn't be even brought into Des Moines and peddled back. It should be peddled on the way up.

Q. Well, of course, I suppose we will develop that later on, but you still, no matter whether you tender this to

the Rock Island Railroad or whether you tender it to the Rock Island Motor Transit, it still reaches its destination on the same truck, doesn't it?

A. I wouldn't know. I am not that familiar with their operations.

Q. That is why I was inquiring. From a service stand-
[fol. 565] point, as I understand it, the Rock Island Motor Transit Company is a truck subsidiary of the Rock Island Railroad to furnish the service you are talking about and under its present authority, and I am wondering if you are aware of that.

A. I am aware to this effect, Mr. Fowler, the Rock Island Motor, under the present operating authority that they have, whether it is on temporary basis or not, they are still operating as a common carrier and it does not have to be on rail billing, but if we make it subsidiary to the rail, it is going to have to be on a rail billing and we are, as a shipper, going to have to take the possibility that that is going to be loaded into a trap car and switched in here and then peddled out. That is what we don't want.

Q. That is what I want to develop. Now, at the present time I believe I am correct in saying that as far as the service is concerned, the Rock Island Railroad through its truck subsidiary, the Rock Island Motor Transit Company, can now perform the service to these small towns that you say you must have in the distribution of your products, the only difference being it would have to be on rail billing instead of on truck billing.

A. The possibility it will be loaded in a trap car and sent to one junction point and then peddled out of there, and that is what we don't want.

Q. That would be up to the Rock Island Railroad how they handled it.

[fol. 566] A. That is their operating. The shipper can't govern that.

Q. We have had plenty of testimony here and I assume you have heard it. All of these fellows on the stand testified that the rail-billed freight and the motor-truck-billed freight is in the same truck.

A. That can be. I don't know.

Q. So, as far as the physical service is concerned, the

Rock Island Railroad now has the authority through its truck subsidiary, Rock Island Motor Transit Company, to give you the service that you say you need, the only exception being it would be on rail billing instead of on motor carrier billing.

Mr. Nolan: Now that is a misstatement——

Mr. Fowler: Now, just a moment. Let me examine this witness. You get in when you are supposed to.

Mr. Nolan: We certainly have a right to object to improper cross-examination.

Exam. Carpenter: You do; yes.

Mr. Nolan: And particularly when it is a misstatement of the record.

Mr. Fowler: I think, Mr. Examiner, that Mr. Nolan ought to be required to make his objection in the proper form and so we will have some sort of a record.

Mr. Nolan: I object to the question as improper cross-examination and not a proper statement of the record.

Mr. Fowler: Now, will you read the question, please?

[fol. 567] (Question read.)

By Mr. Fowler:

Q. Is that your understanding of the situation?

Exam. Carpenter: Objection overruled.

A. No. As I stated once before, Mr. Fowler, the shipper is going to take a chance, if this is going to be on rail billing, of having that go into a terminal point in a trap car and that trap car can take as long as a week to get in and out of these yards, and then be broken down and then distributed, and that is not what we want. That is not what we are going to get, I hope.

By Mr. Fowler:

Q. If it should develop when we get through with the record in this case that the Rock Island Railroad, in combination with its subsidiary, the Rock Island Motor Transit Company, is going to operate so that the service into all these small towns is by truck, irrespective of whether it is

on rail billing or motor truck billing, what difference would that make?

Mr. Howland: That is objected to because of the key-point restriction imposed on the permanent Rock Island Motor Transit operating authority. Such service could not be performed to all points in Iowa. The question assumes facts not shown in the record. It is argumentative in form, and it is not proper cross-examination.

Mr. Fowler: I think that is an improper objection on the part of counsel. It is a speech, and I think the examiner ought to insist that his objection is made in an orderly manner.

Now, what is the question, please?

[fol. 568] Mr. Howland: Is there a ruling?

Exam. Carpenter: Read the question and see if he can reframe the question.

(Question read.)

Exam. Carpenter: Better reframe it, Mr. Fowler.

Mr. Fowler: Well, I don't know that I can reframe it, Mr. Examiner.

Exam. Carpenter: You have got your key-point restrictions in there.

Mr. Fowler: Well, let them develop that on cross-examination. I can't reframe it.

Exam. Carpenter: I will sustain the objection.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. Mr. Stevens, are you familiar with the key-point restriction imposed upon the permanent authority of the Rock Island Motor Transit?

A. Yes, sir.

Q. As a matter of fact, those restrictions mean that the Tri Cities and Des Moines and Omaha, you can't move between two or through more than one by motor truck. What effect would that have upon your company's ability to serve its dealers?

A. Well, I mean after all at the present time that shipments from Syracuse and Horicon, Wis., Van Brunt Company up there in Horicon, Wis., you can't ship by Rock [fol. 569] Island Motor to those points on account of that.

Q. Those are affiliated companies with your company?

A. That is right; those are our factories.

Q. You started to say something about you had some experience with so-called coordinated rail-truck service. Where was that?

A. Well, that has been back, I would say, 1941, 1942, where we would have goods come in, say, from Horicon, Wis., and be turned over to the Rock Island Motor at Chicago and instead of being loaded on a truck they used the coordinated service of a trap car and it would bring it into, say, Des Moines.

All right, you get down here in some of these yards and you get involved there. It takes sometimes 2 and 3 days to get that car broken down.

Q. What is the fact as to whether or not if a shipper or I mean one of your dealers out in the territory specified that your company ship by rail a shipment from Moline to a point here in Iowa and you honored his designation, who would you contact for that shipment? Would you contact the Rock Island Motor Transit or Rock Island Railroad?

A. Rock Island Railroad.

Q. And who would handle the billing?

A. The rail agent himself.

Q. And would that then have to——

A. His billing clerk, let's put it that way.

Q. Would that shipment have to go through the rail depot?

[fol. 570] A. Yes, sir.

Q. And then be turned over to the Rock Island Motor Transit, is that right?

A. I wouldn't know. As far as we are concerned, rail, as I have already tried to point out, we don't know whether they are going to load into the car or put it on Rock Island Motor. There is no way a shipper has got to know.

Q. From your experience, would a so-called coordinated rail and truck movement whereby the freight would have

to move on rail billing and have to move in accordance with certain key-point restrictions, would that be an adequate service for your company?

A. No, sir.

Q: State whether or not your company needs the service of the Rock Island Motor Transit Company as it was before there was any limitation or modification.

A. We definitely do want it.

Mr. Fowler: That is objected to for the reason it is repetition.

Exam. Carpenter: It is repetitious.

Mr. Nolan: I think that is all.

Exam. Carpenter: Objection sustained. Is there any recross?

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

[fol. 571] Exam. Carpenter: We will have a recess for 5 minutes.

(Short recess.)

CARL MOERSHEL was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, Mr. Moershel?

A. Carl Moershel, residence is Homestead, and I work for the Amana Society as accountant, internal auditor, insurance man, and general adviser, I guess you would call it.

Q. Now, you say you are associated with the Amana Society.

A. That is right.

Q. Just briefly for the record state what the Amana Society is.

A. It is a corporation which owns and operates approximately 25,000 acres of land and some 30 businesses besides the farms that are located on that land.

Q. And is the Amanas divided up into what you would call villages or towns?

A. That is right. There are seven villages. These are Homestead, Amana, East Amana, Middle, High, West, and South Amana.

Q. What towns are located on U. S. highway 6?

A. Homestead and South Amana.

Q. What is the population of Homestead village or town?

A. Oh, it is approximately 220.

Q. And South Amana, is it approximately the same size?

[fol. 572] A. That is right.

Q. What business enterprises do you have at Homestead?

A. A feed mill, a lumberyard, general store, implement store, a wood-working factory, meat market, restaurant, sandwich shop, gas station, and the farm department of the Society, of course.

Q. What business enterprises do you have at South Amana?

A. There are two general stores, a bakery, a gas station, sandwich shop, meat market, and also a farm department.

Q. These stores and business enterprises, state what is the fact as to whether or not they sell to the public as well as to members of the Society.

A. Oh, yes. They sell to whoever comes into the store. They depend, particularly the Homestead store, on the farming area around Homestead.

Q. And those stores which you have enumerated in Homestead and South Amana, they handle a line of merchandise similar to merchandise handled in other farm communities?

A. Yes. The stores in South Amana are largely grocery stores. They handle some dry goods and odds and ends, but the stores at Homestead handle just about every kind of merchandise that is saleable.

Q. Everything that will resell they sell, is that right?

A. That is right.

Q. Now, Mr. Moershel, you are familiar in a general way,

are you not, with the operations of the Rock Island Motor [fol. 573] Transit through Homestead and South Amana? A. Yes; I believe I am.

Q. And insofar as interstate shipments are concerned into Homestead handled by the Rock Island Motor Transit, would you tell us what those shipments are and where they come from? I am talking about out-of-State shipments.

A. Most farm implements and parts come in from out of State that are sold there at the store, and they would come from Minneapolis or Hopkins, Minn.; also from Moline, Ill., and Morton, Ill. I believe those are the chief points.

Q. In your auditing and your position with the Society there, are you familiar with what transportation service and what company handles the shipments from Moline and Illinois points to Homestead, particularly the farm implements and parts?

A. It is almost exclusively Rock Island Motor Transit.

Q. Do you know of any other company that serves Homestead from Illinois points other than Rock Island Motor Transit, particularly Moline and points in the Tri-City area?

A. There may be other carriers, but if there are we don't use them. Now, there is a carrier out of Chicago, Hawkeye Motor Express, we use them quite a bit. They bring the merchandise into Cedar Rapids and from there Smitty brings them into Homestead. That is A. W. Schmidt.

Q. Do you have a local carrier from Cedar Rapids to the colonies?

A. Schmidt is the one.

[fol. 574] Q. I am talking now primarily about Moline and the Tri-City area. Is there any other carrier that has been serving Homestead and the farm implement store there?

A. None that I have seen on the freight bills.

Q. What is the frequency of the service of the Rock Island Motor Transit in and out of Homestead?

A. It is just about every day. Once in a while road conditions have something to do with it. The Rock Island Motor Transit usually pulls in with a semi and roads in Homestead are not always the best, so they may have trouble coming into town or getting to the point of delivery

at the store or their feed mill or lumberyard, so it may not be possible for them to come in on a particularly bad day. Other than that, they are in town just about every day.

Q. Well, highway No. 6 runs at the west edge of Homestead, does it not?

A. Yes, sir; it runs parallel to Homestead.

Q. But the implement store and the general store and the lumberyard, those are located 2 or 3 blocks or so away from the highway?

A. They are off the highway, that is right.

Q. State whether or not the lumberyard has any shipments come in from out of State.

A. Not too many. Most of their shipments would be lumber, of course, and they do handle nails and wire. [fol. 575] Usually they get those by the truckload.

Q. How about the hardware line?

A. Well, the store handles most of the hardware. Most of that comes in from Chicago and Des Moines and some from St. Louis, too.

Q. How long have you been connected with the Amana Society in your present position?

A. Since 1946.

Q. You were born and raised there?

A. Oh, yes.

Q. State whether or not you feel from your position with the Society that there is or is not a need for the continuation of the Rock Island Motor Transit service as they have been giving it in the past in that community.

A. There definitely is a need. There is no getting around it. We are dependent at the present time upon two truck lines as far as service in Homestead is concerned, one of them being Schmidt and the other one Rock Island Motor Transit. To cut off either of those would certainly hinder our operations.

Q. Now, the Schmidt operation is really a north-and-south operation, is it not?

A. It is largely out of Cedar Rapids, that is right.

Q. It is a local operation between Cedar Rapids and the colonies?

A. Yes. Of course, he interlines at Cedar Rapids with

other carriers, but east and west shipments, coming in from [fol. 576] the west or east, are largely Rock Island Motor Transit.

Q. Do you have an occasional shipment come in by some other carrier?

A. You mean delivered in Homestead?

Q. Yes.

A. No; except for an occasional truckload shipment. I mentioned nails and fence wire usually being bought by the truckload, and that will come on a different carrier.

Q. On a stock truck?

A. Lots of times it is a bull hauler.

Mr. Nolan: That is all. You may cross-examine.

Mr. Fowler: No cross-examination.

(Witness excused.)

ROBERT L. GAGE was sworn and testified as follows:

Direct examination:

By Mr. Nolan:

Q. State your name, please, place of residence, and occupation.

A. Robert L. Gage, secretary-manager, Iowa City Chamber of Commerce, Iowa City, Iowa.

Q. How long have you been so engaged, Mr. Gage?

A. Since April of 1946.

Q. That is the year you had a good president of the Chamber of Commerce?

A. That is right.

[fol. 577] Q. Now, Mr. Gage, state the general make-up of the Iowa City community, what industries there are, and what other institutions.

A. Well, of course, primarily Iowa City is known as the home of the University of Iowa, which is far and away our largest employer. Most recently, we have managed to have located there a Veteran's Administration hospital which is far and away our second largest employer. The

University has almost 3,800 employees, and the Veteran's hospital will probably have in the neighborhood of 5 or 6 hundred when it is fully staffed and under operation.

One of our purposes in Iowa City has been to attain an economic balance in the matter of employment of both male and female workers so that our Chamber of Commerce has been concerned over the last 4 or 5 years with getting in some rather small industries.

We know we are the home of the University of Iowa and we don't want to bring in large industries that would not be in keeping with the general make-up of the community and at the same time we know that we need male employees to make it possible to attract female employees that we need for both the Veteran's hospital and the University of Iowa hospital.

In connection with that, one of the things that we have to have is transportation. Probably two of the best examples of our success in getting new industry will be Moore Busi- [fol. 578] ness Forms, which located in Iowa City in 1948, which is a branch plant of that company, and then we have since added two other ones, Protein Blenders and also the Plumbers Supply Corporation.

Q. Now, Mr. Gage, in your work in attempting to attract new business enterprises and new businesses to the community, state whether or not the transportation facilities is important in your efforts in that respect.

A. Well, I think that that is true of any community. You have got to be able to show transportation facilities or you are immediately handicapped right off the bat.

Q. State whether or not the transportation facilities provided by the Rock Island Motor Transit Company in Iowa City is one of the important factors in approaching and interesting these enterprises in locating at Iowa City.

A. Well, there is no doubt but what one of the outstanding attractions that we have in Iowa City is our trucking facilities and, of course, the very nub of that is the Rock Island Motor Transit's interstate service.

Q. Are you familiar with the character of that service of the Rock Island Motor Transit?

A. Well, only in connection with as much as necessary with my particular job.

Q. And what has the general reputation of the service of the Rock Island Motor Transit Company been in and out of Iowa City?

A. Certainly with our own employers and shippers, it [fol. 579] has been of the very best. Maybe I should put it that I have never heard anything derogatory about the Rock Island service.

Q. Bob, state whether or not the Chamber of Commerce, which represents the business and other interests in the community took any official action upon the application of the Rock Island Motor Transit Company in this case.

A. Well on two occasions; the first, the executive board last—I can't be too exact, but it was last summer, authorized persons to speak in our behalf in a hearing at Washington, and then this month of January we have had entered in the minutes again by full action of the board authorizing myself or some other official of the Chamber of Commerce to appear on behalf of this petition.

Q. And you are so appearing here today in that respect?

A. Right.

Mr. Nolan: I believe that is all. You may cross-examine.

Mr. Fowler: That is all. Thank you.

(Witness excused.)

Howard P. Jacobs was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Give us your name, Howard, and place of residence and occupation.

A. Howard P. Jacobs, Iowa City, Iowa, employed by the Nagle Lumber Company.

Q. What is the business of the Nagle Lumber Company? [fol. 580] A. Principally retailing lumber and building supplies in the yard at Iowa City, and we also have a yard at Oxford, Iowa.

Q. You carry a general line of building supplies?

A. Building supplies, builder's hardware, cement.

Q. Farm supplies, do you, like fencing?

A. Wire and fencing that is right.

Q. How long have you been connected with the Nagle Lumber Company?

A. Since 1938.

Q. Do you have any particular title?

A. Yes. I am secretary.

Q. Of the company?

A. That is right.

Q. Does the transportation of merchandise into your places of business, both at Iowa City and Oxford, come under your supervision?

A. To a great extent. I do a great deal of the buying, the purchasing.

Q. What transportation facility has the Nagle Lumber Company been using both at Iowa City and Oxford for interstate in quantities?

A. We use truck and I specify Rock Island Motor Transit.

Q. Why do you do that?

A. Due to the service and the efficient speed with which we receive merchandise.

[fol. 581] Q. Where do those shipments from out-of-State points come from?

A. Most of them originate in Chicago.

Q. You do have other truck lines operating between Chicago and Iowa City do you not?

A. Yes.

Q. Why do you not use those facilities?

A. Our experience has been if we order material from a firm in Chicago a jobber, and specify Rock Island Motor Transit, why, it is picked up that day or the following day and we get it either that afternoon or the next day.

Q. Now, what are the size of the shipments of your company ordinarily?

A. Oh, they will range from 250 to 1,500 pounds, 2,000 pounds, some of them larger. We had occasion to want to ship a truckload of material out a couple of days ago and were unable to ship it by Rock Island Motor Transit.

Q. Where was that shipment going?

A. Chicago.

Q. What was the nature of it?

A. Asphalt shingles.

Q. And was it a back shipment?

A. It was a shipment of material we were shipping back to the manufacturer.

Q. Do you have occasion to have shipments of less-than-truckload quantities in excess of 5,000 pounds to both your [fol. 582] yard at Iowa City and also at Oxford?

A. Occasionally.

Q. To Oxford, do you have any other form of transportation other than Rock Island Motor Transit?

A. To my knowledge there is no other truck line that services other than truckload at Oxford.

Q. Are you familiar with the fact that Rock Island Motor Transit is now operating under restriction of 5,000 pounds per shipment?

A. Yes.

Q. Is that adverse and detrimental to your company's welfare to have such a restriction?

A. It has to a small extent, yes, particularly in Iowa City. Our Oxford yard doesn't get quite so many shipments of that size.

Q. State whether or not your company needs an unlimited and unrestricted service of the Rock Island Motor Transit Company from out-of-State points in and through Iowa City and Oxford?

A. We could exist without it. It would be easier with it.

Q. I mean, is it reasonably necessary to have that service?

A. Yes.

Q. I believe you said the service has been entirely satisfactory over the years?

A. Yes.

Q. You have been with the Nagle Lumber Company since the same date the Rock Island Motor Transit started to [fol. 583] operate there, isn't that true?

A. Yes.

Q. Were you there during the White Line truck days?

A. The White Line was—I don't remember any ship-

ments coming in on the White Line. I came down in 1938 and the dates——

Q. State whether or not the Rock Island Motor Transit has a local agent there.

A. Yes.

Q. Pickup-and-delivery service?

A. Yes.

Mr. Nolan: I believe that is all. You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. When you wanted to ship your shingles back to Chicago, did you find another carrier to take them?

A. Yes; I did.

Q. Your shipments, I assume, customarily are l. t. l. shipments under a thousand pounds?

A. Well, I wouldn't say they were under a thousand pounds. I would say they were under 2,000 pounds.

Q. And it is the exception when you have anything greater?

A. Well, more so than the rule.

Q. And you have an abundance of common carrier authority or service from Chicago to Iowa City, don't you, besides the Rock Island Motor Transit?

A. Not that we can get service from.

[fol. 584] Q. Well, they are there; they are available. Apparently you are sold on the Rock Island Motor Transit and you don't look much further, do you?

A. Well, when you have had considerable experience and know you can get the material promptly, why, you specify.

Q. I can't quarrel with you on that. If that is your preference, you are entitled to that, but there is other service available there between Chicago and Iowa City by other common carriers by motor vehicle?

A. I couldn't say.

Q. You don't know?

A. That is right.

Mr. Fowler: That is all.

Exam. Carpenter: Any redirect?
Mr. Fowler: Just a moment. Okay.

Redirect examination.

By Mr. Nolan:

Q. Does any other motor truck company maintain their own terminals and agents in Iowa City other than Rock Island Motor Transit?

A. I believe Watson does.

Q. Do they have an office there, an agency there, or is that merely an interchange point of equipment, or do you know about that?

A. They have a telephone number and an office there, a man that answers the telephone when I call. That is the [fol. 585] only one that I know of.

Mr. Nolan: That is all.
Exam. Carpenter: Any re-cross?
Mr. Fowler: No.

(Witness excused.)

James H. Nesmith was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Give us your name, place of residence, and occupation.

A. James H. Nesmith, and I am the manager of the Plumber's Supply Company at Iowa City, Iowa, stockholder and manager.

Q. And is that a new industry in Iowa City?

A. That is right.

Q. How long have you been located there?

A. We officially went into business within the last 12 months, but we started building the building there about a year and a half ago, I should judge.

Q. Where is your plant located?

A. Located on highway 218 south of the airport.

Q. Where did you live before you came to Iowa City?

A. In Jasper County.

Q. Were you engaged in merchandising there?

A. Yes. I am also affiliated with Iowa Machinery and Supply in Des Moines, which is a parent of our concern [fol. 586] there, but I lived in Jasper County and was affiliated with Iowa Machinery and Supply Company.

Q. Just tell us briefly the business conducted by your store in Iowa City.

A. We are plumbing and heating wholesalers, and we handle large quantities of pipe, fittings, boilers, valves, and anything that is connected with the plumbing and heating business. We ship it in and redistribute it all around through the locality, anywhere from oh, we'll say a maximum of 100 miles we go back out there; probably more often 50 or 60 miles.

Q. In other words——

A. Handle it twice.

Q. —you job or sell it to the retail trade?

A. Sell it to the plumbing and heating trade.

Q. That is what I mean.

A. Yes; that is right.

Q. Do you have any interstate shipments in your business?

A. Yes; a lot of them.

Q. Where are those shipments originating?

A. Practically all of them come from the east, Chicago, Waukegan, a lot from Ohio, Pennsylvania, Alabama, and sometimes New York State, New Jersey.

Q. What is the size of those shipments ordinarily?

A. All of those shipments are always truckload shipments, full truckload.

[fol. 587] Q. Do you have any less-than-truckload shipments coming in?

A. Yes; we do. That is right.

Q. With what regularity do you have less-than-truckload shipments coming in?

A. How do you mean?

Q. I mean is it just occasionally or would you say once a week or once a month or——

A. It would be pretty regular because—I have forgotten. I stated it was all truckload, but it isn't. We have

boilers. They wouldn't be a full truckload. We have big storage tanks and stuff like that wouldn't be full truckloads. We have quite regular——

Q. Do you have shipments in excess of 5,000 pounds but less-than-truckload——

A. That is right.

Q. —shipments?.

A. That is right.

Q. What transportation service have you been using to get these out-of-State shipments into your place of business in Iowa City?

A. We generally always use Rock Island if we can get it. We specify Rock Island.

Q. Why?

A. Well, we get better service from Rock Island and they also give us excellent pickup service. They notify us immediately when something comes in. We don't have to [fol. 588] trace anything down. My experience with Rock Island, my relations in the business way, have been excellent.

Q. When you say "Rock Island," you mean Rock Island Motor Transit?

A. I mean Rock Island motor carrier.

Q. Have you had experience with Rock Island Motor Transit prior to coming or opening your place of business in Iowa City?

A. Yes. For years.

Q. Where was that?

A. I had experience with Iowa Machinery and Supply and I also had experience with the A. Y. McDonald Company for 15 years. I was the territory man for years and I specified, clear from the time the Rock Island started in business as a truck carrier, I used them.

Q. Do you know of any other carrier, motor carrier, that is giving or has given the same type and character of service that the Rock Island Motor Transit gives to your business in Iowa City?

A. No; there isn't any.

Q. What would be the effect on your company's business if the Rock Island Motor Transit was required to cease doing business in Iowa City?

Mr. Fowler: Just a moment. Objected to as immaterial and assuming a fact that has not been established in this record.

Exam. Carpenter: Objection overruled. Go ahead and answer.

A. I would think it would have a serious effect on it [fol. 589] because I picked Iowa City as a jobbing point because I knew the connection of Rock Island Motor there, that we could get good service out and in there, both ways, and I think it would have a serious effect on our business.

Q. Do you have occasion to have shipments routed through your place of business destined to some small town dealer out in the territory? A. Yes.

Q. And particularly along highway No. 6?

A. Yes; and down to Wellman and Kalona and all those points down through there.

Q. Do you know of any carrier serving the towns of Wellman and Kalona other than Rock Island Motor Transit?

A. No; I don't know of any.

Q. Then would you have occasion to have such shipments shipped to the intermediate or small points around Iowa City by Rock Island Motor Transit?

A. Oh, yes; every day.

Q. Is that service essential to your business?

A. Absolutely.

Mr. Nolan: I believe that is all. You may cross-examine.

Mr. Fowler: No cross-examination.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Swanholm.

[fol. 590]

CLIFFORD H. SWANHOLM was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Give us your name, place of residence, and occupation.

A. Clifford H. Swanholm. I am the plant manager for the Moore Business Forms Company.

Q. Tell us just a little bit about that for the record.

Q. About Moore Business Forms?

Q. Yes; what they do.

A. Moore Business Forms, our operation in Iowa City is part of a national organization. It has plants in many parts of the country. We are the largest business form printing company in the United States. In Iowa City we employ 60 people. However, we are a small fragment of the large organization.

In Iowa City we manufacture two general types or two, I would call them, general types of products. One is these forms for register machines, counter register machines, the type of machine where you pull the handle and get a ticket as commonly used in garages, coal yards, lumberyards, dry cleaners, and so forth.

The other type of form, in a broad sense, is a tabulating machine form such as used in IBM machines and Remington Rand machines. Also, continuous forms used in these typewriting machines.

[fol. 591] Q. How about multiple copies of freight bills and things like that?

A. Yes; multi-copy forms. Most of the tabulating forms are in multiple copies; that is, parts ranging anywhere from 2 to 12 parts interleaved with carbon paper.

Q. Now, what inbound shipments do you have, if any, in less-than-carload quantities?

A. I would say that there would be none.

Q. And how about your outbound shipments; where do they go? And how do they go?

A. Out of Iowa City, on these two categories of products, we cover the area from Montana to western Michigan and from Minnesota to Texas. Some of our forms, of course, go into eastern States even as far as Florida and Maine.

Q. How long has your plant been operated at Iowa City?

A. Three and a half years.

Q. Has the business been growing or been expanding since you have been there?

A. Yes. We have just recently put on an addition, a

hundred-thousand-dollar addition onto this building we are in. We now occupy about 23,500 feet of space.

Q. For Mr. Gage's benefit, do you contemplate further development there if time warrants and permits?

A. I would say I didn't come to Iowa City for my health. I hope so.

[fol. 592] Q. What transportation facilities has your company been using for these outbound shipments?

A. We have been using Rock Island Motor for all interstate shipments and to a lesser degree on interstate shipments the people who have shared in this traffic on out-of-State shipments are Poole, Merchants, Watson.

Q. Poole, that is Poole Transfer Company, Muscatine. That is a north-and-south operation, is it not?

A. Primarily, yes. They serve Chicago and the Twin Cities. We find them very good for those points.

Q. How about Merchants?

A. Merchants, they don't serve Iowa City too well except we have an arrangement for fast overnight delivery into St. Louis.

Q. Then how about your westbound shipments to the, say, Omaha gateway?

A. Some of them have been made by Watson Bros., but we have found their service very unsatisfactory because of their tracer service and other factors involved in the picture. They don't give as good service as these other truck lines.

Q. Would you say that Watson Bros.' service is unsatisfactory, has been unsatisfactory to points west through the Omaha gateway?

A. It has to us.

Q. Have you used the Rock Island Motor Transit into that area?

A. Yes; on a certain amount of freight.

[fol. 593] Q. How has that service been?

A. We have found them very good. We have found them excellent in almost all respects.

Q. Now, what would be the size of these outbound shipments, say, going west through the Omaha gateway?

A. They would range from 60 or 70 pounds on up to a thousand, 2,000 pounds.

Q. Would you have any necessity for any shipments in excess of 5,000 pounds in that area?

A. Only occasionally.

Q. And state whether or not if the Rock Island Motor Transit Company service was terminated in and out of Iowa City, if that would or would not adversely affect your company's business.

Mr. Fowler: That is objected to for the reason it is immaterial, for the reason that it assumes facts which have not been established in this record.

Exam. Carpenter: Objection overruled. Go ahead and answer.

A. Well, one of the prime reasons, I think, that Iowa City was selected as a point of operation is because of the excellent truck service that is available to us. I feel that it would be very detrimental to us, especially in the State of Iowa, because we sell forms to virtually every hamlet and cross-roads and town and city in the State. I don't think there is a town of any size that we can't say that we furnish someone in that town with some forms.

[fol. 594] Q. And how about this interstate operation in the west, as far as your experience with Watson was concerned; is the Rock Island Motor Transit service reasonably necessary to take care of that business?

A. We have had some representatives who have voiced objections to routing it by Watson.

Q. Do you specify your own routing or do you let your customers have something to say about that?

A. On outbound shipments, we have to specify our own routing. Very few people know enough in these small towns, know enough about traffic to say whether it will bring it in or won't bring it in.

I might add that service is one of the big factors with us. People want these things now. Overnight shipment to any point is a very important must as far as our customers are concerned. They expect us to lay these things in there over night.

Q. You have competitors in the territory served by your company?

A. That is certain.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Cross-examination.

By Mr. Fowler:

Q. As I understand it, with respect to Chicago, Minneapolis, Omaha, St. Louis, you use the services of the Rock Island Railroad, Rock Island Motor Transit, Merchants Motor Freight, Poole Transfer, and other carriers?

[fol. 595] A. Yes. We do use Poole almost exclusively into the Twin Cities.

Q. You use him to Chicago?

A. And we use Poole. Poole gets the large cut on the Chicago traffic.

Q. And Minneapolis and St. Louis, is that Merchants Motor Freight?

A. St. Louis, Merchants, yes.

Mr. Fowler: That is all.

Mr. Nolan: That is all. Thank you very much.

Exam. Carpenter: You are excused.

(Witness excused.)

(A document was marked as "Applicant's Exhibit No. 13, Witness Cecil," for identification.)

Mr. Howland: At this time we would like the record to show, if the examiner please, that abstracts of the freight bills submitted by the witness Keith Cecil, showing interchange shipments between Central Transfer Company of Brimfield, Ill., and the Rock Island Motor Transit Company for the month of December 1950 have been prepared and have been designated as applicant's exhibit No. 13, and the copies of the freight bills which were submitted by Mr. Cecil are in the hearing room and have been made available to counsel for the protestants.

OFFER IN EVIDENCE

In connection with the testimony of Mr. Keith Cecil, the applicant at this time offers and introduces in evidence exhibit No. 13.

Exam. Carpenter: There being no objection, the docu-
[fol. 596] ment identified as exhibit 13 is received in evidence.

(Applicant's Exhibit No. 13, Witness Cecil, was received in evidence.)

Mr. Howland: Mr. Cole, I think maybe we can finish up your direct examination and perhaps complete your examination before we adjourn at noon.

L. L. COLE resumed his testimony as follows:

Direct examination—Resumed.

By Mr. Howland:

Q. There is one thing that I want to have the record clear on. In response to some questions by Mr. Fowler yesterday, as I recall your testimony, you testified, Mr. Cole, that the Rock Island Motor Transit Company was compensated by the Rock Island Railroad for the handling of rail freight shipments at a fixed rate per hundred pounds irrespective of mileage or the class of traffic handled.

Now, what is the situation with respect to the compensation to the Rock Island Motor Transit Company at points other than those involved in the White Line or Frederickson territory or other points outside the State of Iowa with respect to the basis on which the Rock Island Motor Transit Company deals with the Rock Island Railroad with respect to rail shipments?

Exam. Carpenter: Just a moment.

Mr. Fowler: May I inquire preparatory to an objection?

Exam. Carpenter: Yes.

[fol. 597] By Mr. Fowler:

Q. Is there a written instrument which exists between the Rock Island Railroad and the Rock Island Motor Transit covering these transactions?

A. Not that I know of.

Q. No written contract?

A. There may be. I don't know of it.

Mr. Fowler: I will ask Mr. Howland if there is.

Mr. Howland: I am not aware of any. Mr. Peterson is not here and he would be the one that would have more definite personal knowledge. My opinion is that it isn't a matter of a contract in writing.

Mr. Fowler: Of course, Mr. Examiner, if such an arrangement has been reduced to writing, this is not the best evidence.

Mr. Howland: We will produce it if it is in writing. I am asking this question to clear up a possibility that there was some misunderstanding between the witness and counsel.

Exam. Carpenter: I presume Mr. Peterson will be presented as a witness, will he?

Mr. Howland: That is right.

Exam. Carpenter: We will take it up at that time. Go ahead and answer the question.

A. The question, I believe, was concerning the rates outside of this territory. We are paid by the mile, so much per mile operated.

By Mr. Howland:

Q. Is that in connection with cases where the truck ser- [fol. 598] vice is performed in which the Rock Island Motor Transit Company has no motor carrier authority?

A. That is true.

Q. All right. Now, I was asking you at the time of the adjournment last evening, Mr. Cole, concerning a statement showing the result of operations of the Rock Island Motor Transit Company for the years 1950 and 1951. Do you have such an exhibit?

A. I have a profit and loss detail by month, for those years; yes, sir.

Mr. Howland: I will ask that the statement headed, "The Rock Island Motor Transit Company profits or Losses before Income Tax, Years 1950, 1951, and January and February 1952, be marked for identification "Exhibit No. 14."

(The documents referred to was marked as "Applicant's Exhibit No. 14, Witness Cole," for identification.)

By Mr. Howland:

Q. Mr. Cole, you have produced here a statement marked for identification as exhibit No. 14. Will you tell us what it is, by whom it was prepared, and how it was prepared?

A. It is a detail of the profits or losses resulting from the operations of the Rock Island Motor Transit Company during each month of the years 1950, 1951, and for the first 2 months of 1952. You will note that the month of February 1952 has an asterisk beside it, designated as an [fol. 599] estimated figure. That is our closest possible estimate at this time.

Q. Is that February 1952 figure accurate to the extent that from the actual operations figures reported to you, but not in the final closing of the books for that month?

A. That is correct.

Q. That is your approximate final figure?

A. That is true.

Q. Is the exhibit self-explanatory or is there anything about it that requires any particular explanation of the manner in which it has been made up; that is you show, as I understand it, in each of these columns by months for the year 1950 and the year 1951 the result of the operations of the Rock Island Motor Transit Company as a whole?

A. That is true.

Q. And that includes all of the operations of the Rock Island Motor Transit Company?

A. It does.

Q. Now, I note particularly that in the month of October 1950 there was shown a profit before income tax of $48,544-.40, whereas in the year 1951 in the same month the black figure or profit figure is $10,381.27. What is the fact as to

the best months from the standpoint of operations the Rock Island Motor Transit Company usually has during a calendar year?

A. The month of October is generally our best operating month.

Q. And why is that true?

[fol. 600] A. To the best of my knowledge, it is generally a month in which the operations are free from road conditions and also it seems that that is the month in which we carry the largest volume of freight.

Q. Now, up until the end of August 1951, were any of the months shown on the statement marked for identification as exhibit 14 periods during which the Rock Island Motor Transit Company had these restrictions as to weight limitation, and so forth?

Mr. Fowler: Now, wait a minute. Read the question.

Mr. Howland: I will withdraw the question. I think maybe it is a little confused.

By Mr. Howland:

Q. I notice in the year 1951 in the month of August a profit figure was shown and that that was immediately followed in the month of September by a red circle of $16,304-.24 on the instrument marked for identification as exhibit 14. Is there any particular explanation for that situation?

Mr. Fowler: Just a moment. That is objected to as calling for an incompetent conclusion of the witness, speculation and conjecture, matters of which he can have no personal knowledge, not being an operating——

Exam. Carpenter: Objection overruled.

A. The month of September 1951 was the first month under which we operated under the restrictions imposed in our operating authority.

OFFERS IN EVIDENCE

Mr. Howland: We will offer and introduce in evidence at [fol. 601] this time the paper marked for identification "Exhibit 14."

Exam. Carpenter: Cross-examine, Mr. Fowler.

By Mr. Fowler:

Q. Mr. Cole, are the figures that appear on exhibit No. 14 identifical with those which you have reported to the Interstate Commerce Commission?

A. They are for the entire year.

Q. In other words, the same information that you have on your exhibit 14 for the years 1950 and 1951 was reported to the Interstate Commerce Commission. I am talking about the sum figure.

A. The sum figure is the same; that is, for the year-to-date figure there.

Mr. Fowler: I have no objection to the exhibit.

Exam. Carpenter: The document will be received in evidence as exhibit 14.

(Applicant's Exhibit No. 14, Witness Cole, was received in evidence.)

By Mr. Howland:

Q. Now, Mr. Cole, have you also prepared at my request an exhibit showing the revenues derived from operations between different points on the Rock Island Motor Transit Company system by months and by various territories by months since September 1951?

A. I have.

Q. You have now produced a statement consisting of 7 pages, headed on page 1, "Rock Island Motor Transit Company Recapitulation of Total Gross Revenue Earned on [fol. 602] Motor Carrier Traffic originating at Terminal Points Listed," and on succeeding pages there seem to be comparative statements of comparable character, but with different points of origin and perhaps some variation in points of destination. This statement has now been tendered for identification as exhibit 15.

(The document referred to was marked as "Applicant's Exhibit No. 15, Witness Cole," for identification.)

By Mr. Howland:

Q. Will you, beginning with page 7 and in inverse order,

tell us the manner and method in which this series of sheets marked for identification "15" was made up?

Mr. Fowler: Off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

A. May I say that all of these sheets are prepared from a record which we maintain of the volume of traffic moving from one point to another on our system.

Concerning page 7, that is a comparative statement, motor carrier revenues originating at Omaha, Nebr., destined to the selected points listed during the periods indicated.

By Mr. Howland:

Q. And has that been made up by periods of 2 months each?

A. That is correct.

Q. And was the first of those 2-month periods, namely, September 1 to October 31, 1951, a period during which the [fol. 603] 2,000-pound limitation was imposed?

A. That was September 1, 1951, to October 31, 1951?

Q. Yes.

A. That is correct.

Q. And then the period November 1, 1951, to December 31, 1951, was the period in which the restriction was 5,000 pounds?

A. That is correct.

Mr. Fowler: There isn't any argument about that, is there?

By Mr. Howland:

Q. All right, go ahead with your answer as to what is shown on page 7 and page 6, page 5, and so forth.

A. We have shown in each instance the amount of revenue moving from these selected points during the period September 1, 1950, to October 31, 1950, as compared to the similar period in the year 1951.

We have shown the amount of the change in the revenues earned between those points during those periods and have

also shown the percent of change. We have shown similar information for the other 2-month periods.

Q. Now, page 6 shows the revenues on freight originating at Des Moines, Iowa, destined to the similar selected points.

A. They are selected points. They aren't identical.

Q. They aren't identical points, but they are selected points?

A. That is correct.

Q. And those figures on page 6 are correct, are they?

A. They are correct, representing revenues earned on [fol. 604] freight moving out of Des Moines, Iowa.

Q. All right. Page 5 is a statement made up in similar form with respect to what station?

A. Cedar Rapids, Iowa.

Q. And page 4 is what?

A. Davenport, Iowa.

Q. To the destinations shown there?

A. That is correct.

Q. And page 3 is what?

A. That is Rock Island and Moline, Ill., to the stations listed.

Q. And page 2 is what?

A. Freight from Chicago, Ill., to the points listed.

Q. All right. Now, what is page 1? What is the purpose of that?

A. Page 1 is made up from the same basic record, but we have taken all of the motor carrier revenue originating at the points listed moving to any destination in order that the result might show the over-all picture rather than the picture at any particular destination.

Q. In other words, the information shown on page 1 of the exhibit marked for identification as No. 15 is all traffic originating at the terminal point listed regardless of destination?

A. That is correct.

Q. So that page 1 will, with respect to Des Moines, Iowa, reflect the revenues of both inter- and intrastate traffic?

[fol. 605] A. That is true.

Q. Whereas, the pages 2 to 7, inclusive, show only the revenue to selected destinations, most of which have been interstate; not all of them, but most of them?

A. Well, it is the traffic that moves between those two points.

Q. That is shown on page 2 to 7?

A. That is correct.

Q. Whereas, page 1 is all traffic?

A. That is true.

Q. And was this statement marked for identification as exhibit 15 prepared by you from your records that are maintained in the usual course of business by the Rock Island Motor Transit Company for the periods indicated?

A. They were obtained from the usual records. They were actually drawn from those records by my assistant.

Q. Were all of the pages of the instrument marked for identification as exhibit 15 prepared under your supervision and at your direction?

A. They were.

Q. And you participated in the making of this survey, did you not?

A. That is true.

Q. Do the figures shown on all pages, do they correctly reflect the results, that is, the gross revenues earned during the periods for which they are shown on all pages of the exhibit?

[fol. 606] A. That is true.

Mr. Howland: At this time we offer and introduce in evidence the pages 1 to 7, inclusive, of the instrument heretofore marked for identification as exhibit 15.

Exam. Carpenter: Any cross-examination?

Mr. Fowler: I will after we convene this afternoon. I have a few questions.

Exam. Carpenter: At this time we will adjourn until 1:30 for lunch.

(At 12 noon, a recess was taken until 1:30 p. m. of the same day.)

AFTERNOON SESSION 1:30 p. m.

Mr. Nolan: Mr. Wahl, will you take the stand?

(Witness withdrawn.)

H. H. WAHL was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation, Mr. Wahl?

A. The name is H. H. Wahl; Victor, Iowa, is the address. I am a partner in the retail lumber firm of Wahl and Dee.

Q. Now, in connection with your lumber business there, do you handle all building supplies?

A. We have a complete line of building materials.

[fol. 607] Q. And how about farm supplies, wire, fencing, and cribbing?

A. We have that, too.

Q. How long has your company been in business in Victor?

A. Since 1928.

Q. There were two lumberyards in Victor at one time; were there not?

A. That's right.

Q. Those are now both under the one management?

A. Yes; since 1940.

Q. Now, Victor is how large a town?

A. About 900, I believe.

Q. Do you have the regular retail establishments there in town common in any ordinary Iowa farming community?

A. That's right.

Q. Now, in regard to your supplies, I assume your lumber comes in in carload lots?

A. That is right.

Q. How about your fencing and things of that character?

A. The bulk of the fencing comes in carload lots as well.

Q. What less-than-carload shipments do you have coming into your place of business?

A. Various items, hardware, builder's hardware, sheet roofing—that is, steel roofing, paints, gates—you might say most of the odds and ends other than strictly building material come in less-than-carload quantities.

[fol. 608] Q. Do you handle the usual run of hog feeders, hog waterers?

A. We do not.

Q. You don't handle that line. I assume some other dealer there in Victor does that?

A. That's right.

Q. Where do you get your supplies which come in less-than-carload quantities, your building hardware and so forth?

A. We get hardware from various points, from St. Louis, Shapleigh Hardware Company, and from our local hardware jobbers at Cedar Rapids, Burlington, Des Moines.

Q. And how about your paints?

A. Paints come from Chicago principally.

Q. What other out-of-State origin points do you have? Do you have shipments coming in regularly to your place of business?

A. Considerable shipments of aluminum windows and related products from the Seco Steel corporation at Peoria.

Q. What transportation system has been handling and bringing to your place of business in Victor these less-than-carload quantities of freight?

A. Rock Island Motor truck.

Q. Has your company used that service over the years?

A. We have since they started service there.

Q. What has been the quality of that service?

A. The service has been excellent.

Q. Victor is on U. S. highway No. 6, is it not?

[fol. 609] A. Yes, sir.

Q. As a matter of fact, the highway runs right through the main part of town, and there are a large number of trucking companies that go through Victor, are there not?

A. Most of the major companies, I think.

Q. Now, have you had occasion to have shipments brought into your place of business by other companies, trucking companies?

A. Very rare occasions.

Q. Do any of these companies make regular stops there other than Rock Island Motor Transit?

A. None to my knowledge.

Q. And in regard to the size of your inbound shipments, does the 5,000-pound limitation interfere with your inbound shipments in any way?

A. On a few commodities it would. I think I mentioned sheet steel, for example.

Q. What would be the size of those shipments ordinarily?

A. That material has been allotted until very recently and the size of the shipment depends on the willingness of the shipper to produce.

Q. Prior to allotment, back before the war, did you have sizable shipments come in by motor truck?

A. Occasionally 6 or 7 tons of merchandise of that nature.

Q. That would come in by truck?

A. That is right.

[fol. 610] Q. Do you have some shipments today which would be in excess of 5,000 pounds?

A. Not regularly.

Q. But would you have an occasional one?

A. Yes; we would.

Q. Occasion to use such size shipments. Do you know of any motor carrier that provides or affords the same service to Victor and to your company as the Rock Island Motor Transit Company does?

A. There is none.

Mr. Fowler: I am going to object to it only as repetition.

By Mr. Nolan:

Q. What would be the effect upon your company's business at Victor if the operation of the Rock Island Motor Transit should terminate or were materially restricted?

Mr. Fowler: Just a minute. That is objected to as immaterial, for the further reason that it assumes facts not established in this record.

Exam. Carpenter: Objection overruled.

A. Why, it would certainly complicate things, everything under carload shipment. I don't know how we would get them in there with any regularity.

By Mr. Nolan:

Q. What would you say the frequency of the ship-

ments that you have coming into your place of business by motor truck is?

A. Daily.

[fol. 611] Q. And they are from these various points you have enumerated, is that right?

A. Yes.

Mr. Nolan: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. How long has it been, Mr. Wahl, since you have had a shipment over 2,000 pounds?

A. Oh, I think perhaps about 10 days ago a large shipment of paint came in.

Q. How much would that weigh?

A. I would guess 2 ton.

Q. 4,000 pounds?

A. Yes.

Q. How long has it been since you had a shipment in excess of 5,000 pounds?

A. I can't tell you.

Q. Been a long time?

A. Well, I don't know.

Q. You must know.

A. I don't pay the freight bills.

Q. Last year or the year before that, 2 years ago; let's put it this way. I am not trying to embarrass you. Let's put it this way: A shipment in excess of 5,000 pounds would be unusual, would it not?

A. Yes.

[fol. 612] Mr. Fowler: That is all.

Exam. Carpenter: Any redirect?

Redirect examination.

By Mr. Nolan:

Q. But you have had shipments come in in excess of 5,000 pounds?

A. We have.

Mr. Nolan: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

A. U. Hauber was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation?

A. A. U. Hauber, Victor, Iowa.

Q. What is your occupation and profession?

A. Pastor of St. Bridgets church, superintendent of St. John's school.

Q. At Victor, Iowa?

A. At Victor, Iowa.

Q. How long have you been located there, father?

A. Four years.

Q. Are you familiar with the subject involved in this case?

A. I am.

Q. And what occasion do you have to use the services of [fol. 613] the Rock Island Motor Transit Company?

A. Well, practically all of our school lunch supplies come in by Rock Island and school supplies and church supplies, practically all supplies come by Rock Island.

Q. And what is the point of origin of the various supplies?

A. New York, Chicago, Milwaukee, Galesburg, St. Louis, and outside of Kansas City, Kans.

Q. You maintain a school lunch program there?

A. We do.

Q. And also school books and supplies?

A. Grade and high school. We supply all books and all school supplies are handled directly through the school.

Q. What would you say would be the regularity of ship-

ments that you have coming into your school and church there?

A. About every 10 days to 2 weeks along there is a shipment comes in.

Q. What would be the size of those shipments?

A. They will range from possibly 2 or 3 hundred pounds up to a thousand pounds regularly.

Q. What transportation facility have you been using to get those shipments in?

A. The only one, Rock Island Motor Transit.

Q. Has that service been satisfactory?

A. It is the only service I have been able to get anything in on in any hurry at all, as far as the freight. The railroad [fol. 614] freight, I haven't been able to get hardly anything under 3 or 4 weeks' time.

Q. Have you had any experience with any other trucking companies bringing in any supplies?

A. Nobody has ever been up to solicit business.

Q. Have you ever had shipments brought in where the shipment was directed by the shipper?

A. No. I have left it to the option of some companies, but the shipment always comes Rock Island.

Q. State whether or not you need a continuation of the present service of the Rock Island Motor Transit Company.

A. We do because without that I don't know how we would get in our school supplies, our groceries, under 3 to 4 weeks' time and especially on these school lunch programs where you have to keep it up every 2 or 3 weeks, you have to have new supplies come in, and it is pretty hard to predict what the supplies are. It is our only definite means of getting things shipped in in a hurry.

Q. What is your school enrollment there, father?

A. 136.

Q. In both grade and high school?

A. Yes.

Mr. Nolan: You may cross-examine.

Mr. Fowler: No cross-examination.

Exam. Carpenter: You are excused.

(Witness excused.)

[fol. 615] JOHN DE SUTTER was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state for the record your name, place of residence, and occupation, Mr. De Sutter?

A. John De Sutter, Victor, Iowa.

Q. You live in Victor, Iowa?

A. Victor, Iowa.

Q. What is your business?

A. I am partner in the Victor Implement and Seed.

Q. And what line of implements do you handle?

A. We handle New Idea and Dunham and then we job odds and ends of everything that way. Seed business, buy and retail both.

Q. Now, what is the origin of your implements, Mr. De Sutter?

A. Well, we get some from Des Moines, some from Sandwich.

Q. Sandwich, Ill.?

A. Sandwich, Ill., and then we get some out of Cedar Rapids, some out of Newton.

Q. Do you handle such items as tank heaters, tanks, hog waterers?

A. Tank heaters, water tanks, hog waterers.

Q. What is the origin of those?

A. We get them out of Des Moines, Waterloo, Cedar Rapids, Kansas City.

Q. What transportation facilities have you been using to get those shipments into Victor?

[fol. 616] A. Rock Island Motor.

Q. What would you say would be the average size shipment that you get in in Victor from outside the State of Iowa?

A. Oh, we have had as high as 2 and 3 inside elevators come out of Morton, Ill., for a corn crib.

Q. What would they weigh?

A. I can't tell you right offhand. They would probably run a couple of tons apiece.

Q. You have had them come in as one shipment?

A. We had as high as three a year ago at one time.

Q. How did they come in?

A. Rock Island Motor.

Q. New Idea Company, they make a line of farm implements, do they not?

A. Haying tools.

Q. Do they make a manure spreader?

A. Manure spreader, a cornpicker, side rake, mower.

Q. How about a hay baler?

A. It is in the process. It isn't out yet. They are making one.

Q. Do you know of any other facility that would bring in these out-of-State shipments to your place of business other than the Rock Island Motor Transit?

A. What do you mean, bring——

Q. Any other transportation company or truck company that would be able to bring these shipments into your place [fol. 617] of business from outside the State or within the State other than Rock Island Motor Transit?

A. We have had awful good service on Rock Island Motor Transit bringing in every day to us.

Q. My question, Mr. De Sutter——

Exam. Carpenter: Let him read the question.

(Question read.)

A. Well, as far as being able to bring it in, I suppose anybody can bring it in, but like I say, we have had good service with the Rock Island Motor.

By Mr. Nolan:

Q. The point of the question is, do you know of any other transportation company that provides or affords or offers that service that the Rock Island Motor Transit Company——

A. No; I don't.

Q. [illegible] offering you?

A. No company has ever offered it to us.

Q. Have you had any experience with any other trucking company bringing merchandise to you?

A. Just a couple of times.

Q. And when was that?

A. Oh, last fall and winter.

Q. Who was that carrier?

A. Iowa-Nebraska.

Q. Have they regularly provided service?

A. No. They picked up some freight in Kansas City and [fol. 618] dropped it off there.

Q. What were the size of those shipments?

A. They would run up a couple of hundred pounds.

Q. Was that at your request——

A. No.

Q. —or was it routed by the shipper?

A. It must have been routed by the shipper.

Q. State whether or not the service which has been provided by the Rock Island Motor Transit, so far as your business is concerned in Victor, is necessary or not.

A. Yes; it is. It has been necessary. We get repair parts from Sandwich and they have been bringing them to us every day for machinery and they have been bringing freight to us every day of the week except Saturday.

Q. Then you have a regular need for daily service, is that right?

A. Yes.

Q. Now, when you get shipments that exceed 5,000 pounds such as those three inside elevators, is that a normal thing in your business?

A. Why, not quite so; no.

Q. How frequently during the year would you require service that could handle shipments in excess of 5,000 pounds?

A. Well, we could have that most any time of the year. We have a shipment from Dunham machinery coming out. They could run more than that. It comes out a couple of [fol. 619] times a year. The same way with New Idea shipments of machinery.

Q. Where one hay baler or side rake might not exceed 5,000 pounds, state whether or not it is customary to order

more than one piece of equipment at a time in your business.

A. Why, yes; it is customary; yes. Most all of it. And on side rakes and mowers, we have five at a time.

Q. What do they weigh apiece?

A. Well, a side rake weighs, I think, 1,100 pounds.

Q. How about a power mower, what do they weigh?

A. I think they weigh 900.

Q. You say you order those in quantities of five?

A. Yes.

Q. Do you get a special discount or something, is that the reason, or is it just practical?

A. It is the way they are set up of making them. They make one line of machinery for a while and then change over to another and you take your quote at one time.

Q. Who is your district representative of New Idea?

A. Bill Coin at Iowa City.

Mr. Nolan: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. From which point do you get these large shipments of implements?

A. Well, the elevators come from Morton, Ill.

Q. Do you handle tractors?

[fol. 620] A. No.

Q. How many of these elevators do you buy at a time?

A. Well, that depends on the cribs going up. Two years ago we sold seven. Last year we sold three.

Q. You order them two or three at a time?

A. No. They usually hold up the orders and ship them together.

Mr. Fowler: That is all.

Exam. Carpenter: Any redirect? You are excused, sir.

(Witness excused.)

JOHN PAWLAK was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation, Mr. Pawlak?

A. John Pawlak, Victor, Iowa.

Q. How long have you lived in Victor?

A. Oh, since 1945.

Q. What business are you in?

A. I am one of three partners in an implement business.

Q. And what line of implements do you handle?

A. Our major franchise, Allis-Chalmers.

Q. Do you handle all the allied and sundry farm items that go along with the implement business?

A. That is right.

Q. You have been in the implement business since 1945 there?

[fol. 621] A. I took up partnership, I think, in 1948.

Q. Now, are you familiar with the transportation facilities that you have at Victor for bringing in shipments from outside the State?

A. I am.

Q. What company has been handling your shipments from outside the State?

A. Rock Island mostly.

Q. Rock Island Motor Transit or Rock Island Railroad?

A. Rock Island Motor Transit.

Q. Where do your farm implement shipments primarily come from?

A. They usually come right from the factory.

Q. Where are the factories located?

A. Most of the smaller implements are made in LaCrosse, Ind.

Q. Where?

A. Indiana.

Q. In Indiana?

A. Yes.

Q. How about the Allis-Chalmers line; are those implements made in Milwaukee?

A. The tractors are made in West Allis, Wis., and combines come from Indiana. Mowers are made in Gadsden, Ala. That stuff usually comes by truck. Cultivators, for instance, are loaded about 35 to a semi truck and they are shipped to our block and from there they are distributed among six dealers.

[fol. 622] Q. And then they are taken by the local trucker to your place?

A. We have to go with our truck and go get them usually.

Q. Did you ever have any of them come in by Rock Island Motor Transit?

A. No; usually not.

Q. Where is the block they are shipped to?

A. Usually shipped to Iowa City and from there they go to Victor, Tipton, down to Kalona, Marengo, and so on.

Q. Now, what need do you have of regular motor carrier truck service in Victor so far as your business is concerned?

A. We don't use Rock Island so much for Allis-Chalmers, but like you say, the rest of the stuff that goes with the business such as replacement tires and batteries and tractor chains and oil and grease and those things come in usually by Rock Island truck.

Q. In other words, the allied or sundry items that go with the farm implement retail business is what you use the Rock Island Motor Transit service for, is that right?

A. That's right.

Q. Do those items come from outside the State of Iowa?

A. A few of them do; yes.

Q. What is the source of supply of those items?

A. Take like V belts such as used on grinders and hammermills come from Webb Belting Company in Kansas City. Henry pulley fasteners I think are made in Iowa, and [fol. 623] Yetter wheel cleaners and things are made in Iowa, but they come by Rock Island.

Q. These shipments of smaller items you have referred to that come in from outside the State, how do they come to your place of business? By what form of transportation?

A. By freight.

Q. What carrier brings them there?

A. Rock Island.

Q. Has that service been satisfactory?

A. It has been very good.

Q. Do you know of any other carrier that provides the same type of service that the Rock Island Motor Transit provides to Victor there?

A. No; I don't.

Q. State whether or not there is a need for a continuation of the Rock Island Motor Transit service to Victor so far as your business is concerned.

A. Yes; I think we need them.

Q. Did you ever have occasion to have shipments in excess of 5,000 pounds of these items come in?

A. No.

Q. So far as your machinery is concerned, that is blocked off?

A. That is usually a block proposition.

Q. And you go and get your——

A. Yes.

Q. —heavier machinery?

[fol. 624] A. Yes. That will run up several tons sometimes, but usually we send our own truck.

Q. It is for these smaller sundry items you need the Rock Island Motor Transit motor carrier service?

A, Yes.

Mr. Nolan: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, your heavier machinery and farm implements, that is shipped to you by the manufacturer with trucks that he picks out; he furnished the transportation service?

A. Yes. We have to pay the freight, but we have nothing to say about who does the work.

Q. That is not Rock Island Motor Transit?

A. No.

Q. You do use the service of the Rock Island Motor Transit and also the services of other carriers in Victor?

A. We have had three stops by Iowa-Nebraska in, I would say, the last 6 months.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. This Iowa-Nebraska operation, is that regular service into Victor?

A. No. They will just show up one day and say, "I have got freight for you," and we never know when they are coming.

[fol. 625] Q. You don't see them again for months, is that right?

A. That is right.

Mr. Nolan: That is all.

Exam. Carpenter: Any re-cross? You are excused.

(Witness excused.)

MANFORD A. RICE was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. Manford A. Rice.

Q. You live where, Mr. Rice?

A. Atlantic, Iowa.

Q. Your occupation is what?

A. Agent for the Rock Island Motor Transit.

Q. At Atlantic, Iowa?

A. At Atlantic, Iowa.

Q. How long have you worked for the Rock Island Motor Transit Company?

A. About 2½ years, sir.

Q. Have you been stationed at Atlantic, Iowa, during all of that time?

A. Most of it; yes. For better than 2 years.

Q. You are assigned as a full-time employee of the Rock Island Motor Transit Company——

A. That is right.

[fol. 626] Q. —to Atlantic?

A. Yes, sir.

Q. Mr. Rice, what facilities does the Rock Island Motor Transit Company maintain at Atlantic?

A. Well, for incoming freight from the east, we have two regular semis that come in from the east.

Q. I am speaking about physical equipment maintained in town.

A. In just Atlantic?

Q. We will go into runs a little bit later.

A. We maintain two delivery trucks and a third one in the afternoon full time.

Q. One on a standby basis?

A. We use it every afternoon.

Q. Every afternoon?

A. Yes.

Q. How many pickup-and-delivery drivers do you have in Atlantic?

A. Three.

Q. Do you have a place of business there?

A. Yes, sir.

Q. Where is that located?

A. That is located at the Rock Island depot, freight depot.

Q. About how much space do you have in the Rock Island freight house to handle your business?

A. Well, I don't know the dimensions of it. I would say [fol. 627] it was about a hundred by, I think it is about 40 feet.

Q. Do you maintain your office——

A. Yes.

Q. —in the same building?

A. Yes, sir.

Q. Now, I will ask you, Mr. Rice, with respect to the service that you have into Atlantic from the west, what runs do you maintain at this time?

A. Well, from the west we have one semi come in.

Q. What time is that scheduled to arrive?

A. That is scheduled to arrive about midnight, coming into Atlantic and going back west to Omaha, it leaves about 4 in the morning.

Q. What time does that run leave Omaha, Nebr.?

A. I think it is scheduled to leave out of there, I believe it is 10:30 or 11.

Q. Is that a regular daily?

A. That is daily, 6 days a week.

Q. Six days a week?

A. Yes, sir.

Q. Now, what other service do you have from the west into Atlantic?

A. Well, that is the only one we are maintaining right at the present.

Q. Now, do you have some service into Atlantic from the east?

[fol. 628] A. Yes; we do.

Q. Describe that and tell the examiner what that service consists of.

A. We have two semis come in every morning 6 days a week.

Q. About what time?

A. Those are scheduled to arrive in Atlantic at 7 a. m. in the morning.

Q. Those come from what point?

A. Those both come from Des Moines.

Q. Is one of those what is known as the Audubon peddle run?

A. Yes, sir.

Q. What is customarily loaded into that semi prior to the time it reaches Atlantic?

A. Well, it has Audubon in the nose and then it has Exira and Brayton and then Atlantic freight filled on the back.

Q. In other words, that unit brings in freight for what you might refer to as Atlantic proper or destined to Atlantic?

A. That is right.

Q. And it also brings in the freight from the east destined to points on the Audubon branch run?

A. That is right.

Q. And these towns that you have referred to of Lorah, Brayton, Exira are small towns intermediate between Atlantic and Audubon, Iowa?

A. That is right, sir.

[fol. 629] Q. That gets in about 7 o'clock in the morning. Is any freight added at Atlantic on that run?

A. Yes. Through freight from Omaha and western points is loaded on that truck and taken north to Audubon, Exira, and Brayton, and Hamlin.

Q. And into Audubon?

A. Yes, sir.

Q. All right. Now, the other unit that you have regularly coming in from the east carries what type and character of freight?

A. Well, there is all types of freight on it. That is a 36-foot tandem and that carries all types of freight for Atlantic proper.

Q. It handles Atlantic freight, and does that run stop at Atlantic?

A. Stops at Atlantic.

Q. That brings in Atlantic proper freight?

A. Yes, sir.

Q. And terminates its run at Atlantic?

A. Yes, sir.

Q. And that is scheduled to arrive at 7 a. m., is that right?

A. Yes; that is right.

Q. How many days a week does that run operate?

A. Six days, and we also have—now, I didn't mention that before, but we also have this night truck I mentioned that comes from Omaha, comes on into Des Moines, that [fol. 630] leaves off freight for Audubon and Exira. Also, on its return trip back to Omaha that leaves off freight for Harlan, Iowa, Avoca, Walnut, and Marne, Iowa.

Q. This run that comes in from Omaha and which arrives in Atlantic shortly after midnight then departs from Atlantic going west, you say, at around 4 o'clock in the morning?

A. That is right.

Q. And that handles freight for what points west of Atlantic?

A. Well, on into Omaha.

Q. It returns to Omaha then?

A. That is right.

Q. Leaving about 4 o'clock in the morning?

A. That is right.

Q. But it passes, instead of going on U. S. highway 6, it goes up through Marne?

A. No, no; it goes back on 6. We have a run out of Atlantic for Harlan and Avoca.

Q. That is a separate run?

A. That is another run.

Q. There is a turn-around run then from Omaha into Atlantic arriving——

A. No; that goes on through to Des Moines. That is a night truck. That leaves Omaha about 11, comes into Atlantic and leaves off freight for Harlan, Avoca, Walnut, Marne, and Audubon and Exira and Brayton, and then comes into Des Moines.

[fol. 631] Q. That truck then leaves Atlantic and comes into Des Moines?

A. Into Des Moines.

Q. What time is that scheduled to leave Atlantic?

A. That I can't tell you. It comes in in the night and I don't know what time that gets all through and leaves Atlantic.

Q. As soon as the——

A. Freight is unloaded, why, it comes on.

Q. As soon as the work is done, it departs from Atlantic to Des Moines?

A. That is right.

Q. What about this run that you say goes over Iowa highway 83, serving Marne and Harlan and——

A. Walnut and Avoca.

Q. Walnut, Shelby, Avoca, Minden, and those points?

A. That leaves Atlantic at about 8 o'clock in the morning and we peddle store-door in Walnut, Marne, and Harlan and return to Atlantic.

Q. That comes back to Atlantic then?

A. That comes back to Atlantic. We use a small truck to store-door.

Q. And that performs morning delivery service?

A. That is right.

Q. To those points?

A. To the customers at those points.

Q. Is there any other service regularly maintained at

[fol. 632] Atlantic other than the runs that you have told us about?

A. No; that is the only runs that we operate.

Q. What other carriers at present other than the Rock Island Motor Transit Company maintain agents—that is, company employees—in the City of Atlantic?

A. No other carrier.

Q. No other carrier that maintains——

A. Not that maintains a company employee.

Q. There are certain carriers that serve Atlantic other than the Rock Island Motor Transit. Will you name those within your knowledge?

A. Well, Iowa-Nebraska and Watson are your main two. I think Des Moines Transit occasionally stops into Atlantic. I understand they do have right. However, they do interline a lot of stuff with us and we take it in there, but Iowa-Nebraska and Watson are the main two.

Q. What type of terminal facilities do Watson Bros. and the Iowa-Nebraska companies maintain at Atlantic?

A. Truthfully, I can't answer that. I have never been in their terminal.

Q. Do they have separate terminals——

A. No, sir.

Q. —of their own?

A. No, no.

Q. Or do they dock with a transfer company?

[fol. 633] A. They dock with a transfer company.

Q. What company is that?

A. That is Smiley Transfer.

Q. All right. How many men do you employ on the dock at Atlantic?

A. One man.

Q. One regular man?

A. Yes. I use one of my drivers. That is why I said one in just the afternoon. We use one of our drivers for dock in the forenoon.

Q. That is in addition to the one?

A. No; I have three men. Three men and I use one of them in the forenoon.

Q. At the dock?

A. Yes.

Q. Now, what forces handle the loading and the transfer of the truck that goes up to Audubon?

A. My one man helps the over-the-road driver.

Q. Do you have an office force?

A. Yes, sir.

Q. What does that consist of?

A. Well, my rate clerk, manifest clerk, billing clerk, and general office work.

Q. One full-time clerical employee?

A. Yes; there from 7:30 in the morning until 5 in the afternoon.

[fol. 634] Q. Prior to sometime about November or prior to September, 1951, were there certain additional runs that you had at that time other than the ones that you have at the present?

A. Yes.

Q. What difference was there in the number of runs or in the number of employees you had in Atlantic prior to that time as compared with the present?

A. Well, our force in Atlantic has been the same. We haven't had to lay off any men because of it, but there have been truck schedules that we have had to take off.

Q. Well, that is what I have asked you about. Explain that.

A. Our Lincoln truck has been taken off and also our extra trucks that did run and maintain schedules into Omaha through from Des Moines have been eliminated.

Q. That was one run?

A. No; it was two.

Q. That is, there was——

A. Two trucks.

Q. There was the Lincoln run. Was that a run that originated at Atlantic?

A. No; that originated at Des Moines.

Q. That originated at Des Moines and terminated at Lincoln?

A. That is right.

Q. But passed through Atlantic?

A. Passed through Atlantic and oftentimes left us a lot [fol. 635] of freight. Speeded up our operations a little.

Q. The other run that has been eliminated is an Omaha-Des Moines run?

A. That is right.

By Exam. Carpenter:

Q. Is that Lincoln, Iowa?

A. Lincoln, Nebr.

Mr. Howland: No; Lincoln, Nebr., Mr. Examiner. I think you may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, the Rock Island Motor Transit and the Rock Island Railroad have their freight terminals in the same building?

A. That is right, sir.

Q. That is in the railroad depot of the Rock Island Railroad?

A. That is right.

Q. Now, what kind of a dock force does the Rock Island Railroad have at Atlantic?

A. The Rock Island rail has only one dock man and their dock is— However, we do use the same dock, but we have a division line and they maintain their own dock and we maintain ours.

Q. It is an open——

A. It is open; yes.

Q. It is all right on the same platform?

A. It is all right on the same platform; yes.

[fol. 636] Q. And do you have a pickup-and-delivery truck there?

A. In Atlantic, we have three of them.

Q. You pick up railroad freight as well as motor carrier freight?

A. Yes.

Q. In other words, the same driver picks up the freight irrespective of whether it is railroad or motor carrier freight?

A. That is right.

Q. Who owns the pickup-and-delivery truck?

A. Rock Island Motor Transit.

Q. Who pays the driver?

A. Rock Island Motor Transit.

Q. Do you keep any record of the railroad freight that the Rock Island Motor Transit Company picks up?

A. Yes; we do.

Q. And when the driver comes down to the freight depot, does he unload it right there on this open platform?

A. He unloads at the rail end; yes, sir.

Q. At the rail end?

A. Yes, sir.

Q. In addition to this pickup service, I suppose you also use the same truck for delivery?

A. That is right; we do.

Q. So what happens as far as the pickup-and-delivery service is concerned, the rail-billed freight and the motor-carrier-billed freight is just handled all together by the pickup?

[fol. 637] A. Yes.

Q. The rail-billed freight is loaded on the over-the-road truck along with the motor carrier-billed freight, is that correct?

A. Small shipments; yes.

Q. Is there any way-freight service by rail for l. c. l. shipment maintained out in that territory around Atlantic?

A. I'm sorry. I didn't——

Exam. Carpenter: Read the question.

(Question read.)

By Mr. Fowler:

Q. For instance, what I am trying to get at, is there an l. c. l. rail service available at such towns as Marne, Walnut, Avoca?

A. Not Marne. Marne no longer has a station.

Q. And that would be true of Minden?

A. Wild, of course, we won't mention that, but there are some towns where they are no longer maintained.

Q. Generally speaking, as I understand it, the local l. c. l.

way freight service by railroad out in that territory to these small towns has been abandoned?

A. Eliminated; yes.

Q. In its place you substituted this motor truck service?

A. That is right.

Q. And you handle intermingled either rail-billed freight or motor carrier-billed freight?

A. Well, now——

[fol. 638] Q. On l. c. l.?

A. Yes.

Q. L. t. l. shipments?

A. Yes.

Q. I suppose on carload shipments, there is still rail service?

A. Yes; I think there is.

Q. Now, with respect to an interstate shipment of a thousand pounds originating at Chicago destined to Atlantic, Iowa, how would it be handled in your present operation?

A. It would come to Des Moines and then be transferred over onto our truck that comes to Atlantic.

Q. In other words, it would be transported by truck from Chicago to Des Moines and then reloaded on——

A. Atlantic truck.

Q. —the Atlantic truck that peddles out of Des Moines, is that right?

A. That is right.

Q. How would a 500-pound shipment originating at Moline, Ill., destined to Atlantic, Iowa, get in?

A. It would be handled the same way. It would be brought into Des Moines and then loaded onto our truck to Atlantic.

Mr. Fowler: That is all.

Exam. Carpenter: Any redirect?

Redirect examination.

By Mr. Howland:

Q. Mr. Rice, you are referring, in response to certain

APPEALS FROM THE U[illegible]ED STATES DISTRICT COURT FOR THE DISTR[illegible] OF COLUMBIA

NO. 101 FILED MAY 22, 1956
NO. 110 FILED MAY 24, 1956
PROBABLE JURISDICTION NOTED OCTOBER 8, 1956

[fol. 639] questions by Mr. Fowler, as to the transportation of rail freight from either Chicago or Moline, Ill., to Atlantic, Iowa.

A. That was motor freight that he asked about.

Q. No; he was talking about rail freight. What is what I want to ask you about particularly.

A. Now, your rail freight——

Exam. Carpenter: Wait a minute. Ask your question, Mr. Howland.

By Mr. Howland:

Q. On a railroad shipment from Chicago, Ill., to Atlantic, Iowa, are you familiar with the handling which is now given that?

A. Yes; I believe I am.

Q. All right, tell us what it is.

A. It will come from Chicago to Des Moines by boxcar and distributed on small shipments, it comes both ways, by boxcar on into Atlantic or by truck.

Mr. Fowler: May I ask you a question, Mr. Howland?

Mr. Howland: Yes.

Mr. Fowler: Why is that, because of the restriction?

Mr. Howland: Because of the key-point restriction.

Mr. Fowler: At the Tri Cities.

Mr. Howland: No; at Des Moines.

Mr. Fowler: Oh, I see.

By Mr. Howland:

Q. And a shipment from Moline, Ill., would also move [fol. 640] by boxcar——

A. That is right.

Q. —as far as Des Moines and then be transferred onto the Rock Island Motor Transit Company truck?

A. It is my understanding; from Moline I am sure that is right.

Q. In the event there was a heavy piece of l. c. l. freight that might require the facilities of a boxcar for handling, that may be brought on into Atlantic by boxcar?

A. We had one yesterday. That is right. It did.

Q. Who is it that handles the collection of the freight bills for rail freight?

A. The rail.

Q. The rail agent?

A. Yes.

Q. Who is it that bills out and handles any rail freight that moves out of Atlantic?

A. The rail.

Q. Have you solicited rail freight in Atlantic?

A. No, sir.

Q. Has the rail agent solicited truck-billed motor transit freight?

A. I hope not. I don't know.

Q. You don't have any knowledge of that——

A. No; I have no knowledge of it.

Q. —of his performing any solicitation service for your [fol. 641] company, have you?

A. No.

Exam. Carpenter: Any re-cross?

Re-cross examination.

By Mr. Fowler:

Q. Mr. Rice, it doesn't make any difference to you who solicits it so long as the Rock Island Railroad gets it?

A. As long as the Rock Island rail—I am interested in Rock Island Motor because they pay my bills and pay my salary. The rail has nothing to do with that.

Q. Aren't you working for the Rock Island Railroad?

A. I am working for Rock Island Motor Transit.

Q. Who is the Rock Island Motor Transit?

A. Maybe they are indirectly connected with the rail, but Rock Island Motor Transit signs my pay checks, so——

Q. It doesn't make much difference to you whether Aunt Lizzie or Aunt Susie gets the freight, does it? I am serious about that.

A. I know you are. Well, primarily, as long as I have my job, the rail has not paid any of my bills.

Q. But no matter who solicits, who gets it, it is all handled on the same truck, isn't it?

A. To a certain extent: yes.

Mr. Fowler: That is all.

Exam. Carpenter: Any redirect?

Mr. Howland: Nothing further.

[fol. 642] Exam. Carpenter: You are excused.

(Witness excused.)

O. A. MEREDITH was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. O. A. Meredith.

Q. Your home is where, Mr. Meredith?

A. Atlantic, Iowa.

Q. I believe you are interested in a hardware and implement business at that point.

A. Yes, sir.

Q. Do you have stores located at any point other than Atlantic, Iowa?

A. At Griswold, Iowa, we have.

Q. At Griswold, Iowa?

A. Yes, sir.

Q. Atlantic is a town of about what size?

A. 6,000.

Q. It is located about 86 miles west of Des Moines on U. S. highway 6?

A. Yes, sir.

Q. Griswold, Iowa, is located where with reference to Atlantic?

A. It is located about 18 miles to the southwest.

Q. And about what is the population of Griswold?

[fol. 643] A. 1500.

Q. And Griswold has what in the way of manufacturing facilities or companies? Describe the type and character of the business at that point.

A. My particular business?

Q. No; business generally in Griswold.

A. It has one factory, a factory that manufactures oil burners, lawn mowers, and does some custom manufacturing. The other businesses in the town are mainly retail.

Q. It has the usual service and retail establishments to serve a farming community?

A. Yes, sir.

Q. That you customarily find in the State of Iowa?

A. Yes, sir.

Q. Has a trade territory immediately surrounding the town extending for some miles in each direction?

A. Yes.

Q. Atlantic is a distributing center for that area and has what types of industry?

A. Well, they have a popcorn manufacturing plant, a mineral feed plant. They have a chemical processing plant there. They have one wholesale establishment. They have three wholesale establishments, excuse me, and the rest of the business is mainly retail.

Q. Retail and the service of var. us types?

[fol. 644] A. Yes, sir.

Q. Now, what particular business do you handle at Atlantic?

A. The nature of the business?

Q. Yes.

A. We handle farm equipment, well and water supplies, hardware, farm implements, and coal.

Q. Do you have a particular line of farm implements that you sell at retail?

A. We have several lines. Probably the best known of them is the New Idea line. We also handle the Dunham line, Roderick Lean and several short lines, no major line.

Q. Now, what is your source of supply for your implements and hardware lines, source or sources?

A. Well, we get shipments from Lexington, Ky., St. Louis, Mo., Minneapolis, Minn., Chicago, Ill., Omaha, Nebr., Des Moines, Iowa, Ottumwa, Iowa, St. Joseph, Mo. That about covers it.

Q. I take it then you are interested in transportation

service from points outside the State of Iowa serving Atlantic, Iowa?

A. Yes, sir.

Q. What service by motor carrier have you been utilizing at Atlantic in recent months or years?

A. Mainly the Rock Island Motor Transit. In fact, we specify them on most—we have specified them on all our shipments, but we do have service from Watson, Iowa-Nebraska, and Bos. There may be others. Those are the three main ones.

[fol. 645] Q. Those are the three principal ones that you know of. Does the Iowa-Nebraska Transportation Company have a company representative in Atlantic other than the local drayman there?

A. No, sir.

Q. How about Watson?

A. They haven't either.

Q. In other words, I take it that both those companies maintain their local service through some local drayman or local transfer company?

A. Yes, sir.

Q. How about the Bos company?

A. Box company uses the same drayman. All three of those companies use the same drayman.

Q. They all three have the same drayman?

A. Yes.

Q. About what would be the size of the shipments that you would ordinarily receive in the course of your business at Atlantic, Iowa, and about how often do you— First, I will ask, about how often do you have occasion to receive shipments at Atlantic from points outside the State of Iowa?

A. Oh, every 3 days, I would say on an average.

Q. And about what size would these shipments run in weight?

A. Well, they will vary—you are speaking of l. c. l. shipments now?

Q. Yes; other than carload shipments.

[fol. 646] A. They will run from a minimum shipment of 150 pounds up to 6,000 pounds.

Q. Up to 6,000 pounds?

A. Excuse me. 6,000 pounds; yes, sir.

Q. Have you had occasion in the past to have deliveries made to your place of business there in Atlantic by these other carriers such as Watson Bros., Iowa-Nebraska, and Bos?

A. Yes, sir.

Q. And about how frequently has that been true?

A. Well, I don't quite understand the question.

Q. You say you have shipments coming in at least twice a week from points outside the State of Iowa. Now, in connection with these shipments, what company has performed the transportation service into Atlantic in most instances?

A. It would be Rock Island Motor Transit.

Q. The Rock Island Motor Transit Company?

A. Yes, sir.

Q. And you have had some shipments in by these other three lines that you have referred to?

A. Yes. The shippers sometimes sent through those other lines.

Q. When you specify the routing, you specify Rock Island Motor Transit, I take it?

A. Yes, sir.

Q. All right. How *has* the service that has been rendered to you by these other motor carriers compare with [fol. 647] the service rendered by the Rock Island Motor Transit, Mr. Meredith, as to regularity or as to the time of arrival?

A. From our standpoint, the other carriers have been decidedly inferior in service to the Rock Island Motor Transit.

Q. In what respects?

A. One being the speed with which the shipments come. Another being the fact that we have no indication that they audit the rates, and when there is an over-charge we have considerable time getting the matter straightened out. In the case of lost or delayed shipments, we haven't yet found a satisfactory way to trace them.

Q. What has been your experience with respect to handling and servicing of claims for loss or damage?

A. They have been very slow---oh, three times as slow,

say, as the Rock Island Motor Transit has been in responding to them and clearing them up.

Q. Would it be correct to state that as far as your relations with the carriers serving Atlantic, Iowa, Mr. Meredith, that the service rendered by the Rock Island Motor Transit Company with respect to the time involved in performing the transportation service and in respect to tracing and handling of claims and similar matters, that the service performed by the Rock Island Motor Transit Company has been superior to that of the other three concerns mentioned?

A. Decidedly.

[fol. 648] Q. Now, down at Griswold you have a place of business there. What do you handle at that point?

A. We handle farm equipment and seeds, hardware, and well and water supplies there, too.

Q. I take it that the source of supplies for the Griswold store would be substantially the same as you have told us about with respect to the Atlantic establishment.

A. Yes, sir.

Q. Now, what service do you have at Griswold, Iowa, in the way of motor carrier freight service on inbound shipments?

A. We have the Rock Island Motor Transit, Thornton Transfer, who operates between Griswold and Omaha, Nebr., and McVey Transfer operating between Greenfield, Iowa, and Omaha, Nebr.

Q. Do those latter two carriers named operate over highways that lie to the south of U. S. highway 6 between Griswold and Omaha?

A. Yes. They both operate over that.

Q. I take it you have had some occasion to have shipments coming in to your Griswold place of business over these other carriers that you have referred to.

A. Yes.

Q. Generally speaking, how is the service performed by Thornton Transfer and this McVey Transfer Company compared with the service that you have had at Griswold from the Rock Island Motor Transit?

A. The Rock Island Motor Transit has been, in our ex-
[fol. 649] perience, the best available means of transportation to Griswold.

Q. You say that Thornton operates between Griswold and Omaha, Nebr., and that McVey operates between Greenfield and Omaha, Nebr. A shipment handled by either of those carriers would necessarily have to move into Omaha, Nebr., and there be interchanged to either the Thornton or the McVey line, is that true?

A. Yes, sir; that is true.

Q. What is the fact as to whether that additional transportation and the interchange with the connecting lines at Omaha increases the over-all time in transit?

A. I don't think I got your question.

Q. As compared with Rock Island Motor Transit?

A. Apparently, it is a delay in doing that because we have found through experience we can get faster service through Rock Island Motor Transit.

Q. How has the service of these other carriers been with respect to tracing shipments or handling or processing claims compared with that of the Rock Island Motor Transit, if you have had any experience?

A. We have had no experience with McVey on any— We very rarely had shipments come in through McVey, and Thornton, Rock Island Motor Transit is superior in that respect.

Q. Now, Mr. Meredith, you are familiar with the fact that since about November 3, I believe it was, 1951, Rock Island Motor Transit Company has been operating under a [fol. 650] maximum restriction of 5,000 pounds on motor carrier freight. Does that have any effect on your business either at Atlantic, Iowa, or at Griswold, Iowa, with respect to your transportation requirements?

A. Yes.

Q. Explain in what way.

A. One example is the carrying of these farm implements. In the case of manure spreaders, if bought in quantities of four, the purchaser gets an additional 2 percent discount, so it is to our advantage to purchase them in lots of four.

The weights on those spreaders run all the way from 1,200 up to 1,550 pounds, and the bulk of the business we have been doing this year particularly has been in the 1,550-pound class, which of course would take it over the weight limit set down.

Our fill-in on woven wire, we would have several shipments that would exceed that limit.

In the case of farm seeds—this is applying to the Griswold store and not to the Atlantic store—shipments that would exceed that weight wouldn't be out of the ordinary.

Q. That is in the seed business which you handle at Griswold, you frequently have occasion to make purchases and make a single shipment in excess of 5,000 pounds?

A. Yes.

Q. That is somewhat seasonal, of course?

A. Yes, sir.

Q. But yet it is a part of your business at the Griswold store?

[fol. 651] A. Then paints, the way most of these paint companies do business, the ones we deal with anyway, they come along in the spring and take a spring order. It doesn't have to be paid for until we have half the paint already sold, so it is to our advantage to get a big order in on that and get most of our paints at one time, and those will run over the restriction.

Q. Over the 5,000-pound maximum?

A. Yes, sir.

Q. From what point do you customarily receive shipments of paints?

A. The paints on these big orders come from Lexington, Ky.

Q. Lexington, Ky. Mr. Meredith, the Rock Island Motor Transit Company at present is operating only on purely temporary authority as a motor carrier, and this hearing is for the purpose of making that authority permanent. Would the termination of the Rock Island Motor Transit Company service into Atlantic or into Griswold have any effect upon your business?

Mr. Fowler: That is objected to as immaterial.

What was that question again?

(Question read.)

Q. Mr. Fowler: Objected to as immaterial, assuming a fact not established in this record.

Exam. Carpenter: Overruled.

By Mr. Howland:

Q. You may answer the question.

A. In my opinion, it would. It would increase our cost of doing business. Our freight last year ran almost 6 per-
[fol. 652] cent of our net sales, and by taking the Rock Island out I believe that the overhead in freight would increase because of the trouble and time we have to put in trying to get these confusing matters straightened out that often arise in the freight business.

Q. Would you say that a continuation of the business of the Rock Island Motor Transit Company, both to Atlantic and to Griswold, on the motor carrier basis is necessary in order to continue adequate service to those communities?

The Witness: Could I have that question?

Exam. Carpenter: Please read the question.

(Question read.)

A. Yes; I believe so.

By Mr. Howland:

Q. One thing I omitted to ask you about. Atlantic, of course, is on the Des Moines-Omaha-Lincoln-Denver line of the Rock Island Railroad. What rail service does Griswold have?

A. Griswold has service from the south, from Red Oak, Iowa, a branch line running from Red Oak, Iowa, to Griswold, a branch of the Burlington railroad.

Q. Formerly back some 10 years ago, the Rock Island Railroad did have a branch line into the town of Griswold?

A. Yes, sir.

Q. To your knowledge, has the Burlington Transportation Company ever performed any service into Griswold, Iowa?

A. The Burlington Transportation is a truck line?

[fol. 653] Q. Yes, sir.

A. No, sir; not to my knowledge.

Mr. Howland: You may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross examination.

By Mr. Fowler:

Q. Mr. Meredith, on your shipments originating at Omaha to Atlantic, Iowa, what difference would it make in the service you are receiving from the Rock Island whether this application is granted or not?

A. Could I have that question again?

Exam. Carpenter: Read the question, please.

(Question read.)

A. As I understand, if the application isn't granted, then the Rock Island won't make deliveries in Atlantic.

By Mr. Fowler:

Q. Don't ask me. I am not speaking for the Rock Island Railroad.

A. Oh, the railroad.

Q. I was wondering what you had in mind.

A. Are you speaking of the railroad service?

Q. I am speaking of the combination of the railroad and the Rock Island Motor Transit Company. They are all one and the same thing. You know that, don't you?

A. Well, to us they are two separate facilities.

Q. I understand. What difference would it make, so far as you are concerned on those shipments I have just [fol. 654] described, whether this application is granted or not?

A. I don't know what effect it would have if the application were not granted. If we depended on rail shipments solely from Omaha, then we would have to look for another means of transportation because rail service from Omaha is poor.

Q. You understand, do you not, that the Rock Island Railroad have authority to handle rail shipments by truck at the present time? Did you know that?

A. I didn't know that, sir.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. Mr. Meredith, in the event that this application was denied, do you understand that the Rock Island Motor Transit Company would be unable to handle any shipments on motor carrier billing, would be unable to perform any interline motor carrier service to and from Atlantic, Iowa?

A. Do I understand that?

Q. Yes.

A. That was my understanding.

Q. That was your understanding. Would the elimination of that interline service at Omaha have any effect upon your business either at Griswold or at Atlantic?

A. I believe it would have a definite effect.

Q. In the event that the service by motor truck from [fol. 655] points of origin outside the State of Iowa was such it would require transportation by boxcar to Des Moines by the Rock Island Railroad and truck service beyond, would that have any effect on your business?

A. Yes, sir. It would be quite a bottleneck.

Q. Explain why that would be true, in your opinion.

A. Well, the rail shipments at best in carloads, say, from Illinois take approximately 12 days. Now, from Illinois, I mean from the coal mines in southern Illinois. From northern Oklahoma, 2 weeks. With that experience, I would think it would be a definite slow up to have them handled by rail part way.

Q. That is, have them handled by rail as far as Des Moines, Iowa, and then a transfer of these l. c. l. shipments——

A. Yes.

Q. ——to the truck line at Des Moines. You believe that type and character of service would be adequate for Atlantic and Griswold, Iowa?

A. I don't believe so, sir.

Mr. Howland: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: A 5-minute recess.

(Short recess.)

BRUCE ROBINSON, was sworn and testified as follows:

[fol. 656] By Mr. Howland:

Q. Will you state your name so that we can all get it, please?

A. Bruce Robinson.

Q. You live where, Mr. Robinson?

A. In Atlantic.

Q. Your business is what?

A. Retail hardware and furniture, too.

Q. At what points do you have a store or stores?

A. We have a store in Atlantic and also one in Wiota. It is a town about 5 or 6 miles east of Atlantic.

Q. Wiota is located immediately adjacent to U. S. highway 6 east of Atlantic, is that right?

A. That's right.

Q. About what is the population of Wiota?

A. Oh, approximately 300, I think.

Q. What type of business do you have at Atlantic?

A. We have general hardware, paints and things of that kind. No farm supplies there to speak of; that is, like fencing or tractors or anything of that kind. No large stuff.

Q. Does your business there include some furniture lines and appliances as well?

A. Yes. Really operate three stores. We have two stores in Atlantic.

Q. You have two stores in Atlantic?

A. Yes; furniture and appliance store besides the hardware store.

[fol. 657] Q. Besides the hardware store, and those are operated under a common management, but the stores are in two different establishments?

A. Well, really two separate managements.

Q. But you are interested in both of them, I take it?

A. Yes, sir; that is correct.

Q. First with respect to your hardware business, what are the sources of supply from which you purchase your hardware lines; that is, at what points are they located, not necessarily the names of the companies, but the origin?

A. Some from Omaha, Des Moines, Ottumwa, Iowa and Chicago, Ill.

Q. And the furniture and appliance store, your sources of supply are located where principally?

A. Principally Omaha, Des Moines, some from Chicago and points in Missouri.

Q. Do you have occasion to make carload shipments from these points or is your principal business in the less-than-carload or less-than-truckload shipments?

A. Well, the principal shipments would be less-than-carload shipments.

Q. About how frequently do you have occasion to make shipments of the character that you have referred to from points outside the State of Iowa?

A. Oh, several times a week on the average.

Q. Would it be almost a daily occurrence?

[fol. 658] A. I would say it would be at least 4 days a week.

Q. And about what size in pounds or weight would these shipments be?

A. Oh, they usually run from 2 or 3 hundred on up to a couple of thousand pounds.

Q. Now, with respect to the hardware lines, does that include paints and matters of that sort?

A. Yes.

Q. What carrier has been providing the transportation service on your inbound shipments there to Atlantic in the past?

A. Mainly the Rock Island Motor. We get some through the Iowa-Nebraska.

Q. From Omaha?

A. From Omaha; we don't request that routing, but some companies prefer that, so we allow it.

Q. Now, what companies perform your transportation service from Chicago to Atlantic or from west Missouri points into Atlantic?

A. We usually route them truck, but naturally they

would be carried by some foreign truck line I wouldn't be familiar with.

Q. But in coming into Atlantic, they would arrive, I take it, by——

A. Rock Island.

Q. —by the Rock Island Motor Transit Company. In the event that the Rock Island Motor Transit Company service as a motor carrier from eastern points to Atlantic, [fol. 659] Iowa, were eliminated or that the motor carrier service from Omaha, to Atlantic, Iowa, were eliminated or substantially curtailed, would that have any effect on your business?

Mr. Fowler: Just a minute. That is objected to as immaterial, assuming facts that are not established in this record.

Exam. Carpenter: Objection overruled.

A. It would inconvenience us, I would say, considerably.

By Mr. Howland:

Q. In what respect? Explain that.

A. Well, it would slow down shipments no doubt, especially if we had to ship by rail, because rail freight—well, to start with, they do not have daily less-carload, daily local freight into Atlantic. I would say about 2 or 3 days a week—I am not sure about that, but it wouldn't be daily we know. That would make a difference, and it would make a considerable difference to our Wiota store because we depend exclusively there on Rock Island Motor Transit.

Q. Your Wiota store also has occasion to make these shipments both from Omaha and from the east?

A. Yes. We handle a heavier type of merchandise there, and of course it would worry us quite a little if we didn't have good service there.

Q. Now, particularly in the Wiota store, do you have occasion to make heavier shipments or in heavier commodities?

A. Yes.

[fol. 660] Q. Explain that, please.

A. We handle fencing, steel posts, tanks, steel tanks, and

stock feeders, hog feeders, and quite a lot of the heavier items there.

Q. Carry a general line of farm supplies and equipment?

A. That's right.

Q. At that point. As I understand it, at your Wiota store, you don't handle the implement lines as such?

A. No.

Q. But it is more a matte of general supplies?

A. That is corect.

Q. Are you interested in any hardware stores other than Atlantic and Wiota?

A. No.

Q. In the event of a substantial curtailment or the total elimination of this motor carrier service, you say that that would have an even greater effect at Wiota than it would at Atlantic?

Mr. Fowler: That is objected to as immaterial, assuming facts not established in this record.

Exam. Carpenter: Objection overruled.

A. Yes; it would, due to more than one factor. Wiota is what you would call a flag stop. They have no agent there on the rail, and we would have to depend on truck service there entirely, and the only two that we ever do get any freight on is the Rock Island Motor Transit, and as I said, occasionally some company may route something [fol. 661] through by Iowa-Nebraska.

Q. Iowa-Nebraska. So far as you are advised, is there any other carrier that renders any service to the town of Wiota?

A. Well, we don't see them there. I suppose Watson could.

Q. Has Watson customarily performed a service into Wiota, as you have observed it?

A. I can't recall of seeing their truck in town recently at all, within the last 6 months or a year.

Q. Have you ever been solicited by Watson Bros. for shipments into Wiota?

A. No; never.

Q. Now, Mr. Robinson, what would you say as to whether the requirements of the Atlantic community and the re-

quirements of the Wiota community require a continuation of the Rock Island motor carrier service that has been rendered in the past?

A. I didn't just get the question.

Exam. Carpenter: Read the question.

Mr. Howland: I think the question may be a little confusing. I will withdraw it.

By Mr. Howland:

Q. First let me ask you this: Do you have occasion in connection with your Wiota store to receive shipments in excess of 5,000 pounds?

Mr. Fowler: That is objected to as repetition.

Mr. Howland: I don't believe I have covered it.

Exam. Carpenter: I don't believe you asked that.

[fol. 662] Mr. Fowler: Okay. I will withdraw the objection.

Exam. Carpenter: Objection overruled.

A. Yes; we do, perhaps a couple of times a year.

By Mr. Howland:

Q. And what type and character of shipments would that be?

A. That would be mainly fencing, nails, and heavier items.

Q. Heavier hardware or farm supply lines?

A. That is correct.

Q. Now, in your opinion as a business man interested in these stores, would the elimination or substantial curtailment of the Rock Island service, Rock Island Motor Transit Company motor carrier service, to Wiota and to Atlantic have any effect on those communities?

Mr. Fowler: Objected to as repetition. Objected to as immaterial. Objected to because of the fact that it states facts not established in this record.

Exam. Carpenter: Objection overruled.

A. I think it would inconvenience the community very much because they are accustomed to good service from the

Rock Island Motor and one of the main reasons I would say that is that no other trucking company has the dock facilities for accommodating such shipments and service to the community as the Rock Island Motor has.

By Mr. Howland:

Q. Have you had any experience with the service of other carriers besides the Rock Island Motor Transit with [fol. 663] respect to tracing of shipments or the handling or processing of claims for loss or damage?

A. Yes. They have been handled much more efficiently by the Rock Island than they have by—I will name the Iowa-Nebraska and Watson. Those two are very careless with such things.

Mr. Howland: You may cross-examine.

Mr. Fowler: No cross-examination.

Exam. Carpenter: You are excused.

(Witness excused.)

DON C. MITCHELL was sworn and testified as follows:

Direct examination

By Mr. Howland:

Q. Will you state your name, please, so that we may get it?

A. Don C. Mitchell, Atlantic, Iowa.

Q. You live at Atlantic, Iowa?

A. Atlantic, Iowa.

Q. What is your business?

A. Atlantic Wholesale Grocery.

Q. What is your capactiy with that firm?

A. Secretary-treasurer.

Q. One of the owners of the business?

A. One of the officers and directors, and owners.

Q. In what business is your company engaged at Atlantic?

A. Wholesale distribution of all food, confection, and tobacco products.

[fol. 664] Q. In what territory do you sell these products?

A. A radius of about—mean radius of about 50 miles of Atlantic in all directions; some greater and some lesser.

Q. You sell principally, I take it, to the grocers in the towns in that area?

A. All retail establishments.

Q. And your business is the wholesaling of these commodities to the retail outlets in these various towns?

A. Yes, sir.

Q. Mr. Mitchell, I take it that you have a warehouse or place of business there in Atlantic from which a distribution service is performed?

A. We do.

Q. You have occasion to have shipments made inbound to Atlantic——

A. Yes, sir.

Q. —which are then either shipped out or handled by your own truck?

A. We distribute with our own truck.

Q. You distribute from Atlantic with your own truck?

A. Yes, sir.

Q. Do you customarily use your own truck to perform the inbound service?

A. Only when there are stop cars or break-up cars made at Omaha or Des Moines.

[fol. 665] Q. Would that be a major part of your business?

A. Oh, no; a minor part.

Q. From what general sources of supply do you draw the products that you handle and sell?

A. I would say Chicago and east and from the west coast.

Q. And also the west coast?

A. And on the west coast.

Q. Now; in what quantities do you customarily get your shipments into Atlantic?

A. Practically everything comes by truck, either truckload or less than truckload.

Q. Say on canned goods and similar items, where are your principal sources of supply?

A. On vegetables, I suppose they have their origin some in Wisconsin and then all fruits, of course, on the west coast.

Q. And in your truckload quantities, truckload purchases, what carriers have handled that business for you in the past?

A. In the case of sugar and salt, it is a contract carrier, private carrier, hired by the manufacturer or the supplier, and on Van Camp canned goods, for instance, they hire their own carrier in Indianapolis and put them straight through in truckloads.

Q. On any of these shipments do you pay or absorb the transportation cost on your truckloads?

A. On all of it, either directly or indirectly.

Q. And in some instances you pay the transportation cost direct?

[fol. 666] A. In addition, yes.

Q. Have you, particularly on your less-truckload shipments, in the past used the service of the Rock Island Motor Transit Company?

A. Quite extensively.

Q. And principally from what points of origin has that service been performed?

A. I would say Des Moines and east.

Q. And including points of origin located east of Iowa?

A. New York, Pennsylvania, and through the east. Chicago.

Q. Chicago and ~~eastern~~ points as well?

A. Yes.

Q. In that type of service, about what size will the shipments run in volume or pounds?

A. From minimum to 10 tons.

Q. Do you have occasion to receive shipments from, say, 2 tons to 10 tons, and with some regularity?

A. Oh, yes; quite frequently.

Q. About how often would that be?

A. Several times a month.

Q. Prior to the end of August 1951, the Rock Island Motor Transit Company had authority to transport shipments without restriction in interstate commerce to Atlantic. Did you use that service at that time, prior to the latter part of August 1951?

A. Did we use the Rock Island service?

[fol. 667] Q. Yes.

A. Yes; we have.

Q. Are you familiar with the fact that there have been restrictions of the maximum imposed on the Rock Island Motor Transit Company?

A. Yes, sir.

Q. First, there was a 2,000-pound maximum and we now have a 5,000-pound maximum. What has been the effect on your business or on your operations there of those maximum restrictions?

A. Well, another line is carrying it and we are having difficulty with it.

Q. You are having some difficulties?

A. Yes, sir.

Q. Explain that in a little more detail to the examiner.

A. I term it a split shipment. I don't know what you would call it. They will supposedly load on the entire shipments of 7 or 8 hundred or a thousand cases, but when it gets in part of it is sent forward and another truck a couple of days later—they don't get it all on, in other words. They don't have room or something.

Q. Does that have some effect on your ability to take care of your business? Does it impose some additional burdens on your clerical force or is there some uncertainty with respect to time of arrival?

A. It does, because you anticipate your requirements as close as you can.

[fol. 668] Q. Would the elimination of the 5,000-pound restriction, restoring the unlimited authority which the Rock Island Motor Transit had prior to last summer, be of any advantage in your business, do you think?

A. We feel so.

Q. Why is that true?

A. Well, on the supposition we would continue to get the good service that we have gotten on what they have handled on the larger shipments, it would stand in hand it would improve.

Q. Do you believe that the elimination of the maximum of 5,000 pounds would enable the Rock Island Motor Transit Company to better serve your company?

A. I would say so.

Q. Now, with respect to shipments coming in from the points west of Atlantic through the Omaha gateway, do you have occasion there to handle shipments in excess of 5,000 pounds?

A. Not so frequently, I wouldn't say. Most of your manufacturers are in the east.

Q. Are you interested in this pool-car distribution method of getting your merchandise in where a carload may come into a certain point of destination and there be distributed?

A. You mean rail car?

Q. Yes.

A. We only take it where we have to.

Q. You prefer to have the——

[fol. 669] A. It takes too long to get rail shipments.

Q. It takes too long?

A. It takes too long.

Q. You understand that the Rock Island Motor Transit Company at the present time is operating on a purely temporary authority issued by the Interstate Commerce Commission?

A. Yes, sir.

Q. Now, in the event the Interstate Commerce Commission would see fit to deny entirely the motor carrier authority of the Rock Island Motor Transit Company, would that have any effect on your business?

A. I would estimate it would take 2 to 3 months to get it converted.

Q. Can you explain just a little more in detail how that would affect your business?

A. We would have to go through all of our payable file, our sources of supply, and find out the present routing and if it was Rock Island Motor Transit, then we would have to seek another route and so instruct them, and our payable material file is a pretty heavy thing.

Q. It has been suggested by some of the parties interested that shipments from the east might be handled into Des Moines by boxcar and there transferred from the boxcar to the truck of the Rock Island Motor Transit Company, but the service to be performed on the rail billing from

point or origin to point of destination. How would that [fol. 670] compare with the service which you have been having from the Rock Island Motor Transit Company on motor truck billing?

A. Well, I imagine we would have to anticipate an awful lot longer transit period.

Q. Would that require you to maintain——

A. A larger inventory.

Q. —a larger inventory at your Atlantic warehouse?

A. And we couldn't warehouse it at present.

Q. You referred a few moments ago to what you term as split shipments where the shipments of 5 tons up in less-than-truckload quantities would come in at different times over a period of perhaps several days intervening between them. Were those shipments *shipments* made over the lines of the Rock Island Motor Transit Company or by other carriers?

A. Other carriers.

Q. Other carriers.

Mr. Howland: I think you may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, Mr. Mitchell, as a result of this 5,000-pound restriction, rather than to split your loads up, you sought the services of some other common carrier by motor vehicle?

A. No; we let them come in over another carrier.

Q Well, in other words, they have been handling them [fol. 671] since this restriction went on by one of the other established common carriers?

A. Yes, sir.

Mr. Fowler: That is all.

Exam. Carpenter: Any redirect? You are excused.

(Witness excused.)

W. R. WOLVERTON was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?
A. W. R. Wolverton.
Q. You live where?
A. Adair.
Q. What is your business, Mr. Wolverton?
A. International Harvester.
Q. You handle the International Harvester line of farm implements?
A. Farm machinery, parts, motor trucks, and refrigeration.
Q. Does that include the full International Harvester line?
A. Yes, sir.
Q. Including trucks?
A. That is right.
Q. How long have you been engaged in business at Adair?
A. It will be 2 years the 23rd of this month.
Q. Do you have occasion to have shipments made to you [fol. 672] from points outside the State of Iowa to Adair in less-than-carload or less-than-truckload quantities?
A. All of it comes less-than-carload. All our heavy machinery is shipped out to certain points and then we pick it up from there by rail.
Q. What are the sources of supply from which you get your machinery, refrigeration lines, and farm implement lines?
A. The source of supply?
Q. Yes; where are the shipments made from to Adair?
A. From Moline, Ill., and Chicago, Memphis, Tenn., Louisville.
Q. Louisville, Ky.?
A. Kentucky. That is the most of the supply of heavy machines.
Q. Do you have need for transportation service in order to get those shipments into Adair, Iowa?
A. No. They are always shipped out in carload lots to

some point in our zone or to the warehouse here in Des Moines, and we pick them up here by truck then.

Q. You make your own arrangements for that service?

A. That is right.

Q. From wherever they are consigned in carload quantities?

A. Yes.

Q. Now, with respect to your repair parts and the smaller farm implements and items of that character, how are those shipments made?

A. They are all shipped by motor truck.

[fol. 673] Q. And from what points are those shipments made?

A. Well, we get our International parts from St. Paul, Minn. We get shipments from Minneapolis, Columbus, Nebr., Omaha, Des Moines, and agricultural attachment parts mostly come from Rock Island.

Q. You say those have all been coming in by——

A. Motor freight.

Q. —motor freight. That is, by motor carrier truck?

A. Yes.

Q. Now, in what quantities, what weights, do those shipments customarily move?

A. Very seldom we have a shipment over 12 or 15 hundred pounds.

Q. Is there a more or less continual movement of that type from these points to your store at Adair?

A. No. It doesn't run that large a shipment, as a general rule.

Q. What I mean to say is, do you have these shipments coming in as a continuous proposition?

A. Oh, yes; we have parts to come in every week, two or three times a week.

Q. So that you do have an occasion to have your shipments come in as a continual proposition?

A. That is right.

Q. What carrier or carriers have been performing the transportation service from these points such as St. Paul, Minneapolis, Rock Island, Louisville, and these other out-

[fol. 674] of-State points that you have referred to?

A. All of them from the east come by Rock Island Motor Transit.

Q. How about the shipments coming from the west, from Nebraska points?

A. Mostly Rock Island. Occasionally Iowa-Nebraska.

Q. Iowa-Nebraska Transportation. How has the service performed by the Rock Island Motor Transit been as far as meeting your needs for that type of service?

A. We think we get awful good service. We send stock order out, it has to be postmarked Tuesday evening to be sent to St. Paul to be filled and sometimes we get it returned by Friday, on Friday morning's motor freight.

Q. When you refer to shipments from the east, I take it you are including shipments from St. Paul and Minneapolis, as well as from points such as Rock Island and other——

A. That is right.

Q. In other words, any shipment that would have to move into Adair from the east, you would refer to that as shipments from the eastern points?

A. Yes; because all of our parts are routed from St. Paul by way of Des Moines.

Q. How has the service of the Motor Transit Company been on shipments moving to your place of business from Omaha, Nebr.?

A. Good.

Q. Have you had occasion to require tracer service or [fol. 675] claim service in connection with items that may have been lost or damaged in transit from time to time?

A. We have never had a claim from shortage or damage since the 2 years we have been in business.

Q. You haven't had any claims that you have presented?

A. From no motor freight of no source.

Q. Either the Rock Island Motor Transit Company or Iowa-Nebraska Transportation?

A. That is right.

Q. You have been pretty fortunate in that respect, I would say then, Mr. Wolverton. Mr. Wolverton, I take it from what you have said that as far as the Motor Transit transportation service that you would not be particularly affected by this maximum of 5,000 pounds which was imposed on the Rock Island Motor Transit Company here last summer.

A. No. It never has affected us yet in any way.

Q. What would you say as to whether in the event that the present authority of the Rock Island Motor Transit Company was eliminated altogether, that is, that the motor carrier service, the Rock Island Motor Transit Company could not perform any service at all, either from Omaha or from these eastern points, including Minneapolis and St. Paul, would you say that would have any effect on your business?

Mr. Fowler: Just a minute. That is objected to as being immaterial, assuming facts not established in this record.

[fol. 676] Exam. Carpenter: Objection overruled.

A. Yes; it would, because the Iowa-Nebraska only stops in our town, I think it is two or three times a week, and we have Rock Island Motor Transit 5 days a week.

By Mr. Howland:

Q. Have you had occasion to have any shipments coming by Iowa-Nebraska, delivered by Iowa-Nebraska, I mean, from points such as St. Paul, Rock Island, or any of these other points where the interchange would have to be made at Des Moines?

A. Well, I think we just had once or twice from probably Rock Island, I believe, is where it come, either Rock Island or Canton, Ill.

Q. Have you observed whether there was any difference in the time of transit by Iowa-Nebraska as compared with the time of transit by the Rock Island Motor Transit?

A. Not exactly because most of this that they have fetched out has been attachment parts and sometimes you will order them and you won't get them for 30 days or 60 days anyway, so you never know, but generally when we get the freight bill on them, in the next day or two they are in, whichever way they do come.

Q. When the invoice comes in, they will be in within a few days at least?

A. That is right.

Mr. Howland: You may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

[fol. 677] By Mr. Fowler:

Q. Are you aware, Mr. Wolverton, that it would make no difference in the motor truck service which you are obtaining from the Rock Island Motor Transit whether this application was granted or not?

Mr. Howland: Just a moment. That is objected to as not proper cross-examination, assuming facts not shown by the record, and argumentative in form.

Exam. Carpenter: I will overrule the objection.

Mr. Fowler: Read the question.

(Question read.)

A. Well, it would make a difference to us unless they set up some other kind of a motor truck service we could rely on like we do the Rock Island Motor truck service.

By Mr. Fowler:

Q. For instance, did you know, Mr. Wolverton, that the Rock Island Motor Transit Company now has authority to operate a truck service from Omaha to Adair? Did you know that?

A. No; I didn't.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. If the service which the Rock Island Motor Transit Company is authorized to perform is merely a delivery service on rail billing, would that fact affect the answer which you have given to Mr. Fowler?

A. I would have to have that question.

[fol. 678] Exam. Carpenter: Read the question.

(Question read.)

A. I just don't quite get——

By Mr. Howland:

Q. Let me ask you this: Are you aware that so far as the permanent authority which the Rock Island Motor Transit Company holds at present, that it is confined to the handling of shipments moving on railroad billing? Did you know that?

A. No; I didn't.

Q. Well, now, supposing that a shipment from Rock Island, Ill., to Adair, Iowa, would have to move from Rock Island in a boxcar as far as Des Moines and there be transferred to the truck of the Motor Transit Company in order to make delivery to you, would that type of service in your judgment be satisfactory as far as your business requirements are concerned?

A. No. I would rather have it come right straight through on motor truck myself.

Q. And why?

A. Well, they bring it right up to your door and I think you get quicker service.

Mr. Howland: That is all.

Exam. Carpenter: Re-cross. You are excused.

(Witness excused.)

FRED MERTES was sworn and testified as follows:

Direct examination.

[fol. 679] By Mr. Howland:

Q. Will you state your name, please?

A. Fred Mertes, Adair. I am manager of the Farmers Lumber Company.

Q. How long have you been located at Adair, Mr. Mertes?

A. I have lived there all my life.

Q. About how old a man are you?

A. 37.

Q. How long have you been the manager of the Farmers Lumber Company?

A. Since January 1, 1951.

Q. What is the business of the Farmers Lumber Company?

A. Retail lumber, coal, fencing, hardware, builder's hardware, paints and like items.

Q. Do you handle farm supply items in the hardware lines such as feeders and hog waterers?

A. No.

Q. Take heaters or——

A. No.

Q. —matters of that sort?

A. We don't handle those.

Q. You don't handle those items. How about gates, roofing?

A. Yes.

Q. Fencing material?

A. Yes.

Q. Those items you do handle?

[fol. 680] A. Yes.

Q. About what is the population of Adair, Iowa?

A. Around 850.

Q. What is the nature of the businesses or industries located there in that community?

A. It is strictly a retail selling to a farming community.

Q. You have the usual service and retail installations to supply the needs of both the townspeople and the farmers in the community? A. That's right.

Q. Do you have any manufacturing or processing plants of any kind located there?

A. One produce plant.

Q. One produce plant?

A. Yes.

Q. Does that process and ship eggs and poultry?

A. It processes eggs to ship.

Q. I take it that as far as your building material lines such as lumber, cement, and your coal, that those shipments move in to Adair by carload freight?

A. That's right.

Q. With respect to these other lines, what is the fact as to whether or not your supplies are shipped in to you in less-than-carload quantities or less-than-truckload quantities?

A. That comes in by motor truck transit.

[fol. 681] Q. And from what general locations do you get these supplies?

A. Paints come from Minneapolis and also Kansas City, and then I have some builder's hardware from Omaha and also Des Moines; and then some of it comes on through from Chicago and billed through a wholesale house in Des Moines here.

Q. But a shipment that would be made from a manufacturer direct to your place of business at Adair?

A. That is right. I would order it through a wholesale house here and they make shipment on through without my knowledge.

Q. Of course, you make payment to the Des Moines wholesale house?

A. That's right.

Q. But the freight bill shows it originated at Chicago and——

A. That's right.

Q. —came as a through shipment to you, an interstate shipment. What carrier or carriers have been performing motor truck service to you at Adair?

A. The Rock Island Motor Transit and also Iowa-Nebraska.

Q. Has the Iowa-Nebraska rendered a transportation service on shipments moving both from the east as well as shipments from Omaha?

A. Just from Omaha is all.

Q. Just from Omaha, Nebr.?

A. That I know of.

Q. About how long has the Iowa-Nebraska service been [fol. 682] rendered to you from Omaha?

A. Since I have been in the lumberyard there, they have.

Q. They have been performing that service?

A. Yes; on occasion.

Q. About what is the frequency of that service?

A. Of their service, Iowa-Nebraska?

Q. Yes.

A. Oh, an average of probably once a month. It varies.

Q. Well, I take it you don't have the need for service from Omaha as frequently as you have from the other direction?

A. That's right.

Q. But do you know about how often Iowa-Nebraska serves the town of Adair, whether they do it on daily or twice or three times a week?

A. That I can't tell you for sure. I am in the other end of town and don't see the truck come in.

Q. Do you have occasion to have shipments delivered to your place of business in quantities in excess of 5,000 pounds by motor carrier?

A. Yes. Only in full truckload lots.

Q. And that is shipments of roofing?

A. And fencing material.

Q. Wire?

A. Yes.

Q. Where do you get those shipments from?

[fol. 683] A. Chicago.

Q. How are those shipments in truckload lots ordinarily delivered to your place of business?

A. By truck, through the American Transit lines.

Q. American Transit?

A. Yes.

Q. And as a matter of fact, the actual transportation, the truck that comes in, is usually a livestock truck?

A. That's right.

Q. Going from east to west?

A. That's right.

Q. That is not a regular established service by any one carrier?

A. No. The way I understand this, they have a billing place in Chicago and these trucks go pick up their orders and then they can haul merchandise out.

Q. Where do these trucks come from? Are they local trucks there in the territory, or do they come from some other territories to make this delivery service?

A. That I can't tell you because I don't know. They bring in the bill from the transit lines and there is one truck that was in yesterday or day before yesterday from Cumberland. The driver lived at Cumberland.

Q. That is Cumberland, Iowa, in Cass County?

A. Yes; that is right.

Q. That is some 20 or 25 miles south and west of Adair?

[fol. 684] A. That is right.

Q. Have you had trucks coming from points such as Perry and Guthrie Center and perhaps also points west of Adair performing that service for you?

A. There could have been. I don't know.

Q. In the event that you have any shortages or any difficulties over shipments of that character, have you ever had any difficulty of that type?

A. Not on those full truckload lots.

Q. You don't know what the situation might be with respect to making claims or getting adjustments?

A. No; I don't.

Q. You haven't had that experience?

A. I haven't had that experience yet.

Q. Mr. Mertes, you understand, do you, that the Rock Island Motor Transit Company, as far as its authority as a motor carrier, is operating on a purely temporary basis at the present time?

A. That is right.

Q. And that the only permanent authority which the Rock Island Motor Transit Company now has is authority to handle shipments that move on railroad freight billing?

A. That is right.

Q. If the Rock Island Motor Transit Company, for instance, on handling of items originating at Mississippi River points or points east of the Mississippi River could [fol. 685] only handle shipments moving by boxcar from those points to Des Moines, Iowa, where the shipment would be unloaded and transferred to the truck line, would a service of that character have any effect on your business?

A. It would some due to an extra handling there and also our railroad boxcars are a little rougher on merchandise than truck lines are.

Q. Do you think that would be as satisfactory a service as far as your business is concerned as the service now performed by the Rock Island Motor Transit Company?

A. I doubt whether it would be.

Q. What would you say as to whether, if the Interstate Commerce Commission should entirely eliminate the motor carrier authority which the Rock Island Motor Transit

Company has on the temporary basis, as to whether that would have any effect on your business?

Mr. Fowler: Just a moment. That is objected to as immaterial, for the reason it assumes facts not established in this record; for the further reason I haven't heard any suggestion from anybody representing the Rock Island Motor Transit Company that they aren't going to continue the operations that they have authority to operate under their present permanent authority.

Exam. Carpenter: The objection is overruled.

A. You mean if the Rock Island truck was to discontinue service?

By Mr. Howland:

Q. If the Rock Island Motor Transit Company couldn't handle any business on motor carrier billing; that is, [fol. 686] couldn't interline with other truck lines, couldn't perform any transportation service at all except purely on a railroad freight billing, would that affect your business?

A. Well, it would hold up a shipment on the merchandise, take an extra day or two on account of the handling of it.

Q. Would that affect your business adversely?

A. Yes; to this extent, that as a rule when you order something that way, you are in a hurry for it. Some farmer is waiting on it.

Q. And is prompt transportation, with a minimum of handling, necessary then?

A. Yes; it is.

Q. Now, as I understand it, you have shipments of paint coming in both from manufacturers located in Minneapolis and some from Kansas City?

A. That's right.

Q. Does that move on Rock Island Motor Transit Company billing from the point of origin right to your place of business at Adair?

A. I think so.

Q. In other words, there is no interchange with any other truck line or anything of that sort?

A. It does from Kansas City, I think. On some of the shipments, it does.

Q. Would the service, in your judgment, be as satis-[fol. 687] factory as that presently rendered if it were necessary that the shipment be transported, say, from Minneapolis to Des Moines and there interchanged to me other carrier?

A. That is kind of a hard question to answer. If they tried to make shipment, it could be as good.

Q. Have you had experience with shipments where there were two or more carriers as compared with just one carrier?

A. No; I haven't had any of those.

Q. Do you know of any trucking carrier, motor truck carrier, that provides a 5-day-a-week service into Adair from the east?

A. No; I don't know of any.

Q. Other than the Rock Island Motor Transit Company?

A. That's right.

Mr. Howland: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. The Rock Island Motor Transit now have authority and are actually performing a truck service for you on your stuff from Minneapolis to Adair, aren't they?

A. Yes.

Q. You are aware that they now have that authority?

A. Yes.

Q. And that this application wouldn't have anything to do with that?

Mr. Howland: That is objected to as assuming facts that are entirely contrary to this record.

[fol. 688] Exam. Carpenter: I will overrule the objection. You can clear it up on redirect.

Mr. Fowler: Off the record.

Exam. Carpenter: All right.

(Discussion off the record.)

Mr. Fowler: I will withdraw the question.

By Mr. Fowler:

Q. On your Kansas City shipments, I presume those are originated at Kansas City by some other motor common carrier?

A. That is right.

Q. And then interlined at Omaha?

A. Some of them are, yes. Some of them come straight through.

Q. By Rock Island Motor Transit, by truck?

A. Some of them come through on Iowa-Nebraska, some of them do.

Q. Let me ask you about that. Let's put it this way: At the present time the Rock Island Motor Transit is handling shipments for you from Kansas City, Kans., and Kansas City, Mo., to Adair, Iowa, by truck?

A. Yes.

Q. And also you are receiving shipments that are handled by other carriers and interlined with Iowa-Nebraska at Omaha for destination Adair?

A. Yes.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

[fol. 689] Mr. Howland: No redirect.

Exam. Carpenter: You are excused.

(Witness excused.)

CRAIG SCHWAB was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. Craig Schwab.

Q. You live in Iowa City, Iowa?

A. Yes, sir.

Q. What is your business?

A. Terminal agent, Rock Island Motor Transit Company.

Q. And how long have you been employed by the Rock Island Motor Transit Company?

A. It will be 7 years in August.

Q. And in what capacities have you worked?

A. Dock man, driver, terminal agent.

Q. You are now the terminal agent at Iowa City?

A. Yes, sir.

Q. And have been for about how long?

A. Approximately 2 years.

Q. Were you present in the courtroom when Mr. Gage testified this morning?

A. No; I wasn't here.

Q. Iowa City is the home of the State University of Iowa, [fol. 690] of course?

A. Yes, sir.

Q. And also has a Veteran's Administration hospital?

A. Yes, sir.

Q. Which is just being completed, and what manufacturing or industry does it have?

A. Moore Business Forms, which is printed forms, and Economy Advertising, which is calendars and printed forms. There is a small sign company, advertising sign company there. That is about the extent of the actual manufacturing.

Q. It has no heavy industries——

A. No.

Q. —as we customarily term it.

A. No.

Q. The Rock Island Motor Transit Company has a terminal at Iowa City?

A. That is right.

Q. And is that in what was formerly the freight house of the Rock Island Railroad?

A. Yes, sir.

Q. Do you have a number of pickup-and-delivery units assigned to Iowa City?

A. I have five pickup-and-delivery trucks and one tractor for trailer work in the city.

Q. How many employees do you have at the Iowa City terminal?

[fol. 691] A. I have three dockmen, five city drivers, two road drivers, two clerks, and myself.

Q. Now, what runs are dispatched out of Iowa City at the present time, Mr. Schwab?

A. We have what we call a west peddle run that goes from Iowa City to Victor and return daily, and a south peddle run which runs from Iowa City to Wellman and return daily.

Q. What type of equipment is used on the run to Victor and return?

A. Semitrailer.

Q. About what is the capacity? Is it one of the tandem or one of the smaller jobs?

A. No; it is a 30-foot trailer, single axle.

Q. You say that runs daily. Is that 5 or 6 days a week?

A. Five days, Monday through Friday.

Q. And the run does not operate on Saturday, I take it?

A. Not unless the tonnage warrants it.

Q. What time does that Victor turn-around run customarily leave the Iowa City terminal?

A. Well, it is set up to leave immediately after loading, approximately at 8 a. m., 8 to 8:30 a. m.

Q. Now, what runs do you have coming into Iowa City from the east and the west where the trucks are not stopped at Iowa City?

A. You mean to say drop off freight and continue on?

Q. Yes; and continue on.

[fol. 692] A. You have your Chicago-to-Cedar Rapids units, your Chicago-to-Des Moines units, your Davenport-to-Cedar Rapids units, your Davenport-to-Des Moines units. That is it.

Q. Now, may any of those runs drop off shipments destined to points on either of the peddle runs that you have referred to?

A. That is right.

Q. And so a shipment destined to a point such as Oxford or Victor or any of the intermediate points coming from Chicago would be dropped off by one of these trucks that you have reference to and then loaded into the peddle unit, is that correct?

A. At Iowa City, yes.

Q. And that is true also with respect to your Wellman peddle run?

A. Wellman and Kalona; yes.

Q. Wellman and Kalona run. Now, what is the usual schedule on the Wellman-Kalona run as far as time of departure is concerned?

A. Approximately the same time as your west peddle.

Q. Is that a semitrailer——

A. Yes, sir.

Q. —unit?

A. Yes.

Q. Approximately the same size——

A. Same size.

Q. —as the Victor turn-around?

A. Yes.

[fol. 693] Q. Down at Kalona, about what size of a community is Kalona?

A. I would say between 750 and a thousand.

Q. And that is located where with reference to Iowa City?

A. It is located southwest on highways No. 1 and 22.

Q. About how far?

A. I think it is, by the new route, 19 miles, I believe.

Q. Wellman is a town of about what size?

A. Approximately the same size.

Q. It is located west of Kalona a few miles on highway 22?

A. Seven miles west; yes.

Q. That is correct as to the location of it?

A. Yes.

Q. On your west peddle run which goes out to Victor and returns, does that run handle any rail freight?

A. Yes, sir.

Q. And what is the fact as to how the l. c. l. rail freight is handled? Tell us about that.

A. Your l. c. l. rail freight is assembled by the railroad and turned over to us, to the Motor Transit. It is loaded with the Motor Transit freight in the same unit, peddled by the same driver.

Q. How is it handled at the point of destination?

A. It is peddled storedoor by the driver.

Q. Is that true at all points?

A. At all points but Marengo.

[fol. 694] Q. And at Marengo how is it handled?

A. At Marengo it is docked and a drayman handles it for the railroad company.

Q. At Marengo instead of the delivery service on the the shipment being performed by the Motor Transit unit, it is delivered to the Rock Island Railroad drayman?

A. That's right.

Q. And he performs the delivery service for the railroad, is that right?

A. Yes.

Q. Now, can you tell us about what the usual volume of tonnage is on this west peddler to Victor and return, including both railroad freight and motor carrier-billed freight, about what limits there would be?

A. Anywhere from 3,000 to 16,000 or 17,000. I would say 17,000 would be the limit.

Q. And about what proportion on that particular run does the railroad-billed freight bear to the total volume of the business handled by the truck?

A. I would say approximately 15, maybe 20 percent.

Q. Now, in the event that there is business outbound from these towns intermediate between Iowa City and Victor either on motor carrier billing or on rail billing, is it handled in this same truck on the return trip?

A. On the return; yes.

[fol. 695] Q. About what is the customary volume of such business that is handled on that Victor turn-around peddler? Do you have much?

A. It is very sporadic. There is a firm at Marengo which at times gives us pretty good weight. The majority of the time, the truck comes in with, I would say, not over 3 or 4 or 5 hundred pounds. Normally, it is what we call an empty unit.

Q. It is, for all practical purposes, almost a one-way operation?

A. One-way operation.

Q. And you peddle this freight out and the truck returns——

A. Empty.

Q. —almost empty. Does that truck pick up such rail

freight as may be moving outbound from these towns also?

A. Yes.

Q. Does the Wellman-Kalona run also handle the rail-billed freight?

A. Yes.

Q. About what is the tonnage handled on the Kalona-Wellman peddler run?

A. That unit usually runs between 10 and 20 thousand.

Q. 10 and 20 thousand pounds?

A. Yes.

Q. And about what proportion is normally rail-billed freight and what proportion motor carrier-billed freight?

A. I would say approximately 20 percent.

By Mr. Fowler:

Q. 20 percent what?

[fol. 696] A. Total weight.

Exam. Carpenter: Rail-billed.

Mr. Fowler: Oh, rail-billed.

Exam. Carpenter: That is what he means, I think, but he doesn't say so. It was a double-barrelled question. The way it was asked, it could apply to either one.

By Mr. Howland:

Q. I take it what you mean to say is that of the total proportion of the freight handled on that run, about 20 percent of it constitutes rail-billed freight?

A. That is right.

Q. And is there any difference in the handling of the rail-billed freight on that run as compared with the Victor run?

A. No, sir.

Q. All right. What types of business or industry are located at Kalona and also at Wellman? Tell us about that.

A. No business shipping out. Just general farming community, hardware stores, general stores, drygoods, filling stations, feed stores.

Q. Is that true both of Kalona and Wellman?

A. At Wellman you have your Maplecrest turkey farms

which ship out turkeys, dressed poultry, which is about the only industry that we do business with outbound.

Q. Outbound, what is the usual volume of business that is picked up and brought back to Iowa City on the Kalona-Wellman run?

[fol. 697] A. Except around holiday periods, that is an other empty unit.

Q. At the holiday times, is there a movement of dressed turkeys?

A. That is right.

Q. And dressed poultry from the Maplecrest farm plant there at Wellman?

A. Yes.

Q. Now, do you interline freight with other motor carriers at Iowa City?

A. With one carrier, Hedrick Motor Freight.

Q. Hedrick operates between what points?

A. Burlington and Cedar Rapids.

Q. That is via U. S. highway 218——

A. 218.

Q. —down south?

A. Yes; down to, I think, Olds, isn't it? and then across.

Q. Do you on occasion receive shipments at Iowa City from concerns such as Watson, Merchants Motor Freight, or Poole Transfer?

A. No, sir.

Q. Now, what service do you operate out of Cedar Rapids by way of Iowa City? What trucks pass through Iowa City en route to either points west or east or south of Iowa City?

A. We have a Cedar Rapids-to-Ottumwa unit.

Q. How does that operate?

A. That unit operates down 218 to Iowa City, down to the junction of No. 22 on 218, across 22 to Lone Tree, Nichols, I think it is 76 down to Columbus Junction, across [fol. 698] into Muscatine, back over to Fairfield and down west to Ottumwa.

Q. About what time does that truck pass through Iowa City, if you know?

A. Usually around 8 o'clock in the evening.

Q. That is overnight service or an evening service out of Cedar Rapids?

A. That is right.

Q. South and southwest. What other service to and from Cedar Rapids?

A. Cedar Rapids to Davenport. Cedar Rapids to Chicago. If tonnage permits, you have your Cedar Rapids to Des Moines.

Q. Now, is there any other peddler run other than the ones you have told us about operated through the Iowa City terminal from any point?

A. Well, your Des Moines to Chicago, your Des Moines to Davenport, would be the only other ones.

Q. Now, are you familiar with the manner in which the shipments destined into West Liberty are handled?

A. They are dropped off by the through units. For instance, your Chicago to Cedar Rapids, your Chicago to Des Moines, Davenport to Des Moines, Davenport to Cedar Rapids, Davenport to Iowa City, Des Moines to Davenport, Des Moines to Chicago, Cedar Rapids to Chicago, Cedar Rapids to Davenport. On occasion, if tonnage permits, your Ottumwa units both ways all drop at the West Liberty [fol. 699] freight house.

Q. Any one of those may perform service into West Liberty either from the east or west?

A. To the freight house; yes.

Q. Most of these runs that you have referred to are to and from Cedar Rapids, passing through Iowa City, are evening or night——

A. Yes.

Q. —departure hours. Mr. Schwab, have you had any requests for transportation that you have been forced to turn down because of the 5,000-pound restriction?

A. Yes; we have.

Q. Tell us about that, what your experience has been.

A. We have had return merchandise from the Veteran's hospital destined into Chicago we have turned down.

Q. How much was involved in that?

A. A whole truckload.

Q. A whole truckload?

A. We have had shipments from Maplecrest we have turned down. We have had——

Q. Those were in excess of 5,000 pounds?

A. Yes. We have had shipments from Moore Business Forms that were in excess of 5,000 that we had to turn down. I believe we had one or two out of Economy Advertising that we refused on account of the 5,000-pound restriction.

Q. Those requests for transportation service, have they [fol. 700] been more or less continuous over the last 4 months?

A. Every once in a while one comes in.

Q. How are such shipments actually transported? Can you tell us about that?

A. You mean what——

Q. What does the shipper do?

A. They find another carrier to take it.

Q. Do you know what carriers are the ones that have handled those shipments?

A. Merchants Motor Freight, Poole, and one I am thinking of, it would be almost impossible to tell. It is a combination terminal and first truck in gets it.

Q. Do Merchants Motor Freight and Poole Transfer have any local agent located at Iowa City?

A. No. They have a transfer company who handles their——

Q. That is the Mahr Brothers Transfer, I believe.

A. Mahr has Poole, Des Moines Transportation, Iowa-Nebraska. Merchants Motor Freight is handled by Mr. Warren.

Q. That is the Iowa City Transfer and Storage Company?

A. Transfer and Storage.

Q. I don't believe we have the figures in the record with respect to your tonnage. Has there been, since the 5,000-pound restriction has been in effect, any decrease in the volume of your tonnage originating at Iowa City and destined to any point on the Rock Island Motor Transit or for interline with other carriers?

[fol. 701] A. You are talking about the outbound tonnage?

Q. Yes.

A. I don't think the outbound has decreased too great. It has decreased some.

Q. What about your inbound?

A. Inbound has decreased considerably.

Q. And about what would you say, percentage-wise or in tonnage or in revenue, that that decline has amounted to?

A. I don't have any exact figures on it, but I would say it very safely would be 25 percent.

Q. As compared with the revenues that were received on inbound tonnage prior to the imposition of those restrictions?

A. That is right.

Q. Are you familiar with the community known as Coralville?

A. Yes, sir.

Q. Coralville is located where?

A. Located due west of Iowa City approximately a mile.

Q. On what highway?

A. On U. S. highway 6.

Q. And what firms or industries are located at Coralville?

A. We have one firm, Dan's wholesale, who receive quite a bit of inbound tonnage. You have your River Products Company, your Great Lakes Pipe Line.

Q. What is the nature of the business of the River Prod-
[fol. 702] ucts Company?

A. It is a rock quarry.

Q. What shipments do they make by truck?

A. It is usually repair materials such as burned out motors, pulleys, broken pulleys.

Q. It would be equipment of various types and kinds?

A. Yes.

Q. Including parts for their equipment?

A. Their crushers and their truck; yes.

Q. You said the Great Lakes Pipe Line has some kind of a place of business out in Coralville. What is the nature of the business of that?

A. They have a bulk plant there, gas plant. They receive oxygen and acetylene.

Q. That is the iron containers?

A. Yes; and they are doing quite a bit of construction work there now, which includes all kinds of construction material. Mainly, it is what you would call supplies.

Q. Including valves and fittings?

A. That is right.

Q. And pipe. What is the nature of the establishment that the Great Lakes Pipe Line Company has out there?

A. It is just a bulk gas terminal.

Q. They load trucks there?

A. Trucks with gas.

[fol. 703] Q. Gasoline, and they load them from the pipe line at the terminal?

A. Yes.

Q. This concern that you referred to as Dan's wholesale, can you tell us something about the nature of the business in which that concern is engaged?

A. He is a small, independent wholesaler who jobs to surrounding towns and communities around Iowa City. He gets in a considerable amount of merchandise in the form of candies, foods, edibles which we bring in to him.

Q. Is there any carrier to your knowledge that performs a regular transportation service other than the Rock Island Motor Transit Company to and from Coralville and makes deliveries there without extra charge?

A. Not a regular service; no.

Mr. Howland: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. At Iowa City the Rock Island Motor Transit does the pickup-and-delivery service for both the Rock Island Railroad and the Rock Island Motor Transit Company?

A. That is right; yes, sir.

Q. And the same pickup truck picks up rail-billed freight as well as motor carrier-billed freight?

A. The same pickup truck; yes.

Q. And the driver is an employee of the Rock Island [fol. 704] Motor Transit Company?

A. Yes, sir.

Q. And where is the terminal of the Rock Island Motor Transit in Iowa City?

A. 635 South Van Buren Street.

Q. Is it in the freight depot of the Rock Island Railroad?

A. It is in one end; yes.

Q. In other words, the Rock Island Motor Transit Company dock is located in the Rock Island freight depot?

A. One end.

Q. One end, and the Rock Island Railroad is at the other end?

A. That is right.

Q. And a pickup truck which has rail-billed freight brings it into the dock and what does he do with it, put it in the rail end or the truck end?

A. It is unloaded and given to the railroad at what we call an intermediate transfer point, which is for labor and union difficulties taken to the transfer point, the bills are given to the rail employes, the rail foreman, who checks it, and takes it into the rail freight house.

Q. As I understand then, the dock is just an open dock?

A. It is an enclosed dock.

Q. There is no separation between rail and——

A. No; just——

Q. No physical separation?

[fol. 705] A. Just paint on the floor means a lot.

Q. I understand that. So that what you have there is the one dock without any physical separation as far as partitions are concerned?

A. No; but definitely a motor end and a rail end.

Q. That is right, and the union that runs the railroad dock is a different union than that which runs the motor carrier dock?

A. Very definitely.

Q. So you picked out a neutral zone in the middle, is that right?

A. That is right.

Q. What kind of a record do you keep of the rail freight that is picked up by Rock Island Motor Transit Company's pickup truck?

A. That is picked up by them?

Q. What kind of a record do you keep of the rail freight that is picked up by Rock Island Motor Transit Company's pickup truck?

A. That is picked up by them?

Q. In other words, your pickup truck goes out and picks up rail freight, bring it into the dock. What kind of a record do you keep of that?

A. We just keep a record of the actual tonnage hauled; that is all.

Q. The actual tonnage hauled?

A. Yes, sir.

Q. What do you do with that record?

A. Put it against the record of the payment we receive for our contract for hauling it.

Q. That is what I want to find out. In other words then, you do keep a record of the tonnage which is picked up [fol. 706] for the railroad by the Rock Island Motor Transit Company's pickup truck?

A. That is right.

Q. And do you make that charge there or is that done by the home office?

A. Settlement is made by the railroad and turned over to us and run through our accounts and——

Q. All right, that is enough. On what basis is that charge made? What is the unit charge? How do you assess the cost for that service against the railroad company? Upon what basis?

A. On the contract.

Q. What is the contract?

Mr. Howland: What is the contract rate?

Mr. Fowler: Yes; that is right.

A. Minimum stop, 25.

By Mr. Howland:

Q. 25 cents?

A. Yes. And I believe it is 6 cents a hundred. It is 6 cents a hundred.

Mr. Howland: We have the figures on that which will be in more detail.

The Witness: Seven cents on transfer freight.

Mr. Howland: That will be in more detail, I think. That will be shown in more detail.

By Mr. Fowler:

Q. I believe you told Mr. Howland your peddle truck, when it moves out to Victor and also when it moves out to

[fol. 707] Wellman, is loaded with about 20 percent of the tonnage rail freight. Do you get that rail freight from the railroad company or does that come in on truck from some other point?

A. It is a little involved, but let's put it this way: Any freight—normally all freight comes in by the motor transit,

Q. In other words, it comes in on truck?

A. On truck and is unloaded and placed in these holds for these peddle units with the exception of any Burr Oak freight and at times Davenport freight which moves into Iowa City by boxcar is unloaded by the rail and placed in these peddle run units and then the billing is turned over to the Motor Transit for delivery on the peddle unit.

Mr. Howland: I would like to have the record show that Burr Oak is the billing station for Chicago, Ill.

The Witness: Yes.

By Mr. Fowler:

Q. Then as a general proposition, if there is any l. c. l. rail freight destined for points on either one of your peddle runs, it is brought into your terminal at Iowa City by motor truck; correct?

A. Say that over.

Mr. Fowler: Read it.

Exam. Carpenter: Read the question.

(Question read.)

A. No; I would say not.

By Mr. Fowler:

Q. I am not trying to trap you. I misunderstood you.

[fol. 708] A. Because the heaviest volume of traffic moves from the east——

Q. Yes.

A. —so consequently your weight, your volume of freight, moves by boxcar.

Q. Into Iowa City?

A. Into Iowa City.

Q. Oh, I see. In other words, you do have then a merchandise car into Iowa City?

A. From Burr Oak; yes.

Q. And Burr Oak is Chicago?

A. From east of Davenport.

Q. In other words, rail-billed freight from Chicago, which is billed at your billing point of Burr Oak, comes into Iowa City in a merchandise car——

A. Yes.

Q. —and is unloaded by the railroad and turned over to the Rock Island Motor Transit Company for delivery to destination points by truck?

A. That is right.

Q. What about rail freight originating at Moline, for instance?

A. If the tonnage warrants it, at times it moves by boxcar. Normally, it would move by truck.

Q. Now, do you have similar merchandise car moving from the west into Iowa City?

[fol. 709] A. Not always; no.

Q. Is there on occasion?

A. On occasion.

Q. Now, at Marengo you use a local cartage company there?

A. Yes, sir.

Q. And is that the same cartage company that the other carriers use?

A. That I do not know.

Q. Now, let's assume that a shipment in excess of 5,000 pounds is tendered to you at Iowa City for destination on a point served by the Rock Island Railroad. Couldn't you handle it if you billed it on rail billing?

A. I suppose we could; yes.

Q. Now, in other words, if you had a shipment of volume in excess of 5,000 pounds, it could be billed on rail billing and handled on truck, couldn't it, to any point located on your railroad line?

A. No.

Mr. Nolan: You have got your restrictions there again.

A. You have got a key point. You couldn't go into Omaha.

By Mr. Fowler:

Q. All right. The key point then, with the exception of the key-point restrictions, you can't handle that?

A. Yes.

Q. Now, this traffic that was tendered to you which you say you had to turn down, that was given to other estab- [fol. 710] lished carriers that are operating in and out of Iowa City, is that correct?

A. That is right.

Q. Now, on Coralville, this fellow Mahr serves Coralville for these carriers that he does the cartage for, doesn't he?

A. I will say "yes" to the question.

Q. All I know, he told us he did.

A. Let's say he goes out there once in a while.

Q. All right. I was asking about the pickup service in Iowa City. I assume the deliveries are also handled by Rock Island Motor Transit?

A. Yes. We have two units that are assigned specifically to hauling nothing but rail freight.

Q. But they are your units?

A. Yes.

Q. And you have got a deal on those about charging the railroad?

A. Yes; we keep track of it.

Q. Some kind of an arrangement?

A. Yes.

Q. You were talking about your decline in inbound tonnage at Iowa City recently. That is a general experience of the entire trucking industry, isn't it, right now?

A. No. We have never had a decline like we have had now.

Q. That isn't quite like I asked you. I asked you if every other common carrier by motor vehicle wasn't experiencing exactly the same thing in the last 2 months? [fol. 711] A. Tonnage is down a little bit.

Q. So it isn't a sickness that you have only at Iowa City. Don't be mistaken about that.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Mr. Nolan: I want to ask a couple of questions of Mr. Schwab.

Redirect examination

By Mr. Nolan:

Q. What is the fact as to whether or not the cartage company operated by Mr. Mahr makes an additional charge for delivery to Coralville?

Mr. Fowler: Of course, that is objected to as immaterial.

By Mr. Nolan:

Q. If you know.

Mr. Fowler: Objected to as immaterial.

Exam. Carpenter: Objection overruled. Go ahead.

A. I don't believe that he is making any additional charge now.

By Mr. Nolan:

Q. Has he been making it?

A. He did at one time; yes.

Q. What is the fact as to whether or not there are pool cars or whatever other kind of cars you want to call them, a carload of machinery come to Iowa City and the machines are destined to various dealers in that area and then move out by either the dealer himself or by truck line?

A. I haven't had an occasion to use such a method since I have been at Iowa City.

Q. Then Iowa City isn't a place where they ship in a [fol. 712] carload of machinery part of which goes to different dealers?

A. Practically all come in after it themselves.

Q. Who runs this Dan's wholesale house in Coralville? Is that run by Dan Fesler?

A. Dan Fesler.

Q. And was there a witness in route here today for that organization?

A. Both Mr. and Mrs. Fesler.
Q. What happened to them?
A. They had a car accident just this side of Tiffin and returned to Coralville.

Mr. Nolan: That is all.
Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: Hearing is adjourned until 9:30 tomorrow morning at the same place.

(At 5 p. m. on Thursday, March 21, 1952, an adjournment was taken until 9:30 a. m. on Friday, March 22, 1952.)

[fol. 713] TRANSCRIPT OF PROCEEDINGS OF MARCH 21, 1952

Exam. Carpenter: We will proceed, if you are ready.
Mr. Howland: I think we are ready.
Mr. Nolan: Mr. Reed.

FRED L. REED was sworn and testified as follows:

Direct examination

By Mr. Nolan:

Q. State your name, place of residence and occupation, Mr. Reed.
A. Fred L. Reed, Carson, Iowa.

Mr. Fowler: What town?
The Witness: Carson, Iowa.

By Mr. Nolan:

Q. What is your occupation?
A. Lumberman, manager of a lumber yard.
Q. Do you handle the usual line of building materials and supplies?
A. Yes, sir.
Q. Including paints and hardware?

A. Yes.
Q. And fence and things of that character?
A. Yes.
Q. Where is Carson located?
A. Thirty-five miles east of Council Bluffs.
Q. On what highway?
A. Well, we are four miles south of No. 6
Q. Are you located on a railroad?
[fol. 714] A. Yes.
Q. Is that station on the Rock Island?
A. Well, the Rock Island comes in from the north and the Burlington comes in from the south the next day.
Q. You are on a branch, are you not?
A. Yes.
Q. What main highway are you on, if any?
A. Well, 100 goes through right at the edge of town, east and west.
Q. Is that Iowa 100?
A. Yes.
Q. Is that a paved highway?
A. No, sir.
Q. Black top?
A. No, just gravel.
Q. Gravel?
A. Very rough.
Q. Do you have any shipments coming into your place of business from outside of the State of Iowa?
A. Yes, sir.
Q. What are they?
A. We buy all of our hardware from Minneapolis, and we get some merchandise from Chicago, not a great deal though.
Q. How about Omaha?
A. From Omaha, we get a great deal from Omaha, Waterloo and Cedar Rapids.
[fol. 715] Q. How have those shipments been coming into your place of business?
A. Well, practically everything from those places by the Rock Island Motor Transit.
Q. How long have you been in business at Carson, Mr. Reed?

A. About two and a half years.

Q. During that time have you used the Rock Island Motor Transit service?

A. Yes, sir.

Q. I will ask you whether or not you have shipments that are in excess of 5,000 pounds per shipment on occasions?

A. No, I don't think we have ever had but about one.

Q. Was that recently or sometime ago?

A. No, that was a year ago, last summer.

Q. Who handled that?

A. Rock Island Motor Transit.

Q. What has been the character of the Rock Island Motor carrier service, has it been satisfactory or otherwise?

A. Absolutely satisfactory.

Q. State whether or not the continuance of the Rock Island Motor carrier service is reasonably essential and necessary for the conducting of your business at Carson.

A. Well, it is the quickest way we can get anything from the east and north, and we have always found them very fair with our claims. We have had very few claims, [fol. 716] but they have been taken care of promptly.

Q. Have you had any experience in comparing the claims against the Rock Island Motor Transit Company and damage claims against other motor carriers?

A. Not in Iowa, but I know what some of them are in Nebraska, and they have been pretty tough. But not in Iowa, I have never had a chance, because that is the only one we have ever had there.

Q. Is there any other carrier providing the same service as Rock Island Transit?

A. Thornton Transfer from Griswold.

Q. What is that carrier?

A. Thornton Transfer from Griswold runs in and out from Griswold to Omaha and back every day.

Q. But does not provide a direct service from the east, as I understand it?

A. No.

Mr. Howland: East or north.

By Mr. Nolan:

Q. East or north, like the Twin Cities or Chicago?
A. No.
Q. Or Kansas City?
A. No.

Mr. Nolan: That is all. You may cross-examine.
Exam. Carpenter: Mr. Fowler?
[fol. 717] Mr. Fowler: No cross-examination.
Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Saar.

HARVEY SAAR was sworn and testified as follows:

Direct examination

By Mr. Nolan:

Q. Will you state your name, place of residence and occupation?
A. Harvey Saar, Treynor, Iowa.
Q. What is your business?
A. Well, I am here partly as secretary-treasurer of the Wes-Pot Seed Co-op, and I am a retired farmer at other times.
Q. Secretary of the West what?
A. Treasurer of the Wes-Pot Seed Co-op. That is a hybrid seed co-operative.
Q. When you say, "Wes-Pot," do you mean Pottawattamie?
A. That is a registered name. It is incorporated under that, W-e-s P-o-t.
Q. I suppose that is an abbreviation of Pottawattamie?
A. Yes.
Q. What is the general business of this co-op that you are speaking about?
A. Production of hybrid seed corn.
Q. Where is Treynor located?

[fol. 718] A. About 14 miles east of Council Bluffs on Highway 100.

Q. What shipments, if any, does Wes-Pot Seed Co-op handle?

A. There are some shipments, probably the heavier shipments are for this company, and the lighter loads are for the miscellaneous other companies in town. Recently we had to import some seed corn as we had some losses there due to frost. We had 600 bushels of corn come from La Porte City, Iowa, and, of course, we had to negotiate with outside truckers because that is about 17, 18 tons. That cost us 50 cents a mile for the hauling. I don't know how that compares with commercial companies.

We also get sack shipments, such as 10,000 to 15,000 sacks out of Kansas City in a year; they come in from Kansas City.

Q. What size shipments do those sacks come in?

A. The whole thing would come in one load and that would make a pretty good sized load.

Q. That would come in one load?

A. Yes.

Q. How would that come in?

A. They sent it up on—I don't know what trucking firm that was, whether that was an individual company or not. It seems to me that it might have been Watson maybe. I am not sure on that.

Q. Mr. Saar, what service has the Rock Island Motor Transit Company provided the company you represent so far as you know, if any?

[fol. 719] A. Well, we often or sometimes have to get repairs. These corn graders are made at Cedar Falls that are used in corn grading, and in an emergency it has been a benefit to us to get transportation in from the east, because if this had to go to Omaha and back it would be another three, four, five days' delay, which often is the case.

Q. How about any shipments coming from outside of the State of Iowa, has your company had occasion to have those shipments made by the Rock Island Motor Transit Company?

A. Only those that I just mentioned from Kansas City. Our sacks are bought down there mostly.

Q. Do you have any outbound s.. ments?

A. No, it is local.

Q. Does your company handle anything else besides seed corn?

A. No.

Q. And has the Rock Island Motor Transit Company provided a service there to your company?

A. Yes.

Q. Was the service that the Rock Island Motor Transit Company gave your company satisfactory or otherwise?

A. Very good.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Nolan:

Q. What is the population of Treynor?

A. 315 approximately.

[fol. 720] Q. What business establishments are in the town of Treynor?

A. Well, if it is a normal town, it has a hardware store, a couple of implement houses: the public school there uses its service probably as mu.. as anyone else in smaller shipments.

Q. Does Treynor have the usual retail stores and service establishments that a town of 315 has in the ordinary agricultural community in Iowa?

A. I would say they do.

Q. Do you have a school there?

A. A consolidated school there.

Q. What railroad, if any, is Treynor located on?

A. None.

Q. It doesn't have any railroad?

A. No.

Q. Do you hold any office there in any commercial organization or public official?

A. No.

Q. Do you have any personal knowledge as to how shipments come into, say, for instance, the school district there?

A. Yes. I inquired to be informed to see if it was of

any value, and Mr. Mann, the superintendent, said that they have perishables coming in. They have free lunch——

Mr. Fowler: Just a moment. I am going to object to the witness testifying as to what somebody told him for the reason that it is not proper evidence, and it is purely hearsay.

[fol. 721] Exam. Carpenter: Objection sustained.

Mr. Nolan: That is all.

By Mr. Howland:

Q. Mr. Saar, let me ask you, what other transportation service do you have for Treynor other than the service of the Rock Island Motor Transit Company?

A. The Thornton Transfer hauls between Griswold and Omaha, and it is a one-way deal. Your western delivery is all right. There is nothing east, north or south.

Q. In other words, there is no way of getting any shipments by Thornton Truck Line from north, south or east connections, is that right?

A. That is right.

Q. Do you know about what the service of Thornton Truck Line has been to and from Treynor, are you familiar with that?

A. Well, yes, I have lived there all my life, near there or next to Treynor, and they gave the only service available at the time until the Rock Island came in. We have nicer service from Rock Island. What I mean when I say nicer is that they will deliver to your door or they will see that you get it, and oftentimes when Thornton came through and does come through if you are not right at your place of business,—and these small towns have that complication, a lot of times you are not there—he will take it back and bring it the next day.

Q. As a matter of fact, Thornton's usual time of coming out from Omaha is relatively late in the day, is it not?

[fol. 722] A. Yes, it is, right in the evening, right around 6:00.

Q. And do you know about how many units of equipment Thornton operates?

A. Treynor's service is the one truck and then he has a passenger bus, a passenger car.

Q. As far as you know, is that the extent of the equipment which Thornton operates?

A. Yes, it is.

Q. There is a newspaper published at Treynor, I believe?

A. That is right.

Q. And is this a consolidated school that you referred to there, Mr. Saar?

A. Yes.

Q. Do you know, not from what was told to you by somebody else, but do you have any knowledge from having served on the school board or having any contact with the matter as to what the interest of the school people is?

Mr. Fowler: Just a moment.

Mr. Howland: Make your objection, Mr. Fowler.

Mr. Fowler. I will when I get around to it. Just take it easy, my friend. I want to object to it as it is hearsay, unless he is testifying to some fact of which he has personal knowledge.

Exam. Carpenter: Let him answer the question. He is asking about his knowledge.

[fol. 723] A. I can answer it this way. I worked at the school installing an electric communication system in the school, and I was there about a week in the construction of that. I do know that perishables are delivered to the school because they have free lunches there, and they are delivered by the Rock Island.

Q. About how far is it from Treynor to the nearest railroad point where there is rail service available?

A. Ten miles to Silver City, and it would be 10 miles to McClelland. It would be 14 miles to Council Bluffs, and it would be 10 miles to Carson, but that wouldn't be any rail service, because that is hardly adequate for Carson.

Q. That is on a tri-weekly basis with both the Burlington and Rock Island roads alternating, is it not?

A. Yes.

Mr. Howland: That is all. Thank you.

Exam. Carpenter: Cross-examine.

Mr. Fowler: I would like to ask counsel for the applicant if the town of Treynor is a point involved in this application.

Mr. Howland: It is not on Highway No. 6. It is a point involved in the application because of the fact that it cannot be reached by the applicant except over Highway 6.

Mr. Fowler: I am now looking at the list of points to be served that is included in the application, and I don't find the town of Treynor listed.

Exam. Carpenter: It probably should not be listed, but it [fol. 724] is due to the 5,000-pound restriction on Highway 6 and they can't get it there.

Mr. Fowler: Is that true?

Mr. Howland: Yes. It is not located on Highway 6. It is on a route out of Council Bluffs over which the trucks operate via Highway 100, but they come back on to Highway 6 and operate in part over that.

Exam. Carpenter: At Atlantic?

Mr. Howland: At Atlantic, but it is necessary that we operate on Highway 6 to reach the town of Treynor or perform a service there.

Mr. Fowler: And it is located on Highway 6, but it is not located on the Rock Island Railroad?

Mr. Howland: No, it is not on Highway 6.

Exam. Carpenter: It is on Highway 100.

The Witness: Highway 100. It is a state road, Highway 100. You have to go through it. You can't miss it.

Cross-examination.

By Mr. Fowler:

Q. Anyway, Mr. Saar, as far as you are concerned, in the operation of your seed plant the only service that you have from any point outside of the state has been these heavy shipments of sacks or seed corn, and that is sent to you by some other truck line?

A. That is right.

Q. Other than Rock Island?

[fol. 725] A. That is right.

Q. Watson Brothers handled one of them and you don't know who handled the other one?

A. You just shop out for the various services.

Q. So far as your shipments from outside of the state

are concerned, you haven't had any occasion to use the Rock Island service into your town?

A. Anything from the east we would use what we could.

Q. Thornton Transfer is in there every day with a truck?

A. They have a daily route through there.

Q. And they operate from Omaha out into this territory?

A. They come from Griswold, which is 24 miles east.

Q. Is Thornton Transfer Company a regular common carrier that would have a right to interchange with other carriers at Omaha?

A. I would assume so. I can't answer that.

Mr. Fowler: That is all.

Mr. Howland: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Beranek.

ARTHUR BERANEK was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, your place of residence and occupation?

[fol. 726] A. Arthur Beranek, Kalona, Iowa; I am manager of the Farmers Supply Sales, a machinery business in Kalona.

Q. Where is Kalona located for the record?

A. At the junction of 1 and 2, state highways.

Q. And that is about 20 miles southwest of Iowa City, is it not, Mr. Beranek?

A. That is right.

Q. You have a little highway, paved highway, in Kalona, Highway No. 1 from Iowa City?

A. Yes.

Q. You say you are in the implement business?

A. Yes.

Q. Anything else besides farm implement and machinery business?

A. We have some appliances.

Q. What type of appliances?

A. Washing machines, gas stoves and refrigerators.

Q. You testified before in this other case, did you not?

A. Yes.

Q. And you understand the nature of the proceedings here?

A. Yes.

Q. The Rock Island Transit Company is attempting to get permanent authority to continue the Rock Island Motor Transit, motor carrier service, into Kalona?

A. Yes.

Q. From what out of state points do you have merchan- [fol. 727] dise coming to your place of business at Kalona?

A. We have them from Kewanee, Illinois; Sandwich, Illinois, and Chicago.

Q. What shipments are made from those points?

A. Repair parts mostly and appliances from Chicago.

Q. What would be the ordinary size of shipments that you get from those points?

A. Oh, seldom more than 1,000 pounds, I would say.

Q. Have you ever had occasion to get shipments in excess of 5,000 pounds from any of those points?

A. I don't believe so.

Q. How long have you been connected with the company there in Kalona?

A. About four years in the last five.

Q. Kalona is how large a town?

A. About 800 population, I believe.

Q. And it has the usual retail and service establishments, is that not true, for a town that size?

A. Yes.

Q. In a good fertile agricultural area?

A. I believe more than some.

Q. Didn't you have a turkey dressing plant there at one time?

A. We have now.

Q. Is that still operating?

A. It is just new. It has only been operating for a year or so.

[fol. 728] Q. Is anybody here today from that organization?

A. No.

Q. And that is where they dress turkeys and ship them out, is that right?

A. Yes.

Q. Around Kalona what is the fact whether or not there are a lot of turkeys raised, around Kalona and Wellman?

A. Yes, there is.

Q. What railroad line is Kalona located on?

A. Rock Island.

Q. Is that a main line or branch line?

A. I believe you would call it a branch line.

Q. What is the type of service that the railroad provides Kalona? You don't need to be afraid of hurting anybody's feelings.

A. We usually get what we order by railroad, but we can't depend on the time and the service isn't like we like to have it.

Q. How do you get most of your shipments in there?

A. Most of them come in on the Rock Island truck.

Q. Rock Island Motor Transit truck?

A. That is right.

Q. What has been the nature of that service, satisfactory or otherwise?

A. Very much so.

Q. Are there any regular route trucks operating through Kalona, Iowa?

[fol. 729] A. No.

Q. Are there any other truck lines operating through Kalona other than the Rock Island Motor Transit Company?

A. No.

Q. What would be the effect on your company's business if the Rock Island Motor Transit Company was required to cease operating as it has been operating?

Mr. Fowler: That is objected to as immaterial for the reason there is no such fact established in this record or no such contention being made by the applicant.

Exam. Carpenter: The objection is overruled. Go ahead and answer.

The Witness: What was the question?

Exam. Carpenter: Read it.

(Question read.)

A. Well, it would just be inconvenient for ordering parts and depending on them the way we do now.

By Mr. Nolan:

Q. Do you know of any other service you could get that the Rock Island Motor Transit is now giving you?

A. Not through Kalona.

Mr. Nolan: You may cross-examine.

Mr. Fowler: No cross-examination.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Gates.

[fol. 730] W. L. GATES was sworn and testified as follows:

Direct Examination.

By Mr. Nolan:

Q. Will you give the reporter your name, place of residence and occupation, Mr. Gates?

A. W. L. Gates, and I live at Washington, Iowa; I am in business with my two sons at Kalona.

Q. How far is Washington, Iowa, from Kalona?

A. About 16 miles.

Q. Do you commute back and forth?

A. Right.

Q. What business are you in in Kalona?

A. We have the Chevrolet and John Deere franchise.

Q. You are the Chevrolet dealer and the John Deere dealer?

A. Right.

Q. As Chevrolet dealer you handle Chevrolet automobiles and parts and supplies, I assume?

A. We do.

Q. As John Deere dealer you handle the John Deere farm implement line, is that correct?

A. And parts.

Q. And parts?

A. Yes.

Q. Do you handle any other line of farm equipment and machinery, Mr. Gates?

[fol. 731] A. Not major but a few. We have such things as manure loaders, post hole diggers, wagon loaders and odds and ends of that kind that John Deere doesn't make that we handle.

Q. You handle the general farm equipment line?

A. Yes.

Q. Hog waters and tanks?

A. Not hog waters, not much in the hardware line.

Q. You testified before in this case. You understand, do you not, the general nature of what has been developed here?

A. We are very much worried about it.

Q. What did you say?

A. We are very much worried about it.

Q. Why.

A. Without the Rock Island Motor freight I don't know just what we would do. I suppose we would have to hire another man, an extra truck. What we would do to take care of our parts service is a problem I hope we don't have to figure out.

Q. What out of state shipments do you have coming into your place of business at Kalona?

A. John Deere at Moline is a good share of it, but not all of it. The main warehouse for parts is at Moline and a good share of the machinery comes from Moline.

Q. How about your Chevrolet parts?

A. The large part comes from Des Moines, but all back orders come from Chicago and Janesville.

[fol. 732] Q. With what frequency would you say you have shipments coming into your place of business by the Rock Island Motor Transit Company?

A. We very seldom miss a day.

Q. And what would be the average size of the shipments, Mr. Gates?

A. Oh, average would be hard to determine because it is from 100 pounds up to a ton.

Q. Did you ever have occasion to have shipments come in excess of 5,000 pounds?

A. I believe not.

Q. You say there isn't any other truck service available?

A. None whatever.

Q. And the rail service is very slow, is it not?

A. It comes in anywhere from 4:00 o'clock until 7:00 o'clock at night once a day and goes back sometime during the night. I wouldn't brag about the Rock Island Railroad service. They don't have the facilities there. It is just a branch from Iowa City to—I forget how far west it does go.

Q. And it handles primarily carload shipments of coal and things of that kind?

A. Right.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Mr. Fowler: I have just a few questions.

[fol. 733] Cross-examination.

By Mr. Fowler:

Q. Do you have a regular daily rail service from Iowa City into Kalona?

A. It comes in in the evening after our closing hours, as a rule.

Q. On l.c.l. shipments?

A. Sir?

Q. On small shipments, l.c.l. freight?

A. You mean on the railroad?

Q. Yes.

A. I suppose they would handle anything, but you wouldn't be able to get it that day, because their office is locked when it comes in.

Q. I didn't understand that they did have. They do have then a regular daily way freight service into Kalona by railroad handling l.c.l. shipments?

A. I don't believe I understand what l.c.l. shipments mean.

Exam. Carpenter: Less than carload.

The Witness: Less than carload?

By Mr. Fowler:

Q. Yes.

A. That I wouldn't say because we never had anything less than carload come in.

Mr. Fowler: That is all.

Mr. Howland: If you are interested in the fact, it is true that except for extremely heavy or bulky l.c.l. shipments, [fol. 734] any rail shipments that they move from Iowa to Kalona are by Rock Island Motor Transit truck. Now, this service on the branch line goes from Iowa City down through Riverside, Kalona, Wellman and the terminus of that branch is at Montezuma, Iowa, and this train handles only as far as Wellman and Kalona are concerned only the extremely heavy and bulky l.c.l. items. They do render l.c.l. service to points farther west on that line where the Rock Island Motor Transit Company does not possess motor carrier authority.

Mr. Fowler: I see. Thank you. That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Swartzendruber.

ELLIS SWARTZENDRUBER was affirmed and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give the reporter your name, place of residence and occupation?

A. Ellis Swartzendruber; I am secretary-treasurer of the Washington County Farm Stores at Kalona.

Q. How long have you been connected with that business?

A. Five years.

Q. What is the nature of the business handled by your company?

A. Farm implements.

Q. What line of farm implements?

[fol. 735] A. J. I. Case.

Q. And you handle parts for Case tractors and other case machinery?

A. Yes, sir.

Q. Does the J. I. Case Company make a full line of farm equipment, tractors, combines and plows?

A. Yes, sir.

Q. Disks and everything else?

A. Yes.

Q. In addition to the J. I. Case line what other farm equipment do you handle?

A. We handle accessories and accessory items such as manure loaders, farm wagons and we also handle the New Holland line.

Q. Manure loaders, farm wagons and things like that are made by other companies other than the J. I. Case Company?

A. That is right.

Q. From what out of state points does your company have merchandise shipped into your place of business?

A. Rockford, Illinois; Racine, Wisconsin, and Streater, Illinois.

Q. And with what frequency would you say you would have shipments come into your place of business in less than truck loads or less than truck load quantities?

A. Four to five days a week.

Q. What company has been bringing those shipments to your place of business?

[fol. 736] A. The Rock Island Motor Transit.

Q. What has been the character of that service, satisfactory or otherwise?

A. Very satisfactory.

Q. You heard the testimony of Mr. Gates and Mr. Beranek that there are no other truck companies available to serve Kalona?

A. That is right.

Q. Do you know of any truck company that would provide a similar service to the Rock Island Motor Transit?

A. No, sir.

Q. Do you have any shipments that exceed 5,000 pounds in weight?

A. Very seldom.

Q. That you would have occasion to use the Rock Island Motor Transit to transport them?

A. No.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Brenneman.

Paul Brenneman was affirmed and testified as follows:

Direct examination.

By Mr. Nolan:

Q. What is your full name, Mr. Brenneman, your place [fol. 737] of residence and occupation?

A. Paul Brenneman.

Q. And you live at Kalona?

A. Yes.

Q. What is your occupation?

A. I am a partner in the Minneapolis-Moline Farm Implement business and DeSoto-Plymouth cars.

Q. How long have you been so engaged?

A. Five years.

Q. And Minneapolis-Moline is a manufacturer of farm implements, is it not?

A. That is right.

Q. Including tractors and the other allied line of farm equipment?

A. Yes.

Q. And you say you are a DeSoto dealer here too?

A. Yes.

Q. That is automobile dealer?

A. Yes.

Q. How about Plymouth, do you handle Plymouth?

A. Yes.

Q. Do you handle parts and supplies for both the DeSoto and the Plymouth automobiles in that area?

A. Yes.

Q. You say you are a franchised dealer for the Min-
[fol. 738] neapolis-Moline line farm equipment?

A. Yes.

Q. Where do you get any out of state shipments from, Mr. Brenneman?

A. Moline, Illinois; Peoria, Illinois, and a few from Kansas City.

Q. What transportation agency have you been getting those shipments through?

A. Rock Island Motor Transit.

Q. And have you been familiar with the service of the Rock Island Motor Transit Company during the time you have been connected with the business there in Kalona?

A. Yes.

Q. What has been the nature of that service, satisfactory or otherwise?

A. We like it very good.

Q. Do you know of any other transportation agency other than Rock Island Motor Transit which would give you that daily service in and out of Kalona?

A. No, I don't.

Q. Do you have occasion to make any outbound shipments, such as sending parts to the factory for repairing or sending parts back that you can't use or anything like that?

A. Very seldom.

Q. How about the size of shipments, do you ever have [fol. 739] occasion to receive shipments in excess of 5,000 pounds?

A. Not to my knowledge.

Q. I guess I asked you how frequently you had shipments come in, did I not?

A. About four times a week on the average.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Howland: Mr. Ebert.

WILLIAM EBERT was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. William Ebert.

Q. Your home is at Hancock, Iowa?

A. That is right.

Q. Hancock is located south of Avoca and is a point on the new line of railroad that the Rock Island is constructing between Atlantic and towards Council Bluffs?

A. Yes, I think they are going to miss the town about a half mile. I just came back from California night before last and I saw where there was a cut, and I don't know just exactly all the information on that new road, but it is going to miss the town just a little ways.

[fol. 740] Q. Mr. Ebert, what is your business?

A. I am the owner of the Ebert Oil Company.

Q. And that is a distributor of petroleum products located there at Hancock?

A. Tires, batteries, oil and petroleum products.

Q. To what extent, in what territory do you operate that business?

A. My franchise calls for from Avoca on No. 64 down to Hastings, Iowa.

Q. How many dealers or other concerns do you service or sell to, Mr. Ebert?

A. We own several stations around there, that is, have re-sale accounts, I would say about seven.

Q. How many stations do you sell to?

A. That is what I mean, it is about seven outlets.

Q. Seven outlets?

A. Yes.

Q. Do you have occasion to get shipments from outside the State of Iowa?

A. Oh, yes.

Q. What do those shipments consist of, what type and character of commodities?

A. I am just putting in an order today for oils out of Chicago.

Q. That is lubricating oils?

[fol. 741] A. Yes, canned oils, and then we have quite a bit of stuff of the other refinery at Kansas City, Phillips Petroleum Company.

Q. How does that move into your territory there, do you get it by motor truck or how?

A. Our light refined stuff comes in by transport.

Q. By transport truck?

A. Yes, and our spring oils usually come in in carload lots by Rock Island. That is when we have our spring oils and greases. We pool a car and have that come in that way. All other shipments during the year or what they call drop shipments are Rock Island Motor freight.

Q. About what would be the usual size of those shipments that you have been receiving by Rock Motor Transit?

A. Oh, I tell you, we get tires, batteries, greases and stuff like that that you always need. You really have a little shipment on there pretty near every time he stops.

Q. About what size in pounds or weight?

A. We usually want 100 pounds or better.

Q. You have occasion to get shipments in excess of 5,000 pounds, except when you get your carload shipments in?

A. Not very often. That would be a rare case.

Q. But you do have a need for a continual practically daily service?

A. Yes.

Q. To get the products that you sell?

[fol. 742] A. That is right.

Q. Into your place of business?

A. That is right.

Q. What truck service by other carriers do you have at Hancock other than the Rock Island Motor Transit?

A. We have truckers there that truck stock.

Q. Those are truckers that haul livestock to the Omaha market?

A. That is right.

Q. But as far as the common carrier truck line that operates between town or on a regular schedule, do you have any?

A. There a line that goes through there when the roads are open. Of course, we have been on a detour for a long time, a year or so, but there is Iowa-Nebraska that comes through there but they don't service Hancock.

Q. They go through but apparently they have no rights to serve Hancock as such?

A. It seems that way.

Q. At least they don't render that service?

A. No.

Q. And haven't to your business?

A. No, they haven't. They go to Oakland. They deliver to Oakland, but their headquarters are at Avoca.

Q. What business concerns are there located at Hancock, Iowa? There is an elevator, as I recall it, there and several retail stores, including a general store and a hardware store, I believe.

[fol. 743] A. Implement dealer.

Q. And an implement dealer. I believe there are two implement dealers, am I wrong in that?

A. No, there is just the one.

Q. Just the one?

A. Yes.

Q. Other than this service by Rock Island Motor Transit truck which you have referred to, is there any other regular common carrier service available to Hancock, except the Rock Island Motor Transit?

A. No, not at the present time that I know of.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Cross-examine.

Mr. Fowler: No cross.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Hibbs.

CHARLES H. HIBBS was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence and occupation?

A. Charles H. Hibbs; I am employed by the Henry Gode Dry Goods Company at Marengo, Iowa.

[fol. 744] Mr. Fowler: Is that Hibbs or Gibbs?

The Witness: Hibbs, H-i-b-b-s.

By Mr. Nolan:

Q. That is a retail merchandise store, is it not?

A. Yes, sir.

Q. How large a town is Marengo?

A. 2112 I believe is the last census.

Q. And your store is the largest retail dry goods store there, is it not?

A. Yes, sir, it is.

Q. How long have you been associated with the store, Mr. Hibbs?

A. Since 1931.

Q. Are you familiar with the source of supply of merchandise for your store?

A. Yes, sir.

Q. What out of state points do you have shipments coming to your store from?

A. St. Louis and Chicago principally.

Q. And with what regularity do you have such shipments coming into your place of business?

A. I believe twice a week.

Q. You average two shipments a week?

A. I believe so.

Q. What would be the size of those shipments?

A. Well, not large. I would say probably between 100 and 300 pounds.

[fol. 745] Q. They are in the nature of ladies' dresses and things of that character?

A. That is right, general dry goods merchandise and also dishes and such as that.

Q. What company has been providing your transportation service for those shipments that you have spoken about?

A. Well, most of it, practically all of it, by the Rock Island Motor Transit.

Q. And how has that service been, satisfactory or otherwise, Mr. Hibbs?

A. It has been satisfactory.

Q. Do you know of any other company that provides a daily motor carrier service in and out of Marengo other than the Rock Island Motor Transit Company?

A. No, sir, I don't.

Q. Have you had occasion to have shipments come into your place of business by other truck companies?

A. Very, very seldom.

Q. That would be an occasional shipment, is it?

A. That is right.

Q. Was it at your specification or was it at the shipper's routing?

A. The shipper's.

Q. The shipper's mistake?

A. Yes.

[fol. 746] Q. Do you specify the routing of your shipments ordinarily?

A. Well, I don't just know about that. I think usually we do not.

Q. But they generally come or practically all come by Rock Island Motor Transit?

A. Yes, that is right.

Q. You say you don't know of any other trucking company that provides a regular motor carrier service to Marengo?

A. That is right.

Q. Marengo is located on the main line of the Rock Island Railroad, is it not?

A. Yes, sir.

Q. But it is located on but off of U. S. Highway No. 6, isn't that true?

A. That is right.

Q. In other words, U. S. Highway No. 6 runs about a half a mile away from the town?

A. That is right.

Q. Or to the side of the town?

A. Yes.

Q. You say the population of Marengo is around 2100. That is the county seat of Iowa County?

A. Yes, sir.

Q. What is the fact as to whether or not Marengo has the usual retail and service establishments of a county seat town in an agricultural community in Iowa?

[fol. 747] A. That is right.

Q. Do you have any industry there?

A. Not in the sense of a factory. We have just a little manufacturing done there.

Q. What?

A. Knipple Studio does advertising work for companies all over the country.

Q. He manufactures these ear corn plates?

A. Along with other things.

Q. Are those metal or plastic?

A. His are masonite.

Q. Don't you have a corn canning factory there?

A. That burned down.

Mr. Nolan: I guess that is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. You say there aren't any other carriers serving Marengo?

A. No, sir, I don't know of any others that make stops there?

Q. There is a cartage company there, isn't there?

A. There is a transfer company, yes, sir.

Q. And that transfer company is the one that actually delivers the merchandise to your store, isn't it?

A. Yes, sir.

[fol. 748] Q. For the Rock Island?

A. Yes.

Q. And it also delivers for the other carriers that go through there, doesn't it?

A. I can't say about that.

Q. Haven't you had any shipments at all by these other carriers?

A. The occasional ones that we have had they have brought the big truck right to the door.

Q. To your door?

A. That is right.

Q. But you have a service in there by other carriers?

A. Yes, sir, there are other trucks that come into town.

Q. As I understand it, you prefer the Rock Island Motor Transit Company?

A. I think our experience has been that we have had just a little bit better service from them.

Q. And for that reason you prefer them?

A. That is right.

Mr. Fowler: I can't quarrel with you on that.

Mr. Nolan: Are you through?

Mr. Fowler: Yes.

Exam. Carpenter: Redirect?

Redirect examination.

By Mr. Nolan:

Q. Mr. Hibbs, you know of your own knowledge that there are a great number of trucking companies that oper- [fol. 749] ate on U. S. Highway No. 6?

A. Yes.

Q. You see them go by?

A. Yes.

Q. But do those companies operate through the town of Marengo?

A. Occasionally I see a Des Moines Transportation Company truck in Marengo, and I have seen I believe the Iowa-Nebraska truck or some such name.

Q. You say that is the only occasion?

A. Occasionally.

Q. But the point I am trying to get at is the main highway is a half mile out of town or something like that?

A. Yes, sir.

Q. And to get into the town of Marengo you have to cross the railroad tracks, and to leave town you have to cross them again?

A. Yes, sir.

Q. To get back on Highway No. 6?

A. Yes.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Howland: Mr. Flansburg.

A. C. FLANSBURG was sworn and testified as follows:

[fol. 750] Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. A. C. Flansburg.

Q. You live where?

A. In Tiffin.

Q. And Tiffin is located where with respect to Iowa City?

A. About eight miles west, just south of Highway 6.

Q. And about what is the population of Tiffin?

A. Approximately 250 people.

Q. And your business is what?

A. I am in the hardware business and president of the local school board.

Q. What business establishments are located at Tiffin?

A. Well, there are two grocery stores, general merchandise stores, and the hardware, which also consists of appliances and seed, and complete locker plant and service. Of course, the regular average taverns and barber shop and filling stations.

Q. I understand there is a very nice restaurant there?

A. The food is fine. We supply the fuel for them.

Q. In connection with your business, Mr. Fransburg, do you have occasion to get the merchandise which you handle from points outside the State of Iowa in some instances?

A. Our water pressure systems come from Meyers and Sons in Ashland, Ohio; our filters and softeners from Minneapolis, Minnesota; our lawn mowers and another [fol. 751] brand of water systems, pressure systems, we handle from Racine, Wisconsin, and stoves from Quincy, Illinois. The school receives most all of their janitorial supplies and most of their school supplies from Galesburg, Illinois.

Q. I take it that there is a more or less continuous flow of traffic, perhaps not in large shipments, but that these shipments are moving into Tiffin regularly from interstate points?

A. Yes, sir.

Q. By what means, what service is availed of for the handling of shipments of that character?

A. Do you mean who brings the merchandise?

Q. Who brings the merchandise into your place?

A. The Rock Island Motor Transit.

Q. What other transportation agencies in the motor carrier field serve the town of Tiffin?

A. I have been in Tiffin 15 years with the exception of during the second World War I was in the Sub-Marine Service three years, and I am not acquainted with any carrier service that stops in Tiffin.

Q. Of course, Tiffin is located, as you said, immediately south of Highway No. 6?

A. Yes.

Q. I take it that there are a large number of truck lines that operate through on U. S. Highway No. 6?

A. Oh, yes, there are.

[fol. 752] Q. But do any of those truck lines within your knowledge and your experience perform any service to the Tiffin community?

A. Not that I know of.

Q. About what would be the size of the shipments that your merchants would have occasion to make there at Tiffin, that is as to the maximum size? Do they need service of more than 5,000 pounds for a single shipment?

A. Seldom.

Q. Only on occasion?

A. Seldom.

Q. The only occasion would be if there were an unusual condition where some very heavy or bulky merchandise was ordered in quantity?

A. Yes.

Q. Do you understand that the Rock Island Motor Transit Company at present is operating on a purely temporary authority as far as interstate service is concerned?

A. That is the only reason I am here.

Mr. Bradshaw: I object to that as leading.

Exam. Carpenter: I will overrule the objection. Go ahead. I didn't get the answer.

The Witness: That is the only reason I am here.

By Mr. Howland:

Q. What would be the effect on your community and the people doing business there in the event that the present Rock Island Motor Transit service was entirely [fol. 753] eliminated or substantially curtailed?

Mr. Bradshaw: I object to that question on the grounds that it is irrelevant, immaterial and the record doesn't show that any such situation exists.

Exam. Carpenter: The objection is overruled. Go ahead and answer.

The Witness: What was the question?

Mr. Howland: Will you read it?

(Question read.)

A. It would hurt our business a lot. It would slow things down quite a bit.

By Mr. Howland:

Q. Tiffin was a station on the Rock Island Railroad. Do they still have any depot there?

A. No.

Q. It burned down some years ago?

A. Yes, and the train ran through a little shed they set up.

Q. And it hasn't been replaced?
A. No.
Q. Is there any regular truck service serving Tiffin from Iowa City?
A. No.
Q. Would you say, Mr. Fransburg, as far as the people of Tiffin are concerned, and particularly the merchants doing business there, that a continuation of the Rock Island Motor Transit service in interstate commerce is required by that community?
[fol. 754] A. The school and my place of business needs it partly. I have not polled the rest of the merchants.

Mr. Howland: That is all.
Exam. Carpenter: Cross-examine.
Mr. Fowler: No questions.
Exam. Carpenter: You are excused.
Mr. Howland: Thank you very much.

(Witness excused.)

Mr. Howland: Mr. Rathjan.

CLARENCE RATHJAN was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name please so that we can all get it?
A. Clarence Rathjan.
Q. And you live at Marengo, Iowa?
A. Marengo, Iowa.
Q. What is your business?
A. In the automobile business.
Q. Are you a dealer in new cars?
A. Yes, we sell Ford cars and trucks.
Q. You have the Ford agency?
A. That is right.
Q. In that general territory, in Marengo?
A. That is right.

[fol. 755] Q. How long have you been in business there?

A. Since 1925.

Q. And I believe you were here while Mr. Hibbs was on the witness stand?

A. That is right.

Q. Is there anything that you could add with respect to the type and character of the community of Marengo as far as the business which is there carried on to what Mr. Hibbs has said?

A. I don't know that there is much that we could add on to what Mr. Hibbs has mentioned. You asked him about the factory and there is only just the one small factory. We have a seed plant, seed corn plant, there. Of course, that is not really a factory.

Q. That processes seed corn?

A. That processes its own seed corn.

Q. That is the Pioneer Hybrid?

A. Pioneer Hybrid, yes, and we have Swift and Company.

Q. That is a produce company?

A. Produce company.

Q. Produce and poultry?

A. Yes.

Q. And retail stores, of course, you have the usual drug stores, a number of grocery stores, general merchandise stores and some chain organizations and matters of that sort?

A. Hardware stores and implement dealers.

Q. Implement dealers?

[fol. 756] A. Yes.

Q. The Iowa County Highway Department keeps its equipment for highway maintenance work, I believe, at Marengo?

A. Yes, the highway.

Q. And the Iowa County Highway Department maintains a number of road service trucks and patrol grader units and things of that character?

A. Yes. They have what we call a repair shop and service there at Marengo.

Q. What occasion do you have to have shipments made by motor carrier of freight to your place of business?

A. Weil, twice each month we have shipments which we class as our parts orders from the Ford Motor Company, and then there is other shipments or in between those times that we receive on occasions. We also receive merchandise from some of your other wholesalers here in Des Moines, such as Herring Wissler Company and Hawkeye Truck and some of those places.

Q. But those are in the nature of automobile accessories or supplies?

A. That is right.

Q. Where do you get your shipments of Ford parts and service supplies, is that from outside of Iowa?

A. No, that is here at East Walnut.

Q. Here in Des Moines?

A. At East Walnut.

[fol. 757] Q. Do you have occasion to get shipments from points where the shipments originate outside of Iowa?

A. Yes. We have some stuff on some items and they list them as this, drawing from other locations, and they come from the Central Parts Depot in Dearborn, Michigan.

Q. How do you customarily get those shipments?

A. Well, you mean those outside shipments?

Q. Yes. How do you get them into your place of business?

A. They are usually brought up by our local carrier. Your freight company brings most of that stuff in, and then there is a local carrier that delivers there for the Rock Island Motor Transit, although there has been some of those parts that have been brought in by other carriers.

Q. Do you know about what the service of the Rock Island Motor Transit Company to Marengo has been as on a daily basis or otherwise?

A. It has been very good, the service has been for us.

Q. Do you know of any other truck line that renders the same frequency of service that is coming as regularly?

A. Not as frequent. We see other trucks in there.

Q. What concerns are those?

A. The names of them?

Q. Yes.

A. Well, there is Des Moines Transportation. That would be the one that would register with me first.

[fol. 758] Q. Do you know how frequently that company makes Marengo as a delivery point?

A. No, I don't. We don't see them as often. They might be in there times when we don't see them, but we don't receive much merchandise through them.

Q. Would you say that a substantial curtailment or the elimination of this interstate service of the Rock Island Motor Transit Company would have any effect on your business there at Marengo?

Mr. Fowler: Just a moment. That is objected to as immaterial for the reason it is assuming a fact that is not substantiated in this record.

Exam. Carpenter: The objection is overruled.

A. I would say it would.

By Mr. Howland:

Q. And in what respect and to what extent?

A. Well, here is what this motor carrier does. They have their depot there and they travel during the night and a lot of time they leave the merchandise for us, and then their local carrier delivers it to us the next morning. Without that, why, we might have folks waiting for that material that is needed for a considerable time.

Q. And some of your shipments are of a relative emergency character, particularly your repair parts?

A. That is right.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Cross-examine.

[fol. 759] Mr. Fowler: No cross.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Howland: Mr. Jacobs of Marengo.

EVERETT L. JACOBS was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?
A. Everett L. Jacobs.
Q. You live in Marengo, Mr. Jacobs?
A. Yes.
Q. And you are in business there?
A. Western Auto Associate Store.
Q. Is that an individually owned store?
A. That is right.
Q. In which you handle the line of merchandise distributed by the Western Auto Supply Company of Kansas City, Missouri?
A. Yes, sir. Our distributing point is Dubuque.
Q. That is, your source of supply for that line is Dubuque?
A. Right.
Q. Do you also handle other lines of merchandise?
A. We handle quite a few items of hardware merchandise.
Q. And your source of supply for those hardware lines is where?
A. Minneapolis.
Q. What is included in the hardware lines that you [fol. 760] retail there? Does that include paints and varnishes?
A. No, sir, that comes from Western Auto. Our hardware line includes such as galvanized ware and so forth.
Q. Those shipments you get from Minneapolis, Minnesota?
A. Yes, sir.
Q. What other shipments do you get from interstate points outside of Iowa?
A. I have some shipped in occasionally from St. Louis.
Q. And this hearing is concerned particularly with interstate shipments, so I will ask you particularly with respect to the shipments from Minneapolis and from

St. Louis; what service do you have on those shipments, by what means do you customarily get them?

A. Rock Island truck.

Q. The Rock Island Motor Transit Company?

A. Right.

Q. You have heard the testimony of Mr. Rathjan and also Mr. Hibbs with respect to the Marengo community, have you not?

A. Yes, sir.

Q. Is there anything you can add with respect to the type and character of the community and the needs of the community from a transportation standpoint?

A. In other words, you want to know if we could be serviced any other way?

Q. Let me ask you this question. Would you concur in [fol. 761] the evidence that has been given by Mr. Hibbs and by Mr. Rathjan so far as the description of this community of Marengo is concerned?

A. I think they done a very nice job.

Q. All right. With respect to these shipments that you receive from the Twin Cities or Minneapolis or from St. Louis, do you know of any other service available to Marengo that would handle those shipments on the same basis as to frequency of service that is provided by the Rock Island Motor Transit Company?

A. I do not.

Q. What would be the effect on your business there and upon your community by the elimination or substantial curtailment of this interstate service which is now being provided?

Mr. Fowler: Just a moment. That is objected to for the same reason that has been stated with respect to questions of the same import.

Exam. Carpenter: The objection is overruled.

Mr. Howland: You may answer the question.

A. Well, it would cause us a lot of wait on quite a few of the different items of merchandise, where otherwise we can have it in a very short time on the Rock Island Motor Transit.

By Mr. Howland:

Q. Is there anything that you wish to add as far as the effect of the need of your business for this service, Mr. Jacobs?

Mr. Fowler: Just a moment. That is objected to for the [fol. 762] reason it doesn't make a proper record. It calls for a voluntary statement of the witness.

Mr. Howland: I will withdraw the question in that form. Let me ask it this way:

By Mr. Howland:

Q. Other than what you have told us, is there any phase of your business that would be adversely effected by an alteration or reduction of the Rock Island Motor Transit Company's service?

Mr. Fowler: That is objected to as repetitious.

Exam. Carpenter: Objection sustained.

Mr. Howland: You may cross-examine.

Exam. Carpenter: Cross-examine.

Mr. Fowler: No cross.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: We will take a little recess now.

(Short recess.)

Mr. Howland: Mr. Cole.

L. L. Cole was recalled and testified further as follows:

Cross-examination.

By Mr. Fowler:

Q. Mr. Cole, I believe when you stepped aside, you had just discussed with Mr. Howland this document, which is identified here as Exhibit No. 15?

A. That is right.

[fol. 763] Q. With respect to page one of the exhibit you have included, of course, all operations of the Rock Island Motor Transit Company whether interstate or intrastate throughout its system?

A. For those stations that are listed.

Q. That is right.

A. Yes.

Q. Do you have intrastate operations elsewhere than in the State of Iowa?

A. Yes, sir, we do have.

Q. Have you included in the revenue items the charges which you have made against railroad company for your pickup service and your road haul service on railroad freight?

A. No, we have not.

Q. I believe the testimony shows that with respect to the peddle operation out of Iowa City that about 20 percent of the freight was railroad freight. You have not included in these figures on page one of exhibit 15 any revenue of that character?

A. No, we have not.

Q. Throughout your exhibit 15 you haven't made any allowance for the natural decline in traffic which I think the industry generally experiences in the months of January, February and March, have you?

A. These figures are taken from our own records.

Q. Is it not a fact that traffic is down the forepart of a year, and particularly that is true this year?

[fol. 764] A. I have no definite information. I have heard rumors to that effect.

Q. As I understand it, you have selected for the purpose of your exhibit on page one in the months of September and October, 1950, compared with the months of September and October, 1951?

A. That is one of the periods.

Q. I mean on your first group?

A. That is correct.

Q. And your second group is for the months of November and December of each year?

A. That is true.

Q. And your third group is for the months of January and February of each year?

A. That is correct.

Q. The figures that appear on page two of your exhibit apparently reflect the operations from Chicago to the points designated on your exhibit in interstate commerce only?

A. No, that includes intrastate as well.

Mr. Howland: That includes all business moving out of Chicago to these destinations.

The Witness: That is correct.

By Mr. Fowler:

Q. How would intrastate be involved on page two of your exhibit?

A. Well, in this event there wouldn't be any, because there is no intrastate points listed.

[fol. 765] Q. Again you have not allowed for any revenue which Rock Island Motor Transit receives for the transportation of rail freight?

A. We have not allowed for that.

Q. Page three of your exhibit would be confined to the interstate operation?

A. That would be correct.

Q. And again you have not made any allowance for revenue you received from the railroad?

A. We have not.

Q. Page four, of course, is entirely intrastate?

Mr. Howland: Oh, no.

A. No, there is some interstate in there too.

By Mr. Fowler:

Q. Does it include both interstate and intrastate?

A. It includes both.

Q. And again no allowance for the outside revenue you received from the railroad?

A. There is no allowance for that.

Q. Does page five include likewise interstate and intrastate?

A. That is correct.

Q. And the same situation would be true?
A. That is true.
Q. Page six is the same?
A. They are all prepared in the same manner.
Q. And includes your intrastate operations wherever [fol. 766] it is applicable?
A. That is true.
Q. And your interstate?
A. Yes.
Q. Without any allowance for any railroad revenue?
A. That is true.
Q. You told me, I believe, the other day that the figures which you used for the preparation of this exhibit 15 were taken from records which you have in your office which are kept in the ordinary and usual course of business?
A. That is correct.
Q. I am willing to accept that understanding, but merely for the record is it satisfactory that if someone else interested in this case wants to check those figures, they would be available to him?
A. I would be very happy to go over them.

Mr. Fowler: Exhibit 15 is objected to as immaterial, particularly for the reason it includes revenue from intrastate operations, and also it does not correctly record the revenue which Rock Island Motor Transit Company receives at these various stations inasmuch as the earnings for the transportation of railroad freight are not included and the compensation which is received by the trucking division for rail freight handled for the railroad. I am not objecting for the reason that the underlying data on which the exhibit was based has not been produced.
[fol. 767] Exam. Carpenter: The objection is overruled and the document is received in evidence as exhibit No. 15.

(Applicant's exhibit No. 15, Witness Cole, was received in evidence.)

By Mr. Fowler:

Q. Could you tell me, Mr. Cole, roughly speaking, what percentage of your revenue is derived from intrastate operations?

A. No, I couldn't.

Q. Is it substantial?

A. It is.

Q. But in relation to the total you have no figures in mind?

A. No, I don't have.

Mr. Fowler: That is all.

Exam. Carpenter: Proceed, Mr. Howland.

Mr. Howland: Will you mark this for identification as exhibit No. 16?

(Applicant's exhibit No. 16, Witness Cole, was marked for identification.)

Further direct examination.

By Mr. Howland:

Q. Mr. Cole, did you at my request have a check made in which you participated in the inter-line shipments received from connecting carriers at various points involved in the so-called White Line and Frederickson routes of the Rock Island Motor Transit Company, which check was [fol. 768] designed to show the number of such inter-line or connecting line shipments received during the period November 1 to December 31, 1950, and a similar period for 1951?

A. I did.

Q. I will ask you to examine the sheet marked for identification as exhibit No. 16 and tell us what that is and whether you prepared it.

A. This is a summary of interstate shipments received from connecting line carriers at Chicago, Illinois, Davenport, Cedar Rapids and Des Moines, Iowa, and Omaha, Nebraska, having destinations at points covered by the application during the periods of November and December, 1950 and 1951.

Q. Did you include in the 1950 period shipments having a weight in excess of 5,000 pounds?

A. They were eliminated.

Q. They were eliminated?

A. Yes.

Q. Do you know whether there were particularly at Chicago and Des Moines a number of such shipments in November and December, 1950?

Mr. Fowler: That is objected to for the reason it is not the best evidence.

Exam. Carpenter: Will you read the question, please?

(Question read.)

Exam. Carpenter: Off the record.

[fol. 769] (Discussion off the record.)

Mr. Fowler: I will withdraw the objection.

Mr. Howland: Do you have the question in mind?

The Witness: I have the question in mind.

Mr. Howland: All right. Answer.

A. That was particularly true in Chicago, but I don't recall the exact volume at Des Moines.

By Mr. Howland:

Q. Do you recall the volume in Chicago?

Mr. Fowler: I am going to object to that.

Mr. Howland: All right.

Exam. Carpenter: Do you withdraw the question?

Mr. Howland: We will withdraw that question then.

By Mr. Howland:

Q. I call your attention particularly to the fact that at Des Moines, Iowa, and Omaha, Nebraska, particularly Des Moines, Iowa, the number of shipments in the 1950 period was 456 and in the November-December, 1951 period a total of only 182. That was true notwithstanding the fact that you did not include in your November and December, 1950 shipments any in excess of 5,000 pounds?

A. That is true.

Exam. Carpenter: Of course, there were no 5,000 pound shipments included in the November and December, 1951 period on the restriction.

By Mr. Howland:

Q. That is a fact, is it not, Mr. Cole?
A. Yes.

[fol. 770] OFFER IN EVIDENCE

Mr. Howland: I will offer and introduce in evidence at this time the document heretofore marked for identification as exhibit No. 16.

Mr. Fowler: I assume, Mr. Cole, that exhibit No. 16 was prepared from original shipping documents that are in your office?

The Witness: They were prepared from the billing station copies of freight bills.

Mr. Fowler: That are in your office here in Des Moines?

The Witness: I have them in my office at the present time.

Mr. Fowler: Are they available for inspection, if anyone wants to inspect them?

The Witness: They are.

Mr. Fowler: In the event myself or any of my associates wish to examine them, they can examine them at your office?

Mr. Howland: There are seven or eight thousand of them.

Mr. Fowler: Is that correct?

The Witness: That is correct.

Mr. Fowler: I am going to object to the exhibit only on the ground of its immateriality, waiving the objection for the reason that the underlying data has not been produced subject to a reservation that we may examine it at a later date.

Exam. Carpenter: The objection is overruled, and the document is received in evidence as exhibit No. 16.

[fol. 771] (Applicant's exhibit No. 16, Witness Cole, was received in evidence.)

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Howland: Mr. Fowler, you didn't cross-examine with respect to exhibit No. 12.

Mr. Fowler: I have.

Exam. Carpenter: What?

Mr. Howland: I have a few questions with respect to exhibit No. 12.

Exam. Carpenter: I thought he covered everything up to exhibit No. 15.

Mr. Fowler: I did.

By Mr. Howland:

Q. Mr. Cole, when you were on the witness stand the other day you identified and we discussed to some extent the figures shown on exhibit No. 12. What is the significance of the figures shown under the pickup and delivery, both less than truck load and truck load weight in pounds, so far as showing the quantity of business handled at the Des Moines terminal by the carriers who are listed on exhibit 12?

Mr. Fowler: Read that question.

(Question read.)

Mr. Fowler: That is objected to as immaterial and irrelevant, and it is also objected to because it is calling for hearsay evidence, speculation and conjecture.

[fol. 772] Exam. Carpenter: As I understand it, the figures are submitted by other carriers other than the Rock Island Motor Transit and were compiled and submitted to you, weren't they?

The Witness: That is correct.

Mr. Howland: They were furnished by the other carriers, some of whom are objectors and protestants here.

Exam. Carpenter: I will overrule the objection.

The Witness: What was the question?

Exam. Carpenter: Read it.

(Question read.)

A. The tonnage or rather the weight listed under pickup and delivery represents the volume of traffic either originating or terminating in the city of Des Moines. Does that answer your question?

By Mr. Howland:

Q. And the combination of the less than truck load and truck load figures would indicate the total volume handled by the particular carrier inbound and outbound at the Des Moines station of that carrier?

A. That is correct.

Q. And do these figures on exhibit 12 under the pickup and delivery for Rock Island Motor Transit include pickup and delivery service performed by the Rock Island Motor Transit Company under contract with the Rock Island Railroad?

A. They do include those figures.

Mr. Fowler: Are you finished, Mr. Howland?

[fol. 773] Mr. Howland: Yes.

Exam. Carpenter: Cross-examine.

Further Cross-examination.

By Mr. Fowler:

Q. While we are on exhibit 12, it is my understanding that some of these carriers on truck loads deliver direct and there would be no expense incurred for delivery would there?

A. I am in no position to say.

Q. If it is true then that some of the carriers don't include such transactions in their pickup and delivery computations, then this exhibit would be in error to that extent?

A. There is that possibility.

Q. What I have reference to is a truck load moving, say, from the Firestone and Rubber Company located 12 miles out of Des Moines, destined to an eastern point which never would come near any of the Des Moines terminals. You don't know whether any charge has been included for that or not?

A. The figures for the other carriers were furnished to me for assembling on this report.

Q. But you don't know how they handled those transactions? You are not familiar with how that was handled?

A. No.

Q. Have you in your own figures included a truck load

that didn't come within 10 miles of the terminal, a similar load as I have described?

[fol. 774] A. Well, in our company so far as I know a local man would take that truck out and bring it back, and then the road driver would take it from Des Moines to its destination.

Q. Are you sure now that with respect to truck load movements that the expense of delivery or pickup has been included in your figures here?

Mr. Howland: This is merely pounds under those items.

Mr. Fowler: That is right, truck load pounds.

A. I am certain that our own figures include that.

By Mr. Fowler:

Q. What would be the expense of pickup on such a movement as I have described, what would it consist of?

A. So far as this report is concerned?

Q. Yes.

A. All that would be involved would be the time and wages for the driver that made the pickup.

Q. You mean that you would go out and get that truck after it was loaded and haul it back to the Des Moines terminal?

A. For billing purposes.

Q. Billing purposes and start it out again?

A. That is my understanding.

Q. But you don't know whether the others treated it the same way?

A. That is right.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect?

[fol. 775] Redirect examination.

By Mr. Howland:

Q. Right in that connection, Mr. Cole, what is the fact as to whether at the time that is covered by this study embodied in exhibit 12 that it was customary to handle truck loads moving in and out of Des Moines as far as the Rock

Island Motor Transit was concerned, that if the truck load were an inbound shipment, that the road driver would bring it to the terminal and then the truck would be taken over by a city driver who would drive it to the place of destination and there unload or help in unloading it?

A. That is an exact description of the operation.

Q. And on an outbound truck load shipment, what is the fact as to whether it was customary so far as the Rock Island Motor Transit was concerned to send the truck to the place at which the load was to be put into the semi-trailer by local pickup and delivery driver who would load or help in loading the semi-trailer, and who would then drive it back to a terminal where a road driver would take over?

A. That is my understanding, yes.

Q. And the pickup and delivery of truck load shows the hours and wages of the various carriers, as you understand it, and at least in connection with the 34½ hours shown for the Rock Island Transit Company was time of employees for that type and character of service?

Mr. Fowler: If the question——

[fol. 776] Mr. Howland: The question is involved. I will withdraw the question.

By Mr. Howland:

Q. What is included in the figure of 34½ hours shown in the Rock Island Motor Transit column of exhibit No. 12?

A. That is the number of hours spent by our employees during the period in connection with the picking up or delivering of truck load freight.

Mr. Howland: That is all I have.

Mr. Nolan: I have a couple of questions I would like to ask about this exhibit.

Mr. Fowler: Mr. Examiner, I always thought we had a rule that one lawyer would do the examining. I only object to it because it leads us into repetition and kills time.

Mr. Nolan: I am appearing here not only for the applicant but for interveners, and I feel I have some rights to inquire of the witnesses.

Mr. Fowler: I question that too, but I still insist one of you fellows examine a witness and we will have a little better record here.

Exam. Carpenter: The objection is overruled. Go ahead.

By Mr. Nolan:

Q. Mr. Cole, across from the legend there platform handling, inbound weight of 574,885, and then an outbound figure of 2,172,654, making a total of 2,747,539 pounds, why is that figure in excess of the combined pickup and delivery?

Mr. Fowler: Will you read that question?

[fol. 777] (Question read.)

Mr. Fowler: Do you know of your own personal knowledge the answer to that question?

The Witness: Yes, I do.

Mr. Fowler: All right.

A. That is brought about by the fact that the platform employees handle a considerable volume of tonnage at the Des Moines dock that neither originates nor terminates in the city of Des Moines. It is transfer freight coming in from one point and transferred to another truck, moving out of the city.

By Mr. Nolan:

Q. And that may be either transferred coming in on one of your lines and transferred to another line going out, or interlined with some other company, would it be both kinds of freight?

A. Interlined would be considered as on our own figures as originated tonnage here, so it wouldn't. It would be the transfer of freight that I spoke of.

Q. From one of your trucks coming in from the east to one of your trucks going on the south line, is that what you are referring to?

A. That would be one of the examples.

Q. Then any freight that is interlined from another carrier with your company that would be in the classification of picked up freight in Des Moines originating here?

A. That would be handled in that manner, yes.

[fol. 778] Q. But that wouldn't come under your pickup and delivery, would it?

A. I am not certain about whether our driver makes the pickup or whether they bring it to us. If it was picked up by our pickup driver, it would be considered pickup weight.

Q. On this picking up and delivering of freight, do I understand that that includes all l. c. l. rail freight both handled by the Rock Island Motor Transit Company and handled by the railroad too?

A. That we pick up or deliver for them, yes.

Q. As I understand it, your company does all the picking up and delivering for the railroad, Rock Island Railroad here in Des Moines?

A. So far as I know, yes.

Q. Do you mean to tell us that the combined rail freight and the motor carrier freight handled by the Rock Island Railroad and the Rock Island Motor Transit Company in Des Moines was less than what was handled by the Des Moines Transportation Company for the period covered here?

Mr. Fowler: We object to that as calling for hearsay.

By Mr. Nolan:

Q. I mean according to this exhibit and according to the figures submitted to you.

A. It is very considerably.

Mr. Fowler: We object to that on the ground that it calls for hearsay and not the best evidence.

[fol. 779] Exam. Carpenter: Will you read the question?

(Question read.)

Mr. Fowler: If he will limit the question to the material which appears in the exhibit, no objection.

By Mr. Nolan:

Q. From the information furnished you by the Des Moines Transportation Company and from your own records of your company.

Mr. Fowler: I will object to that on the ground that the material furnished here by the Des Moines Transportation Company in accordance with the statement of this witness is not before us for examination, and I am not aware of the basis upon which it prepared its information in comparison with that prepared for the Rock Island Motor Transit.

Exam. Carpenter: I will sustain the objection.

By Mr. Nolan:

Q. What I am trying to get at, Mr. Cole, is, first, that according to this exhibit under the caption of pickup and delivery, that includes all freight picked up by the Rock Island Motor Transit Company whether for transportation by itself or for transportation by the railroad or under rail billing on the Rock Island Motor Transit line, is that correct, for the period covered by this exhibit?

A. Picked up and delivered?

Q. Here in Des Moines.

A. In the city of Des Moines.

Q. I will ask you if the significance of this exhibit is to [fol. 780] show the combined l. c. l. freight handled by the Rock Island Motor Transit Company and the Rock Island Railroad in Des Moines in comparison with the freight handled by these transportation companies listed here for the period of time involved?

Mr. Fowler: That is objected to as immaterial and for the same reasons that have been urged on the previous questions touching on this exhibit.

Exam. Carpenter: Read it.

(Question read.)

Mr. Fowler: Frankly, Mr. Examiner, I don't care if he answers it. What he is doing is reading the exhibit.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: Do you withdraw the objection?

Mr. Fowler: The objection is withdrawn.

Exam. Carpenter: Did you mean l. c. l.?

Mr. Nolan: Yes, l. c. l. and l. t. l. too.

Exam. Carpenter: When you said l. c. l.?

Mr. Nolan: I mean other carload freight.

Mr. Fowler: The objection to that question only goes to information that this witness might relate which is purely based upon hearsay and of which he has no personal knowledge.

Exam. Carpenter: I will overrule the objection. Do you have the question, Mr. Cole?

The Witness: I think so.

[fol. 781] Exam. Carpenter: All right. If you don't, he will read it again.

The Witness: You better read it.

(The question was read again.)

A. It is for a matter of comparison of the freight handled by the Rock Island Motor Transit Company both in motor carrier business and in that business handled for the C. R. I. & P. Railroad as compared to the volume handled by other motor carriers.

By Mr. Nolan:

Q. Then, in other words, if I understand this exhibit, that the sum total of less than truck load pounds and truck load pounds of picked up and delivered freight in Des Moines was all the freight handled by the Rock Island Railroad and the Rock Island Motor Transit Company other than carload freight during the period of time covered by this exhibit?

A. That is right.

Q. Either originating in Des Moines or coming into Des Moines for distribution?

A. That is correct.

Q. And for a little further explanation of this exhibit, then the Rock Island Railroad and the Rock Island Motor Transit Company either brought into Des Moines for distribution or picked up in Des Moines for distribution between January 29 and February 3, 1951, inclusive, 1,990,320 pounds of freight of less than carload quantity?

A. What is the question?

[fol. 782] (Question read.)

A. 1,991,420.

By Mr. Nolan:

Q. 1,991,420 pounds?

A. That is correct.

Q. And that the Des Moines Transportation Company for the same period either brought into Des Moines for delivery or picked up for freight originating in Des Moines the sum total of 1,922,870 pounds and 1,758,130 pounds?

Mr. Fowler: That is objected to for the reason it calls for hearsay evidence and immaterial. The witness can't have any knowledge of what the Des Moines Transportation Company did in Des Moines, except as he says this information was furnished him. It is purely hearsay.

Exam. Carpenter: That is true, but he can count up the total of the figures submitted by the other company, and that is all he questioned him about.

Mr. Fowler: This merely calls for a mathematical computation, and I object to it on the ground the exhibit speaks for itself.

Exam. Carpenter: That is true.

Mr. Nolan: This is for the purpose of explaining the exhibit in more detail.

Exam. Carpenter: The objection is overruled.

Mr. Nolan: Will you read the question?

(Question read.)

[fol. 783] A. Yes.

Mr. Fowler: Are you through?

Mr. Nolan: Yes. That is all.

Recross examination.

By Mr. Fowler:

Q. I did ask you, did I not, that this exhibit No. 12 reflects all your intrastate freight?

A. I don't recall you asking, but it does.

Q. And includes everything that is transferred across your platform from one intrastate route to the other?

A. In the platform handling, yes.

Q. Of course, you are aware, are you not, that the Bruce Transfer Company, which you have listed on your exhibit, does engage in any common carrier operation?

A. I believe I stated the other day that I wasn't certain about their status.

Q. And you are aware, are you not, that the Bruce Transfer and Storage Company does pick-up and delivery service for Bruce Motor Freight?

A. Yes, I have heard that.

Mr. Fowler: That is all.

Exam. Carpenter: Proceed, Mr. Howland.

Mr. Howland: I think that is all I have of Mr. Cole.

(Witness excused.)

Exam. Carpenter: We will adjourn until 1:30.

(At 12:00 noon, a recess was taken until 1:30 p. m., of the same day.)

[fol. 784] AFTERNOON SESSION 1:30 p. m.

Exam. Carpenter: We will proceed.

Mr. Nolan: Mr. Wellendorf.

EDWARD WELLENDORF was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you please state your name, place of residence and occupation?

A. Edward Wellendorf.

Q. You are from Audubon?

A. Audubon, Iowa.

Q. What is your occupation?

A. Coast to Coast Store.

Q. Where is Audubon, Iowa, located?

A. It is on Highway 71, between Atlantic and Carroll, about midway.

Q. About how far from Des Moines and which way from Des Moines?

A. About 80 miles, and it is off of Highway 64 about four miles to the north.

Q. What kind of merchandise do you handle in your store?

A. Mostly hardware and auto supplies, supporting goods and appliances.

Q. How long have you been so engaged at Audubon?

A. Thirteen years.

Q. Is that a chain store or is that a locally-owned store [fol. 785] under a franchise or buying merchandise through the Coast to Coast Store itself?

A. It is locally owned, franchised with the Coast to Coast Store as a buying organization.

Q. Then you are the owner of the store thereof?

A. That is right.

Q. From what source do you get your merchandise, Mr. Wellendorf?

A. I would say 80 percent out of Minneapolis through Coast to Coast Stores.

Q. And is that the warehouse of the Coast to Coast Stores?

A. That is the warehouse of the Coast to Coast Stores. There are a few direct sources, but that would be approximately 80 percent of it.

Q. Do you have other out of state sources?

A. We get some from Chicago and a little from Omaha.

Q. How has your merchandise been coming in to the store at Audubon?

A. All of our Minneapolis freight comes by Rock Island Motor Transit.

Q. What size shipments do you ordinarily get?

A. They vary greatly, but they will range from a minimum shipment up to perhaps 2,000 pounds or more.

Q. What has been the character of the service of Rock Island Motor Transit Company during the years?

A. Very good.

[fol. 786] Q. And you do have another motor carrier operating out of Audubon, do you not?

A. Yes, sir.

Q. And that is the Roberts Freight Lines?

A. Roberts Transfer.

Q. That is a line between Des Moines and Audubon, Harlan and Omaha, is that correct?

A. That is correct.

Q. Have you heard any suggestion that the Roberts Freight Line was going to terminate its operations between Audubon and Des Moines?

Mr. Fowler: That is objected to as hearsay.

Exam. Carpenter: Objection sustained.

By Mr. Nolan:

Q. Do you know that it is a fact such a move is contemplated by the operators of the Roberts Freight Lines?

Mr. Fowler: That is objected to for the same reason.

Exam. Carpenter: Objection sustained.

By Mr. Nolan:

Q. What would be the effect on your business if the Rock Island Motor Transit Company was required to either terminate or materially curtail its present operations into Audubon?

A. I would say it would greatly slow up our service out of Minneapolis.

Q. What is the regularity that you get shipments out of Minneapolis?

[fol. 787] A. Well, a shipment leaving Minneapolis will come through in two days, by leaving Minneapolis one day and arriving in Audubon the next is the usual service we get. There may be a few exceptions.

Q. That is if a shipment leaves Minneapolis today, you will get it——

A. Tomorrow.

Q. (Continuing) --the next day?

A. My understanding is it comes to Des Moines and

comes right on through Atlantic and up the next day, the following day.

Q. You couldn't want any faster service than that?

A. It is very fine service.

Q. Have you had any experience on interline with the Roberts Freight Line, whether or not it takes more time where there is an interline involved?

A. I have had some experience, yes.

Q. And is that satisfactory service?

A. We found that oftentimes there was a delay because of the transfer possibly in Des Moines and occasionally the Roberts truck would be filled and couldn't take it, and perhaps it would lay over another day.

Q. That wouldn't be satisfactory service like your single line service, would it?

A. We prefer the one-line haul.

Q. How about your shipments from Chicago, how do they [fol. 788] generally move?

A. Very good.

Q. What company handles them?

A. You mean the source of supply?

Q. What company?

A. Rock Island Motor.

Q. Handles your Chicago shipments too?

A. That is right.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Mr. Wellendorf, do you understand what is involved in this application?

A. I believe I do.

Q. At the present time you are receiving your shipments from Minneapolis to Audubon by truck via the Rock Island Motor Transit Company?

A. That is right.

Q. Did you know that the Rock Island Motor Transit Company now has that authority?

A. Did I know it now has the authority?
Q. Yes.

Mr. Nolan: Just a moment. That is objected to as not proper cross-examination.

A. I am not sure that I know what you mean.
[fol. 789] Mr. Nolan: That is objected to as not proper cross-examination. It is assuming a state of facts contrary to the record. The Rock Island does not have the authority which they are seeking in this case, only on a temporary basis, and not even that authority on a temporary basis.

Mr. Fowler: I don't know what purpose that type of an objection has, unless it is to inform the witness. I move that the remarks of counsel be stricken, and that he be instructed to make his objection without a speech.

Mr. Nolan: Just a moment. That objection was perfectly valid. It is not proper cross-examination, and it is assuming a state of facts not shown in the record and, as a matter of fact, contrary to the record. That would be a valid objection in any court.

Mr. Fowler: Then make the objection and quit.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: Frankly, I don't see anything wrong with the question. They have the authority, it is on a temporary basis.

Mr. Nolan: I think the question is misleading, not probably intentionally so.

Exam. Carpenter: You can get it on redirect if you think that. I will overrule the objection. Go ahead and answer the question.
[fol. 790] Mr. Fowler: Will you read the question?

(Question read.)

A. As I understand it, on a temporary basis.

By Mr. Fowler:

Q. Did you know that the Rock Island Motor Transit Company now holds permanent authority which authorizes

it to transport your merchandise from Minneapolis to Audubon by truck?

A. I thought that was the purpose of the hearing to get permanent authority.

Q. Then you don't know that they did have that authority now?

A. I knew they were granted some authority, but I didn't know the full extent of the authority.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect?

Redirect examination.

By Mr. Nolan:

Q. Mr. Wellendorf, if it be a fact, which it is a fact, that the Rock Island Motor Transit Company does have authority to handle freight—I mean the Rock Island Motor Transit has authority to handle shipments on rail billing requiring a handling by the rail facilities at Minneapolis, and then transferred to the motor carrier division or transit company to deliver to destination, and if it should be shown, as it will be shown in the record later on in this proceeding, that there would be two or three days or more time involved by having it coming on a rail billing, would that service be [fol. 791] satisfactory to you?

Mr. Fowler: Just a moment. I object to that on the ground that it is immaterial and assuming facts certainly not established in this record, and it calls for an answer which is purely speculative and conjecture.

Exam. Carpenter: Overruled. Go ahead and answer. Do you remember the question?

The Witness: You better read it.

(Question read.)

A. Not as satisfactory as the motor transit.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Nolan: I think we will make a statement and we will connect it up.

Exam. Carpenter: Go ahead.

By Mr. Nolan:

Q. Mr. Wellendorf, state what the fact is as to whether or not you are here in support or attempting to acquire the same type of service for Audubon through the Rock Island Motor Transit Company that you have had over the years since you have been in business there?

A. That is right.

Q. Have you ever had any experience of shipments coming in on rail billing handled by the Rock Island Motor Transit Company?

A. I believe so, but I am not prepared to make that definite, but I think that is possibly true, yes.

[fol. 792] Q. Was that frequent or infrequent?

A. Infrequent. It has been practically all motor transit freight.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Howland: Mr. Frederickson.

JOHN H. FREDERICKSON was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name so we can all get it, please?

A. Full name?

Q. Yes.

A. John H. Frederickson.

Q. I believe you live at Harlan, Iowa?

A. Harlan, Iowa.

Q. How long have you lived at Harlan?

A. How long?

Q. Yes.

A. Since 1901.

Q. In what business have you engaged, and up to and including the present time what has been your occupation?

A. Various businesses, but in the past 20 years it has been principally a wholesale distribution of various products.

[fol. 793] Q. Were you one of the partners in the transportation company known as the J. H. Frederickson and Sons of Harlan, Iowa?

A. Yes, sir.

Q. And were you one of the parties that sold to the Rock Island Motor Transit Company?

A. That is right.

Q. In I believe about 1944?

A. 1945, I believe.

Q. 1945, I think maybe.

A. I think maybe it was 1945.

Q. The transaction was completed?

A. Yes.

Q. Where is Harlan located, Mr. Frederickson?

A. In Shelby County.

Q. About how far from Atlantic and from Omaha and Council Bluffs, Mr. Frederickson?

A. About 52 miles east and a little north of Omaha, and approximately 33 miles northwest of Atlantic.

Q. Harlan is a town of about what population?

A. About 4,000.

Q. And what types of business does it have there?

A. Oh, various types, mercantile businesses of various kinds.

Q. Tell us what the principal businesses are that are located in Harlan who have occasion to make shipments either in or out, as you know them.

[fol. 794] A. Well, you wish to have the names.

Q. Just the type of business, such as canning factory or whatever it is.

A. Mostly mercantile. There is one small factory there.

Q. Yes.

A. Otherwise it is produce companies and general mercantile businesses, groceries and so forth.

Q. What is the nature of the factory? What do they make?

A. Oh, it is some contrivance to place on tractors to protect them when they are on the highway. I believe it is a reflector; an electric reflector of some type.

Q. Since about 1945, when the transportation business in which you were interested was sold, I understand that your business has been principally that of wholesaling or distributing merchandise?

A. That is right.

Q. And what particular line of merchandise have you been handling? By that I mean is it groceries or foodstuffs?

A. No groceries.

Q. Feed?

A. No feeds.

Q. Tell us about it.

A. It would be candies, cigarettes, tobacco, cigars, fountain supplies and paper goods of various types. To enumerate it, it would be a string that long (indicating).

[fol. 795] Q. All right. What service is available to handle transportation into Harlan from points outside the State of Iowa, on the west, on the north or east?

A. Well, I don't know. The service from Omaha, there are four outfits that move in and out of Harlan.

Q. What are the concerns operating between Omaha and Harlan? There is the Rock Island Motor Transit and what other common carrier truck lines?

A. Iowa-Nebraska, Harlan Express and then the Roberts Transfer.

Q. Does the Harlan Express have common carrier tariff rates that enable it to perform interline business with other carriers?

A. I understand they do. We don't do any business with them.

Q. You have never done business with them?

A. No, very little.

Q. Does the Harlan Express have any eastern connection of any kind, that is, do they connect with any other carriers?

A. Not to my knowledge.

Q. Roberts Transfer, of course, is the concern with headquarters at Audubon, Iowa?

A. Yes, sir.

Q. Do you know what the service has been on the Iowa-Nebraska Transportation Company into Harlan from Omaha, how frequent that service has been?

A. I believe that is daily.

[fol. 796] Q. How about service from the east by Iowa-Nebraska?

A. Well, I couldn't say as to exactly what length of time because—you mean interstate?

Q. Interstate from eastern points, do they have a regular daily established service in there from eastern points that will handle interstate business?

A. On interstate business, I believe they do.

Q. Do you know what the frequency of that service is?

A. The same as to Omaha. It is the same truck.

Q. In other words, the transfer is made at some point before they get into Harlan, I take it?

A. Yes.

Q. What has been the character of service rendered by the Rock Island Motor Transit Company to and from Harlan, as you have observed it?

A. It has been very good.

Q. Have you used the service of the Rock Island Motor Transit Company in your business in recent months?

A. Yes, sir.

Q. Are there businesses in Harlan which have occasion to require transportation of more than 5,000 pounds at one time?

Mr. Fowler: That is objected to as immaterial, incompetent and calling for hearsay evidence, unless the witness has personal knowledge of the facts.

Exam. Carpenter: Can you qualify the witness?

[fol. 797] By Mr. Howland:

Q. Mr. Frederickson, in the 50 years or so that you have lived in Harlan I take it that you are pretty familiar with the type and character of the business there?

A. Some.

Q. Yes, and you yourself operated the J. H. Frederickson and Sons Freight Line for how long?

A. About 20 years.

Exam. Carpenter: That was a period prior to 1945?
The Witness: Yes, surely.

By Mr. Howland:

Q. And since that time you have made your home in Harlan and are now engaged in this distribution business that you have told us about?

A. Yes, sir.

Q. Do you have a pretty fair knowledge of the community and the transportation situation in that community as it has existed for the 20 years that you were engaged in the motor carrier business, plus the six years or seven years since the transaction was completed?

A. Well, I think I do.

Mr. Howland: Now I will ask the reporter to read that last question, or first maybe we better have a ruling on the last question.

Mr. Fowler: May I ask one question?

Exam. Carpenter: Yes, go ahead.

Mr. Fowler: Do you have personal knowledge of the [fol. 798] shipments of these other shippers of your own personal knowledge?

The Witness: The only knowledge I could have of them would be what I recalled from the time we were hauling.

Mr. Fowler: That was years ago?

The Witness: Well, it terminated in 1945.

Mr. Fowler: You don't claim to have any personal knowledge now of it?

The Witness: I have seen some of the shipments unloaded in there. That is all.

Mr. Fowler: That is objected to as immaterial and calling for hearsay testimony and incompetent.

Exam. Carpenter: Objection sustained.

By Mr. Howland:

Q. After you sold out the J. H. Frederickson and Sons Truck Line to the Rock Island Motor Transit Company,

did you continue for some period of time in a local drayage or cartage business?

A. Yes, we do yet.

Q. You still have that?

A. Yes. We have a state operator's permit just for the local service.

Q. That is Iowa State Commerce Commission permit?

A. Yes.

Mr. Howland: I would like the record to show and I am not too certain of the exact answer which this witness might be inclined to make in response to the question as to whether [fol. 799] there are shippers and receivers of freight in Harlan who require service for shipments in excess of 5,000 pounds. I would like to suggest to the Examiner that the evidence be taken subject to objection, and that the Examiner may then exclude it on motion if he is of the opinion that it is objectionable. I merely wish to make the record.

Mr. Fowler: Mr. Howland, to shorten the matter so we can save time, the only objection I have now to this line of testimony is that it is unnecessary and incompetent under the record.

Mr. Howland: I guess we can proceed then.

Mr. Fowler: You can if the Examiner permits it.

Exam. Carpenter: Proceed.

Mr. Howland: If the Examiner is willing,——.

Mr. Fowler: It is objected to for the reason that it is unnecessarily encumbering the record in view of the statement of the witness that he doesn't know.

Exam. Carpenter: The objection is overruled, but make it as short as you can.

By Mr. Howland:

Q. Let me ask you this question, Mr. Frederickson, based on your knowledge of the local situation, the business which you have yourself done and the fact that you are in business there today, are there concerns to your knowledge in Harlan who have occasion to require transportation of shipments weighing more than 5,000 pounds?

A. I would think so.

[fol. 800] Q. Where do your shipments of merchandise that you distribute come from, Mr. Frederickson?

A. Some from Omaha, a large portion of them from Des Moines, Chicago, St. Louis and eastern points.

Q. What service do you utilize in connection with those inbound shipments?

A. From Des Moines we have been using the Rock Island Motor Transit principally, in fact altogether.

Q. How about St. Louis and Chicago?

A. Where they are interlined?

Q. Yes.

A. If we have the routing of it, why, Bruce and Rock Island from St. Louis.

Q. How about Chicago shipments?

A. The Chicago shipments wherever we can we have been routing it by Rock Island Motor Transit.

Q. What would you say as to whether your business would be effected by the elimination or substantial curtailment of the Rock Island Motor Transit Company's service into and out of Harlan, Iowa?

Mr. Fowler: That is objected to as immaterial and assuming a state of facts that are not established in this record.

Exam. Carpenter: Objection overruled.

A. I would say it would be decidedly so.

By Mr. Howland:

Q. Would it be better for you or would you be hampered [fol. 801] in same way, and if so, just tell us how.

Mr. Fowler: That is objected to as immaterial. It is merely a repetition of the last question, and it is leading.

Exam. Carpenter: To that type of objection sustained.

Mr. Howland: That is all.

Mr. Fowler: That is all.

Mr. Nolan: Just a minute, Mr. Frederickson.

By Mr. Nolan:

Q. Why do you use the Rock Island Motor Transit in preference to other carriers that may be serving Harlan?

A. Why do we?

Q. Yes.

A. Well, the fact that our trucks are loaded on Saturday and we stagger our shipments of cigarettes which come from Des Moines principally. I think they are stored at the White Line transfer, and by staggering we can have them loaded here today and tomorrow by 10:00 o'clock they will be delivered to our place.

Q. Does the Rock Island Motor Transit give you better service than other carriers?

A. Yes.

Q. The point I am trying to get at, was there any agreement between you and the Rock Island Motor Transit Company when you sold out that you would give them all of your business, or are you free to have anybody you want to haul your merchandise into Harlan?

[fol. 802] Mr. Fowler: Just a moment. That is objected to as immaterial.

Exam. Carpenter: Objection sustained.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Johnson.

Carl W. Johnson was sworn and testified as follows:

Direct-examination.

By Mr. Nolan:

Q. Will you state your name, place of residence and occupation?

A. Carl W. Johnson.

Q. Where do you live?

A. At Anita, Iowa.

Q. And what is your occupation?

A. Well, I manage the power and water works for the town of Anita.

Q. Is that a municipally owned power plant there?

A. Yes.

Q. And also a water plant?

A. Yes.

Q. Where is Anita located?

A. Well, it is about midway between Omaha and Des Moines, about 70 miles both ways.

[fol. 803] Q. And on U. S. Highway No. 6?

A. No. 6, yes.

Q. How long have you been manager of the municipal water and light plant in Anita, Iowa?

A. Four years yesterday.

Q. Did you live there prior to that?

A. No.

Q. What is the size of the town of Anita?

A. Approximately 1200.

Q. Do you have your own generating plant for the generation of your electricity which you distribute to the people there in Anita?

A. Yes, we do.

Q. Do you understand the proposition before the Commission here today? Has it been explained to you?

A. I don't know as I do understand it exactly or could explain it exactly no. As I understand it, the Rock Island people are trying to get a permit to continue to do business.

Q. As they have been doing over the past 13 years?

A. Well, I assume, yes.

Q. Mr. Johnson, what shipments, if any, do you have come into Anita there in connection with your business?

A. Oh, that is quite varied.

Q. Just tell us briefly what they are and where they come from.

A. Well, from Omaha we have barreled lubricating stocks, [fol. 804] greases, and from Joplin, Missouri, we have various power plant supplies, such as piping and fittings, wiping rags, tools, and from Des Moines it is about the same category for the engine room supplies, piping and fittings and meters.

Q. Do you handle any appliances?

A. None whatever, no.

Q. But you do handle meters for both electricity and for water?

A. Yes, that is right.

Q. And with what frequency would you say you get shipments into Anita there primarily from out of state points in less than carload quantities?

A. You mean the total of them?

Q. No, how often do you have things shipped into your plant there from out of state points?

A. Weekly, every week.

Q. What facility or what company has been hauling those shipments into your plant which are not hauled in by the railroad?

A. Well, predominantly the Rock Island Motor Transit.

Q. Have you used the service of the Rock Island Motor Transit Company during the past four years that you have been in Anita as manager of these two plants?

A. Yes.

Q. What has been the nature of that service, has it been satisfactory or not?

A. Well, I would say nothing different but it has been excellent.

[fol. 805] Q. That is the service of the Rock Island Motor Transit Company?

A. Yes.

Q. Have you had experience with having merchandise or supplies or other things come in by any other trucking company?

A. Yes, we have.

Q. Is there any other trucking company that offers a regular daily service to Anita that you know of from the east and west?

A. We are swamped there with trucking services, but just what their duties are, I don't know. I am only personally acquainted with the Rock Island boys and one driver of the Iowa-Nebraska Truck lines.

Q. When you say you are literally swamped, what do you mean, a large number of trucks go through Anita every day?

A. There is a hell of a slew of them.

Q. They go right down Main Street?

A. Yes.

Q. East and west?

A. Yes.

Q. Do all those trucks stop and pick up and unload merchandise in Anita?

A. No, they do not. Maybe I should have clarified that.

Q. They just go through town?

A. There would be only two to the best of my knowledge. The two competing firms would be the Iowa-Nebraska and the Rock Island Motor Transit.

[fol. 806] Q. How long has the Iowa-Nebraska Company been in there giving service?

A. I couldn't tell you that. I don't know.

Q. Have you had any experience with having shipments brought in by Iowa-Nebraska?

A. Yes.

Q. Do you by reason of the nature of the service between the Rock Island Motor Transit Company and the Iowa-Nebraska Company have any preference?

A. Do I have a preference?

Q. Yes, between the Rock Island Motor Transit and the Iowa-Nebraska by reason of the character of service one gives over the other?

Mr. Fowler: That is objected to as immaterial.

Exam. Carpenter: Objection overruled.

A. Am I to answer that?

By Mr. Nolan:

Q. Yes.

A. I would definitely request the Rock Island Motor Transit in all fairness.

Q. Do you specify whenever possible that your shipments move into Anita by Rock Island Motor Transit?

A. Absolutely.

Q. Do you occasionally have any shipments in excess of 5,000 pounds brought into Anita and less than a carload, like dynamos or big motors or anything like that?

[fol. 807] A. Not since I have been there, I don't believe.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Mr. Fowler: No cross-examination.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Brodersen.

JACOB D. BRODERSEN was sworn and testified as follows:

Direct-examination.

By Mr. Nolan:

Q. May we have your name, place of residence and occupation, please?

A. Jacob D. Brodersen, Harlan, Iowa.

Q. What is your occupation, Mr. Brodersen?

A. President of an automobile company.

Q. What?

A. Automobile dealer.

Q. What line of automobiles do you have?

A. Studebaker.

Q. Do you handle repair parts?

A. We have parts for repair service.

Q. Do you have occasion to have shipments shipped into your place of business from out of state points?

A. We get most of our parts out of Kansas City.

Q. How frequently do you have shipments come in from Kansas City?

[fol. 808] A. I would say about once a week.

Q. And what company has been handling those shipments?

A. The Rock Island Transit is handling them, most of them.

Q. Have you specified whenever possible that the Rock Island Motor Transit handle those shipments for your company?

A. We do most of the time, where they specify it at the other end, because we get quicker service.

Q. You mean you get quicker service by Rock Island Motor Transit Company?

A. From Kansas City, yes.

Q. Have you had experience with having shipments come

in by other carriers from Kansas City other than by the Rock Island Motor Transit Company?

A. I suppose we have.

Q. Has that service been as satisfactory as the service provided by the Rock Island Motor Transit where some other motor carrier brings it in?

A. Well, when we need it we have to have it as quickly as possible. I would say the Rock Island has given us the quickest service.

Q. How long have you been in business at Harlan, Mr. Brodersen?

A. I would say about 22 years in various businesses, not the automobile business altogether.

Q. How long have you been there in the automobile business at present?

[fol. 809] A. About six years.

Q. During that time have you used the service of the Rock Island Motor Transit Company?

A. Yes.

Q. Has that service been satisfactory or otherwise?

A. It has been satisfactory.

Q. I don't suppose you have any occasion to have any shipments in excess of 5,000 pounds come into your place of business, do you?

A. I don't think we do, no.

Mr. Nolan: You may cross-examine.

Mr. Fowler: No cross-examination.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Croghan.

SHERWOOD M. CROGHAN was sworn and testified as follows:

Direct-examination.

By Mr. Nolan:

Q. Will you give us your name, please?

A. Sherwood M. Croghan.

Q. You live at Walnut, Iowa?

A. That is right.

Q. What is your business?

A. I am mayor of the town there and also a Rawleigh Products dealer.

[fol. 810] Q. How long have you lived around Walnut?

A. Well, I have lived around Walnut for 17 years and in the town of Walnut for nine.

Q. How long have you been mayor of the town?

A. How long have I been married?

Q. Mayor.

A. Two years. I thought you said married. Excuse me.

Q. Mayor of the town.

A. Two years.

Q. Tell us where Walnut is located and the size of the town.

A. Well, it is located about 16 miles west of Atlantic and about, I would say, 40 miles east of Council Bluffs, on the main line of the Rock Island. The size of the last census was 888.

Q. Does Walnut have the usual retail stores and service establishments that the ordinary town in an agricultural community of that size has?

A. It has.

Q. You don't have any manufacturing there, do you?

A. Nothing.

Q. You say Walnut is on the main line of the Rock Island. Is there any change going to be made in the Rock Island line that would affect Walnut, I mean the rail line.

A. Definitely.

Q. As I understand it, the main line is going to be changed so Walnut would then be on a branch line?

[fol. 811] A. That is right.

Q. You say you are a Rawleigh dealer?

A. Yes.

Q. Just tell us what you handle in your Rawleigh dealer work.

A. Well, we handle medicines, stock foods of different kinds, and I could tell you a lot of things that we handle, but then that is what it is generally, Rawleigh products.

Q. Insecticides?

A. That is right.

Q. De-licers for chickens and everything?

A. That is right.

Q. Wax for the housewives?

A. Yes.

Q. For floors?

A. Yes.

Q. Polish for her windows?

A. Yes, and lipstick for her nose.

Q. How long have you been a Rawleigh dealer?

A. Since last July.

Q. Where do you get your merchandise?

A. From Freeport, Illinois.

Q. What size shipments do you get from Freeport?

A. Oh, I would say anywhere from 250 to 600 pounds.

Q. And how frequently or how often do you get those shipments, Mr. Croghan?

[fol. 812] A. Oh, up until the roads got bad this winter, once every week and sometimes twice a week.

Q. Is Walnut located on a paved highway?

A. No, it is not. It is on a black top.

Q. How have those shipments been coming into Walnut?

A. Fine.

Q. I mean when?

A. From the time I send in my order, about seven to ten days, and I think that is wonderful.

Q. What company has been bringing those shipments in?

A. The Rock Island Transit Company.

Q. State whether or not you have any other regular route motor carriers serving Walnut.

A. We have the Iowa-Nebraska.

Q. And have you used their service?

A. I never have.

Q. Why do you use the Rock Island Motor Transit instead of the Iowa-Nebraska?

A. Well, I looked into the matter and as near as I can find out I have one transfer from Freeport, Illinois, to Walnut on the Rock Island Motor Transit, and on the other routes I would have more than that.

Q. Have you been satisfied with the service you have secured or obtained from the Rock Island Motor Transit?

A. I sure have.

[fol. 813] Q. State whether or not your business would be adversely effected if there was a termination or a material reduction in the operations of the Rock Island Motor Transit Company in Walnut, Iowa.

Mr. Fowler: Just a moment. That is objected to on the grounds that it is immaterial and for the reason it is assuming facts that have not been established in this record.

Exam. Carpenter: Objection overruled. Answer.

The Witness: What was the question?

Exam. Carpenter: Read it.

(Question read.)

A. I feel that it would. I will tell you why, because I have not a big place to store stuff and I have to order quite frequently.

By Mr. Nolan:

Q. What do you do, work out of your home?
A. I work out through the country.
Q. I mean where do you store your merchandise?
A. I store my stuff at home.
Q. You don't have a warehouse?
A. No.
Q. Or a separate business house for your business?
A. No.

Mr. Nolan: You may cross-examine.

Exam. Carpenter: Cross-examine.

Mr. Fowler: No cross.

Exam. Carpenter: You are excused.

[fol. 814] (Witness excused.)

Mr. Nolan: Mr. Trieschman.

W. S. Trieschman, was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence and business?

A. W. S. Trieschman, Wellman, Iowa; I am connected with the Maple Crest Turkey Farms.

Q. Mr. Trieschman, will you tell us what the Maple Crest Turkey Farms consists of, what their business is and volume of it and so forth?

A. It consists of a hatchery, a feed plant and a processing plant.

Q. For what?

A. What?

Q. For what?

A. Turkeys.

Q. What is the annual volume of business of the Maple Crest Turkey Farms and their various sundry lines?

A. Well, we process better than six to eight million pounds of turkey a year. I don't have the amount of feed that we do handle. It would be an enormous amount of feed.

Q. Maple Crest Turkey Farms hatch the turkey pullets, sell them to the farmers and buy the turkeys back and process them?

[fol. 815] A. That is right.

Q. Also they provide the feed for the turkeys?

A. That is right.

Q. What ingredients go into the feed which have to be shipped in from the outside?

A. Do you mean what feed we would have trucked in or by rail or what?

Q. We will get to that a little later.

A. All of our milled feeds, brand and middlings, meat scraps, and soy beans, that is all shipped in.

Q. How about your fish shells and so forth?

A. That is right, oyster shells. Then we have antibiotics of which the volume or the amount isn't so great, and oils that we use.

Q. You do your own mixing of feed there, do you not?

A. That is right.

Q. You buy the ingredients and then do the mixing there at your plant?

A. That is right.

Q. What shipments do you have brought in by truck that go into your feed business?

A. There are some, mainly are the ingredients that we use in not too large quantity, anti-biotics, cod liver oil and buttermilk. All of our other feeds used in greater amounts come in by rail.

[fol. 816] Q. Come in by carload lots?

A. Come in by carload lots.

Q. In other words, middlings and brands all come in carload quantity?

A. That is right.

Q. In addition to the feed ingredients which you have shipped in, what other occasion do you have to use motor truck service inbound to Wellman?

A. Our biggest use of Rock Island is repairs. We have the plant also at Kalona, Iowa, and to maintain our plants we have an enormous amount of repairs coming in all the time which are by truck.

Q. When you speak of Rock Island you mean the Rock Island Motor Transit?

A. That is right.

Q. How many employees does your company have? I mean the year around and then at the peak season.

A. Year around we run about 95, and at peak season we run around 300.

Q. I don't believe you gave us your position with the company?

A. I am general manager.

Q. How long have you been connected with the Maple Crest Company, Mr. Trieschman?

A. Twenty-one years.

Q. Twenty-one years?

[fol. 817] A. Right.

Q. What outbound shipments, if any, do you have for which you require truck service?

A. Turkeys mainly in the early fall when we just start

dressing the young birds. We ship quite a few but in small lots by the Rock Island Motor Transit, going to such places as Des Moines, the Tri-Cities and Chicago.

Q. In volume, several hundred pound quantities?

A. Yes, it will run up, I would say, from four to seven barrels. As the season progresses most of the places, Des Moines, St. Louis or Chicago, usually take straight truck loads, which we either truck ourselves or go to another truck line.

Q. Has the Rock Island Motor Transit Company hauled some truck load quantities of turkeys for you in the past?

A. No.

Q. That is handled by another local carrier in that area?

A. Most of that is handled by Merchants.

Q. Handled by Merchants?

A. Merchants handles practically all of our truck load.

Q. Merchants Motor Freight doesn't go into Wellman direct?

A. No, sir.

Q. They have an agency through the Iowa City Transfer Company?

A. That is right.

Q. Mr. Warren?

A. That is right.

[fol. 818] Q. He picks up the truck load of turkeys and turns it over to Merchants at Iowa City?

A. That is right.

Q. How frequently would you say you have shipments coming into your place of business by Rock Island Motor Transit Company?

A. Well, they average at least three shipments a week.

Q. Do you have shipments to Kalona too?

A. That is right.

Q. Is there any other motor carrier giving regular service, daily service, to Wellman?

A. No, sir.

Q. What would be the effect upon your company's operations if the Rock Island Motor Transit Company were required to cease operating as a motor carrier or their operations were materially curtailed?

Mr. Fowler: That is objected to as immaterial for the

reasons which have been urged heretofore with respect to the same.

Exam. Carpenter: Objection overruled.

A. I feel it would be quite a handicap. I am sure we would be delayed in getting materials in.

By Mr. Nolan:

Q. You are on a branch line, are you not, of the Rock Island?

A. That is right.

Q. And have you had any experience in getting drop shipments or small shipments in by rail there?

[fol. 819] A. Yes, and at the time being they are just running every other day. They have helped us out; if we requested them to run every day at this time of the year, they have helped us out by doing so. In the fall when we get to going, killing, processing every day, they run every day.

Q. That is where you turn over a carload or two or three carloads of turkeys, they run the switch engine down there from Iowa City and get them?

A. That is right.

Q. Do you think they would do that for four or five hundred pounds of freight?

A. I doubt it very much.

Q. Mr. Trieschman, do you know of any facility that would take the place of the Rock Island Motor Transit Company if it should be required to cease operating?

Mr. Fowler: That is objected to as repetitious.

Exam. *Fowler*: Objection sustained.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Mr. Fowler: Just one question.

Cross examination.

By Mr. Fowler:

Q. Do you ship some of these young turkeys by express?

A. Very few.

Q. When you do ship them does the Rock Island Motor

[fol. 820] Transit Company accept express shipments from you?

A. No, we express them right out on the Rock Island.

Q. Is that all handled by rail then?

A. Either then handled there or we take an express shipment to Iowa City ourselves with our own truck, but we do so little of that on account of the cost.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect?

Redirect examination.

By Mr. Nolan:

Q. Most all of your turkey pullets are sold locally?

A. That is right.

Q. Did you give us the population of Wellman?

A: It is 1200 to 1300.

Mr. Nolan: That is all. Thank you.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Powell.

L. J. Powell, was affirmed and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence and occupation, please?

A. L. J. Powell, Wellman, Iowa; I have a furniture and undertaking business there.

[fol. 821] Q. You are familiar, are you not, with the subject which we are discussing here in a general way?

A. I think so, yes.

Q. You testified in a previous hearing on the application for temporary authority, I believe?

A. Yes, sir.

Q. Last fall?

A. I was here last fall, yes.

Q. Will you tell us what your needs are in the way of transportation service into Wellman, Iowa?

A. Well, of course, most of our furniture comes in by freight and the motor-freight transport. Of course, it all comes in by this motor freight, practically all of it comes in that way, even if it is routed by the Rock Island Railroad, interstate and intrastate.

Q. Where do you get most of your shipments from? I am speaking about out of state points.

A. Out of state points?

Q. Yes.

A. We get it out of Springfield, Ohio; Louisville, Kentucky, and out of Fond du Lac, Wisconsin, and we get some from the east, farther east.

Q. Do you have some shipments that come on rail billing?

A. Yes.

Q. And other shipments on motor truck billing?

[fol. 822] A. Yes, sir.

Q. What is the fact as to whether or not the shipments that come on rail billing are not shipments which originate either in the far east or the far south?

A. I didn't get that question.

Mr. Nolan: Will you read it?

(Question read.)

By Mr. Nolan:

Q. I will say far eastern part of the country or the southern states of the country?

A. Well, they practically all come in on motor transit, Rock Island Motor Transit.

Q. I don't believe you understood my question. I am asking you whether or not these shipments which come in on rail billing by the Rock Island Motor Transit Company, if those aren't shipments which originate in the eastern part of the United States or in the southern part of the United States?

A. Yes, that is right.

A. We manufacture a line of oil heating equipment and power mowers.

Q. And that enterprise is carried on under what name?

A. Laco Oil Burning Company, Incorporated.

Q. Now, you say that you manufacture both heating equipment and power lawn mowers?

A. Yes, sir.

Q. And in connection with your heating equipment, what things do you manufacture there? Just describe the manufacturing process or assembly process or whatever it is.

A. Well, we manufactur*ing* oil burning space heaters, complete oil burning furnaces and pressure burners. We do not have our own foundry. We farm out all of our castings, but beyond that practically everything is made in our plant.

Q. I take it that——

A. Or should I say fabricated.

[fol. 846] A. Fabricated or processed or assembled, at least, would be the terms I assume would be applied to your operations.

Now, I take it you have occasion to have your castings, your sheet metals, your controls, and all those matters of that sort brought into your plant there——

A. Yes, sir.

Q. —at Griswold. And what are the points of origin from which those shipments, for the most part, are made to your factory?

A. The sheet steel, most of it comes out of Chicago. Our controls for oil heating equipment come out of Milwaukee, Wis., and Detroit, Mich. The engines for the power mowers come out of New Holstein, Wis., Milwaukee, Wis., and Maquoketa, Iowa.

Q. And is there a more or less continuous flow of inbound traffic into your plant there?

A. Yes, sir.

Q. I take it that there is also the same flow outward of your manufactured and finished materials?

A. Yes, sir.

Q. About how frequently do you require motor carrier service to your plant?

A. Inbound?

Q. Rather than shipments originating in Chicago or in adjoining states?

A. Yes.

Q. Is that true or not?

A. We get some shipments out of Indiana and also Illinois.

Q. That comes on rail billing?

A. Yes.

Q. Do you have any preference whether it should come [fol. 823] on rail billing or truck billing in regard to the quality of service you get?

A. Well, the reason that I specify the rail billing is because I know it will come on this Rock Island Transit, and I prefer that. There are no other motor freights coming in there, that is, there is none that haul local freight that I know of, but on those transfers, I just don't like that too well. That is the reason I specify it.

Q. You specify rail?

A. I always specify Rock Island. That is the way I specify it.

Q. So you will be sure that the Rock Island gets it and brings it in to you?

A. That is the way I specify it, yes.

Q. Instead of somebody else that might be kicking it around before it got there?

A. That is the idea, I think.

Q. Is there any other motor trucker that you know of that gives a daily or any service to Wellman on a regular basis?

A. There isn't to my knowledge, no.

Q. Wellman is located on Iowa Highway 22, is it not?

A. That is right.

Q. About how far west of U. S. Highway 218 is it?

A. Oh, it is about 14 miles, I believe, 13 or 14.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

[fol. 824] Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Howland: Mr. Hitchen.

Q. Inbound and outbound.

A. Daily.

Q. Daily. What transportation service have you had in the past available to serve your plant there at Griswold?

[fol. 847] A. We have the Chicago, Burlington and Quincy Railroad. It is a branch line which does not make for good service. We have the Thornton Transfer, which is a small transfer that starts at Griswold and ends at Omaha. We have the McVey Transfer, which originates at Greenfield and runs to Omaha, but for service, anything they pick up for us in Omaha, it is my understanding they must carry it to Greenfield and back to Griswold, which is an extreme delay, which is very bad at the present time, and then we have the Rock Island Motor Transit which carries practically all of our merchandise from Chicago to Griswold except at the present time when the load exceeds 5,000 pounds.

Q. I want to ask you particularly about that 5,000-pound restriction. In your operations, when you make shipments of sheet steel under normal conditions, in about what quantities do you buy those supplies?

A. During normal times, it would run anywhere from 20 to a hundred thousand pounds.

Q. During the period of the last few months, there have been allocations or controls of various types imposed by the Government restrictions and regulations on the purchase of those materials, I take it?

A. That is right. Your Department of Commerce issues a quarterly allotment to us, which restricts purchasing very, very sharply and does not permit us to have an inventory of materials too far in advance. I believe the regula-

[fol. 848] tion calls for nothing more than 30 days in advance.

Q. What has been the effect of those regulations so far as the quantities of sheet steel that you have been purchasing at a time in recent months?

A. Well, it cuts it down very sharply. Until recently you could not purchase in large quantities, but of late you can buy all the steel that you want or can buy according to the Department of Commerce.

WALTER HITCHEN, was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?
A. Walter Hitchen.
Q. And you live where?
A. In Des Moines, Iowa.
Q. By whom are you employed?
A. Rock Island Motor Transit Company.
Q. In what capacity?
A. General freight agent.
Q. How long have you worked for that company?
A. Since 1938.
Q. And prior to that time your employment was what?
A. With the Burlington Transportation Company.
Q. In your employment with the Burlington Transportation Company and with the Rock Island Motor Transit Company what has been your particular assignment or what work have you done?
A. Well, mainly rates and divisions and some Interstate Commerce work.

Mr. Fowler: There is no question about this man's qualifications as a traffic manager.

[fol. 825] The Witness: Thank you.

Mr. Howland: I appreciate that. One of our difficulties is that we have to make the showing that we hope will satisfy the Commission.

Mr. Fowler: Well, it is all right with me. Go ahead. I thought maybe I was doing you a favor. I am sorry I tried it.

Mr. Howland: I am not critical of you.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Howland:

Q. Mr. Hitchen, since becoming associated with the Rock Island Motor Transit Company, have you served on rate committees of the motor carrier industry in this territory

and concerned yourself with the level of rates and the divisions with other carriers?

A. Yes, sir. I am a member of the board of directors of the Middle West Motor Freight Bureau at Kansas City.

Q. Tell us what that is.

A. That is the governing board of the motor carriers of the Middle West and the general rate committee which handles all rate matters for the Middle West Motor Freight Bureau, and the national traffic committee which is a committee appointed by the carriers of the various states, and I was elected by the Motor Carriers of Iowa to represent them on the National Classification Committee in Washington, D. C.

Q. How long ago was that?

[fol. 826] A. The last 10 years I have been on that committee, and also Mr. Rice and I are the two senior members of the Iowa committee, that is the Middle West Motor Freight and the Western Truck Line Committee.

Q. This Middle West Motor Freight Bureau that you referred to, are you connected with that in some official capacity also?

A. Well, on the board of directors. I was president two years ago, but that is a rotary assignment, and for the last 10 years I have been on the board of directors.

Q. Mr. Hitchen, some reference has been made during the course of this hearing to the establishment of joint rates by the Rock Island Railroad with motor carriers for the purpose of establishing interline service or taking care of the combined rail and motor transportation service. Do you happen to be familiar with the policy of the Middle West Motor Freight Bureau with respect to establishing joint rates with rail lines?

A. I am.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Howland:

Q. Tell us what your information is on that subject and on what occasions the latter has arisen in the organization.

Q. There has been an easing or lifting of those restrictions which have been in effect?

A. No, sir; there is no easing of restrictions. There is only an easing of being able to purchase the material if you have the permission of the Department of Commerce to buy it.

Q. Well, now, with respect to castings or the burners themselves; those come from points outside the State of Iowa for the most part?

A. Most of the castings come within the State of Iowa. You speak of the burners. We make the burners in our own plant.

Q. You manufacture them yourself?

A. Yes, sir.

Q. Now, on your inbound material other than the castings such as machines, engines for your power mowers and matters of that sort, in what quantities do you normally have those shipped to you?

A. Again, at the present time it is now quite restricting. [fol. 849] There is one engine manufacturer at the present time only shipping 30 or 40 engines a month, but normally we try and have them come in in quantities of 2 to 4 hundred.

Q. When you buy in quantities of 2 to 4 hundred gasoline engines, I take it that a restriction of 5,000 pounds would somewhat hamper your purchases, am I correct in that?

A. That is right. Now, here is an invoice or a bill of lading covering 200 engines from the Lawson Company, weight 7,000 pounds.

Q. How many engines was that?

A. 200.

Q. And a weight of 7,000 pounds?

A. Yes.

Q. Is there any advantage by way of price to your company in purchasing larger quantities?

A. Yes, sir; if nothing more than the freight rates.

Q. But in many instances you do get better price——

Q. Yes, sir.

Q. —when you place a large order. It is like most other items. Now, you understand, I take it, Mr. Cocklin, that

the Rock Island Motor Transit Company has been, since about the 1st of September 1951, operating on a purely temporary motor carrier authority from the Interstate Commerce Commission?

A. Yes, sir.

Q. And I believe you were a witness in the proceeding [fol. 850] held by Examiner Carpenter about the 26th of September 1951?

A. Yes, sir.

Q. Now, do you understand that the present proceeding is an application for permanent authority and that the Rock Island Motor Transit Company has asked for the removal of the 5,000 pound restriction as well as certain other changes? Have you been so informed?

A. Yes, sir.

Q. Now, would the elimination of Rock Island Motor Transit Company service to your town of Griswold or a substantial curtailment of it have any effect on the business of the Laco Oil Burner Company?

Mr. Fowler: Just a moment. Objected to as immaterial, assuming facts not established in this record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Fowler: Mr. Examiner, there undoubtedly will be several questions of this same import to which I have individually objected, and it probably would serve the purpose just as well if we had an understanding that we are making the objection to this line of inquiry for the reason that there is no showing in this record to the effect that the Rock Island Railroad or its affiliate have any intention of abandoning any service irrespective of the outcome of this application, and may we have the stipulation that that objection may apply to all inquiries of this character?

[fol. 851] Mr. Howland: I will agree on behalf of the applicant that the objections now made, and heretofore made to similar interrogatories propounded to other witnesses, may apply to further examination of this witness and any future witnesses whom we may call or who may be examined by Mr. Nolan in connection with similar interrogatories.

A. About three years ago the Kansas City Southern applied to the Middle West Motor Freight Bureau for permission to enter the bureau as a member in joint rates [fol. 827] with motor carriers. I was on the board at the time and have been, as I said, for the last 10 years and was there at the time that the application was made by the Kansas City Southern, which was refused and turned down by the board of directors by 12 to 2 votes.

Last year the Texas and Pacific applied for membership in the Middle West Motor Freight Bureau. The bureau at that time turned down the Texas and Pacific in the same manner.

The Rock Island Motor Transit Company has never made application, but has felt it out and the same feeling prevails.

Q. Are you also familiar with an organization known as the Central States Motor Freight Bureau which publishes as an agent for carriers rates in the Chicago territory?

A. Yes, sir, we are by reciprocity a member of that organization.

Q. Are there any railroad carriers who are parties to tariffs published by that organization?

A. No, not in the Central states.

Q. Mr. Hitchen, during the period of your service with the Rock Island Motor Transit Company, have you been familiar with efforts to establish a so-called coordinated part railroad and part motor carrier service between points on the line of the Rock Island Railroad and the Rock Island Motor Transit Company?

A. Well, I haven't had any part in the establishing of it, but I would be informed of the fact that it is being established and with the point of the publication of rates [fol. 828] so we get substituted service directly.

Q. Are you familiar with the manner in which that situation has worked out?

A. Yes, sir, quite.

Q. Can you tell us of the experience and the results which you have had or the carriers have had where service of that kind has been established?

Mr. Fowler: Just a moment. Off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: On the record.

Mr. Howland: I will withdraw that question, and I will ask you this one:

By Mr. Howland:

Q. Does the Rock Island Motor Transit Company handle service for the Rock Island Railroad at Minneapolis and St. Paul?

A. Yes, sir.

Q. Who performs the pickup service in connection with rail shipments originating at either of those cities?

A. I don't know the name of the concern, but it is a private carrier that picks up for the railroad in St. Paul and Minneapolis.

Q. And that is not made by the Rock Island Motor Transit?

A. Not by the Rock Island Motor, no, sir.

Q. Can you tell us the course of which shipments origi- [fol. 829] nating at Minneapolis and destined to the point of Marengo, Iowa, one moving on rail billing and the other on truck billing would take.

A. Yes, sir. The Motor Transit Company would pick up at the shipper in Minneapolis or St. Paul, and it would leave the same night on the truck and get to Des Moines the following day and either delivered in Marengo the late afternoon or the second morning to Marengo.

The shipment by rail would be picked up by the rail pickup agent, whoever he is, taken to the terminal at St. Paul or Minneapolis and would be turned over to the truck the following day. On arrival in Des Moines it might come by truck and it might come by rail to Des Moines, one or the other. Nevertheless, they both wouldn't arrive for two days because of the delay in St. Paul or Minneapolis in the billing and turning over to us or putting in a box car and arrival at Des Moines would be practically the same thing.

There would be one or two days delay before it was transferred to us to deliver to Marengo, so the result

Exam. Carpenter: Mr. Fowler may have a continuing objection to that type of question.

The objection is overruled. Go ahead and answer the question.

Mr. Howland: Will you read the question so that we can get it in mind?

(Question read.)

A. Yes, sir. As time progresses, your customers demand fast service and for us to give fast service we must have fast service both into our plant and out of our plant. At the present time on shipments heavier than 5,000 pounds it is necessary for other carriers to bring them to Griswold.

In taking a sample from our file—and this is not a picked sample; it was taken at random—it shows that on five hauls made by other than Rock Island Motor Transit, the five hauls took 41 days or an average of 8.2 days per shipment.

By Mr. Howland:

Q. Was that from point of origin at Chicago?

A. That was from Chicago to Griswold.

Q. Thank you.

[fol. 852] A. Eight hauls brought in to Griswold by Rock Island Motor Transit from Chicago totalled 29 days, or an average of 3.6 days per shipment.

Now, these shipments were not all over 5,000 pounds. It is a mixture of weights, which shows Rock Island is giving service on heavy shipments as well as light ones because this sampling goes back prior to the 5,000-pound restriction as well as since the restriction was put into effect.

Q. What in your judgment would be the effect of the elimination or substantial curtailment of Rock Island Motor Transit Company's service? Would it require a heavier inventory or would it require you at times to shut down your plant or just——

A. At the present time, it would mean that we would have to shut down our plant. Engine supply for the mowers is very critical and cannot be bought in advance in large enough quantities to carry us through the season. Last season there were several times that we were out of engines

would be two to four days delay between the rail and the truck shipment.

Q. In other words, in all motor carrier billed shipments they would arrive at destination somewhere between two and four days earlier in the normal service?

A. That is right. The rail freight has to be delivered to the rail terminal before it is turned back to us for trans- [fol. 830] fer, whereas our truck just transfers it the next day and it goes right on to Marengo.

Q. What about the case of two shipments moving in the opposite direction, that is from a point like Marengo, which is intermediate between Davenport and Des Moines, to the Twin Cities?

A. Well, it would practically be the same. The shipment may come in by motor truck or by rail from Marengo to Des Moines, but whichever way it would come, if it came by rail it would be in the hands of the railroad, and if we brought it in, we turn it over to the railroad terminal in Des Moines. Then they may send it from there by either trap car or turn it over to the motor transit again for transportation to Minneapolis, whereas we would transfer it from truck to truck the same evening and move it up to Des Moines northbound the same day.

Q. Are you familiar in a general way with the time required in transit for handling of shipments on rail moving between Chicago, Illinois and Des Moines, Iowa?

A. Yes, sir.

Q. What is the fact as to whether there is a difference in the time consumed in transit whether a shipment from Chicago to Des Moines is moved on rail billing or on motor carrier billing?

A. Well, it is practically the same process. The shipment for the motor transit would be picked up by our pickup truck in Chicago and sent out from Chicago the same night. The ones picked up by the railroad or by their agents— [fol. 831] and it is not picked up by the Motor Transit Company, because we don't do their service in Chicago— or it might be brought to the rail terminal, which is in Chicago proper. From there it is sent to Burr Oak for classification. Burr Oak is a classification yards.

Q. Burr Oak is located just outside the corporate limits?

that was holding up shipments and when there was a shipment got to Chicago, Rock Island was bringing them into our plant in as little as 3 days.

Q. Do you know of any other carrier that renders a service to your plant at Griswold which is comparable in point of time consumed or in other respects with the Rock Island Motor Transit Company?

A. Just as I stated a while ago, on this sampling there is a difference of 4.6 days between Rock Island Motor Transit [fol. 853] Company service and the others.

Q. Now, as far as the other carriers who are available to your town and whose service you might utilize on a shipment moving from the east, where would that have to be interlined with either Thornton or McVey?

Q. For a shipment going east from our plant?

Q. No; a shipment moving into your plant from the east.

A. From the east?

Q. Yes.

A. It would have to interline at Omaha and an interline means at least 24 hours' delay, plus an extra hundred miles of travel.

Q. Now, with respect to the character of the service rendered by these other carriers that you have as to tracing of shipments, as to processing or handling of any claims for loss or damage or those features of the service, how does the Rock Island Motor Transit Company service compare with that rendered by the other carriers?

A. Rock Island has been tops. For instance, in our busy season there are many dealers that will not order as soon as they should, and of course they expect the merchandise to be there quicker than humanly possible, but nevertheless there is a lot of checking to do to satisfy our customers, and any time a shipment has gone out by Rock Island, I can call Des Moines and have an answer in not longer than 48 hours, whereas, with the others, apparently they trace [fol. 854] by mail, and it will run to a period of 2 to 3 weeks.

Another point that I would like to bring out why we like to deal with larger concerns such as Rock Island Motor Transit is that we have less trouble on claims, plus a year or two ago we were sending some merchandise through the State Transfer in Nebraska, and they were C. O. D. ship-

A. I believe. I don't know the mileage. I believe it is 15 miles.

Q. It is out of Blue Island?

A. Blue Island is the town and Burr Oak is the transfer point.

Q. Go ahead.

A. There it is classified. Of course, there is all kinds of freight that comes into Burr Oak from all over the country, from other railroads and everything. That is why it has to go for classification to Burr Oak.

The shipments that go west are sent back to Chicago for truck transfer or loaded in a box car to Davenport. Where there are key points, of course, they can't give it to us for delivery west of Des Moines; it has to be loaded in a box car as far as Altoona. If it is for beyond Des Moines, it has to be loaded in a box car to Des Moines. For points west of Davenport, it has to be loaded to Davenport before it can be turned over to the Motor Transit.

A car from Chicago to Davenport does not make Davenport for two or three days and sometimes longer on account [fol. 832] of it going through the Silvis Yards, which is east of the Tri-Cities. The Silvis Yards are the classification yards for the Tri-Cities, and it is classified there and forwarded into the terminal. I am sure the delay from Chicago to these points would be more than that from Minneapolis because of the key point restrictions.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Mr. Hitchen, you cited a number of instances out of Minneapolis and Chicago. Let's take a terminal which originates a shipment where you have an arrangement that the pickup of the railroad should be done by the transit company and they are in the same building, you wouldn't have that delay, would you?

A. Yes, sir, to a certain extent. The shipment is delivered whether it is in the same building or not to the

ments and it ended up the State Transfer stuck our C. O. D. remittances in their pocket and those remittances amounted to 3 hundred and some odd dollars and the two men at the head of the State Transfer were fined a hundred dollars apiece. Deals like that do not make a manufacturer happy.

Q. Now, have you been handling any national defense contracts at your plant?

A. No, sir; not during this war or should I say policing?

Q. Whatever you want to call the Korean action.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, Mr. Cocklin, Griswold is not located on the rail lines of the Rock Island Railroad?

A. No, sir.

Q. It is located approximately 6 miles south of U. S. highway No. 6?

A. Yes, sir.

Q. And Griswold is served at the present time by the [fol. 855] Chicago, Burlington and Quincy Railroad?

A. A branch line, sir.

Q. Does the Burlington truck line serve Griswold?

A. No.

Q. Now, with respect to the common carrier service you have in addition to the service of the Rock Island Motor Transit, you have the McVey Transfer Company?

A. Yes, sir.

Q. Where are their headquarters?

A. Greenfield.

Q. Then you also have the Thornton Transfer Company?

A. Yes, sir.

Q. Where are their headquarters?

A. Griswold.

Q. Now, both of those concerns are common carriers by motor vehicle?

A. Yes, sir.

Q. And they both have terminal facilities at Omaha for inter-change——

A. Yes.

Q. —with other carriers. Now, does Watson Bros. serve Griswold, Iowa?

A. No, sir. If they have a permit to serve Griswold, they do not make any daily stop at Griswold.

Q. Now, on your volume shipments of steel—I am talking [fol. 856] now about normal times——

A. Yes, sir.

Q. —you get those shipments in at least truckload or carload, do you not?

A. Yes.

Q. Do you use both rail and motor carrier service for your volume shipments of steel?

A. Back in the old days, yes, but the last few shipments that were sent in by rail, the damage on the steel was so great that I doubt if we will ever go back to it.

Q. So the result is that you are now having your volume shipments of steel and engines and any volume shipment by truck rather than by rail?

A. Yes, sir.

Q. On your steel shipments, do those move out of the Chicago steel district?

A. Yes, sir.

Q. Gary, and so forth?

A. Yes, sir.

Q. And on a volume shipment, of course, the shipment is controlled by the shipper, is it not?

Mr. Howland: You mean the routing?

By Mr. Fowler:

Q. The routing.

A. It is controlled by us.

Q. What type of motor carrier do you use? I am talking [fol. 857] now about volume shipments on steel. Do you use exclusively Rock Island Motor Transit?

A. At the present time——

Q. I am talking about the normal situation.

A. Normally, yes.

railroad employees and their billing is made in their office, and there is usually a delay at rail offices whether it is a large or small station. You don't get it out the same day as you do with the motor carrier.

Q. We have had some testimony here about your arrangement at Iowa City. There you are all in the same room and the only division line is a chalk line.

A. Yes, sir.

[fol. 833] Q. And the Rock Island Motor Transit brings in the freight on a truck and unloads the rail freight at point A, and the transit freight is next door to it at point B. You don't mean to tell me that that causes a day's delay?

A. It may not at Iowa City, but if those shipments are coming in from some point and transferred, yes.

Q. Let's talk about Iowa City.

A. There is a certain amount of delay because of the billing.

Q. It wouldn't be a day?

A. I should say so, yes.

Q. It would take a day to accomplish that transaction?

A. Knowing the railroads as I do, I believe there would be that delay.

Q. Then your difficulty is in your pickup arrangement, isn't it?

A. Well, yes.

Q. In other words, you take this long delay at Minneapolis that you are claiming about, that is the railroad company's fault, isn't it?

A. Well, yes, I would say so. If I had my own ideas put into effect, perhaps I could change the thing and make it better and perhaps someone else could too, but you can't change set ideas in the way they work today.

Q. The railroad company is the grandma of the Rock Island Motor Transit, isn't it?

A. Yes, but sometimes the grandchildren are a little [fol. 834] smarter than the grandparents, you know.

Q. That is the situation?

A. Yes.

Q. And it comes about due to the fact that at certain

terminals your rail pickup and your transit pickup is handled separately?

A. Yes.

Q. And at different locations?

A. And at different locations.

Q. At other points you do have them at the same location?

A. That is right.

Q. Where the Rock Island Motor Transit Company picks up and delivers for the railroad?

A. Yes, sir.

Q. And with respect to its actual over-the-road movement it could be loaded on truck?

A. Away from the key point restrictions.

Q. I know outside of the key point restriction. The only reason why that would ever move by box car would be in a situation where there was a surplusage or an overage of motor truck freight?

A. That is right.

Q. In other words, if at Minneapolis there was a congestion of transit company freight, it would be put on a rail car, or by the same token, if there was an overage of rail freight and some available truck space, it would be handled by truck?

[fol. 835] A. Well, maybe they occasionally have used box cars, but that is not the advisable way to handle it.

Q. It could be?

A. It could be.

Q. As I understand your operation, it makes no difference whether the freight is billed on Rock Island Motor Transit billing or Rock Island Railroad freight billing, it can be handled all by truck or it can be all handled by truck or all by rail car?

A. Yes, it can be.

Q. Mr. Hitchen, are there joint rate agreements between certain railroads and certain motor carriers, particularly in the Southwestern part of the country?

A. To my knowledge the Southwestern Motor Freight is the only bureau that has rail carriers in its tariffs.

Q. And that is an arrangement they have with the Texas-Pacific and the other rail carriers in that territory?

A. The Kansas City Southern and Frisco Lines.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect?

Redirect examination.

By Mr. Howland:

Q. Counsel has asked you about the handling of these rail billing shipments. Can the Rock Island Motor Transit employees in a matter of practical business bill out the shipment on railroad billing?

A. No, sir.

[fol. 836] Q. Why not, if they are all working for the same people?

A. Well, they don't. They don't consider us working for the same people.

Q. In other words, is it a question of classification and union organization that enters into matters of that character?

A. Well, to a certain extent, of course.

Q. Do you happen to know, Mr. Hitchen, whether there is any point at which the billing work and the clerical work in connection with billing out a railroad shipment is handled by Rock Island Motor Transit employees?

The Witness: Will you repeat that question?

Exam. Carpenter: Read it.

(Question read.)

A. No, sir, I don't know of any.

By Mr. Howland:

Q. You say that that is likely to result in some period of delay?

A. Sure, yes.

Q. With respect to this Chicago situation, Burr Oak is the terminal at which the billing work is done on rail shipments, is it not?

A. Yes, sir.

Q. And Burr Oak is adjacent to the Blue Island yards of the railroad, which is the point at which the freight trains are made up for departure from the Chicago terminal area?

A. Yes, sir.

[fol. 837] Q. And in the physical handling of shipments assembled in the down town area of Chicago, whether they would be in carloads or less than carloads, the cars are first switched from down town Chicago out to Blue Island or Burr Oak, whichever you wish to call it?

A. That is the way I understand it. Of course, Rock Island Motor Transit do some shipment service for them where they shuttle down town for freight.

Q. That is between freight houses?

A. That is right.

Mr. Howland: That is all.

Exam. Carpenter: Anything else, Mr. Fowler?

Mr. Fowler: No.

Mr. Nolan: I have a few questions.

Exam. Carpenter: All right.

By Mr. Nolan:

Q. What is the fact as to whether or not it takes different training or at least a combined training for a man to be able to handle rail billing and truck billing? Can one trained in one field do that without additional training in the other field?

A. Technically, no. A tariff is a tariff and a tariff man becomes used to them, but for constant work it would need separate training.

Q. I am talking from a practical standpoint, the fact that you have a young man working in the motor truck office [fol. 838] and he is able to read truck rates and classify the freight, can you take that same man without training and turn over a rail freight shipment to him and have him properly classify it and rate it?

A. Not immediately you couldn't do that. He would need further training to handle both kinds. There is a difference in the tariffs.

Q. The shipper was the Alason——

A. Lawson Company.

Q. Lawson Company of New Holstein, Wis.

A. And it was shipped from New Holstein to Chicago by Clipper.

Q. And then transferred to Brady Motor Freight and Brady Motor Freight delivered it to you on—you said within 4 days.

A. Yes, sir; 4 days from Chicago.

Q. You mentioned a Rock Island Motor Transit bill of lading that you had in your hand. Will you let me look at that?

A. Which one are you referring to?

Q. Early in your testimony you mentioned some——

A. I have eight.

Q. Just let me look at them.

A. Would you like to examine these at the same time, Mr.——

Mr. Howland: I would like to see the ones that you have so that we can——

The Witness: Those are all Rock Island.

Mr. Fowler: That is all I want.

By Mr. Fowler:

Q. The shipments which you receive or those which you ship by Rock Island Motor Transit Company, of course, are on motor carrier billing?

A. Yes, sir.

Q. They are not on rail billing?

A. Yes, sir.

[fol. 861] Mr. Fowler: That is all I have.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. Mr. Cocklin, I would like to ask you as to whether this Brady Motor Freight Company or Brady Transportation Company—I am not just sure——

A. Brady Motor Freight.

Q. The Brady Motor Freight Company, does that render a regular service?

A. No, sir? That is just the point. If they only come in to Griswold when there is a large shipment, we don't want to see them. We want somebody that wants to take care of us on a shipment if it is even less than a hundred pounds.

Q. Have you ever had any service from Brady on shipments of less than 5 or 6 or 7 hundred pounds?

A. I would hate to say the exact poundage on that, but no small deliveries have been made by Brady.

Q. With what regularity does Brady get into Griswold, if you have observed it?

A. I would doubt if they make it over three or four times a year.

Q. Now, you referred to the situation that some of these trucks that were transporting your shipments of sheet steel, that you had had difficulty in the condition in which they had arrived. What is the fact about that? As I recall, [fol. 862] your statement with respect to that was stricken as not being responsive to the question, but I want to find out a little bit about that. What has been your experience with respect to shipments coming in by either these live-stock truckers or——

A. Why it is damaged?

Q. Is it damaged——

A. Yes, sir.

Q. ——when it reaches you. What is the situation?

A. Most of those carriers do not have an enclosed body for one thing, and if they run into any rain or snow or sleet or any form of moisture, the steel is terribly rusty and when it comes in in a rusty state we have to take it sheet by sheet and if it is bad enough we have to metal crimp it to remove the rust and then oil it.

If the rust has not eaten into the steel enough sometimes we can get by by just oiling it, but even oiling it is expensive. Another thing, it seems as though those type of carriers bend the edges an awful lot and when an edge is bent it means by the time you get it sheared out of there you have a very small sheet left.

Q. It is hard enough to train them in one, isn't it?

A. Yes, it is hard enough to train them to use one set of tariffs.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Minchow.

A. H. Minchow was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence and occupation?

A. A. H. Minchow.

Q. You live at Oakland, Iowa?

A. Six miles east of Oakland.

Q. What is your address?

A. Oakland.

Q. What is your occupation?

[fol. 839] A. Superintendent of Northern Natural Gas plant at Oakland, Iowa.

Q. And is that a station, substation on the pipe line?

A. That is a compressor station, yes, sir.

Q. How many men are engaged in operating that compressor station there?

A. There are 51.

Q. Fifty-one men?

A. Yes, sir.

Q. That is operating the compressor station and maintenance, I suppose, of the pipe line?

A. That is the compressor station.

Q. Then do you have other men in that area who operate the maintenance end of it?

A. Of the pipe line, yes.

Q. You live out at the compressor station, is that correct, Mr. Minchow?

A. That is right.

Q. Is that on the highway?

A. No. 6.

Q. Highway No. 6, six miles east of Oakland?

A. That is right.

Q. What shipments do you have that go into that plant, Mr. Minchow?

A. We have all of our repairs that come in there for our [fol. 840] engines there.

Q. How many shipments would you have come into the plant?

A. Well, during construction when we are doing a lot of building it is day and night.

Q. Are you still under construction?

A. Yes, sir.

Q. How long will that construction last?

A. Well, it will be indefinitely, I guess, the way they are growing. We had it last year, we had it in 1948, 1951, and we are having it again this year.

Q. These 51 men, are they working on the construction end of it?

A. No, they are regular employees.

Q. Regular employees?

A. Yes.

Q. Do you have occasion to have shipments come in when you are not expanding or constructing?

A. Yes, we do.

Q. What are those shipments?

A. Repairs for engines there.

Q. Tell us how that compressor station works, just briefly. Is that where the gas is boosted along so it will get to the next station?

A. That is right. The compressor stations are approximately 100 miles apart.

Q. Where is the next compressor station on that line? [fol. 841] A. North or south?

Q. Well, north.

A. Ogden, Iowa.

Q. That is gas, not gasoline?

A. That is natural gas, yes, sir.

Q. You say you have shipments coming in about every day to the plant there, is that correct?

A. Approximately every day.

Q. Where do those shipments come from?

A. From the east mostly.

Q. When you say the east, you mean east of Iowa, like Chicago and points east?

A. Chicago and New York, Buffalo, New York and Pennsylvania.

Q. What would be the size of those shipments?

A. Well, it all depends on motor freight, all the way from 100 pounds to 5,000 pounds.

Q. Did you ever have shipments in excess of 5,000 pounds?

A. Well, I can't recall of any.

Q. You are the manager of the maintenance or I mean manager of the compressor group there at Oakland?

A. Yes, sir.

Q. Naturally, you are not located on a railroad, are you?

A. No, we are not.

Q. You are six miles off of the railroad?

A. Six miles off.

[fol. 842] Q. What company has been hauling your parts to you there and repairs and things that you have been getting by truck?

A. Rock Island and Iowa-Nebraska.

Q. Do you have any preference between the Rock Island Motor Transit and Iowa-Nebraska in regard to the quality of service one gives over the other?

A. One brings it from the west, Iowa-Nebraska brings it from the west, our shipments out of Omaha.

Q. How do your shipments come in from the east?

A. Rock Island.

Q. Has that service been satisfactory?

A. Yes, sir, it sure has.

Q. Does the Iowa-Nebraska give a daily service out of Omaha?

A. Well, whenever we call them.

Q. That is on a call that you get service there?

A. Yes.

Q. The only service that they have given you is from the west or from Omaha?

A. Yes.

Q. The Rock Island Motor Transit has handled your shipments from the east?

A. That is right.

Q. Do you know of any motor carrier that gives a regular daily service for shipments coming from the east?

A. No, sir.

[fol. 843] Q. Into Oakland?

A. No, sir.

Q. If you don't know, then you wouldn't know where to replace this service if the Rock Island Motor Transit Company was required to terminate its operations or curtail its operations?

Mr. Fowler: Just a moment. That is objected to as immaterial, and it assumes a fact that has not been established in this record. I have not heard any statement that has any foundation in it that anybody is going to quit service because of this application.

Exam. Carpenter: Objection overruled.

Mr. Nolan: You may answer.

Exam. Carpenter: Do you remember the question?

The Witness: No.

Exam. Carpenter: Read it.

(Question read.)

A. Well, I don't know who we would get.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: We will adjourn until Monday morning at 9:30 in this same room.

(At 3:20 p. m., March 21, 1952, an adjournment was taken until 9:30 a. m., March 24, 1952.)

[fol. 844] TRANSCRIPT OF PROCEEDINGS OF MARCH 24, 1952

Exam. Carpenter: Let's proceed.

R. L. COCKLIN was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, and in giving your evidence, speak so we can all get it.

A. R. L. Cocklin.

Q. Your home is where?

A. Griswold, Iowa.

Q. Griswold is a town of about what population?

A. Approximately 1,200.

Q. Where is Griswold located?

A. Griswold is located about 6 miles south of highway No. 6 and approximately 50 miles east of Omaha, Nebr.

Q. And it is close, I believe, to the county line between Cass and Montgomery Counties?

A. It is approximately 5 miles from the north line of Montgomery County and about 1 mile east of the Pottawattamie County line.

Q. And what is the nature of that community; that is, what businesses, industries, factories?

A. It is mainly a farming community, but we have our factory which has been in operation there for approximately 28 years. Also, there is a cabinet works which has been manufacturing kitchen equipment and store fixtures for approximately 4 or 5 years.

[fol. 845] Q. And in addition to those factories or manufacturing enterprises, I take it you have the usual retail establishments and service establishments for——

A. That is right.

Q. ——a community in a farming region in Iowa.

A. And we also have a large egg plant which ships, transport after transport of eggs to the east coast.

Q. You said that you had your plant or we have our plant there. What business is that to which you refer?

Q. Rock Island?

A. Yes, sir.

Q. What about the stock haulers who haul steel and that sort of thing back into Iowa, do you use their services?

A. No, sir; only in cases when the steel company does give it to them.

Q. Yes. In other words, there is——

A. We specify routing, but they don't necessarily always follow it.

Q. The point I was trying to develop was, are there other transportation agencies which are available for the transportation of steel in volume shipments from Chicago out into your territory?

A. Yes; but the condition of the steel when it arrives is horrible.

Q. Would you just answer my question.

A. Yes, sir.

Mr. Fowler: I move to strike the answer as a voluntary statement of the witness, not an answer to the question.

Exam. Carpenter: It will be stricken.

[fol. 858] By Mr. Fowler:

Q. So there are other transportation agencies available for the transportation of steel in volume lots from Chicago to Griswold, Iowa?

A. They have brought them in.

Q. Okay. Now, your engines—and again I am speaking of normal times—do you order the engines in quantities sufficient to make up a truckload or a rail carload?

A. No, sir, because—— May I elaborate?

Q. Go ahead, go ahead.

A. Because in normal times we couldn't afford to order in those quantities.

Q. The fact is then, you don't order them in those quantities?

A. No, sir.

Q. So you prefer to order them in less-than-volume shipments for the reason that you don't want to——

A. That would amount to 2 to 4 hundred engines per shipment.

Q. So the fact is you order less-than-truckload on volume shipments on your engines——

A. Yes, sir.

Q. —for the reasons you have stated. Let me see that bill of lading you referred to.

A. Which one, sir?

Q. The one you first referred to.

A. The Lawson?

Q. Yes, sir. What was the point you made about this bill [fol. 859] of lading? I have forgotten.

A. That was in the compiling of five shipments to secure an average time. Now, that particular shipment there was fairly good time. That happened to be 4 days, which helped out some of the other slower ones.

Q. The bill of lading you just handed me is a bill of lading of the Brady Motor Freight.

A. Yes, sir.

Q. Pro No. 282224 from the Aluson Company at New Holstein, Wis., and was delivered to you at Griswold, Iowa, by the Brady Motor Freight and the elapsed time on the shipment, you say, was 4 days?

A. Four days from Chicago.

Q. And it involved a weight of 7,000 pounds.

A. 7,000 pounds.

By Mr. Howland:

Q. Is that correct, that the delivery was made by Brady, delivery to you?

A. Yes, sir; it was made direct to us. Whether that is legal or not I don't know. We hardly ever see the Brady transportation. Now, I do not——

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Fowler:

Q. From the shipping documents which you have handed me, it is a shipment leaving Chicago on February 29, 1952. [fol. 860] A. Yes, sir.

And another thing when you have damage from that type of carrier, it seems like you are tracing for months and months to get a claim filed and a refund.

Q. Those carriers for the most part are carriers whose trucks are either stock-hauling trucks or some similar type [fol. 863] of equipment?

A. That is right.

Q. Those carriers render no regular service——

A. No, sir.

Q. ——to your plant at all, and I take it you may never see the carrier, may never be back again with any other shipment after you have had one delivered by them?

A. That is right. Maybe we will only see him on one delivery.

Mr. Howland: I think that is all.

Exam. Carpenter: Re-cross? You are excused.

(Witness excused.)

J. L. McCluskey, was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. You are Mr. J. L. McCluskey?

A. Yes, sir.

Q. You live at Brooklyn, Iowa?

A. Yes, sir.

Q. What is your occupation?

A. Y. and M. Hardware.

Q. Is that the name of the firm?

A. Y. and M. Hardware.

Q. Do you have a partner in the business?

A. York and McCluskey, and it is always Y. and M.

Q. York is the Y. and you are the M.?

[fol. 864] A. That is right.

Q. How long have you been in business in Brooklyn?

A. Seven years.

Q. And do you handle a regular line of retail hardware, supplies, and equipment?

A. Plumbing and heating.

Q. Also handle a lot of plumbing and heating, is that right?

A. Yes, sir.

Q. How about appliances?

A. Appliances, too.

Q. What are your sources of supply from out-of-State points, Mr. McCluskey?

A. Well, the majority, you might say Chicago mostly. We get some from St. Louis and then occasionally from Kohler, Wis.

Q. What are the quantity or size of those shipments on an average?

A. Oh, ours are small. I don't suppose very seldom we would ever get a thousand pounds, but more ordinary is under that.

Q. With what frequency do you have shipments come in from those out-of-State points?

A. They are pretty regular.

Q. Two or three times a week?

A. Oh, from out of State, not quite that often. More like once a week from out of State.

Q. What transportation company have you been using [fol. 865] getting those shipments from out-of-State points?

A. Well, Rock Island if possible. We always specify——

Q. The Rock Island Motor Transit Company?

A. Rock Island Motor Transit.

Q. Brooklyn is how large a town?

A. About 1,400. Around 1,400.

Q. 1,400, and it is located on U. S. highway 6, is it not?

A. Yes.

Q. And about half way between Des Moines and Davenport?

A. Just a little closer to Des Moines than it is Davenport.

Q. Now, you said you specify the Rock Island Motor Transit Company for these shipments. Why do you do that?

A. Service.

Q. Does the Rock Island Motor Transit provide you, and has it provided you with a daily service into Brooklyn for your shipments coming from these out-of-State points?

A. Yes.

Q. Do you know of any other transportation company that provides the same type of service?

A. No; I don't.

Q. Now, what is the fact as to whether or not there are a great many trucking companies that go through Brooklyn? You see their trucks through there every day, do you not?

A. That is right; a lot of them.

Q. But do those companies stop regularly and make deliveries?

[fol. 866] A. Very seldom.

Q. Have you had shipments come in by some other companies?

A. Iowa-Nebraska has brought some shipments.

Q. And was that at your request or——

A. No.

Q. —at the shipper's?

A. It was from the shipper.

Q. With what frequency or how often did you ever get shipments from Iowa-Nebraska?

A. Well, I have never checked back only since the first of the year. I checked back since the first of the year and I got three.

Q. You have had three shipments?

A. Three shipments.

Q. Since the first of the year. You said you got about at least one shipment a week through the Rock Island Motor Transit Company?

A. Oh, yes.

Q. That is from out-of-State points. What is the fact as to whether or not you get other shipments in by Rock Island Motor Transit from points within the State?

Mr. Fowler: Now, just a moment. That is objected to as immaterial to any issue in this case.

Exam. Carpenter: Objection sustained.

By Mr. Nolan:

Q. State whether or not you have any other transpor-

[fol. 867] tation company than the Rock Island Motor

Transit Company giving a local service to Brooklyn from either out-of-State points or intrastate points?

Mr. Fowler: Now, just a moment. Objected to as repetition and for the reason that it asks, inquires about intrastate service.

Exam. Carpenter: The portion of the question relating to intrastate service is stricken.

Mr. Nolan: We want to make an offer by this witness to show there is no other company delivering either interstate or intrastate shipments into Brooklyn other than Rock Island Motor Transit, no other company handling intrastate shipments in there. That is what we want to show. That is part of the case.

Mr. Fowler: I move that the voluntary statement of counsel be stricken for the reason it is incompetent, irrelevant, and immaterial.

Exam. Carpenter: I think he was making it as an offer of proof. I don't know.

Mr. Nolan: That is what the intent was.

Exam. Carpenter: The record will so stand.

By Mr. Nolan:

Q. Now, Mr. McCluskey, you say Brooklyn is around 1,400 population.

A. Around that, 14 or 15 hundred.

Q. And state what the fact is as to whether or not Brooklyn has any industry of any type.

[fol. 868] A. No.

Q. Manufacturing industry.

A. No manufacturing industry.

Q. Then I assume Brooklyn has all the usual retail and service establishments of a community or town that size, has in an agricultural area?

A. That is right.

Q. Such as garages, filling stations, implement stores, retail stores of all types. Now, what effect would a stoppage or a material curtailment of the service of the Rock Island Motor Transit Company have upon your business in Brooklyn?

A. Well, the public demands service and we do because no dealer wants to stock carload lots of stuff. We can't

afford it, and this way we can order in small quantities and get them regular and they are delivered right to the door.

Q. Well, what would the effect be, detrimental or otherwise?

A. It would be detrimental because a fellow wouldn't carry the stock.

Q. I believe you testified that you know of no other transportation service comparable or giving the same type of service the Rock Island Motor Transit Company is giving.

Mr. Fowler: Objected to as repetition.

By Mr. Nolan:

Q. Is that correct?

A. That is correct.

Mr. Fowler: Objected to as repetition.

[fol. 869] Exam. Carpenter: Answer the question.

Mr. Nolan: That is all.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, your principal interstate shipments involve Chicago destination to Brooklyn and at the present time you are using Rock Island Motor Transit?

A. That's right.

Q. You have had three shipments since the first of the year delivered to you by the Iowa-Nebraska Transportation Company?

A. That is right.

Q. In addition to Iowa-Nebraska, there are other common carriers serving Brooklyn on Chicago shipments?

A. Well, I couldn't say because none has ever solicited me or anything.

Q. But Iowa-Nebraska has?

A. Iowa-Nebraska.

Mr. Fowler: That is all.

Exam. Carpenter: Any redirect?

Mr. Nolan: That is all.

Exam. Carpenter: You are excused, Mr. McCluskey.

(Witness excused.)

H. H. MASTELLER was sworn and testified as follows:

Direct examination:

By Mr. Nolan:

Q. Will you state your name, place of residence, and [fol. 870] occupation, please?

A. H. H. Masteller.

Q. And what is your occupation, Mr. Masteller?

A. I am in the hardware business with my son-in-law.

Q. At Brooklyn, Iowa?

A. That is right.

Q. How long have you been so engaged?

A. I am on my third year.

Q. How long have you lived in the Brooklyn community?

A. Three years.

Q. Where did you live before that?

A. Atlantic, Iowa.

Q. Now, are you familiar with the transportation agencies and facilities of Brooklyn, Iowa?

A. I think I am.

Q. What agency have you been using to get your shipments into Brooklyn?

A. The Rock Island transportation.

Q. That is Rock Island truck line?

A. Truck line; that is right.

Q. From what points do you have out-of-State shipments come from?

A. Well, not too many. Chicago and Louisville, Ky. We deal—may I elaborate on that?

Q. Surely. It is an open meeting. Go ahead.

[fol. 871] A. —with Belknap people and they are located at Louisville. We designate the Rock Island, but of course we haven't been able to get that service out of Louisville, Ky.

Q. You say you haven't been?

A. No.

Q. Was that on account of some restriction?

A. I don't know, I am sure.

Q. What size shipments do you get from Louisville?

A. Oh, I would say under a thousand pounds.

Q. Since when haven't you been able to get that service out of Louisville, Ky.?

A. When haven't we?

Q. Since when haven't you been able to get service out of Louisville?

A. We do get service, but we get it over some other transportation company.

Q. I see. You don't get it through the Rock Island Motor, is that what you mean to say?

A. That is right. That is what I am trying to say.

Q. Did you formerly get it through Rock Island Motor Transit?

A. I am not sure. Not since I have been there. My son-in-law run this store before I come there, and I am not sure whether they did or not.

Q. Is the service you are now getting on those inbound shipments from Louisville, Ky., as satisfactory as ship-[fol. 872] ments you get in from other points on the Rock Island Motor Transit?

A. There is one outstanding incident that I might relate if I have the opportunity that isn't satisfactory.

Q. All right, what is that?

A. That was a shipment ordered by us around the first week of December, and it left Louisville on the 18th of December by Heuber and Heuber Company, and it wound up in Omaha, Nebr., after we had put a tracer on it. We wired the company what had become of this shipment, and it arrived at our store on the 23rd day of February.

Q. Who brought it to your store, what transportation——

A. Pardon me, I want to get this right. It was the 23rd day of January.

Q. What company delivered it to your store at Brooklyn?

A. Iowa-Nebraska.

Q. How has the service been by the Rock Island Motor Transit Company for out-of-State-point shipments? that you have had any experience with, of course.

A. All right.

Q. What was the size of that shipment from Louisville?

A. I believe it was in the neighborhood of 2 or 3 hundred pounds.

Q. Now, with what frequency do you have shipments come into your store from out-of-State points which have been delivered by the Rock Island Motor Transit Company?

A. Well, I just wouldn't like to say exactly, but——

[fol. 873] Q. Approximately.

A. From out-of-State, you said?

Q. Yes. Out of State or in the State.

Mr. Fowler: Just a moment.

Mr. Nolan: Just a minute. Let me ask the question.

Mr. Fowler: Go ahead and ask it and I will make my objection.

Mr. Nolan: Will you give me an opportunity to ask the question then?

By Mr. Nolan:

Q. How frequently do you have shipments come into your place of business which are brought into Brooklyn by the Rock Island Motor Transit?

Mr. Fowler: Just a moment. That is objected to for the reason that it is immaterial unless the inquiry goes to interstate traffic.

Mr. Nolan: I will go on after I find the frequency of the shipment.

Mr. Fowler: Just a moment. I made an objection.

Exam. Carpenter: Objection sustained.

By Mr. Nolan:

Q. Let me ask it this way: What portion of your shipments would you say are shipments from outside the State?

A. About one third.

Q. And then how frequently do you get shipments from out-of-State points by the Rock Island Motor Transit Company?

A. Oh, perhaps one a week.

[fol. 874] Q. Altogether, you would have about three shipments a week coming into your place at Brooklyn?

A. That is right.

Q. Do you know of any company that gives that type of service to Brooklyn that the Rock Island Motor Transit Company has been giving?

A. I do not.

Q. Now, where are you located, how far away from U. S. highway No. 6?

A. Perhaps a city block.

Q. Are you on the north-and-south street or on the east-and-west street?

A. On the north-and-south street.

Q. You no doubt see a great number of trucks going through Brooklyn daily of different companies?

A. That's right.

Q. Do any of those trucks make regular stops there that you know of?

A. I wouldn't be in a position to say whether they do or not, but to my knowledge they don't make regular stops.

Q. The deliveries made to your store by the Rock Island Motor Transit, state whether or not those are made from a smaller truck or a peddle truck.

A. That is right; they are.

Q. What is the fact as to whether or not your streets and [fol. 875] alleys in Brooklyn are narrow and difficult for a big semitrailer to make deliveries in the town?

A. That is true.

Mr. Nolan: You may cross-examine.

Mr. Fowler: No cross-examination.

Exam. Carpenter: You are excused, sir.

(Witness excused.)

D. W. Hubbard was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. State your name, place of residence, and occupation, please.

A. D. W. Hubbard, lumber man.

Q. Is that a local lumberyard or a line yard?

A. It is privately owned. We own it.

Q. You are the owner and operator of the lumberyard?

A. That's right.

Q. How long have you been in business in Brooklyn?

A. Five and a half years.

Q. You handle, I assume then, a full line of building materials?

A. Building material; that is right. And some hardware.

Q. And hardware?

A. Some hardware. And millwork.

Q. And millwork. Do you handle any farm supplies such as gates, water tanks, heaters, things of that kind?

[fol. 876] A. Yes; we do. Farm gates especially.

Q. You understand what is involved here, do you not?

A. Yes.

Q. Attempting to continue the operation of the Rock Island Motor Transit as it had operated over the past several years. Have you been using the Rock Island Motor Transit Company service for your inbound shipments?

A. I have.

Q. From what source do you get shipments brought into Brooklyn, Iowa?

A. I would say from Des Moines, Davenport, Chicago, Sterling, Ill.

Q. What do you get from Chicago?

A. We get some paint from Chicago. Of course, steel and asphalt shingles move out of Chicago by semi lots. We buy those in straight semi lots as a rule.

Q. What do you get from Sterling, Ill.?

A. Hardware.

Q. Do you handle fence materials, woven wire, barbed wire?

A. Fence materials.

Q. Steel posts?

A. Yes, sir; that is right.

Q. What company has been handling your shipments from Chicago and Sterling, Ill.? What company has been billing the shipments?

[fol. 877] A. When you say Chicago, that takes in steel and asphalt. That is handled mainly by your truckers who have booking agencies in Chicago.

Q. That is, livestock haulers that get a load back, is that right?

A. That is right; yes.

Q. And they haul shingles?

A. And wire. They as a rule haul that. We haven't any control over who hauls it. We may state our preference, but that doesn't always hold out.

Q. Do they sometimes comply with your routing of that?

A. Not very often.

Q. How does your less-than-truckload quantities come in, Mr. Hubbard?

A. By Rock Island Motor Transit.

Q. And do you specify that service?

A. Yes, sir; we do.

Q. Why?

A. Well in our line, especially millwork, we sell several houses every year, and you definitely have to give unexpected service on millwork items and we get good service from Des Moines here. I can call Des Moines as late as 2 in the afternoon and the Rock Island will pick that up and have it in Brooklyn for me the following morning.

Q. I am talking about out-of-State points now.

[fol. 878] A. Out-of-State points?

Q. Yes. Do you get any millwork from Rock Island?

A. No; I don't.

Q. Your paint and hardware, as I understand it, come from Illinois points?

A. A lot of it; yes.

Q. On those shipments, do you specify Rock Island Motor Transit service?

A. We do; yes.

Q. How has that service been in the past?

A. It has been very good.

Q. What effect would it have upon your company's business if the operation of the Rock Island Motor Transit Company were eliminated or materially reduced?

A. It would hurt our service a lot. We pride ourselves on giving service, and they do give daily service to us at Brooklyn.

Q. Do you know of any other transportation company that provides the same type of service as the Rock Island Motor Transit does to Brooklyn?

A. To my knowledge, there are none.

Q. And how often would you say you have shipments come into Brooklyn from out-of-State points by the Rock Island Motor Transit Company?

A. Oh, I would average probably two or three times a week.

Q. What portion of all of your shipments that are [fol. 879] brought in by the Rock Island Motor Transit would you say were from out-of-State points?

A. What portion. Oh, probably a fourth to a third.

Mr. Nolan: You may cross-examine.

Mr. Fowler: No cross.

Exam. Carpenter: You are excused.

(Witness excused.)

VERNON WOLFE was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation?

A. Vernon Wolfe, mayor of Brooklyn.

Q. Now, as I remember, you are retired, are you not?

A. That is right.

Q. Your main occupation is mayor of the Town of Brooklyn?

A. That is right.

Q. Why do you appear here, Mr. Wolfe——

Mr. Fowler: Just a moment.

By Mr. Nolan:

Q. —insofar as this application may affect the Town of Brooklyn?

Mr. Fowler. All right, go ahead.

A. On account of our streets. Our town is 102 years old and that is horse-and-buggy days.

By Mr. Nolan:

Q. You mean the town was built along horse-and-buggy [fol. 880] lines?

A. That is the idea, and the semi truck cannot get up our alleys. That is impossible, and we cannot allow them to unload in the middle of the street.

Q. What effect does the service of the Rock Island Motor Transit Company have, and how does that company relieve that situation?

A. The semis unload at the depot and they have a small truck service that brings it up and he can get in at any back door.

Q. In other words, you mean the Rock Island Motor Transit has a small peddle truck——

A. That is right.

Q. —to deliver the merchandise, whereas other companies try to unload direct from the big truck, is that right?

A. That is right.

Q. Anything else?

A. Nothing of any interest; I don't believe.

Mr. Nolan: That is all. Thank you very much.

Exam. Carpenter: Cross-examine, Mr. Bradshaw.

Mr. Bradshaw: No questions.

Exam. Carpenter: You are excused, sir.

(Witness excused.)

Exam. Carpenter: We will have a 5-minute recess.

(Short recess.)

WILLIAM J. CREAGAN was sworn and testified as follows:

Direct examination.

[fol. 881] By Mr. Howland:

Q. You may state your name, place of residence, and occupation, please.

A. William J. Creagan, Rockford, Ill. I am with the Knox Motor Service Company, Incorporated.

Q. What is the business of the Knox Motor Service?

A. We are a common carrier in interstate and foreign commerce.

Q. In what territory does Knox Motor Service operate as such carrier?

A. Our authority extends to the north to Milwaukee, Wis., to the east, Chicago commercial zone, to the west, Freeport, Iowa—that is the northern part of Illinois, and we blanket the northern part of Illinois. Our southern extremity would be the Quad Cities, I believe it is called, and Peoria.

Q. You referred to a point of Freeport, Iowa.

A. Illinois—I'm sorry.

Q. Freeport, Ill., is the point?

A. That is correct.

Q. You don't operate into Dubuque, Iowa, I take it.

A. No. The only Iowa points are those points in the Tri Cities or Quad-Cities commercial zone.

Q. That would be Davenport and Bettendorf, Iowa?

A. That is correct.

Q. And the communities on the Illinois side of the Mississippi River?

[fol. 882] A. That is right.

Q. What is your position with the Knox Motor Service?

A. General manager.

Q. Now, do you originate shipments on your line which are delivered to you for transportation service to points in Iowa along U. S. highway 6?

A. We do.

Q. And in what size and volume do you have those shipments?

A. Mostly the smaller size. We have an occasional 10,000

pounds and up, but most of the shipments are of the oh, 2 or 3 hundred up to 2,000 class.

Q. Now, I take it that of necessity you interline your freight with companies having authority serve these Iowa points that are located west of Davenport and Bettendorf, Iowa?

A. Yes, sir.

Q. Do you have a more or less continuous flow of traffic from that territory which you serve, being Milwaukee, Wis., Rockford and Freeport, Ill., and to some extent the commercial zone at Chicago into Iowa points?

A. We do.

Q. Now, what has been your experience in times past with respect to interline connections for interior Iowa points on or adjacent to U. S. highway 6, particularly with respect to shipments say of 500, 600, 800 pounds or less?

A. There is only one carrier that would consistently take [fol. 883] them. That is the Rock Island Motor Transit Company.

Q. What has been your experience in tendering shipments to concerns such as Watson Bros., Knaus, Brady, Merchants, Des Moines Transportation, and other carriers operating in that general territory?

A. We interline daily, I think, with every one of those carriers that you have mentioned. We have had difficulty, however, getting rid of those small points that are in or around U. S. highway 6 to anybody but the Rock Island Motor Transit Company.

Q. When you refer to the smaller points, do you refer to the points of, say, with a population of 2,000 persons or less outside of points like Iowa City, Newton, and Des Moines?

A. I am not familiar with the population, but from the knowledge of the points, it is where these small shipments do go. The larger points that I do know, we do not have any difficulty. Anybody is very happy to take any of those shipments

Q. What points do you refer to as those larger points to which you have no difficulty?

A. Well, Iowa City, Muscatine, Des Moines, Cedar Rapids. There are some others. I don't recall the others.

offhand, but it is the points of that size where we have no difficulty at all.

Q. Now, your organization is a member of the American Trucking Association, is it not?

A. It is.

Q. What type and character of traffic do you have in- [fol. 884] volved at these smaller intermediate points to which you say that you have had difficulty in inducing other carriers other than the Rock Island Motor Transit Company to handle them?

A. We seem to have quite a lot of repair parts for implements out of J. I. Case Company. We handle a lot of medicine out of Rawleigh Company at Freeport. Hardware from Sterling, Ill., and hardware from Milwaukee, Wis. Small tool industry out of Rockford ships to those, but I think that the most important part would come down to the medicine and also the agricultural implement parts. When the parts are shipped, in most cases they are emergency shipments, more or less, and we have go to give a service on that particular commodity.

Q. Your implement parts, those shipments are made to the local dealer located in the particular small town to which they are destined, I take it, are they not?

A. Yes. I think there are some that go right direct to the party who owns the implement that is down. We can't always tell from the name whether it is a dealer or not.

Q. What has been your experience with respect to interline service performed by the Rock Island Motor Transit Company to these points on or adjacent to U. S. highway 6 between Davenport, Iowa, and Omaha, Nebr.?

A. No complaint has ever come to my attention and I would be advised of any complaints of service involving shipments that we do handle.

[fol. 885] Q. Have you ever had any difficulty in the Rock Island Motor Transit Company declining to handle it or delaying such shipments?

A. No, sir; none at all.

Q. About how many motor trucks does the Knox Motor Freight Service operate, Mr. Creagan?

A. We have over 200 trucks, tractors, and trailers.

Q. And about what is your personnel, about how many employees?

A. About 160.

Q. And do you maintain a daily service from Milwaukee and Rockford into the Tri Cities or Quad Cities?

A. We try to maintain a daily overnight service between any two points that we serve.

Q. And the principal points at which you have interline freight are Rockford, Milwaukee, and Freeport, Ill., to the Iowa territory?

A. Rockford rather than Freeport for the points.

Q. For your agricultural implements, but your Rawleigh products originate at Freeport?

A. That is correct.

Q. I would like to ask you this question, Mr. Creagan. Let me ask it in this way: You are aware, I suppose, that the Rock Island Motor Transit Company is a subsidiary of the Rock Island Railroad Company, are you not?

A. That is correct.

[fol. 886] Q. And in your relations and the relations of your company, has the Rock Island Motor Transit Company been operated as a motor carrier so far as you have observed? Has there been any difference in the operation of the Motor Transit Company as you have observed it by reason of that ownership by the Rock Island Railroad?

A. Our affiliation with them has been strictly on a motor carrier basis. We have not seen or heard of the parent company.

Mr. Howland: You may cross-examine.

Mr. Fowler: No questions.

Exam. Carpenter: You are excused.

(Witness excused.)

ARTHUR WEE was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, please?

A. Arthur Wee.

Q. Do you live at Grinnell, Iowa?

A. At Grinnell, Iowa.

Q. And what is your occupation?

A. I am a partner in a tire distributor store, home appliances, and some hardware.

Q. Home appliances and some hardware?

A. Some hardware; that is right.

[fol. 887] Q. What is the name of your place of business?

A. McKey and Wee.

Q. That is a locally owned and operated store, is it not?

A. That is right.

Q. Now, what line of tires do you distribute?

A. Firestone.

Q. What line of appliances?

A. Mostly Firestone. We do have some other lines in there.

Q. Now, when you talk about appliances, do you mean refrigerators, deepfreezes?

A. That is right.

Q. Television sets?

A. No television.

Q. Radio?

A. Yes; and small traffic appliances such as toasters and ironers.

Q. You are outside the television range down there, aren't you?

A. No; very much in it.

Q. Where do you get television from down there?

A. Ames. Is that right, Bill? He sells them, I don't.

Q. What line of hardware do you handle?

A. It has a Firestone line, whatever is available to us.

Q. That is a general line that the average hardware store handles, is that right?

A. That is right.

Q. Nails?

[fol. 888] A. No.

Q. You don't handle nails, hammers?

A. That is right; hammers, tools, and so forth.

Q. Where do you get your shipments which have out-of-State origins?

A. Minneapolis. Some out of Louisville, Ky.

Q. I assume your tires are from distributing points in the State, are they not?

A. How is that?

Q. Do you have any out-of-State origin for your tires or are they all redistributed from within the State?

A. That is usually out of Des Moines.

Q. Your appliances and hardware are from those out-of-State points, is that right?

A. That is right.

Q. With what frequency do you get shipments in from these out-of-State points of Minneapolis and Louisville, Ky.?

A. I would say on the average of once a week.

Q. What transportation company has been bringing those shipments to Grinnell to your place of business?

A. We have specified the Rock Island Motor Transit Company and they have been bringing them.

Q. Why have you specified the Rock Island Motor Transit Company?

A. There would be only one reason, and that is service.

Q. What are the size of shipments which you ordinarily have?

[fol. 889] A. Oh, they would range from 200 pounds to 2,500.

Q. Do you have occasion to have shipments in excess of 5,000 pounds?

A. Very seldom.

Q. Now, you say you have specified the Rock Island Motor Transit Company because of the service. Do you know of any other carrier, motor carrier, that gives a daily service in and out of Grinnell for small shipments such as you have?

A. In interstate or intrastate?

Q. Interstate.

A. Not to my knowledge. I suppose there are some. Western, I think, comes through there. I don't know whether they gives daily service or not.

Q. I am asking if you know of any other carrier that gives a daily service.

A. I do not.

Q. What has been the character of the service the Rock Island Motor Transit Company has been giving you at Grinnell? Has it been satisfactory?

A. It has been very satisfactory and especially in handling claims.

Q. Have you had any unsatisfactory experience with other companies on claims?

A. I have.

Q. Has that been recently?

[fol. 890] A. Well, yes. Can I elaborate a little on that?

Q. Sure; go ahead.

A. We were getting our shipments out of the Firestone warehouse in Chicago, and that was handled by another carrier. The service was very unsatisfactory. At that time we were getting a lot of breakage and a lot of claims to be filed, and we had one that took us over 6 months to get handled and finally had to resort to the writing of a letter to our warehouse manager and cross-referencing it to the transportation company, stating that we would not accept any further shipments by this particular carrier.

Q. Is that carrier still operating through Grinnell?

A. He is.

Q. Now, what effect would it have upon your company's business if the Rock Island Motor Transit Company either terminated its operation in and out of Grinnell or materially curtailed their operation?

A. Well, I think that it would affect us in this way, that on emergency shipments out of Des Moines, naturally we don't carry everything in our store, and there are some things we do sell, we call in for, and the customer is willing to wait a day or so, and that service comes in very handy then.

Q. How about your shipments from Minneapolis, do you know of any carrier that would give you service, same type of service the Rock Island Motor Transit Company has been giving you?

[fol. 891] A. I don't know of any that would. We haven't been solicited with the exception of McCoy Freight Lines and that was just recently.

Q. Do you know whether McCoy Freight Line provides a daily service in and out of Grinnell?

A. They do not have a terminal there.

Q. Do you know of any other motor carrier that has a terminal and a local service other than the Rock Island Motor Transit in Grinnell?

A. There is Pasch Transfer there. I think he works for everybody.

Q. Now, you say that you have about one shipment a week come into Grinnell by the Rock Island Motor Transit Company from out-of-State points. What percentage would you say your merchandise that comes from out-of-State points is to your whole merchandise?

A. The total volume?

Q. Yes.

A. Oh, I would say about 45 percent of our total volume.

Q. Now, these shipments that you have come in, are they quantity shipments, where you get a collection of different items and have them brought in at one time from Minneapolis?

A. That all comes out of the same warehouse in one shipment.

Q. Of course, you are a licensed or franchise store, Firestone store dealer there?

[fol. 892] A. We are independent from the company.

Q. No, but I mean do you have a franchise?

A. We have a franchise; yes.

Q. You handle Firestone products?

A. That is right.

Q. Then when you get a shipment, I assume you get a volume shipment with many different articles from the Firestone warehouse in Minneapolis——

A. That's right.

Q. —is that correct? So that is the reason you have shipments about once a week instead of more frequently?

A. That is right.

Mr. Howland: I believe that is all. You may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, Mr. Wee, the McCoy Freight Line, Western Freight Line, Des Moines Transportation Company, and other carriers of that type do serve Grinnell, Iowa?

A. I don't believe McCoy does. Western I know does.

Q. The others do, do they, Mr. Wee?

A. I am not familiar with that. I do not know. The only reason I mentioned that was because their solicitor was in and stated that they were planning on opening a terminal there.

Q. Then you don't know——

[fol. 893] A. I don't know.

Q. —at the present time just what the service of these other carriers is?

A. That's right.

Q. You have used the Rock Island service, found it satisfactory, and haven't look around for any other service?

A. That is right.

Q. Now, the Rock Island Motor Transit pickup truck and delivery truck, does that bring you your rail freight as well as your motor transit freight?

A. It does.

Q. It is all handled by the same pickup truck?

A. By the same pickup truck.

Q. So no matter whether you bill it rail going on the Rock Island Railroad or bill it motor truck by Rock Island Motor Transit, it is all handled by the same pickup-and-delivery truck?

A. At our store, it is; yes.

Q. Now, with respect to claims, do you contact the freight agent there at Grinnell to make your claims?

A. That is right.

Q. And do you settle them right there with him?

A. No.

Q. What is your procedure now on claims?

A. The first thing is, he comes up and inspects the damage.

[fol. 894] Q. He inspects the damage for the railroad claims as well as the transit claims?

A. No; there are two of them.

Q. Two of them?

A. Two of them. There is a rail agent and a motor freight agent.

Q. A rail agent and a motor freight agent. You have a claim against the railroad, you talk to the rail agent?

A. That's right.

Q. And if you have a claim against the Rock Island Motor Transit Company, you talk to the other fellow, is that correct?

A. That's right; yes.

Q. Do you do some rail shipping?

A. We have some; yes.

Q. In other words, then, on certain traffic you choose to use rail service and on other traffic you use motor truck service?

A. Yes.

Q. But it is all picked up and delivered to you by the same——

A. Same truck.

Q. —same pickup-and-delivery truck?

A. The same. Would it be in line to mention something about a shipment over rail?

Q. Just a minute. You are supposed to answer questions.

A. Okay. All right.

Mr. Nolan: You will be given the opportunity.

Mr. Fowler: Yes; Mr. Nolan will give you a chance.

[fol. 895] That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Now, Mr. Wee, you say that you have had some shipments come in on rail billing by the Rock Island Railroad handled by the Rock Island Motor Transit Company?

A. Now, as incoming shipments, most of our stuff comes

by motor freight. It is outgoing shipments I was speaking of.

Q. Do you specify some shipments to go out by rail billing rather than motor transit billing?

A. Occasionally.

Q. You were going to say something in response to something Mr. Fowler asked you about. What did you have to say?

A. We shipped some tires by Rock Island Railroad from Grinnell to Kansas City on January 22. It was a pair of tractor tires to be retreaded by the Firestone retread shop in Kansas City. I haven't got them back yet. Ordinarily, the procedure is it takes about 3 weeks to 30 days for them to process them and get them back that distance.

We allowed 30 days and didn't think anything of it. Finally, the farmer got a little fire under the collar because he was figuring on getting in the field one of these days.

I contacted the agent at Grinnell and he sent out tracers and he finally reported to me three of them had got to Kansas City. One of them was still in Des Moines. Why, I don't know.

[fol. 896] So we assumed, well, they will be back in a week or so now. Nothing happened. I finally called the retread shop in Kansas City long distance and he said he still hadn't received them, and of course he did mention that they did have a truck strike down there. I told him the shipment was Rock Island Railroad. He didn't know whether that would affect it or not, but I suggested he take his pickup truck and go down to the freight depot and see if he couldn't find them.

He went down there and and wired me the next day he did have the tires, the three of them, but to date I haven't got them back yet.

Q. Now, let me ask you, why did you ship those by railroad rather than truck?

A. Well, I can't say that there was any particular reason outside of the fact that probably the rail services Kansas City and I didn't know whether the truck did or not. They are both pretty good fellows over there.

Q. Pass the business around, is that right? Now, what percentage of your freight would you say comes into your

store by Rock Island truck that is rail-billed freight as against motor-truck-billed freight?

A. Oh, I would say 90 percent of it comes motor truck.

Q. Motor truck-billed?

A. Yes.

Q. Have you ever been solicited by the motor truck [fol. 897] agent there of the Rock Island Motor Transit Company to do any shipping by rail billing?

A. Yes.

Q. What?

A. You say the railroad agent?

Q. No.

Exam. Carpenter: Read the question.

(Question read.)

A. No.

By Mr. Nolan:

Q. He wants the truck business?

A. Apparently he does.

Mr. Nolan: That is all.

Re-cross-examination.

By Mr. Fowler:

Q. The shipments you spoke of to Kansas City, Mr. Wee, in your investigation did you learn that that shipment did leave Grinnell by truck rather than by rail car?

A. I don't know how it left Grinnell.

Q. In other words, it could have——

A. I turned the shipment over to the——

Q. Rock Island Railroad?

A. Rock Island Railroad. What they do with it I don't know.

Q. You had some unsatisfactory experience with that shipment?

A. I certainly did.

Q. You didn't ascertain whether or not that was actually

handled on truck rather than rail car?

[fol. 898] A. No; I didn't.

Q. You don't know about that?

A. No; I don't know about that.

Q. You know the Rock Island Railroad has truck service to Kansas City, don't you?

A. No; I didn't know that.

Exam. Carpenter: Any redirect? You are excused.

(Witness excused.)

M. F. ZIMMERMAN was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. State your name, place of residence, and occupation, please.

A. M. F. Zimmerman, 1212 E Street, Grinnell, Iowa.

Q. What is your business?

A. Hardware, auto supplies, housewares, electrical, merchandise of that type.

Q. What is the name of your store at Grinnell?

A. Coast to Coast store.

Q. That is owned by you, as I understand it, but it is a franchise store?

A. That is right.

Q. You operate under the trade name of Coast to Coast and have your buying connections with the Coast to Coast national organization, is that correct?

[fol. 899] A. That is correct; yes, sir.

Q. You say you handle hardware and appliances and things of that character?

A. Yes, sir.

Q. Where is the warehouse or wholesale outlet for your supplies?

A. Minneapolis.

Q. Do you have shipments coming from any other points other than Minneapolis?

A. Oh, yes. I have some out of Chicago, some out of Omaha, some out of Des Moines, some out of Davenport.

Q. With what regularity do you get shipments from out-of-State points into your store?

A. It would run about at least three times a week.

Q. What percentage of your inbound shipments would you say your out-of-State shipments are?

A. Oh, the out-of-State would be at least 90 percent.

Q. Now, what are the size of the shipments from these out-of-State points which you have mentioned?

A. They will run from around 500 pounds to 1,200 or 1,400 pounds, along in there somewhere.

Q. What transportation agency has been handling those shipments and bringing those shipments from these out-of-State points to your place of business in Grinnell?

A. Rock Island Motor Transit in the last 5 years.

Q. Has that been at your request or by the shipper's request?

[fol. 900] A. It has been by demand. The shipper was sending it other ways, and it was getting so rough we had to change.

Q. You mean the demand was made by you to route it by Rock Island Motor Transit?

A. I demanded they route it.

Q. What experience have you had with other carriers bringing merchandise to your store at Grinnell from out-of-State points other than Rock Island Motor Transit?

A. Well, I haven't had much in the last 5 years. It has been intermittent, somebody makes a mistake and sends it out the wrong way, but actually I don't think I would be in business if I had to continue like I was before. Too much of the merchandise was broken and it was too slow. The price we sell merchandise for, we have to keep it moving. We can't carry a big stock so I have to keep it on the road and keep selling it.

Q. How is the service of the Rock Island Motor Transit Company since you have specified and directed that your merchandise come in on that line?

A. In that 5 years I don't think that we have had any trouble except a few claims.

Q. What you would normally expect?

A. Yes. Less than normal, because it has been few. I don't like to make claims, but when I do I like to have my money if they are just claims.

Q. How about the time in transit from these out-of-State [fol. 901] points by the Rock Island Motor Transit Company in comparison with the experience you had 5 years or more ago with other carriers?

A. Well, it would— Some of them were sent by rail and of course they would run up to almost 2 weeks on a direct line at that, and usually it runs 3 or 4 days—I believe I get overnight sometimes out of Minneapolis and other times it would be the following day.

Q. By the Rock Island Motor Transit?

A. By the Rock Island Motor Transit; that is right.

Q. Do you know of any other company that provides a daily service into Grinnell from these out-of-State points of Minneapolis, Chicago, and other points where you receive shipments other than Rock Island Motor Transit?

A. No; I couldn't say that I do. There was one delivered in there one time, but how many times it was handled I don't know. It was about 50 pounds, and it was $1.70, so it might be transferred a time or two. I don't know whether it was direct.

Q. What effect would the stopping of the service by the Rock Island Motor Transit Company or a substantial decrease in the character of the service of that company have upon your business?

A. Well, it would have a decided effect on the service and of course on the efficient operation because I think there is no other way. It is my belief there is no other way to get that merchandise rolling as it does on Rock Island Motor Transit.

[fol. 902] Q. As I understand it, your orders are relatively small; they are not volume shipments, is that right?

A. No; I keep them moving, that is correct.

Q. You attempt to operate upon as small an inventory as possible but still give your customers good service, is that correct?

A. That is correct.

Q. Do you have competitors in Grinnell and other adjoining communities?

A. I believe so. You have got several of them sitting in here.

Mr. Nolan: I think that is all. Thank you.

Mr. Fowler: No cross-examination.

Exam. Carpenter: You are excused.

(Witness excused.)

EARL MATHEWS was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. My name is Earl Mathews of the Mathews Drug at Grinnell, Iowa.

Q. And you are the proprietor, or one of the proprietors, of the Mathews Drug store at Grinnell?

A. I am the proprietor.

Q. How long have you been in business there, Mr. Mathews?

A. 25 years.

Q. Do you have any particular brand or line of drugs or [fol. 903] drugstore merchandise that you handle?

A. We are the Rexall drug store.

Q. Rexall dealer?

A. Yes.

Q. In Grinnell.

A. That is right.

Q. Now, from what territory do you have your Rexall drugs and drug products supplied to you?

A. That all comes out of Chicago.

Q. About how frequently do you have occasion to have shipments of Rexall merchandise sent to you?

A. Well, Rexall, at least once a week. Sometimes twice a week. This other Chicago——

Q. I take it that you handle in your store lines of merchandise other than that bearing the Rexall brand——

A. Yes.

Q. —or which you buy from the Rexall company?

A. Oh, yes; we do.

Q. Just what are those lines, generally? Are they drug lines or——

A. Well, Abbott Laboratories in Chicago, Parke-Davis, Eastman Kodak.

Q. Do you have occasion to get shipments from those concerns from Chicago?

A. Oh, yes. Of course, a lot of our drugs come out by [fol. 904] parcel post or express, but the larger shipments by Rock Island Motor Transit.

Q. Are there any other points outside the State of Iowa from which you get shipments other than Chicago?

A. Well, yes. We get a few shipments from New York in the way of toiletries.

Q. Now, about how often would you have occasion to get these shipments from out-of-State points other than the Rexall lines?

A. Not too often. Probably once every 2 weeks or 3 weeks.

Q. But there is a regular recurring shipment being made into your store at Grinnell from this out-of-State territory to the extent——

A. Yes.

Q. —you have described. Now, what carrier has been handling those shipments for you?

A. Rock Island Motor Transit.

Q. And that is true both of your Rexall shipments as well as your shipments from other places?

A. Yes.

Q. Mr. Mathews, what has been the character of the service that you have received from the Rock Island Motor Transit on your inbound shipments?

A. Well, it has been about perfect. They handle the merchandise very carefully and claims are adjusted very promptly.

Q. Have you had service by other carriers on some of [fol. 905] your inbound shipments in the last few years or months?

A. Oh, yes; some. You mentioned out-of-State. We do occasionally get a shipment by the Iowa-Nebraska Transportation Company from Lincoln.

A. We get metal tubing, steel tubing.

Q. In what quantity?

A. We will buy in quantities, in the 1-inch tubing, quan-
[fol. 920] tities of 10,000 to 20,000 feet. We have an order now at St. Louis for 20,000 feet.

Q. What will that be in weight, approximately?

A. Oh, I would say that would be approximately 15,000 pounds in the gauge we *guy*.

Q. That has been delivered to you recently by some truck that is supplied by the supplier?

A. The last truckload which we had in came on the suppliers own truck.

Q. Now, other shipments of less volume than that are handled by some other carrier and then interchanged up in this territory with a carrier that serves Grinnell?

A. That is right.

Q. Have you ever had any such shipments delivered to you by Iowa-Nebraska Transportation Company?

A. Yes; I think we have.

Q. How about Keeshin Motor Express Co., Inc.?

A. I am unable to answer that one.

Q. How about Des Moines Transportation Company, Inc.?

A. No; I don't think so unless they might be delivered to Pasch and Pasch delivers them to us and makes the collection. The thing I remember; who gets the check.

Q. As a matter of fact, Mr. Pasch runs a transfer company there, as I understand it.

A. That is right.

[fol. 921] Q. Cartage company?

A. Yes.

Q. And he does the cartage work for these carriers I have just mentioned?

A. Well, I assume that he does.

Q. Now, how about Western Transportation Company?

A. I am not acquainted with them.

Q. But your dealings with these other carriers has been largely through the Pasch cartage company, is that correct?

A. Pretty largely.

A. Yes. We pay the bill.

Q. Can you designate the routing?

A. Yes, sir.

Q. Can you tell the steel company by what truck line that is supposed to move?

A. We can.

Q. Do you now?

A. Occasionally.

Q. Do you specify American Transit?

A. No, sir.

Q. What company do you specify?

[fol. 926] A. I would specify Rock Island Motor Transit if they could handle it.

Q. They can't handle it now. I am talking about now. How are you getting it?

A. I would say on an order of that kind, ship best and quickest way.

Q. That is the situation now?

A. With our steel from—let's be specific—from Inland Steel, yes, sir.

Q. That is being handled by American Transit?

A. Some of it is and some by Rock Island Railroad.

Q. Now, let's talk about the truckloads in excess of 5,000 pounds, if you will, please.

A. All right.

Q. How is that being handled at the present time, by what carrier?

A. Let me answer it—I wouldn't attempt to go back through last year or the year before and tell you.

Q. I am not asking you to do that.

A. But the last shipment that came in by truck from Indiana Harbor came in by American Transit.

Q. When was that shipment received by you, approximately?

A. Oh, 2 weeks ago.

Q. When did you receive a shipment prior to that?

A. Well, I will answer you this way. Since the beginning [fol. 927] of 1952, we have had approximately 73 tons of steel of one kind or another out of Inland Steel Company mill to Kellogg.

Q. And that has been handled by this American Transit?

A. It has been handled by truck lines. The last particular shipment was American Transit, but I was away from the office at the time some of the others were coming in.

Mr. Fowler: That is all.
Exam. Carpenter: Any redirect?
Mr. Howland: Just a minute.

Redirect examination.

By Mr. Howland:

Q. Now, these shipments that have come in, these American Transit company shipments, do they move into your plant by American Transit company truck or by some other trucks?

A. Well, I can't answer you because those particular shipments are delivered to the Midwest at Kellogg and we have an arrangement with them to pay the freight bill and we in turn pay them the freight. It just so happens I have in mind paying a rather sizable freight bill last week.

Q. Do you know what the practice of the American Transit company is as to issuing billing and then having the transportation service actually performed by some livestock hauler who is in Chicago and who is empty and wants to get back to Iowa points?

Mr. Fowler: Just a minute. That is objected to as an improper question. It is immaterial. It is leading and suggestive.

[fol. 928] Mr. Howland: I think maybe it is just leading. I think maybe I had better withdraw it.

Mr. Fowler: I think so. Furthermore, the witness just said he didn't know.

By Mr. Howland:

Q. Are you familiar with the practice followed by the American Transit company?

A. No, sir.

Q. Does the Iowa-Nebraska Transportation Company render a regular service on shipments moving into Grinnell from the east or is that from——

A. I don't know.

Q. You don't know as to that?

A. I don't know.

Q. Does the Rock Island Motor Transit Company maintain a pickup-and-delivery service and their own terminal agent in Grinnell?

A. Yes, sir.

Q. And that, I take it, is an advantage in connection with the handling, of tracing of shipments or adjustments and matters of that sort?

A. Very much so; yes, sir.

Q. Any other motor freight company that has its own terminal agent in Grinnell?

A. Well, yes. This Jack Pasch distributes for other companies.

Q. He is the local transfer and drayman?

A. That is right.

Q. And he distributes for a number of companies?

A. I think so; yes.

Q. I would like to ask you some questions about the town [fol. 906] of Grinnell. First, about the population of the town; about what is the population?

A. About 7,000 by the last census.

Q. And U. S. highway No. 6 goes through the city of Grinnell just about 2½ blocks north of the business center of the town?

A. That is right.

Q. What do you have at Grinnell in the way of manufacturing or industries?

A. Well, we have the Ahrens Manufacturing Company over here, and the glove factory, shoe factory, and of course the Cargill and DeKalb.

Q. One is the seed corn——

A. Yes.

Q. —and the other is the feed?

A. And the Donaldson Corporation just came in.

Q. What is their line?

A. They are going to manufacture air filters, and so forth. The parent company is in St. Paul or Minneapolis.

Q. And of course your largest enterprise in Grinnell is the college?

A. I would presume so, the largest payroll.

Q. Ouside of the concerns you have mentioned and the college, the establishments that are in business there are the usual retail outlets and service trades serving a farm community of that size?

[fol. 907] A. That is right.

Q. Now, Mr. Mathews, in your judgment would the elimination or substantial reduction in the service presently afforded to Grinnell by the Rock Island Motor Transit Company have any effect on your business or on the community?

A. Well, it certainly would have an effect on our business, I think, because of our quick service. In other words, we are in the drug business and we are in a hurry for our merchandise. Can I elaborate on that a little?

Q. Yes; go ahead.

A. I have been out to the Rexall warehouse in Chicago. They pick up there in the late afternoon and we have it in our store the next morning. We can mail an order at Sunday noon, they get the order Monday morning, and we have the merchandise—this doesn't always happen—we can have the merchandise Tuesday morning just like express only a lot cheaper.

Q. You couldn't get any better service than that by express shipments?

A. Oh, no.

Q. Of course, I take it that there are occasions when you get a second-morning delivery?

A. Oh, yes.

Q. Or something of that sort, but generally speaking your service has been prompt and satisfactory?

A. Very.

[fol. 908] Q. Do you feel that as far as your business is concerned that there is a necessity for a continuation of the Rock Island Motor Transit Company service to Grinnell?

A. Very much so.

Q. Now, you don't, I take it, have occasion to make shipments over 5,000 pounds in weight?

A. Yes. We got in a shipment 2 or 3 weeks ago of about 7,000 pounds.

Q. 7,000 pounds?

A. Yes.

Q. That would be the exception, I suppose, rather than a rule?

A. Oh, yes. That is twice a year, I would say. It was our 1-cent sale.

Q. That is in connection with your 1-cent sale shipment?

A. That is right.

Mr. Howland: I think that is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. How did you handle this 7,000-pound shipment?

A. Well, that came in almost a solid truckload.

Q. By what company?

A. Rock Island Motor Transit.

Q. Did they break it down into two billings or did they handle the 7,000 pounds for you all in one shipment?

[fol. 999] A. No; one shipment.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. Just a minute, Mr. Mathews. Was it all on one bill or do you recall whether there was more than one freight bill on that shipment?

A. Well, I am not exactly sure on the weight. I think it was around 7,000 pounds, around 270 cartons. It was all on one freight bill, however.

Q. And that was handled as a Rock Island Motor Transit shipment?

A. Yes.

Mr. Howland: All right. Thank you.

(Witness excused.)

LOUIS V. PHELPS was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. Louis V. Phelps.

Q. You live in Grinnell, Iowa, Mr. Phelps?

A. Yes, sir.

Q. What is your business?

A. At the present time, I am the general manager for the Ahrens Manufacturing Company, playground equipment.

Q. The Ahrens Manufacturing Company has a plant at [fol. 910] Grinnell, Iowa, and manufactures and distributes a line of playground equipment, as I understand it?

A. That is right.

Q. Just what are the activities of the Ahrens Manufacturing Company; that is, is it a matter of assembling or do you manufacture your equipment?

A. Well, here is the way we operate at the present time. In Grinnell we assemble the steel and bearings and the various parts, tubing, for the making— Our endeavors are centered largely on what we call a Miracle Whirl, which is a tilted type of whirl, all steel, and we buy our steel in large quantities and sell it out in smaller units, if you know what I mean.

We will buy steel by the carload and our shipments go out—the small whirl weighs 260 pounds and the large one, depending on the type, from 650 to 850 pounds.

Q. On your inbound shipments of materials, do those customarily come in in carload quantities?

A. The floor plate that we use for the platform and the tubing come in either in carload quantities or on big trucks, on the semitrailers.

Q. From what points do you get those shipments?

A. We buy our plates from Inland Steel at Gary or Indiana Harbor, for the most part, and our bearings come out of Chicago for the most part. Our tubing for the hand rail oh, some of it originates at Clinton, Iowa, but most of it at St. Louis, Mo.

[fol. 911] Q. By what carriers have you been shipping your inbound materials into Grinnell?

A. I should elaborate a little on our plan of operation. The Midwest Stamping Company at Kellogg does—we furnish them dies and they do our stamping and cutting and forming at Kellogg, so that the floor plate, the platform material, comes in either by rail or by truck line, depending on the size of the shipment. We like to get them in carload lots, but sometimes, due to the present Government rationing, we can't ship enough at one time for a carload so it will come out by the bigger trucks.

The tubing will come in in shipments of 8 to 10 thousand pounds and that is usually, practically always, by truck.

Q. Your outbound shipments are made in about what quantity or weight?

A. That will depend entirely on the order. We sell to parks, school boards, drive-in theaters and we have some few dealers over the country. The bulk of our shipments will go out in one or two whirls at a time and the weight on those shipments will be, on a small size, 260 pounds and on the large size 850 pounds.

Q. Do you on occasion make shipments to dealers where you have a number of units shipped at one time?

A. We have just gone through an experience with a dealer in Cleveland, Ohio, in which we had great difficulty in getting anyone out of Grinnell or the vicinity to handle it. The shipment was 50 whirls, and the weight of that [fol. 912] would be in the neighborhood of 16 or 17 tons.

We could find no one, no trucking agent or trucking concern, in Grinnell that could handle that shipment satisfactorily for us. It had to go out on the C. O. D. basis, and we finally, by telephoning, got another concern, an out-of-town concern, to come in and pick it up and take it and deliver it, but we had almost as much trouble collecting the C. O. D. as we had in making the original sale.

Q. Had you tendered that shipment, or would you have tendered that shipment but for the 5,000-pound restriction to the Rock Island Motor Transit?

A. We tried to get Rock Island Motor Transit to take the shipment, but they couldn't under the existing rules

and regulations. They explained to us they couldn't take it.

Q. Was the carrier that handled it one of the carriers that operates through Grinnell on highway 6?

A. I am not sure that they operate on highway 6. It was the Keeshin Motor company of Marshalltown and Chicago.

Q. Keeshin Motor Express?

A. Yes. The nearest office, I believe, was Marshalltown.

Q. Now, with respect to shipments inbound, particularly this tubing and matters of that sort, that is shipped in less-than-truckload quantities, I take it?

A. Yes, sir. Less than semitrailers.

Q. Yes. Are those shipments made to Kellogg?

[fol. 913] A. No. Those shipments come direct to Grinnell and usually out of St. Louis, and we have had considerable difficulty in getting prompt service through the truck lines that operate out of St. Louis to our vicinity. For instance, we have had shipments lay on the docks here in Des Moines 10 days. They don't seem to make the correct connection. They don't have the——

Q. In other words, there have been delays on shipments from St. Louis to Grinnell?

A. That is right.

Q. And on those shipments, do those usually run in the neighborhood of 5,000 pounds or——

A. Well, I will give you an illustration. I spent the first half hour this morning trying to get a small shipment out of St. Louis, a shipment that will weigh at least a thousand pounds. We need it right now. It is heavy tubing for the center post, and I don't know how it will be shipped.

Ordinarily, they give the shipment down there to the Robertson Trucking Company and what their connections are I don't know. Something like that will probably be delivered by this Jack Pasch that Mr. Mathews mentioned a while ago.

Q. You are not familiar with the exact routing that might be followed?

A. No, sir; I am not, but I know it is not satisfactory.

Q. Now, the Rock Island Motor Transit Company has a full-time agent in Grinnell and maintains pickup-and-

[fol. 914] delivery service with its own truck or trucks there?

A. They handle practically 90 percent of our outbound shipments in small lots, and we call them usually between 8 and 9 o'clock in the morning to get our rates. A lot of our stuff has to be shipped prepaid and we have to know the rate before we make the bill of lading, and by 3:30 or 4 o'clock every afternoon they will be right on the job to pick that shipment up and they give us excellent delivery. They handle the shipments well, and they give us prompt delivery to—they arrange to give us prompt delivery to every State in the Uniion. We sell all over the United States.

Q. Is there any other carrier that you know of that serves Grinnell that renders a service that is equal to that performed by the Rock Island Motor Transit Company?

A. No; I don't think so, because they don't maintain—this may be the reason, that I don't know about—there is no office there you can contact and I wouldn't know if I was to send out a shipment tomorrow, but, just for instance, the Iowa-Nebraska line, I wouldn't know where to contact them, how to get in touch with them.

Q. Does Pasch handle Iowa-Nebraska shipments?

A. Well, I don't know for sure. I rather think that he does, but I do know we occasionally pay a freight bill to Iowa-Nebraska direct. That is, they will render the bill to us and we will mail them a check.

[fol. 915] Q. So there doesn't seem to be any particular established practice?

A. No; and one trouble with Pasch's delivery—and I don't say this to criticize Jack because he is a damned hard working man, but in order to make his routes he has to be out so much. Half the time when you call his office you can't get anyone to answer.

Q. Now, what would you say as to whether the elimination or substantial reduction in the quantity of the Rock Island Motor Transit service to interstate points, either inbound or outbound or both, would have any effect on the business of your company?

A. It certainly would because, as I have said before, in my testimony here, 90 percent of our shipments are going

out and have since I have been with this company, which is 3 years now, 1949, 1950, and 1951, 90 percent of our shipments will go, originate, we will give them to the Rock Island Motor Transit and ask them to route them out for us, and rather than see the service eliminated we would very much like to see the service extended so that we could make our bigger shipments by Rock Island Motor Transit.

At the present time we are told they can't accept a shipment of over 5,000 pounds, and occasionally we do want to make—for instance, right now we have a shipment to go to Springfield, Mass., and I haven't any idea what [fol. 916] trucking company we can give that to that would give us the kind of service that Rock Island Motor Transit gives on the smaller shipments.

Q. And if the Rock Island Motor Transit Company were eligible and in a position to handle it, you would ask that company to handle it?

A. That is certainly right.

Q. Some of your shipments, of course, I take it, would move in truckload quantities of 20,000 pounds?

A. That is right. We have a dealer in Phoenix, Ariz., and he takes a truckload every spring and I tell you we have a real battle on our hands to get a trucker who will accept that shipment. If the Rock Island Motor Transit were eligible to take it, they could cross these State lines and do a good job for us, but so many of the—I call them stock truckers, that is primarily what they are in Grinnell. They do a good job in their line, but to send them as far as Arizona or to the east coast, they either have to make special arrangements with the chartering agencies and their insurance companies, or refuse the shipments.

Mr. Howland: I think you may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, on your volume shipments of steel and that type of material that moves out of the Chicago area to Grinnell, that is being presently handled either by rail car or by truckload?

[fol. 917] A. That is right, sir.

Q. And what common carriers by motor vehicle are handling your steel by truckload?

A. What common carriers?

Q. Yes.

A. Is there an American truck line?

Q. American Transit.

A. American Transit, I think they handled the last shipment into Kellogg for us.

Q. But the steel that moves out of Chicago to you does not move over the Rock Island Railroad subsidiary?

A. By subsidiary, you mean the Rock Island Motor Transit Company?

Q. Yes.

A. No, sir.

Q. They don't handle your steel?

A. They couldn't handle it at the present time with their limitation as to load.

Q. The fact is, you are getting service on steel now either by truck or rail, whichever you prefer?

A. Yes, but the Christmas holiday week we had a shipment of something like 30 tons of this steel plate that was held up for 4 or 5 days for lack of trucking facilities out of that area.

By Mr. Howland:

Q. That is out of Chicago?

A. Out of Chicago, Gary or Indiana Harbor. I think it is Indiana Harbor.

[fol. 918] By Mr. Fowler:

Q. On your St. Louis shipments, is that handled by Rock Island Motor Transit all the way from St. Louis to Grinnell?

A. No, sir.

Q. In other words——

A. The shipments at St. Louis usually are over 5,000 pounds.

Q. And they are handled from St. Louis to some point

of interchange with a carrier up in this part of the country, is that the way it is handled?

A. Yes, sir.

Q. Does the Rock Island Motor Transit actually deliver them to you? A. I'm sorry, I can't answer. I don't believe that they do. Occasionally, this company we buy from in St. Louis will use their own truck. The last shipment of 1-inch tubing, it came via their own truck.

Q. Isn't that pretty generally true where you are getting into volume shipments, that they either come by some truckline other than the Rock Island Motor Transit or they come by privately owned trucks of the contract carrier?

A. I don't know that I can answer the question. In our own business, the bulk of the inbound shipments come by either the truck that the company owns or by Rock Island Motor Transit if they are small enough for them to handle. For instance, our bolt orders that come from the east or out of Rock Falls, Ill.

[fol. 919] Q. Let's see if I understand you. I am talking now about volume steel shipments from the Chicago steel district to Grinnell. In some instances those are purchased by you in rail car lots and come by rail car?

A. In some instances.

Q. In other instances they are purchased in truckload volume. They are brought to you by the American Transit Line or some similar carrier?

A. Right.

Q. The Rock Island Railroad nor the Rock Island Motor Transit Company is not handling those for you at the present time?

A. Your statement is not quite correct. Let me answer it this way. The Rock Island Railroad will handle carload shipments. The Rock Island Motor Transit Company, usually the shipments are too large for it to handle.

Q. They are not handling them at the present time?

A. The Rock Island Railroad is; yes.

Q. But the Rock Island Motor Transit is not?

A. That is right.

Q. All right. We have got that straightened out. Now, let's talk about St. Louis. What is it that you get out of St. Louis, Mo.?

Q. Now, on your outbound shipments, as I understand it, you manufacture different playground——

A. Devices.

Q. ——devices you have told us about, and customarily they are sold in smaller lots?

A. That is right, sir.

Q. But occasionally you do have a call for a truckload service to some dealer?

A. That is right.

Q. And the last time you had an occasion for such service, the Rock Island Railroad wouldn't take it or the Rock Island Motor Transit wouldn't take it?

A. I don't believe we offered it to the Rock Island Railroad because it isn't economical— If the Rock Island Railroad handled it, the entire shipment would have to be [fol. 922] bundled or crated. If a motor company handles it, we can bundle these platforms that have to go and we can bundle them one unit at a time or one unit in a bundle and that is handled much more readily than a railroad company in less-than-carload lots.

Q. Now, let me explore that with you a little. The reason in this instance you prefer to use motor common carrier service instead of rail service was for the reason that the rail requirements with respect to loading or packaging are different than those of the motor carrier?

A. That is one reason.

Q. And that is a disadvantage to you as a shipper?

A. Yes, sir.

Q. And it is more expensive?

A. That is right.

Q. So this particular shipment you decided you wanted to move by motor common carrier?

A. Yes, sir.

Q. And you contacted the Rock Island Motor Transit and they told you because of the volume restriction they could not handle it?

A. That is right.

Q. And you then finally, through contacting Keeshin Motor Express Co., Inc., they handled that shipment for you?

A. That is right. That is the shipment that went to Cleveland, Ohio.

[fol. 923] Q. Yes; I understand. Now, had it not been for the weight restriction that has been imposed on the Rock Island Motor Transit, this particular shipment you spoke of could have been billed on rail billing to the Rock Island Railroad but nevertheless handled by truck, couldn't it?

A. I am unable to answer.

Q. Well, let me ask you this question. At the present time the Rock Island Railroad can accept a rail-billed shipment in excess of 5,000 pounds and handle it on rail billing with the actual physical transportation being performed by the motor trucks; were you aware of that?

A. No.

Q. You understand there is no limitation on the volume of freight you can tender to the Rock Island Railroad?

A. That is my understanding.

Q. And you also understand that the Rock Island Railroad can handle any size shipment through its subsidiary, the Rock Island Motor Transit Company by truck——

A. I didn't understand that.

Q. —if it moves at rail billing. You did not know that?

A. I did not understand that.

Mr. Fowler: I believe that is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. Mr. Phelps, as far as these shipments from St. Louis [fol. 924] of tubing material in lots of 10 to 15 thousand pounds weight, if the Rock Island Motor Transit Company could handle that with interline service either from Davenport or from Des Moines, would you be inclined to give that business to the Rock Island Motor Transit Company?

A. On the basis of our experience to date, I certainly would.

Q. Now, on your shipments of steel, if the Rock Island Motor Transit Company were in a position to handle truck-

load volume shipments for you from the Chicago area, either to Grinnell or to Kellogg, would you give that business to the Rock Island Motor Transit Company?

A. We would.

Q. I take it, Mr. Phelps, you aren't informed as to just what the authority of the Rock Island Motor Transit Company would be as far as transporting shipments on rail billing, as to what points they might or might not be able to serve?

A. Apparently I am not.

Q. You never have checked into that in any great detail?

A. No, sir.

Q. If it were a fact that by virtue of the so-called key-points between which railroad shipments couldn't be handled on trucks such as moving through both Des Moines and Omaha, that would affect the service that might be available to you?

Mr. Fowler: That is objected to as immaterial, calling for conjecture.

[fol. 925] Mr. Howland: Withdraw the question.

Exam. Carpenter: By the prior answer, the witness indicates he knows nothing about it.

Mr. Howland: Withdraw the question. I think that is all.

Re-cross-examination.

By Mr. Fowler:

Q. On your quantity steel shipments, you don't control the transportation agency, do you?

Mr. Howland: You mean the routing.

A. On outbound shipments?

By Mr. Fowler:

Q. No; on inbound.

A. I was thinking of outbound from the mill.

Q. I am talking about your inbound shipments.

A. Yes; we can.

Q. Can you designate the routing?

Mr. Howland: All right, that is all.
Mr. Fowler: That is all.
Exam. Carpenter: You are excused.

(Witness excused.)

BILL RITTER was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?
A. Bill Ritter.
Q. And you are engaged in business at what point?
A. Grinnell, Iowa.
Q. You make your home there, I take it?
A. That's right.
Q. What is the type of business in which you are engaged?
A. Hardware, appliances, plumbing, and heating.
Q. And what is the name and style under which you are doing business?
A. Ritter's Hardware.
[fol. 929] Q. Now, in what general territory do you secure the merchandise that you sell at your store?
A. Well, there are so many lines there. I have got Chicago shipments. I have Louisville, Ky., shipments. St. Louis shipments. Omaha shipments. Milwaukee, Davenport, and Des Moines.
Q. And you get merchandise in varying amounts inbound from those points to your store?
A. That's right.
Q. What carrier has transported those shipments for you from those origin points or what carriers brought them into Grinnell?
A. I have just about tried them all.
Q. What has been your experience with such shipments with respect to the service of the carriers?
A. Well, I have definitely gone strictly to Rock Island for several reasons. I have had Watson. I have had Nebraska, McCoy, and my experience with some of these

companies who don't have their local agent, a man handling that freight the second or third time—I have had a lot of claims and some of those claims have been turned over to the Interstate Commerce Commission and they have run for as long as a year.

One in particular was from Kohler, Wis., which was a complete bathroom which was broken and that ran for about a year and 3 months. Finally, I did turn it over to the Iowa Retail Hardware Association and I did get action on it, but it ran for well over a year.

[fol. 930] Q. Well, is there any other carrier that serves Grinnell that maintains a full-time terminal agent and their own pickup-and-delivery service?

A. Not to my knowledge; no.

Q. And that is true, is it not, in the case of the Rock Island Motor Transit?

A. That's right. I have found them—If I am busy, they will even check the number of packages and lay it on my desk and come back later and pick up the check or money for the freight, and some of these others, I have even helped the Iowa-Nebraska unload our freight because there is only one driver.

Q. That was delivered direct to your place by the over-the-road unit?

A. That is right.

Q. Mr. Ritter, in the event that the present Rock Island Motor Transit Company service should be eliminated or drastically curtailed or substantially curtailed, would that affect your business in any way?

A. It would from the standpoint I think I would put on my own truck.

Q. Well, do you think that would increase the expense of doing business?

A. Yes; absolutely.

Q. Why do you say you think you would put on your own truck service?

[fol. 931] A. Well, I was contacted about a week ago from a truck line and I tried a shipment which was ordered last Monday out of Des Moines. As a rule, with Rock Island, I will have that, as a rule, not later than Wednesday, and I got the order Friday and it was handled at Des

Moines, it was handled again at Grinnell, and then of course Mr. Pasch brought it to me, and it did get in there Friday and I had the damned breakage again.

Q. Had what?

A. Breakage again. That extra handling.

Q. In other words, has it been your experience that whenever there is extra handling that the probability of loss and damage claims is more?

A. That is right.

Q. More likely to be present. What company handled that shipment?

A. That was Van Wyck.

Q. Now, are you interested in shipments of more than 5,000 pounds in weight?

A. Oh, most of that would be interstate.

Q. Well, I say, are you interested in that?

A. Oh, yes.

Q. Do you have shipments——

A. Oh, yes.

Q. ——upon occasion of more than 5,000 pounds?

A. Yes.

[fol. 932] Q. And in the event that the Rock Island Motor Transit Company were eligible to handle that shipment, would any of that business be routed by Rock Island Motor Transit?

A. It would.

Q. And between what particular points would that——

A. I would say out of Davenport, possibly Council Bluffs.

Q. Outside the State.

A. And outside of Des Moines here, too.

Q. I misunderstood you. You said those shipments are mostly intrastate; that is, within the State?

A. I have them both ways, in and out.

Q. Inside the State and outside the State?

A. That's right; yes.

Q. Referring particularly now to your out-of-State shipments, shipments coming from points outside the State to Grinnell, would you, in the event the Rock Island Motor Transit Company was able to handle those shipments, give them the business?

A. Absolutely.

Q. All right. Do you know of any other truck service at Grinnell that is comparable with the Rock Island Motor Transit service both in time in transit and in the other respects that you have referred to?

A. No.

Mr. Howland: You may cross-examine.

Cross-examination.

[fol. 933] By Mr. Fowler:

Q. As I understand it, you run a retail hardware store in Grinnell?

A. That is right, sir.

Q. From what point outside the State would you have occasion to receive shipments in excess of 2,000 pounds?

A. Oh, it would be Northwestern Barbed Wire at Sterling and Central States Steel at Council Bluffs.

Q. I said outside the State, Mr. Ritter.

A. Well, it would be Kohler, Wis.

Q. How long has it been since you have had a shipment?

A. I got in one last week.

Q. How much did it weigh?

A. Well, sir, I don't know offhand. I never checked the freight bill. I have a bookkeeper that looks after that.

Q. Approximately what?

A. I would say 1,500 or 2,000.

Q. And the Rock Island Motor Transit handled it?

A. They delivered it; yes.

Q. How long has it been since you have had a shipment in excess of 3,000 pounds from a point outside the State?

A. I would say nothing this year.

Q. Haven't had anything for the last 6 months?

A. No.

Q. Haven't had anything for the last year?

A. Not to exceed 3,000.

[fol. 934] Q. Now, the shipments you spoke about that Van Wyck handled for you at Grinnell, was that an interstate shipment? Was that one originated outside the State?

A. No; that originated here at Des Moines.

Q. That was an intrastate shipment you are talking about?

A. That's right.

Q. Now, you apparently have a preference for the Rock Island Motor Transit.

A. I do for the service rendered.

Q. I understand. Now, how long has it been since you used the service of these several other carriers that serve Grinnell?

A. I have had Keeshin.

Q. Does Keeshin serve Grinnell?

A. Better than he did.

Q. You notice some improvement in their service?

A. In filing of claims, yes.

Q. Does Des Moines Transportation serve Grinnell?

A. I don't know, sir. I haven't had anything from them this year.

Q. Do you use them? Does Watson serve Grinnell?

A. I just think on drop shipment. Door to door. I don't believe he has a terminal there.

Q. Doesn't he use the Pasch cartage service, Watson?

A. I don't know.

Q. How about Western Freight Lines?

[fol. 935] A. I can't answer that.

Q. Well, as I understand your testimony, you are satisfied with the Rock Island Motor Transit.

A. I am, sir.

Q. And your shipments almost entirely consist of smaller shipments, less than 2,000 pounds, outside the State?

A. I would say that is right.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Mr. Howland: Nothing further. That is all, thank you.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: We will recess until 1:45.

(At 12:10 p. m., a recess was taken until 1:45 p. m. of the same day.)

AFTERNOON SESSION

1:45 p. m.

Exam. Carpenter: We will proceed.

CARL W. REED was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, address, and occupation, please?

[fol. 936] A. My name is Carl W. Reed. My home address is Cresco, Iowa, but temporarily I am living here in Des Moines while a member of the Iowa State Commerce Commission. We rotate the chairmanship and this year I am chairman of the commission.

Q. How long have you been an elected member of the Iowa State Commerce Commission?

A. Since January 2, 1941.

Q. Prior to that time, of course, your home had been at Cresco, Iowa, and you practiced law at that point, as I recall, and also served on the district bench in northeastern Iowa?

A. That is correct. I was admitted to practice in 1896, Mr. Howland, so I am old enough to vote.

Q. Judge Reed, are you familiar with the application of the Rock Island Motor Transit Company for a certificate of convenience and necessity to operate as a motor carrier on what we commonly refer to as the White Line and Fredrickson routes in the State of Iowa?

A. Yes; I am.

Q. I believe you testified in the hearing that was held in the latter part of September 1951 at which time the application was restricted to a maximum limitation of 5,000 pounds; that is true, is it not?

A. That is correct; yes, sir.

Q. Just for the record here, will you state the position of the Iowa State Commerce Commission generally with re-
[fol. 937] spect to this application and why you are here and your position with respect to the matter?

Mr. Fowler: Just a moment. May I inquire?

Exam. Carpenter: You may.

By Mr. Fowler:

Q. Are you appearing here as a representative of the Iowa State Commerce Commission?

A. Yes, sir; I am.

Q. And are you appearing here pursuant to some formal authority of the Iowa commission?

A. Well, that depends, Mr. Fowler, on what you call formal. We had a session this morning and I was directed to appear here in support of the application.

Q. That was a session this morning of your commission?

A. That is correct.

Mr. Fowler: All right.

Exam. Carpenter: Proceed. Read the question, or do you recall it?

(Question read.)

A. Well, as I said in response to Mr. Fowler, we had a meeting of the commission this morning and I was directed to appear here in support of the application. Our position in the former hearing was based upon our knowledge of the service that the different truck lines were giving or were not giving and the request from the shippers in various communities asking us to take part in supporting the application.

[fol. 938] I believe Mr. Long, another member of the commission, stated at the beginning of this hearing that the position of the commission had not changed and because of that he felt that he should not sit on this joint board as a joint board so that the matter could go to an examiner as an examiner's case.

Mr. Fowler: For the protection of the record, I move to strike the statement of the witness wherein he is at-

tempting to relate what has been given to him by way of hearsay for the reason that it isn't competent evidence and is hearsay.

Exam. Carpenter: The motion is overruled. Proceed.

By Mr. Howland:

Q. Judge Reed, as a member of the Iowa State Commerce Commission, you are familiar with the general trends in the motor carrier industry with respect to service and with respect to the operation of motor carriers generally, is that true?

A. I think so.

Q. What has been the general trend in recent months and particularly in the last 18 months to 2 years with respect to the service rendered by motor carriers to intermediate points between the larger centers of population in the State, both interstate and intrastate?

Mr. Fowler: That is objected to as immaterial, incompetent.

Exam. Carpenter: The objection is overruled.

A. The experience of our commission, based upon the information that came to us from the shippers and also [fol. 939] from the carriers themselves, has been that the carriers were not interested in the local service.

Mr. Fowler: I move to strike the answer of the witness on the ground that it is hearsay.

Exam. Carpenter: The motion is overruled.

By Mr. Howland:

Q. What have you observed with respect to the position and the ability of motor carriers generally to render service on smaller shipments to intermediate points between the larger centers of population, say points between Iowa City and Des Moines or Iowa City and Newton, Iowa, territories of that kind?

Mr. Fowler: That is objected to on the ground that it is immaterial, calls for an incompetent conclusion and opinion of the witness.

Exam. Carpenter: The motion is overruled.

A. I couldn't say as to what the ability of the carriers was. I only know what the actual service that they are rendering or are not rendering is.

By Mr. Howland:

Q. And what has been the trend with respect to that phase of the matter, Judge?

Mr. Fowler: Same objection.
Exam. Carpenter: Same ruling.

A. The trend in this State in the matters that we have contact with has been that the carriers generally are getting away from the local service and the smaller shipments.

[fol. 940] By Mr. Howland:

Q. In recent months, has the Iowa commission had motor carrier matters before it, both in instances where there have been applications for authority and in instances in which carriers already possessing authority have proposed to curtail the quantity of the service they are performing to the intermediate points?

Mr. Fowler: That is objected to as immaterial and for the reason that if it involves matters pertaining to intrastate operators it is particularly immaterial to this record.
Exam. Carpenter: Objection overruled.
The Witness: Will you read that question, please?

(Question read.)

A. Yes; we have had some matters of that kind and in some instances we have approved the leasing of some of the local service performed by carriers that had service between key points and along the entire line.

By Mr. Howland:

Q. Have you also had some instances in which the question of rates on shipments of less than 1,500 pounds had been—increases above the general level have been sought for such shipments?

Mr. Fowler: Well, just a minute.

Mr. Howland: If there is an objection, I will withdraw that question in that form.

Exam. Carpenter: Was there an objection?

Mr. Fowler: Yes, sir.

[fol. 941] By Mr. Howland:

Q. Judge Reed, I just want to be certain that I fully understand the position that the Iowa commission has taken. What is the commission primarily interested in here with respect to this particular application? In other words, are you particularly supporting the application because it is made by the Rock Island Motor Transit Company or have there been other factors that have motivated you and the other members of the commission in the position which you have taken?

Mr. Fowler: That is objected to as immaterial and hearsay.

Exam. Carpenter: The objection is overruled.

A. The position of the commission has been that it doesn't take any position for or against any particular carrier. In this particular instance, our interest has been to see that service was performed to the various communities.

By Mr. Howland:

Q. And as far as you are advised, do you know of any carrier that is in a position to or is ready, willing, and able to perform the service which has been performed by the applicant along the routes between Davenport and Council Bluffs, Iowa, or Omaha, Nebr., which are covered by this application?

Mr. Fowler: That is objected to as hearsay.

Exam. Carpenter: Objection overruled.

A. Of course, I don't know offhand just what authority every carrier has, but I do not recall of any carrier that has been performing this service that the Rock Island Motor [fol. 942] Transit Company has been performing.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Mr. Fowler:

Cross-examination.

By Mr. Fowler:

Q. You stated, Judge Reed, that your interest in this application was to see that service of adequate character was available to these small towns by motor carrier.

A. That is correct.

Q. And it is no concern of yours whether that service is performed by the Rock Island Motor Transit or any other independent motor carrier that may hold interstate authority over this route?

A. No. We do not take any position in supporting one carrier in preference to another.

Q. It is your opinion then that, based upon the reports which apparently have been made to you, that the service to these smaller towns is not presently adequate except for the service of the Rock Island Railroad?

A. I think that is correct, sir.

Q. Now, you don't pretend to have any knowledge as to the carriers that do have authority to operate over this highway?

A. I don't have that offhand.

Q. Or the service which they are actually performing?

A. No.

Q. Or the service which they are willing to perform if the [fol. 943] traffic demands it?

A. Well, the only thing—

Q. Insofar as this application is concerned.

A. We have known of their declining to perform some of that service in the past.

Q. In what respect?

A. In refusing to accept small shipments and refusing to accept shipments to some of the smaller communities.

Q. All right, now, with respect to such towns as Davenport, Moline and Rock Island, Des Moines and Iowa City and Newton and Omaha and towns of that sort, you don't have any opinion that the motor carrier service to those points is not presently adequate, do you?

A. No; I don't think——

Q. In other words, as far as you know, the service to those communities of the larger size has been adequate?

A. We have had no complaints as to the larger size community.

Q. So what you are talking about is that complaints have been made to you as a representative of the shipper with respect to these small towns?

A. That is correct, and of course the small town is a pretty broad term, Mr. Fowler.

Q. That is right, but I think in view of my last question you understand what we are talking about. There has been some testimony here, an abundance of it, to the effect that [fol. 944] in these smaller communities like Walcott, Iowa, Stockton, Iowa, Durant, Iowa, Oxford, Iowa, others of that same character, Victor, for example, that the Rock Island Motor Transit Company is the only carrier that is giving them any regular service into those communities.

A. That is the only carrier that I think of at this time, Mr. Fowler; yes, sir.

Q. It is with respect to that type of service that you have an interest?

A. Yes; and I presume we will say Grinnell or Newton or some place like that wouldn't want to be classed as a small town. We have had complaints as to the service to and from those places to other smaller places.

Q. In other words, are you talking about intrastate or interstate?

A. That is intrastate.

Q. Yes. Of course, you understand that is not involved in this application.

A. I think that is correct.

Q. So with respect now to interstate, the reports which have been made to you have reference, generally speaking, to the smaller communities such as I have named?

A. I think so generally.

Q. Now, you are aware, I assume, Judge Reed, that the Rock Island Motor Transit now holds permanent authority [fol. 945] to transport all types of freight——

A. That is my understand--.

Q. —by truck to all of these points on rail billing?

A. I believe so.

Q. So that the service to these small towns could still be perfomed under the permanent authority which the Rock Island Motor Transit has now?

A. Well, I think it could be performed, yes, under rail billing, but——

Mr. Fowler: I believe that is all.

Exam. Carpenter: Redirect.

Redirect Examination.

By Mr. Howland:

Q. Judge Reed, are you familiar with what the Interstate Commerce Commission refers to as key-point restrictions on motor carrier operations?

A. Yes; I think so.

Q. Were you aware of the fact that on the permanent authority of the Rock Island Motor Transit Company, so far as handling shipments on rail billing, that key-point restrictions now exist at Omaha, Nebr., Des Moines, Iowa, and collectively what is known as the Quad Cities of Davenport and Bettendorf, Iowa, Rock Island and Moline, East Moline, Ill.?

A. Yes.

Q. Would the presence of those key-point restrictions, in your judgment, make it feasible to perform a motor car- [fol. 946] rier transportation for shipments moving on rail bill, say, for instance, starting a shipment from Omaha, Nebr., destined to Victor, Iowa, transporting it from Omaha to Des Moines by boxcar and thence transferring to a truck and operating from Des Moines to Victor, Iowa, by truck?

Mr. Fowler: That is objected to——

By Mr. Howland:

Q. Would such a transportation service, in your opinion, be feasible?

Mr. Fowler: That is objected to as immaterial, calling for hearsay evidence, calling for an incompetent conclusion of the witness.

Exam. Carpenter: Objection overruled.

A. Well, from what experience we have had with those matters, I would say that is not feasible.

By Mr. Howland:

Q. You have had some problems along that line with respect to the operations conducted by some of the railroad carriers, have you not——

A. Yes; we have.

Q. —within the State of Iowa.

Mr. Howland: That is all.

Exam. Carpenter: Re-cross.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused, Judge. Thank you.

(Witness excused.)

[fol. 947] WALTER H. McKEAN was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. Walter H. McKean.

Q. Your home is where?

A. 1504 Elm, Grinnell, Iowa.

Q. What is your business, Mr. McKean?

A. I have a Ben Franklin variety store in Grinnell.

Q. How long have you been engaged in business there?

A. Three years.

Q. And this store that you have there, it is your own? That is, you own and operate the store?

A. Yes, sir.

Q. You say you have a Ben Franklin store. Is that an organization of variety store dealers that are sponsored by a particular merchandiser or wholesaler of merchandise?

A. Yes, sir. It is sponsored by Butler Brothers. However, they are locally owned.

Q. It is what is sometimes referred to as a voluntary chain——

A. That is correct.

Q. —organization. Now, you buy a substantial part of your merchandise from Butler Brothers, I take it?

A. Yes.

Q. Butler Brothers stores—that is, Ben Franklin stores—are serviced in this territory from what central point?

[fol. 948] A. From Chicago.

Q. And do you have shipments coming into your store at Grinnell from any point other than Chicago?

A. Yes, sir; we do on occasion from St. Louis, Minneapolis, and not too much from the west.

Q. But you do have occasion to make shipments both from St. Louis and Minneapolis as well as the bulk of your shipments which come out of Chicago?

A. Yes, sir.

Q. What carrier has been handling those shipments both from Minneapolis and Chicago?

A. Well, the one we frequently use from Minneapolis is the M&StL, from Chicago the Rock Island Motor Transit.

Q. What about your St. Louis shipments? Do those come by motor carrier or some other means?

A. No; they generally come M&StL also. Very few.

Q. Your shipments from——

A. Chicago is the bulk. I would say 90 percent of our merchandise comes from Chicago.

Q. From Chicago?

A. Yes, sir.

Q. About how frequently do you have occasion to get merchandise from Chicago?

A. We get it in on the average four or five times a week.

Q. About what volume do those shipments customarily run?

[fol. 949] A. Oh, I would say we average 800 to a thousand pounds a week.

Q. Do you have occasion to make shipments in excess of 5,000 pounds to serve your store?

A. No, sir.

Q. How have you found the service performed by the

Rock Island Motor Transit to you at Grinnell has worked out, Mr. McKean?

A. Very well. I can send in orders on Saturday and the merchandise is in the store on Thursday, which is excellent service, and I can always plan on it being there.

Q. Now, is there any other motor carrier to your knowledge that serves Grinnell that renders a service that is equal to or comparable with that of the Rock Island Motor Transit service?

A. No; we don't have. The reason I like the Rock Island Motor Transit is because if I am not there, which is quite often, we get shipments maybe of 50 to 70 cases in sometimes, and when I get back to the store those cases are down in my basement all stacked up, and they always see that that merchandise is put away and put away properly. They have always taken care of me very well in that respect.

Q. Is there any other motor carrier doing business in the City of Grinnell which has a full-time terminal agent there?

A. Well, I guess you would call him full time, this Western Transportation, but the facilities he has are very inadequate.

Q. They do have a terminal agent at Grinnell?

A. I believe so. I believe they do have.

[fol. 950] Q. Would the substantial reduction or elimination of the service presently performed by the Rock Island Motor Transit from Chicago to Grinnell have any effect on your business?

A. Yes; because now I know when the merchandise is to arrive and if we didn't have that service no doubt it would come to Des Moines and would have to unload and go back to Grinnell again. That has happened in the past.

Q. You have had that experience with some other carriers in the past?

A. Yes; especially on seasonal goods. I was supposed to have Easter candies in the store on a certain day and on one occasion it was up in Des Moines some place, and we had to wait and send a tracer to get it to Grinnell. They had unloaded it up here and evidently forgot it. Anyway, it was unloaded up here some place.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. What is the service from Minneapolis to Grinnell that you use?

A. The M&StL railroad.

Q. Do they have a truck operation, too?

A. No, sir; not to my knowledge.

Q. In other words, you are using rail service from Minneapolis to Grinnell?

[fol. 951] A. That is right.

Q. Via the M&StL railroad?

A. Yes, sir.

Q. Do you use rail service on the Rock Island railroad?

A. We do on shipments generally from the east, Pennsylvania and glassware and crockery, and so forth, from the east, generally comes rail.

Q. You also use the service of the Rock Island railroad through its truck subsidiary, the Rock Island Motor Transit Company?

A. That's right.

Q. What other carriers are you or have you used from Chicago to Grinnell?

A. We always ask that the Rock Island Motor pick it up on our orders. However, in some instances, why, the Iowa-Nebraska freight line has brought it in and they route them that way. Why I don't know because we always route——

Q. You are talking about the Iowa-Nebraska Transportation Company?

A. That is right.

Q. And you also mentioned Western Freight Lines.

A. That is right.

Q. What about the Des Moines Transportation Company?

A. Not very often. I don't imagine we will get a shipment over once every 3 months.

Q. You have had such shipments from them?

[fol. 952] A. Yes, sir.

Q. I think your shipments, you said, would average under a thousand pounds?

A. Yes, sir.

Q. What is this service that the Rock Island Motor Transit gives you? You said you have a shipment of a number of cases come in, it is unloaded, is it, and taken down in your basement?

A. Yes, sir.

Q. Put away for you down there?

A. They stack it up down there. They see it gets into the basement. I have a chute outside and some doors down below and they always manage to get it in there.

Q. And they stack it up for you?

A. Yes, sir. Very good service.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Redirect Examination.

By Mr. Howland:

Q. You referred to some experience you had had with some seasonable merchandise. Was that one of the lines referred to by Mr. Fowler in his questions?

A. I just don't recall. I can't remember just what transportation company it was. However, take this for what it is worth, there was another merchant in town that had the same experience, had some candy go to Des Moines, and I think he got his after the holidays sometime. He probably had to sell it next year, I don't know. It was after [fol. 953] the holidays when he got his seasonable candy in and he even made a trip to Des Moines to find out where it was.

Mr. Howland: I think that is all. Thank you.

Exam. Carpenter: You are excused.

(Witness excused.)

PAUL BRINK was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?
A. Paul Brink.
Q. You live in Grinnell, Iowa?
A. I live in Grinnell; that is right.
Q. In what business are you engaged, Mr. Brink?
A. I am the manager for the Grinnell Shoe Company.
Q. And what kind of a business is the Grinnell Shoe Company engaged in? Is that a retail store?
A. No. The Grinnell Shoe Company is a manufacturer of women's shoes.
Q. And you have a manufacturing plant located there in Grinnell?
A. That is correct; yes.
Q. About how many people do you have working in that plant?
A. We employ about 125 people.
Q. Is that a seasonal or year-around operation, assuming that you have the business available?
[fol. 954] A. For the most part, it is a fairly steady year-around business.
Q. Now, you make your sales direct to retailers in various parts of the country or do you handle through some other method of distribution?
A. No; we have no company-owned stores. All of our sales are made to independent merchants and department stores and small chains. About 75 percent of our business is to independent merchants. The bulk of our business is done in the Midwest. However, we do have accounts as far as each coast.
Q. Do you have occasion to ship your products out from Grinnell by motor carrier, by truck?
A. Aside from the parcel post shipments, almost everything that we ship moves by truck.
Q. Now, on your inbound shipments of raw material

such as hides, leathers, trimmings, findings, and matters of that sort, how are those shipments handled?

A. Most of those shipments come to us by truck.

Q. From what points do you customarily make purchases of those materials?

A. The more significant points are Tullahoma, Tenn., Sheffield, Ala., Grand Rapids, Mich., Boston, Fond du Lac, Wis., Lancaster, Pa., St. Louis, Chicago, Trenton, N. J., and Red Wing, Minn.

Q. Now, what motor carrier has been handling your shipments into Grinnell from those points in the past?

A. The Rock Island Motor Transit has been hauling most [fol. 955] of those shipments which have originated with other carriers and turned over to Rock Island Motor generally at Chicago.

Q. Either at Chicago or the Tri Cities, I take it?

A. Or Tri Cities, yes.

Q. From most of those points of origin you have named?

A. That's right.

Q. On your shipments of raw materials moving into the factory, do you have occasion to make shipments that will exceed 5,000 pounds in weight for a single shipment?

A. In the past we have had such shipments from Grand Rapids, Mich., from Lancaster, Pa., Trenton, N. J., and I believe also from Sheffield, Ala.

Q. Have you had occasion to have such shipments made to you in the last 4 or 5 months since the Rock Island Motor Transit Company has been under the present restrictions?

A. I don't recall of any. That is partly explainable by the fact that at the present time we are reducing the volume and size of incoming shipments. We are making our purchases more on a spot basis instead of projecting our requirements as we ordinarily would do.

Q. Has that been in part due to market conditions or Government allocations and restrictions?

A. Mainly because of market conditions.

Q. If conditions were favorable, and were fairly stable, would you have occasion to make inbound shipments to your [fol. 956] factory in excess of 5,000 pounds maximum?

A. Yes; we would because frequently we can obtain a price advantage by buying enough quantity, and of course

we, I believe, get a little reduction in transportation cost for the larger shipments.

Q. Now, if the Rock Island Motor Transit were in a position to handle shipments in excess of 5,000 pounds, would you use that service by way of the Rock Island Motor Transit Company?

A. Oh, yes; definitely.

Q. Have you used the Rock Island Motor Transit Company in the past on such shipments?

A. Yes.

Q. Now, with respect to your outbound shipments, you said, I believe, that your sales were made principally in the midwestern part of the United States, but that you did have outlets on both coasts and you had occasion to ship to a variety of destinations?

A. That is correct.

Q. What would be the size of the shipments that you would customarily have occasion to make out from your factory to these destinations?

A. We have never made any study of that, but a rough figure on my part probably would be 150 pounds per shipment.

Q. In other words, most of your outbound shipments would be in the category of the relatively smaller weight shipments?

A. That is correct; yes.

[fol. 957] Q. And you would have few, if any, of what would be characterized as volume shipments moving from your plant to any particular destination?

A. No; that would happen very, very seldom.

Q. Now, have you had any experience with respect to having any service on these outbound shipments to points outside the State of Iowa on these shipments that you are making from time to time from your factory with other motor carriers other than the Rock Island Motor Transit?

A. You asked me if we have had any experience?

Q. Yes. What about their willingness or ability to handle those 150-pound shipments for you?

A. Well, our experience on that has not been too satisfactory particularly to points in Ohio and Michigan. We frequently run into situations where we are advised that

certain points have been embargoed. We have had to change our method of shipment to those points. By now, of course, we have fairly well learned which ones they are so we ordinarily reject motor shipments to those points. Missouri is also another State in which we have had some trouble on that account.

Q. What about the carriers that operate through Grinnell; have you had any experience with them?

A. Yes. We have had inbound shipments delivered to us by Iowa-Nebraska Transportation Company, Western Transportation Company, and possibly an occasional one from Des Moines Transportation Company.

[fol. 958] Q. What about those carriers affording any service outbound from your plant?

A. We have never felt that that arrangement was satisfactory. Now, that bears a little explanation. We have built a substantial portion of our business on service and the fact that we maintain a very effective in-stock department. That means that we pride ourselves on shipping orders the same day as received and a substantial part of our orders are shipped that way. Now, that means that if we have a designated time of day for the accepting carrier to pick up our shoes, we must reasonably expect him to be there on or about that time, which is late afternoon. We prefer to see our shoes move out of Grinnell at the earliest opportunity and I think in practically all cases it is the same night which the shoes are picked up.

Q. What experience have you had with some of these other motor carriers that you have referred to as to their willingness or ability to perform that service for you?

A. Well, in Grinnell, of course, Mr. Pasch apparently is the cartage agent. I don't know the technical term you people use and he represents, I think, all three carriers that I have mentioned. Possibly an additional one or more, and while he is a hard worker and conscientious, I think it is just physically impossible for him to take care of handling the freight and conducting all the affairs of an agent for [fol. 959] one transportation company, let alone three or four or more.

I can't say much on outbound shipments because we seldom have tendered outbound shipments to any carrier other than Rock Island Motor Transit.

Q. Has there been any particular reason for that or any experience that you have had?

A. Of course, our reason for giving them to Rock Island Motor Transit is because they have afforded us what we consider to be the best service, and if we find it desirable or necessary to obtain rate information, we can get that quickly. We of course are frequently and generally obligated to ship by the cheapest method and sometimes it is necessary that we obtain the rate to the destination.

Q. Do you have any other carrier in Grinnell that has a full-time agent located there?

A. No; not to my knowledge.

Q. Rock Island Motor Transit does have such a man?

A. That is right, and maintain an office there, and full-time paid employees.

Q. Now, let me ask you this question, Mr. Brink. In the event the service of the Rock Island Motor Transit Company to interstate points from Grinnell or from interstate points into Grinnell was eliminated entirely or substantially curtailed or further restricted, would that have any effect on your business?

A. Well, I feel that it would because we are, of course, [fol. 960] primarily dependent upon good service on inbound shipments to keep our plant operating. Even the delay or late receipt or loss of one shipment might throw our plant completely out of work.

Then, as far as outbound shipments are concerned, as I say, we have built our business on service, and we are interested in giving our customers the best possible service that we can because at least a large portion of our shoes would come under the category of seasonal merchandise. Something like the story about the candies.

Mr. Howland: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, at Grinnell the Rock Island Motor Transit freight dock is at the railroad depot.

A. That is correct.

Q. And that the Rock Island railroad maintains two pick-up-and-delivery trucks in Grinnell that call at your place to make pickups and deliveries.

A. As to the number I don't know, but I am sure that it is two or more.

Q. And that pickup truck, when it calls at your place of business, picks up both rail-billed freight as well as motor carrier-billed freight?

A. Yes.

Q. Your shipments go out in certain instances on rail billing?

[fol. 961] A. In a few instances; yes.

Q. And in certain instances on motor carrier billing?

A. In most instances.

Q. Now, you said you have available there at Grinnell from the railroad a rate information. You can call them up and find out what the rate is to a certain point; is that correct?

A. Both rail and truck.

Q. Both rail and motor carrier?

A. Yes.

Q. Are you solicited for your business by the Rock Island Motor Transit Company solicitor?

A. Yes.

Q. And are you solicited for rail freight by the railroad solicitor?

A. Yes.

Q. On your outgoing shipments, you say they average about 150 pounds?

A. Yes.

Q. And you use the Rock Island Motor Transit almost exclusively on your outgoing shipments?

A. That is right.

Q. You have found, for instance, in Ohio and Missouri, as I understand it, that due to some complications with inter-connecting carriers, the service to some of the small towns in those States wasn't satisfactory?

[fol. 962] A. That is right.

Q. And to correct that, you now use railroad service to those points?

A. Either railroad service, parcel post, or express.

Q. You have substituted some rail service for your previous motor carrier service?

A. Yes.

Q. You have substituted some express and parcel post service for the other service?

A. Yes.

Q. Now, on your incoming shipments, let's speak about the usual and ordinary situation. A shipment of yours of any substantial volume would consist of what?

A. You mean in terms of pounds?

Q. In the term of pounds, what would it consist of? For instance, if you had a truckload which, we will say, is a minimum of 20,000 pounds moving in, what would it be?

A. We would seldom have a truckload.

Q. I see. Then even your incoming shipments as well as your outbound shipments are so-called small volume shipments?

A. Yes. However, our inbound shipments would probably come closer to at least a thousand-pound average.

Q. Now, some of that incoming freight is now being handled by Iowa-Nebraska?

A. Yes.

[fol. 963] Q. Western Freight Line?

A. Yes.

Q. Des Moines Transportation Company?

A. Probably not at the moment.

Q. But the other two particularly?

A. Yes.

Q. When you control the routing on incoming freight, do you specify the Rock Island Motor Transit Company?

A. Almost invariably when we are familiar with the connecting carrier.

Q. It would be a rare instance when you would specify any of the other motor carriers?

A. Generally, when it comes in by other motor carrier is because the routing has been left open or because the connecting carrier has not followed the instructions on the bill of lading.

Q. But if you have anything to say about it, it is all Rock Island railroad or Rock Island Motor Transit?

A. Generally speaking.

Q. Do you use the service of the M&StL railroad to Grinnell?

A. Not intentionally.

Q. Not intentionally, and that, I presume, is for the reason that the service nowhere compares with that you get from the Rock Island?

A. That is right; from the Rock Island Motor Transit.

Q. And the Rock Island railroad?

[fol. 964] A. Oh, I wouldn't say that the difference in service between either railroad was——

Q. What difference between the two have you drawn? Does one have on a blue coat and the other a green one?

A. That is what I say, there is no difference, so far as I know, between the service of either railroad.

Q. Is there any difference between the service of the Rock Island railroad and the service of the M&StL railroad?

A. Not that way.

Q. But you don't use the M&StL railroad service?

A. Because we don't have any shipments originating at points where it serves.

Q. But you do use the Rock Island railroad?

A. That is right; primarily on carload shipments.

Q. Now, didn't you tell me that in order to correct this situation you ran into in Missouri and Ohio that you had started using some rail service?

A. That is only because we couldn't get truck service.

Q. I understand, but am I correct in that?

A. Yes.

Mr. Fowler: Okay. That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. Just to keep this thing straight. Information about railroad rates and rail shipments you get from what source?

[fol. 965] A. From the Rock Island railroad, the agent or his clerk.

Q. Now, when you have motor carrier shipments to be made and you want to get rates or information or service schedules and matters of that sort, where do you get that information?

A. We get that from the Rock Island Motor Transit.

Mr. Howland: That is all.

Exam. Carpenter: Anything further? You are excused, sir.

(Witness excused.)

HARRY P. PIKE was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you please state your name, place of residence and occupation?

A. Harry P. Pike.

Q. You live in Shelby, Iowa?

A. Shelby, Iowa.

Q. What is your occupation?

A. Independent garage operator.

Q. How long have you lived at Shelby?

A. Resided in the town 6 years.

Q. Now, Mr. Pike, where is Shelby located?

A. Approximately 30 miles east of Council Bluffs, northeast.

Q. Shelby is located on U. S. highway No. 6, isn't it?

A. No.

[fol. 966] Q. How far off of the main paved highway is Shelby located?

A. Two and a half miles north.

Q. Two and a half miles north of highway No. 6?

A. 64. Six, I don't know the exact mileage on that.

Q. But you are located off of a paved highway 2½ miles, is that correct?

A. Yes.

Q. Now, you say you are an independent garage operator. By that you mean that you don't handle any particular line of cars but operate a general repair garage?

A. Just operate a general repair garage. No car dealer whatsoever.

Q. You are not a car dealer?

A. No.

Q. Now, in connection with your garage work, do you do a general line of repairing of machinery as well as automobiles?

A. Only farm tractors and no machinery.

Q. But you repair tractors?

A. Yes.

Q. How large a town is Shelby?

A. Approximately 700.

Q. Is it the usual Iowa town of that size with the usual retail stores and service companies like grocery stores and drug stores, garages and filling stations and elevators and things of that character?

[fol. 967] A. Yes.

Q. Now, you are located on the Rock Island railroad, are you not?

A. Yes.

Q. Is that one of the communities that is going to be on a branch line?

A. Yes, sir.

Q. When the main line of the Rock Island is changed, it is going to miss Shelby, is it not?

A. Yes.

Q. Now, in addition to your repair work you handle any automotive supplies such as batteries, tires, and things of that character?

A. Yes; I do.

Q. From where or what source do you get your batteries and automotive supplies and parts?

A. Batteries are sent out of Kansas City, Kans., and automotive parts out of Omaha, Nebr.

Q. What transportation company have you been using to get your batteries and your automotive parts?

A. Chiefly, Rock Island Motor Transit.

Q. And why have you been using that company?

A. Well, it seems to be the only company that had daily service into Shelby at the time I went in business. It seemed to be the most—you get the best service from it.

Q. Now, you have a number of livestock haulers, do you not, that haul from—you are in Shelby County, are you not? [fol. 968] A. Yes.

Q. —haul from around Shelby to Omaha?

A. That is right.

Q. And I assume most all those livestock haulers haul back a little freight once in a while when they come back from Omaha?

A. Yes; they do. One of them runs a freight service 2 days out of the week on the return. Not on the return. He makes special trips in with small freight and picks freight up.

Q. Is that Rheiner Brothers?

A. Yes.

Q. How often do you say their service is to Omaha, 2 days a week?

A. Two days each week.

Q. Now, you said you have been using the Rock Island Motor Transit service on service that you have been getting there, is that correct?

A. That is right.

Q. By that company. Is there any company that operates daily through Shelby to Omaha and other points, both in the State of Iowa and outside the State of Iowa, other than the Rock Island Motor Transit Company that you know of?

A. No; not daily service.

Q. And the closest daily service is this twice-a-week service by Rheiner Brothers, is that correct?

A. Will you repeat that?

[fol. 969] Q. I say, the closest you have to daily service other than Rock Island Motor Transit, is that service provided twice a week by Rheiner Brothers?

A. Yes.

Q. Do you know whether or not Rheiner Brothers have rates that they can interline or through rates with other carriers so that a shipment coming from a point beyond Omaha can come on a through rate by Rheiner Brothers?

A. No; I don't.

Q. You don't know what their rate set-up is?

A. No.

Q. What would be the effect on your business, Mr. Pike, if the Rock Island Motor Transit Company were required to cease operating or materially curtailed its operations into the town of Shelby?

A. Well, I am not a very large business operator myself and I am just here in the interest of the town, due to the fact that I am mayor elected for the coming 2 years, and I would like to see the town itself have good daily freight service due to the fact that the Rock Island railroad is going to be abandoned in the future.

Q. Well, not only in addition to the welfare of the town, but how about your own business; do you feel that that would affect you in any way if that service should be eliminated or substantially curtailed?

[fol. 970] A. Oh, sure; certainly.

Q. About how frequently do you get shipments into your place of business?

A. Well, at the present time I would say they are rather infrequent as far as motor freight is concerned. The biggest share of mine come in by parcel post. Others are delivered by the parts men themselves.

Q. Can you give us some idea about how often you do get shipments in by motor freight?

A. Twice a year.

Q. Is it fair to say that you are here more as a spokesman for the community than you are speaking in behalf of your own business?

A. Yes.

Mr. Nolan: That is all. You may cross-examine.

Mr Fowler: Mr. Nolan, is his a rail point now served by the Rock Island railroad?

Mr. Nolan: Yes.

Mr. Fowler: And due to the relocation of your tracks out there, it will no longer be?

Mr. Howland: Shelby will continue to be a point on the Rock Island railroad, but the operation when the new line is built between Atlantic and Council Bluffs, Shelby will

then be the end of a branch operation. According to the present plan, it will receive only tri-weekly rail service.

[fol. 971] Mr. Fowler: How far is Shelby from U. S. highway 6?

Mr. Howland: 64 is the closest.

The Witness: 64 is the closest.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, you have rail service in there now at the present time?

A. Yes.

Q. And you also have service by the Rock Island Motor Transit?

A. That's right.

Q. And also service by Rheiner Brothers out of Omaha?

A. Yes.

Q. And also service by the Iowa-Nebraska Transportation?

A. Iowa-Nebraska; no.

Q. Iowa-Nebraska. Have you ever used the Iowa-Nebraska?

A. No.

Mr. Howland: I think the record of the prior hearing indicated Iowa-Nebraska did not serve Shelby.

Mr. Fowler: That is all. Thank you.

Exam. Carpenter: You are excused, sir.

(Witness excused.)

Ernest Plagman was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, please, place of residence, and occupation?

[fol. 972] A. Ernest Plagman, Shelby, Iowa.

Q. What is your occupation?

A. Well, I am semi-retired. I live in town and go out to the farm and help the boy off and on.

Q. You don't have anything shipped in or out, do you?

A. Well, no, not locally other than just maybe some small things I need on the farm, but nothing in any line of business.

Q. Now, have you advised yourself and informed yourself in regard to the transportation needs of any particular business enterprises in Shelby so that you can speak with some authority as to their needs?

A. Well, the local druggist there says it is quite a benefit to keep the local motor truck in there in his shipments from St. Louis and to points where he has his drugs and other things come in from.

Q. What farm implement companies do you have there?

A. There is International and Massey Harris. That is the only two in town now.

Q. Do you know where they get their parts and smaller units and also their larger units such as tractors, combines, corn-pickers and things of that character?

A. The larger units come in by local freight at present, the combines, his tractors, quite a bit of what isn't hauled in by truck. One outfit hauls their own. The other I think comes by the railroad, by freight.

[fol. 973] Q. Now, as a member of the community you are speaking prima ily as a resident of that community, is that right?

A. That is right.

Q. Do you know Mr. Holtz?

A. Yes; I do.

Q. What is his business there?

A. He is in the implement business there, but he has no line of machinery. He just buys whatever he can sell, manure loaders, wagon boxes, and stuff like that.

Q. He is not a Deere dealer or International dealer?

A. No; that is right.

Q. He handles varied lines such as New Idea spreaders and things of that kind?

A. Rheiner Brothers handle New Idea, but he does

handle manure loaders. I don't think he has any straight line of machinery; whatever he can buy and sell and so on.

Q. From your own personal knowledge, does any other trucking company serve Shelby regularly other than Rock Island Motor Transit?

A. No. I have seen Fredrickson come through there from Harlan, but they are not regularly through there.

Q. So far as your acquaintance with the community, does any other motor carrier other than Rock Island Motor Transit have trucks in Shelby daily?

A. None other than Rheiner Brothers. They make a trip twice a week.

[fol. 974] Q. They make a trip only twice a week to Omaha?

A. Yes, sir; that is their general policy.

Q. Are they livestock haulers?

A. Yes, sir.

Q. And haul corn and grain and other things for the farmers there?

A. Yes.

Mr. Nolan: That is all.

Cross-examination.

By Mr. Fowler:

Q. They do maintain a twice-a-week service on general commodities out of Omaha to Shelby?

A. Yes. I think that has been stated.

Mr. Fowler: That is all.

(Witness excused.)

H. H. Witmer was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, please, Mr. Witmer?

A. H. H. Witmer, superintendent, One-Minute Washer Company at Kellogg, Iowa.

Q. Do you live at Kellogg?

A. I live at Newton.

Q. And commute back and forth, is that right——

[fol. 975] A. And commute back and forth.

Q. —— to the One-Minute Washer Company at Kellogg. Now, I believe you testified at the other hearing in this case, did you not?

A. That is right.

Q. And you are familiar with the general proposition before the Commission in this proceeding?

A. That is right.

Q. How long have you been connected with the One-Minute Washer Company?

A. At Kellogg, since 1939, and prior to that time the One-Minute Washer Company was at Newton and since 1919 at Newton.

Q. Did you tell us what your position is with the One-Minute Washer Company?

A. Superintendent.

Q. You are familiar with the transportation and other needs of the company, are you not?

A. That is right.

Q. I assume by the name that the One-Minute Washer Company manufactures washing machines, is that correct?

A. Washing machines and drain tubs and repair parts.

Q. Now, how are your shipments handled which come into Kellogg?

A. Our incoming shipments are all handled by the parent company, the Midwest Metal Stamping Company. We are a subsidiary of the Midwest Metal Stamping Company. The incoming shipments are all handled by them. Mr. [fol. 976] Foster will testify as to that.

Q. How about your outbound shipments, how are they handled?

A. Outbound shipments, we handle all the finished merchandise which is finished washers, finished drain tubs, and finished repair parts.

Q. What are the destination points for those shipments which are outbound?

A. Practically all over the world. Eight or ten foreign countries and practically every State in the Union.

Q. What would you say would be the volume of your company there at Kellogg in regard to units manufactured during the course of a year?

A. About 18,000 units in washers. I presume 60 to 70 thousand units of drain tubs.

Q. How about these repair parts?

A. Repair parts are just in connection with our own washers. We are an old firm 50 years old, and we maintain adequate repair stocks for practically all washers we have ever built.

Q. Do you handle those repair parts through your established dealers in various parts of the country?

A. Yes; through our own dealers and also through the appliance parts dealers.

Q. That is what I mean, whether it is an independent dealer or your own company dealer.

A. That's right.

[fol. 977] Q. How do your shipments move outbound, in carload quantities, truckload quantities, or less-than-truckload quantities?

A. All three. The big bulk are less-truckload, less-than-truckload.

Q. What would those shipments average, the l. t. l. shipments?

A. They will average from minimum l. t. l. shipments up to full truckloads.

Q. You say they may move to all parts of the country?

A. That is right; every place.

Q. What transportation company has your company been using primarily for these outbound shipments?

A. Rock Island Motor Transit practically exclusively.

Q. Why is that so?

A. They are the only truck line that actually makes Kellogg on a daily basis. Their service is excellent. We have an empty trailer there every morning and we load that trailer and it is pulled out at 1 o'clock practically every day.

Q. Now, Mr. Witmer, I assume that you have had experience with other trucking companies?

A. That is right.

Q. Serving Kellogg with outbound shipments?

A. That is right.

Q. What is the fact as to whether or not you can get truckload shipments out by other trucking companies without too much difficulty?

[fol. 978] A. Yes; we can.

Q. How about your small shipments on a regular basis?

A. It would be very difficult to do, I think, on account of the volume of the shipments.

Q. In other words, do you find that the independent transportation companies will handle the volume shipments, several thousand pounds or truckload quantities, whereas for the small shipments they are not desirous of that business?

A. That is right. We don't have enough volume for them.

Q. What effect would it have upon your company in the event that there was a diminution or a substantial reduction in the service of the Rock Island Motor Transit in serving your company at Kellogg?

A. It would be very bad. In fact, our business is practically built around the Rock Island Motor, you might say.

Q. Your business was established and developed with that service there available, is that right?

A. That is right; yes, sir.

Q. Do you know of any other transportation agency serving Kellogg that could give the same type, character, and quality of service that the Rock Island Motor Transit Company has been giving your company over the years?

A. Well, not at the present time; no. We have Keeshin's service three times a week, I might say.

Q. Is that service as satisfactory as Rock Island Motor Transit?

[fol. 979] A. No; it isn't.

Q. I believe you said that you route almost exclusively your shipments by Rock Island Motor Transit out of Kellogg?

A. Yes; I would say 85 percent of our total shipments.

Q. Now, does the 5,000-pound limitation that Rock Island Motor Transit has been operating under during the past few months affect your ability to get your shipments routed out of your plant?

A. Yes; in some cases.

Q. Would you care to elaborate a little on that?

A. I just made a few notes on that. In February—I took just one particular month; in February of this year we had eight truckload shipments, that is, full truckloads. In one instance the customer sent his own truck in. In another instance the delivery was on the Watson line and we made arrangements with the Iowa-Nebraska to come in to get the load because Watson didn't have rights in there, but the Iowa-Nebraska did.

One other shipment, the dealer specified Merchants delivery and the five other shipments all moved Merchants, but we would have moved those five loads by Rock Island Motor had they been able to handle the shipments.

Q. Now, you say if the Rock Island Motor Transit had been able to handle those shipments, you would have shipped by Rock Island Motor Transit?

A. That is right.

[fol. 980] Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, these eight full truckloads, one of the customers sent his own truck in?

A. That's right.

Q. One or two of the others specified Merchants?

A. That's right. One.

Q. And you got the Iowa-Nebraska then?

A. That's right.

Q. And did I understand you correctly that the Rock Island Motor Transit set a trailer at your place of business every morning?

A. They don't set it at our place of business; they set it at the Rock Island depot which is only 1 block from our plant.

Q. Is your freight picked up at your place of business by the Rock Island Motor Transit?

A. That is right.

Q. They pick up both your rail shipments and your truck shipments?

A. That is right; yes, sir.

Q. And you are using Rock Island Motor Transit almost exclusively on your outbound shipments?

A. That is right.

Q. Most of which are the smaller type shipments?

A. That is right.

[fol. 981] Q. Now, your inbound shipments, I think you said, you had no trouble getting truckload service or service on volume shipments?

A. That's right.

Q. But you were having trouble on your small shipments?

A. Not particularly. I didn't say that.

Q. I meant except for the Rock Island Motor Transit.

A. That is right.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. By the way, Mr. Witmer, do you specify Rock Island Motor Transit or have you occasionally used Rock Island railroad billing in connection with Rock Island Motor Transit service?

A. Yes; we have done that just recently, truckload shipments to St. Paul. I billed it on rail billing, but the Rock Island Motor Transit handled the shipment.

Q. That was on account of the 5,000-pound limit?

A. That is correct.

Q. On the Rock Island Motor Transit?

A. That is not included, however, in the 8 truckloads I mentioned. That load was in January. This happened to be February.

Q. Would you, however, prefer to have motor transit billing rather than rail billing?

A. Much prefer.

Q. Have you had some experience on rail billing that [fol. 982] wasn't as satisfactory as motor transit billing?

A. No; I don't say that we have where the delivery is on the line. I think it would be very bad if it had to go to a destination point and then transfer to a rail. For instance, some points, we have had some points where we have made a mistake in billing, we have routed it Rock Island Motor Transit and it arrived in Chicago and no truck service to the point and they have had to turn it over to rail, whereby they wire back and we have to advance freight as far as Chicago. We have had that on an occasion or two.

Q. From your acquaintance with the transportation industry, do you know of your own personal knowledge that where a rail freight is billed out, handled by Rock Island Motor Transit to certain points for interline with some other motor carrier in this area here, whether or not a motor carrier can handle that on rail billing?

A. I am not——

Q. You are not familiar with that?

A. No.

Mr. Nolan: I think that is all.

Re-cross-examination.

By Mr. Fowler:

Q. On this full truckload that you said you had occasion to ship to St. Paul, was that loaded on a Rock Island Motor Transit truck at your place of business?

A. Yes, sir.

[fol. 983] Q. Then you billed it out on rail billing?

A. On rail billing; yes, sir.

Q. And it moved to St. Paul on truck?

A. I presume so.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. By the way, have you ever been solicited by a representative of the Rock Island Motor Transit Company to ship on rail billing?

A. No, sir.

Q. And in your dealings with the Motor Transit Company, insofar as motor transit business is concerned, has that been with a representative of the Motor Transit Company?

A. Oh, yes.

Q. How about where you ship freight by rail, who do you deal with on that?

A. Our local agent there mostly unless I want special rates or something and then I call Mr. Brown of the Rock Island office in Des Moines here.

Q. When you speak of local agent, you mean the local railroad agent?

A. Yes; that is right.

Mr. Nolan: That is all.

Exam. Carpenter: Anything further?

Re-cross-examination.

[fol. 984] By Mr. Fowler:

Q. Does the Rock Island railroad maintain a railroad freight dock at Kellogg?

A. Yes, sir.

Q. And have an agent there?

A. Yes, sir.

Q. Does the Rock Island Motor Transit have a terminal there, too?

A. The same agent handles the Rock Island Motor freight.

Q. The same agent then at Kellogg handles the Rock Island railroad freight as well as the Rock Island Motor Transit truck freight?

A. That's right.

Q. You deal with just the one man?

A. Yes; sir.

Mr. Fowler: That is all.

Mr. Nolan: That is all.

Exam. Carpenter: You are excused, sir.

(Witness excused.)

DON FOSTER was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, Mr. Foster?

A. Don Foster, Kellogg, Iowa. I do the buying for the Midwest Metal Stamping Company in our One-Minute Washer division and also the Kellogg Lumber division. [fol. 985] Q. Now, just tell us about this Midwest Stamping Company; what is the general business of that company?

A. The Midwest Metal Stamping Company is the parent company and it is in the job stamping business and mostly makes parts out of metal, steel, copper and brass, and our customers are throughout the Middlewest. We have some in Chicago—mostly around in the middlewestern country and pretty large customers. We use quite a bit of steel, of course, which is our main diet.

Q. You say you are the Midwest Metal Stamping Company; that is the parent company of the One-Minute Washer Company?

A. The Kellog- Lumber division, you might say, also, the three divisions, but the Midwest Metal Stamping Company is the owner of all of them.

Q. Do I understand that so far as the metal work is concerned, the castings and the fittings and things of that character; they are purchased by the Midwest Metal Stamping Company for the One-Minute Washer Company?

A. That is right.

Q. And they are processed by your company and then the parts are assembled by the One-Minute Washer Company into the finished product, is that it?

A. That is right.

Q. So your company then has all the inbound shipments——

A. That is right.

Q. —for your work independent of the One-Minute [fol. 986] Washer Company and also all the shipments of

the raw products for the One-Minute Washer Company, is that correct?

A. That is right.

Q. In addition to this processing which you do for the One-Minute Washer Company, do you do processing and stamping and forging, and so on and so forth, for other people, other companies?

A. Yes.

Q. You don't do any foundry work?

A. No, sir.

Q. But the other processing of metals?

A. Yes. Stamping it, forming it, and so forth.

Q. You do a general business. If I wanted to have something made, you would make it for me if I was in some kind of assembling business of some kind?

A. Yes. If you had a mouse trap, we get a lot of them.

Q. You make a lot of springs for mouse traps. Would you tell us what is the source of supply your company uses for your own business and for these allied companies?

A. Well, I mentioned steel and brass. Aluminum, and motors completely assembled. Crating. Lumber and castings. Screw machine parts. Tubes. We get fabricated porcelain enamel tubes from the east. Die castings. Rubber goods. Plastics. I imagine just about anything it takes to make up commodities such as we have.

[fol. 987] Q. What are the primary sources of those supplies that you have enumerated? What general territory do they come from?

A. Ohio, Missouri, east coast. Lumber, of course, from the Northwest, most of it, and the Midwest, Chicago, Milwaukee, Minneapolis, St. Louis. It is pretty general, mostly in the Midwest.

Q. What would you say would be the volume of the business conducted by your company, the Midwest Metal Stamping Company?

A. The total operation, the three companies?

Q. Yes.

A. I would guess somewhere around 3 million a year.

Q. How many employees do you have there?

A. 200 or better, about 200 now, I believe it is.

Q. Now, how do these raw products or unassembled

products move into Kellogg there which are handled and processed by your company?

A. Well, by every means of transportation. Most of it by truck, but we use quite a bit of rail shipments. I should quality that. I suppose we get straight carloads of merchandise in probably more by rail than any other way.

Q. What would be the size of shipments in less-than-rail-car lots?

A. Truckload, l. t. l.

Q. Do you have a number of shipments come in less-than-truckload size?

[fol. 988] A. Yes.

Q. What would that consist of primarily?

A. From a hundred pounds to truckload.

Q. I mean what commodities would come in by less-truckload lots?

A. In rubber goods, most of it is less than truckload, and screw machine parts and bolts, nuts, rivets, and smaller commodities that you use.

Q. How about your motors, how do they come in?

A. We get those from two sources. I believe mostly by rail.

Q. Now, what would be the size of these shipments that come into Kellogg there in less-than-truckload quantities? What would be the average size of those shipments?

A. Well——

Q. Or could they be all sizes up to a truckload?

A. Yes; that is right. If I was to guess, probably 5 or 10 thousand pounds.

Q. How have those less-than-truckload quantity shipments been coming into your place of business?

A. By rail or truck, do you mean?

Q. Yes. I mean in less than truckload and less than carload, by what means of transportation?

A. What lines handle them?

Q. Yes.

A. Well, I believe the Rock Island Motor Transit handles quite a bit more than half of our business. However, a lot [fol. 989] of these sources are located on lines we don't always get to state the routing, and they come in by one truck line, but when we do route it, we route it Rock Is-

land Motor. Our steel, practically all comes by contract hauler. That is, these stock haulers others have mentioned, American Transit and Steel Transportation and P. and W. and some of the others.

Q. Those are by carriers who don't make regular stops?

A. Yes.

Q. Or give regular service to Kellogg?

A. They are referred to as contract carriers or stock haulers.

Q. That might be a stock hauler who lives a hundred miles away from Kellogg that brings in a load of steel one day and you may never see him again for years?

A. That is right.

Q. Why do you say you route as many of your shipments as possible with Rock Island Motor Transit?

A. Because of the service they render. We are able to get information from them and you can trace shipments and it is over night out of Chicago. If we get in a pinch for something and it is shipped out today, we have it in the morning. It is just service like anything else, I guess.

Q. Does the 5,000-pound limitation under which the Rock Island Motor Transit Company is operating, does that affect your business?

A. It has several times.

[fol. 990] Q. Would you be able to state approximately how many shipments you have had in excess of 5,000 pounds that you desired to be shipped by the Rock Island Motor Transit that you were unable to ship by that company since that restriction went into effect last September?

A. No; I wouldn't say it has handicapped us too many times. One instance I can think of is on paint. We would probably get larger shipments of paint if it wasn't for the weight restriction.

Q. Have you bought in smaller quantities on account of that weight restriction, or ordered in smaller quantities?

A. Yes.

Q. What would be the effect on your company's operation there in the event the Rock Island Motor Transit was required to terminate its operations or materially reduce them?

A. There would have to be some other service to supplant

it because it would weaken down for lack of supplies in no time at all unless some other service that was equal to that came in there.

Q. There are transportation companies such as Des Moines Transportation Company and others that do make Kellogg occasionally, are there not?

A. Yes.

Q. But do any of those companies provide the same regular service that the Rock Island Motor Transit Company does?

A. No.

Q. To your knowledge.

[fol. 991] A. No; they don't.

Q. Do you know of any company which would give the same type of service or who is available to give the same type of service as the Rock Island Motor Transit Company?

A. No.

Mr. Nolan: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, on your incoming shipments of raw materials you use rail car service?

A. That is right.

Q. And you also use truckload service?

A. Yes.

Q. And on steel, for instance, that is handled by contract carriers, by P. and W., by Transit, and by a number of other carriers, isn't it?

A. Yes.

Q. Do you ever get any truckloads of steel via the Rock Island Motor Transit?

A. Well, we have had truckloads of steel for them when they were permitted to haul it out of the Chicago district for us, but here lately I have had to get a truckload or two by some other regular carrier, and I believe it was Des Moines Transportation or Iowa-Nebraska, or I would have had Rock Island had they been able to handle it. However, we try to get it by these contract haulers because of the economics involved.

[fol. 992] Q. I think it is customary for factories such as yours to have their steel delivered by such operations as Transit Lines and similar operations. I think that is pretty general out here. So that the Rock Island Motor Transit on truckloads of steel moving out of the Chicago district would be rather infrequent and you do use, of course, rail-car service on your volume shipments?

A. Yes.

Q. Now, as I understand it, the Rock Island Motor Transit are giving you a superb service there?

A. Yes.

Q. And you specify them almost exclusively?

A. That is right.

Q. And if you use some other carriers, it is because your routing directions are not observed?

A. That is right.

Q. Or because it is something that you can't control. You do, however, avail yourself of the service of the other carriers on occasion; for instance, Des Moines Transportation Company?

A. Yes.

Q. Iowa-Nebraska Transportation?

A. Yes.

Q. Do you use McCoy Truck Lines in there?

A. I believe we have; yes.

Q. Do you use Keeshin Motor Express Co.?

[fol. 993] A. Yes.

Q. Do you use Brady on steel?

A. We have; yes.

Q. That is the Brady Motor Freight I have reference to.

A. Yes.

Q. On your outgoing shipments, many of your outgoing shipments are handled by contract haulers?

A. No.

Q. I am talking about your volume shipments now.

A. Our outbound shipments are finished merchandise, and so forth.

Q. Do you ever ship a truckload of finished product?

A. Yes; but that is not by contract hauler. That is usually by Rock Island Motor or some licensed line, I guess is what you would call it.

Q. What I meant to get at, you do use the service of these other carriers I have just mentioned on some of your outbound shipments?

A. You mean the contract hauler?

Q. No. Keeshin, Iowa-Nebraska, Des Moines Transportation, Brady, and a number of others.

A. Yes.

Q. You use those. However, with less frequency than you use Rock Island Motor Transit?

A. Yes, sir.

Q. But you do use the Rock Island Motor Transit almost exclusively on your smaller shipments outbound from your factory?

[fol. 994] A. Yes.

Q. I think Mr. Witmer testified he doesn't have as much trouble getting service from many carriers on truckload quantities. Has that been you experience?

A. Yes.

Q. That is both inbound and outbound?

A. Yes. I have very little to do with the outbound, Mr. Fowler.

Q. Okay. To restate that, you get plenty of service offered to you on volume shipments by truck; you have having your difficulty with the small shipments, is that correct?

A. No; I don't believe there is any difference. I believe we have the same difficulty regardless of the size of the shipment.

Q. I see, but you do get truckloads both in and out by carriers other than Rock Island Motor Transit?

A. Yes; some.

Q. And you are using those carriers?

A. Yes. As far as outbound, I wouldn't want to say as to that because I have enough trouble getting the stuff coming in.

Q. You are in the production end?

A. In the procurement end.

Q. You don't have anything to do with the selling end?

A. No.

Q. Or shipping out end?

A. Thank God, no.

Mr. Fowler: That is all.

[fol. 995] Redirect examination.

By Mr. Nolan:

Q. Mr. Foster, is there some representative going to be here on the outbound shipment operation of your company?

A. Quite a bit of our outbound is taken care of by Mr. Witmer. I can tell you something about our outbound on our stampings.

Q. I think we ought to develop that a little bit. Can you tell us what are the outbound shipments other than the ones that go from the One-Minute Washer Company?

A. I have been with the stamping company almost 16 years so from a little company I have had a lot to do with it, and many of our stampings are delivered by our own trucks and I refer to the Maytag Company, Beam Manufacturing at Webster City, and Dexter at Fairfield.

Q. That is the Dexter Washing Machine Company at Fairfield, Iowa?

A. Yes. Woods Bros. here at Des Moines is one of our customers.

Q. Do you have any out-of-State customers for these stampings?

A. Yes; we do. We have Joslyn Manufacturing in Chicago and that is a less-than-truckload shipments, and if it is within the weight limit it goes by Rock Island; otherwise, some other carrier, but we don't have solid, full truckloads to them. I don't know of any out-of-State company that we make for that we have solid truckloads.

Q. Is it fair to say that you have a regular outbound [fol. 996] shipping of less-than-truckload quantities of these stamped articles or processed articles to customers outside the State of Iowa?

A. Less than truckload?

Q. Yes; do you have shipments going out practically every day in small quantities?

A. Yes.

Q. To customers outside the State of Iowa?

A. Yes. Into Illinois.

Q. In other words, as I understood your testimony at

the beginning, you will stamp or process for anybody who has some article they want processed, is that right?

A. Yes. We have one item I have come to my mind. We make a toy, a basketball game. We merchandise that throughout the United States, and I talked to our sales manager this morning when he came back from New York and asked him about it, and he said, "Use the Rock Island Motor Transit wherever possible to route these shipments." That is all less than truckload. Very seldom a truckload of games, but he does route that throughout the United States, and he uses Rock Island Motor Transit wherever possible as a starter.

Q. What I am trying to develop here is, your company does have shipments which are in less-than-truckload quantities that may go to any part of the United States?

A. That's right.

Q. And those shipments are quite regular?

[fol. 997] A. Yes, sir; every day.

Q. Every day. But you say so far as you know that is handled primarily by the Rock Island Motor Transit within their weight limit?

A. He said wherever their service was available, he used Rock Island Motor Transit and otherwise it is some other truck line. I tried to get him to come up here with me, but he was just in, and he said he couldn't make it, but that is one of the lesser commodities of our output, is that particular phase of it. The big end of it we transport mostly with our own trucks to local——

Q. Is it fair to say that your big shipping requirements are for these inbound shipments?

A. That is right.

Q. And that your finished products or processed products go primarily to the Maytag Company and these other washing machine companies located in the State of Iowa?

A. That is right.

Mr. Nolan: That is all.

Exam. Carpenter: Any further re-cross? You are excused.

(Witness excused.)

Exam. Carpenter: We will take a 5-minute recess.

(Short recess.)

HOMER W. DENNISTON was sworn and testified as follows:

Direct examination.

[fol. 998] By Mr. Howland:

Q. What is your name, please?

A. Homer W. Denniston.

Q. You live at Newton, I believe.

A. Yes, sir.

Q. What is your business, Mr. Denniston?

A. Treasurer of the retail lumberyard company.

Q. That is known as the Denniston-Partridge Lumber Company, I believe.

A. That is right.

Q. And does the Denniston-Partridge Lumber Company have places of business located at points other than Newton?

A. Yes; they do.

Q. Where are those?

A. In addition to Newton, you would have Colfax, Mitchellville, Altoona, Van Meter.

Q. Van Meter is about something like 20 miles west of Des Moines and the other towns that you have named are points between Des Moines and Newton all on highway 6?

A. Yes, sir.

Q. And the Rock Island railroad?

A. Yes.

Q. Mitchellville being just approximately half a mile off of highway 6?

A. Yes, sir.

Q. What lines of merchandise does your company sell, [fol. 999] Mr. Denniston?

A. We have lumber and general building materials such as steel and paint and gypsum and various products of hardware.

Q. Builder's hardware?

A. Builder's hardware.

Q. Supplies?

A. That is right.

Q. And you also sell fencing materials?

A. Yes, sir.

Q. Matters of that sort. Roofing material?

A. Roofing, steel posts.

Q. And paints as well?

A. Yes; we do.

Q. Now, I take it most of your lumber business moves in carload quantities.

A. Yes. Millwork, however, there is a great deal of millwork that moves in less than carload and less than truckload.

Q. What are your sources of supply principally on your millwork?

A. We get a good bit of it from Rock Island, Ill. Some comes from Clinton, however

Q. There are large producers of millwork located along the Mississippi River points?

A. That is right.

Q. Clear from Dubuque on down, as I recall.

[fol. 1000] A. To Muscatine.

Q. Your principal sources of supply are Rock Island, Ill., and Clinton, Iowa?

A. That is right.

Q. In the eastern part of the State. Do you buy from either of the concerns, millwork concerns, at Muscatine?

A. Yes; we do, and we have some shipments from Dubuque.

Q. Now, from points outside the State of Iowa, what transportation service do you use on millwork and allied lines that you get from these concerns like the Rock Island millwork company or sash and door?

A. We have been using Rock Island Motor Transit mostly.

Q. And about what size shipments will those run?

A. Well, they will vary. Some of them in small units, a few hundred pounds, and then they run on up to occasionally 5,000, 7,000, various weights.

Q. Do you buy those shipments in excess of 5,000 pounds

and have them shipped partly to one of your yards and other portions shipped to other portions of your yards?

A. No; as a rule they go direct to the point unless we ship by straight carloads into Newton and distribute from there.

Q. You would be affected to some extent, I take it, by the 5,000-pound maximum restriction applied on interstate shipments?

A. Yes; we are because our commodities are heavy and we never know exactly the amount that needs to be ordered. [fol. 1001] Some will be small orders and some larger. We have shipments from Omaha sometimes that will vary from a few hundred pounds up to sometimes 7 or 8 thousand pounds.

Q. Did you use Rock Island Motor Transit service on those shipments prior to the restrictions being imposed about the 1st of September of last year?

A. Yes; we have always used the Rock Island largely since they took over the White Line.

Q. What have you been doing with shipments in excess of the 5,000-pound maximum limit since that maximum was imposed?

A. Well, we have had them come in with American and of course Des Moines Transportation has brought in some. We have used the Iowa-Nebraska occasionally. Some of the other trucking lines have taken care of us on that.

Q. Now, Mr. Denniston, do you have occasion to make shipments out from any of your yards that you have reference to or is that all handled by your own truck?

A. Well, mostly by our own truck, but we don't have very many outgoing shipments.

Q. Your principal interest is in the inbound shipments——

A. That is correct.

Q. —from points of supply. Now, you referred to paints and matters of that sort. Where is your source of supply on articles of that character?

A. Our main source of supply is Sherwin-Williams Company in Chicago.

[fol. 1002] Q. They have a distributing center there?

A. Yes. They manufacture it, however, mostly.

Q. Their principal factory, I believe, is Cleveland, Ohio.

A. That is correct, but they have a factory in Chicago as well.

Q. They have a factory in Chicago. Do you buy any paints in quantities of over 5,000 pounds?

A. Yes. We have been buying quite a few in truckload shipments.

Q. Would that be available to the Rock Island Motor Transit if it were not for this restriction?

A. Yes. They have hauled truckloads for us in the past.

Q. Generally speaking, what have you found the situation to be as to the Rock Island Motor Transit Company service both as to time in transit and with respect to tracing of shipments, claim service on cases where loss and damage has occurred in transit, and similar matters? How has the Rock Island Motor Transit transportation service been?

A. Well, we have dealt largely with the Rock Island Motor due to the fact that they have taken good care of us, and if there are any claims or anything we have to file, any information we need about shipments, their local agent being right there in town, it has been very helpful to us. That is the reason most of our orders have been specified Rock Island Motor.

Q. You do have a full-time employee as a terminal agent for the Rock Island railroad in Newton?

[fol. 1003] A. Yes; we do have.

Q. That has been true ever since the Motor Transit Company took over from the White Line, has it not?

A. Yes; that is right, and I might just mention that where we have our interstate shipments and intrastate both delivered by the same carrier, it makes it a convenience to us. It sort of gums up our retail place of business if we have trucks coming in during the day. It is much better if we have just one or two deliveries a day instead of several coming in for various types of shipments.

Q. In other words, the delivery from a number of carriers may interfere with your own activities and your retailing?

A. Yes. We have rather small alleys and it gums up our

alleys to have quite a few semis coming in and our customers object to that.

Q. Now, Mr. Denniston, would the entire elimination or the substantial reduction in the quantity of the Rock Island Motor Transit Company service to your company at these points of Newton, Colfax, Mitchellville, Altoona affect your business in any way?

A. Well, I think it would reduce our service somewhat because we have found that we have received quicker shipments from Rock Island Motor than we have from several of the other transportation companies.

Q. Let me ask you, you referred to the fact that most of [fol. 1004] your shipments inbound to your retail yards were made direct from the point of origin to the point of destination except where you had a carload shipments that was billed to Newton and then distributed out. How does the service at points like Colfax, Mitchellville, and Altoona, as you have observed it, compare with the Rock Island Motor Transit that is available at Newton?

A. I don't quite get that question.

Q. Well, the question is this. We have been talking principally about the service into Newton.

A. That's right.

Q. Do you have occasion to use Rock Island Motor Transit service to Colfax, Mitchellville, and Altoona also?

A. Yes; we do, quite often.

Q. And the statements that you have made with respect to service of the Rock Island Motor Transit, would that be equally true except for the presence of the full-time agent to the points of Colfax, Mitchellville, and Altoona?

A. Yes; it would, and that is one thing I might mention about carload shipments being broken up. We do receive truckloads of paint, break those up as well and distribute them to other points.

Q. And distribute those on by motor carrier?

A. Sometimes we do by motor carrier and sometimes the trucks come to Newton and call for them.

Q. Are you familiar with the service of other trucking [fol. 1005] companies to points like Colfax, Mitchellville, and Altoona?

A. I don't believe many other truck lines go into those

towns unless it is an occasional drop shipment, and that I can't say for sure.

Q. Have you had the experience of having small shipments from some point outside the State—by small shipments I mean 5 or 6 hundred pounds or less—to Colfax, Mitchellville, and Altoona?

A. Yes; we have received those type of shipments right along.

Q. What is the fact as to whether some of these other carriers render that service to these intermediate points?

A. I don't believe they do unless on certain occasions. They might drop off, if there is a quantity amount.

Q. In other words, the Rock Island Motor Transit service to these points is available on substantially the same basis as it is to Newton?

A. That is correct.

Q. And some of the other carriers will serve Newton but don't serve the other points that I have reference to——

A. That is right.

Q. —on the same basis.

Mr. Howland: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, on your interstate shipments of mill work that have exceeded 5,000 pounds in the last few months, inasmuch as the Rock Island can't handle [fol. 1006] them you have turned that business over to other carriers?

A. Yes; they have on certain occasions.

Q. Now, your truckloads of paint, who handled those for you, some other carrier?

A. We have had Iowa Nebraska bring those in and Des Moines Transportation has also made some of those deliveries.

Q. With respect to Newton, does the railroad maintain an agent at Newton?

A. Yes; they do.

Q. And have a freight dock, a railroad freight dock, there?

A. Yes; they do.

Q. Does the Rock Island Motor Transit have an agent there, too?

A. Yes.

Q. And their dock is at the railroad depot?

A. At the west end.

Q. Yes, but it is the same building?

A. Yes; it is.

Q. The pickup-and-delivery truck that furnishes your store or your place of business at Newton the rail-billed freight as well as the motor carrier-billed freight is handled at the same time?

A. That is right.

Q. So that on your incoming freight, irrespective of whether it is rail-billed or motor carrier-billed, it is delivered to you by the same delivery truck?

[fol. 1007] A. Yes; it is.

Q. Now, do you know what the situation is at Colfax? Does the Rock Island railroad have an agent at Colfax?

A. Yes; they do.

Q. And when you are wanting to negotiate at Colfax for Rock Island Motor Transit service, do you call the Rock Island railroad man?

A. I am not familiar on that. I couldn't answer.

Q. The Rock Island Motor Transit doesn't maintain any regular terminal at Colfax?

A. No; not to my knowledge.

Q. Are you familiar with the situation at Mitchellville? Do they have a regular terminal at Mitchellville?

A. They have an agent there.

Q. Do you contact that agent for your Rock Island Motor Transit shipments?

A. I am not just too familiar with the local situation. The local manager does that.

Q. At Altoona, do they have an agent there?

A. Yes; they do.

Q. Are you familiar with that situation?

A. No; I am not. I am not familiar with that.

Q. Is Van Meter located on the Rock Island railroad?

A. Yes; it is.

Q. Are you familiar with the situation there?

[fol. 1008] A. I am not.

Q. As I understand it, you use Rock Island Motor Transit Company motor carrier service extensively?

A. We do.

Q. And you have found it to be very excellent service?

A. Yes; we have.

Q. And you also use the services of other carriers which serve these points?

A. They have made deliveries to us; yes.

Q. You are speaking now of the Des Moines Transportation Company and the Iowa-Nebraska Transportation Company and others that serve those towns?

A. Yes. They work through a merchant's motor freight, or I should say merchant's transfer company at Newton.

Q. In other words, the carriers have a cartage agent there at Newton?

A. That is right.

Q. On your truckload shipments and shipments in excess of 5,000 pounds, you have used the other carriers since this restriction went on?

A. That is right.

Q. And as far as your outgoing shipments are concerned, you have very little need for public transportation?

A. It is a small amount.

Q. And very frequently you buy a rail carload of paint [fol. 1009] and similar commodities and then you distribute them to your various places of business by your own transportation?

A. Well, I would want to correct that a little. We buy very little paint in carloads. We do buy millwork in carloads, but paint comes in truckloads as a rule.

Q. When you buy a big volume, then you redistribute to your various yards by your own truck?

A. Largely by our own trucks.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect. You are excused.

(Witness excused.)

F. A. DUNN was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, please?

A. F. A. Dunn, Dunlap Manufacturing Company, Newton, Iowa.

Q. What is your position with the company?

A. President.

Q. What products or commodities does your company manufacture?

A. Advertising specialties, name plates, decals, and things of that type.

Q. What material do you use in that process?

A. Oh, steel, glass, wood, paper, paint.

Q. And from what sources do you get supplies for such work?

[fol. 1010] A. Oh, from all over the eastern part of the country, Chicago, New York, Boston, Philadelphia, Vincennes, Ind.

Q. What transportation agencies do you use in bringing that merchandise into your plant for processing?

A. Ordinarily two, Rock Island Motor and Western Transportation.

Q. Do you have any carload business coming in?

A. We try to stay away from carload. It is mostly truckload.

Q. Do you have any inbound shipments of less-than-truckload quantities?

A. Yes.

Q. What transportation agency have you used to get that in?

A. Both Western and Rock Island.

Q. How long have you been using the Rock Island Motor Transit Company?

A. Ever since it was started.

Q. You say you have been using Western Transportation Company?

A. Yes.

Q. Is that a regular service that you get from them?

A. Yes.

Q. And is there any difference in the type of service or the points served by the Rock Island Motor Transit as compared with the Western Transportation Company?

A. I think that every transportation company that hits Newton has hauled material for us. There are about eight of them as near as I can remember.

[fol. 1011] Exam. Carpenter: Read the question.

(Question read.)

A. The Western and Rock Island both come out of Chicago, and that is where we are interested in mostly, is from Chicago to Newton. Does that answer it?

By Mr. Nolan:

Q. Do you specify——

Exam. Carpenter: Let counsel bring it out.

By Mr. Nolan:

Q. Do you get anything from the west or southwest, Kansas City or the north?

A. We get out of Kansas City. Nothing from the west to speak of. Once in a while a small shipment from California of paint or something of that kind.

Q. How about Kansas City, how does that merchandise move in?

A. It moves Rock Island.

Q. Do you get anything out of the Twin-City gateway?

A. Yes; we get material from the Twin Cities.

Q. How does that come in?

A. Mostly Rock Island.

Q. Do you specify the Rock Island Motor Transit and the Western Transportation Company, or do you leave it an open routing?

A. We specify wherever possible either the Rock Island Motor or Western.

Q. Does it make any difference in the size of shipment as between the two carriers?

A. Here lately, yes.

[fol. 1012] Q. As to which one you specify?

A. Yes.

Q. Why is that?

A. Well, for instance, we get a lot of glasses from Vincennes, Ind. That is taken to Chicago by Hancock truck and then is turned over to another trucking company, and those shipments weigh 22,500 and Western has been bringing that in lately until about a week ago when another company got the business.

Q. You had it specified Western?

A. We always have, but this time they forgot to specify.

Q. Now, in the event that the Rock Island Motor Transit could haul those volume shipments, would the freight be available to them?

A. They would get their share of it; yes.

Q. How about your outbound shipments; what do you have in that respect?

A. Ours are mostly l. c. l. shipments ranging from a minimum up to 2,500 pounds, and those are shipped all over the United States.

Q. What company or companies primarily handle that traffic?

A. That all has to be routed and the Rock Island is checked first. If they can't handle it, then they will try other trucking firms until we find the one that can reach the destination.

Q. Now, does the Rock Island Motor Transit Company offer any facilities of service at Newton that no other trans-[fol. 1013] portation company offers in the way of a local agent, local terminal facilities?

A. They have always been very active in giving us good service, and that has been the main reason why we have been interested in giving them the business.

Q. Do I understand you to say that wherever Rock Island Motor Transit can handle the outbound traffic, you specify that service?

A. Yes.

Q. And if they can't handle it, you then get the next facility, is that correct?

A. That is correct.

Q. What effect would it have upon your business if the Rock Island Motor Transit Company either ceased to do business or materially curtailed its operations in and out of Newton?

A. Regardless of what happens, I think the world still goes on, but it would be more inconvenient to operate that way.

Q. State whether or not your company has developed and expanded its business in reliance upon the service the Rock Island Motor Transit Company had been performing in and out of Newton.

A. There is only one concern in Newton that has a person there all the time you can get information from. There is only one office, and that is Rock Island Motor Transit where you get your information. The rest of them all operate through a merchant's transfer, and when you call [fol. 1014] them up for information they have got to call the Chicago office or the Des Moines office and relay that information, which takes time.

Q. But the point I was trying to develop, has your business been developing in recent years?

A. Yes.

Q. State whether or not part of that development has been due to the transportation facilities that you had at Newton.

A. I think so.

Q. Including the service of the Rock Island Motor Transit Company?

A. I think so.

Q. With what frequency do you have outbound shipments, Mr. Dunn?

A. Every day of the week.

Q. They range all the way from small shipments of a hundred pounds up to several thousand, is that correct?

A. That is right.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. I think you said your outbound shipments are very rarely over 2,500 pounds?

A. Yes.

Mr. Fowler: That is all. Thanks.

Mr. Nolan: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

[fol. 1015] GLENN ENGLE was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation?

A. Glenn Engle, traffic manager for Winpower Manufacturing Company.

Q. Will you tell us what your company manufactures?

A. Gas tractor driven, wind driven generators, and a complete line of specialized agricultural implements.

Q. What are these generators used for?

A. These are generators that go in hospitals, various organizations, as stand-by units when power fails or actually some of them move into communities where there is no electric service.

Q. Then is it fair to say that these generators are the electricity generators of a portable type?

A. That is right.

Q. Such as many farmers had before rural electrification was available?

A. That is right.

Q. You say they are either gas driven, wind driven or——

A. Tractor driven.

wouldn't use the Rock Island Motor Transit service on rail billing. Now, I believe you stated that reason previously on direct examination, why you wouldn't. Would you tell us what the reasons are that you wouldn't use that service?

A. Well, of course, Rock Island rail doesn't have a rail connection with M&StL in Newton. We are located on the M&StL tracks there and also we lease part of our building space from them, and it is just an honor among gentlemen that we give them as much freight as we can.

Q. In other words, if you have any rail freight going, you would give it to the M&StL, is that right?

A. That is right.

Q. But where you don't have to ship by rail, you ship by the Rock Island Motor Transit or some other carrier that is available?

A. That is right.

Q. Now, insofar as the quality of the service given by the Rock Island Motor Transit on rail billing, have you [fol. 1037] looked into that or had any experience with it as to whether that would cause you to hesitate or refuse to give any Rock Island freight to the Motor Transit Company on rail billing?

A. Yes; we have because in attempting to trace a shipment that has gone under rail billing, it practically loses identity between terminals. When a customer has ordered a rotary cultivator or post-hole digger, he wants to know whether he is going to get it tomorrow or 6 weeks from now.

Q. From your experience with both the Rock Island Motor Transit handling rail freight on rail billing and with the M&StL handling rail freight on motor truck, would you say from your experience and from the welfare of your company that a shipment moving on rail billing by motor truck is a satisfactory or not a satisfactory service?

A. No; I think a shipment, whenever it gets over onto a rail billing, you are really penalized because the rail side of it doesn't have the interest in moving that shipment as fast as the motor truck freight.

Q. State whether or not from your experience they have the facilities to expedite the shipment as a motor freight shipment?

A. No; I don't believe they do.

Q. You weren't here the other day when Mr. Hitchens testified as to the various ramifications and things of that character that enter into a rail shipment by motor truck on a rail billing?

[fol. 1038] A. No; I wasn't.

Q. Just one other question. You say that you had a truckload of tires come out you found later by Western Transportation Company. Did that come out from some point east of Iowa?

A. Came out of Akron.

Q. Akron, Ohio?

A. That's right.

Q. Do I take from your answer there that although it was on Western Transportation Company billing it moved by some other carrier?

A. It moved out by cattle truck and I believe the fellow lived up near Sioux City.

Q. Did you have some difficulty in tracing the shipment?

A. Well, the thing that happened, these tires came into Chicago and they came in on a line that didn't want to interline with this carrier so they took and threw all those tires out and threw them into this stock truck. The stock truck hadn't been steamed and cleaned according to regulations and—well, it was hard to tell whether there was more fertilizer or tires when we got them, and we were about a week catching up on that billing because, for some reason or other, the goods got ahead of the billing.

Q. But you say it eventually came on Western Transportation Company billing?

A. Western produced the bills for it.

[fol. 1039] Q. Now, in regard to this steel, you say that ordinarily moves in by one of these livestock haulers?

A. That is right.

Q. On a return load from Chicago?

A. That is right.

Q. What is the fact as to whether or not that livestock hauler may live in the immediate vicinity of Newton or he may live many miles away so far as tracing the party who actually hauled it——

A. That is right.

Q. Tractor driven. You said you also manufacture specialized farm items?

A. That is right.

[fol. 1016] Q. Will you briefly tell us what those are?

A. They consist of post-hole diggers, farm wagons—those are trailers—fertilizer distributors, windrowers, wagon boxes both steel and wood now. That is about all.

Q. Now, in making these generators, do you also provide the power unit such as the gas motor or the——

A. On some of them; yes.

Q. —windcharger on the wind driven?

A. No; that is a competitor.

Q. What are the sources of supply that you use in the manufacture of these different products?

A. Steel is the principal item. Some copper and a little wood.

Q. Do you use any already processed or fabricated articles that go into these products?

A. We get a few forgings. We have castings that are made locally.

Q. Where are your forgings made?

A. Most of them in St. Paul.

Q. Your steel, where does that come from?

A. Greater percent of that will come out of the Chicago area.

Q. How has this steel been moving into your place of business from Chicago?

A. Generally on motor freight.

Q. And what size would an ordinary steel shipment be that you get from the Chicago area?

[fol. 1017] A. That is pretty hard to say because we take mill run and get whatever is available. Sometimes that will be merely a few hundred pounds and sometimes it will be a carload.

Q. Do you have some shipments come in in carload lots by rail?

A. Yes; we do. That is right.

Q. But the majority you say come in by truck?

A. That is right.

Q. Truckload or less-truckload, is that correct?

A. That is right.

Q. Now, prior to any curtailment on the operation of the Rock Island Motor Transit, state whether or not you used the services of the Rock Island Motor Transit Company for the bringing in of steel in various quantities, less-than-truckload to truckload quantities.

A. I think it was well over 90 percent they moved in for us.

Q. State whether or not during that period of time you specified Rock Island Motor Transit as a carrier for such service.

A. We have always routed Rock Island Motor Transit.

Q. Why have you done that?

A. Well, if they could bring us in a trailer load of steel, lots of times we could load that trailer back out with farm machinery and that has been a definite advantage to us.

Q. How about the caliber of service of the Rock Island Motor Transit on different size shipments from the Chicago area as compared with other transportation companies serving Newton?

[fol. 1018] A. When a shipment left Chicago, we could always contact Chicago and know where that shipment was with respect to the road, whether it was in Rock Island, whether we were going to get it in the next couple of hours or whatever that service was.

Q. Have you had any experience with other transportation companies in that respect?

A. Yes; we have.

Q. What has been the caliber of the service of the other trucking companies as compared with the service provided by the Rock Island Motor Transit Company for these operations out of the Chicago area to Newton?

A. It has been very poor.

Q. How about your shipments from St. Paul on these forgings you spoke about; what company has handled those shipments?

A. Rock Island Motor has brought those in, but ironically enough, forgings have become so hard to get in the last couple of years you scarcely ever get a shipment that would be over 5,000 pounds.

Q. Who has been handling those shipments in whatever quantities you get them?

A. Rock Island Motor Transit has been bringing those in.

Q. From Minneapolis?

A. St. Paul.

Q. Has that service been reasonably satisfactory?

A. Yes; it has.

[fol. 1019] Q. Now, what are the size of your outbound shipments and where are they ordinarily destined?

A. We ship to practically all 48 States. In the wintertime, the generators go east over into that electrified area, that is, the stand-by units. Then about the beginning of the year the shipments start to increase on agricultural implements, these dealers adding to their inventory, increasing their inventory, and it is pretty hard to say just what area gets the most of those.

Q. You no doubt have shipments within the State of Iowa?

A. That is right.

Q. And what percentage would you say of your outbound shipments are shipments destined to out-of-State points?

A. Well, the shipments we turn to the common carriers I would say are 60 percent of our total shipments. By that I mean a lot of these dealers in Iowa come in after their own equipment.

Q. I am saying now that the shipments that you make, what percent is for out-of-State points as compared to your total shipments?

A. About 60 percent.

Q. And what would you say the size of those outbound shipments are ordinarily?

A. Well, that is pretty hard to say because one shipment may run a couple of hundred pounds today. Maybe next week it will run 10,000 pounds.

Q. With what regularity do you make those outbound [fol. 1020] shipments? Is it a daily thing or is it only periodical?

A. No; it is quite consistent. We had 1,345 shipments alone out of our place—that is, outbound—in 1950 by way of Rock Island Motor Transit.

Q. What percent of the total shipments would you say that was?

A. That was, I think, 92 percent.

Q. What would you say as to the number of shipments in 1951 as compared to 1950? Do you have any data on that?

A. Because of the restrictions, we had to drop that down to 838.

Q. That was your weight limitation?

A. That is right.

Q. And then what would you say would be the number of shipments you have this year?

A. It is well over 200 right at the present time.

Q. That is by Rock Island Motor Transit?

A. That's right.

Q. Do you make specification on your outbound shipments in regard to the carrier who shall handle them?

A. On the outbound?

Q. Yes; or do you let the first fellow there pick them up?

A. Oh, no. We definitely route those.

Q. With what company?

A. Rock Island Motor Transit whenever we can.

Q. Why?

A. It eliminates three or four trucks back there at the [fol. 1021] back end when everybody is in a hurry to go home, and we know that they are going to get out and are going to be handled right.

Q. Have you had any experience with other transportation companies serving Newton on outbound shipments in regard to the quality of service that these companies have given in comparison with the service given by the Rock Island Motor Transit Company?

A. Yes; we have. We have an item that is rated third class. It is pretty hard to get some of these carriers to haul third class when they can haul first class.

Q. Have you had shipments refused by some of these carriers on outbound shipments for that reason?

A. No; but we have had some that have been prolonged an awful long time down on their dock.

Q. Dock where, in Newton?

A. No; in Kansas City and instances like that.

Q. Have you ever experienced that with the Rock Island Motor Transit Company?

A. No, sir. They have never turned us down.

Q. State whether or not the Rock Island Motor Transit Company handles a low-rated commodity with the same expediency and expeditiousness as they do the so-called higher-rated commodity.

A. I don't think they pay any attention to that.

Q. Now, does the Rock Island Motor Transit service provide any service in Newton in regard to terminal agent, pickup-and-delivery service, dock, rate and information, [fol. 1022] and so forth, that the other motor carriers do not provide?

A. They are the only company operating in and out of Newton that thinks enough of the town to provide their own rate and on dock service.

Q. You say the Rock Island Motor Transit is the only one that provides that service?

A. That is right.

Q. Is that any convenience to your company to have that service available?

A. Well, just for example, Friday we had a customer that had to know the rate on a certain item over in Illinois. If he hadn't known what that was going to cost him, he never would have bought the product. That is just one instance alone.

Q. Was that some customer that lived in Illinois?

A. That is right.

Q. What size item was that?

A. I think it was 1,040 pounds.

Q. Where did you get that information?

A. From the Rock Island Motor agent, rate clerk.

Q. Now, is the Rock Island Motor Transit agent in Newton separate and apart from the Rock Island railroad agent there?

A. Very much so.

Q. Do you ship anything by Rock Island Motor Transit on rail billing?

A. No; not that we can get away from.

[fol. 1023] Q. Why is that?

A. Because we lease property from the M&StL and it just wouldn't be good business.

Q. That is the major reason, is it?

A. Yes.

Q. Have you had any experience in regard to the time of delivery of freight moving out on rail billing as compared with freight moving out on motor transit billing with the Rock Island?

A. You mean Rock Island rail billing?

Q. Yes; but where it might be moved out on Rock Island Motor Transit but on rail billing; have you had any experience with that?

A. Some pretty sad experiences.

Q. Would you say that if the Rock Island Motor Transit was restricted only to handling rail-billed freight, would that service be satisfactory?

A. No.

Q. Why not?

A. Well, because of this restriction that is on, we have put on trucks of our own temporarily to get some of these 7, 8, and 9-thousand-pound shipments out.

Q. That doesn't quite answer the question. Would freight moving out of your place on rail billing but handled by the Rock Island Motor Transit part of the way be a satisfactory service?

A. No; I don't believe so. You still have that rail element [fol. 1024] in there.

Q. You don't like that?

A. That is right.

Q. Have you ever been solicited by the Rock Island Motor Transit agent for rail freight?

A. No, sir.

Q. Or by the Rock Island railroad agent for Motor Transit freight?

A. No, sir.

Q. Now, what would be the effect upon your company's business if the Rock Island Motor Transit Company's services were terminated or materially restricted or restricted as they are today?

A. It would probably affect us in two ways. We will have to put on another truck, and we are going to have to recom-

mend as many of these dealers come in after their own equipment as possibly can.

Q. By the way, what is the volume of business done by your company there at Newton in the course of a year's time, if you care to state?

A. I would rather not give it to you dollar-wise, but I can give you the poundage that we gave to Rock Island Motor in 1950 alone.

Q. All right.

A. That was 1,048,707 pounds outbound.

Q. Do you have any figures on the inbound?

[fol. 1025] A. The inbound for the same year was 249,772 pounds on 336 bills.

Q. How many employees does your company engage?

A. It was 132 on the time clock this morning.

Q. State whether or not your company has developed and improved its business over the years in Newton or, in other words, are you a growing company? Have you grown during the past several years?

A. Here are some figures taken from the 1951 audit made by Wolfe and Company. We had an increase of 356 percent over 1950?

Q. That is 1951?

A. That is right.

Q. How many years has your company been in business in Newton?

A. 25 years.

Q. Has that business developed and grown throughout the years?

A. That is right.

Q. State whether or not in the development of that business the Rock Island Motor Transit Company has been an important factor in the service it has given.

A. There were years I can think of in the 17 that I have been in this traffic end of it that practically no one but Rock Island Motor Transit called on us; that is, gave us service either inbound or outbound.

Q. Now, does any company provide facilities at Newton for the tracing of shipments that may have wandered away or gone astray?

A. No; none that thinks that much of the business given them, I guess.

[fol. 1026] Q. State whether or not an agency available for a shipper which provides a claim service and tracing service and rate service is reasonably essential to the proper handling of the outbound shipments of the company such as yours.

A. We would have to set up our own set of tariffs both in motor and rail if it wasn't for the facilities that are provided to us by the Rock Island Motor.

Q. Do you use the Rock Island Motor rate facilities even though you may have to ship by some other company?

A. Yes; we do.

Q. Do you pay them anything for that other than the other business you give them?

A. It is worth something to know you can get that rate.

Q. But I say you don't pay them anything for that information?

A. Absolutely not.

Q. Isn't it true, Mr. Engle, that where you have a community where there is manufacturing such as conducted by your company that unless you have some agency that has tariffs available, rates available, that you would have to have your own department with all that information?

A. That is right. We would have to maintain one of our own.

Q. Would that cost a considerable sum of money to do that?

A. Yes; it would.

Q. Now, have you had any experience on claims with other trucking company?

[fol. 1027] A. Yes; we have had some pretty sad experiences.

Q. How about your claim experience with the Rock Island Motor Transit?

A. It has been very satisfactory.

Q. You do have claims against the Rock Island Motor Transit, do you not?

A. We have had. It is only natural.

Q. And have you at the present time any claims outstanding that have extended for some period of time with any other trucking company?

A. No; not now.

Q. You have got them all cleaned up, have you?

A. That is right.

Mr. Nolan: You may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. You are the head of the traffic department?

A. That's right.

Q. I presume you have available to you in your office the various published tariffs of all the motor carriers as well as all the railroads?

A. No, sir.

Q. You don't maintain any tariff file in your office?

A. Only very meager.

[fol. 1028] Q. There are such publications available?

A. That is right.

Q. And I assume you know how to read them?

A. That is right.

Q. Now, on your inbound steel in volume, how many shipments have you had from the Chicago steel district to Newton since the first of the year in excess of 5,000 pounds?

A. I couldn't give you a definite figure on that.

Q. Give me an estimate.

A. I would say 20.

Q. And were any of those handled by rail shipment?

A. I think there have been five or six.

Q. Were any of them handled by the Rock Island Motor Transit?

A. Not over 5,000; no, sir.

Q. By what other carriers were they handled?

A. Some of them came in under a Snathorst billing on a bull hauler.

Q. By Snathorst you are talking about the Snathorst Truck Line?

A. Of Marshalltown.

Q. All right, go ahead.

A. There has been one or two that came in by P. and W.

Q. P. and W. Truck Line from Albia, Iowa?

A. That is right.

Q. Were there any others?

A. There was some that came in on a Western billing.

[fol. 1029] Q. You are talking about the Western Freight Line now?

A. Western Transportation.

Q. Western Transportation Company.

A. And they came in with bull haulers or stock haulers.

Q. So your steel since the first of the year has been handled either on rail car or has been handled by P. and W., Snathorst Truck Line, or Western Transportation Company?

A. That is right.

Q. Now, have you had any other inbound shipments of any volume since the first of the year other than the steel?

A. Yes. We had a truckload of tires for the fertilizer distributors.

Q. Who handled those for you?

A. It took us about a week to find out, but it finally ended up coming under Western billing.

Q. Western Transportation Company?

A. Western Transportation Company.

Q. I assume you are a hundred-percent booster for the Rock Island railroad and its subsidiary?

A. No.

Q. You are very proud of their service?

A. Rock Island Motor Transit, that is right.

Q. You are a hundred-percent booster for the Rock Island Motor Transit, are you?

A. That is right.

[fol. 1030] Q. Since this restriction came in effect, have you given the business that the Rock Island Motor Transit couldn't handle to these other carriers?

A. That is right.

Q. You preferred to do that rather than to have it handled on rail billing by the Rock Island Motor Transit Company?

A. By Rock Island Motor Transit?

Q. That is right.

A. Well, Rock Island Motor Transit couldn't handle those we have given to these other carriers.

Q. All right, you are aware, are you not, that the Rock

Island Motor Transit has authority to transport rail freight on trucks?

A. That is right, but we are not located on the Rock Island——

Q. Just a minute. If it goes by rail billing——

A. That is right.

Q. Now, you take a point like St. Paul, for instance. You understand that the Rock Island railroad can handle a 20,000-pound shipment for you on truck on rail billing between St. Paul and Newton, Iowa?

A. That is right.

Q. You understand that?

A. Yes; that is right.

Q. You understand that they can handle 20,000-pound shipments by truck from Kansas City to Newton, Iowa?

A. That is right.

[fol. 1031] Q. If it is handled on rail billing?

A. That is right.

Q. You understand that. They can handle steel for you from Chicago to Newton on rail billing and transport it by truck; you are aware of that.

A. That is right.

Q. So with the existing restriction on Rock Island Motor Transit volume shipments, you have preferred to give this business to other common carriers rather than to have it handled by the Rock Island Motor Transit on Rock Island railroad billing?

A. That is right.

Q. All right. Now, you say you are located on land owned by the M&StL railroad?

A. That is right.

Q. Does the M&StL railroad have any truck facilities in Newton?

A. They supplement their rail service with motor carrier.

Q. Do you use M&StL truck service?

A. We never checked to see what shipments go out.

Q. Do you or do you not use the services of the M&StL railroad?

A. We don't know whether it is used on our shipments or not because it is merely supplemental to the rail service.

Q. Well, what is the difference between the M&StL service and the Rock Island service?

A. I believe the charter was granted for operation simply as supplementary shipments or service to the shipments that were billed M&StL.

[fol. 1032] Q. Are you familiar with the permanent authority the Rock Island Motor Transit has?

A. Yes, sir.

Q. You are aware that that is supplemental and auxiliary truck service, too, aren't you?

A. Yes.

Q. And you know that this hearing is to take off those restrictions?

A. Yes, sir.

Q. You are aware of that?

A. That is right.

Q. You mentioned the situation where the Rock Island Motor Transit would handle a truckload of steel for you from Chicago to Newton, and I presume they deliver it to your place of business on the over-the-road truck?

A. That is right.

Q. And then you said that the thing you liked about it was you could turn around and reload that truck with farm equipment?

A. That is right.

Q. You can't do that with any other carrier that serves you?

A. That is right.

Q. Now, with respect to pickup-and-delivery service, as I understand it, the pickup-and-delivery service in Newton is performed by the Rock Island Motor Transit both for its freight as well as that of the Rock Island railroad?

[fol. 1033] A. That is right.

Q. So you have a pickup truck call at your place of business and you deliver to them the rail-billed freight as well as the motor carrier-billed freight?

A. That is right.

Q. And the same thing is true with regard to delivery?

A. That is right.

Q. Does the Rock Island Motor Transit maintain a solicitor at Newton or does Mr. Morrison do all the soliciting?

A. Mr. Fisher and Mr. Morrison.

Q. Mr. Morrison and Mr. Fisher. Mr. Fisher lives in Des Moines?

A. That is right.

Q. And does the Rock Island railroad have a solicitor at Newton?

A. Well, they put one in there about once a month.

Q. Who calls on you as a representative of the railroad?

A. Oh, there is Mr. Lee of the Des Moines office and Mr. Riggs out of the Chicago office.

Q. How does this key-point restriction affect your company?

A. Well——

Q. Take a typical shipment and tell me how it affects it.

A. Supposing we were to put a 10,000-pound shipment over to some point in Illinois that they have previously served. We are unable to do that at the present time because of this restriction.

Q. Well, you could still do it on rail billing, couldn't you?

[fol. 1034] A. We wouldn't; no.

Q. That isn't what I asked you. You could, couldn't you?

A. Possibly; yes.

Q. In other words, this truckload of steel that the Rock Island Motor Transit brought in to your place of business at Newton, you could turn around and reload that with freight in excess of 5,000 pounds on rail billing going back to Illinois, couldn't you?

A. Yes; but we wouldn't.

Q. You could, couldn't you?

A. That is right.

Q. Have you ever had a volume shipment that has been handled by truck on rail billing?

A. No, sir.

Q. But you understand they could handle it that way?

A. That is right.

Q. Do you use the M&StL service to St. Paul or do you use the Rock Island railroad service to St. Paul?

A. I can't think of any time we have used Rock Island to St. Paul, Rock Island rail.

Q. Do you use Rock Island Motor Transit to St. Paul?

A. We do.

Q. Do you use the M&StL coordinated rail service between Newton and St. Paul?

A. We do.

[fol. 1035] Q. Has that service been satisfactory?

A. The M&StL service? Not too satisfactory; no.

Q. Has it been adequate?

A. No.

Q. Has the service of the Rock Island Motor Transit been adequate?

A. Yes, sir.

Q. Is that because of their superior service?

A. That is right.

Mr. Fowler: I think that is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Mr. Engle, when you say that the Rock Island Motor Transit service has been adequate between the Twin Cities, St. Paul and Minneapolis, and Newton, do you refer to the service prior to the restriction or the service at the present time?

A. Both previous to the restrictions and at the present time.

Q. Is the service adequate with the restriction on?

A. No; it isn't.

Q. But the service which they have given you has been satisfactory?

A. That is right.

Q. And adequate after you take into consideration the restrictions in regard to size of shipment, is that right?

A. That is right. These restrictions have worked a defi-

[fol. 1036] nite hardship on us in that we have had to make smaller shipments and more frequent.

Q. In other words, you have broken your shipments down to smaller shipments so you could use the facilities of the Rock Island Motor Transit, is that true?

A. That is right.

Q. Now, you made a statement to Mr. Fowler you

Q. —or making claim or something like that, is that right?

A. That is right.

Mr. Nolan: That is all.

Re-cross-examination.

By Mr. Fowler:

Q. Let me get back here a minute. Let's talk about this shipment from Newton to St. Paul. If you put that on rail billing, it is handled by truck from Newton to St. Paul, is it?

A. On M&StL?

Q. No; on the Rock Island.

A. We have never had any like that.

Q. What is the difference in the physical transportation of the freight, whether it is on rail billing or on truck billing?

A. Well, if we make out a billing on a shipment to move motor, they aren't going to take that down and put on a rail billing.

[fol. 1040] Mr. Fowler: All right. Now, will you read the question to the gentleman?

(Question read.)

A. To us there probably wouldn't be any.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. State whether or not you have had experience that freight moving on rail billing, although it is handled apparently by the truck line, is as satisfactory service as where it is on motor billing.

Mr. Fowler: That is objected to as repetition and leading.

Exam. Carpenter: Go ahead and answer.

The Witness: Would you restate the question?

Exam. Carpenter: Read the question.

(Question read.)

A. No.

By Mr. Nolan:

Q. Why it is you don't know, is that right?
A. That is right.
Q. Why the service isn't satisfactory?
A. Yes.

By Mr. Fowler:

Q. That is the question I was going to ask. Now, why?
A. I don't know.

Mr. Fowler: You don't know why. That is all.
Exam. Carpenter: You are excused.

(Witness excused.)

[fol. 1041] Burr M. Jones was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, please?

A. Burr M. Jones, agent and commercial, Rock Island Motor Transit Company, Newton.

Q. How long have you lived at Newton, Mr. Jones?

A. 39 years.

Q. You are the local terminal manager or agent for the Rock Island Motor Transit, is that right?

A. Yes, sir.

Q. For the record, will you describe the facilities that the Rock Island Motor Transit Company has in the town of Newton?

A. Well, we have an office facility, dock facilities, pick-up-and-delivery trucks, extra trailers, tractors for delivering and picking up in the city, rate clerk, dock employees, drivers, city drivers. Does that answer it?

Q. Yes. Where do you have your dock facilities and your office facilities?

A. 500 West 4th Street North, Newton. It is the west end of the rail freight depot, we have our office and dock, an open dock.

Q. And you have part of the freight depot at Newton for your facilities?

[fol. 1042] A. That is right.

Q. And the railroad has the other part?

A. Partitioned off separately.

Q. Is that partitioned or merely a line?

A. No; that is partitioned.

Q. Are you in full charge of the operation of the Motor Transit Company there?

A. Yes, sir.

Q. Are you under the supervision of the rail agent in any way?

A. No, sir.

Q. Or is he under your supervision?

A. He runs his business, I run mine.

Q. You say you have been there 39 years?

A. That is right.

Q. What is the size of Newton? I don't believe we have got that in the record.

A. Around 18,000 now, I believe.

Q. 18,000?

A. Yes.

Q. Are there quite a few manufacturing companies there?

A. Yes.

Q. And some very substantial ones, is that correct?

A. That is right.

Q. Such as the Maytag Company?

A. That is right.

[fol. 1043] Q. Dunlap Manufacturing Company and Winpower Manufacturing Company, and so forth?

A. That is right; lots of them.

Q. Now, how many employees do you have there?
A. I have four at the present time.
Q. How many pickup-and-delivery trucks?
A. Three city delivery at present.
Q. Are there any other motor transportation companies which provide a local agent and office——
A. No, sir.
Q. —and pickup-and-delivery service in Newton?
A. No, sir.
Q. Now, are you familiar with the operations of freight billed on rail billing that moves out by motor truck?
A. Yes, sir.
Q. And by the way, does your company do the pickup and delivery for both the motor transit company and the railroad?
A. Yes, sir.
Q. Who does the billing for the railroad freight?
A. The rail office.
Q. And if you picked up rail freight, where do you take that freight?
A. We put it on the rail dock.
Q. Assume that you picked up rail freight for motor transportation, on rail billing, where would that be taken for billing?
[fol. 1044] A. It would be taken to the rail dock.
Q. Then your motor transit freight, that would be delivered to the motor transit company dock?
A. That is right.
Q. Do you do any soliciting for the railroad?
A. No, sir.
Q. Does the railroad agent do any soliciting for your company?
A. No, sir; not that I know of.
Q. By the way, you say you are the agent and commercial agent. You do the soliciting for business there?
A. That's right.
Q. State what is the fact whether or not you have had to refuse or turn down shipments on account of the present limitation?
A. Oh, yes; lots of straight loads out of the Maytag Company. I believe we had six that we could have got the

first 2 days we got the 5,000-pound restriction which we were handling into Chicago out of the Maytag Company alone, the two plants.

Q. How about if shipments are still tendered to you in excess of 5,000 pounds for motor transportation?

A. We get those.

Q. I assume that most of the industries there now know what your limitations are, do they not?

A. That is right.

Q. What is the fact as to whether or not you have tendered to you any shipments on rail billing to handle by motor truck.

[fol. 1045] A. No; they don't seem to go for that too much.

Q. Are you able to give us for the record here, a shipment that would be on rail billing that would move by motor truck from Newton to, say, some point over in Illinois, how would that be different than the same shipment moving on moter truck billing?

A. Well, the only trouble you run into on that would be getting into a transfer point where that is destined as far as we could take it and it might go on to a rail point south of Davenport some place we don't make, and then it would have to go back onto a dock and onto a car possibly to the destination. That is where it would slow it down, through the transfer more so than if we were going direct into destination with the truck.

Q. Assuming that you had a shipment originating at Newton moving on rail billing for, say, Rock Island, Ill. Would that shipment move as expeditiously as if the same shipment moved on motor truck billing?

A. It would go through on the same truck so far as the destination of Davenport.

Q. Does that same shipment not have to clear through your local agent here?

A. Has to be unloaded through the local rail agent before delivery is made.

Q. He has to do the billing?

A. Yes.

Q. How does that same shipment have to be delivered?

[fol. 1046] A. It is delivered to destination and definitely has to go back to the rail dock before delivery can be made and they bill it from the waybill.

Q. It has to be delivered from the rail dock?

A. That is right.

Q. Say you had a thousand-pound shipment from Newton to Rock Island, Ill., on rail billing. Could that shipment be picked up by one of your pickup trucks, loaded on a truck at Newton, and delivered to consignee at destination?

A. No, sir. It has to go through the rail desk. They have to check it on and off. They will check it back onto the city pickup before it is delivered. They won't allow us to deliver on a waybill. The bill must be expensed before delivery through the rail office.

Q. That is a rail freight bill?

A. That is right.

Q. Is that due to the different unions or different personnel——

A. That is right.

Q. —between the rail and motor transit?

A. They figure if we delivered it direct off the truck, they wouldn't need the dock men and of course the dock men fight for their jobs.

Q. So then, so far as what could be done isn't done in regard to going straight through to destination where you have a shipment on rail billing, is that right?

[fol. 1047] A. That is right. We might have a truck shipment going to the same place and the rail right behind it going to the same place, but our shipment could go right over on the truck, but that on the rail billing would have to be unloaded and delivered to the rail dock and wouldn't get there until the next day. That could happen.

Q. Is that one of the reasons why you don't have freight tendered to you on rail billing to handle by truck?

A. A certain amount of it, yes, on account of that service. They can get other truck lines probably and take it to the door the same as we do on our truck service since this 5,000-pound maximum.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Let's take the situation that Mr. Engle spoke about. He had a truckload of steel from the Chicago steel district to his factory at Newton, which was Rock Island Motor Transit. Now, let's assume you got this restriction on. He has got another truckload he wants to move back to Chicago. So if he is going to give it to you, he ha got to put it on rail billing. Pretty simple matter to call the rail agent up and tell him that that truckload of freight is out there and he would bill it without bringing it back and unloading it?

A. It would be a rare case that he would bill it without checking it.

[fol. 1048] Q. But you don't mean to tell me that he would bring it back and unload it?

A. I have seen them unload it before they would let us deliver it.

Q. A straight load?

A. No, but pretty good sized shipment. I would say if it is a straight load I have never seen it occur, but it could be.

Q. But physically it moves over the same truck to this check point on your line?

A. That is right.

Q. Irrespective of whether it is rail billed or motor truck billed?

A. That is right.

Q. Now, do you conduct any over-the-road operation out of Newton?

A. No, sir.

Q. Do you have any over-the-road service into Newton from the east?

A. We have our regular road truck coming through.

Q. Will you please describe what your over-the-road operation is?

A. Leave Chicago each night 7 to 9, I would say, approximately. Then they arrive at Newton from 7 to 9 the next morning. If they have too much, they will drop

[fol. 1049] the trailer, take an empty and go on. If they don't have too much, they will unload and we deliver on the city trucks.

Q. Does that same truck pick up at your Tri-City terminal for Newton?

A. No.

Q. What would be your service?

A. Tri Cities is the same. Davenport truck, if they have got a lot of Newton, they will load it in the nose. They may peddle that truck at Victor, Marengo, and Grinnell, and pick up an empty at Newton and come on to Des Moines and we hook onto that and deliver it.

Q. In other words, you could either hook onto that trailer with one of your power units and deliver it, couldn't you, from the over-the-road unit——

A. That is right.

Q. —or you could handle it through your pickup-and-delivery service?

A. That is right.

Q. And the operation would be the same irrespective of whether it was rail billing or motor carrier billing?

A. That is right, other than the rail now goes back to the rail dock, every bit of it. It is unloaded on the rail dock; that is right.

Q. Is that because of the conflict between the— In other words, the railroad labor unions aren't going to let the [fol. 1050] Rock Island Motor Transit fellows handle their dock work?

A. If we just drive in and deliver it on the waybill and come on down and let the men bill it, all they need is the clerk.

Q. But that is the reason you do maintain the two forces?

A. I imagine that is correct. I never inquired.

Q. In other words, the Rock Island railroad labor union doesn't want to see all their work taken away from them by the Rock Island Motor Transit, is that it?

A. That looks like it might be.

Q. If it weren't for that situation, all you would need at Newton would be a rail biller, wouldn't it?

A. That is possible. I never looked at it that way.

Q. Now, your service from the east into Newton. First,

I presume that points Des Moines-Newton intermediate are peddled out of Des Moines, is that correct?

A. Newton.

Q. Des Moines, Newton, and intermediate points are peddled out of Des Moines?

A. Well, of course I just have the Newton. They drop a trailer to me.

Q. What is the peddle service to points between Newton and Des Moines?

A. That is on another unit that goes as far as Colfax and returns.

Q. Then, as I understand it, the point——

[fol. 1051] Mr. Nolan: There will be a witness, I think, on that subject.

Mr. Fowler: All right.

By Mr. Nolan:

Q. You don't supervise any peddle service?

A. Other than my night truck leaving, stopping at Grinnell and Iowa City, to drop off, through to Chicago, what little I have on the back.

By Mr. Fowler:

Q. Does the Rock Island railroad have a merchandise car service into Newton?

A. From Burr Oak only; that is the same as Chicago.

Q. What time does that merchandise car arrive in Newton?

A. Well, that depends. Sometimes it might be 2 or 3 days before it gets there.

Q. You mean it isn't regular daily?

A. No.

Q. I presume the merchandise car moves in when it is loaded?

A. That is right.

Q. And when it arrives at Newton is the delivery service performed by the Rock Island Motor Transit?

A. Yes, sir.

Q. And it is taken from the merchandise car over to the rail dock?

A. That is right.

Q. And unloaded at the rail dock?

A. All segregated.

Q. Then what does the rail dock fellow do with it?

[fol. 1052] A. He puts it in the stall to each place. Each customer has got a name and he puts it in that stall, separates the shipments.

Q. Then do you go around an hour later and pick it up again and deliver it?

A. Back onto the pickups.

Q. Do you mean to tell me now—I am not questioning you—do you mean to tell me you take merchandise out of that merchandise rail car——

A. Yes.

Q. —haul it over to the rail dock?

A. It comes direct. We don't touch it. It isn't ours. It is rail. Rail unloads it and puts it on their dock. We come over as a contractor and take it uptown.

Q. Then you don't unload the merchandise car?

A. No; we don't touch it.

Q. The merchandise car pulls right into the freight dock?

A. That is right.

Q. And it is unloaded from the car directly across the rail dock?

A. That is checked into the depot.

Q. That is true of the merchandise car. Supposing you did have some rail freight that wasn't unloaded directly at rail docks. Would you perform the physical operation, unload it for the railroad company?

A. No, sir.

[fol. 1053] Q. In other words, the railroad company then unloads its own merchandise car?

A. That is right.

Q. Except that you perform the delivery service for them at the same time you are delivering your motor transit freight?

A. There are times we shift it. If we have got enough rail to keep that one truck busy, we leave him on rail.

Q. How many pickup-and-delivery trucks do you have in Newton?

A. We have two. Then I have two tractors so I could use two trailers if necessary.

Q. You maintain two pickup-and-delivery trucks and you maintain two extra power units which you use on trailers that are left there?

A. That is right. We have from four to five trailers on hand.

Q. The Maytag shipments you spoke about, what carrier finally handled them?

A. Western is getting most of them.

Q. Western Transportation?

A. Yes; because they are local. They have got trailers there available.

Q. Does the Western Transportation Company leave trailers there?

A. Yes.

Q. Do any of the other carriers do that?

A. Merchants occasionally have one.

Q. How about Des Moines Transportation?

[fol. 1054] A. Never seen any.

Q. But Western Transportation Company and Merchants Motor Freight do have trailers which they deposit at the Maytag dock?

A. No; they are set on a vacant lot and Merchant's Transfer handle them with their tractor for city.

Q. In other words, the cartage agent which I understand is the Merchant's Transfer Company at Newton——

A. Yes.

Q. I believe you said handle the business for most of the common carrier truck lines through there?

A. That is right.

Q. He has a power unit of his own?

A. That is right.

Q. And he will handle these other carriers' trailers back and forth between these larger shippers, is that correct?

A. Yes.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect. You are excused, sir.

(Witness excused.)

Exam. Carpenter: We will adjourn until 9:30 tomorrow morning in this same room.

(At 5 p. m., an adjournment was taken until 9:30 a. m. on Tuesday, March 25, 1952.)

[fol. 1055] TRANSCRIPT OF PROCEEDINGS OF MARCH 25, 1952

APPEARANCES: (Additional)

J. H. Martin, Attorney at Law, 500 Bankers Trust Building, Des Moines 9, Iowa, appearing for applicant.

[fol. 1055a] Exam. Carpenter: Go ahead.

Mr. Nolan: In connection with the testimony of the Witness Earl Mathews of Grinnell, Iowa, owner and operator of a drug store, who testified in this proceeding yesterday, March 24th, he was No. 70, in reference to a shipment handled by the Rock Island Motor Transit Company, from Chicago, Illinois, to his drug store at Grinnell, Iowa, during the month of January, 1952, the applicant offers as explanation of the weight of that shipment, when the witness testified that it weighed, as he recalled, around seven thousand pounds, a copy of the original freight bill, the same being Pro No. 44394 of the Rock Island Motor Transit Company, showing that the fact was said shipment was transported by the applicant company on the 31st day of January, 1952, from Chicago, Illinois, to Grinnell, Iowa, for said witness, weighed 4,716 pounds gross.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Nolan: A copy of said freight bill has been tendered to counsel for protestants for examination.

Mr. Bradshaw: Off the record.

Exam. Carpenter: Yes.

(Discussion off the record.)

Mr. Bradshaw: The copy of the freight bill so mentioned has been examined, and appears to be in order.

[fol. 1056] Mr. Nolan: Mr. Willenbrock, will you take the stand? We have got a short witness here.

LOUIS C. WILLENBROCK was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, please?

A. Louis C. Willenbrock, Mitchellville, Iowa.

Exam. Carpenter: L-o-u-i-s?

A. L-o-u-i-s.

By Mr. Nolan:

Q. Louis C?

A. Yes, sir.

Q. You live where, Mr. Willenbrock?

A. Mitchellville.

Q. Mitchellville. What is your business?

A. Implement dealer.

Q. And what line of implements do you handle?

A. The International.

Q. And you handle the full line of farm implements?

A. Yes, and trucks.

Q. And trucks. Now, how long have you been so engaged in that business?

A. Since 1945.

Q. And you understand, do you not, the nature of the application on hearing here today? That is an application [fol. 1057] by the Rock Island Motor Transit Company to reestablish the service it had before any restrictions or limitations were placed on its operations as a motor carrier.

A. Yes.

Q. Have you been using the service of the Rock Island Motor Transit Company since you have been in business in Mitchellville in 1945?

A. I have.

Q. And for what purpose have you been using that service?

A. For any shipments, for quick service, parts, farm equipment attachments.

Q. And from what territories or areas have you been receiving that service?

A. Chicago, Moline, Fort Dodge.

Q. I am talking about out of State points now.

A. Streator, Illinois, Morton, Illinois.

Q. And you have, do you have and have you had a more or less regular flow of traffic or commerce from those Illinois points that you mentioned, Chicago, Streator, Moline?

A. At different times.

Q. And Morton, too?

A. From time to time.

Q. And with what frequency would you say you have shipments coming into your business from out of State points?

A. Well, I would say two, three times a month on the big shipments.

[fol. 1058] Q. How about smaller shipments, parts?

A. Oh, parts, every couple of or three days, sometimes every day.

Q. Yes, and those shipments have been coming in by the Rock Island Motor Transit Company in the main?

A. That is right.

Q. And how about volume shipments or shipments of considerable size and weight, do you have any of those shipments?

A. Yes, I do have. Of course, tractors have been coming through on trucks now, but not by the Rock Island Motor Transit. They have a flat car, flat trucks.

Q. They come in on special hauls?

A. Yes, that is right. They come on special hauls.

Q. What shipments do you have that exceed say two thousand pounds that come in by Rock Island Motor Transit, or have come in by Rock Island Motor Transit?

A. Elevators, grain elevators.

Q. And do you buy those in quantities of two, three, four?

A. Yes, three and four inside elevators. Of course, maybe two at a time.

designated a rail billed shipment, but it is a small ship-
[fol. 1082] ment, and it moves out of Chicago on a motor transit company, but it is still a rail billing. Now, have you had any experience, do you know the physical movement of that shipment where it is a rail billed shipment but moves on a motor truck?

A. We use that type of service at times.

Q. And what has been your experience as to whether or not such a shipment that is billed on rail billing but moves by motor truck, whether that would move as expeditiously as a motor truck billed shipment?

A. We will take the Rock Island, for example. If you want to deal with the Wabash or Burlington, I can talk about that, too, but we will start with the Rock Island. That shipment is picked up today by the Rock Island Railroad's cartage. The same process takes place. The cartage company, perhaps, delivers it to them tomorrow. Therefore, at the Taylor Street station they bill the merchandise. They sort it and assemble it, and put it into a car, and it is dispatched to Burr Oak, which is a warehouse in the Chicago metropolitan district, at which point it is given to the motor truck. It is brought to Des Moines, Iowa, and instead of that shipment going direct to the consignee or consignor, whichever it might be, it must again go to the warehouse for sorting and billing, etc., and after that it is delivered by the Rock Island Motor Transit or the Rock Island Railroad's trucks. In that instance it is not unusual to have at least one week's service [fol. 1083] on a movement of that kind.

Q. And why that is, you only know it is, is that right?

A. No. No. It is because of the method of processing it. In other words, you have two operations. You have one by the railroad that must carry out its end by sorting and picking up, sorting and billing it and getting it ready to dispatch via the truck line; and the other when you get here, then the railroad still wants to maintain control of that traffic, and through those operations you lose, it is not unusual, four or five days. Another example we use to get to points on the Rock Island Railroad, which are not involved in this proceedings. We will dispatch

Q. Do they exceed, what do they weigh?

A. They will exceed two thousand pounds per elevator depending on the size and the length.

Q. And how about corn pickers and things of that nature?

[fol. 1059] A. Yes, we have those. They usually come in on rail.

Q. They come in already setup, do they?

A. No, they don't come in setup.

Q. Now, from your past experience with the Rock Island Motor Transit Company, state whether or not the service provided by that company to your place of business at Mitchellville for the shipments has been satisfactory or otherwise.

A. They have been very satisfactory.

Q. And state whether or not you need a continuation of the service that the Rock Island Motor Transit gave you prior to any limitation or curtailment of its service.

A. You mean do I need their service?

Q. Yes, the continuation of the service they gave you before there was any limitation or curtailment?

A. Yes, I do.

Q. Now, do you know of any carrier that provides a regular service for both small and big shipments to Mitchellville, Iowa, a daily service from these various points you have mentioned?

A. No, I don't.

Q. And have you had difficulty—well, withdraw that.

Q. Have you had experience with other carriers bringing merchandise in to you at various times not on a regular basis?

A. I have a few times, not very many. I think the Iowa-Nebraska come there a few times, not many times.

Q. Is that on a regular basis?

[fol. 1060] A. No, not on a regular basis.

Q. Do you specify the method by which your shipments come into Mitchellville?

A. I do whenever possible.

Q. And you specify the Rock Island Motor Transit?

A. I do.

Q. What effect would it have upon your business if the

merchandise out of Burlington by the Burlington Railroad through Des Moines, Iowa, for the Rock Island, but the transit company handles it. We do that in order to eliminate all of these delays; and I have in mind our service from Waterloo, Iowa, to Burlington, Iowa, of three weeks, average three weeks, one hundred sixty-four miles by railroad.

Q. And you are on a direct line of the Rock Island between Waterloo and Burlington?

A. That is right.

Q. That is the Minneapolis and St. Louis Line of the Rock Island?

A. That is right.

Mr. Nolan: I believe that is all, Mr. Partridge.

Exam. Carpenter: Cross-examine.

[fol. 1084] Cross-examination.

By Mr. Fowler:

Q. Is Burlington located on the Rock Island Railroad?

A. Yes, it is.

Q. And is that a north and south operation into St. Louis?

A. No, no. The Rock Island Railroad terminates at Burlington, Iowa, but they have joint arrangements with the Burlington Railroad into St. Louis. It operates as the Twin Zephyr passenger train from Burlington to St. Louis and St. Louis to Burlington, and from there to the Twin Cities would be the Rocket.

Q. Does the Rock Island presently serve Burlington, Iowa?

A. No, sir, and the reason it is not——

Q. I didn't ask you that. I asked you if they were.

A. No, sir. No, sir.

Q. Now, your interest in this seems to be shipments which move from Burlington to points located on U. S. Highway 6, particularly these smaller communities?

A. In this issue, in this proceeding.

Q. And these shipments become interstate in character by reason of their physical movement through Illinois?

Rock Island Motor Transit should be terminated or materially curtailed, the service it has been giving you?

Mr. Bradshaw: I have an objection to that.
Exam. Carpenter: That is off the record.

(Discussion off the record.)

A. Well, it would kind of hinder my business quite a little.

By Mr. Nolan:

Q. Do you know of any transportation company that would give you the same service you have been getting by the Rock Island Motor Transit?

A. I don't know for the simple reason the Rock Island Motor Transit comes in there every day, and if I have got anything to ship all I need to do is go there to the depot and tell the driver to stop. I have some parts I want to ship or to return.

Q. You have not only inbound shipments but back to the factory?

A. That is right.

Q. And how often do you have shipments outbound back to the factories?

A. I would say twice a week.

[fol. 1061] Q. And are those parts you send in to get repaired?

A. Parts to be repaired. Some broken and to be returned.

Q. Or new parts?

A. That is right.

Mr. Nolan: You may cross-examine.
Exam. Carpenter: Mr. Bradshaw.

Cross-examination.

By Mr. Bradshaw:

Q. Mr. Willenbrock, as I see this, on your shipments under two thousand pounds, they all come in by Rock Island Motor Transit? At least you specify Rock Island Motor Transit, is that right?

A. Yes, practically everything comes in by Rock Island Motor Transit.

Q. And on that type of shipment they are rendering a pretty satisfactory service so far as you are concerned?

A. Very good.

Q. But there is the Iowa-Nebraska that comes in once in a while on the same type of shipment?

A. Not too often. I don't think I have saw them there not over three times since I have been in business.

Q. But they have been to your place on these smaller shipments?

A. Yes.

Q. Now, on your tractors, where do they come from?

A. From Moline.

Q. And are they brought in by company trucks, or manu-
[fol. 1062] facturers' trucks.

A. Sometimes they come in by rail and sometimes they come in by trucks.

Q. But they get there all right?

A. That is right.

By Exam. Carpenter:

Q. Are they manufacturers' trucks or other trucks?

A. No, they are not manufacturers' trucks. You mean the International trucks? No.

By Mr. Bradshaw:

Q. Did you notice who brought them in?

A. No.

Q. You haven't paid any attention to that?

A. No, I haven't paid any attention to those.

Q. In other words, you haven't any problem in that respect. How about your elevators, who brings those in?

A. Well, sometimes the companies that manufacture the elevator if they have trucks available, they bring them in.

Q. And can the same thing be said as to tractors, you haven't had any trouble getting those in?

A. No, we haven't had any trouble getting tractors in.

Q. And I don't believe you mentioned any other heavy equipment, that is equipment over two thousand pounds, other than elevators and tractors?

A. Well, yes, I have other equipment coming in, different places, lime spreaders.

[fol. 1063] Q. What do they weigh?

A. Of course, they wouldn't exceed two thousand pounds.

Q. That is what I mean, over two thousand pounds. Now, you mentioned that you go to the depot and tell him to have the driver stop. Who do you mean by "him"?

A. The depot agent.

Q. Is that the rail depot agent?

A. That is right.

Q. Does the Rock Island Motor Transit keep a pick-up truck there in Mitchellville?

A. You mean a small truck? I don't know of any.

Q. A delivery truck that comes to your door.

A. I don't know of any.

Q. All of your dealings are direct with the station agent?

A. That is right.

Q. And when you mean to have somebody pick it up, it is the driver on the truck coming through?

A. Well, the driver on that truck usually comes through a certain time each morning, and we will watch for him and stop him if we have anything to ship.

Q. Do you ever have occasion to find out rates from the station agent?

A. No, we don't care about that.

Q. You don't care about that. Who do you pay your freight to?

A. Sometimes to the Rock Island depot agent and some-[fol. 1064] times to the driver. It depends on where it comes from.

Mr. Bradshaw: That is all.

Redirect examination.

By Mr. Nolan:

Q. Now, isn't it true, Mr. Willenbrock, any freight that comes in by rail you pay the depot agent?

A. By rail, yes.

Q. And any freight that comes in by motor truck, on motor truck billing, you pay the driver?

A. In a few cases we paid the depot agent when it come in by truck.

Q. You leave the money there?

A. That is right.

Q. Now, what is the fact there are some advantages to get, say, for instance, elevators or lime spreaders, or shipments of equipment of that kind in quantities of three or four in regard to price? Do you get a better price when you buy it in quantities of three or four, or something like that?

A. So far as the company is concerned?

Q. Yes, you get a special discount if you buy more than one from some of these companies?

A. No.

Q. Now, on some of your tractors, you say those come in on flat bed trucks?

A. That is right.

Q. You don't know whether they are company owned [fol. 1065] trucks or some special carrier?

A. No, I don't.

Q. Like an automobile transport company? Of course, a tractor, you don't just order over night and expect it the next morning?

A. That is right.

Q. Ordinarily a tractor is something that is planned ahead. You make a sale and the customer doesn't expect to get it for a few days.

A. That is right. The fact of the matter the tractors haven't been so numerous one dealer gets a carload at a time in the last three or four years. If we get a car there at Mitchellville, maybe two or three other dealers get a tractor, and the same way if it is shipped to Des Moines.

Q. Mr. Willenbrock, on repair parts particularly, that is where you need the fast service?

A. That is right. That is where I need fast service.

Q. A tractor, combine or corn picker broken down out in the field, you have to get that fixed right away?

A. That is right.

Mr. Nolan: That is all.
Exam. Carpenter: Recross?
Mr. Bradshaw: That is all.
Exam. Carpenter: You are excused.

(Witness excused.)

[fol. 1066] F. L. PARTRIDGE was sworn and testified as follows:

Direct examination,

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, please?

A. F. L. Partridge, Executive Secretary and Director of Traffic of the Burlington Shippers' Association, 214½ North Fourth Street, Burlington, Iowa. In this organization we represent shippers in the cities and towns of Fairfield, Ottumwa, Keosauqua, Fort Madison, Keokuk, Monmouth, Illinois, and Burlington, Iowa.

Q. Now, Mr. Partridge, just tell briefly what your organization consists of and what it does.

A. The Burlington Shippers' Association was organized as a corporation under the Iowa Code in 1919. The sole purpose was to act, and we do act, as a clearing-house of transportation for those shippers in southeastern Iowa. As at that time and at the present time there are very few firms that can afford or have a sufficient amount of business to maintain a traffic department within their own organization. Therefore, this corporation took care of those needs for all. It is a non-profit organization and it has membership dues only.

Q. And how long have you been associated with the Burlington Shippers' Association?

A. I will have completed my twelfth year April 15, 1952.

Q. And you are a manager of the Association?

[fol. 1067] A. Yes, sir.

Q. Or executive officer of it, is that right?

A. Yes, sir.

Q. How many members do you have in your association?

A. Seventy-five.

Q. And those seventy-five members are not only from Burlington but from these other places you have spoken about?

A. That is right, yes, sir.

Q. Now, will you describe briefly for the record what industries your Association represents in these different towns, name the industry and the type of industry that they are.

A. You say "name the industry"?

Q. Yes. You don't need to name them all but the principal ones in Burlington and the other points.

A. In Burlington, Iowa, we represent the Murray Iron Works, who manufacture steam engines and turbines. We represent the Campbell Chain Company that manufactures Weed Chains, car chains. We represent the Midwest Biscuit Company who are manufacturers of bakery goods. We represent the Klein Manufacturing Company, who are manufacturers of poultry and barnyard supplies. We represent the J. I. Case Company, who are manufacturers of agricultural machines, only no tractors. We represent the Chittenden & Eastman Company, the Leopold Company, and the Northwestern Cabinet Company, who are manufacturers of furniture and desks. We represent various distributors. I mean by that distributors of mer- [fol. 1068] chandise, such as the Lagomarcino-Grupe Company, John Blauls Sons Company, in the food line. We represent the Drake Hardware Company, who is a hardware concern. We represent the Schramm & Schmieg Company, who is a wholesaler of dry goods and notions. Then in Burlington we represent a number of small retailers and food brokers of that type.

Q. What is the population of Burlington?

A. The 1950 population is a little less than thirty-four thousand in the immediate area, but within ten miles, which takes in the Iowa Ordnance Plant and the Flint Hill Manor, which is a Government building project, the population is approximately sixty thousand.

Q. Approximately sixty thousand?

A. That is right.

Q. And you have two Federal installations there, the Ordnance Plant?

A. The Iowa Ordnance Plant, and in connection with that they maintain this housing project.

Q. Oh, I see.

A. And in Fairfield we represent the Dexter Company, who are manufacturers of household laundry appliances. We represent the Fairfield Glove Company, who are manufacturers of the glove line. In Ottumwa we represent the Kenmar Manufacturing Company, who are manufacturers of furniture. Their line consists of approximately six per cent of a plastic line, which plastic is not manufactured [fol. 1069] in Burlington. At Keosauque, Iowa, we represent the Barker Equipment Company, who are manufacturers of dairy supplies such as steel wire bottom carriers. In Fort Madison we represent the Interstate Wholesale, Inc., which is a lumber and building supply concern. We represent the Midwest Wax Paper Company, who are manufacturers of waxed papers and all lines of wrapping papers, bread wrappers. At Monmouth, Illinois, we represent the Ralph Wells Company, who produce what is called a toasted wheat—corn flake, that is ussed as a carrier agent for animal and cat foods. They also manufacture corn oils, soybean meal, etc. In Keokuk we represent firms there, other than what I have named as the line of endeavor I have named in these other places, there is a Thomas Caster Company, who manufactures platform, platform trucks and casters. There is the Carbide Company that manufactures carbide, and Dadamp and Company, who are in the business of bee supplies, and the furnishing of candles for particularly the Catholic Churches, etc. I think that covers it generally.

Q. Now, Mr. Partridge, when you say you represent these companies, you mean your association handles their traffic problems, routing, rate matters, and things of that character?

A. Yes, sir.

Q. And state whether or not these companies which you have enumerated in these various towns and cities have shipments going into the flow of traffic in interstate commerce.

[fol. 1070] A. Yes, sir.

Mr. Bradshaw: May I inquire?
Exam. Carpenter: Yes, sir.

By Mr. Bradshaw:

Q. By what authority do you appear at this hearing?

A. Our organization is operated unlike various organizations. There is only one other organization I know of in the country, and that is the Fort Smith-Van Buren, Arkansas, organization. They have placed this responsibility in my hands, and I need no authority from anybody to represent these people, individual authority to represent these people of the particular organization.

Exam. Carpenter: Have you finished?

By Mr. Nolan:

Q. What has been your experience and training in traffic work, Mr. Partridge?

A. On May 19th I will have completed forty years in transportation, starting in 1912 or 1911 with Montgomery Ward in Kansas City. I have served railroads, motor trucks. I have operated a motor truck. I have handled purchases and traffic for industries, and for the past thirty-two years I have been connected with two firms, of which twelve is in my present position.

Q. Now, you understand the general nature of the application on hearing here today, do you not?

A. Yes, I think so.

[fol. 1071] Q. And you have participated in many such hearings, have you not, representing your association and the members thereof?

A. I have. I am a registered practitioner.

Q. And you also have represented carriers, have you not, in matters of this kind?

A. Yes, sir.

Q. Now, I will ask you first whether or not there are members of your association and shippers in Burlington, Iowa, who have shipments coming out of Burlington, or where the bulk is broken in Burlington, going into the territory served by the Rock Island Motor Transit Company?

A. We have each. In order to get to this territory served by the Rock Island Motor Transit, those shipments are dispatched from Burlington via the H. B. Green Transportation Line or Dohrn on the Illinois side into the Tri-Cities, where they are inter-changed, which makes that type of shipments interstate traffic. We do have bulk shipments, such as cargoes of sugar coming in by boat, which is put in storage and dispatched out via motor truck or rail, of which those shipments are interstate shipments because those types of shipments are flagged out to destination when they are shipped from point of origin or factory. There are various other commodities, such as chemicals, handled in the same way, coffee, and breakfast foods. In fact one of the pronounced movement of traffic, and I don't say this to be smart, I apologize first, is Kotex.

[fol. 1072] Q. Now, Burlington is located on the Mississippi River?

A. That is right.

Q. And the river up that far at least is navigable, and used for barge line transportation?

A. That is correct.

Q. You have a public dock there, do you?

A. We do, sir.

Q. Now, you say there is a flow of traffic originating at Burlington, destined to the interior Iowa territory that moves either by Dohrn Transfer Company or H. B. Green on the east side of the river up to Rock Island and Moline?

A. That is right.

Q. Is that the natural movement of the freight? Is there any difference in mileage that way than on the Iowa side?

A. The mileage between Burlington, Iowa, and the Tri-Cities, we will say Davenport via the route I take is two miles less on the Illinois side than on the Iowa side. We will say the mileage is comparable.

Q. Yes. Now, is there a regular flow of traffic by that course, or via that routing through the Iowa territory, Davenport to Omaha, Nebraska, and the adjacent points?

A. Yes, sir.

Q. And also north from Des Moines towards the Minnesota line in the Minnesota territory?

A. There is, and I neglected to state we represent

[fol. 1073] McKesson & Robbins, who maintain a warehouse facility at Des Moines and Dubuque. Therefore, we know about these shipments, and we direct a great number of those shipments from the Des Moines warehouse.

Q. And, likewise I will ask you, if there are shipments moving from the points as the Twin Cities, Omaha, Des Moines, by the same routing back into Burlington, Iowa, and into the southeastern Iowa territory?

A. There is, yes, sir.

Q. Now, what would you say as to the regularity of the flow of the traffic, both outbound from Burlington into this territory, and from the southeastern Iowa territory, and in the reverse direction?

A. Specific commodities, we will say. Take, perhaps, bakery goods and soap products first. There is a regular movement and those are small shipments. Other commodities, there are movements, but they are not so frequent. When they are coming from Omaha or from the Twin Cities, then those shipments are less frequent because the flow of traffic is out and it is that traffic that we manufacture.

Q. Now, about your shipments outbound from Burlington over the Illinois routing, state whether or not there are shipments going into the small, interior points and not necessarily the key points for delivery?

A. There is, yes, sir.

[fol. 1074] Q. And is there more or less a regular flow of such traffic?

A. There is.

Q. Now, what transfer and interline connections are the Dohrn Transfer Company and the H. B. Green Company making at the Tri-Cities for interior Iowa delivery?

A. Traffic out of Burlington this afternoon is into the Tri-Cities tonight and interchanged with the Rock Island Motors, and into Iowa City or Des Moines, for example, it is the next day.

Q. Yes, but what line have they been interlining with for the small towns?

A. Oh, the Rock Island Motor Transit.

Q. State whether or not in your opinion, Mr. Partridge, there is a need for the continuation of the operations of

the Rock Island Motor Transit Company as it was operated before any restrictions were placed on it insofar as serving Burlington and the industries in southeastern Iowa that you represent.

A. The need today is more pronounced that it was years ago. When I speak of service, that doesn't mean the dispatching of a unit or a truck over the highway. I am thinking of all other elements that go to making up service. That gets into the personnel you deal with, the claims, the way they handle their business, the rate quotations, the flag-outs of these particular carriers and how they handle their customers, and I have found, or I know this definitely so, that the Rock Island Motor Transit needs is more pronounced for this reason; that they do not [fol. 1075] have numerous of flag-outs in rates. In other words they won't except this type of traffic because it is balloon freight or they won't except this type of traffic because it might carry Class 40. They will take any traffic that is offered to them. Therefore, it doesn't become necessary for us to search through many tariffs to determine what they can or can't handle. Now, that isn't true with most of the other carriers. Most of the other carriers have published in all of their tariffs a great many of these eliminations, these flag-outs, and what I mean by flag-outs, it is hidden away, and we won't handle traffic in connection with the Rock Island Transit. The Rock Island Motor Transit handles Class 70, whereas the Rock Island would pull Class 40. Then, we would have to, under the present restrictions, if we had two shipments setting on our dock today, say one was five hundred pounds and the other was seven thousand pounds, it would be necessary for us to find some bad carrier to handle the seven thousand pound shipment, and, therefore, we would be bothered with hunting up the second carrier; whereas the one carrier, the Rock Island Motor Transit could serve us the way we should be served. Then, we run into this. The various other carriers where they will accept a shipment, say Dohrn might accept a shipment and tender it, perhaps, for example, to the H & W. Well, the H & W, because the traffic was of such dimensions or balloon type, they have no equipment and can not handle it; and that

traffic will be kicked around for two or three weeks, and [fol. 1076] that wouldn't be true if we had the continuous service by the Rock Island Motor Transit, or Dohrn, or Green.

Q. Now, what experience have you had in regard to making so-called small shipments to the smaller points in the interior Iowa territory?

A. Insofar as the movement in connection with the Rock Island Motor Transit Company, we have no problem there if we can continue that service, I mean to enjoy that service. Now, we have a bad proposition we run into many places where we run into a three line haul. Therefore, we are penalized with a combination of rates.

Q. What do you mean, before the limitations?

A. —of two carriers, because the tariff provides this carrier or that carrier will not participate to exceed a two line haul, and particularly our bakery people. Their competition has been hit because they have to meet the competition of large manufacturers who are in operating their own delivery system.

Q. You don't mean your bakery people ship out bakery goods ready for consumption?

A. Definitely so, crackers, cookies, things of that kind.

Q. You don't mean ship out bread?

A. Yes, they do.

Q. By motor carrier?

A. Yes, they do.

[fol. 1077] Q. Now, of course, you haven't had any experience with the inability to get shipments to small towns, these interior Iowa points, because you have had the Rock Island Motor Transit's service?

A. That is right.

Q. You are familiar, are you not, with carriers in Iowa, particularly the interior across No. 6 say, and the service they give? You have been investigating that, observing that?

A. Yes. In fact I have grown up with the motor truck industry since the middle 20's. Just recently I was passed notice from the National, where they informed their carriers in Cedar Rapids, Iowa, after such a date they would not accept any interchange traffic. Now, there is a service——

Q. That is the National Freight Lines?

A. Yes. There is a service where, if the interchange carrier had not passed that to us, we would have no knowledge of because National doesn't give us that information, they are going to pull the pin on us right then.

Q. I am going to ask you, Mr. Partridge, if it is necessary to perform a complete motor carrier service, that the carrier be enabled to interline, exchange freight with other carriers?

A. There is no question about that in order to have an economical operation and an efficient operation, and give the shippers the type of service for which they are paying. Heavens knows we are paying plenty today, and that carrier should not be restricted within the scope of his authority. It should be left wide open to handle any traffic, any kind of traffic within the said limitations of [fol. 1078] explosives, etc., and the quantity of traffic as to their ability to handle, and, unless you do that, unless a carrier is given that authority, you take away from them the flexibility of motor truck transportation which the shipper should enjoy and it becomes an unprofitable operation; which ultimately you would have to discontinue the operation or curtail it, perhaps, to triweekly. When I say "tri" I use the word very liberally. We have had experience with the word. It is go up one week and try to get back the next. We find this, and it is growing on us each day. Going back to the middle 20's, the motor truck industry took away from the rail lines the traffic, L. C. L. traffic. Now they don't want that traffic. They embargo. We make a shipment to Cow Point, Iowa, and when the carrier gets it up here, we find out the connecting lines have embargoed the traffic when there is not enough traffic. It is costing too much money to handle it, and we find many, many of these small points are embargoed, and if we are going to have the service, that is the type of service, the little merchant on which we depend to make our industry move. It is not so much the larger points. The trucking industry seems today to be more interested, I am not criticising, I am making the statement of fact, they are interested more in closed door operation and truckload operation because it turns them money enough to keep moving.

Q. These truck lines have an operating problem, do they not?

[fol. 1079] A. There is no question.

Q. There is an economic problem there?

A. There is no question about it, and that economic problem faces the shippers every day.

Q. Now, from your experience as a traffic man for forty years, a truck operator, and representing shippers and so on and so forth, do you have an opinion whether or not it would be feasible to continue the service which has been offered by the Rock Island Transit Company to these small points along and adjacent to Highway No. 6 if the Rock Island Motor Transit Company was restricted to a five thousand pound maximum shipment and a key point restriction say between the Tri-Cities and Omaha so the traffic couldn't move through the Tri-Cities to Omaha?

A. Definitely not, and for this reason, I and my staff directing the traffic, if the Rock Island Motor Transit Company was restricted, we certainly wouldn't spend our time attempting to give them what business we could, and then depend on the other fellows to take the more profitable business. We wouldn't have the time to work out all of their problems. That is a carrier's problem. Therefore, we would take the lines of least resistance and we would direct all of the traffic by the carrier that could handle either the small shipments or large shipments through the restriction of, rate restrictions or flag-out restrictions that might enter into the rates and charges.

Q. Do you know of a carrier that gives the service to [fol. 1080] all of these points the Rock Island Motor Transit Company has been giving?

A. I do not.

Q. Now, Mr. Partridge, have you had any experience in regard to the quality of service provided by a motor transit with rail billed freight as compared with the quality of service provided by truck billed freight?

A. Yes.

Q. And what has been your experience in that particular?

A. If I may I will use a concrete example, on rail freight moving from Chicago, Illinois, to Des Moines, Iowa. Before I make this statement I want to make this point very

clear, that in my work in Burlington, Iowa, we trace during a year's time hundreds of shipments. We know where those particular shipments are delayed, why, and all about it. A shipment picked up in Chicago today by a cartage company is taken to the Taylor Street station.

Q. Now you are speaking about a rail billed shipment?

A. That is right. It is picked up by the cartage company today, and, perhaps he has picked up a number of other shipments on that unit, and he dispatches that truck to his own dock where he processes that freight and delivers the Rock Island Railroad their portion, the Wabash, etc., perhaps the next day. Well, if the next day happens to be Saturday or Sunday, then it is Monday. If Monday happens to be too much tonnage, then it is Tuesday. [fol. 1081] Any way, when the traffic gets to the Taylor Street station, it is billed. It is processed. It is loaded into various bulk-break cars, and that car is pulled from there and put into the train, and it is dispatched to Silvis, Illinois, where they have their break-up point, at which point the car, it is not unusual for it to be delayed in the Silvis yards two or three days. When it gets over to the East Des Moines yards it meets with another delay, so when we get a number of shipments into Des Moines, there has been a lapse of ten days from Chicago. If we were going to Burlington, Iowa, on that interstate traffic, we would meet at least a week's delay in Cedar Rapids, and when we get on the branch coming to Burlington, try to get that service, and it takes all of the way from three to four weeks on local freight into Burlington.

Take that same shipment, picked up by the Rock Island Motor Transit Company in Chicago today. That is processed, and there is no reason, if it is properly handled, why it shouldn't make delivery in Des Moines this afternoon, not later than tomorrow.

Q. If it was picked up yesterday, it should be in here today?

A. Yes. It might get in too late to make delivery this afternoon or——

Q. The second morning?

A. Yes.

Q. Now, taking the same shipment, but the shipper has

Company to your company in the past was reasonably [fol. 1105] essential and useful to your company?

A. It was essential.

Q. And state whether or not a continuation of the service of the Rock Island Motor Transit Company, as it has been given to your company in the past before these limitations, is reasonably necessary for the proper conduct of your business?

A. It is necessary.

Q. Now, you do have other sources, other transportation companies, do you not?

A. Yes.

Q. But do any of these transportation companies afford the same service, and quality of service, to your company out of Fairfield the Rock Island Motor Transit Company has provided in the past?

A. To some points they do and to other points not.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. With respect to your incoming shipments from Chicago to Fairfield, how are they presently handled?

A. We have the Rock Island and the C. B. & Q. rail, and we have numerous truck lines.

Q. And are you using the services of both the Rock Island Railroad and the C. B. & Q. Railroad and the various established common carriers?

[fol. 1106] A. Yes, sir.

Q. And do you also use the Burlington Truck Line service?

A. Yes.

Q. Now, with respect to outgoing shipments from Fairfield to Chicago, by what transportation agency are you now being served?

A. We use practically all lines.

Q. And with respect to Omaha is the situation substantially the same?

A. The Rock Island Motor gives better service to points west and to the Twin Cities, but we route out of Burlington to the Sturm and Burlington-Chicago to Omaha.

Q. You say the Rock Island Motor Transit is giving better service from Des Moines to Minneapolis and Des Moines to Omaha in your opinion?

A. Yes.

Q. There are other carriers, however, available for that service, aren't there?

A. That is right.

Q. And a shipment moving from Minneapolis to Fairfield over the established independent motor carrier would undoubtedly move to Des Moines, would it not, and then on down to Fairfield?

A. It might go to Rock Island and down.

Q. What motor carrier lines have you used between Minneapolis and Fairfield?

A. Well, we use Keeshin, Keeshin Truck Line mainly, [fol. 1107] and Rock Island Motor.

Q. And what truck lines, independent truck lines have you used between Fairfield and Omaha?

A. We have used Sturm, Burlington Truck, and Rock Island Motor.

Q. Now, using the first of the year as a critical date, give me some estimate of the number of shipments you had moving to Chicago in excess of five thousand pounds.

A. I would say twenty-five.

Q. And how have those been handled?

A. Well, mainly by rail.

Q. Have you used other common carriers?

A. That is right.

Q. Now, using the same date and asking for your estimate only, how many shipments in excess of that limit have you had moving to Omaha since the first of the year?

A. I would say fifteen or twenty.

Q. And does the same situation obtain, you use either the Rock Island Railroad or the Chicago, Burlington & Quincy Railroad, or the Burlington Truck Line, or you have been able to get some other carrier to handle it for you?

A. The service isn't as good, but we have used those.

Q. But you have used those, but it isn't the same quality

A. That is right.

Q. And the carrier that transports them from the origin at Burlington to the interline point at the Tri-Cities is the Dohrn Transfer and the Green Transportation Company?

A. That is right.

[fol. 1085] Q. At which place they are interlined with the Rock Island Motor Transit Company for delivery to these small communities located on U. S. Highway 6?

A. Yes, sir.

Q. Now, with respect to motor carrier service other than that owned by a railroad, you now have common carrier service from Chicago to Burlington?

A. That is right.

Q. From St. Louis to Burlington?

A. That is right.

Q. From Omaha to Burlington?

A. That is right.

Q. And, in fact, from all of the larger out of State points to Burlington in interstate commerce you now have adequate motor carrier service?

A. I wouldn't say that we have because I don't know what those other out of State points you have in mind.

Q. Communities of the type I mentioned, Chicago.

A. If you will restrict:

Q. Omaha, St. Louis, just those three. That will do for the purpose of my question. What is your motor service between Minneapolis and Burlington?

A. Between Minneapolis and Burlington, the one direct line is Watson through Omaha. The two line haul, the most direct is Merchants and Hedrick Motor Transfer through Cedar Rapids.

[fol. 1086] Q. Merchants to Cedar Rapids, and Hedrick from Cedar Rapids to Burlington?

A. That is right.

Q. And the Merchants to the Tri-Cities and Dohrn?

A. We don't use it that way.

Q. You are aware there is a service there?

A. Yes, and there is also service by the Rock Island Motor through Des Moines, and the B. T.

Q. But with respect to Minneapolis again, you are aware the Merchants have a service from Minneapolis to Cedar Rapids and Minneapolis to the Tri-Cities, at either of which points there could be an interline to Burlington?

A. That is right.

Q. At the present time what service are you using from Minneapolis to Burlington in interstate commerce?

A. Watson Bros. Transportation Line.

Q. Now, the Chicago, Burlington & Quincy Railroad have their main line through Burlington?

A. That is right.

Q. And does the Burlington Railroad maintain a truck service which is auxiliary and supplemental to its rail service?

A. I am not familiar with the connection, as a statement of fact, between the Burlington Railroad and what is talked about to be a subsidiary of the Burlington Truck Lines.

Q. That is the Burlington Truck Lines?

[fol. 1087] A. Yes.

Q. And the Burlington Truck Lines serve Burlington?

A. That is right.

Q. And, of course, has a rail service, or a motor carrier service, along the main line of the Burlington Railroad from Burlington to Ottumwa?

A. No, sir, they do not.

Q. Don't they maintain any service between Burlington and Ottumwa?

A. You mean in connection with rail or Burlington Truck Lines?

Q. A coordinated service?

A. Coordinated service, they do not at this time.

Q. They don't handle any shipments by truck?

A. Not for the rail line between Burlington and Ottumwa. They do handle for their own account, the Burlington Truck Lines.

Q. Does the Burlington Truck Line operate a truck service? That would be an intrastate movement, of course, wouldn't it?

A. Yes, that is right.

Q. Is there any occasion where you have to use the

services of the Burlington Truck Line in connection with your interstate shipments?

A. Where to?

Q. Any point.

A. In connection with rail? Or read the question.

(Question read.)

[fol. 1088] A. I would eliminate the "occasion" and say the answer is yes, we do use them.

Q. But the Burlington Truck Line doesn't operate up into the territory that is involved in this application?

A. They operate to Des Moines, Iowa, yes, sir.

Q. That would be an intrastate movement?

A. And an interstate movement out of Chicago.

Q. Well, all right. Let's take an interstate movement. Do you use the Burlington Truck Lines from Burlington to Des Moines with respect to your interstate shipments?

A. No, sir, we do not.

Q. You have that service available?

A. We have it after a fashion.

Q. And what service do you use from Burlington to Des Moines on your interstate shipments?

A. On the interstate?

Q. Interstate.

A. Interstate. I stated on direct it was Dohrn and Green and the Rock Island Motor Transit.

Q. In other words, then, you find that the service of Dohrn and Green to the Tri-Cities, where it is interchanged with the Rock Island Motor Transit Company, for delivery to destination at Des Moines is a preferable service to that which is now furnished by the Burlington Truck Lines?

A. That is correct in the matter of time in transit.

[fol. 1089] Q. Although the Burlington Railroad does have an affiliate known as the Burlington Truck Lines that operates direct from Burlington to Des Moines?

A. I know nothing about the affiliation. I have never seen the decrees.

Q. All right, then, let me put it this way. The Burlington Truck Lines does have a truck service from Burlington to Des Moines?

A. The Burlington Truck has a service, yes.

Q. And that would be available to you on interstate shipments?

A. Yes.

Q. Now, what motor carrier service do you have from Burlington to points such as Iowa City?

A. Hedrick Motor Transfer, single line, and Dohrn and Green to the Tri-Cities, thence the Rock Island Motor.

Q. Which service are you using now?

A. Dohrn and Green and the Rock Island Motor.

Q. And you don't use the Hedrick Truck Line?

A. Occasionally, but not when we can get away from it.

Q. But they do have a direct service between Burlington and Iowa City?

A. They do such as it is.

Q. What is your present motor carrier service between Burlington and Omaha?

A. We use a number of carriers. We use the Sturm [fol. 1090] Freight Lines, the Watson Bros. Transportation, and occasionally we use the Burlington-Chicago Cartage.

Q. You don't have any occasion to use the services of the Rock Island Motor Transit Company on your shipments from Burlington to Omaha?

A. I would say we don't avail ourselves of that service because we can't save time on a direct route from Burlington to Omaha by these other carriers.

Mr. Fowler: I think that is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Mr. Partridge, so far as you know does the Burlington Truck Lines, or the Burlington Transportation Company in the operation of its motor lines, operate without any restrictions as regard to weight limitation or key point restriction?

A. Yes, sir.

Q. And are those operations conducted by the Burlington Truck Lines, or Burlington Transportation Company,

conducted on motor truck billing rather than upon rail billing?

A. Those operations are conducted upon the Burlington Motor Truck billing. That is all I am familiar with because these rates, scope of authority, and everything is published in the agency's tariff.

Q. They are in the various tariff publications?

[fol. 1091] A. Yes.

Q. How about service to Muscatine, Iowa? Does that have anything to do? Muscatine is one of the off-route points here, and does that have anything to do with your interest?

A. Muscatine is served by the Green Transfer Line as they have an interstate peddle run on interstate to Muscatine and return.

Q. That is a direct service?

A. That is right.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Rex? That is all. You are excused.

(Witness excused.)

Mr. Nolan: Mr. Lindauer.

JOHN W. LINDAUER was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation?

A. John W. Lindauer, Fairfield, Traffic Manager for the Louden Machinery Company.

Q. Now, what is the nature of the business of the Louden Manufacturing Company?

A. We manufacture two lines, the barn line which includes the hay tools, hay drying systems, and then we have the dairy barn equipment, steel pens, stalls, and stanchions and ventilating systems. We have the industrial line, the [fol. 1092] overhead carrier systems, monorail systems.

Q. Now, Mr. Lindauer, how many people do you have employed at your factory?

A. Oh, approximately I would say two hundred fifty, something like that.

Q. Two hundred fifty people?

A. At the factory, Mmmmhuh.

Q. And has your company used the Rock Island Motor Transit Company's service in the past?

A. Yes, we have used their service since they began there.

Q. How long have you been Traffic Manager of the Louden Company?

A. Approximately thirty years.

Q. And state whether or not your company has shipments going throughout the entire middlewest in interstate commerce?

A. We do have.

Q. Now, you understand the service involved here is the application by the Rock Island Motor Transit Company to continue its operations that it had operated prior to certain restrictions between Des Moines and Omaha and certain adjacent points, intermediate points and points adjacent to that route. State whether or not in the past your company has made shipments wherein any part of that route would be involved.

A. You mean through the Omaha terminal?

Q. Yes, the Omaha Gateway.

A. Yes, we have made shipments that way, yes.

[fol. 1093] Q. In other words, a shipment came up from Fairfield to Des Moines on the Rock Island Motor Transit truck and then go on to Omaha, either for delivery by the Rock Island Motor for points they serve beyond Omaha, or for interline at Omaha, is that right?

A. That is correct.

Q. And what would you say is the size of the shipments shipped by your company that way when you were using, I mean when you had occasion to make the shipments?

A. It varies from minimum shipments up to five, ten thousand pounds, depending on the nature of the shipment.

Q. Now, these barnyard apparatus, stalls, and so on, hay tools and conveyors of different types for dairy barns, they will vary in size according to the shipment?

A. Yes, that is right.

Q. Now, you are acquainted with the fact that the Rock Island Motor Transit Company has been limited in the size of shipments it may carry into that territory?

A. Yes, sir.

Q. Has your company had to curtail its use of the Rock Island Motor Transit Company by reason of that limitation?

A. Well, we get better service other ways on account of that.

Q. On account of that limitation?

A. I believe that is correct.

Q. Otherwise you would have to make smaller shipments [fol. 1094] to stay under the five thousand pounds, isn't that correct?

A. That would be correct.

Q. Now, in the event that the Rock Island Motor Transit Company was restored to the authority it had to haul shipments irrespective of size and without key point restrictions, state whether or not your company would have occasion to make shipments.

A. Yes.

Q. By the Rock Island Motor Transit Company as you had in the past?

A. Yes, sir.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Mr. Lindauer, have you had occasion to ship commodities in excess of five thousand pounds since the restriction was placed upon the operation of the Rock Island Motor Transit?

A. You mean to any place?

Q. Points where you had to rely on the Rock Island Motor Transit for service.

A. Yes, we have had to.

Q. And how were they handled?

A. We handle them either by Rock Island Rails or some other truck line.

[fol. 1095] Q. Then, with respect to certain of the shipments that were in excess of the maximum limitation, you have tendered those to the Rock Island Railroad on rail billing?

A. That is right.

Q. And other shipments you have turned over to other motor carriers serving the town of Fairfield?

A. Yes, sir.

Mr. Fowler: Now, off the record may I ask this?

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: On the record.

By Mr. Fowler:

Q. As I understand it the Rock Island Motor Transit Company now conducts a daily operation into Fairfield?

A. That is right.

Q. Direct from Des Moines, so far as the physical part of the operation is concerned?

A. Yes, sir.

Q. Now, with respect to interstate shipments which are to and from Chicago, Illinois, do you use the services of the other established motor carriers for such transportation?

A. We do.

Q. And do you also use the services of the Rock Island Motor Transit Company?

A. We do.

Q. And do you also use the services of the Rock Island Railroad?

[fol. 1096] A. We do.

Q. Do you also use the services of the Chicago, Burlington & Quincy Railroad?

A. The C. B. & Q., yes.

Q. Do you use the services of the Burlington Truck Lines?

A. We do occasionally.

Q. Now, with respect to Omaha, by what means are you

now transporting your shipments from and to Omaha from Fairfield? Are you using the service of the established motor carriers?

A. We use, we do, yes.

Q. And you use the services of the Rock Island Motor Transit Company on such shipments?

A. Yes, sir.

Q. Do you use the services of the Rock Island Railroad?

A. We do.

Q. Do you use the services of the Chicago, Burlington & Quincy Railroad?

A. We do.

Q. Do you use the services of the Burlington Truck Line?

A. Some.

Q. Now, with respect to this particular application, will you give me a typical illustration of the shipments that you are required to make in interstate commerce, that is a shipment from a point outside of the State to any point located on U. S. Highway 6?

[fol. 1097] A. I didn't get the question.

Mr. Fowler: Will you read the question?

(Question read.)

A. We are supposed to make to any point on U. S. Highway 6?

By Mr. Fowler:

Q. You understand we are talking about interstate shipments. We are not talking about shipments within the state.

A. I don't believe we have occasion to ship interstate to the points.

Mr. Fowler: I see. That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Mr. Lindauer, isn't it a fact the only use you would make of Highway No. 6 insofar as, I mean this service,

authority being sought in this case, is in connection with shipments going outside of the State through the Omaha Gateway, or through the Tri-City Gateway on the east?

A. Or Chicago.

Q. Yes, or Chicago. Now, what would be the average sized shipment made by your company, either through the Omaha Gateway or through the Chicago Gateway?

A. We have shipments that range up to truckloads. It depends on the job. For instance, our industrial line will have a system. That depends on the size of the system as to what the weight will be of the total shipment, and that is [fol. 1098] true of the barn job. It depends on the size. Some of them run pretty big.

Q. Do I understand most of your shipments move out by truck, truckloads or less than truckloads, rather than by rail carloads?

A. We get better service, yes.

Q. Most of your shipments move out by truck?

A. Most of them do.

Q. Either in less than truckload lots or truckloads?

A. Yes. We have some shipments that must go by rail because of the size or the length of them.

Q. State whether or not the Rock Island Motor Transit Company has an agent at Fairfield.

A. Yes, they have a terminal there, and has an agent. We have a speaker system right to and from our plant over there, and we have access in tracing to their communication system. It is a fine setup.

Q. Do they have delivery trucks at Fairfield?

A. Yes, they do.

Q. And they maintain an agent, terminal, and pick-up and delivery peddle trucks there?

A. Yes, sir.

Q. Do any other highway transportation companies which operate through Fairfield have such facilities, such as an agent, terminal and pick-up and delivery truck?

A. The only other one is Watson. We don't use them. We understand they don't have rights to pick up there, but [fol. 1099] they do have a terminal. That is the only other one.

Q. Do you understand they have a terminal there, or a relay point?

A. It might be a relay point. They call it a terminal.

Q. Where they change drivers?

A. Yes.

Q. Do they have an agent there that can give you rate information, and things of that character?

A. Well, we never use them. We don't have occasion to use them.

Q. So, other than what you think Watson may have, the Rock Island Motor Transit Company is the only other company?

A. That has the direct terminal of their own and make their own pick-ups.

Q. And state whether a company that provides an agent, terminal, pick-up and delivery service, rate information, tracing facilities, and things of that character, where you have a number of outbound shipments, is really necessary?

A. It is very convenient. It is an asset to the shipper, yes.

Q. In other words, in a town where there is very little outbound shipments such a service is necessary?

A. Outbound shipments?

Mr. Nolan: In a town where there are little shipments going out you don't need the terminal, etc.

Exam. Carpenter: Recross?

[fol. 1100] Recross-examination.

By Mr. Fowler:

Q. On your shipments moving from Fairfield to Omaha, by what transportation agency are they now being served?

A. Well, we use Sturm and Burlington Truck Lines mostly.

Q. All right. On truckloads moving from Fairfield to Chicago by what agency are they now being moved?

A. We use mostly Western Transportation to Chicago.

Q. And with respect to truckload shipments moving from Fairfield to the Twin Cities, what service do you use?

A. I don't recall any truckloads recently through the Twin Cities.

Q. Now, does the Rock Island Motor Transit Company have a freight dock at Fairfield?

A. Yes, sir.

Q. And is it located at the freight dock of the Rock Island Railroad?

A. It is in the same depot, yes.

Q. Does the Rock Island Motor Transit Company have a commercial agent at Fairfield?

A. Yes, sir.

Q. And you say you have a telephone direct from your office to the Rock Island depot?

A. It is an intercommunicating set, a speaker set.

Q. And if you are arranging for transportation to ship by truck or by rail, you just call over there?

[fol. 1101] A. Yes.

Q. And they will take care of you, no matter whether it is the Rock Island Motor Transit, or the Rock Island Railroad?

A. Of course, we have separate communication with the Rock Island Railroad if we want them.

Q. You have an intercommunicating set with them, too?

A. Yes, that is right.

Q. So they do maintain there a commercial agent for the truck line as well as an agent for the railroad?

A. Yes, sir.

Q. And you have two intercommunicating systems?

A. Well, it is the same system. It is used by both of them.

Q. Well, if you are going to ship by rail and call up over this telephone system and ask for the railroad agent, is that the way you do?

A. That is right.

Q. And if you want to talk to the truck fellow?

A. I call for him.

Q. Call for him on the same 'phone?

A. That is right.

Redirect examination.

By Mr. Nolan:

Q. By the way, this truckload traffic you say is now moving by Western from Fairfield to Chicago and some other line to Omaha?

A. It did.

Q. That previously moved, or part of it moved by the [fol. 1102] Rock Island Motor Transit Company?

A. It did, yes, sir.

Q. Would you say practically all of it moved by the Rock Island Motor Transit?

A. They had their share, I will say that.

Q. That was before the limitation?

A. Yes.

Mr. Nolan: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

L. A. Bissig was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation, please?

A. L. A. Bissig, Iowa Malleable Iron Company, and Everstick Anchor Company, Fairfield, Iowa.

Q. Iron Company, is that right?

A. That is right.

Q. And what is your position with those companies?

A. Traffic Clerk.

Q. And what are the products manufactured by those companies?

A. Malleable iron castings and Everstick guy anchors. The anchors are used for guying telephone, telegraph and power transmission lines.

[fol. 1103] Q. You have shipments going into interstate traffic throughout the midwest here?

A. That is right.

Q. Now, how long have you been with the company?

A. Seventeen years.

Q. And you are the Traffic Manager for the company, is that right?

A. That is right.

Q. Now, you heard the testimony of Mr. Lindauer in re-

gard to the traffic facilities provided by the Rock Island Motor Transit Company at Fairfield, Iowa. Do you avail yourself of that service, the rate information, etc.?

A. I do.

Q. Now, you understand the nature of the application on file here, do you not?

A. Yes.

Q. State whether or not your company has used the Rock Island Motor Transit Company's service in the past.

A. Yes, we have.

Q. And to what points?

A. St. Paul, Chicago, Omaha.

Q. And state whether or not that service was or was not satisfactory.

A. It was.

Q. And state whether or not you are acquainted with the [fol. 1104] limitations now imposed upon the operation of the Rock Island Motor Transit Company.

A. Yes, I am.

Q. And state whether or not those limitations are in any way interfering with your use of the Rock Island Motor Transit Company's service.

A. They are.

Q. In what respect?

A. We had to limit our shipments to two thousand pounds in order to get the shipments on the way.

Q. That was when they had a two thousand pound limitation. How about since they have been increased to five thousand pounds?

A. We are still limited.

Q. Limited to five thousand pounds?

A. That is right.

Q. And state whether your company has shipments that exceed five thousand pounds that would normally move over this part of the Rock Island Motor Transit Company's system.

A. Yes, we do have them.

Q. And that would be to Omaha and the Twin Cities, is that right?

A. Yes, and other points.

Q. And other points. State whether or not the service which has been provided by the Rock Island Motor Transit

of service you have been getting from the Rock Island Transit?

A. That is right.

Q. Do you have a telephone system running from your [fol. 1108] office to the freight depot of the Rock Island?

A. Telephone system?

Q. You do?

A. Public telephone.

Q. But you don't have a special intercommunicating system?

A. No, sir.

Q. Does the pick-up and delivery truck at Fairfield handle both the motor billed and rail billed freight?

A. Yes.

Q. And both officers are in the same building of the Rock Island Railroad?

A. The same building.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Why do you say you get better service from Fairfield to Omaha and the Twin City area by the Rock Island Motor Transit than you do from other companies serving Fairfield?

A. Reports from the customers. We have a contract with the Western Electric Company, which is the purchasing agent for the Bell Telephone, and we ship guy anchors all over the country. They have their traffic department in New York City, and we are to follow their complete routing, and in case of storm emergencies, they telegraph or telephone orders in, and they ask us to give them truck [fol. 1109] number, time of departure, driver's name, and let us trace their shipments as far as possible and then report to them the outcome, and they trace it the rest of the way. We have had cases when we would have the routing "Burlington truck" for shipments to the Dallas-Houston storm emergency, and we wouldn't be able to get trucks

immediately, and I would contact their traffic department in New York and tell them that the Rock Island Motor had trucks available, and they would give permission to change the routing.

Q. In other words not only they have told you, but in these instances——

A. That is right.

Q. In checking up for Western Electric.

A. Western Electric.

Q. By the way, for the record how large a town is Fairfield?

A. About seven thousand.

Q. And in addition to the locker company and the company Mr. Partridge testified to, and your two companies, what other manufacturing industries are there?

A. There is Hess and Anderson, the Fairfield Glove and Mitten Factory.

Q. What do Hess and Anderson manufacture?

A. They manufacture wood-working tools, lathes, and drills.

Q. And the Fairfield Glove Company, they manufacture gloves?

A. That is right, and there is the Universal Manufacturing which makes plastic and dime store articles and small products, the Aluminum Factory, and the Harper Brush Works. [fol. 1110]

Mr. Nolan: I believe that is all.

Exam. Carpenter: Recross. You are excused.

(Witness excused.)

Exam. Carpenter: We will have a recess.

(Short recess.)

Exam. Carpenter: We will proceed.

G. M. HARTLINE was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation?

A. G. M. Hartline. I operate a service station at Altoona.

Q. Service station and garage, is that right?

A. Yes, and appliances.

Q. What line of appliances do you have?

A. We have television, refrigerators, hot water heaters, stoves.

Q. And do you handle any particular line of automobiles, or just repair parts?

A. Just repairs.

Q. Do you handle tires and batteries?

A. Yes.

Q. And accessories?

A. Yes, accessories.

[fol. 111] Q. You handle a service station, greases, oils and things of that character?

A. Yes, sir.

Q. Now, Mr. Hartline, what out of State shipments do you have coming into your place of business?

A. Very little. It is oil and grease out of Kansas City, but they have changed their depot to Des Moines now.

Q. How about your appliances, radios and stoves?

A. It is out of Des Moines most all of them.

Q. Are they shipped into Des Moines in carload quantities and hauled out to you?

A. Yes.

Q. So these shipments do originate outside of the State?

A. Yes, east.

Q. Your appliances all come from practically out of the State?

A. That is right, Illinois and New York.

Q. I suppose those shipments move into Des Moines for several dealers, and the quantity is broken up at Des Moines and delivered to you and other local dealers?

A. That is right.

Q. Now, are you located right on Highway No. 6?
A. Yes, sir.
Q. At Altoona?
A. East of Des Moines.
Q. I know, but the most of the business district?
[fol. 1112] A. It is about four blocks down.
Q. But you are right on the highway?
A. Yes, sir.
Q. What company have you been using on these shipments from outside of State points?
A. The Rock Island.

Exam. Carpenter: I thought it came through to Des Moines.

Mr. Fowler: That is objected to unless it is from out of State points.

Exam. Carpenter: It is out of State. May I inquire of the witness, please?

By Exam. Carpenter:

Q. Do you have any direct shipments from any points outside of the State of Iowa direct to you at Altoona, Iowa?
A. No, not for a long time I have had any.

By Mr. Nolan:

Q. How about this oil you spoke of?

Mr. Fowler: That is objected to.

Exam. Carpenter: The objection sustained. Reframe the question.

By Mr. Nolan:

Q. Mr. Harthne, state whether or not you have had auto supplies shipped to your place of business from Chicago, Illinois:
A. No, I haven't.
Q. How about auto supplies from St. Paul, Minnesota?
A. Yes, we get that through.
[fol. 1113] Q. Direct from St. Paul?
A. Direct from St. Paul, and from Chicago. I will take that back, from Chicago, too.

Q. You have shipments come direct from the manufacturing dealer, both from Chicago and Minneapolis?

A. And Kansas City, too.

Q. And Kansas City, too. All right, and how do those shipments come into your place of business?

A. By Motor truck.

Q. What company?

A. Rock Island.

Q. Have you had shipments brought in by any other motor truck companies?

A. There was some oil brought in but I don't recall which company it was.

Q. Do you know of any other company that gives local service to Altoona than the Rock Island Motor Transit Company?

A. No, sir.

Q. Have you ever been solicited by any other motor truck company for handling these shipments from Chicago and St. Paul?

A. No, I haven't.

Q. And Kansas City?

A. No, sir.

Q. You do know, however, there are many, you have seen many trucks go by your place of business every day?

[fol. 1114] A. Well, hundreds of them.

Q. But none stop and deliver merchandise to you?

A. No, sir.

Cross-examination.

By Mr. Fowler:

Q. Does the Iowa-Nebraska Transportation Company serve Altoona?

A. No.

Q. Wasn't it the Iowa-Nebraska that handled this oil shipment?

A. It probably was, come out of Kansas City.

Q. It was handled by the Iowa-Nebraska. Does the Rock Island Railroad have any agent at Altoona?

A. Yes, sir.

Q. Does the Rock Island Railroad have or the Rock Island Motor Transit Company?

A. Yes, sir.

Q. So when you want truck service you call the Rock Island Railroad agent?

A. I don't ship anything.

Q. When you have anything shipped in do you go over and pick it up at the Rock Island depot?

A. They bring it to my place.

Q. When you receive any do you call the Rock Island agent?

A. We usually ship back where it starts.

Q. The only representative the railroad or the motor company have in Altoona is the depot agent?

[fol. 1115] A. The depot agent, yes, sir.

Q. And if you have any problems in connection with that, you would talk to him about it?

A. Yes.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. What does he do, send one of the truck drivers up to see you?

A. The agent, usually one of the helpers down at the depot.

Mr. Nolan: That is all.

Exam. Carpenter: That is all. You are excused.

(Witness excused.)

GEORGE E. ADAMS was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Now, where do you live? What is your name first?

A. George E. Adams, 604 North Tremont, Kewanee, Illinois. I am Traffic Manager for the Burlington-Chicago Cartage, Inc., and Burlington-Chicago Cartage, operator

of C. H. Smith, dba Chicago-Nebraska Motor Express and Burlington Terminal Warehouse.

Mr. Fowler: You are going to have to give me that again.

(Answer read.)

By Mr. Nolan:

Q. Now, where is the Chicago, Burlington-Chicago is that?

[fol. 1116] A. Cartage.

Q. Where is that located?

A. The general office is in Kewanee, Illinois.

Q. And what are its operations?

A. They operate from Chicago, Illinois, over 34 with Princeton, Illinois, Kewanee, Illinois, Galva, Illinois, Galesburg, Monmouth, Illinois, and Burlington, Iowa, Keokuk, Iowa, Fort Madison, Iowa, Fairfield, Mount Pleasant, Ottumwa, Muscatine, and over the Chicago-Nebraska rights from Chicago to the Tri-Cities, Clinton, Iowa, Omaha, Nebraska, and Peoria, Illinois, Canton, Illinois.

Q. Now, that company is engaged in the transportation of general commodities by motor vehicle?

A. Excuse me, just a moment. I would like to extend that operation of the Chicago-Nebraska to Lincoln and Hastings, Nebraska.

Q. Now, those companies are common carriers of general commodities in interstate or foreign commerce by motor vehicle?

A. Yes, sir.

Q. And you say you are the Traffic Manager. You also are a member of the honorable profession of the law, are you not?

A. Yes, sir.

Mr. Nolan: Do you agree with that?

Mr. Fowler: In some cases.

By Mr. Nolan:

Q. Now, what interest do you have, does your companies have in this present application, Mr. Adams?

[fol. 1117] A. Our primary interest in this application is

tonnage originating in western Illinois, the northwestern part, destined to points in Iowa along Highway 6.

Q. And is that for interline with the Rock Island Motor Transit Company for freight originating in that territory?

A. That is correct, sir.

Q. And destination points along U. S. Highway No. 6, is that correct?

A. Yes, sir.

Q. Now, I assume your company's operations from Chicago to Omaha, Lincoln, and Hastings, that is what we might call an overhead operation without local service to intermediate points?

A. That is correct, with the exception of the Tri-Cities and Peoria.

Q. Now, has there been a regular interline, flow of interline freight between the companies you represent and the Rock Island Motor Transit Company for delivery to these destination points between the Tri-Cities and Omaha?

A. There has been for a number of years.

Q. And state whether or not that service has been satisfactory or otherwise.

A. It has been very satisfactory.

Q. Do you know, Mr. Adams, of any other company that gives the same quality and character of service as the Rock Island Motor Transit Company has been giving to these [fol. 1118] destination points, intermediate points from the Tri-Cities to Omaha which the Rock Island Motor Transit Company has been giving?

A. From the Tri-Cities to Omaha?

Q. From the Tri-Cities to Omaha, the intermediate points, do you know of any other company has been giving the same type of service as the Rock Island Motor Transit Company for delivery to these so-called intermediate or peddle points?

A. Yes.

Q. Do you know of any other companies that have been giving that?

A. Yes.

Q. What companies?

A. Burlington Truck Lines, Watson Bros.

Q. I mean along Highway 6.

A. The Iowa-Nebraska.

Q. Is that a regular service of those companies?

A. Not very regular, no, sir.

Q. Well, what company do you interline the majority of your freight with for points intermediate between the Tri-Cities and Omaha?

A. The Rock Island Motor.

Q. And why do you do that?

A. It is a very tedious question. To handle freight originating in the western part of Illinois destined to those Iowa points, our only interchange point, other than with the Rock Island Motor Transit Company, will be Chicago, [fol. 1119] Illinois. We would have to back-haul the traffic one hundred forty miles to Chicago and try to persuade some carrier to accept it when your actual class rate from Chicago to destination is less than it is from the point of origin to destination.

Q. Now, where do you interline with the Rock Island Motor Transit Company, at the Tri-Cities?

A. No, sir, at Ottumwa.

Q. At Ottumwa, and then does that freight move over the Rock Island Motor Transit Company to the points along U. S. Highway No. 6?

A. That is correct, sir.

Q. You said that Watson and Iowa-Nebraska have some service into this territory. Have you had occasions where they have refused or not provided the service that you found the Rock Island Motor Tran it Company provided?

A. Yes, sir. At one time we interchanged with Watson at Ottumwa, but they closed their terminal there, and we also tried to use their service from Burlington, Iowa. At times they will accept traffic and at times they will not.

Q. Does your company maintain a terminal at Ottumwa?

A. No, sir, it doesn't. We have at one time but not at present.

Q. Are you acquainted with the fact that the Rock Island Motor has a terminal there?

A. Very much so.

Q. And it has an agent, a dock, and everything of that character?

[fol. 1120] A. Yes, sir.

Q. And you deliver your freight to the Rock Island terminal there for interchange, is that correct?

A. That is correct.

Q. Does the Iowa-Nebraska have a terminal there for interchange?

A. No, sir. The only one I know of is the Rock Island Motor Transit Company.

Q. Now, do you know of any company that provides the same type of local service to interior Iowa points served by the Rock Island Motor Transit Company that the Rock Island provides?

A. No, sir, I do not.

Q. And what would be the effect of your company's business, so far as traffic originating in the northern Illinois points served by your company, if the Rock Island's service was eliminated or materially curtailed?

A. The major type of tonnage that we are handling in connection with the Rock Island Motor Transit Company at the present is dated circulars, which is a very perishable commodity. It has to be at the destination within a certain length of time, and I think if we lose the service of the Rock Island Motor Transit Company from Ottumwa, we would lose the tonnage ourselves, and I don't know of any service they could get that would be satisfactory.

Q. Now, what was that traffic you are talking about?

A. Advertising matter. It is dated circulars that are [fol. 1121] distributed for a sale that is going to be held a certain date.

Q. And is there a regular flow of that traffic?

A. Regular, monthly.

Q. And that may go to any point along U. S. Highway No. 6 or points adjacent?

A. That is a part of the territory it goes in, yes. There is distribution over the entire United States, see.

Q. Now, do the size of the shipments mean anything in regard to volume shipments, or are those mostly small sized shipments?

A. No, sir. They run from one thousand pounds to ten thousand pounds.

Q. Are you familiar with the fact that the Rock Island Motor Transit Company, so far as its operation between

the Tri-Cities and Omaha, is restricted to a five thousand pound shipment?

A. Very much so.

Q. And has that interfered with your ability to interline with the Rock Island Motor Transit Company for destinations along U. S. Highway No. 6?

A. Well, it has caused inconvenience I would say but we have been successful in discussing this with the shipper, and they are making more shipments more frequently, and thereby coming under the five thousand pound restriction.

Q. If the rights of the Rock Island Motor Transit Company were restored so they could haul shipments of unlimited size, would there be traffic available to the Rock Island from your company?

[fol. 1122] A. Yes, sir.

Q. To the points along U. S. Highway No. 6?

A. There definitely would.

Q. And you, of course, are a common carrier, your company is a common carrier of motor freight with rates and classifications and things of that kind?

A. Yes, sir.

Q. And you can only interline on through billing with another carrier on truck rates, isn't that true?

A. That is correct.

Q. How long have you been with these companies?

A. With this particular company?

Q. Yes.

A. Four years.

Q. Is your company a member of the various trade organizations that motor carriers belong to such as the A. T. A.?

A. Practically all of them.

Q. And the different tariff bureaus, publishing bureaus, and things of that character?

A. Yes, sir.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. As I understand it the particular traffic that bothers you is this advertising material?
[fol. 1123] A. That is just some of the traffic.
Q. I think you stated on direct that was the one that was presently bothering you, is that correct?
A. Yes.
Q. Now, where does that originate?
Q. At Kewanee, Illinois.
Q. And the name of the company?
A. Mail-O-Graph.
Q. What do these advertising circulars consist of?
A. Montgomery Ward, advertising monthly sales.
Q. This movement is a monthly movement?
A. Yes, it runs continually.
Q. Now, what points in Iowa—I will withdraw that.
Q. Using Kewanee as an origin point, to what points in Iowa are you authorized to give a direct service?
A. In Iowa, Fort Madison, Keokuk, Burlington.
Q. Let me put it this way. You don't have any authority over U. S. Highway 6?
A. Yes, we have authority over Highway 6.
Q. Name the points.
A. We have no intermediate points there.
Q. What points do you have in Iowa?
A. We have authority over 6 but we have no intermediate points within Iowa with the exception of the Tri-Cities.

By Exam. Carpenter:

Q. Overhead authority to Omaha you testified?
[fol. 1124] A. Yes.

By Mr. Fowler:

Q. You do have authority to serve the Tri-Cities area?
A. Yes.
Q. Moving west what is the next point on U. S. Highway 6 you are authorized to serve?

A. There would be no other points until you came to Council Bluffs.

Q. Do you have authority to serve Omaha?

A. Yes.

Q. And do you serve Chicago and Omaha direct?

A. Yes, sir.

Q. And Chicago and Kewanee direct?

A. Yes.

Q. You don't have any authority to Des Moines?

A. No.

Q. Do you serve Kewanee to Davenport direct?

A. The Tri-Cities, we hit the Illinois part of the Tri-Cities.

Q. Kewanee to Davenport, Iowa, would be an interstate movement.

A. We have no service from Kewanee to Davenport.

Q. You do serve Kewanee, Chicago, and your western Illinois points direct to Ottumwa, to the points on Highway 34 you just mentioned?

A. That is right.

[fol. 1125] Q. Now, to what points do these advertising circulars move with respect to U. S. Highway 6?

A. When I speak of U. S. Highway 6 I was referring to some points beyond such as Ames, Iowa, Cedar Rapids, Des Moines, Iowa City, Marshalltown, Mason City, Newton, Oskaloosa, Washington, Waterloo, and in Minnesota, Albert Lea.

Q. Now, just a moment. You are getting away from the list. Let's confine this now to points located on U. S. Highway 6. I think you mentioned Newton, Iowa.

A. That is correct.

Q. How do you presently handle a shipment from Kewanee, Illinois, to Newton, Iowa?

A. To Ottumwa, Iowa, in connection with the Rock Island Motor Transit.

Q. You take it to Ottumwa and interline it with the Rock Island Motor Transit, and they take it to Newton?

A. Yes, sir.

Q. Now, are those shipments in excess of five thousand pounds?

A. To Newton, I am not positive. I couldn't say.

Q. The probabilities are they are much smaller than that.

A. No, all of the shipments average approximately four to five thousand pounds.

Q. All right, how are you handling them now?

A. As I told you, we have had to have the shippers, instead of shipping once or twice, they have had to multiply [fol. 1126] the number of the shipments.

Q. Have you ever tried out any other interline arrangement with the other carriers at the Tri-Cities?

A. To handle the freight through the Tri-Cities, we would have to take it through Chicago, and back to the Tri-Cities, which is not practical.

Q. Then you can not have an interline arrangement with any of these carriers at the Tri-Cities?

A. Not from Kewanee.

Q. So the reason you do interline at Ottumwa is you can not interline at the Tri-Cities?

A. That is correct.

Q. And the same thing would be true of all of the carriers that operate east and west over U. S. Highway 6?

A. Yes, sir.

Q. Now, with respect to Des Moines shipments from Kewanee, how are those presently handled?

A. The same route through Ottumwa.

Q. And is that again handled that way by reason of your inability to interchange at the Tri-Cities with any of these other carriers?

A. Also the inability to maintain a logical connection at Chicago.

Q. Do you have interline arrangements with other carriers to serve Des Moines other than the Rock Island Motor [fol. 1127] Transit Company?

A. Yes, sir.

Q. And will you name those, please?

A. I couldn't name them all. Any carrier from Chicago to Des Moines we have interchange agreements with.

Q. Well, do you actually interchange with them?

A. No, because it is not desirable tonnage for them.

Q. Well, you mean this advertising material is not desirable tonnage?

A. Due to the circuitous routing it would have to take to the Chicago Gateway and then back.

Q. Because of your Tri-City problem?

A. That is due to our operation, yes.

Q. Well, in other words you would prefer to move this freight from Chicago, or from Kewanee, or from any of the points in western Illinois as far west as you could over your own line?

A. No, we wouldn't prefer to do that but we have found it more practical to do that.

Q. The fact is you do take this tonnage to Ottumwa?

A. That is correct.

Q. And you interline that with the Rock Island Motor Transit Company?

A. Yes.

Q. For these points located on U. S. Highway 6?

A. Yes.

[fol. 1128] Q. And that is true with respect to Des Moines, Iowa?

A. Yes.

Q. Omaha you handle direct?

A. That is right, sir.

Q. The Tri-City area you are blocked out of because of your inability to interline with these carriers at that point?

A. From that origin point, yes, sir.

Q. Is the same thing true of Chicago? Does your complication at the Tri-Cities on interline affect your Chicago origin shipments, too?

A. No. You have too many of those up there.

Q. There wouldn't be any occasion to interline Chicago to Omaha, would there? Where do you interline your Peoria, Illinois, origin shipments for points located on U. S. Highway 6?

A. At approximately the same point, Ottumwa.

Q. And what does that involve on your part?

A. We are not actually, I can not testify truly. I can say what we would do with them. At the present time our Peoria rights are involved in a hearing. The final decision of the Commission has not been issued. Therefore, we are not too actively soliciting traffic in that territory.

Q. At the present time it is safe to say you are not serving Peoria to these points?

A. We are serving Peoria.

Q. You are not very active?

[fol. 1129] A. We are not spending too much money on it.

Q. Do you happen to have with you a map of your system?

A. No. I have copies of the certificates if you would like those?

Q. No, I don't care. Well, as I understand it, then, you have got an important shipper at Kewanee that manufactures this advertising material for Sears, Roebuck?

A. Montgomery Ward.

Q. Montgomery Ward, and they want that distributed in Iowa to points located on U. S. Highway 6 such as Newton and Des Moines?

A. Yes, sir.

Q. And, at the present time, due to your inability to interline at the Tri-Cities, you are interlining with the Rock Island Motor Transit at Ottumwa?

A. That is correct, sir.

Q. And on any shipments that move to any points that you can serve in Iowa, you are handling that direct?

A. Yes.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Mr. Adams, to get the geography straightened out here a little bit, your company's main office is at Kewanee, as I understand it?

A. Yes.

[fol. 1130] Q. Where is Kewanee located with reference to Burlington, Iowa, on the horizontal east and west plane?

A. Eighty-five miles east of Burlington.

Q. In other words, Burlington is the most direct gateway into Iowa for your company on a movement of freight from Kewanee into the Iowa territory, is that correct?

A. Yes.

Q. And to move the same traffic up through Chicago, that would be quite circuitous?

A. That is true.

Q. How far is Kewanee from Chicago?

A. One hundred forty miles.

Q. And direct north isn't it?

A. Northeast.

Q. Northeast, so from the practical standpoint the most direct operation from Kewanee into the Iowa territory, then, would be through the Burlington, Iowa, gateway?

A. Yes, sir.

Q. And, as a matter of fact, your company is moving the most direct route into Iowa by coming through the Burlington, Iowa, gateway to Ottumwa, and there interlining with the Rock Island Motor Transit Company for these interior Iowa points, is that correct?

A. That is true.

Q. Now, in addition to this advertising material, state [fol. 1131] what the fact is, whether or not your company as a common carrier, handles all kinds of general commodities through the gateway in the same way?

A. It is just the general run of truck transportation traffic that we accept.

Q. And state whether or not the Rock Island Motor Transit Company interlines with you at Ottumwa, or some other point, for shipments originating in Iowa and destined to some points on your line in Illinois. Is there an exchange of interstate traffic?

A. No, sir, there is not.

Q. They don't give you anything going back?

A. No, sir.

Q. Are you available for such traffic, or do you have other traffic?

A. We are available but we have not been actively soliciting.

Q. I see. Now, in connection with this advertising business the fact is your company interlines general commodities picked up in various Illinois points served by your company, to the points served by the Rock Island Motor Transit Company in Iowa?

A. We do.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Recross.

Recross-examination.

By Mr. Fowler:

Q. Just a moment. With respect to your shipments des-
[fol. 1132] tined to Cedar Rapids, moving from Kewanee, do you interline those with the Rock Island Motor Transit at Ottumwa?

A. Yes, sir.

Q. With respect to shipments moving from Chicago to Cedar Rapids, other than this advertising material, do you interline that with the Rock Island Motor Transit at Ottumwa?

A. We handle no traffic out of Chicago destined to Cedar Rapids.

Q. You don't originate any traffic in Chicago?

A. No, sir.

Q. None whatever?

A. Did you give me a specific destination there?

Q. Cedar Rapids.

A. No, sir.

Q. Ottumwa?

A. No Cedar Rapids. We do handle Ottumwa.

Q. You handle Chicago to Ottumwa direct?

A. Yes, sir.

Q. And Chicago to Cedar Rapids through interline at Ottumwa with the Rock Island Motor Transit?

A. I handle no Cedar Rapids from Chicago.

Mr. Fowler: Off the record. Just off the record.

(Discussion off the record.)

Exam. Carpenter: It has to go into Chicago and out to the Tri-Cities. He doesn't have a direct line from Kewanee into the Tri-Cities.

[fol. 1133] Mr. Nolan: I am going to get this record straightened out.

Mr. Fowler: Back on the record.

By Mr. Fowler:

Q. The answer is, as I understand it, there is a direct service from Chicago to Cedar Rapids which you can not compete with via other carriers?

A. I don't know whether we can compete with it or not, but we have never seen the necessity of doing so.

Q. You don't handle it?

A. No; sir.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. Now, Mr. Adams, is it fair to say that you have one operation that operates between Chicago, Omaha, Lincoln and Hastings, Nebraska, which is an overhead operation?

A. Yes.

Q. Except for service at the Tri-Cities, Omaha and Lincoln?

A. And Peoria. That fellow has a north route and a south route with it.

Q. I see, you have two routes?

A. Yes, in connection with the Omaha and the 34 operation in connection with Burlington and Chicago goes through Kewanee, splits right through the middle of it.

Q. Now, what points in Illinois do you serve besides Chicago, Peoria, and Kewanee?

A. We serve Princeton, Galva, Galesburg, Monmouth, [fol. 1134] and then we have an irregular operation if you want that in there.

Q. Well, now, those points such as Galesburg, Monmouth, and Princeton, points like that, I assume freight picked up there will be taken into your Kewanee terminal and dispatched from there into Iowa points?

A. Yes.

Q. Then, the point I am trying to make is for the towns that you serve in Illinois, outside of Chicago and Peoria, such as Monmouth, Galesburg, Princeton, Kewanee, that the Burlington gateway, the Burlington, Iowa, gateway is the most practical gateway into Iowa for the flow of your traffic?

A. Yes.

Q. Is that correct?

A. Yes.

Mr. Nolan: That is all.

Recross-examination.

By Mr. Fowler:

Q. Mr. Adams, on your advertising matter moving to Newton, Iowa, couldn't you interline with the Iowa-Nebraska Transportation Company, or couldn't you interline with the Des Moines Transportation Company?

A. At Chicago.

Q. Or interline with the McCoy Truck Lines?

A. At Chicago.

Q. Or Merchants Motor Freight?

A. At Chicago.

[fol. 1135] Q. So these shipments to these points on U. S. Highway 6 could be handled by interline with other carriers moving, serving these points if you would interline at Chicago instead of at Ottumwa?

A. If they would accept them, yes.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. Now, Mr. Adams, in addition to having to back-haul the Kewanee freight to Chicago, a distance of one hundred forty miles, what is the fact as to whether or not you wouldn't have to back-haul the freight from Galesburg, Monmouth and Princeton approximately the same distance in order to turn it over to some other carrier at Chicago for destinations to Iowa points along Highway 6?

A. It would average about the same distance.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused, sir.

(Witness excused.)

CHARLES H. PAHL was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation, Mr. Pahl?

A. Charles H. Pahl, 1724 24½ Street, Rock Island.

[fol. 1136] Q. What is the name of that street?

A. 24½ Street.

Q. Rock Island?

A. Illinois.

Q. What is your business, Mr. Pahl?

A. General Superintendent of the Rock Island Bridge and Iron Works.

By Exam. Carpenter:

Q. Rock Island what?

A. Rock Island Bridge and Iron Works.

By Mr. Nolan:

Q. Your company is a manufacturing company or construction company?

A. Well, we manufacture, we fabricate steel for building is what we do.

Q. And how long have you been connected with the company?

A. Since 1914.

Q. Since 1914?

A. Yes.

Q. And does your company have shipments moving into the Iowa territory served by the Rock Island Motor Transit Company?

A. Yes.

Q. And where do those shipments go, to small towns, large towns, just tell us?

A. They go wherever anybody wants to build a building and we have luck enough to get the job, so that is liable to be any place.

[fol. 1137] Q. Has your company used the Rock Island Motor Transit Company for hauling your products into the Iowa territory in the past?

A. Yes. The last big job was the hospital in Iowa City last summer.

Q. And did your company provide steel for that?

A. We provided a certain per cent of it. Must have been one hundred tons.

Q. You provided one hundred tons?

A. Yes. I can not remember exactly, something like that.

Q. In what sized shipment does this steel usually move out of your place of business into the Iowa territory served by the Rock Island Motor Transit Company?

A. All the truck is authorized to haul, 27,000, 28,000, all the truck is authorized to move.

Q. Does that all move by truckload lots or some small quantity?

A. Truckload lots when we have a big job like that.

Q. Do you have any little jobs?

A. Oh, yes. We have small ones, too.

Q. Where you ship around a few hundred pounds of steel?

A. Yes, five hundred, one thousand, two thousand, anything.

Q. And have you had occasion to ship by the Rock Island Motor Transit Company these so-called small shipments from five hundred to one thousand, two thousand pounds, in the last several years?

A. Yes, sir.

[fol. 1138] Q. And have you also had occasion to ship by the Rock Island Motor Transit Company the large shipments, the truckload lots?

A. Yes.

Q. And what has been the character of the service of the Rock Island Motor Transit Company that you have used along Highway No. 6 across Iowa, whether it has been good or bad?

A. On this big job they picked it up one day and delivered it the next.

Q. Did the Rock Island Motor Transit Company handle the Iowa City hospital job?

A. Yes, all but one load which was shipped by mistake in a rail car and moved to Iowa City by rail.

Q. The Iowa City hospital job, that was completed before the restrictions were placed on the Rock Island Motor Transit Company?

A. Just about the time it was put on it was completed.

Q. Completed just before they were restricted?

A. I think so.

Q. If the restrictions were removed from the Rock Island Motor Transit Company's operations, would your company have occasion to make truckload quantity shipments into this territory?

A. Yes, whenever we get a job out here.

Q. Is your company actively soliciting jobs, bidding on contracts, etc.?

A. Yes.

[fol. 1139] Q. And the shipments, the service which you have used by the Rock Island Motor Transit Company for the little orders as well as the big orders, has that service been satisfactory in the past?

A. Yes, sir.

Mr. Nolan: That is all.

A. Never had any complaint on it.

Cross-examination.

By Mr. Fowler:

Q. On your steel to Iowa City, Mr. Pahl, did you select the Rock Island Motor Transit Company because you wanted to give them the business?

A. No, not exactly, because some of these other companies wouldn't leave it stick out of the back end, and we have long stuff a lot of times. Anything within the law they will take, the Rock Island Motor Transit will, the Rock Island, but the other ones won't leave it hang out of the back of the truck, and we couldn't use it. Some only have a twenty-four foot truck and that is it. You can not haul anything longer.

Q. Aren't there some heavy haulers that have this type of equipment?

A. We have to get special equipment.

Q. The Rock Island Motor Transit only has this equipment?

A. That is the only one we had any luck on this deal.

Q. Otherwise, you would have to get a special hauler?

A. Yes.

[fol. 1140] Q. Is that true generally, or you use other motor carriers?

A. That is true all of the time on long pieces with other truck lines.

Q. You can not get any other truck line to take it except the Rock Island Motor Transit?

A. That is the only one that comes out this way. We have one that goes the other way in Illinois, but doesn't have anything to do out this way.

Q. The Rock Island Motor Transit handled all of your steel to Iowa City?

A. It did——

Q. Except the one rail car. Do you do work for the Rock Island Railroad?

A. Yes, they switch right into our place down there.

Q. Do you do some work for them?

A. No.

Q. You like the Rock Island because they have a switch yard right in your place?

A. Not exactly that reason. As I said before, they haul long pieces if they have to.

Q. They take care of you pretty well, do they?

A. Yes.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

[fol. 1141] By Mr. Nolan:

Q. By the way, Mr. Pahl, state whether or not some of the other truck companies have refused to haul some of the smaller shipments for your company in the Iowa traffic?

A. Yes, they call up and say they go along this certain route but they say they don't stop there.

Q. Are there any others that have refused to handle shipments to some of the small towns?

A. Yes.

Q. Have you ever had the Rock Island Motor Transit Company give you that answer to the points which they serve?

A. No.

Mr. Nolan: That is all.

Recross-examination.

By Mr. Fowler:

Q. On these steel shipments what points did they refuse to take your freight for, within the last six months?

A. I couldn't exactly remember what they are now. I think Washington, Iowa. Does the Rock Island Motor go into that town, does it?

Mr. Nolan: Yes.

A. Washington, Iowa, Keeshin wouldn't take it. That is one of them.

By Mr. Fowler:

Q. All right, what points involved in this application in the last six months you have had any carrier refuse to take it?

A. You mean on No. 6?

[fol. 1142] Q. Involved along No. 6?

A. I can not exactly specify that one. We have things happen and I pay no attention to it.

Q. You made the statement in your direct testimony.

A. You said what truck?

Q. The name of the carrier and the town that has refused to handle your steel shipments from Rock Island to any point on U. S. Highway 6 within the last six months.

A. I didn't say that.

Q. I am sorry. I misunderstood.

A. I could not say who they are. I don't remember. I asked them on the telephone if they go there and they say they don't.

Q. You don't remember the name of the carrier or the name of the town?

A. Washington, Iowa, was one for sure.

Mr. Fowler: That is all.

(Witness excused.)

Exam. Carpenter: Mr. Martin, you may enter your appearance at this time.

Mr. Martin: J. H. Martin, 500 Bankers Trust Building, Des Moines, Iowa. I am a practicing lawyer and admitted to practice before the Commission. I appear for the Rock Island Motor Transit Company.

Mr. Fowler: While you are at that I would like to enter an appearance at this time for the McCoy Truck Lines, [fol. 1143] Inc., in addition to those carriers I previously indicated.

Exam. Carpenter: All right, Mr. Fowler.

FRANK CARLSON was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. You are Mr. Frank Carlson from Colfax, Iowa?

A. Yes, sir.

Q. And what is your business, Mr. Carlson?

A. I have a department store and a variety store.

Q. And I believe those are two separate stores, are they not?

A. Yes, sir, about half a block apart.

Q. But you own them and operate them?

A. I beg your pardon.

Q. But you own them and operate them, both stores, you operate both stores?

A. Yes, sir.

Q. Now, what are the general lines of merchandise handled by you in those two stores?

A. Clothing, shoes, dry goods, and the general line of variety, you know what the usual run of variety merchandise would be. Notions, novelties, hardware, toys, candy, to name a few.

Q. Mr. Carlson, what are the prime sources of supply for your merchandise in these two stores?

A. Chicago and St. Louis.

[fol. 1144] Q. And how about St. Joe, Missouri, and Kansas City, Missouri, do you get merchandise from there?

A. I have some from Kansas City and some from St. Joe, Missouri.

Q. I believe you said St. Louis.

A. St. Louis, practically all of my shoes and dry goods come out of St. Louis.

Q. Now, how has your merchandise been moving in from these out of State points?

A. Well, it moves——

Q. So far as it gets to your store?

A. In the past, up until the last six months it has nearly all came and been delivered by the Rock Island Motors. It moves from St. Louis by Bruce and Watson, from St. Louis to Des Moines; and then the Rock Island Motors has delivered it from there in the past. However, lately the Rock Island Motors doesn't get that freight. The Iowa-Nebraska Transportation Company gets it, and there is always a delay of about one or two days in Des Moines or somewhere along the line, probably in Des Moines.

Q. State whether or not you have specified routing by either Bruce or Watson to Des Moines and Rock Island Motor Freight from Des Moines out to Colfax?

A. I have that instruction with all of the shippers, and that instruction has been followed. I would say that Bruce will turn it over to the Rock Island while Watson never does.

Q. Watson goes contrary to your routing?

[fol. 1145] A. That is right.

Q. And turns it over to the Iowa-Nebraska. You don't know what arrangement there is between Watson and the Iowa-Nebraska?

A. I don't know. I know when it is routed by Bruce, they will turn it over to the Rock Island Motors, but I haven't had a shipment carried by Watson from St. Louis that has been delivered by any one but Iowa-Nebraska.

Q. You don't know whether there is some conspiracy or combination between Watson and Iowa-Nebraska?

Mr. Fowler: Objected to as improper examination, leading, suggestive and argumentative. No basis for that question.

Exam. Carpenter: The objection sustained.

By Mr. Nolan:

Q. How about your shipments from Chicago, how have those shipments been moving?

A. They have been moving by Rock Island Motor Freight.

Q. And is that at your request?

A. Yes, sir.

Q. And how about from Kansas City and St. Joe, Missouri?

A. You see the Rock Island doesn't serve St. Joe, and some other carrier has to carry it, as I understand it, to Des Moines, and it comes, Watson usually handles that. I have instructed the Smith Brothers Manufacturing Company to ship via Watson, care of Rock Island Motors in Des Moines, but it is nearly always delivered by the Iowa-Nebraska Transportation Company.

[fol. 1146] Q. Again disregarding your routing via Des Moines, Iowa?

A. Yes, sir.

Q. Now, what is the matter with the Iowa-Nebraska's service out of Des Moines?

A. Well, there is nothing the matter with it, only they come once in a while. There is no regular schedule, and my freight is held up two or three days before it is delivered, and the Rock Island Motor delivers every day.

Q. Now, the service from Chicago, is that a daily service by the Rock Island Motor Transit Company?

A. Yes, sir.

Q. And how is the service from Kansas City? Is that direct by the Rock Island Motor Transit?

A. Yes. I don't have frequent shipments from Kansas City, however. There is only one firm I buy from in Kansas City and that is the Fitts Dry Goods Company.

Q. The bulk of your dry goods come from Chicago or St. Louis?

A. Yes, the bulk. I have other points, the origin point,

but it is not as frequent as Chicago and St. Louis.

Q. With what frequency do you get shipments in your business from out of State points?

A. Practically every day. Maybe not every day but every other day. I think it averages a shipment every other day in one of the stores.

Q. What ordinarily are the size of these shipments?

[fol. 1147] A. Well, an average size would be, well, I don't know just what an average size may be, between five hundred and one thousand pounds. That is my average size of shipments, although I have had some three thousand pounds.

Q. Have you ever had any shipments in excess of five thousand pounds?

A. No, I haven't.

Q. Your merchandise is such character, you ship quite a few shoes and coats?

A. Well, I can pay for not over three thousand pounds, probably.

Q. You could get a lot of coats in a three thousand pound boundary?

A. Yes, you could.

Q. Or a lot of shoes in a three thousand pound boundary?

A. Yes.

Q. How long have you been in business in Colfax?

A. Five years.

Q. And have you used the Rock Island Motor Transit Company's service almost exclusively during that period?

A. Yes, sir.

Q. Do you know of any other motor carrier that gives regular daily service to Colfax other than the Rock Island Motor Transit Company?

A. So far as I know there isn't any.

[fol. 1148] Q. And what would be the effect upon your company's business, you are not a company, are you?

A. Well, I am a company but I am not incorporated.

Q. What would be the effect on your business there in Colfax if the Rock Island Motor Transit Company's service were terminated or else materially or substantially reduced?

A. Well, it would have an adverse effect on my ability to

get my merchandise in quickly and on time. After all, speed is very essential in our business. We have items that sell out and we want to reorder quickly, and if we take it out of Chicago, it is shipped this afternoon in Chicago and it is delivered to our place at eleven o'clock the next day. That is fast service, and that is important to me.

Q. Now, have you had any experience with claims with other carriers, other than the Rock Island Motor Transit Company?

A. Yes, I have. I have had some claims that are pending since last November and haven't been settled yet.

Q. Was that against the Rock Island Motor Transit Company?

A. No, sir

Q. Against what company?

A. The Iowa-Nebraska Transportation Company.

Q. And in addition to the time and service, are there other factors that enter into a satisfactory service, claim service, or tracing shipments, etc.?

A. Yes, sir.

[fol. 1149] Q. You say you have had some claims pending against the Iowa-Nebraska since last November, is that correct?

A. Mmmmhuh.

Q. Have you attempted to get a settlement and adjustment on those claims?

A. I have applied. Their driver has agreed to take care of it. However, he finally the other day stopped in and examined it and in the next few days I got a claim paper from the Iowa-Nebraska. I filled it out and filed a claim with them now, which is about three weeks ago, but I can't, it was very unhandy to try to get someone to take care of my complaint on breakage. It was a concealed breakage, concealed damage.

Q. What facilities does the Rock Island Motor Transit Company have for servicing your business there in regard to being able to contact a representative of the company, dockage, and things of that character?

A. Well, the local transferman is their agent, so far as in my dealings with the Rock Island Motor is concerned, Charley Elliott.

Q. Does he have a dock or warehouse?

A. He doesn't have a dock, I don't think, a special dock for the Rock Island.

Q. Does he handle freight for other truck lines?

A. No, he doesn't.

Q. Does the Iowa-Nebraska have a local representative, [fol. 1150] or deliver off their line trucks?

A. Off their big line trucks.

Q. So, in order to make claim after you discovered some defects or loss of freight——

A. I would have to telephone Avoca.

Q. Avoca, Iowa?

A. That is what I was told if I can not contact the driver.

Q. Or else catch one of the drivers. Colfax is what, one hundred twenty miles from Avoca?

A. No, it is farther than that, I believe. I am not too sure how far that is.

Mr. Nolan: I think it is about one hundred twenty. That is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Does the Iowa-Nebraska Transportation Company have a terminal in Des Moines, Iowa?

A. I couldn't say. I don't know.

Q. How far is it from Colfax to Des Moines?

A. Twenty-three miles.

Q. With respect to these claims you are talking about against the Iowa-Nebraska, you had not filled out any claim papers until about three weeks ago?

A. No, sir.

Q. Does the Rock Island Motor Transit pay claims when [fol. 1151] you haven't filed any claim papers?

A. They at least furnish me with an inspection and claim papers.

Q. My question was, does the Rock Island Motor Transit pay your claims unless you file claim papers.

Mr. Nolan: That is objected to as not proper cross-examination. The question has already been answered. The question is argumentative.

Exam. Carpenter: Overruled.

A. No one would pay claims.

By Mr. Fowler:

Q. Whom do you contact with respect to claims against the Rock Island Motor Transit?

A. Charles Elliott, Colfax.

Q. Is Charles Elliott the local cartage man?

A. Yes, sir.

Q. And does he handle pick-ups for the Rock Island Railroad and the Rock Island Motor Freight?

A. Not for the railroad. He has nothing to do with the railroad claims. If I have anything on the railroad, I contact the Rock Island agent.

Q. Supposing you have a shipment that is going to move in by rail, and you have any matters in connection with that, whom do you contact?

A. The Rock Island Railroad agent.

Q. And do you do any shipping by rail into Colfax?

A. Some. Some freight comes in by rail, yes, sir.

[fol. 1152] Q. What rail freight service do you have at Colfax?

A. The Rock Island.

Q. And is that daily?

A. Well, I imagine it is. I think it would probably be daily service. However, my service on the railroad is about two weeks from Chicago.

Q. But there is a way freight service into Colfax daily, isn't that right?

A. Yes. Yes, sir.

Q. And I suppose a rail shipment moving from Chicago would move by merchandise car to Des Moines, would it not?

A. I think so.

Q. And then would be transported to Colfax from Des Moines by truck?

A. Well, I could not tell you that because I don't know it.

I do know it takes two weeks for rail freight to get from Chicago to Colfax.

Q. Yes. I think you told me you had excellent service from Chicago to Colfax by the Rock Island Motor Transit?

A. Yes, sir.

Q. In other words, a shipment which leaves Chicago tonight would be delivered to your place of business the next day?

A. Yes, sir.

Q. So, obviously, there is a through truck movement from Chicago to Colfax. Now, on the railroad billing, a shipment, [fol. 1153] do you understand a shipment would move either by truck or by rail even though it was on rail billing?

A. No, I don't know anything about that.

Q. And did you know even if the shipment was transported from Chicago to Des Moines by merchandise car, it still would be delivered to you by truck? Did you know that under the present arrangement?

A. I don't know.

Q. You have been served by the Iowa-Nebraska Transportation Company on your St. Louis shipments since the interline arrangement was changed?

A. Yes, sir.

Q. So at the present time you have available to you at Colfax, daily service by the Rock Island Railroad, daily service by the Rock Island Motor Transit, and a service by the Iowa-Nebraska Transportation Company which you say is not daily?

A. Yes, sir.

Q. The Kansas City shipments are handled direct Motor Transit, Kansas City to Colfax. Is that a through truck movement?

A. I don't know. About all I can tell about it is who renders the freight bill. Sometimes it will tell on there, but I don't recall how the Kansas City freight bills are. I believe it is all Rock Island Motor.

Q. You do, do you not, have some shipments come through that are billed "Rock Island Railroad" that come in to you by truck?

[fol. 1154] A. Well, now, I really don't know who delivers them to Colfax. After it arrives in Colfax this Elliott delivers with his truck.

Q. And that is irrespective whether it is on rail billing or motor freight billing?

A. Yes.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. Now, Mr. Carlson, state whether or not the service which you receive from the Iowa-Nebraska Transportation Company is satisfactory or not.

A. Well, it isn't as satisfactory as the Rock Island Motors. Their service is not as good. It is much slower. It is harder to get claims, I will say that.

Q. Now, on these shipments which have come in by rail, is it fair to say they were shipments which originated either in the northeast seaboard or southeastern States of this country?

A. You mean consigned to me from there?

Q. Yes.

A. I don't have anything other than New York State. That is as far east as I would have anything. There is some in North Carolina at that.

Q. What I am getting at, the shipments which do come in by rail are shipments which originate beyond Chicago, either to the east or southeast?

A. Both.

[fol. 1155] Q. Would you get any shipments that originate in Chicago which are shipped out by rail?

A. Yes.

Q. Is that by your specification or the shippers?

A. No, the shipper has crossed up my shipping instructions if they do.

Q. Some clerk thought it was the Rock Island Railroad?

A. I imagine that is what happens.

Q. Instead of the Rock Island Motors?

A. They send it Rock Island rail.

Q. You don't mean to tell the Commission here the Rock Island Railroad provides a daily service from Chicago to Colfax, do you?

Mr. Fowler: Just a moment. That is objected to as leading and suggestive, inasmuch as the witness has now testified, the witness has testified he does have a daily rail service.

Exam. Carpenter: I will sustain the objection. Reframe your question.

By Mr. Nolan:

Q. Now, Mr. Carlson——

Mr. Fowler: Just ask him the direct question instead of telling him how to answer it.

Exam. Carpenter: That should come off.

Mr. Fowler: I will apologize.

Mr. Nolan: You will apologize to me?

Mr. Fowler: No.

[fol. 1156] By Mr. Nolan:

Q. Mr. Carlson, do you know whether or not the Rock Island Railroad provides a daily service from Chicago to Colfax for rail freight?

A. I don't know to be sure, to be honest about it. I don't know whether it is a daily service or not.

Q. You do know there are freight trains go through Colfax and freight trains stop there?

A. Yes.

Q. I believe you testified a shipment coming by rail from Chicago took several days' time?

A. Yes.

Mr. Nolan: That is all.

Exam. Carpenter: Recross.

Mr. Fowler: That is all.

(Witness excused.)

Exam. Carpenter: We will adjourn for lunch until 1:45 p. m.

(Whereupon at 12:15 p. m. a recess was taken until 1:45 p. m. of the same day.)

AFTERNOON SESSION 1:45 p. m.

Exam. Carpenter: Now, we will proceed.
Mr. Nolan: Mr. Brenner.

GEORGE BRENNER was sworn and testified as follows:

[fol. 1157] Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence and occupation?

A. George Brenner, President and Manager, Colfax Mineral Springs Company, Colfax.

Q. What is the name of your company?

A. Colfax Mineral Springs Company.

Q. Well, now, will you describe briefly for the record what your company produces, manufactures or processes?

A. The Colfax Mineral Springs Company has developed and is now producing a new type of soft drink, calorie free, sugar free. The nature of the product is such that it was publicized as a news item, and rather rapidly we have gained modest distribution throughout the Nation. Transportation, of course, was one of the factors in that sort of take-off, the nature of the operation. Orders are mostly small, two hundred pounds up to five thousand, but it would run from two hundred to two thousand.

Q. You are speaking about outbound shipments now?

A. Outbound shipments, and they come from all over the United States, considerable in the State of Iowa. Our delivery medium has been handled by the Rock Island Motor Freight very satisfactorily.

Q. Now, how long has your company been in business?

A. Well, the original firm goes back to 1882. I have [fol. 1158] been with them since 1941. This new development took place less than two years ago, and previous to that the shipping has been of a local nature.

Q. As I understand this product which your company produces is shipped in interstate commerce?

A. That is right.

Q. Throughout the entire country, is that right?

A. That is right.

Q. Now, what inbound shipments do you have, Mr. Brenner?

A. Supplies, mostly from Chicago, principally from Chicago.

Q. And those are ingredients you use in this production?

A. They are ingredients, yes.

Q. And what are the size of those shipments?

A. Small amounts, several hundred pounds average.

Q. And with what frequency do your inbound shipments come in to your place?

A. Several a week, several shipments a week.

Q. And how about outbound shipments?

A. They occur every day.

Q. Now, I believe you said in regard to your outbound shipments, have been handled almost exclusively by the Rock Island Motor Transit?

A. That is right.

Q. And how about your inbound shipments?

A. The same.

[fol. 1159] Q. Have you specified how your inbound shipments have moved where you can?

A. Yes, by experience several shipments vitally needed shipments were delayed in transit when shipped by which way, and we have learned by experience that we can depend on the experience, service that we need. Due to the nature, the newness of the product we can not store all of the supplies, buy all of the supplies right at the store. What we must have we must have in a hurry, and we have found that the Rock Island delivers goods on time.

Q. Now, do I understand most of those inbound shipments come either from Chicago or through Chicago?

A. Mostly from Chicago. That is quite the headquarters for most of my supplies.

Q. And what has been the nature of the service in regard to time from Chicago to Colfax?

A. Within forty-eight hours. That is very vital in our operations because, as I say, it is new, and our orders come as they come, and they have to be filled as they come. They

are not yet of a routine nature, and we can schedule neither our supplies nor our orders.

Q. Now, in regard to your outbound shipments, I assume they move out by Rock Island Motor Transit, and then are transferred to other trucking companies for destination?

A. I believe so. I believe distant points, and certain [fol. 1160] points, there are no direct connections. They are transferred.

Q. Points off of the Rock Island Motor Transit System, they interline with other trucking companies?

A. That is right.

Q. Now, you say you have had experience with other trucking companies bringing in products to your place of business?

A. That is right.

Q. And how long ago was that?

A. That was about a year ago and it tied us up pretty bad where we had to 'phone for a reshipment. The delay in getting the original shipment was more than ten days. We just couldn't stand it, couldn't wait that long.

Q. And do you recall what carrier performed that service?

A. I don't recall. We might not specify, and it was shipped by a certain truck line. I don't recall the name.

Q. You can control and do control your outbound shipments, and, as I understand, you take the Rock Island Motor Transit?

A. That is right. That is right.

Q. Do you know, Mr. Brenner, of any trucking company that provides the same regular service in and out of Colfax, so far as your company is concerned, that the Rock Island Motor Transit Company has been giving you?

A. I don't know of any. To the best of my knowledge there would be none available to render the kind of service, the daily service we require.

[fol. 1161] Q. Now, what would be the effect upon your company's business if the Rock Island Motor Transit Company were required to terminate its operations in and out of Colfax or materially reduce the service now provided, or which has been provided by the Rock Island Motor Transit in Colfax?

A. As the situation stands today it would be ruinous to our place of business because it is new and undergoing its growth development, and the nature of the product is such it is bought on impulse, and it is expected right now due to various requests as indicated by the letters from customers. Prompt service is vital or the customer would be inclined to forget about it, and that has happened once or twice when we simply mislaid an order in our office and shipped a couple of weeks later, and it was not accepted.

Q. I will ask you, Mr. Brenner, the peculiar nature or ingredients of the Colfax water, which comes out of the ground at Colfax, is used in your products?

A. That is right.

Q. Your location in Colfax is peculiar because of the water supply there, is that right?

A. That is right. That is a factor that has to do with the acceptance. It is a plus acceptance of the product.

Q. Now, for the record and those who may read it and are not familiar with the Colfax mineral water, state whether or not that is a particular type of water that [fol. 1162] comes out of the ground in Colfax that has certain characteristics not found in water in other parts of Iowa, or in the midwest?

A. Definitely so. I won't go into the technical angle of it, but, for the record, it is one of the five therapeutic mineral waters of the world recognized by the American Medical Association. I am very proud of that fact, and naturally exploit the characteristics of the water in our operations.

Q. It is one of the principal ingredients in your products?

A. That is right.

Q. And what is the fact whether or not Colfax, Iowa, by reason of the mineral water that is found there, has been known as more or less of a health resort for many, many years?

A. Well, that is the plus value to the nature of the product; for this sugarless product is consumed largely by people in delicate health, diabetics, and others, and the therapeutic value of the water by its reputation is a great factor.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross-examine.
Mr. Fowler: That is all. Thank you.
Mr. Nolan: You are excused, Mr. Brenner.

(Witness excused.)

Mr. Nolan: Mrs. Fesler.

MRS. DAN FESLER was sworn and testified as follows:

Direct examination.

[fol. 1163] By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation?

A. Mrs. Dan Fesler, and we have the Dan's Wholesale Foods in Coralville.

Mr. Fowler: I didn't get it.

A. Dan's Wholesale Foods in Coralville, Post Office, Iowa City.

By Mr. Nolan:

Q. Now, Coralville is an unincorporated town located immediately west of Iowa City, is it not?

A. Yes.

Q. And it is probably the fastest growing town in Johnson County?

A. Yes, definitely.

Q. What is the population of Coralville?

A. I don't know what it is now.

Q. Around one thousand?

A. It is going over the one thousand mark.

Q. You and your husband are engaged in a wholesale business there, I think?

A. Yes.

Q. And what merchandise do you handle in your wholesale business?

A. Foods.

Q. Does that include candies and tobacco?

A. No tobacco. Candies, cookies, potato chips, pickles, mustard, and that food line.

[fol. 1164]. Q. And in what territory do you job your products?

A. We have a fifty mile radius.

Q. And you sell to retail outlets, or to the consumer direct?

A. No, every retail outlet.

Q. Do you have salesmen on the road?

A. Yes.

Q. Now, what is the source of supply of your products? Where do you get your merchandise?

A. All over the United States, various.

Q. How do those shipments come in to your place of business, how have they been coming in?

A. They have been coming in mostly by Rock Island Motor Transit, or came by the Rock Island Motor Transit, I should say.

Q. Now, Coralville was located immediately on U. S. Highway No. 6, but now it is off to the side, is it not, since they rerouted No. 6?

A. Yes.

Q. And in what sized shipments do you ordinarily have your product come in?

A. Well, each individual shipment is, only they are small shipments, one hundred fifty pounds to maybe three hundred fifty pounds, but there are several shipments each day.

Q. And from what principal points do you get those shipments, out of State points?

A. I would say the most of them are from Chicago.

[fol. 1165] Q. Either Chicago proper or through Chicago?

A. Or through Chicago, Mmmmhuh.

Q. And you say those shipments have been coming in by Rock Island Motor Transit?

A. Yes.

Q. Have you had experience with any other highway transportation companies in bringing shipments in to your place?

A. Just an occasional delivery.

Q. And what experience have you had in that respect?

A. It hasn't been very good.

Q. What has been the difficulty?

A. It hasn't been very prompt. We get twenty-four hour service from the Rock Island Motor Transit, or, in other words, they get the merchandise in the morning and it is out there the same day. We have had these other deliveries that come into Iowa City one day and get them four or five days later.

Q. State whether or not the Rock Island Motor Transit is the only transit company that delivers direct to Coralville, if you know?

A. Well, we do have one other transport there, one other trucking firm that has come out there a time or two.

Q. What company is that?

A. Mahers.

Q. Mahers. That is the Maher Transfer Company in Iowa City. They deliver for some other company?

[fol. 1166] A. Yes, but that is all.

Q. Maher doesn't have an over-the-road operation any more?

A. No.

Q. Any shipments that they handle are delivered from Iowa City to Coralville, isn't that right?

A. Yes.

Q. And you say what experience you have had in this respect has been delayed three or four days?

A. Yes.

Q. Do you know of any other transportation agency that will give you the same type of service you have been receiving from the Rock Island Motor Transit?

A. No, I know of none. I know there is none.

Q. Have you tried to get other service?

A. Yes. Yes, I have.

Q. And what would be the effect upon your company's business if the service of the Rock Island Motor Transit Company was terminated or substantially reduced in service?

A. Well, I know what that does. That throws things into a turmoil for us. That gets our merchandise out there too late, and it also throws a lot of extra work on my shoulders because I have to go into Iowa City and pick up that merchandise.

Q. Was there a time last summer or fall when the ques-

tion arose whether the Rock Island Motor Transit Company could serve Coralville, and you had to get some other service?

[fol. 1167] A. I had to pick it up.

Q. You had to pick it up in Iowa City?

A. Yes.

Q. There was a short period when some question arose as to the Rock Island Motor Transit Company's ability to serve Coralville?

A. Yes, that is right.

Q. And that was when you tried to get other service?

A. I have tried ever since to get, when the merchandise comes in, once in a while the merchandise will come in to another terminal, and I have asked them if they will bring it to Coralville, but they will not do it and I have to pick it up.

Q. In other words you have had experience with merchandise coming in over some other truck line to Iowa City where you didn't have an opportunity to direct the routing?

A. We always asked to have it shipped by the Rock Island.

Q. They don't always honor that?

A. That is right.

Q. And that is why you experience these delays?

A. That is right.

Mr. Nolan: I believe that is all.

Cross-examination.

By Mr. Fowler:

Q. Is Coralville located on U. S. Highway 6?

A. Old U. S. Highway 6, in other words.

Q. Well, where would it be with respect to the new road?

A. It would be north.

[fol. 1168] Q. About how far?

A. About two blocks.

Q. And how far is Coralville from Iowa City?

A. Three miles.

Q. And the Maher Transfer Company you spoke about is a local transfer agent in Iowa City?

A. Yes.

Q. And I think the record shows that he does the cartage and the transfer work for these other carriers such as the Iowa-Nebraska, and Des Moines Transportation Company. Are you acquainted with that?

A. Yes, that is right.

Q. And shipments handled by those carriers would be delivered to the Maher Transfer Company at Iowa City and the Maher Transfer would bring them out to you at Coralville, isn't that the way you received it?

A. Yes.

Q. I assume on the outbound shipments you handle those on your own trucks?

A. That is our daily deliveries we handle on our own trucks. However, we do have cardboard cartons and spoilage merchandise.

Q. That is sent back to Chicago?

A. That is sent back to Chicago, Mmmmhuh.

Redirect examination.

By Mr. Nolan:

Q. How are those return shipments being made?

[fol. 1169] A. By the Rock Island Motor Transit only.

Mr. Nolan: I believe that is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mrs. Edith Blakesley was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Mrs. Blakesley, will you give us your name, place of residence, and occupation?

A. Edith Blakesley at Menlo.

Q. Is that Miss or Mrs.?

A. Mrs.

Q. At Menlo, Iowa. I believe you testified in the other hearing in this case, Mrs. Blakesley?

A. Yes, sir.

Q. And will you tell us again what type of business you operate at Menlo?

A. A variety store, also dry goods.

Q. A variety and dry goods store. Now, what makes up a variety store?

A. Almost everything. I don't handle any foods except candy.

Q. Is that wearing apparel?

A. Wearing apparel, dishes, pictures, Oh, all sorts of notions, school supplies.

Q. And school supplies. I believe you testified at the other [fol. 1170] hearing that you had merchandise coming from both the east and the west.

A. I do.

Q. From Chicago points and points east of Chicago?

A. Yes, sir.

Q. And how about Omaha?

A. A great deal of the dry goods come from Omaha.

Q. And how about the Twin Cities and Kansas City, do you get any merchandise from those?

A. Yes, I get some from both places.

Q. How long have you been engaged in the business at Menlo?

A. For myself, four years.

Q. And had you been in business prior to that?

A. I worked for Mr. Hays. He had the store there.

Q. Now, with what frequency do you get shipments say from Chicago, Mrs. Blakesley?

A. That depends on what time of the year. Sometimes in the fall of the year when I am getting orders for Christmas, it comes in frequently. Sometimes at other times of the year it doesn't come in that often.

Q. How about your school books?

A. I buy most of those in Des Moines, and they are brought out by Wagner Motor Freight mostly.

Q. How about your shipments from Omaha, how frequently do you get goods from there?

[fol. 1171] A. Oh, possibly once or twice a month.

Q. And how about the Twin Cities and Kansas City?

A. That is not so frequent. I know some things I buy altogether from St. Paul, and they come in possibly two or three times a year.

Q. Now, what transportation agency have you been using for these out of State shipments, primarily?

A. Well, my dishes come from Dubuque. That is not out of State. That comes by Rock Island Motor Freight. That comes very satisfactorily.

Q. What about your Chicago merchandise?

A. That came the same way.

Q. Freight that has been coming that way since you have been in business there?

A. Yes, practically all of the Chicago merchandise come by Rock Island Transit.

Q. How about your St. Paul freight, how does that come in?

A. Well, I had one shipment that came down by Watson and transferred. Watson picked it up and took it out. I have had the Nebraska and Iowa come in from Omaha and deliver a few times.

Q. How do you ordinarily get your merchandise out of Omaha?

A. Well, it usually comes either by Rock Island Motor Transit and part of the time by Iowa-Nebraska.

Q. Do you specify how your shipments are to come from Omaha?

A. No, I never have. They have shipped the cheapest [fol. 1172] way, and they send them out either way.

Q. From what company would you say you get the majority of your merchandise into Menlo, by what transportation company?

A. What I get from Des Moines, and I really do more buying from Des Moines, comes by Wagner Motor Freight.

Q. He has the local rights from Menlo to Des Moines?

A. That is right.

Q. The Rock Island Motor Freight doesn't have the local rights between Menlo and Des Moines?

A. No.

Q. I mean from out of State points.

A. The Rock Island Motor Freight brings me in more than any other.

Q. And has that service been satisfactory?

A. Yes, sir.

Q. And how does that service compare with the service you get from the Iowa-Nebraska?

A. I have never had very much complaint against any of them.

Q. Does the Iowa-Nebraska have an operation in there every day?

A. No, they don't have. He comes in about a couple of times a week.

Q. About a couple of times a week?

A. Yes.

Q. And how frequent is the Rock Island Motor Transit's service?

A. Every day.

[fol. 1173] Q. Now, would the elimination of the Rock Island Motor Transit's service be adverse to your business interests there or not?

A. Yes, I think it would, especially around Christmas time when people demand a certain thing, and have made a special order for it and want it right away, and I think you would lose your sale of it.

Q. That is particularly from Chicago?

A. Yes, and from Dubuque.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross-examine.

Mr. Fowler: No cross.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: The next witness is Mr. Hayes from Casey.

O. E. Hayes was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation, Mr. Hayes?

A. O. E. Hayes, Casey, Iowa, a so-called merchant, I guess.

Q. You are in the general merchandise business at Casey?

A. Yes. Floor covering is one of our bigger things.

Q. Now, what size is the town of Casey?

A. About eight hundred.

Q. And how long have you lived there?

[fol. 1174] A. Twenty-four years.

Q. And how long have you been in the general merchandising business?

A. Twenty-four years.

Q. Have you been engaged in any other business besides that?

A. No.

Q. You weren't in the transfer business or in the trucking business at one time?

A. No.

Q. And how far west of Des Moines is Casey located?

A. I believe fifty-five miles.

Q. And that is on U. S. Highway No. 6?

A. Yes, sir.

Q. And also on the main line of the Rock Island?

A. Yes, sir.

Q. Now, you testified before in this case, and will you tell us again where you have your shipments come from that come from out of State points?

A. Well, Omaha mainly. We have some from Chicago, some from Morris, Illinois, Kansas City, and St. Louis.

Q. What transportation agency has provided you with service for these shipments?

A. Definitely, the Rock Island.

Q. Why do you say "Definitely, the Rock Island"? Do you mean the Rock Island Motor Transit?

[fol. 1175] A. In years gone past we had a little experience with other lines, that is from interstate, these out of State shipments, and they weren't satisfactory.

Q. Well, now, when you say "Rock Island", you mean the Rock Island Motor Transit?

A. The Rock Island Motor Transit.

Q. Do you specify, and have you specified the Rock Island Motor Transit's service for these out of State shipments?

A. Yes.

Q. And will you state for the record why you did that?

A. The reason we liked the Rock Island's service, either out State or in State, was because they maintain a regular schedule. On some of these other lines that we have had experience with, we are as liable as not to be called back to the store in the evening or sometimes even in the morning before we open our store.

Q. Well, now, you say the Rock Island Motor Transit maintains a regular schedule into Casey?

A. Every day.

Q. And do you know, is that peddled direct from Des Moines, or peddled some other way? Do you know how the physical operation of that peddle run is operated?

A. Yes, I think, if I understand you right, any goods that might come in from out of State probably is shipped to Des Moines and comes to Casey by truck. Even rail merchandise [fol. 1176] is brought in by truck, I believe.

Q. Well, how about from Omaha, do you know how that merchandise comes in?

A. I believe that is the same. Of course, there is one other line that brings merchandise out of Omaha, too.

Q. I am talking about the Rock Island Motor Transit.

A. The Rock Island comes direct.

Q. Now, you say you have had experience with other carriers hauling merchandise to your business at Casey, and that experience was unsatisfactory you say?

A. Yes.

Q. And just tell us what the difference was between the service you received from these other carriers as compared with the service you received from the Rock Island Motor.

A. Well, I think I stated the biggest objection I have is to no particular schedule, and the fact that they—I am talking about the experience I have had?

Q. That is right. That is all we are asking you about.

A. And they were, perhaps, as liable to bring merchandise into the town, and I would have to go back to the store outside of regular hours.

Q. I see.

A. And in reference t that, that happened a time or two

when my wife was alone, and she was called to the store at night, which didn't please her too much to let some truck [fol. 1177] driver unload some merchandise. In fact I would hate to tell you what she said.

Q. Now, Mr. Hayes, as I understand it, there are other trucking companies that operate through Casey?

A. You mean interstate?

Q. Yes, that go through Casey?

A. Oh, yes.

Q. You see a great many trucks go through town every day, do you not, by different trucking companies?

A. Yes.

Q. Now, there has been some reference made to the Iowa-Nebraska Transportation Company as serving that area out there. Have you had some shipments brought in by that company?

A. Oh, yes.

Q. And is that one of the companies that brings them in at irregular hours and not on schedule?

A. No, I wouldn't say that. The objection I have to the Iowa-Nebraska in preference to the Rock Island, is that they don't maintain daily service, and that might, that might contain some bad features.

Q. It has been your experience, as I understand your answer, is that the Iowa-Nebraska has around twice a week service?

A. I believe that is what they come.

Q. But the Rock Island Motor Transit has daily service both ways?

A. That is right.

[fol. 1178] Q. Now, for your shipments from Kansas City and Minneapolis, have they come in by Rock Island Motor Transit?

A. Yes.

Q. And you mentioned something about even rail freight comes in on the Rock Island truck.

A. That is the thing I am very hopeful that we will continue to have Rock Island Motor service. In our particular territory, in other words, in my particular town, while the Rock Island Railroad, I think, are supposed to give, I might be wrong on this, but I think they are supposed

to give storedoor delivery. Now, the only way that I get storedoor delivery from the Rock Island Railroad is through the good graces of the Rock Island Motor Transit driver. As long as you treat them very nice, they treat you very nice, and they will unload at times the railroad freight in my store.

Q. Instead of taking it to the depot?

A. Mmmmhuh.

Q. Now, have you had experience, I will withdraw that.

Q. Do you order sometimes by rail freight rather than motor truck freight?

A. Well, I have merchandise come in that way. I wouldn't say I have ordered it that way. I think possibly, in other words, in our business we are like a lot of other businesses, we sometimes forget to route merchandise the way it should be, and we just neglect to. Then it is liable to come in different ways.

[fol. 1179] Q. It might come in on rail billing, is that right?

A. Yes, rail billing.

Q. You don't know why it would be shipped that way. Is it fair to say a shipment that comes in on rail billing generally originates at points east or southeast of Chicago at some far removed point?

A. Well, our shipments in those cases, yes, I would say that. Our shipments in those cases are not as heavy as what our Omaha, or Des Moines, or some of our closer towns would be, but that probably is true.

Q. The point I am trying to make is, you might have some merchandise, such as a uniform linoleum——

A. Yes, I really do.

Q. Floor covering, and things of that character, if that should happen to be manufactured at some remote point in the Carolinas or somewhere in the eastern seaboard territory, might that not come in on rail billing than motor freight billing?

A. We don't get any linoleum excepting through our jobbers here in Des Moines and through Omaha.

Q. Now, as between motor truck freight and rail freight, which do you prefer?

A. Which do I prefer of the two?

Q. Yes.

A. I don't believe I caught you.

Q. Would you sooner have a shipment come in on motor [fol. 1180] truck billing or rail billing whether it moved by rail or truck?

A. I definitely would. If you would see me unloading five hundred forty pounds of linoleum you would see why.

By Exam. Carpenter:

Q. You would rather have it come in on motor carrier billing than rail billing?

A. Definitely.

By Mr. Nolan:

Q. Now, what would be the effect on your business there if the services of the Rock Island Motor Transit Company were terminated or substantially reduced?

A. Well, that is a question that would have to be answered in this way. If nobody would take their place I certainly would quit the linoleum business.

Q. What about the other general merchandise business?

A. Oh, I suppose I would buy a truck of my own.

Q. Do you know of any other transportation company, trucking company, that provides the same type of service that the Rock Island Motor Transit provides at Casey?

A. As good a service?

Q. The same type of service, as good a service?

A. Definitely not. The Rock Island Motor is the only people that give us daily service, and give us regular service.

Q. Have you had any experience with claims of the Rock Island Motor as compared with other companies?

A. Well, I wouldn't say I had claims in so many years, so many years, I don't believe I have had any claims with [fol. 1181] any other companies. Most of my claims, I think, have been with the Rock Island Motor, which were satisfactory.

Q. As I understand it the majority of your shipments come in by Rock Island Motor?

A. Yes, altogether if I think about it.

Q. If you have anything to say about it?
A. Yes, sir.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Casey is located on U. S. Highway 6?
A. Right.
Q. And served by the Rock Island Railroad?
A. Right.
Q. Is there a railroad agent at Casey?
A. That is right.
Q. And is the motor carrier freight and the railroad freight both handled down there at the depot on the same dock?
A. Well, I don't believe that the Rock Island Motor Freight use the dock there. I don't believe they do, unless it would be something to be delivered in the country.
Q. At Casey they don't have any pick-up and delivery truck operating and deliveries are made from the over-the-road truck?
A. That is right.
Q. So, if you received a shipment from the Rock Island Motor Transit, it is delivered to your door, the storedoor delivery?
[fol. 1182] A. Yes, storedoor delivery.
Q. And I think you have said that is true also for your railroad freight?
A. No, I did not say that was true.
Q. Well, your railroad freight comes out on the same truck with the motor carrier freight?
A. That is only out of the goodness of the truck driver's heart. If he wants to deliver it to you, this is what he would do. May I explain?
Q. Sure, sure.
A. He would get the agent, and the agent and he will deliver my goods, see, but it isn't one hundred per cent that way. There are times, in other words, if you change a truck driver and until you got acquainted with him, he would possibly unload at the depot.

Q. They don't maintain any delivery service on railroad freight at Casey?

A. That is right.

Q. And the only way you get it delivered is you are nice to the truck driver?

A. That is right.

Q. Putting it frankly, you do have rail billed shipments come in?

A. Oh, yes.

Q. And they are handled on the same truck as the motor freight shipments?

[fol. 1183] A. As far as I know all merchandise comes into Casey by truck, so far as I know, see.

Q. No local railway freight service into Casey?

A. Do we have a local railway service?

Q. Freight service on L. C. L. shipments?

A. That I can't answer.

Q. If there is any you don't know about it?

A. Well, of course, no doubt there are.

Q. But in so far as your contact is concerned, all of your freight, whether it is motor carrier freight or rail freight, is brought in on the same truck?

A. So far as I know it is.

Q. The Iowa-Nebraska serves the town of Casey?

A. That is right.

Q. But you say serves it probably on an every other day basis?

A. I think two times a week.

Mr. Fowler: O. K. That is all.

Exam. Carpenter: Redirect.

Redirect-examinaion.

By Mr. Nolan:

Q. Mr. Hayes, do I understand the fact to be there is no local rail service in Casey?

A. Yes, that is right. I think the railroad intends, their intention is to have one but the trouble is, maybe I am taking up too much time to explain what I am trying to say, their trouble is they don't have enough railroad freight that [fol. 1184] anybody will take the job of local drayage.

Q. All right.

A. They have taken, but they last a month or a week.

Q. Now, the fact is, is it not, the railroad does operate local freights in and out of Casey for carload business such as grain and livestock?

A. Oh, yes.

Q. Cement, lumber and things like that?

A. Yes, sir.

Q. Now, what is the fact as to whether or not when the truck driver has rail freight, that he first has to get the rail agent in order that the rail agent will be able to process or check that freight before it is delivered, and he hunts up the rail agent and brings the rail agent along to check the freight and delivers it direct rather than taking it to the depot where the rail agent can check it?

A. Now, do I understand you are asking me?

Q. Strike that whole thing. Did I understand you to say that when the truck driver delivers rail freight to your place of business, he first gets ahold of the rail agent, is that right?

A. Well, he should.

Q. Well, does he?

A. I think he does more or less.

Q. Do you know why he does that?

A. Do I know why he does it?

[fol. 1185] Q. Yes.

A. Absolutely. It isn't his responsibility.

Q. That is what I am getting at. It is not the truck drivers' responsibility to deliver it?

A. It is not his responsibility.

Q. Do you know whether or not he gets the rail agent so the rail agent can check that merchandise and clear the bills on it before it is delivered?

A. I would imagine so. That would be nothing more than good business.

Q. Then the freight that comes in on rail billing, that travels on a waybill, and the rail agent has to check that?

A. Yes.

Q. And that is the duty of the rail agent rather than the truck driver?

A. Oh, yes.

Q. And also the rail agent can help unload some of those big packages?

A. That is right.

Mr. Nolan: That is all.
Mr. Fowler: That is all.

(Witness excused.)

HOWARD LOEHR was sworn and testified as follows:

Direct examination.

[fol. 1186] By Mr. Nolan:

Q. Will you give us your name, please?
A. Howard Loehr.
Q. You live at Colfax?
A. I work for the Monroe Company in Colfax.
Q. What is the Monroe Company?
A. The Monroe Company is a manufacturing company. We manufacture folding tables and benches. We also sell folding chairs.
Q. That is a manufacturer of fixtures and furnishings of a certain type?
A. That is right.
Q. Now, as I understand it you manufacture goods for, like churches, lodges and organizations, hotels, requiring a special type of furniture?
A. Yes, the tables we ate on this noon we made.
Q. Over at the hotel?
A. Yes, bench tables.
Q. The food tasted better on those?
A. It did to me.
Q. Mr. Loehr, what is your capacity with the Monroe Company?
A. I am in charge of the shipping amongst other things, production and purchasing.
Q. How many employees do you have?
A. About sixty-five.
Q. What products does your company use in your manufacturing work?
[fol. 1187] A. We buy lumber, top material, which would be masonite, which is steel, and we process all of those

items and ship out the completed tables. We also buy folding chairs and resell them.

Q. From what sources do you get your raw materials that you process?

A. We have the lumber shipped in from the west coast. The masonite comes from Louisiana. The steel comes from Chicago, Omaha, or Pennsylvania.

Q. Does your lumber come in by rail, carload?

A. Yes, it does. The lumber, masonite, all comes by rail. We specify the steel by truck because if it comes by rail we have to unload it and haul it a block to our factory.

Q. You are not on rail siding?

A. No, we are not. We have a warehouse on rail siding where we unload the chairs, but the factory is not on rail siding.

Q. Now, what transportation agency have you been using to get in your steel and other smaller items that you use in your manufacturing work?

A. The steel that comes in is almost entirely truckload shipments, and that does not come Rock Island. They are not allowed to carry it. The small items that we use, we use paints, varnishes, nails, we get L. C. L. shipments of steel, those will come in, we specify Rock Island on those.

Q. They come in from the east, Chicago and points east?

A. Chicago, Des Moines, Omaha, and a few other places. [fol. 1188] Now, there is a very good reason for specifying, having the Rock Island bring that in. In the first place our shipments are daily, and the Rock Island hauls them out for us, so we know exactly when the items will come in. They will come in on the truck that hauls our tables out.

Q. We will get to the outbound shipments. Now, as I understand it, you have the demands for regular motor carrier service, for products and materials moving into your plant daily, is that right?

A. That is right. Another item is cartons, which comes in by the full truckload.

Q. Now, tell us whether or not your company used the facilities of the Rock Island Motor Transit Company for these truckload shipments prior to their limitations, prior to the limitation imposed on the Rock Island Motor Transit.

A. I think they did. I don't know.

Q. Were you with the company at that time?

A. No, I was not.

Q. How long have you been with the company?

A. A year and a half.

Q. Well, these limitations were on last summer, the restrictions, the latter part of the summer. Weren't you familiar with truckload shipments prior to that?

A. No, I wasn't.

Q. You have taken over the shipping department since then?

[fol. 1189] A. That is right.

Q. Now, what size would you say these shipments of paint, nails, varnish and things of that character that move into your place of business?

A. The smaller ones run ordinarily from one hundred pounds to, well, most of them are fairly small, under, two thousand pounds or under.

Q. And you say they come from the points of Omaha, Chicago, and other points?

A. Yes.

Q. Now, your outbound shipments, how do they move out and in what sized shipments do they ordinarily move?

A. We ship a full truckload every day, practically a full truckload. It is all picked up at our dock except for express and a few parcel post shipments. A sample chair will go parcel post. There are very few express shipments. Everything else is picked up at our dock by the Rock Island.

Q. In truckload quantities?

A. That is right.

Q. Well, what would be the weight involved there?

A. Well, it will average about forty different shipments to a truckload.

Q. I see. The individual shipments will be less than five thousand pounds, is that right?

A. Most of them are. That isn't always the case. There [fol. 1190] will be about once a week we will have a shipment that will exceed five thousand pounds.

Q. And might there be for some interior Iowa point where it would be an Iowa shipment rather than an interstate shipment?

A. Very seldom.

Q. You say you ship out about a truckload a day of various sized shipments?

A. That is right.

Q. Destined to all points in the United States?

A. We sell all over the United States. Ours is a mail order business. We sell direct to the user, very few sales to a dealer. Six per cent to be exact.

Q. Do you have salesmen on the road?

A. No salesmen.

Q. Mail order?

A. That is right.

Q. Now, what company, would you say the Rock Island Motor Transit is the one that handles the outbound shipments? A. Yes.

Q. Do you specify the Rock Island Motor Transit for those outbound shipments?

A. Well——

Q. You control them and direct that the Rock Island Motor Transit handle them?

A. That is right.

[fol. 1191] Q. Now, you say that you specify inbound shipments wherever possible for less than truckload quantities by the Rock Island Motor Transit, and also can control the outbound shipments by the Rock Island Motor Transit. Why do you do that?

A. Because we get service. We are very selfish. We have something and we like it.

Q. Well, in other words, do you find that the Rock Island Motor Transit's service is superior to any other service you can get there?

A. It certainly is.

Q. Both inbound and outbound?

A. That is right.

Q. Do you know of any company that provides the same daily service in and out of Colfax that the Rock Island Motor Transit does?

A. No.

Q. Have you made some inquiry to determine whether or not there is other service of equal or better quality?

A. We have tried some others.

Q. And what has been your experience?

A. It has been very unsatisfactory.

Q. Would you care to detail those experiences?

A. There is one particular truck company, personally I like the individuals that I have met. I think that once they get the material hooked-up that we have assigned [fol. 1192] to them, it gets delivered in pretty good shape. However, they state they will be in our shop every day up to two o'clock, two or three. They do not do that. Whenever we want them to make a pick-up, we call them. We close at 4:30. They are liable to get there after five or even after six.

Q. Where do you contact them?

A. Call Des Moines.

Q. Des Moines?

A. That is right.

Q. What would be the effect upon your—withdraw that.

Q. By the way, are you able to contact the Rock Island Motor Transit's daily schedule through a driver of the Rock Island Motor Transit or some agency of the Rock Island Motor Transit in Colfax?

A. That is right. We have three contacts. One of them is with, I believe, Charley Elliott is your agent there. I don't know his exact title.

Q. You say you have three contacts you mean with the Rock Island Motor Transit?

A. Every day. One is with Charley Elliott. One is the truck driver that picks up our freight every day, and the third is another Rock Island Motor Transit truck which hits other points and comes through Colfax and checks with us daily. Then, if the first truck can not take all of our freight, he will take the balance. During the past eleven weeks I imagine there has been fifteen times [fol. 1193] when he had to take part of our freight.

Q. The second truck take your surplus?

A. That is right.

Q. So a service that had one service in there a day would not be able to take care of your needs, is that right?

A. That is right.

Q. Now, what would be the effect on your company's business if the service of the Rock Island Motor Transit were eliminated or materially restricted?

A. I do not know. I don't know what.

Q. Do you know where you could replace the present service of the Rock Island Motor Transit out of Colfax?

A. I do not know anything that would take the place of it for our shipping.

Mr. Nolan: That is all. You may cross-examine.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. As I understand your statement any volume shipments is by truck by a carrier other than the Rock Island Motor Transit?

A. Inbound freight, that is right.

Q. And the reason you prefer that service over rail carrier service is the reason it is unloaded on your dock?

A. That is correct.

Q. And if it was a rail shipment it would have to be [fol. 1194] unloaded at the depot, you would have to go and get it, and bring it over to your business?

A. It would be a full carload and set on the siding, but we would have to go over and get it, that is right.

Q. Now, do you have truck service by the Rock Island Motor Transit on rail billing?

A. They take all of our rail shipments to Des Moines from our factory to Des Moines, and then it is shipped by rail car there.

Q. Then, irrespective of whether it is motor carrier billing or Rock Island Railroad billing, it is all picked up by the same truck?

A. That is right.

Q. And then with respect to the outbound shipping, is the same thing true?

A. The outgoing shipments, that is the outgoing shipments.

Q. On your inbound shipments do you receive rail billed shipments inbound that are handled by the Rock Island Motor Transit truck?

A. I don't know of any. We might.

Q. Then all of your outbound rail shipments are transported by truck to Des Moines?

A. That is correct.

Q. Irrespective of whether you send them rail billed or motor carrier?

A. That is right.

Q. Now, with respect to your outbound shipments, where [fol. 1195] one shipment exceeds two thousand pounds, how are you handling that at the present time?

A. Well, let's see. Isn't it five thousand pounds?

Q. I mean two thousand.

A. Over two thousand. As I recall we are allowed five thousand pounds on one billing by truck at the present time. We have no carton that will weigh two hundred pounds, that we can split up a shipment if we want to.

Q. The point I am making is this restriction hasn't bothered you any?

A. It has cost me a little more freight occasionally.

Q. That is all. Have you shopped around to see if you can get another carrier to take a shipment over five thousand pounds?

A. We have. We have tried that, yes.

Q. And have they handled that for you?

A. No. We didn't think that it was worth-while so far as we are concerned.

Q. The service is there available if you want it?

A. We have this one particular truck line we have given a little business to recently, and they might even be two days late in making a pick-up when they promised to come.

Q. Let's get right down to it, what are the motor carriers that serve Colfax?

A. A lot of trucks come through. Iowa-Nebraska, Knaus and Watson, and I believe a few other trucks.

[fol. 1196] Q. Have you used Watson's service.

A. I have never used Watson on any outgoing shipments.

Q. They do bring some inbound to you?

A. They have, yes.

Q. And how about the Iowa-Nebraska?

A. I have never used them outbound, either.

Q. Have they served you inbound?

A. I think they have in the last years.

Q. How about Knaus?

A. We have used them on some outgoing shipments.

Q. How about on inbound?

A. I don't believe we have got anything through them.

Q. The Knaus Truck Lines serve Kansas City, do they not, and Omaha?

A. We use them for Indiana points.

Q. And you are using them at the present time?

A. We have in the last two weeks.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Yes. Mr. Loehr, in regard to your inbound truckload shipments of steel, do you know who carries that, who has brought that in?

A. I don't know.

Q. Are you familiar with the fact there are livestock [fol. 1197] haulers into the Chicago market who fill up their trucks with steel and rough merchandise and bring it back into the Iowa territory?

A. Yes, sir.

Q. Have you had any of that service from Chicago on steel?

A. I don't know for sure. I think we did once. It smelled like it.

Q. Now, is it one of the regular truck lines that bring in the steel in truckload quantities now from Chicago?

A. Usually it is, yes.

Q. But you don't know whether they handle that on their own trucks or it might be one of these pig haulers that brings it back?

A. I don't know.

Q. Which company was it that has been two or three days late in making pick-ups after they agreed to?

A. That was Knaus.

Q. At a specified time?

A. Yes.

Q. Knaus Truck Line.

A. They have been there the same day, and one day late, and never over two days' late.

Q. In other words, if you have got a truckload of freight going out with Knaus, you have to contact the Des Moine office, is that right?

A. We always do. They say they will stop by every day [fol. 1198] but they don't do it. We don't have shipments for them every day.

Q. You say that is primarily for Indiana points where you can get a through billing by Knaus?

A. Yes.

Q. Otherwise, the freight moves out by Rock Island Motor?

A. Yes.

Mr. Nolan: That is all.

Exam. Carpenter: Recross?

Mr. Fowler: No.

Exam. Carpenter: You are excused.

(Witness excused.)

RALPH SHELTON was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation?

A. Ralph Shelton, Mason City, Iowa, Traffic Manager of the Chamber of Commerce.

Q. Does your Chamber of Commerce at Mason City have a Traffic Bureau department?

A. Yes.

Q. You are the Traffic Manager of that department. How long have you been in Mason City in your present position?

A. I have been in my present position since last fall but I have been there three years.

[fol. 1199] Q. And have you been engaged in the same type of work during that period of time?

A. That is right.

Q. Were you Assistant Traffic Manager before last fall?

A. Yes.

Q. Now, for the record, what is the size of Mason City and what industries it has there?

A. Mason City's population is 27,984 in the last census. We have numerous industries there, the larger industries the cement plant, State Brand Creameries, Deckers, those are the larger. There are a good many smaller industries.

Q. Those are manufacturing companies of various types, is that right?

A. That is right.

Q. And you have, I assume, the general line of wholesale distributing houses a city of that size would have?

A. Yes.

Q. Mr. Shelton, are you familiar in a general way with the subject of this hearing?

A. I believe so.

Q. Now, Mason City isn't located on U. S. Highway 6. As a matter of fact it is about one hundred thirty miles north?

A. It is on 65, one hundred thirty miles.

Q. One hundred thirty miles. Does the Rock Island Motor Transit provide a daily service in and out and [fol. 1200] through Mason City, Iowa?

A. They do.

Q. And that is on the Rock Island Motor Transit line between Minneapolis and St. Paul on the north and Des Moines and Kansas City on the south?

A. That is right.

Q. And are you familiar with the type of service provided by the Rock Island Motor Transit through, into, and out of Mason City?

A. Yes.

Q. And is that a daily service?

A. It is a daily service.

Q. Now, what particular interests do you, as a repre-

sentative of the shipping and jobbing interests of Mason City, have in this particular proceedings?

A. Well, we are interested in retaining the good service that we do have, and we are probably primarily affected on this on shipments from the Tri-Cities.

Q. Now, is there a flow of traffic between the Tri-Cities, consisting of Rock Island, Moline, Silvis, and East Moline, on the one hand, and Mason City, Iowa, on the other?

A. That is right.

Q. And is there a flow of traffic between those points?

A. Yes.

Q. What company has been handling that traffic in the past? Has the Rock Island Motor Transit been handling [fol. 1201] that traffic between the Tri-Cities and Mason City?

A. Yes.

Q. And that would be by the use of U. S. Highway No. 6 to Des Moines and north on Highway 65, is that correct?

A. Yes, sir.

Q. State whether or not the service which the Rock Island Motor Transit has been providing between the Tri-Cities, on the one hand, and Mason City, on the other, has been satisfactory, or otherwise?

A. It has been satisfactory.

Q. Is there a substantial flow of traffic between the Tri Cities and Mason City over the Rock Island Motor Transit line?

A. The majority of it is small shipments, I mean as far as our members are concerned, but it is a steady flow.

Q. Steady flow. What other transportation facilities do you have between the Tri-Cities and Mason City?

A. Watson.

Q. And is that a regular service, daily service?

A. Yes.

Q. What is the difference between the service of the Rock Island Motor Transit between the Tri-Cities and Mason City, and the service provided by Watson Bros.?

A. They are, the majority of our members are using the Rock Island Motor Transit.

Q. Do you know why they are doing that?

[fol. 1202] A. Service.

Q. Is the service provided by the Rock Island Motor Transit more regular?

A. Yes.

Q. And desirable than the Watson Bros.' service?

A. That is correct.

Q. Now, state whether or not the Rock Island Motor Transit has a terminal, terminal agent and pick-up and delivery service at Mason City.

A. They have a terminal there, agent and pick-up and delivery.

Q. And state whether or not they have facilities at the terminal for informing shippers of rate matters, classifications, and things of that character?

A. They do.

Q. I assume that Watson Bros. probably have a terminal there, do they not?

A. They have an agent there.

Q. They have a local cartage company as their agent?

A. Yes.

Q. They don't have a terminal of their own. Then they don't have an agent that would be available for rate information and things of that character?

A. No.

Q. State whether or not it would be to the interest of of the jobbing and shipping interests of Mason City, that [fol. 1203] the present service of the Rock Island Motor Transit, which has been used over the years that you are familiar with, be maintained.

A. It is of very definite interest to us.

Q. Now, do you have any concerns in Mason City that act as distributors for quantity shipments that come into Mason City and then are broken down and sent on to destination in smaller points around Mason City?

A. We have several grocer brokers, wholesale.

Q. And state whether or not to your knowledge they have say a carload shipment come in of merchandise, and part of it is for Mason City and part of it is destined to other points in that area?

A. I believe that is true.

Q. And would some of that merchandise reach as far south as Highway No. 6, or would that be?

A. I don't believe it would reach that far.

Q. Then, as I understand your testimony, you are appearing here to seek the keeping of the service that you have had between the Tri-Cities area and Mason City?

A. That is right.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Mason City is located on the north and south main line of the Rock Island between the Twin Cities and Kansas [fol. 1204] City?

A. That is right.

Q. And is presently served by the Rock Island Railroad?

A. That is right.

Q. And by the Rock Island Motor Transit?

A. That is right.

Q. And by the M. & St. L. Railroad, and by the Chicago, Great Western Railroad?

A. That is right.

Q. And what other roads?

Mr. Nolan: The Milwaukee.

By Mr. Fowler:

Q. And the Chicago, Milwaukee and St. Paul?

A. Yes.

Q. Now, do any of the other railroads maintain affiliated truck service in connection with the railroad operations in and out of Mason City?

A. I believe the Milwaukee.

Q. And, so far as you know, the other railroads do not?

A. I know of no others.

Q. Now, with respect to the north and south operation, what are the names of the established motor carriers that are serving Mason City in interstate commerce?

A. North and south?

Q. Yes.

A. We have the Rock Island Motor Transit, the Des [fol. 1205] Moines Transportation—are you speaking of Des Moines?

Q. I am speaking of the north and south operation.

A. And then we have Bos.

Q. You have the Merchants Motor Freight?

A. To what point?

Q. They operate along the north and south highway through Mason City enroute from Des Moines to Minneapolis, do they not?

A. I wasn't aware of it.

Q. All right. How about Bruce Motor Freight?

A. Not to my knowledge.

Q. Well, there is the Des Moines Transportation——

A. And Bos and Rock Island Motor Transit.

Q. And Bos and Rock Island Motor Transit. You are not familiar with the fact that the Bruce Motor Freight have an operation through Mason City north and south daily?

A. No, I am not.

Q. You are not familiar with the fact that the Merchants Motor Freight have an operation through Mason City daily?

A. Daily, no, sir.

Q. And does the McCoy Truck Lines serve Mason City?

A. Yes.

Q. Now, with respect to the shipments you are speaking about, are you talking about shipments that originate at Moline, Rock Island and East Moline?

A. Yes.

[fol. 1206] Q. Or that might originate at Davenport, but by nature of the manner in which they are handled, they become interstate shipments, isn't that correct?

A. Yes, sir.

Q. You are aware of the fact, are you not, that the Merchants Motor Freight Company have authority to serve the Tri-City area, are you aware of that?

A. From Mason City?

Q. We will get to that later. Were you aware of the

fact they do have a terminal at the Tri-Cities and serve the Tri-City area, and the Merchants Motor Freight also serve Mason City, do they not?

A. I wasn't aware of it.

Q. Now, Bos has authority to conduct this operation?

A. Yes.

Q. So at the present time, is that the Bos Freight Lines or Bos Truck Lines?

A. Yes, sir.

Q. And at the present time the Bos Freight Lines could handle these shipments, could it not?

A. It could.

Mr. Fowler: That is all.

Redirect examination.

By Mr. Nolan:

Q. To your knowledge the Bos Freight Lines or Bos Truck Lines, I don't know which it is, Joe or Al, do either [fol. 1207] one of those companies have a terminal, agent and dock facilities at Mason City?

A. No.

Q. Do you have any knowledge of any regular daily service between the Tri-Cities and Mason City by Bos Truck Lines or Bos Freight Lines?

A. No.

Q. And how about Merchants, does the Merchants Motor Freight have a terminal agent, a dock and terminal facilities at Mason City?

A. Not to my knowledge.

Q. If they had one there would you probably know about it?

A. Well, I think that I would.

Q. Do you think they would inform you if they had those facilities?

A. Well, they might not.

Q. If they are looking for business, they would probably contact you?

A. If they were looking for business they would probably make the calls.

Q. You are not familiar with that service?
A. No.

Mr. Nolan: Oh, I think that is all.

Recross-examination.

By Mr. Fowler:

Q. Don't these motor carriers maintain some sort of a [fol. 1208] terminal facility in a town like Mason City?
A. They have an agent. They make their stops at a terminal such as Stubbs.
Q. They have a motor freight terminal there, don't they?
A. With Stubbs they do.
Q. Yes.
A. I misunderstood your question. They do dock down there at Stubbs.
Q. You are talking about the motor freight terminal Stubbs maintains?
A. Yes; Stubbs Freight Line.
Q. And that is where they unload the over-the-road trucks and pick up. How is the pick-up and delivery done in Mason City by the over-the-road carriers other than the Rock Island Motor Transit? Is that by a local cartage company?
A. Yes.
Q. And what is the name of that company?
A. Cadwell Storage.
Q. The Cadwell Transfer and Storage acts as a pick-up and delivery agent by these over-the-road carriers about which I have been talking. Does Cadwell have a freight dock there, too?
A. Yes.
Q. So these carriers use the facilities of Cadwell or the facilities of Stubbs?
A. That is right.
[fol. 1209] Q. The Rock Island Motor Transit has its freight dock at the Rock Island depot?
A. They have their own independent dock.
Q. They have a dock away from the depot?

A. Yes.

Q. What about the pick-up and delivery service they perform?

A. They have their own pick-up and delivery truck.

Q. And do they pick up Rock Island Motor Transit's freight as well as Rock Island Railroad freight?

A. They pick up the Rock Island Motor Transit only.

Q. They pick up only Rock Island Motor Transit freight?

A. To my knowledge.

Q. Who handles the railroad freight?

A. I can not answer that.

Q. Are you sure about what you said? I am not trying to quibble with you. Are you certain about what you have said?

Mr. Nolan: I am objecting to that. It is argumentative and trying to badger and browbeat the witness.

Exam. Carpenter: Objection sustained.

Mr. Fowler: I will ask you, Mr. Nolan, how is the pick-up? Now, Mr. Witness, I am satisfied the fact is the Rock Island Motor Transit Company do the pick-up and delivery work for the railroad in Mason City, as well as for the motor freight company, and the only reason I am saying that is I want to get it on the record is all.

[fol. 1210] Mr. Nolan: We will concede that is the fact.

Mr. Fowler: I am not trying to embarrass you at all with the question.

Exam. Carpenter: Give us something else.

Redirect examination.

By Mr. Nolan:

Q. Yes. By the way, Mr. Shelton, are you familiar with any of the so-called motor carriers operating between the Twin Cities, Des Moines, and on south to Kansas City, or north and south through Mason City, say from Omaha to the Twin Cities, whether or not that operation is an overhead operation between terminals rather than to local points such as Mason City?

A. Oh, it is pretty much a local operation, I believe.

Q. Well, the point I am trying to make, whether or not

there are carriers that operate from Des Moines to Minneapolis without stopping at Mason City, as an overhead operation. Are you familiar with any such operation as that, or have you noticed any trend toward that operation?

A. There is that trend.

Q. And are there carriers that operate over Highway 65 between the Twin Cities, Des Moines and Kansas City or St. Louis, or some other point, that do not stop at Mason City except for full loads? Are you familiar with that trend?

A. No.

Mr. Nolan: I believe that is all.

Recross examination.

[fol. 1211] By Mr. Fowler:

Q. All right, let's take a shipment from St. Louis moving to Mason City. How many carriers do you have that perform a daily service from St. Louis to Mason City?

A. Merchants.

Q. Are you talking about the Merchants Motor Freight, Inc.?

A. Mmmmhuh.

Q. All right. What is another one? How about Bruce Motor Freight, Inc.?

A. Yes, I think Bruce have one.

Q. Let's take Kansas City. How many carriers do you have that have a daily service from Kansas City to Mason City?

A. The Rock Island Motor Transit.

Q. How about the Merchants Motor Freight?

A. I believe so.

Q. How about the Bruce Motor Freight?

A. I don't know about Bruce.

Q. Now, from Minneapolis how many carriers do you have serving Mason City daily?

Mr. Nolan: That is objected to as not cross-examination and not within the scope of the direct examination.

Mr. Fowler: You are talking about a north and south operation.

Exam. Carpenter: I overrule the objection. You can go ahead. The direct was all over the country, Mr. Nolan.

Mr. Nolan: We started south of Mason City.

[fol. 1212] Mr. Fowler: I might say, off the record.

(Statement off the record.)

Exam. Carpenter: Will you read the last question, please?

(Question read.)

A. From Minneapolis we have Murphy, Des Moines Transportation, Rock Island Motor Freight.

By Mr. Fowler:

Q. The Des Moines Transportation Company, Inc., has an operation from Des Moines north to Minneapolis through Mason City?

A. Yes.

Q. And on shipments that are moving from the Tri-City area to Mason City, they could interline with any number of carriers at Des Moines, Iowa, could they not?

A. Yes.

Mr. Fowler: That is all.

Mr. Nolan: That is all.

Exam. Carpenter: That is all. You are excused.

(Witness excused.)

Maurice Turner was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, please, place of residence, and occupation?

A. Maurice Turner, Atlantic, Iowa, Parts Manager for the Linke Chevrolet.

[fol. 1213] Q. Linke Chevrolet, that is a Chevrolet Agency at Atlantic, Iowa, isn't that correct?

A. Yes.

Q. Now, you understand what is being considered here in this case?

A. Partially I think.

Q. And you are in charge of the inbound shipments, I assume, for the Chevrolet Agency there at Atlantic, Iowa?

A. Yes.

Q. And from what out of State points do you get such shipments?

A. Most of our shipments are from Chevrolet, either from Chicago or from Flint; some few from Janesville.

Q. Chicago, Illinois, Flint, Michigan, or Janesville, Wisconsin, is that right?

A. Yes.

Q. And how have those shipments moved into Atlantic the past year?

A. Of course, our Chicago always comes in Rock Island Motor Transit.

Q. Do you specify receiving it that way?

A. That is right. That is the only way Chevrolet ships, if possible.

Q. By Rock Island Motor Transit?

A. That is right, out of Chicago or Des Moines.

Q. How long have you been connected with the Chevrolet [fol. 1214] Agency in Atlantic, Iowa?

A. Six years.

Q. And how about shipments from Flint, Michigan, how have they been coming in?

A. If they are a rush order, which they generally are, they will come as far as Des Moines the quickest way, and out on the Rock Island Motor Transit.

Q. And how from Janesville, Wisconsin?

A. Well, I think they generally come rail to Des Moines. I am not sure whether they come to Des Moines or Chicago. That is generally a rush order, and if we need a motor assembly or something, we will call Des Moines and they will teletype Chicago or Flint, and that will come the quickest way.

Q. How does that come out to Atlantic?

A. The Rock Island Motor Transit.

Q. You don't know whether it comes out of Chicago or Des Moines?

A. Generally comes out of Des Moines.

Q. Do you specify the shipments, where you control the routing, via Rock Island Motor Transit?

A. I do. I don't have very much other than Chevrolet, but where I have anti-freeze, tires or chains, I do specify. It either comes out of Omaha or out of Des Moines.

Q. By Rock Island Motor Transit?

A. That is right.

Q. Why do you specify the Rock Island Motor Transit service?

[fol. 1215] A. Because they are the quickest service we have out there.

Q. Do you know of any other carrier that gives the same type of service with regard to regularity that the Rock Island Motor Transit does to Atlantic, Iowa, from both east and west interstate points?

A. Well, Watson goes through there every day. The Iowa-Nebraska, I don't know what it gives.

Q. Watson goes through there. Do they give a daily service on all sized shipments the Rock Island Motor Transit does to Atlantic?

A. They are supposed to. They have an organization. Personally they don't give as good a service, no.

Q. That is what we want to know.

A. That is to us.

Q. Is there any carrier operating through Atlantic that gives the same type of service that the Rock Island Motor Transit does?

Mr. Fowler: Objected to as repetition.

Mr. Nolan: So far as you know?

Mr. Fowler: Objected to as repetition.

Mr. Nolan: The question hasn't been asked before.

Mr. Fowler: I will bet a hundred dollars.

Exam. Carpenter: The objection overruled.

A. No.

By Mr. Nolan:

Q. Now, I will ask you what effect it would have on your [fol. 1216] company's business if the Rock Island Motor

Transit's service was terminated or substantially reduced in quality.

A. Well, it would tie up our shop, our body shop considerably. Now, we can call Des Moines for a part we don't stock, a top, for instance, or a door, and they will teletype it on in the same day to Chicago, which is our master warehouse. If it is early enough in the day, they will get it out and we will get it the next day. Some of our regular orders that have to come from Flint, come freight to Des Moines, but if we didn't have a daily service and had to come rail, it could easily be a week or ten days on just one part.

Q. Now, have you ever received the same type of service from Chicago by any other carrier than the Rock Island Motor Freight?

A. No, we don't receive anything from Chicago only Rock Island Motor Transit.

Q. Only Rock Island Motor Transit. What are the size of shipments you ordinarily receive from these out of State points?

A. The majority of the orders run as high as one hundred fifty to two hundred pounds, from there up to, Oh, I suppose they run up to two thousand, twenty-five hundred possibly.

Q. You say they run from——

A. Two hundred pounds with our small shipments, and large shipments, our Des Moines shipments run up to two thousand, twenty-five hundred pounds sometimes. The Chi- [fol. 1217] cago shipments generally run from six hundred to fourteen or fifteen hundred pounds.

Q. Do you have occasion to have shipments in excess of five thousand pounds?

A. No.

Mr. Nolan: You may cross-examine.

Mr. Fowler: No cross-examination.

(Witness excused.)

Mr. Nolan: Mr. Burns.

TOM BURNS was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you please state your name?
A. Tom Burns.
Q. I believe you live at Anita, Iowa?
A. Yes, sir.
Q. What is your business, Mr. Burns?
A. I am a partner in the Shaffer & Burns firm of John Deere farm dealers.
Q. Farm implements, John Deere dealers, is that right?
A. Yes.
Q. Do you handle a full line of John Deere farm equipment?
A. We try to.
Q. And, in addition to the John Deere line, do you handle wagon boxes, and things of that character?
A. Yes, sir, numerous items.
[fol. 1218] Q. Lime spreaders, manure spreaders, things of that character?
A. Yes, sir.
Q. From what source do you get your implements and other supplies?
A. Our implements, so far as our whole goods from John Deere, come mostly in carload lots, and we happen to be located, the carload comes to our town, we unload the carload and split up with other people, but all of our repairs and practically all of our buying is out of Omaha, the big percentage.
Q. Do you have any shipments coming from the Tri-City area?
A. Oh, yes, those are rail shipments coming in carload lots.
Q. I am talking about small shipments.
A. We do, yes, if it is a factory order on breakdowns we ordinarily suppose they don't have in Omaha, they will come from there also.
Q. Now, I understand so far as your John Deere parts

are concerned, or John Deere implements, they are transported to you direct in carloads and divided?

A. That is right.

Q. But you do occasionally have factory orders that come direct from the factory at Moline?

A. That is right.

Q. Now, what transportation service or agency do you use for those small shipments from the Tri-City area?

A. Practically all Rock Island Motor, I think, so far as [fol. 1219] we are concerned.

Q. Do you specify such method of transportation?

A. We have.

Q. Why have you?

A. That has been our best service, about our only fast service.

Q. And do you know of any other truck line operating through Anita that provides a daily service from the Tri-City area to Anita?

A. I believe not.

Q. Now, Anita is located on U. S. Highway No. 6?

A. That is right.

Q. And about half-way between Des Moines and Omaha?

A. Yes, sir.

Q. And how big a town is Anita?

A. One thousand, eleven hundred.

Q. And I assume Anita is just like any other town that size in Iowa, it has all of the retail service establishments?

A. Most of them.

Q. Do you have any factory or industry there?

A. No, we don't.

Q. How about your shipments out of Omaha in regard to parts or supplies?

A. Our shipments from John Deere and all of the other wholesale companies from which we buy farm supplies, different companies, come by Rock Island Motor. The only [fol. 1220] thing we get from Omaha that comes by any other company is a prepaid deal that is on our tires. They prepay the freight on them and they have their choice.

Q. How do they come out?

A. The Iowa-Nebraska.

Q. Do you specify your shipments from Omaha by the Rock Island Motor?

A. Yes, sir.

Q. Why do you do that?

A. We get the best service from there by far.

Q. Do you know of any company that provides a regular, daily service from Omaha than the Rock Island Motor Transit?

A. None daily.

Q. Does the five thousand pound limitation that the Rock Island Motor Transit is now working under have any effect on your business?

A. Not so much because our shipments are small enough orders, I think run up to several hundred pounds. However, we might get in two thousand pounds, but it is very apt to be in two or three different billings, two or three different companies, I mean, possibly on the same day.

Q. With what frequency do you get shipments in to Anita from the east or the west out of State points?

A. From Omaha during the Christmas season we have some each day. Sometimes more than one billing a day, and [fol. 1221] get into different rates and costs us a little extra freight, but any time from now on we are apt to have freight every day.

Q. State whether or not during the farm season you have many emergency shipments?

A. Every day, that is if they get there.

Q. You many times have to call Omaha?

A. In our busy season we do practically every day.

Q. What would be the effect on your company's business if the Rock Island Motor Transit was compelled to cease operating in and out of Anita?

A. Well, until there would be something of more service than I know of at the present time, it would probably cost us a lot in that we would have to make a trip to Omaha on most days.

Q. And that is what distance?

A. Seventy miles.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. As I understand it, the Iowa-Nebraska Transportation Company has a service to Anita from Omaha?

A. Yes, sir.

Q. But you say that you use the Rock Island Motor Transit exclusively in so far as you have any control?

A. We have, yes.

Q. Now, why is that, in what particular is their service superior to the Iowa-Nebraska?

[fol. 1222] A. Well, I won't tell you what time they get in there now. Back when I first knew the Iowa-Nebraska coming in, they were usually getting in there late in the day after we were closed. We like to get our freight in the morning, and we usually do. If we call in this morning for repairs, we are needing them badly or we wouldn't call it. We would have them tomorrow morning by 11:00 a. m.

Q. So you haven't used their service lately, the Iowa-Nebraska?

A. We never have on repairs.

Q. You don't know when they get in?

A. I don't know. They haul our tires, as I stated. Those are stock order shipments which we don't control, and come prepaid.

Q. Is Anita located on the rail line of the Rock Island Railroad?

A. Yes.

Q. And does the railroad have an agent at Anita?

A. Yes, sir.

Q. And do they have a Rock Island Transit agent also?

A. No, sir.

Q. Just the one agent. Is the dock of the Rock Island Motor Transit Company located at the railroad freight depot?

A. I don't know. They have a dock of their own except for the rail freight. There is a dock.

Q. How are the deliveries made? Are they made from the over-the-road truck at Anita?

[fol. 1223] A. What deliveries do you mean?

Q. Your repair parts.
A. They deliver to our door.
Q. Off the road truck?
A. Yes, sir.
Q. In other words the Rock Island doesn't maintain a pick-up and delivery service at Anita?
A. No, sir.
Q. Does the Rock Island Railroad maintain a pick-up and delivery service?
A. I don't believe they do. They have tried it, I think. We don't get enough rail freight, except in carload lots, that I know. They may have some man hired that does delivery.
Q. You do receive some rail shipments, I presume?
A. Yes, sir.
Q. How are those delivered?
A. We pick them up ourselves. We have our own pick-up truck.
Q. At the rail depot?
A. Yes, sir.

Mr. Fowler: That is all.
Mr. Nolan: That is all.

(Witness excused.)

Exam. Carpenter: Five minute recess.

(Short recess.)

Exam. Carpenter: All right, we will proceed.
[fol. 1224] Mr. Nolan: Mrs. Fesler.

Mrs. Dan Fesler recalled, testified further as follows:

Redirect examination.

By Mr. Nolan:

Q. You are the same Mrs. Dan Fester from Coralville, Iowa, who took the stand here this afternoon, is that right, for the purpose of the record?
A. Yes.

Q. Now, do you have any freight bills with you that show shipments that you received from Chicago by transportation companies other than the Rock Island Motor Transit, showing the time the shipment was delivered to those transportation companies, and when they were delivered to you at Coralville?

A. Yes.

Q. And will you refer to the shipments, the date they were delivered to the carrier in Chicago and the time, the date you received them.

A. All right. Do you want the name of the company?

Q. The name of the company.

A. The name of the candy company?

Q. The name of the shipper, the name of the carrier, the date the merchandise was delivered to the carrier at Chicago and the date you received it.

A. All right. We have from the D. L. Clark Company, and the carrier was the Iowa-Nebraska.

[fol. 1225] Q. Where is the D. L. Clark Company located?

A. It is in Pittsburgh, Pennsylvania, is where it originates.

Q. Yes. When and where was that shipment delivered to the Iowa-Nebraska Transportation Company?

A. Picked up on January 17th.

Q. Where?

A. Picked up in Davenport, I think. Wasn't those picked up in Davenport?

Q. I don't know. You are reading it.

A. No, they are picked up in Chicago. Picked up in Chicago.

By Exam. Carpenter:

Q. You said "January 17th". What year?

A. 1952.

By Mr. Nolan:

Q. That shows on a copy of the freight bill you received from the Iowa-Nebraska Transportation Company the date they were picked up in Chicago?

A. Yes, January 17th.

Q. 1952, and when did you receive that shipment?
A. On January 23d.
Q. At Coralville?
A. Yes, at Coralville.
Q. All right. What other freight bills do you have of other transportation companies, the time of delivery to that carrier, and the time you received it?
A. One from the Williamson Candy Company, picked up by the Des Moines Transportation Company.
[fol. 1226] Q. Where?
A. In Chicago.
Q. On what date, year?
A. On January 4, 1952.
Q. When did you receive the shipment at Coralville?
A. On January 9, 1952.
Q. All right, what other freight bills?

By Exam. Carpenter:

Q. Where is the Williamson Candy Company located?
A. At Chicago, Illinois. And then we had another one here. That was also the Williamson Candy Company, picked up by the Des Moines Transportation Company.

By Mr. Nolan:

Q. At Chicago?
A. Yes, at Chicago.
Q. On what date?
A. It was picked up on January 21, 1952, and was delivered to us on January 25, 1952.
Q. And what were the size of those shipments, Mrs. Fesler, starting with the first one and going through to the third?
A. One hundred seventy-five pounds, one hundred five, and one hundred fifty-two respectively.

Mr. Nolan: And in connection with the testimony of this witness the applicant tenders to counsel for examination the freight bills referred to by the witness.

Mr. Fowler: We will waive the examination. Read the [fol. 1227] revenue off of those three freight bills the carrier got.

Exam. Carpenter: In the same order she read.

A. The revenue?

Exam. Carpenter: Yes, what did you pay?

By Mr. Fowler:

Q. What were the transportation charges?
A. $3.19. They were prepaid.

Mr. Fowler: I understand.

A. All right, O. K. $2.02 prepaid and $2.06 prepaid.

Recross-examination.

By Mr. Fowler:

Q. Now, as I understand it, those shipments you are referring to now were delivered to you actually by the Maher Transfer Company?

A. Yes.

Q. And I forgot to ask you while on the witness stand, are the deliveries made to you by the over-the-road truck or are the deliveries made to you by the pick-up and delivery service of the Rock Island Motor Transit?

A. The Rock Island Motor Transit are brought from the pick-up trucks.

Q. They are not brought from the over-the-road trucks at Coralville. In other words, the pick-up and delivery is done from the Iowa City terminal?

A. Yes.

Redirect examination.

By Mr. Nolan:

Q. By the way, do those freight bills indicate when the [fol. 1228] Maher Transfer in Iowa City received the shipments?

A. Yes.

Q. Which one is first?

A. This one.

Q. Taking the one you referred to first, the shipment

over the line of the Iowa-Nebraska Transportation Company, which shows the shipment originated in Chicago on the 17th day of January, 1952, when was that shipment, according to this freight bill, received at Iowa City by the Maher Transfer Company?

A. January 19, 1952.

Q. And then delivered to you on January 23, 1952?

A. Yes.

Q. Which is the next freight bill? Now, the second freight bill showing a shipment handled by the Des Moines Transportation Company, received by that company in Chicago on January 4, 1952, and that indicates the date the Maher Transfer Company received it at Iowa City?

A. January 7, 1952.

Q. And then delivered to your place of business on what date?

A. January 9th.

Q. And on the third freight bill, does that show the date the shipment was received by the Maher Transfer at Iowa City?

A. It was picked up on January 21st, and Maher received it on January 25th.

Q. You received it the same day?

[fol. 1229] A. Yes, they delivered that one on the same day.

Q. And it originated in Chicago on the 21st of January?

A. Yes.

Mr. Nolan: All right. That is all.

Mr. Fowler: Wait a minute.

Recross-examination.

By Mr. Fowler:

Q. Is this the type of shipment you were talking about in your testimony?

A. Yes. That is just a small portion.

Q. I understand.

A. Incidentally, on those shipments I have asked them to route Rock Island Motor Transit, but they don't give me the reason for not shipping that way.

Q. The shipment from the Williamson Candy Company on the Des Moines Transportation Pro A-241529 consisted of five cartons of O'Henry candy, total weight one hundred five pounds, is that correct?

A. Yes.

Q. Now, that was picked up at the Williamson Candy Company in Chicago by the Des Moines Transportation Company, and was taken to Iowa City where it was delivered to their local cartage agent?

A. Yes.

Q. And then the local cartage agent brought that out to Coralville, Iowa, three miles distant from Iowa City?

A. Yes.

[fol. 1230] Q. The total transportation receipts on that shipment was $2.02?

A. Yes.

Q. Is that the type of shipment the Rock Island Motor Transit is handling for you?

A. Yes.

Mr. Fowler: That is all.

Mr. Nolan: That is all. Thank you.

Exam. Carpenter: You may be excused.

(Witness excused.)

Mr. Nolan: Mr. Delaney, please.

Edward J. Delaney was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Mr. Delaney, your name is Edward J. Delaney?

A. Yes, sir.

Q. You live at Stuart, Iowa, Mr. Delaney?

A. Yes, sir.

Q. And what business are you in?

A. Hardware, appliance, plumbing and heating.

Q. And how long have you been so engaged?

A. I have been in business there for twenty years.

Q. Do you handle the usual line of hardware and plumbing supplies, heating supplies, as the retail stores?

A. Yes.

Q. What is the size?

[fol. 1231] A. We have a solid sixteen hundred good eggs and a few stinkers, approximately sixteen hundred.

Q. And Stuart is approximately forty-five or fifty miles west of Des Moines?

A. About forty.

Q. And that is on Highway 6?

A. Highway 6.

Q. And also on the main line of the Rock Island?

A. That is right.

Q. For the record will you tell us what source you use for supplies, for merchandise from out of State points?

A. On our interstate shipments from Chicago, Kansas City, Omaha, Rockford, Winona, and the Twin Cities, we use the Rock Island Motor service.

Q. And do you use that service exclusively?

A. Not exclusively. Occasionally we will get a shipment by other carriers.

Q. And is that at your request, or the shippers direction?

A. Usually the shippers direction.

Q. Do you specify how your shipments shall come whenever you have an opportunity?

A. Whenever I can.

Q. And what carrier do you specify?

A. We use the Rock Island Motor Transit when it is available, that is on intrastate shipments. On our local Des Moines shipments, we have a local carrier, Wagner Motor Freight.

[fol. 1232] Q. And he has the local operation serving between Menlo and Des Moines, is that right?

A. That is right.

Q. Including Stuart?

A. Menlo, Stuart and Dexter.

Q. How about your Omaha shipments, do you get any merchandise from Omaha?

A. Yes, we get quite a little merchandise from Omaha. Usually we ship Rock Island Motor. Occasionally we will ship by some other carrier.

Q. Now, state whether or not the service of the Rock Island Motor Transit in interstate commerce is regular and daily through Stuart?

A. Yes, sir, it is, and it has been very satisfactory.

Q. Is there any other carrier you know of that supplies and provides a daily truck service in interstate commerce in and through the town of Stuart, Iowa?

A. I don't know what the other companies' schedules are. There are a number of companies that operate through there and into Stuart. I don't know their schedules. I have never been solicited by them, and I have never been, seen their schedules.

Q. Now, you say you have received some shipments from other carriers. What has been the character of the service of those other carriers on those shipments as compared to the Rock Island Motor Transit?

[fol. 1233] A. Sometimes the service was O. K. Recently I had an experience. I believe it was in February. I called Sioux City for several rolls of inlaid linoleum, which weren't available in Des Moines. They had them in Sioux City, and I asked them if they could be shipped that day. The people were moving in several days occupation, and wanted this work done. It was routed from Sioux City to Omaha via Watson, and Omaha to Stuart by Iowa-Nebraska. We received this linoleum two days later, which wasn't bad service, but one of the rolls of linoleum was badly damaged.

Q. What have you found with regard to claims with other carriers as compared with the Rock Island Motor Transit?

A. The Rock Island Motor have always been very prompt and very fair in their settlements. This happens to be the second or third damage I have had from the Iowa-Nebraska. I have never yet had a claim settled with them. On this particular linoleum delivery, I wasn't going to accept it, but one roll was the one we had a large order sold from, and we had to have it that day, so I accepted the shipment, paid the freight on it, and the driver promised he would either send the adjuster out to adjust the claim or he would see I receive forms for doing that. That has been over a month ago, and today I haven't received anything or had any one call on me about it.

Q. You say you have other unsettled claims with the Iowa-Nebraska?

[fol. 1234] A. Yes.

Q. And over what period of time?

A. One claim has been dating back as much as three years. They dropped a stove for us, a high priced range, and marked the bill "damaged". We paid them and didn't do anything more about it. I didn't take it up with the Interstate Commerce Commission, and thought if that is the way they are going to do business.

Q. Do you avoid doing business with the Iowa-Nebraska on account of that?

A. Yes, sir, every time I get a chance I avoid it.

Q. Mr. Delaney, maybe I asked you this, but I will ask you again, if there are any transportation companies that provide a daily motor transportation service into Stuart except the Rock Island Motor Transit?

A. The Wagner Motor Freight out of Des Moines provides a local service.

Q. That is solely an intrastate?

A. Intrastate. I see trucks going through and I see trucks in town. I don't know what lines are franchised to operate on a scheduled basis.

Q. You said you have never been solicited?

A. I have never been solicited.

Q. And never been given a schedule of the companies?

A. No, sir.

Q. Do you know whether the Wagner Motor Freight has [fol. 1235] through rates with other carriers?

A. They have through rates. We ship some interstate through them.

Q. They pick up at Des Moines and bring on out?

A. Yes, sir.

Q. Now, what would be the effect on your business at Stuart in the event that the Rock Island Motor Transit should be required to terminate its operations or substantially curtail?

A. We would probably still continue in business, but it would definitely be a hardship for us because we are used to the prompt service they render.

Q. Have you been using the Rock Island Motor Transit since that company has been in business?

A. Yes, sir.

Q. Now, in regard to the size of shipments, do you have any shipments that exceed five thousand pounds?

A. We haven't had for some time. We have received carloads by rail. Some of our shipments will run over a ton at a time. Very few over five thousand pounds.

Mr. Nolan: I believe that is all, Mr. Delaney.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Deliveries to your store are made by the Rock Island Motor Transit from the over-the-road truck?

A. No, sir, they are made by a local truck from the Rock [fol. 1236] Island depot or terminal.

Q. In other words, the Rock Island maintains a pick-up and delivery service there?

A. Yes, sir.

Q. And does he handle your rail freight as well as your motor freight?

A. Yes, sir.

Q. And where is the terminal of the Rock Island Motor Freight located with respect to the freight dock of the Rock Island Railroad?

A. They use the same terminal.

Q. And does the Rock Island Motor Transit have an agent there as well as the railroad company?

A. They don't have a local agent there. We are contacted possibly several times a month by their representative in that territory. I believe he lives in Atlantic.

Q. If you wanted to discuss anything locally, you would do it with the Rock Island Railroad agent?

A. Yes, sir. I understand he is authorized to.

Q. Speak for both, is that your understanding of it?

A. Yes, sir.

Mr. Fowler: That is all.

Mr. Nolan: That is all. Thank you, Mr. Delaney.

(Witness excused.)

Mr. Nolan: Mr. Mark.

[fol. 1237] Howard Mark was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Your name is Howard Mark?
A. Yes, sir.
Q. Where do you live, Mr. Mark?
A. Casey, Iowa.
Q. And what is your business?
A. Hardware and plumbing.
Q. Oh, Mark's Hardware. Do you handle the general line of hardware?
A. Yes, sir.
Q. And how about any other?
A. Hardware and appliances, and some plumbing supplies.
Q. Any heating equipment?
A. Well, just oil heaters.
Q. Now, do you have any shipments come in from out of the State?
A. Some, yes.
Q. Where are those shipments?
A. Well, we have had one or two from Minneapolis, and a few from Omaha.
Q. Anything from the Tri-City area or Chicago?
A. Not that I recall.
Q. How long have you been in business there, Mr. Mark?
A. Just over a year. I think it was the 15th of December, 1950.
[fol. 1238] Q. And since you have been in business have you used the service of the Rock Island Motor Transit?
A. Yes, almost exclusively.
Q. And do you direct your own routing when it is possible?

A. Yes. When we first came there our predecessor suggested that the Rock Island Motor Transit would give us the best service, and we have used them almost exclusively on everything from the east.

Q. How about from the west?

A. Well, it is usually the Iowa-Nebraska from Omaha.

Q. Is that by your request, or does the shipper route it?

A. The shipper routes it.

Q. What is the quality of service of the Iowa-Nebraska as compared with the Rock Island Motor Transit?

A. Well, really I haven't figured the time it has taken any shipment. It hasn't been anything we have been pressed for we have gotten from them.

Q. Do you know anything about whether the Iowa-Nebraska provides a daily service into Casey, or is it twice a week service?

A. I can not tell you definitely, but to the best of my knowledge it isn't a daily service. I wouldn't say.

Q. How about the service of the Rock Island Motor Transit?

A. That is daily, five days a week.

Q. Now, do you know of any transportation agency, other than the Rock Island Motor Transit, that provides a daily motor truck service in and out of Casey?

[fol. 1239] A. Frankly I don't, but I am not acquainted with any other companies, nor their schedules.

Q. Did you know there are a large number of trucking companies that go through Casey?

A. Yes.

Q. But do you know whether any of those companies provide a daily service for any sized shipment in and out of Casey?

A. Not that I know of. Just the Rock Island, Iowa-Nebraska is all we have had any dealings with.

Q. What would be the effect on your business if the Rock Island Motor Transit were required to terminate its operations through Casey or substantially curtail?

A. It would be inconvenient for us in this way. We would have to go to the depot and pick up our freight, whereas it is delivered to our door, and even what freight comes by rail is picked up and delivered to us.

Q. By the Transit Company?
A. Yes, sir.

Mr. Nolan: That is all. You may cross-examine.
Mr. Fowler: No cross.
Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Elder.

[fol. 1240] WALDO ELDER was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, please?
A. Waldo Elder.
Q. Where do you live, Mr. Elder?
A. Atalissa.

By Mr. Bradshaw:

Q. Where?
A. Atalissa.

By Mr. Nolan:

Q. How do you spell Atalissa today?
A. A-t-a-l-i-s-s-a.
Q. What is your business?
A. I run a lumber yard.
Q. And you appeared at the other hearing?
A. That is right.
Q. And what is the fact as to whether you have more than one yard?
A. Yes, I have two yards. I have one at Wilton Junction, too.
Q. You have one at Atalissa and one at Wilton Junction?
A. One is the Elder Lumber Company and one is the Economy Lumber Company.

Q. And those are owned and operated by you?

A. Yes.

Q. Those are not line yards?

A. No.

Q. Now, in addition to handling lumber do you handle [fol. 1241] the usual building supplies and hardware, and the usual farm supplies such as gates, fencing and things of that character?

A. Yes.

Q. How long have you been in business at Atalissa, Mr. Elder?

A. Five years.

And are you active in the management at both yards?

A. No, I have a manager at Atalissa.

Q. But you supervise the buying and freight moving in and out of both places, is that right?

A. Yes.

Q. Now, Atalissa and Wilton Junction are both stations on the main line of the Rock Island Railroad, are they not?

A. Yes.

Q. And those towns are located between Iowa City and Davenport, Iowa?

A. Yes.

Q. Now, what commodities do you have shipped in from out of State points in less than carload quantities?

A. Oh; steel items, doors, overhead doors, building supplies.

Q. How about hardware?

A. Hardware, yes, hardware.

Q. And from what points do you get those supplies?

A. Most of the stuff clears through the Tri-Cities and from some points in Illinois, and Chicago.

Q. And with what frequency do you get shipments into [fol. 1242] your yards at Atalissa and Wilton Junction from out of State points?

A. In the busy season lots of times every day. On the general run maybe three or four times a week.

Q. And those shipments, I assume, range from minimum shipments up to several hundred pounds?

A. That is right.

Q. Or several thousand pounds, is that right?

A. Yes.

Q. Do you have occasion to have shipments in excess of five thousand pounds come in at any time?

A. That would be truckloads. We have a lot of truckload deliveries coming.

Q. That would be wire and roofing material?

A. That is right.

Q. And those supplies come out of the Chicago area, do they not?

A. Roofing from St. Louis and wire from Chicago.

Q. Now, I ask you, how do those truckload shipments come in?

A. The wire is most generally always fellows that take livestock in and come back.

Q. Some pig hauler takes a load of livestock into Chicago and comes back?

A. Wire is that way.

Q. And how about your roofing?

A. I can't think of the name but they have regular trucks for that.

[fol. 1243] Q. Out of St. Louis?

A. Out of St. Louis.

Q. Now, what company has provided your local motor carrier service to your yards at Atalissa and Wilton Junction?

A. The Rock Island Motor Transit.

Q. And has that been almost exclusive?

A. It has been exclusive.

Q. Has that been at your request, or the only service available?

A. So far as I know the only service available.

Q. Now, Wilton Junction is located immediately on U. S. Highway No. 6?

A. Yes, sir.

Q. And Atalissa?

A. Right next to it.

Q. It is on the highway, too?

A. Right on it, yes.

Q. Now, do you know of any other motor carrier that provides a daily service into Wilton Junction and Atalissa other than the Rock Island Motor Transit?

A. I have never seen another carrier in there.

Q. What would be the effect on your business at these two points if the Rock Island Motor Transit terminated its operations or was required to substantially reduce its service?

A. It would work a hardship. The people want the service, and the experience has been over the freight lines [fol. 1244] which it would come in on, a week, two weeks, three weeks.

Q. In other words you know of no facility that would take the place of the Rock Island Motor Transit?

A. I know of none.

Mr. Nolan: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Where is Atalissa with respect to Davenport?

A. Davenport, it is forty miles west.

Q. Where is Wilton Junction with respect to Davenport?

A. It would be thirty miles, thirty-five miles west.

Q. Does the Rock Island Railroad maintain an agent at Atalissa?

A. Yes.

Q. And also at Wilton Junction?

A. Yes.

Q. And does the Rock Island Motor Transit maintain agents at those places?

A. No.

Q. So the one agent, the Rock Island Railroad agent handles the thing for both of them?

A. So far as I am concerned I never handle anything through the Rock Island agent.

Q. How about railroad shipments?

A. Yes, we have rail shipments.

Q. Of less carload weights is delivered to you by the [fol. 1245] Rock Island Motor Transit?

A. Yes.

Q. So far as your delivery there in town is concerned, the delivery is off of the highway truck, isn't it?

A. Yes.

Q. You don't have a separate pick-up and delivery service?

A. No.

Q. And that is true with respect to both rail and motor carrier shipments?

A. Yes.

Q. Although the rail shipments do come in by truck?

A. Yes.

Q. And, as I understand your situation, your large volume quantities of roofing, steel and similar items are either shipped to you in rail carload lots or in carload lots by trucks other than the Rock Island Motor Transit?

A. Yes.

Q. And you use the services of the Rock Island Motor Transit on your small drop shipments?

A. Yes.

Mr. Fowler: That is all.

Exam. Carpenter: Redirect.

Mr. Nolan: That is all. Thank you.

(Witness excused.)

Mr. Nolan: Mr. Moeller.

[fol. 1246] HERBERT MOELLER, was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. State your name, place of residence and occupation, please.

A. Herbert Moeller.

Q. And you live at Wilton Junction?

A. Wilton Junction.

Q. And what is your business?

A. Western Auto appliances and television.

Q. You are the appliance dealer of the Western Auto, and that is owned by you?

A. Associate.

Q. You are the appliance dealer?

A. I am.

Q. What appliances do you have shipped in from out of State points?

A. Well, there is factory shipments. Some of the merchandise is ordered for factory shipment. It may come from the central point here. All factory shipments would come from wherever the factory is. Trailers and stuff like that I get them from the warehouse in Kansas City. Some storage batteries order is factory again, and would come out of Chicago.

Q. You are a branch or associate dealer of the Western Auto Stores. Where is the warehouse of the Western Auto [fol. 1247] Supply Company.

A. Dubuque, our Division or Zone, Dubuque.

Q. But you get factory shipments direct from the factory to your place of business, is that correct?

A. Yes.

Q. Get those from different out of State points?

A. Yes.

Q. How about your appliances, are those gotten at different places?

A. Most of the television comes out of the Tri-Cities. I get them myself.

Q. You buy direct from the dealer in the Tri-Cities?

A. Yes, the Hawkeye, as well as here in Des Moines you had the Emerson, and I believe they were shipped through on the Rock Island straight through truck, I am pretty sure.

Q. You are under a dealer here in Des Moines?

A. Distributor.

Q. Distributor here in Des Moines, but they ship the units themselves?

A. By a different truck, by the Rock Island Motor.

Q. They have a distributor here in Iowa of the Emerson Television Company?

A. They did last fall, yes.

Q. But the shipment may come direct to you from the factory?

A. It could be, but the distributor here does ship direct, [fol. 1248] or did. We don't buy from there no more now. I wouldn't know.

Q. What I am trying to get at, Mr. Moeller, what shipments do you have from out of State points, and what are the points you receive these shipments from?

A. Like storage batteries?

Q. Where do they come from?

A. They are made in Chicago.

Q. All right.

A. It is a factory shipment. Well, I wouldn't know.

Q. What do you get from Kansas City?

A. Well, things that are listed under central warehouse I would imagine in the store. I own the store. I could not answer a lot of those questions exactly. I know we have shipments from the central warehouse, which is at Kansas City, and we do have factory shipments on factory orders.

Q. You say the central warehouse. That is the central warehouse of the Western Auto Supply Company?

A. That is the home office.

Q. And you have shipments coming from there of different auto supplies?

A. Yes.

Q. Now, what company has been handling your shipments into Wilton Junction, what transportation agency?

A. Rock Island Motor.

Q. Rock Island Motor. Do you know of any other com- [fol. 1249] pany that provides a daily service in and out of Wilton Junction?

A. There is none.

Q. And would your testimony be substantially the same as Mr. Elder as to the fact that the Rock Island Motor Transit Company is the only company that provides that service?

A. That is right.

Q. And what effect would it have upon your business if the service of the Rock Island Motor Transit Company was eliminated or substantially curtailed?

A. It would probably force me to take my truck and go to Davenport and pick it up at the H & W docks.

Q. You are how far from Davenport?

A. About thirty miles.

Q. Do you have any shipments in excess of five thousand pounds?

A. No.

Mr. Nolan: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Where you talk about the H & W docks, you are talking about your shipments from Dubuque?

A. Yes, that comes H & W and Rock Island.

Mr. Fowler: No cross.

Mr. Nolan: Just a minute.

Redirect examination.

By Mr. Nolan:

Q. How would you get shipments out of Chicago or Kansas City?

[fol. 1250] A. Whatever way the Western Auto specifies.

Q. I see. If the Rock Island Motor Transit didn't operate into Wilton Junction, do you have any idea how you would get a shipment from Chicago or Kansas City?

A. They would have to figure that out. I wouldn't know.

Mr. Nolan: That is all.

Mr. Fowler: Just a minute. If you are going to keep this up, we will keep this up.

Recross-examination.

By Mr. Fowler:

Q. Let's take Chicago. You get storage batteries out of Chicago in what quantity?

A. Those are the big tractor, not too many.

Q. What would they weigh, two hundred pounds a shipment?

A. Somewhere in there.

Q. What else do you get out of Chicago?

A. I can't, that is hard to tell. Wherever there is some special order. Most of that stuff is factory order.

Q. Mr. Moeller, let's try to keep this on some kind of a definite basis. You get storage batteries out of Chicago?

A. That is right.

Q. What other commodities do you get out of Chicago specifically?

A. Well, I don't know.

Q. All right. All right. Do you use rail service?

A. No.

Q. To Wilton Junction?

[fol. 1251] A. No.

Q. Do you have any local rail service into Wilton Junction?

A. Well, the Rock Island Railroad runs through Wilton Junction, but there is no way of having storedoor delivery.

Q. But you do get some rail shipments, do you not?

A. I don't remember the last one we have had.

Q. You haven't had any occasion to use a railroad shipment for some time, is that right?

A. That is right.

Q. Now, does the Rock Island Railroad maintain an agent at Wilton Junction?

A. I believe there is somebody took his job there, he just retired at fifty.

Q. The answer is there is?

A. I believe. I don't know.

Q. How are your shipments delivered to you by the Rock Island Motor Transit? Are they delivered at your store from the over-the-road truck?

A. What do you mean by "over-the-road?"

Q. The truck in which they are hauled from Chicago.

A. I think the over-the-road truck brings the Chicago shipments, while the rest of the merchandise comes through Davenport and the H & W Companies through pick-up truck, whatever you call it.

Q. Then, to the best of your knowledge these batteries that you get out of Chicago are delivered to your store [fol. 1252] in Wilton Junction by the same truck that hauls them from Chicago to Wilton Junction?

A. So far as I know.

Q. All right.

A. I have a manager running the store. I am there most of the time. He takes care of the business. I have seen

both trucks there, the little truck and the big one there at the same time.

Q. Do you run this store?

A. I own the store.

Q. Do you stay there and run it?

A. I have a manager.

Q. Kansas City, what do you get from Kansas City? Does that come by rail or by truck?

A. That comes by truck.

Q. Does that come on rail billing or truck billing?

A. I don't know.

Q. And is it delivered to your place of business by the Rock Island Motor Transit truck?

A. The Rock Island Motor Transit truck.

Q. Now, from what other point outside—those shipments, I suppose, are small shipments under five hundred pounds?

A. Yes.

Q. All right. From what other point outside of the State do you get any shipments of any consequence?

A. Well, that would be wherever that is shipped from the manufacturer.

[fol. 1253] Q. Name the point and the specific commodity, please.

A. That I can not answer. The manager takes care of that.

Q. You are not familiar with that?

A. I am not familiar with that. All I am interested in, to see we have service.

Exam. Carpenter: You are excused.

(Witness excused.)

Ivan Gorsuch was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Give us your name, place of residence, and occupation.

A. Ivan Gorsuch, Wilton Junction, Iowa. Plumbing and heating. I am an employer.

Q. You are in the retail plumbing and heating?

A. That is right.

Q. What out of State points do you get shipments from?

A. The only one we buy from is the May Company in Moline.

Q. And by what means do they move to Wilton Junction?

A. The Rock Island Motor Transit.

Q. Do you so specify?

A. Not always. We say "the best way".

Q. Do you know of any other carrier that provides the service from Rock Island, Illinois, to Wilton Junction?

[fol. 1254] A. Moline I mean, excuse me, Moline. Not to my knowledge.

Q. Do you know of any other company that gives a regular daily service to Wilton Junction than the Rock Island Motor Transit?

A. No, I don't.

Q. What would be the effect on your company if the service of the Rock Island Motor Transit were terminated or materially curtailed? Would your business be ruined there?

A. It certainly would. It would probably cost us the time of one man two days and a truck tied up for two days, going in and getting supplies twice a week.

Q. Now, what would be the ordinary sized shipment you receive from Moline?

A. Oh, from one hundred fifty pounds to eight hundred.

Q. Now, in your plumbing and heating business do you handle bathroom fixtures like tubs, lavatories and stools, and things of that character?

A. That is right.

Q. And pipes and things of that nature? What about the heating business? Do you handle furnaces?

A. Complete.

Q. Gas burning, oil burning?

A. Every type but gas furnaces.

Q. Do you handle stokers?

A. That is right.

Q. With what frequency do you get shipments in from Moline?

[fol. 1255] A. Oh, on an average, say the Tri-Cities, twice a week I will say like Davenport, and Moline, and Rock Island.

Q. And you say you buy from the May Company, which is a wholesale plumbing and heating supply company at Moline, Illinois, is that right?

A. Yes, sir.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. What other carriers serve Wilton Junction?

A. None that I know of.

Q. And how frequently do you send your own truck into Moline to get this freight?

A. At the present time, none at all unless it is just an emergency.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Murray.

JOHN MURRAY was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Give us your name, place of residence, and occupation, Mr. Murray.

A. John Murray, Ottumwa, Iowa, Chamber of Commerce.

[fol. 1256] Q. What is your position with the Chamber of Commerce?

A. I have the title of Traffic Manager.

Q. Do you have a separate department of your Chamber of Commerce devoted to traffic, or is that merely one of the departments set up among the members?

A. It is a separate function from the managing of the Chamber of Commerce, if that is what you mean.

Q. That is what I am getting at.

A. It is a separate department.

Q. And it is sustained by separate memberships in the traffic department?

A. No, they are general memberships to the Chamber.

Q. Do they pay additional dues for the services they get over and above the regular members?

A. No, they do not.

Q. Now, how many members do you have in your Traffic Bureau or Traffic Department?

A. That is just myself.

Q. Members of your Traffic Department?

A. We have roughly seven hundred members to the Chamber of Commerce, all of which at some time or other participate in the service.

Q. And how long have you been engaged as Traffic Manager of the Chamber of Commerce?

A. Only six months.

[fol. 1257] Q. How long have you lived at Ottumwa?

A. I was a native of Ottumwa. I have been working in traffic enterprises on the Pacific Coast for five or six years. I have just returned to Ottumwa.

Q. You have had traffic experience before returning to Ottumwa?

A. Five or six years.

Q. Can you tell us the principal industries located in Ottumwa?

A. John Morrell, meat packing plant, and John Deere has a large factory there, large machine shops, Johnston Lawn Mower Company, a large warehouse, J. W. Edgerly & Company, drug materials, and the usual run of retail establishments.

Q. What is the population of Ottumwa?

A. 30,500 roughly.

Q. Ottumwa is considered quite an industrial city, is it not?

A. For the population, yes, sir.

Q. Now, you understand, do you not, the nature of the service under consideration in this case?

A. I believe I do.

Q. And what interest does the service involved in this proceeding have to you as traffic representative of the shipping and receiving interests of Ottumwa?

A. Well, the service has been there for a number of years, and most of the people are satisfied with the service, and would like to continue using the Rock Island Trucking Company.

Q. To what particular area would the Ottumwa in-
[fol. 1258] terests be affected if this particular segment of the Rock Island Motor Transit Company was terminated?

A. Well, Omaha would be a good example. We have quite a few shipments going westbound to Omaha; also the Quad-Cities.

Q. You have other trucking companies that operate between Ottumwa and Omaha, do you not?

A. We do.

Q. Ottumwa and the Tri-Cities. Why do you say the Rock Island Motor Transit's service would affect the shipping interests of Ottumwa, then, when you have those other agencies?

A. One of the carriers I am familiar with has irregular service you might say. I think he comes in three times weekly.

Q. That is from Omaha?

A. From Omaha, yes. The other carrier that gives service between there, I have many complaints on their pick-ups. They have very poor service in picking up freight.

Q. At Ottumwa?

A. At Ottumwa. The claim policy of one of those companies is not too good.

Q. Now, Mr. Murray, state whether or not there are national concerns, or large concerns, which have warehouses at Ottumwa where merchandise is brought in there and distributed to other points in Iowa, among which points would be along U. S. Highway 6 between Davenport and Omaha.

A. Well, working in the reverse direction from Omaha

[fol. 1259] to Ottumwa, there is a considerable movement of tires and automobile parts for one of our large automotive distributors down there.

Q. Aren't some of those tires destined to points other than Ottumwa?

A. They come to Ottumwa and then are distributed throughout northern Missouri and this part of southern Iowa.

Q. And would that include points along U. S. Highway No. 6?

A. I don't believe their scope of operation would extend that far.

Q. Well, now, you have acquainted yourself, have you not, with the fact that the Rock Island Motor Transit Company has been providing a service to Ottumwa and the shipping interests of Ottumwa for a good many years?

A. I have.

Q. And, as I understand your position here is, you are asking to maintain the service the Rock Island Motor Transit Company has been providing the shipping interests of your city?

A. That is correct.

Q. Now, what is the fact as to whether or not the Rock Island Motor Transit Company has a terminal, terminal agent, and a pick-up and delivery service in Ottumwa?

A. They have all of those.

Q. And state whether or not the Rock Island Motor Transit Company has the facilities for giving rate information, rate classifications, and tracing shipments in Ottumwa.

[fol. 1260] A. They have a tariff man who is very efficient, and they have a very thorough tariff file.

Q. Now, Mr. Murray, from your experience in the traffic work, state whether or not where there is a substantial amount of outbound shipments if it is reasonably necessary that the transportation agency maintain a terminal, terminal agent, and traffic facilities for rates, tracing shipments, and filing claims.

A. I feel that such a service is necessary to the public as a part of the transportation service. I may have misunderstood your question.

Q. What I am getting at, where there is a large number of shipments, and a large volume of outbound shipments in a community, whether or not a transportation agency, in order to give a complete service should not have the facilities of a terminal, terminal agent, rate information, facilities for tracing shipments and for processing claims?

A. I feel that they should, yes.

Q. What other highway transportation agencies do maintain the same type of terminal facilities that the Rock Island Motor Transit Company does in Ottumwa, if any?

A. To what specific points, or what direction?

Q. No, I am asking in general.

A. In general? Repeat the question, please.

(Question read.)

A. The Burlington Truck Line is about the only one I can think of.

[fol. 1251] Q. Now, the Burlington Truck Line, Transportation Company, operates between Ottumwa and Omaha, does it not?

A. They do.

Q. And also between Ottumwa, does it operate to the Tri-Cities, or does it go through Burlington and then into Chicago?

A. I could not state that for a fact.

Mr. Nolan: I guess that is all.

Exam. Carpenter: Cross-examination.

Cross-examination.

By Mr. Fowler:

Q. What direct bearing does this application have on shipments moving either in or out of Ottumwa?

A. To cite a specific example, if I may, we have one shipper that ships machine parts for automobiles, different types of castings and bearings to Omaha, a fairly regular movement. His shipments are seven to eight thousand pounds each. At the present time he either has to make separate shipments, or use some other trucking line. This particular shipper is very unhappy with the service given

by the Burlington Truck Lines on his pick-ups. They are very slow.

Q. That is the only interest that you have here today?

A. To protect and maintain the service now being given is my only interest.

Q. Between Ottumwa and Omaha?

A. Yes.

[fol. 1262] Q. All right. Now, what carriers are there operating between Ottumwa and Omaha?

A. Burlington, and Watson has rather infrequent service.

Q. Well, the Burlington Truck Lines, which is an affiliate of the Burlington Railroad, as I understand it, operates a truck service from Ottumwa to Omaha over a route parallel to the rail line of the Chicago, Burlington & Quincy Railroad, is that correct?

A. I believe it is.

Q. And, at the present time, in addition to the service of the Burlington Truck Line, the Watson Bros. Transportation Company has authority to transport freight from Ottumwa to Omaha?

A. They do.

Q. Now, what other carriers are there that are not only authorized to serve but are performing a service between Ottumwa and Omaha?

A. Off hand I can't think of a one.

Q. Now, Ottumwa is located on the main line of the Chicago, Burlington & Quincy Railroad between Chicago and Omaha?

A. That is correct.

Q. And the route of the Burlington Truck Lines to Omaha is a direct route, is it not?

A. It is.

Q. The route that would be used by the Rock Island Motor Transit Company, in the event this application was granted, [fol. 1263] would be from Ottumwa north to Des Moines, and then from Des Moines over U. S. Highway 6 to Omaha?

A. Yes.

Q. Now, what is the type of traffic which this client of yours has moving to Omaha?

A. Bearings and castings of various sorts.

Q. And in what quantities are they shipped?

A. I would say roughly, seven, eight, nine thousand. It varies according to the order.

Q. And since this restriction has been put on how is he handling them?

A. He has been a little inconvenienced. He still prefers the Rock Island, so he has been making separate shipments.

Q. He is using the Rock Island Railroad?

A. The Rock Island Truck Line.

Q. The Rock Island Truck Line irrespective of this restriction?

A. He is.

Q. Rather than give it to the Burlington Truck Lines?

A. Right.

Q. Or rather than give it to Watson Bros. Transportation?

A. Right.

Q. What other railroads serve Ottumwa?

A. We have the Milwaukee, the Wabash, the Burlington and the Rock Island.

Q. Now, what other railroad, other than the Chicago, [fol. 1264] Burlington & Quincy and the Rock Island serve Omaha direct from Ottumwa? Does the Wabash serve Omaha direct from Ottumwa?

A. I don't believe so. I wouldn't state that as a fact.

Q. As a matter of fact doesn't the Wabash have a line that goes down to Kansas City, and one that goes north to Omaha? I understand that is not correct. I will withdraw the question.

Q. Does this shipper you are talking about use the rail service of the Chicago, Burlington & Quincy between Ottumwa and Omaha?

A. He does not, no.

Mr. Nolan: There are a couple of matters that seem to need a little clarification.

Redirect examination.

By Mr. Nolan:

Q. Now, on these shipments this particular shipper has to Omaha, where they exceed five thousand pounds, do I

understand you mean he breaks them into shipments so they come under the five thousand pounds?

A. He does.

Q. Now, what is the fact as to whether or not you have acquainted yourself with other traffic moving between Ottumwa and Omaha, or in the reverse direction, over the Rock Island Motor Transit Line, other than this one particular shipper you spoke of?

A. I have contacted several other shippers. The Sieg-Ottumwa Company receives quite a lot of automobile parts from the Omaha area there.

[fol. 1265] Q. Any other shippers you informed yourself about, shippers having shipments come over the Rock Island Motor Transit Company from Omaha?

A. There is some movement of flour to our local factories, but there isn't too much movement of that; generally in larger quantities carload.

Mr. Nolan: I believe that is all.

Recross-examination.

By Mr. Fowler:

Q. Let's talk about the Sieg Company. The shipper you have reference to is an automotive supply store, I believe?

A. Yes.

Q. Called the Sieg-Ottumwa Company?

A. Yes, that is correct.

Q. And his shipments are incoming shipments from Omaha?

A. Yes.

Q. And in what quantities?

A. I could not give specific weights. They would be definitely under the five thousand pound bracket.

Q. They would be under the two thousand pound limit, too, wouldn't they?

A. Probably would.

Q. And the same service is available to him? He could use the Burlington Truck Lines, could he not?

A. He could.

[fol. 1266] Q. He could use the Chicago, Burlington & Quincy Railroad, could he not?

A. He could.

Q. Or he could use the Rock Island Motor Transit?

A. He could.

Q. Or the Rock Island Railroad Company?

A. He could.

Mr. Fowler: Or any other carrier that has the authority and performs the service between Ottumwa and Omaha. That is all.

Mr. Nolan: That is all, Mr. Murray.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Clapp.

CHARLES CLAPP was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence, and occupation, please?

A. Charles Clapp, Terminal Agent at Ottumwa.

Q. And how long have you been so engaged, Mr. Clapp?

A. Four months in Ottumwa, about four months.

Q. What has been your experience in the motor transportation field?

A. Well, this is my first as an agent, but I have worked [fol. 1267] for the Rock Island Motor Transit Company for the past nine years doing clerical work, clerical work.

Q. In what office?

A. I was in Lincoln, Atlantic and Des Moines, and for the past year before I went to Ottumwa I was Relief Clerk for the Rock Island Motor Transit Company.

Q. And in your work as clerk with the company did you familiarize yourself with the method of doing business of transportation of the company and also acquainted yourself as to the flow of traffic?

A. Yes, I think I did.

Q. And, as I understand it, as Relief Clerk, or Relief Agent, you have worked in practically all of the different terminals of the Rock Island Motor Transit Company?

A. The biggest majority.

Q. You say you have been at Ottumwa for how long?

A. About four months.

Q. And were you acquainted with the work done by that office prior to the time you went there?

A. Well, I had done some relief work there, but it was in clerical work.

Q. Now, what personnel do you have under your supervision at your Ottumwa terminal?

A. Well, we have a rate clerk, and then the O. S. & D., our terminal clerk who has charge of the manifesting bill-
[fol. 1268] ing, O. S. & D. work, and then we have the seven city men work on the dock, the city pick-ups, and three drivers that are over-the-road drivers.

Q. And where is your terminal located in Ottumwa?

A. 212 South Union Street.

Q. And where is that located with reference to the freight depot of the Rock Island Railroad?

A. Well, they are combined in one building.

Q. Yes.

A. But separated by a wall.

Q. You have one end of the old rail freight depot?

A. Yes.

Q. And the railroad uses the other side?

A. Yes, sir.

Q. Do you use the office of the railroad agent there?

A. We do.

Q. Do you solicit business for the Rock Island Motor Transit Company in Ottumwa?

A. Yes, I do.

Q. Do you do any soliciting of business for the Rock Island Railroad there?

A. No, I don't.

Q. How about the rail agent at Ottumwa, does he solicit business for the Rock Island Motor Transit?

A. No, he does not.

[fol. 1269] Q. Now, if a shipment comes into Ottumwa on

rail billing by the Rock Island Motor Transit Company, what is done with that shipment?

A. Well, it is unloaded by the rail employees and the rail expense bill, and they send it down to us and they help load it on to the pick-up truck, and we deliver it.

Q. As I understand the Rock Island Motor Transit Company performs the pick-up and delivery for both the transit company and the railroad company?

A. They do, that is right.

Q. What do you mean by that term, "The rail agent or rail employees expense bill"?

A. It comes in on a way-bill and it is also on a motor transit manifest, their way-bill number, the destination, the consignee, the total number of pounds, and total number of pieces. After that is unloaded and checked, the dock foreman for the rail takes it up to the rail office, and they have to rebill this on another bill. That is what I call expensing, putting in the freight charges, and then it is delivered off of that bill they expense.

Q. All of that billing and rebilling and expensing from that way-bill is all done by rail employees?

A. That is right.

Q. Now, Mr. Clapp, were you familiar with the transportation handled by the Rock Island Motor Transit Company [fol. 1270] in and out of Ottumwa prior to last, prior to the time you went there?

A. Not too familiar, no.

Q. Well, now, can you tell us what traffic is moving in and out of Ottumwa at the present time by the Rock Island Motor Transit Company?

A. You mean in the operation——

Q. In the territory affected by the old White Line authority.

A. We have a truck Monday through Friday goes to Chicago every night out of Ottumwa. Then, we have the one going to Cedar Rapids each night.

Q. Now, how does that truck that goes from Ottumwa to Cedar Rapids, how does that move?

A. That moves by way of 34 to Fairfield, and then goes over 92, I believe it is, to Iowa City. It peddles all of the way along.

Q. Now, does that handle both intra and interstate freight.

A. Yes.

Q. The truck from Ottumwa to Cedar Rapids?

A. Yes.

Q. And part of the White Line operation was the segment of the line that run up to Cedar Rapids, was it not?

A. Yes, that is right.

Q. Now, this truck that goes from Ottumwa to Cedar Rapids, doesn't that go, it goes to Fairfield on 34?

A. That is right.

[fol. 1271] Q. Then up to Washington?

A. Yes, it goes to Washington on 92.

Q. And east on 92 to 218?

A. To Iowa City.

Q. And north on 218 through Iowa City to Cedar Rapids?

A. To Cedar Rapids.

Q. You say that has both intra and interstate traffic on it?

A. Yes, it does.

Q. How about traffic moving from Ottumwa to points such as Omaha and beyond Omaha? Is there any regular flow of traffic that the Rock Island Motor Transit Company is handling between Ottumwa and Omaha and points beyond Omaha?

A. Yes, it goes from Ottumwa to Des Moines, and then from Des Moines to Omaha.

Q. To Omaha, that is right. That is our route, but I am saying, is there business? Do you handle shipments between Ottumwa and Omaha over that route?

A. Yes, we do.

Q. And is there a regular flow of traffic or regular shipments handled by the Rock Island Motor Transit Company from Ottumwa via Des Moines, thence over U. S. Highway No. 6 to Omaha?

A. Yes, there is.

Q. And is there traffic in the reverse order, between Omaha and Ottumwa?

A. Yes.

[fol. 1272] Q. Now, does any other highway transportation company maintain the same type of terminal and terminal facilities that your company does at Ottumwa?

A. The only one I would know of would be the Burlington.

Q. And were you here this morning when Mr. Adams testified?

A. Yes. He was from the Burlington-Chicago Cartage.

Q. Yes, and is the interchange at Ottumwa with the Rock Island Motor Transit substantially as he described it?

A. Yes, it was.

Q. And is there a substantial volume of traffic moving from Mr. Adam's company, the Chicago-Burlington Transportation Company?

A. Yes, there is.

Q. With your company at Ottumwa?

A. Yes, as he said there is monthly.

Q. Is there other traffic moving, other than that advertising material?

A. Yes, there is other, too.

Q. And small shipments?

A. Smaller shipments.

Q. I believe he testified he didn't recall or not whether there was any traffic turned over by the Rock Island Motor Transit Company to Illinois destinations served by his company. Is there any such traffic?

A. Well, not too much.

Q. Is there an occasional shipment?

[fol. 1273] A. An occasional shipment. Most of that freight would be taken to Davenport and interlined there, or to Chicago for Illinois points.

Q. How about for such points as Kewanee, Monmouth and Galesburg?

A. I think that would go to Davenport.

Q. That would go through the Davenport gateway of your company rather than at Ottumwa?

A. Yes.

Q. Now, state whether or not you have had tendered to you shipments in excess of five thousand pounds since you have been in Ottumwa, which shipments you have had to refuse to handle on account of the limitation on the White Line authority.

A. Yes, we have had quite a number of those.

Q. Well, state whether or not, as testified to by Mr.

Murray, there are shippers that have voluntarily split their shipments to bring them within the five thousand pound limitation?

A. That is right. They have been doing that.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. Mr. Clapp, at Ottumwa you have your freight dock in the same building as the railroad has its freight house?

A. That is right. It is partitioned off.

Q. Is it separated by a chalk line or by a partition?

Mr. Nolan: That is objected to as being facetious.

[fol. 1274] By Mr. Fowler:

Q. Is it separated by a chalk line or a partition?

A. Partition.

Q. And what type of partition, a wooden partition?

A. A wooden, and they have a sort of a steel door they close each night at five o'clock.

Q. In other words, it is open, then, through the day?

A. That is right.

Q. And that is the passageway by which the freight travels from the railroad dock to the motor freight dock?

A. That is right.

Q. Now, a shipment arrives via the truck, and this particular shipment is on motor freight billing. That is delivered to the portion of the dock occupied by the Rock Island Motor Transit?

A. That is right.

Q. By the over-the-road truck. Now, let's assume a shipment is on that truck that is sailing under rail billing. Where is that unloaded?

A. That is unloaded on the rail side. The rail unloads all of their freight.

Q. In other words, then, the over-the-road truck when it arrives at Ottumwa, would pull up to the freight plat-

form where it unloads the Rock Island Motor Transit freight, isn't that right, and then it would pull on physically to the other portion of the dock?

[fol. 1275] A. That now depends on the shipment.

Q. Yes.

A. If it is a large shipment——

Q. Go ahead and explain how it would be handled.

A. They would pull over and unload on the rail dock, but the railroad employees unload it off the motor truck.

Q. In other words, then, it is not unusual for the Rock Island Motor Transit dock facilities to unload the Rock Island Motor Transit freight from the trailer, and then the railroad employees come in and unload the railroad freight, is that correct?

A. I think so.

Q. And then when they unload the railroad freight do they physically transport it from the Rock Island Motor Freight dock to the railroad dock?

A. The rail employees do that, yes.

Q. All right, and when it is delivered to the consignee, it is delivered on a pick-up and delivery truck of the Rock Island Motor Transit Company?

A. That is right.

Q. Now, does the Rock Island Motor Transit Company load their freight on to the delivery truck, or does the railroad labor do it?

A. The railroad labor. The Motor Transit driver checks [fol. 1276] the freight as it is loaded on.

Q. Yes. Now, outgoing freight, and you have no drayage company in Ottumwa other than the Rock Island Motor Transit?

A. That is right.

Q. A rail shipment is picked up by the Rock Island Motor Transit?

A. Yes, sir.

Q. And taken to the rail dock?

A. Yes, sir.

Q. And unloaded by the rail dock labor?

A. Yes, sir.

Q. Billed by the rail dock billing clerk?

A. Yes, sir.

Q. And then is loaded on to the truck by rail labor?

A. Yes, sir.

Q. Now, when a pick-up truck starts out in the morning, it picks up both rail and motor transit freight?

A. No, we have the one truck that delivers and picks up for the rail.

Q. In Ottumwa you have separate pick-up and delivery trucks?

A. That is right.

Q. All, however, owned and operated by the Rock Island Motor Transit Company, is that correct?

A. That is right.

Q. Now, is there any charge made to the customer for [fol. 1277] the pick-up and delivery service performed for the railroad?

A. Not that I have any knowledge of.

Q. Is there any charge made by the Rock Island Motor Transit Company to the railroad for the pick-up and delivery service it performs in Ottumwa?

Mr. Nolan: That is objected to as not proper cross-examination. We will have a witness on that. Go ahead. It is not cross-examination. We never went into that with this witness.

Exam. Carpenter: I know you didn't.

Mr. Nolan: That is all.

Exam. Carpenter: Do you withdraw the objection?

Mr. Nolan: I don't think this witness knows.

Mr. Fowler: I want to find out whether he does or not.

Exam. Carpenter: All right, strike the objection out. Do you know?

A. No, I am not familiar with that.

Exam. Carpenter: That settles that.

By Mr. Fowler:

Q. You are not aware of the character of the charge which is made by the Rock Island Motor Transit Company against the Rock Island Railroad for the pick-up and delivery service which it performs for the railroad company?

A. No, I am not.

Q. Now, with respect to shipments which you say have been tendered to you in excess of five thousand pounds [fol. 1278] since this restriction became effective, how have you handled those if you have handled them?

A. Well, the shipper usually calls in, and if he says he has a shipment going to Omaha or to Chicago, we ask him the weight of it, and we tell him we can't handle anything over five thousand pounds, and he sometimes breaks it down into two shipments so we are able to handle it.

Q. All right. Have you had situations arise where that traffic was billed on rail billing and handled on the truck under rail billing?

A. Not to my knowledge, no.

Q. Have you had any situations where that traffic was then tendered to one of the other carriers serving Ottumwa?

A. I do not know.

Q. In other words, then, you haven't lost any business by reason of the five thousand pound restriction?

A. Well, they probably wouldn't all break them down into those small amounts because of the rate.

Q. Well, do you know of any business you have lost because of this five thousand pound restriction?

A. Well, the five thousand pound restriction was on when I went there, and had been on for quite some time, and right off hand I don't know of any.

Q. You are not aware of any at the present time which you have lost, is that correct?

[fol. 1279] A. Yes, that is right.

Q. Now, the peddle truck which serves the points east of Ottumwa and north to Iowa City and Cedar Rapids, that departs Ottumwa approximately what time?

A. About seven p. m.

Q. And freight destined to what points is loaded on that peddle truck?

A. That is the one going to Cedar Rapids you mean?

Q. Yes.

A. Well, there is Eldon, Libertyville, Fairfield, Pleasant Plain, East Pleasant Plain, Brighton, Washington, Ainsworth, Cotter, Columbus Junction, Letts, Muscatine, Nichols, Lone Tree, and then Iowa City, into Cedar Rapids.

Q. Does that peddle truck handle both rail and motor billed freight?

A. It does.

Q. What proportion of that is rail billed freight?

A. I think it is about thirty-three per cent.

Q. In other words, about one-third of that traffic is sailing under rail billing?

A. Yes.

Q. Now, you have another peddle operation out of Ottumwa north to Des Moines?

A. Yes.

Q. And that departs Ottumwa approximately what time?

[fol. 1280] A. Well, that is, I would say, around 10:30 or 11:00 o'clock in the morning.

Q. And what intermediate points are served on that operation?

A. Well, Eddyville, Prairie City, Pella, Monroe.

Q. And about what proportion of that traffic is rail traffic?

A. Well, I would say about the same.

Q. Now, on the return trip I presume that peddle turns around and returns to Ottumwa from Des Moines and serves those same points on the return trip?

A. That is right.

Q. And, by the same token, your Cedar Rapids peddle turns around and serves those same towns on the return trip?

A. That is right.

Q. Now, the only effect of this application we are talking about today, as I understand it, has to do with service between Ottumwa and Omaha. Now, at the present time you are handling shipments from Ottumwa to Omaha by motor truck by through service, or is it handled by the peddle truck to Des Moines and then transferred to another truck for delivery to destination at Omaha?

A. Transferred to another truck in Des Moines.

Q. Is that same true on the return trip?

A. I imagine it is.

Q. Now, in addition to the Rock Island Motor Transit, Ottumwa is served by the Burlington Truck Lines?

[fol. 1281] A. Yes.

Q. By Watson Transportation Company?

A. Yes.

Q. And by what other carriers that operate over U. S. 34 between Omaha and Chicago?

A. Well, between Omaha and Chicago?

Q. Well, confine the question to Omaha to Ottumwa. What other carriers, other than those I have mentioned, have a service into Ottumwa? In other words, your competitors?

A. I can't think of any right now.

Q. You can't think of any at all? Does Watson Bros. Transportation Company maintain a terminal at Ottumwa?

A. They dock with the McCall Transfer.

Q. Is the McCall Transfer a local transfer and storage company?

A. He is classed as their drayman I would say. He delivers their freight for them and picks it up.

Q. I see, and the McCall Dray Line has the terminal and dock there?

A. Yes.

Q. And that is where Watson Bros. docks. Where does the Burlington Truck Lines have its terminal?

A. Well, in the Burlington freight house, but I don't know just the location of it, the street address, or anything like that.

Q. Now, with respect to your peddle operation north from Ottumwa enroute to Des Moines, about what tonnage will [fol. 1282] that truck have as a customary matter?

A. Well, it will be all of the way from eight thousand to fifteen thousand.

Q. Fifteen thousand would be tops, ordinarily?

A. Occasionally, but sometimes more.

Q. Ordinarily it is not over ten thousand pounds?

A. Ten, twelve thousand, fifteen thousand.

Q. O. K. Now, on the peddle truck that operates out of Ottumwa daily to Cedar Rapids, when it departs Ottumwa about what would be the tonnage on that vehicle?

A. We usually have that pretty well filled.

Q. Now, you handle a large volume of intrastate freight out of Ottumwa?

A. Quite a lot, yes.

Q. North to Cedar Rapids?

A. That is right.

Q. And the same thing is true from Ottumwa to Des Moines?

A. Yes, sir.

Q. Now, what is the type of interstate freight which you originate at Ottumwa for destination to Omaha?

A. Oh, that is castings, tires, some furniture, miscellaneous merchandise.

Q. All right. What is the type of traffic which you originate at Omaha and destined to Ottumwa which moves in interstate commerce?

[fol. 1283] A. Well, that is tires and automotive parts.

Q. All right. Now, you have interline arrangements at Ottumwa with the Burlington-Chicago Cartage, Inc., and its affiliated companies?

A. Yes.

Q. The witness who testified here stated that their interline arrangement consisted largely of advertising material which moves once a month to points located on U. S. Highway 6 west of Davenport.

A. That is right.

Q. Is there any other traffic of any substantial quantity that is interlined to you at Ottumwa by the Burlington-Chicago Cartage, Inc.?

A. Well, I don't think any larger quantities than that, any more weight.

Q. Now, with what other carriers do you interline at Ottumwa?

A. Green.

Q. H. B. Green Transportation Company?

A. H. B. Green Transportation Company. Hannibal-Quincy.

Q. Hannibal-Quincy Truck Lines?

A. Yes.

Q. Is that all?

A. Churchill.

Q. Churchill Truck Lines?

A. Yes. That is about all I can think of.

[fol. 1284] Q. H. B. Green is a transportation carrier that operates from Burlington west?

A. Yes.

Q. And the Hannibal-Quincy Truck Line operates from Hannibal, Missouri, to Quincy, Illinois?

A. I think they go to St. Louis.

Q. Do they get into Ottumwa? Do they serve Ottumwa?

A. They do.

Q. And the Churchill Lines, where are they located?

A. Chillicothe.

Q. Chillicothe, Missouri. Now, with respect to your interstate shipments originating Ottumwa and destined Chicago, first, let me ask you what carriers presently afford a service between Ottumwa and Chicago?

A. Well, Hawkeye.

Q. Hawkeye——

A. Transfer.

Q. Is that the Hawkeye Motor Express?

A. I guess that is what they call it.

Q. And that company has its headquarters at Cedar Rapids, is that correct?

A. Yes, sir.

Q. All right. They have an Ottumwa-Chicago operation. All right. What other carriers?

A. I don't think of any.

[fol. 1285] Q. What about the Burlington Truck Lines?

A. I imagine they do. I don't know.

Q. And what about Watson Bros. Transportation Company?

A. I couldn't say.

Q. You don't know?

A. No, I don't.

Q. Now, in addition to that, is Ottumwa located on the main line of the Chicago, Burlington & Quincy Railroad and then other railroads serve Ottumwa that can also serve Chicago?

A. Tell you the truth I have not been there long enough to get acquainted and know the railroads.

Q. What type of traffic do you originate at Ottumwa destined to Chicago?

A. Well, we have tires, automotive parts, lawn mowers and hardware, not too much hardware. I wouldn't say hardware.

Q. What type of traffic is originated at Chicago destined to Ottumwa?

A. Well, quite a lot of furniture comes from there, and tires, and we get most all of Woolworth's merchandise out of Chicago and the Kresge Store.

Q. Does the Rock Island have a Chicago-Ottumwa merchandise car? Does rail freight moving in from Chicago and eastern connections to Ottumwa that is under rail billings moves from Chicago to Ottumwa by merchandise car?

A. No.

[fol. 1286] Q. Do you have any merchandise car service into Ottumwa at all?

A. Well, I imagine there would be by rail.

Q. That is what I meant.

A. Yes. I don't keep track of the rail movement.

Q. I understand, but let me ask you this. Assuming there is a merchandise rail car service to Ottumwa from Chicago, that would be unloaded by rail labor?

A. That is right.

Q. And then would be turned over to you for delivery?

A. They would load it, you mean, direct for Ottumwa? Yes, it would be turned over to us for delivery.

Q. And your pick-up and delivery trucks would handle the merchandise car freight the same as you do the truck freight?

A. Yes.

Q. Is there a merchandise car service from Omaha?

A. Not to my knowledge.

Q. If you had an overflow of motor carrier traffic destined to Chicago that you couldn't load on your unit moving north that night, would you load that back on a merchandise car?

A. No.

Q. Do you load any Rock Island Motor Transit freight on a rail car?

A. No.

Q. In any event at Ottumwa?

A. No, I never have.

[fol. 1287] Mr. Fowler: At Ottumwa. That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Mr. Clapp, in regard to the line between Ottumwa and Des Moines, state what the fact is whether or not that line also serves Oskaloosa and Pella, Iowa.

A. It does Oskaloosa. I mentioned Pella, I think, but I forgot Oskaloosa.

Q. I think you mentioned Prairie City?

A. Prairie City.

Q. Now, in regard to your interline operations at Ottumwa, in respect to the Hannibal-Quincy Truck Line, which serves, as I understand, St. Louis and Hannibal, Missouri, and Quincy, Illinois, and on into Ottumwa, they also operate, I believe, into Burlington.

A. Yes, they do.

Q. And from Burlington out to Ottumwa?

A. Yes.

Q. State whether or not you have observed any traffic moving from points originating on that line interlined with your company at Ottumwa to points on the White Line between Davenport and Omaha.

A. Oh, yes, we do get.

Q. In other words state what the fact is as to whether or not you have a regular flow of traffic interlined at [fol. 1288] Ottumwa with the Hannibal-Quincy Truck Lines.

A. We do.

Q. For interior Iowa points?

A. That is right.

Q. And traffic originating along U. S. Highway 6 interlined at Ottumwa destined to points on the Hannibal-Quincy Line?

A. That is right.

Q. Would you say, do you interline freight parctically every day with the Hannibal-Quincy?

A. Practically every day.

Q. And what is the fact as to whether or not traffic may come from points on the Hannibal-Quincy Line interlined at Ottumwa for points along U. S. Highway No. 6 between Des Moines and Davenport and between Des Moines and Omaha?

A. We have quite a lot of that.

Q. Have you observed that traffic?

A. Yes, I have.

Q. Now, in regard to the Churchill Truck Lines, as I understand, that is the operation between Chillicothe, Missouri, and Ottumwa, Iowa, is that right?

A. I think that is it.

Q. And does that include Kirksville, Missouri, or other points in Missouri, or are you acquainted with that?

A. I am not too well acquainted with that. Our clerk routes the shipments and rates them, and sometimes I don't [fol. 1289] pay too much attention to them.

Q. Another question along that line. Is there a daily interchange of traffic between your company at Ottumwa with the Churchill Truck Lines?

A. I wouldn't say it was daily.

Q. Are there occasional shipments?

A. Oh, yes.

Q. And from your knowledge of points of origin and destination, state whether or not some of that traffic either originates at or is destined to points on Highway No. 6 on the Rock Island Motor Transit Line?

A. Yes, it is.

Q. Now, in regard to the employees of the Rock Island Motor Transit Company and the employees of the Rock Island Railroad Company, do they occasionally speak to each other?

A. Yes, they do.

Mr. Nolan: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: The hearing is adjourned until 9:30 tomorrow morning in the same room.

(At 5:15 p. m., March 25, 1952, hearing adjourned to 9:30 a. m., March 26, 1952.)

[fol. 1290] TRANSCRIPT OF PROCEEDINGS OF MARCH 26, 1952

Exam. Carpenter: Gentlemen, you may proceed. Are there additional appearances?

Mr. Archambo: Mr. Examiner, please, Henry A. Archambo, Assistant Director of Traffic, Minneapolis Traffic Association, a Class B Practitioner, appearing in support of the applicant. My last name is spelled A-r-c-h-a-m-b-o, and the address is Minneapolis, Minnesota.

PAUL FARBER was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name so we may all get it, please?
A. Paul Farber.
Q. You live where, Mr. Farber?
A. Pella, Iowa.
Q. And what concern are you connected with?
A. The Rolscreen Company.

By Mr. Bradshaw:

Q. What screen company?
A. Rolscreen, R-o-l-s-c-r-e-e-n.

By Mr. Howland:

Q. In what business are the Rolscreen Company of Pella engaged?

A. We make windows, rolling window screens, venetian blinds, and folding doors.

Q. And those are both of wooden construction and also metal casement windows?

[fol. 1291] A. That is right, wooden-metal combination.

Q. Mr. Farber, Pella is a community of about what population?

A. About four thousand.

Q. And that is located on U. S. Highway——

A. 163.

Q. 163. And about how far from Des Moines and about how far from Ottumwa?

A. About forty-two miles from Des Moines and forty-five miles from Ottumwa, midway.

Q. The only rail facilities there is what is known as the Keokuk and Des Moines Branch of the Rock Island Railroad, I believe?

A. That is correct.

Q. Have you had occasion to use the service of the Rock Island Motor Transit Company as a motor carrier for the handling of the products of the Rolscreen Company, either inbound or outbound?

A. We use them almost exclusively.

Q. Your position with the company I don't believe we have in the record.

A. I am Sales Manager and Treasurer.

Q. Now, in what territory are the products of the Rolscreen Company sold?

A. We distribute nationally.

Q. And I suppose that probably your largest sales territory is in the middle western part of the United States, [fol. 1292] but you sell throughout the whole country?

A. Our heaviest sale is north of the Mason and Dixon line and east of Nebraska.

Q. Now, your shipments of raw materials inbound are usually handled in what manner? Are they handled in part by truck or by rail shipments?

A. Well, for the most part by truck. The lumber, of course, comes in by rail, but substantially all of the other parts by truck, the steel and so on.

Q. Now, is that usually handled by common carrier trucks or by some other type of service?

A. Generally by common carrier.

Q. Now, what is your particular interest in the application which is pending before the Commission that has been made by the Rock Island Motor Transit Company?

A. Well, our interest is in maintaining the service to all points primarily. The Rock Island Motor have given us a service which we haven't been able to duplicate through any other similar service. We are more or less of a peddle point stop, so to speak.

Q. Well, on your outbound shipments in what quantities are those shipments made, Mr. Farber?

A. Well, we shipped about, I would say, through the Rock Island in the past year somewhere in the neighborhood of twelve to fourteen million pounds.

Q. And about what would be the variation in the size of [fol. 1293] the individual shipments that you would be tendering?

A. It would vary from less than one hundred pounds to over five thousand pounds.

Q. And do you have occasion to make shipments in excess of five thousand pounds from your Pella plant?

A. Many shipments, multiple window orders.

Q. And is there a need, so far as your business is concerned, for an increase in the weight limit which the Rock Island Motor Transit Company is presently operating under?

A. Well, it would be because in larger window orders, which are quite general, if we have to make two shipments, for example, to fall within the limits, whatever it might be, it is, it is an inconvenience in delivery, inconvenience to the customer and generally unsatisfactory so far as our operation is concerned. We have many shipments in excess of five thousand pounds.

Q. Now, what motor carriers have been serving your plant at Pella in recent months?

A. Well, the Burlington, some Bruce although we have difficulty there because they just don't like to stop. They can not give us any continuous service. If we have trucks going through where they have space available, so to speak, then they can pick up our merchandise, but we don't know from day to day just exactly what they can take, with the result we don't know just exactly when the shipments are leaving.

[fol. 1294] Q. Watson also serves Pella?

A. Yes, Watson.

Q. Now, what territory, that is in what—withdraw that.

Q. Do you have shipments regularly moving from Pella to points between Des Moines and Omaha and west of Omaha?

A. Oh, yes, all of the time.

Q. And is that one of your regular territories in which you are making shipments through the Omaha gateway?

A. Yes, Denver, Salt Lake City and west, for example, are volume sales points.

Q. And do you also distribute your products to all points on Highway 6 across the State of Iowa?

A. I don't believe there would be any exception because we have about six hundred seventy-five dealers in the State of Iowa, which gives us a blanket coverage.

Q. Now, you understand in this hearing the Rock Island Motor Transit Company seeks to increase the maximum amount of the shipments and also to have its authority to operate as a motor carrier of commodities generally made permanent rather than on the present temporary basis, do you?

A. Yes, I understand so.

Q. What effect, if any, would the elimination or substantial curtailment of the present Rock Island Motor Transit Company's service have on your business, Mr. Farber?

A. We don't seem to be able to secure the same service [fol. 1295] from anybody else.

Q. And would it be detrimental to your business in there if you were unable to secure the service of the Rock Island Motor Transit Company?

A. Very definitely so, particularly since the new Postal regulations.

Q. Do you have occasion to make shipments in truckload quantities of either inbound or outbound at your plant?

A. On occasion.

Q. To or from these points where the shipments come from the east and would be interlined at Chicago, or come from the west and be interlined at Omaha?

A. Yes, we have truckload shipments, for example, of windows going west. We sell in tr loload quantities to Helena, Montana, for example, which uld go in that direction.

Mr. Howland: I think you may cross-examine unless there is something you wish to add.

Mr. Fowler: I object to that, please.

Mr. Howland: I withdraw that question, and I will ask you this.

By Mr. Howland:

Q. Is there anything that I have not inquired about, Mr. Farber, as to the manner in which your business might be affected by a substantial reduction in the motor carrier service of the Rock Island Motor Transit Company?

A. Well, I would like to make this statement, that we [fol. 1296] have, of course, been doing business in Pella for the last twenty-eight years, and we have been exposed to all manner of motor carrier service. We have stabilized upon the present one because it has been the first time we have been able to get satisfactory and adequate service because of our location. We have lots of people shopping us for the business, but they have not been able to give us a duplicate service.

Q. I would like to inquire what other industries, if any, are located in Pella, and I don't know whether the record shows the population of your town or not.

A. About four thousand people. There are no other industries of similar size to our own, but there is an overall factory there that employs about sixty or seventy people, the produce company, the Ver Meer Manufacturing Company that are employing thirty to forty people, the Buerkens Farm Machine, and we also have a small foundry, and that is about it.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Cross-examine, Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. As I understand it the town of Pella is located on the C. B. & Q. Railroad as well as the Rock Island Railroad. How does the Burlington Truck Lines serve Pella?

Mr. Howland: Intrastate only. There is a lot of history connected with that.

By Mr. Fowler:

Q. O. K. Do you use the Burlington Truck Lines any in [fol. 1297] regard to your interstate movement?

A. No.

Q. Or Bruce Motor Freight, Inc. serves Pella?

A. Well, just on the basis which I outlined.

Q. I mean they have handled some traffic for you?

A. But it isn't a consistent carrier for us.

Q. I understand that, but they have handled some traffic?

A. Yes, they have.

Q. And they are handling some for you now?

A. That is right.

Q. And the Watson Bros. Transportation Company handle some for you, and are now?

A. That is right.

Q. And, in addition to that, what other carriers are there?

A. Well, we have this, outbound you are speaking about?

Q. Outbound or inbound.

A. Western.

Q. According to my information does the Gateway have authority in Pella?

A. That I don't know.

Q. Have you ever used them?

A. Not to my knowledge.

Q. Have you ever used the Merchants Motor?

A. We used to but no longer for personal reasons.

Q. But they have service?

[fol. 1298] A. No, I don't believe that is correct.

Q. You don't think they serve Pella?

A. No, they do not.

Q. Western Trans., have you ever had any contact with them?

A. Not to my knowledge.

Q. Now, a five thousand pound shipment since this restriction has been applicable, how have you handled it?

A. Well, I can not be certain whether we have broken them down and shipped them as separate shipments. I presume that is the manner in which it has been handled. I am not the Traffic Manager. I would be guessing on that point.

Q. Well, am I correct in my understanding since this restriction has been applied you have been using some of these other carriers on your volume shipments?

A. That is entirely possible.

Mr. Fowler: That is all.
Exam. Carpenter: Redirect?
Mr. Howland: I think that is all.
Exam. Carpenter: You are excused.

A. Thank you.

(Witness excused.)

Mr. Nolan: Mr. Hartnett, will you come forward, please?

J. J. HARTNETT was sworn and testified as follows:

Direct examination.

[fol. 1299] By Mr. Nolan:

Q. Will you state your name, place of residence, and your occupation, Mr. Hartnett?

A. My name is J. J. Hartnett, Traffic Manager, Paxton & Gallagher Company, 9th & Jones, Omaha.

Q. And how long have you been so associated with the Paxton & Gallagher Company?

A. A little over twenty years.

Q. And has all of that time been in Omaha?

A. Yes, sir.

Q. And what products do the Paxton & Gallagher Company handle?

A. Well, they have a large roasting, coffee roasting plant, and we distribute the roasted coffee in fifteen States. They have a coffee business throughout the entire scope of this application. They have a hardware division, distributing in both Iowa and Nebraska and southern Minnesota. We have a liquor division but that is confined to Nebraska only.

By Mr. Howland:

Q. You don't distribute that in Iowa?

A. No. We would like to.

By Mr. Nolan:

Q. Now, Mr. Hartnett, is the Paxton & Gallagher Company one of the older establishments in Omaha in the wholesale business?

A. Established in 1864.

Q. And what is the personnel in numbers of the Paxton & Gallagher Company?

A. Well, since we disposed of our grocery division a [fol. 1300] couple of years ago we have about five hundred employees, I would say, in all divisions.

Q. And do you have salesmen making the territory covered by your company?

A. We do.

Q. Now, Mr. Hartnett, you are familiar with the application here under consideration, are you not?

A. Yes.

Q. And I believe you appeared at the hearing on the application for temporary authority?

A. And in the original hearing when the Rock Island first acquired the rights.

Q. And was your company using the services of the White Line Motor Freight Company before the Rock Island took over?

A. Yes.

Q. And has your company been continuously in use of the service of the Rock Island Motor Transit Company since it started serving the territory formerly served by the White Line?

A. We have used it continuously.

Q. And will you state for the record, Mr. Hartnett, the use that your company has made of the Rock Island Motor Transit's service from Omaha to where in the territory served by the Rock Island?

A. We have used it to practically all points to which the Motor Company has authority, not exclusively, but we have preferred the Rock Island for many reasons, particularly along Highway 6 in Iowa because of the good [fol. 1301] service that they have given and because they have maintained it uniformly throughout the years.

Q. I will ask you, Mr. Hartnett, whether that service

took care of volume shipments, I mean included volume shipments as well as L. T. L., less than truckload shipments.

A. Yes. We have many volume shipments of coffee. For instance, during 1951 we drew off a list, January to August, and there were fifty truckloads moved from Omaha to points in Iowa on the Rock Island Motor.

Q. The Rock Island Motor Transit Company?

A. Yes.

Q. And to what points did those shipments move, if you have that data?

A. Des Moines, Davenport, Cedar Rapids, I will not repeat.

Q. No, just the principal points irrespective of whether or not they were repeat shipments.

A. Prairie View, that is the other way, Kansas. Cedar Rapids, that is repeat, the Tri-Cities, Ottumwa and Des Moines, Rock Island, Minneapolis. I guess that is all.

Q. How about Muscatine?

A. And Muscatine.

Q. Now, those were the volume or truckload shipments that you referred to?

A. Yes.

Q. How about less than truckload shipments? Did your [fol. 1302] company use the service of the Rock Island Motor Transit Company into the Iowa territory in the years past?

A. Here I drew off a list of shipments that moved in June of last year to various points, fifty-seven shipments.

Q. In the month of June?

A. Yes. I have the list.

Q. Could you tell us generally in what territory those shipments moved?

A. I could read the whole thing without too much trouble.

Q. Why don't you do it?

A. And the Pro Numbers also?

Q. Why don't you read the list of points?

A. All right, these are Iowa points.

Q. All right.

A. Colfax, East Pleasant Plain, Pella, Hancock, Dexter, Ellston, Davenport, Eddyville, New Hampton, Newton, Eldon, Colfax, Kensett, Northwood, Seymour, Allerton,

Wayland, Lineville, Pella, Garden Grove, Grand River, Weldon, Leon, Selma, Iowa City, Otley, Newton, Pella, Diagonal, Earlham, Mount Ayr, Shannon City, Casey, Newton, Rockwell, Mount Ayr, Muscatine, Davenport, Iowa Falls, Des Moines, Columbus Junction, Leighton, Blakesburg, Iowa Falls, Tingley, Muscatine, Pella, Des Moines, Muscatine, Des Moines.

Q. Now, Mr. Hartnett, although some of those points are not located on Highway No. 6, is it your understanding [fol. 1303] that shipments moving out of Omaha via the Rock Island Motor Transit Company moved out on Highway No. 6 to Des Moines, or some point like that, and then the shipment is transferred to one of the other lines of the Rock Island Motor Transit Company to destination?

A. Yes.

Q. Is that your understanding?

A. Yes.

Q. Now, what would you say would be the average size of those less than truckload shipments?

A. Well, this list here runs, Oh, all of the way from one hundred fifty pound shipments up to three thousand, thirty-four, thirty-five hundred in the L. C. L.

Q. Have you made any other—I will withdraw that.

Q. State whether or not the month of June, 1951, would be typical of shipments handled by the Rock Island Motor Transit Company for your company into the Iowa territory?

A. Well, apparently not because here is another list of shipments that moved in August. It seems to be much more extensive. It has many of the same points, of course, and others.

Q. Would you say the shipments moving in June in general, however, indicate the general territory that is served by your company in Iowa, isn't that correct, and the points in which you have shipments?

A. Yes. Speaking of weights here, I notice Columbus Junction of forty-one hundred on this second list.

[fol. 1304] Q. Could you tell us how many points without enumerating them by name, could you tell us how many shipments moved into the Iowa territory from your com-

pany from Omaha via the Rock Island Motor Transit Company during the month of August, 1951, in less than truckload quantities?

A. Without counting this I would say it is about, this is fifty-seven, about one hundred.

Q. And do those shipments, did those shipments move throughout the month, or did they move on any particular days of the month?

A. Well, it would be throughout the month.

Q. And then what would you say as to whether or not your company had almost daily shipments out of your company at Omaha into the Iowa territory by the Rock Island Motor Transit Company during the months of June and August, 1951, as reflected by those statements that you have there?

A. Yes. Now, I want to say further that these statements are referring only to coffee shipments.

Q. I see.

A. Hardware shipments are not listed on here, so there would be an additional number. It is a better and easier file to check in connection with the coffee.

Q. Now, to what points in Iowa do you have hardware shipments moving into the Iowa territory from Omaha?

A. Well, generally speaking our hardware salesmen don't go east of Des Moines. They make the entire State on a line north and south through Des Moines, on the west part. [fol. 1305] Q. Then, would it be fair to say you have hardware shipments moving into all points served by the Rock Island Motor Transit Company in the western part of the State of Iowa west of Des Moines?

A. Yes.

Q. And how about north of Des Moines, from Des Moines on up through Mason City, that territory?

A. Yes, we go up there.

Q. Such points as Iowa Falls, Hampton, Northwood, etc., is that correct?

A. That is right.

Q. Now, Mr. Hartnett, have you analyzed your hardware shipments to determine whether or not the movement into Iowa from Omaha by the Rock Island Motor Transit Company is also almost a daily situation?

A. Well, I would say it would not be as extensive as the coffee, but almost so in frequency of shipments.

Q. And what would you say as to the size of those hardware shipments?

A. Hardware would average, maybe, around fifteen hundred pounds, something like that.

Q. And would there be instances where there would be volume shipments, a truckload of hardware shipments?

A. No.

Q. It is all on small——

[fol. 1306] A. Small shipments.

Q. Now, in analyzing your records and knowing the Iowa territory, are there any points to which you would find the Rock Island Motor Transit Company provides the only direct, single line, service from Omaha?

A. Yes. Brighton is such a point, Buffalo, Columbus Junction, Durant, Hancock, Kalona, Otley, Princeton, Sharon Center, Washington, Wellman. Well, I think there are others, but that is representative at least.

Q. Now, Mr. Hartnett, have you found that although there may be other carriers that make the so-called smaller towns, who have authority to serve those towns, in fact they do not handle drop shipments for those towns?

A. Yes, I am sure that is true. For instance, Brady Motor Freight has authority into some of these towns, but has issued an embargo against any L. T. L.

Q. Yes, Brady Motor Freight has authority out of Omaha to serve many points along Highway No. 6 and points served by the Rock Island Motor Transit Company?

A. Yes.

Q. And has embargoed any less than truckload shipments to those points?

A. That is right.

Q. When was that embargo? When did it become effective?

A. Several weeks ago.

[fol. 1307] Q. Have you found other highway carriers that operate out of Omaha through the Iowa territory that do not provide a local drop shipment service to the smaller points even though they have authority to do so?

A. Well, we have had that situation at Brooklyn.

Q. Brooklyn, Iowa?

A. Brooklyn, Iowa.

Q. And state whether or not you have observed a trend on the part of some of the over-the-road carriers to go to overhead freight rather than peddling local freight?

A. Yes, that is my general impression. In fact some of their traffic men have told me so in the rate hearings, that peddle runs are too expensive. The general policy would be to curtail them.

Q. Now, what is the fact as to whether or not you have been informed by some of the carriers that it is impossible to provide a local delivery service for small shipments to small towns?

Mr. Fowler: Just a moment, please. That is objected to as hearsay.

Exam. Carpenter: Objection overruled.

A. Would you repeat the question?

Exam. Carpenter: Read the question.

Mr. Nolan: Read the question.

(Question read.)

A. Well, as I say, I have been in contact with a good [fol. 1308] many of the operators over a long period of years, and recently their general conversation has been along that line, that it is difficult to provide an L. T. L. service to those small towns.

By Mr. Nolan:

Q. Now, have you been informed by any particular carrier that they are going to suspend or abandon local service to some of the smaller towns to which they have authority in the Iowa territory out of Omaha?

Mr. Fowler: That is objected to on the grounds it is hearsay.

Exam. Carpenter: Objection overruled.

A. I have been so informed from time to time that the carriers would not take L. T. L. to certain towns.

By Mr. Nolan:

Q. And have those shipments been refused by carriers, tendered them by your company?

A. Yes. Brooklyn, as I stated, is one example.

Q. And is that typical, or is that the sole example?

A. Well, I happen to have that nailed down in this note here, is the reason.

Q. Of course, your company is quite a large company, and has a great number of shipments moving out of it daily, does it not?

A. Yes.

Q. And what you are trying to do is give the typical situation rather than the actual situation in each case?

A. That is right.

Q. Now, Mr. Hartnett, you say your company did use, [fol. 1309] or has used, the Rock Island Motor Transit Company, both for volume shipments and less than truckload shipments since it started operating up until the restriction was imposed?

A. That is right.

Q. Now, if the Rock Island Motor Transit Company was restored to its original operating rights, would your company again avail itself of the full service offered by that company into and through the Iowa territory?

A. Gladly.

Q. And what was the caliber of the service of the Rock Island Motor Transit Company during the years which you have used it, whether its service was satisfactory or otherwise?

A. It was uniformly good service.

Q. And state whether or not the Rock Island Motor Transit Company had in Omaha during all of that time a terminal, terminal agent, pick-up and delivery service, rate information, facilities for tracing shipments, making claims, tracing shipments, etc.?

A. Yes, they did have.

Q. And state whether or not in your opinion, Mr. Hartnett, it was necessarily necessary in a community where there are a great number of shipments going out over a truck line, that the full facilities such as an agent, rate

information, facilities for filing claims, tracing shipments, etc., be made available to the shipper.

[fol. 1310] A. Well, we think so. We have found the services of the Rock Island Motor for us at Omaha to be very satisfactory in regard to all of those things.

Q. Now, with the limitation placed upon the service of the Rock Island Motor Transit have you had any difficulty in getting volume shipments to any points formerly served by the Rock Island Motor Transit?

A. Well, there is other service to most of the points that I read there. Muscatine is one, however, where we make volume shipments, there is no authorized carrier so far as I know.

Q. Now, what experience have you had with the Rock Island Motor Transit Company on claims over the years?

A. It has been very satisfactory. We have had practically no trouble.

Q. And have you experienced some difficulty with other carriers serving the Omaha and Iowa territory?

A. Oh, yes.

Q. Now, what is the fact as to whether or not you do not make volume shipments to centers where you have storage facilities or warehouse facilities, and then the shipments go back out into the territory in small lots?

A. Well, we maintain our storage points, generally speaking, for the distribution in the town where the storage is maintained. That is usually a matter of meeting the competition of other companies who have storage and can [fol. 1311] provide local delivery on call. We do, however, make our shipments from some of those.

Q. That is what I was getting at. You have common shipments going into certain centers for redistribution, and you also ship direct out of Omaha to the same territories?

A. That is right.

Q. Now, what points involved in this proceeding do you have storage facilities, or warehouse facilities for storage, and then later reshipping to the small communities?

A. Des Moines, Cedar Rapids, Waterloo, Minneapolis, Minnesota.

Q. How about the Tri-City area, Davenport and Muscatine?

A. We have Davenport, yes, Davenport.

Q. And then, for instance, at Davenport do you have customers in points such as Durant, Walcott, Wilton Junction, West Liberty?

A. Yes, we have.

Q. And are those customers mainly served on a reshipment back out of Davenport?

A. Well, they are to some extent, but, as I stated, the storage points are maintained largely to serve the area in which the warehouse is located.

Q. I see.

A. And the cost factor enters into that. We often find it more expensive to ship into the storage point, pay storage charges, and the high minimum charges out.

[fol. 1312] Q. I see.

A. Whereas we could move from Omaha direct at a lower figure.

Q. I see. Now, what is the fact as to whether or not the service of the Rock Island Motor Transit Company, as your company has used over the years, is reasonably necessary for a full and complete service for your customers in the Iowa territory served by the Rock Island Motor Transit Company?

A. Well, as I stated earlier, the service has been used continuously and has been very satisfactory. Now, if as the result of these proceedings the Rock Island Motor service should cease to function, why we could serve a lot of these points by other motors, not so satisfactorily, but there would be some towns, as I pointed out, there would be no service, and the customers would be left high and dry apparently.

Q. And do you know of any transportation agency, or agencies, which could replace the service which the Rock Island Motor Transit Company has been providing your company in the Iowa territroy for these many years?

A. Not completely, no.

Q. And do you say, Mr. Hartnett, from your many years of traffic experience it is reasonably necessary for a carrier to have the volume and overhead trade, as well as the local freight, in order to give complete and full service to his customers?

A. I think that is almost clear on the face of it, that they must have the volume shipments in order to come out the [fol. 1313] right end of the horn.

Q. In your experience do you believe, and do you have an opinion, a carrier could not give service only to the small places on local shipments and maintain a satisfactory and complete service?

A. Well, I don't think they could do it very long, they could just do it in connection with very small shipments.

Q. You think they might last a while, but not long?

A. That is right.

Q. Is there anything else, Mr. Hartnett, I have not covered?

Mr. Fowler: I am going to object to that line of inquiry as not question and answer.

Exam. Carpenter: Objection sustained.

Mr. Nolan: He is an expert.

Mr. Fowler: I understand. I understand. So are you. Take that off the record.

Mr. Nolan: You may cross-examine.

Cross-examination.

By Mr. Fowler:

Q. How have you been handling these volume shipments since the restriction went on?

A. Any particular point?

Q. No, generally speaking, Mr. Hartnett. You have been giving that traffic to other established common carriers?

A. Yes, and some has gone back to rail.

Q. I was going to say whether as the result and effect [fol. 1314] of the restrictions, you have made some of these volume shipments in excess of five thousand pounds by rail, and others you have turned over to other carriers, other motor common carriers?

A. That is right.

Q. And I presume there are a number of railroads serving Omaha, are there not, into this territory? I presume the Rock Island Railroad, the Chicago, Burlington & Quincy Railroad?

A. Well, the Rock Island, the Milwaukee, the Burlington, that would be through the middle of the State.

By Mr. Howland:

Q. And the North Western.
A. And the North Western.

By Mr. Fowler:

Q. Have you used the Burlington coordinated rail and truck service between Omaha and Ottumwa, for example?
A. Yes, some.
Q. Now, I am assuming that on shipments to cities such as the Tri-Cities, Ottumwa, Cedar Rapids, Minneapolis and Des Moines, you have the services of a number of motor carriers available to you?
A. That is true.
Q. And, as I understand it, you are using most of them, as well as the Rock Island to those points?
A. Yes.

Mr. Fowler: That is all.
Exam. Carpenter: Redirect.
Mr. Nolan: I think that is all.
[fol. 1315] Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Ball of Council Bluffs.

Gerald Ball was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, Mr. Ball?
A. Gerald Ball.
Q. And where do you live?
A. 3444 Broadway, Council Bluffs.
Q. East or West Broadway?
A. It is West Broadway.

Q. You live pretty close to the river, then, don't you?
A. Pretty close.
Q. What is your occupation?
A. I manufacture hammers for hammer mills.
Q. Those are feed grinder hammer mills?
A. That is right.
Q. Used for grinding up feed?
A. Feed and flour.
Q. And how long have you been so engaged?
A. Two years.
Q. Where is your plant?
A. It is at that address.
Q. And you operate under your own name?
[fol. 1316] A. I operate under the name of Western Mills Supply.
Q. Western Mills Supply?
A. That is right.
Q. Is that a trade name or a corporation?
A. That is a trade name.
Q. Now, I assume you have inbound as well as outbound shipments?
A. That is right.
Q. Of less than truckload quantities?
A. Ten thousand pounds, ten to twelve.
Q. And where do you get your raw material that you process at your plant?
A. Erie, Pennsylvania.
Q. What is that, iron, metal?
A. Steel.
Q. Steel.
A. Cold rolled steel.
Q. Cold rolled steel. Does that come in in sheet form?
A. That is right, sheared to dimension.
Q. Is that already fabricated before you get it, and you assemble it in your plant?
A. I do the fabricating. It is in sheets of eight feet length, stripped.
Q. And I believe you said those come in ten thousand pound quantities?
A. Yes, ten to twelve thousand pounds.
[fol. 1317] Q. And those shipments come through the Chicago gateway, do they not?

A. That is right.

Q. And how do those shipments come in, by rail or truck?

A. I specify they come by motor freight.

Q. And what company have you been using to get these shipments?

A. Prucka and On-Time.

Q. And have you ever used the Rock Island Motor Transit Company?

A. No. I would have had I been able to.

Q. You could have used the Rock Island Motor Transit Company up before, prior to August 1, 1951. Had you made any investigation as to their service prior to that time?

A. No, I haven't.

Q. Now, what is your problem here, inbound shipments or outbound shipments?

A. Outbound.

Q. You are getting reasonably satisfactory service on your inbound shipments, is that right?

A. That is right.

Q. Via the Prucka Truck Line and the On-Time Truck Line?

A. That is right.

Q. Both are Omaha companies serving Omaha and Chicago, including Council Bluffs, is that right?

A. That is right.

Q. Now, what outbound shipments do you have?

[fol. 1318] A. I ship throughout the midwest, primarily eastbound to Des Moines, Cedar Rapids, Clinton, Davenport, northbound to Minneapolis, southbound to Kansas City, St. Joe.

Q. And have you had any outbound shipments into the Illinois territory?

A. Yes.

Q. The Tri-City area, and also into Illinois?

A. Mmmmhuh.

Q. What are the size of those shipments, those outbound shipments?

A. They run from one hundred fifty to fifteen hundred pounds.

Q. And those are the complete hammer mills?

A. Hammer parts.

Q. Hammer parts. What service have you been using on those outbound shipments?

A. Well, I use Watson, I use Darling.

By Mr. Bradsaw:

Q. What was that last?

A. Darling, Transamerican into Illinois, and the Rock Island wherever I can.

By Mr. Nolan:

Q. Have you used the Rock Island Motor into the Illinois territory?

A. I have tried, I have tried to, and into Ohio. I have gone as far as I could with them, and then by rail.

Q. Now, have you used the Rock Island Motor Transit's service into the Minnesota territory?

[fol. 1319] A. Yes, sir.

Q. And into the Kansas City territory?

A. Right.

Q. And what have you found with respect to the quality of that service?

A. I found it superior to any other. Our pick-up is exceptionally good. Freight to Watson is delayed sometimes as much as two days in our shop.

Q. That is Watson Bros. Truck Line of Omaha?

A. That is Watson Bros. Truck Line of Omaha. The Darling Truck Lines were very unsatisfactory. However, they were the only ones I could use into that vicinity in Nebraska, but I used them, but the service rendered by the Rock Island was so superior that we have called them in all instances where possible.

Q. And have you had any experience with any other truck lines in regard to the quality of their service?

A. That is right.

Q. What others?

A. Watson Bros.

Q. Have you ever had any experience with On-Time, not On-Time, but the Iowa-Nebraska?

A. No, sir.

Q. But it is Watson Bros. you have had the delay in pick-up, is that right?

A. That is right.

[fol. 1320] Q. Now, state whether or not the Rock Island Motor Transit Company maintains facilities, either at Council Bluffs or Omaha, where you have a direct contact with the agent, pick-up and delivery service, rate information at the end of the telephone, facilities for tracing claims and shipments.

A. All of that is available, and we have used it in instances where it is necessary, and the results have been very good, exceptional.

Q. I don't suppose you have a traffic department, do you?

A. No, sir.

Q. And is rate information in regard to shipping, source of shipping, is that invaluable in your business?

A. Well, it has its place, yes.

Q. You are a relatively small operation, are you not?

A. That is right.

Q. How many people do you have employed?

A. I have three.

Q. And necessarily you couldn't maintain a traffic department?

A. That is right.

Q. State whether or not the service which you have used by the Rock Island Motor Transit Company eastbound out of Omaha as to interstate shipments is necessary for the proper serving of your business?

A. I feel that it is. I feel that if we were to lose that service, it would be a considerable handicap so far as [fol. 1321] promptness is concerned and reliability.

Q. Do you know of any other transportation agency or company that provides the same facilities and service to you in your business at Council Bluffs that the Rock Island Motor Transit Company has been providing during the time you have operated the business there?

A. I can truthfully say I don't know of any other.

Q. And what would the effect be on your business if the service of the Rock Island Motor Transit Company was terminated or substantially reduced?

A. I feel that the shipments that we would normally route over those lines into those sections would be delayed at least on an average of one and possibly two days.

Q. Now, these shipments that you make out of your plant, are they more or less emergency shipments?

A. Quite often they are.

Q. And are they to replace a broken part in the hammer mill?

A. Broken and worn-out.

Q. And those hammer mills are used by customers rather than the dealer?

A. That is right.

Q. Now, you supply hammer heads for mills used by the farmer in grinding feed?

A. No.

Q. They are all industrial user of the larger mills?

A. Yes.

[fol. 1322] Mr. Nolan: Cross-examine.

Mr. Fowler: No cross-examination.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Howland: Mr. Seastedt.

PAUL E. SEASTEDT was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name so that all in the room can get it, please?

A. Paul E. Seastedt.

Q. Now, Mr. Seastedt, you live in Omaha, Nebraska?

A. Yes, sir.

Q. And your business is what?

A. Storage battery, build storage batteries.

Q. And are you an employee of some other company, or do you maintain your own business at Omaha?

A. No, I am Manager of the Grant Storage Battery Company at Omaha, Nebraska.

Q. And where are the headquarters of the Grant Storage Battery Company?

A. Minneapolis, Minnesota.

Q. Mr. Seastedt, in what territory does the Omaha plant, branch of the Grant Storage Battery Company sell and distribute its products?

A. Dealing in possibly the west one-fourth of Iowa and all of Nebraska.

[fol. 1323] Q. And I take it, then, that these batteries are sold and distributed to independent retailers and, perhaps, to some chain organizations in that territory?

A. Yes, sir.

Q. Have you had occasion to use the service of the Rock Island Motor Transit Company for your products shipped from Omaha, Nebraska?

A. For many years.

Q. Now, do you manufacture those at the Omaha plant, do you manufacture batteries there?

A. Completely.

Q. Yes. Now, how are your raw materials for the manufacture of your batteries, how are they delivered to your plant?

A. Truckloads.

Q. And from what territories do those shipments generally come?

A. Chicago, Kansas City, and carloads from the west coast.

Q. So that as far as the inbound business is concerned, it is both rail carload and truckload business?

A. Yes, sir.

Q. I take it that you are primarily interested here in the outbound service from your plant into the Iowa territory for the distribution of your manufactured products?

A. Iowa and Nebraska, yes, sir.

Q. All right. In what quantities do your shipment of batteries, in either number or weight, do they customarily move [fol. 1324] in this territory?

A. Two hundred fifty pounds minimum.

Q. And about what maximum, about how high?

A. Seven hundred fifty pounds.

Q. Seven hundred fifty pounds?

A. Right.

Q. What has been your experience with the service of the

Rock Island Motor Transit Company in handling shipments of this character for your company?

A. Very good.

Q. And do you know of any other comparable service you have to the points located on U. S. Highway 6 or on the connecting lines out of Des Moines, north, south and southeast?

A. We have some points that are served only by Rock Island, but we have some that are served by dual and additional carriers.

Q. About how many of these points—I will withdraw that.

Q. Now, have you had experience with respect to the handling of your small shipments, ranging from two hundred pounds up to seven hundred fifty pounds, by other carriers than the Rock Island Motor Transit Company?

A. Yes, sir.

Q. How has that been?

A. Well, we don't have too great a complaint. The only thing we are confronted with, our dealers tell us who to ship by.

[fol. 1325] Q. They specify the routing they want?

A. They send us the routing on it when their orders are sent in.

Q. And you usually honor that routing?

A. Entirely.

Q. Would the elimination or substantial reduction in the service of the Rock Island Motor Transit Company have any effect on your business if it ceased?

A. I am sure it would.

Q. And why is that true? Will you explain to the Examiner why that would be true?

A. The reason I say that in so far as ours is an existing possibility. There is a reason for them wanting to go Rock Island. As I mentioned, there are points they are only served by the Rock Island, and if the Rock Island is eliminated there is going to be no carrier left in many of these towns. We are going to be handicapped considerably because we have some peddle operation.

Q. Where is your competition?

A. Out of Omaha primarily.

Q. Out of Omaha, Nebraska. Have you used in the years past, or months past, prior to the placing of the restrictions on the Rock Island Motor Transit Company, have you used the services of the Rock Island in truckload quantities?

A. Oh, yes, yes, sir.

Q. And if an opportunity presented for you to use that [fol. 1326] service, would you avail yourself of that truckload quantity services again?

A. Most assuredly. Most assuredly.

Q. Now, do you have any—I will withdraw that.

Q. I would like to develop just a little more about the size of your business, and the quantity of the shipments that you have occasion to make. What sized plant do you have so far as personnel at Omaha?

A. We have approximately fifty people this time of the year. In our busy season, which is five months out of the year, we have one hundred people.

Q. And I take it that is a year-round operation but what might be referred to as sort of seasonal peaks?

A. Correct.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Mr. Fowler.

Cross-examination.

By Mr. Fowler:

Q. How have you handled your volume shipments inbound since the restriction prohibiting the Rock Island Motor Transit taking care of it?

A. Other carriers.

Mr. Fowler: You have given that traffic to other carriers. That is all.

Exam. Carpenter: You are excused.

Mr. Howland: Mr. Seastedt, just one further question.

[fol. 1327] Redirect examination.

By Mr. Howland:

Q. Would there be any particular advantage in the operation of your business in being able to have this truckload

service of the Rock Island Motor Transit for inbound shipments in connection with the less than truckload service outbound?

A. I don't believe I understood the question.

Exam. Carpenter: Read the question.
Mr. Howland: Read it, please.

(Question read.)

A. Yes, sir.

By Mr. Howland:

Q. In what respect?

A. Well, the facts are we like to have competitive carriers operating, bring loads in, and we have found the Rock Island to be one of the most satisfactory carriers to handle our merchandise.

Q. That is true both inbound and outbound?

A. Correct.

Mr. Howland: That is all.
Exam. Carpenter: Recross.

Recross-examination.

By Mr. Fowler:

Q. As I understand your position on these volume shipments, since the restriction has been applicable you have tendered that traffic to other established motor carriers?

A. That is right.

[fol. 1328] Q. And that was true even before the restriction was applicable you did use the other carriers?

A. Oh, yes.

Q. On your inbound other than the Rock Island Motor Transit before that?

A. Yes, sir.

Q. And I believe you said, so far as you are concerned, you want competition between these carriers?

A. That is right.

Mr. Fowler: That is all.
Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Fowler: Mr. Examiner, please, just for the record may I state unfortunately I have to leave town for an engagement in Ohio. I have to leave the hearing until Monday morning. My associate, Mr. Bradshaw, will take over.

Exam. Carpenter: All right, Mr. Fowler.

HENRY H. WEIXLER was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence and your occupation?

A. Henry H. Weixler, Vice President of the Atkins Transfer Company, Inc.

Q. You are located where?

[fol. 1329] A. Louisville.

Q. Louisville, Nebraska?

A. Yes, I am at Louisville.

Q. Louisville, Kentucky?

Exam. Carpenter: Louisville, Kentucky, or Louisville, Nebraska?

A. Louisville, Kentucky.

By Mr. Nolan:

Q. Your home is at Louisville, Kentucky?

A. That is right.

Q. And what is your position with the Atkins Transfer Company?

A. I am in charge of the Indianapolis and Chicago terminals, and at Louisville, in the operation of those three terminals.

Q. And what is your official position with the company?

A. Vice President.

Q. How long have you been associated with the company?

A. Twelve, starting my thirteenth year.

Q. Now, as I understand it, the Atkins Transfer Com-

pany is a common carrier of general commodities in interstate or foreign commerce by motor vehicle, is that right?

A. Yes, sir.

Q. And your company holds a certificate of public convenience and necessity for such operation from the Interstate Commerce Commission?

A. Yes, sir.

Q. Can you tell us off hand what your docket number is?

[fol. 1330] A. 74718.

Q. MC-74718?

A. Yes, sir.

Q. And I assume you have several Subs. on that?

A. Yes.

Q. Now, your main office is in Indianapolis?

A. Nashville.

Q. Nashville, Tennessee?

A. Nashville, Tennessee.

Q. And first, what is the personnel of your company in numbers? How many employees do you have?

A. I would say in the neighborhood of three hundred.

Q. And how many pieces of motor equipment are owned and operated by your company?

A. About one hundred eight.

Q. One hundred eight?

A. Yes.

Q. And describe generally the territory served by your company, and the principal points.

A. We serve south from Nashville to Chicago, and then we interline at Nashville, Chicago, Louisville and Indianapolis.

Q. And what are the main terminals?

Exam. Carpenter: Did you mean that, south from Nashville to Chicago?

A. From the north, from Nashville north to Chicago, but [fol. 1331] we handle a lot of interline freight out of Nashville coming from the south into Nashville.

Exam. Carpenter: O. K.

By Mr. Nolan:

Q. And what routes do you use from Nashville Tennessee, to Chicago?

A. From Nashville, U. S. 41, U. S. 31, 52 and 41.

Q. Those are alternate routes, or main operating routes?

A. Main operating routes.

Q. And what principal intermediate points do you serve between Nashville and Chicago, Illinois, on these operating routes?

A. Well, we serve on U. S. 31—52, we serve Indianapolis. We have got a terminal there, and Lafayette is an intermediate point.

Q. Lafayette, Indiana?

A. Lafayette, Indiana.

Q. All right.

A. And Gary, Indiana, is an intermediate point.

Q. Now, how about on your west route?

A. We don't have any intermediate points on the west route.

Q. That is your overhead service from Nashville to Chicago?

A. That is right, yes.

Q. Now, your company handles all general commodities, I assume?

A. Yes.

Q. With the few specific exceptions?

A. Yes.

[fol. 1332] Q. Explosives, and I suppose goods contaminating to other lading?

A. That is right.

Q. Now, state whether or not you operate a daily scheduled service between Nashville and Chicago and these intermediate points on the east route.

A. I beg your pardon.

Exam. Carpenter: Read the question, please.

Mr. Nolan: Read the question, please.

(Question read.)

A. Yes, between Nashville and Chicago by the way of Indianapolis. We don't have any rights to serve Louisville out of Nashville.

Q. But do you conduct a local service between Louisville, Kentucky, and Chicago, Illinois?

A. Oh, yes.

Q. But you are restricted between Nashville and Louisville?

A. And Louisville.

Q. And do you maintain a scheduled daily service between Nashville and Chicago on the overhead operation on the west route?

A. Yes.

Q. Now, what type of traffic moves into Nashville and interlines with your company for Chicago destination or beyond?

A. Well, general-y freight, a lot of cotton piece goods. You say beyond Nashville and coming into Nashville?

Q. I say what freight comes into Nashville and is interlined with your company for Chicago destination or beyond Chicago.

[fol. 1333]

A. Yes, we handle a lot of tires coming into Nashville from Birmingham for Rock Island, Illinois, while the Rock Island has been receiving it, the only carrier that would take it. We handle cotton piece goods. Shoes, we handle shoes out of Tullahoma, Tennessee, and Coca Cola bottles out of Chattanooga.

Q. That comes through the Nashville gateway and is interlined with your company?

A. Yes, sir.

Q. State whether or not you have a regular flow of traffic, either originating at Nashville, or turned over to your company at Nashville, from other carriers in the southern territory; also from Louisville, Kentucky, and Indianapolis, Indiana, which you take to Chicago for interline with carriers serving the Iowa territory?

A. Yes, sir.

Q. And is there a daily flow of such traffic?

A. Yes, sir.

Q. And is that volume traffic or less than truckload?

A. Some of it i. truckload and some of it is less than truckload.

Q. And what carrier have you been using in your interline from Chicago westbound into the Iowa territory?

A. Well, lately we have been using Rock Island. We had difficulty getting rid of a lot of Iowa points, and I went to

[fol. 1334]

Chicago in order to clear that situation up, and

we made an agreement with the Rock Island Motor Transit, they would handle everything we give them, and they have been doing that.

Q. And for how long have you been interlining with the Rock Island Motor Transit Company?

A. About two years.

Q. Prior to that did you have any difficulty in getting rid of freight that you brought to Chicago, either originating on your line or turned over to your line by some other southern carriers?

A. Yes, we always have trouble getting rid of Iowa.

Q. And how about since you have made a hook-up with the Rock Island Motor Transit Company?

A. Well, they solved that problem.

Q. And has that service been satisfactory?

A. Yes, sir.

Q. Now, I don't know whether you are familiar with the Iowa territory or not. Have you been out in here before?

A. No.

Q. This is your first trip into Iowa?

A. Yes, sir.

Q. Are you familiar with the number of points and particularly the smaller towns served by the Rock Island Motor Transit Company in the midwest territory here?

A. Not too much. I was in Chicago a couple of weeks ago [fol. 1335] and I copied down a list of points we did have trouble getting rid of.

Q. And you have those points now for the record?

A. Yes, I have those.

Q. Will you now produce, tell us what those points were?

A. These were taken from freight bills and records at Chicago.

Q. Of your company?

A. Yes, sir. Wilton, Kalona.

Q. That is Wilton, Wilton Junction or Wilton. That is the same town.

A. I assume it is.

Q. All right, what other towns?

A. Kalona, Wellman, West Liberty, Grinnell, Audubon, Griswold and Harlan.

Q. And you did have traffic moving into those points, as

I understand it, and you had difficulty getting delivery to those points until you made your hook-up with the Rock Island Motor Transit Company?

A. That is right.

Q. And how have you found the service to those points and other points in Iowa since you made your hook-up with the Rock Island Motor Transit Company?

A. We don't have any trouble any more.

Q. Now, what is the fact as to whether or not some of the traffic which originates in the southern states and handled by your company is what you might call low revenue traffic?

[fol. 1336] A. May I give you a good example of. We move tires out of Birmingham, Alabama, which makes a three line haul, and the revenue is not good for any of the carriers involved, particularly the delivering carrier, and nobody would take the tires.

Q. Where, at Chicago?

A. At Chicago, and so the Rock Island has been taking those tires and delivering them for us.

Q. The Rock Island Motor Transit Company did take that?

A. Did take that, yes.

Q. Are you familiar with, the obligations of a common carrier, they must accept all freight tendered them?

A. That is my understanding.

Q. And you say there were carriers operating out of Chicago into the Iowa territory who refused to handle interline traffic?

A. That is right.

Q. And do you know why they refused to handle that?

A. Yes, on account of the low revenue.

Q. Now, other than the fact that your company was required to handle that traffic coming from Alabama to the Nashville gateway, what other reason did you have for handling that traffic and bringing it to Chicago for destination in Iowa?

A. Well, we are like all southern carriers. There is not a volume of freight moving out of the south like there is from the north, so in order to get our equipment back with some revenue on it, we take loads like that. We have to.

[fol. 1337] Q. In other words your light movement is from south to north, is that right?

A. That is right.

Q. And you will take low revenue freight in order to give you some revenue back to Chicago, is that correct?

A. That is right. We handle a lot of shoes coming out of Nashville, going into Iowa points, a tremendous amount of them, and we work pretty nice with the Rock Island on those shoes, are lighter, susceptible to theft, and a lot of carriers don't want them.

Q. Shoes are valuable but they call for low revenue for the carrier?

A. Possibly.

Q. Now, do you understand also that the Rock Island Motor Transit Company serves between Des Moines and Kansas City, and Des Moines and the Twin Cities, Minneapolis and St. Paul?

A. I wasn't too familiar with that, no.

Q. Have you used the service of the Rock Island Motor Transit Company into those points?

A. I think we have used them into Minneapolis.

Q. And their operations from Chicago would be via the Tri-Cities, Des Moines, and then north to Minneapolis? Are you familiar with that routing?

A. I am not familiar with that, no.

Q. Now, do you know of any other carrier than the Rock [fol. 1338] Island Motor Transit Company, who is either able, or able and willing, to handle this traffic which you have been turning over to the Rock Island for Iowa destinations?

A. No, I don't.

Q. Now, you say you have been connected with the motor carrier business for twelve years, going on thirteen now?

A. That is right.

Q. And in your connections with the Rock Island Motor Transit Company have you found anything in its operations that showed any rail domination or any reason why motor carriers shouldn't interline or work with the Rock Island?

A. No, I don't.

Q. Now, is your company a member of the American

Trucking Association and other associations of the industry?

A. Yes, sir.

Q. And your company participates in various motor carrier rate bureaus?

A. Yes, sir.

Q. And does the traffic which you originate in the south, carried by your company from Nashville to Chicago, and turned over to the Rock Island Motor Transit Company, does that move on through——

A. Through rates.

Q. And each one would take its portion of the through rate?

A. We protect the through rate, that is right.

[fol. 1339] Q. Have you had experience in Chicago where other carriers have demanded a local rate from Chicago rather than participate in the local rate where there is a three line haul?

A. I can't say as to that.

Q. They don't want it?

A. They don't want it, no.

Q. Now, I assume your shoes and things of that character move in less than truckload quantities?

A. Yes.

Q. How about tires and things of that character?

A. Tires usually move in truckload.

Q. Truckloads?

A. There is some L. T. L.

Q. And state whether or not for the proper handling of business originating or interlined with your company into the Iowa territory, it is reasonably necessary for the continuation of the service of the Rock Island Motor Transit Company into the Iowa territory.

A. I feel like it is.

Q. And state whether or not in your opinion from a motor carrier standpoint it is necessary for a carrier to have both volume shipments as well as the small shipments in order to maintain a service.

A. That is absolutely necessary.

Q. Now, from your experience can a truck motor carrier, [fol. 1340] common motor carrier perform a local service if it doesn't have the overhead freight?

A. No, it couldn't.

Q. Do you know of any carrier of any size that is performing a local service without some overhead freight in the same territory?

A. No.

Q. And if the rights of the Rock Island Motor Transit Company were restored to what they were before any restrictions or limitations, would your company continue to use its services out of Chicago into and through the Iowa territory for both less than truckload shipments and truckload shipments?

A. Yes, sir.

Q. Do you know of any other trucking company, serving Chicago and the Iowa territory now served by the Rock Island Motor Transit Company, that gives or is willing to give the same type and character of service that the Rock Island has given your company?

A. No, I don't.

Mr. Nolan: You may cross-examine.

Exam. Carpenter: Mr. Bradshaw.

Cross-examination.

By Mr. Bradshaw:

Q. The points of Wilton, Kalona, Wellman, West Liberty, Grinnell, Audubon, Griswold and Harlan are the points that were troubling you when you went to Chicago?

[fol. 1341] A. It was troubling us and Doolittle called me on the 'phone and it is my responsibility whether the applicant makes money.

Q. Those are small. About what type of shipments go in there?

A. Principally shoes, tires and cotton piece goods.

Q. What is the size of the tires?

A. Some tires run in truckloads.

Q. You mean to Kalona a truckload of tires?

A. I imagine. I wouldn't say that for sure.

Q. How many pounds?

A. You can get from twelve to eighteen thousand pounds of tires on a trailer.

Q. Now who is handling that for you into Kalona?

A. I don't know who is handling that now.

Q. You are getting them in there, though?

A. No, not truckloads.

Q. Well, I asked you a moment ago whether truckloads of tires went into those towns, and you said they did.

A. They had been a truckload of tires every month.

Q. How did they get in there?

A. We have given them to the Rock Island. We haven't handled those tires for quite a while.

Q. Are you handling them now?

A. No.

Q. Well, shipments under five thousand pounds are going in there, is that right?

[fol. 1342] A. I assume we are still giving them shoes and enough under five thousand pounds.

Q. Do you have shipments over five thousand pounds at the present time?

A. I doubt it.

Q. That you are interlining into this Iowa territory, of course?

A. I doubt it unless it would be whisky, and they wouldn't be going into those points.

Q. I wouldn't think so. Then your low revenue problem is mainly on shoes, is that right?

A. Shoes and tires.

Q. And all less than truckloads?

A. Yes, now it would be.

Mr. Bradshaw: That is all.

Redirect examination.

By Mr. Nolan:

Q. Mr. Weixler, is it fair to say the termination of or a substantial curtailment of the service of the Rock Island Motor Transit Company out of Chicago into and through the Iowa territory would stop, or severely stagnate, the flow of traffic from the southern states that you interline into Chicago?

A. Yes.

Q. It would back-up that freight? It would have that far-reaching effect, isn't that true?

A. Yes.

[fol. 1343] Q. Clear down into Alabama?

A. We couldn't get any tires any more. We could not get rid of them.

Mr. Nolan: That is all.

Exam. Carpenter: Recross.

Mr. Bradshaw: Just a moment.

Exam. Carpenter: Just a minute.

A. Oh.

Recross-examination.

By Mr. Bradshaw:

Q. Who is handling those tires from Birmingham, Alabama, for the Iowa points at the present time?

A. I don't have any idea who is handling them.

Q. Do you know they are still coming in or not?

A. I would say they are.

Q. In this agreement you have with the Rock Island Motor Transit Company, that was on everything but the tires, is that right?

A. Well, they handle tires for me. We pro rate them.

Q. Well, now, you can get tires into Des Moines, can't you, if you want to?

A. If there was any moving in here I guess we could.

Q. And how about Omaha?

A. I am not familiar with that.

Q. In other words, your only problem is getting truckload lots of tires into these small towns, isn't it?

A. Well, that and Rock Island.

[fol. 1344] Q. Rock Island, Illinois?

A. Mmmmhuh.

Q. Couldn't you deliver them in there?

A. We didn't. We are not authorized.

By Exam. Carpenter:

Q. Well, are they moving at the present time?

A. I don't know. I imagine they are. We have to turn them down. That is a low revenue item, and the average carrier just don't want them.

Q. Why do you want them?

A. We have to have them coming out of the south or run empty.

Q. Didn't you say you turned them down?

A. We had to. We have no way to get rid of them.

Q. Out of Chicago you mean?

A. That is right.

By Mr. Bradshaw:

Q. Well, how many truckloads of tires did you have into Kalona in the last two years?

A. I couldn't tell you that.

Q. How many into Wellman?

A. I couldn't tell you that.

Q. West Liberty?

A. I never brought the bills with me.

Q. Any of those towns?

A. I could not actually say.

Q. Do you ever have a truckload of tires?

[fol. 1345] A. Yes. When I go to Chicago they bring that complaint to me. It is my problem to solve it.

Mr. Bradshaw: That is all.

Redirect examination.

By Mr. Nolan:

Q. Now, Mr. Weixler, irrespective of whether the truckload of tires goes to Wellman, Kalona, Podunk or Des Moines, or one of the other major cities in Iowa, as I understand it, the other trucking companies will not handle those tires because of the low revenue in the rates, isn't that right?

A. That is right.

Q. What is the fact as to whether you can get plenty of service out of Chicago in truckload quantities where there is a high revenue freight, or do you have any high revenue freight coming out of the south?

A. Yes, we have high revenue freight.

Q. From the south?

A. Some, yes.

Q. Do you have any trouble getting rid of that where there is a good revenue?

A. No.

Q. The other carriers are willing to grab that, are they not?

A. That is right.

Q. But it is on this so-called low revenue freight where there is a participation, a three line haul on a through rate, where you are having your trouble?

[fol. 1346] A. Yes.

By Exam. Carpenter:

Q. Would you be able to get the tires back if you got rid of them, to Chicago?

A. I hope I can. That is my problem.

By Mr. Nolan:

Q. Then, when you say you had to give up the transportation of tires out of the south, it was because you could not get rid of them in Chicago for points along the Rock Island Motor Transit Company's system, whether it is Kalona, Podunk, or Des Moines, isn't that right?

A. Yes.

Mr. Nolan: That is all.

Recross-examination.

By Mr. Bradshaw:

Q. Just what did you give up in the way of tire shipments?

A. I gave up those tires. I had to. I couldn't get rid of them.

Q. Which tires are you talking about? You are still handling the less than truckload lots?

A. I told you tires usually move in truckloads.

Q. And you can still handle them into Des Moines?

A. I don't handle any tires.

Q. And if you wanted to get them into Des Moines you could from the other points?

Exam. Carpenter: I don't believe he said that.

A. I didn't say that.

[fol. 1347] Exam. Carpenter: Mr. Bradshaw?

Mr. Bradshaw: All right.

Redirect examination.

By Mr. Nolan:

Q. To clear that up, Mr. Bradshaw, as I understood your testimony, Mr. Weixler, you do not handle any tires at the present time from the south into Chicago?

A. No.

Q. Whether it is for the Tri-Cities, Rock Island, Davenport, or Des Moines, or any point west of Chicago?

A. I don't handle them at all.

Q. Because you can't get rid of them at Chicago?

A. That is right.

Q. But you could get rid of them when the Rock Island Motor Transit Company was operating?

A. Yes, they worked with me on them.

Q. And if the Rock Island Motor Transit Company was authorized to handle those tires again, you would re-establish that service you originally had?

A. I hope I can.

Q. You mean you would attempt to?

A. I would attempt to. I want to.

Q. When you say you have an agreement with the Rock Island Motor Transit Company, was that merely that you would recognize your participation in your through rates and comply with your obligations as common carriers?

[fol. 1348] A. That is right.

Mr. Nolan: That is all.

Recross-examination.

By Mr. Bradshaw:

Q. How many truckloads of tires did you have into Iowa during the last six months the Rock Island Motor Transit was able to carry them?

A. I could not answer that.
Q. Did you have any then?
A. Yes, we had some.

Mr. Bradshaw: That is all.
Mr. Nolan: That is all.
Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: Five minute recess.

(Short recess.)

Mr. Nolan: Mr. Crooks of Kansas City.

David P. Crooks was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Give us your name, place of residence and occupation, Mr. Crooks.
A. David P. Crooks, Crooks Terminal Warehouse, 1104 Union Avenue, Kansas City.
Q. Briefly tell us the business of your company there in Kansas City.
[fol. 1349] A. Well, we are in the storage and distribution business. That is about all it amounts to. We actually are not a shipper. We are agents of the shipper.
Q. And what national accounts does your agency handle in Kansas City?
A. General Foods, Hershey Chocolate, Lipton's Tea, R. J. Reynolds.
Q. R. J. Reynolds Tobacco Company.
A. Brach.
Q. Brach what?
A. Brach Candy. There is the sugar companies. We handle the Great Western, Holly, C. & H.

By Mr. Bradshaw:

Q. Are these all candy companies?

A. No, they are sugar companies.

By Mr. Nolan:

Q. Is it fair to say that you warehouse the products of these national concerns for distribution in the midwest territory?

A. Yes, that is right.

Q. And that includes Iowa, does it not?

A. To a certain extent because where a man has his warehouse located, some accounts, being small, don't. They cover a wider area out of a warehouse, and the big account will have a stock in Chicago or St. Louis, and they might cover this area from these other points.

Q. Do you have occasion to ship out of your warehouse [fol. 1350] at Kansas City for these national accounts to points in Iowa?

A. Sometimes we do.

Q. And have you used the service of the Rock Island Motor Transit Company to these Iowa points?

A. Yes.

Q. And about how long have you been using that service?

A. I imagine several years, as long as it has been existing. We have so many customers, and I am not the Traffic Manager, myself. We have three hundred accounts, and there is no way to tell. There is no record kept, but we have been using them.

Q. What I am getting at, there is traffic flowing out of your town across Iowa east and west that are served by the Rock Island Motor Transit Company, is that right?

A. That is right.

Q. And is there a regular, year-around flow of such traffic?

A. Yes, sir.

Q. And what sized shipments ordinarily will come out of the warehouse in Kansas City for Iowa destinations?

A. Well, being in the warehousing business, it is mostly small shipments. I could not say exactly how large they are. Of course, there are times when a man will run out of stock even in a little warehouse in this area, and you have to ship a large quantity of merchandise. I don't know of any but it could be possible.

Q. So far as you know the services of the Rock Island [fol. 1351] Motor Transit Company, for those small shipments into the Iowa territory, have been satisfactory?

A. Yes, they have.

Q. And do you know of any other service available out of Kansas City to these smaller points along U. S. Highway No. 6, other than the Rock Island Motor Transit Company?

A. We usually route it the most expeditious way, and I imagine to some of these points the Rock Island Motor Transit Company has been the only method we have been able to ship this merchandise, to my knowledge.

Q. Well, the general over-all policy of your company is to ship the most expeditious way, and you have used the Rock Island Motor Transit Company for such shipments?

A. That is right.

Q. And do you have the routing of those shipments for these national concerns that warehouse with you?

A. Most generally we have a routing given, but there are some occasions arise when it is not covered, the shipment is not covered in the routing given, and we have to use our own judgment.

Q. That is what I mean, you have the control of the shipments?

A. At all times.

Q. To many of the points, is that right?

A. That is right.

Q. Now, these shipments that move into your warehouse [fol. 1352] and out again, are some of those shipments already routed as time goes along, as the needs of the customers arise?

A. I would say about ninety-five per cent of our accounts have a routing given, and they are also pre-routed, but when it gets up as far as Iowa, there is not too much moving into Iowa. There is a substantial amount, but most of it is in Missouri, Kansas and Oklahoma, and the routing given sometimes doesn't cover this territory.

Q. And then it is up to you to do the routing of the shipments into the Iowa territory?

A. That is right.

Q. And if the service of the Rock Island Motor Transit

Company ultimately continued, will you have occasion to use such service out of Kansas City into the Iowa territory?

A. That is right.

Mr. Nolan: That is all. You may cross-examine.

Exam. Carpenter: Mr. Bradshaw.

Cross-examination.

By Mr. Bradshaw:

Q. As I understand your testimony, Mr. Crooks, you use the Rock Island Motor Transit almost exclusively on this Iowa territory.

A. I wouldn't say that. Watson Bros. gets quite a substantial amount in Iowa, and, of course, like I say, we have so many accounts in our warehouse. We have about eight different shipping clerks.

[fol. 1353] Q. You do use other carriers into the Iowa territory?

A. Yes.

Q. Other than the Rock Island Motor Transit?

A. Oh, certainly.

Q. And have you familiarized yourself as to whether or not there are any specific points that other carriers can not serve on these shipments?

A. I believe there are some points the Rock Island Lines——

Q. Can you name any specific point?

A. No, I can't.

Q. You referred to small shipments coming into Iowa. What are the size of those shipments?

A. Well, I couldn't say off hand. I don't know of any large shipments that might have been.

Q. In pounds, approximately?

A. I couldn't say off hand.

Q. One hundred, two thousand?

A. There might be that much, I don't know.

Q. Somewhere between one hundred and two thousand?

A. Yes. We ship over two hundred thousand pounds a day from the warehouse, and for me to know all of them——

Q. The two hundred thousand doesn't come into Iowa?

A. Oh, no.

Q. That goes into different——

A. Other localities.

[fol. 1354] Q. Your other territory. A very, very small portion comes into Iowa?

A. That is right.

Q. Actually you are not too familiar with what carriers operate?

A. No, I am not. Most generally we leave it up to the shipping clerk, and, like I say, most of the shipments are prerouted, and he uses his discretion. I understand our shipping clerk has at times to rely on the Rock Island.

Q. Your main purpose in being here is, you like the Rock Island Motor Transit's service?

A. We like it for our customers. When they ask for our advice we have to give them the best answer. That is a part of our service, is advising on shipping.

Q. What I am getting at, your purpose in being in here, you want to keep this service, but you are not saying there isn't other service, is that right?

A. I think there are certain points, I am not sure, that are served by the Rock Island, so far as maybe there is a roundabout way of getting there, but out of Kansas City we have found certain points the Rock Island served best. Maybe coming from the north someone else could.

Mr. Bradshaw: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Mr. Witness, Mr. Crooks, what is the fact as to whether [fol. 1355] or not warehousing is done at points where there is flexible outbound service to all points to which the national concerns have distribution? Is that one of the purposes of the warehousing at a center where they do have flexible service?

A. That is right. That is true.

Q. Now, I assume that is one reason the national concerns warehouse in Kansas City because of the service they have to the territory from Kansas City?

A. Kansas City is recognized as one of the best distribution centers in this part of the country.

Q. And that is by truck and rail service to these various points?

A. That is right.

Mr. Nolan: That is all.

Exam. Carpenter: Recross? You are excused.

(Witness excused.)

Mr. Nolan: Mr. O'Connor.

J. A. O'Connor was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence and occupation?

A. J. A. O'Connor, Kansas City, Missouri, Regional Traffic Manager, Montgomery Wards.

[fol. 1356] Q. And when you say you are Regional Traffic Manager for Montgomery Ward & Company, what territory does that embrace, and what are your duties?

A. Well, for the purpose of this hearing it embraces as to twenty-three stores in Nebraska and Iowa, and seven units.

Q. Now, how long have you been associated wtih Montgomery Ward & Company?

A. Nine years.

Q. And did you have experience in traffic work before that?

A. Yes, I was with Standard Brands in Chicago and Kansas City before that.

Q. And how many years' experience have you had altogether in traffic?

A. Over fifteen.

Q. Now, you say, so far as this hearing is concerned, you have twenty-three stores which you supervise the flow of traffic to and from, I assume?

A. From Kansas City.

Q. From Kansas City, and what are the other points?

A. We have catalogue units, that is merely a desk where people come in and order out of the catalogue, and we ship to them.

Q. How many places do you have?

A. We have seven of those in this territory.

Q. Involved in this proceeding?

A. Involved here.

[fol. 1357] Q. Now, as I understand it, Montgomery Ward & Company has a regional office and a regional supply station for its stores located in Kansas City, is that right?

A. We have a mail order house in Kansas City.

Q. A mail order house?

A. That is right.

Q. And how about supplying your retail stores out of Kansas City? Is that done?

A. That is done, too, not from the mail order house primarily, but some of it is done from the mail order house.

Q. Now, does your work encompass the supervision of the stores as well as the mail order house?

A. That is correct.

Q. You supervise all traffic out of the Kansas City Offices of Montgomery Ward & Company whether it is for retail outlets or filling mail orders, is that correct?

A. That is correct.

Q. And do you supply all lines handled by Montgomery Ward & Company, including the merchandise, dry goods, farm equipment?

A. Everything.

Q. Everything handled by Montgomery Ward & Company, is that correct?

A. That is correct.

Q. And is Kansas City one of the regional offices of Montgomery Ward & Company?

[fol. 1358] A. Kansas City is also a regional office.

Q. Now, what points are served out of your Kansas City office?

A. What points?

Q. Yes.

A. So far as this hearing is concerned?

Q. That is right.

A. Well, we have along Highway 6, we have Atlantic, Des Moines, Newton, Iowa City. Then below that we have Muscatine and Washington, Iowa.

Q. Now, those are to retail outlets, retail stores?

A. Those are retail stores.

Q. And do you also have mail orders come in from those stores?

A. Yes. Each store maintains a catalogue order unit within the store.

Q. In other words, if a store doesn't stock that particular piece of merchandise, it can be ordered from you?

A. That is correct. It can be ordered from the unit.

Q. Does that go direct to the customer, or go to the store and the customer picks it up from the store?

A. As the customer wishes. If he wants to pick it up at the unit, we deliver it to the unit, or we deliver it direct to his home.

Q. That is whether he pays in advance, or pays when he gets it?

A. That is in reference to his credit.

Q. Now, where are these mail order stations located?

[fol. 1359] A. For the purpose of this hearing, there is no strictly mail order unit involved.

Q. But may you receive orders from almost any point along Highway No. 6 between Davenport and Omaha?

A. Oh, yes.

Q. Your company still publishes and distributes catalogues, does it not?

A. Yes. That would go directly to the mail order house to be filled and shipped to them.

Q. That would come out of Kansas City, assuming now I live in Iowa City, or assuming I live out west of Des Moines in some small town between here and Atlantic, and I wanted to order an order of merchandise from Montgomery Ward & Company out of the catalogue, would that order be filled in Kansas City?

A. In the greater number of cases, yes, unless it was such, if it was shipped direct from the source to you. We have some of that, but the greater bulk of it would come from Kansas City where we stock it.

Q. Suppose I want to order a bicycle and I live here at Wiota, Iowa. Do you know where Wiota, Iowa, is?

A. No, I am afraid not.

Q. It is a little town east of Atlantic. That would be one

of the standard bicycles manufactured by Montgomery Ward & Company. Would that come to me from Kansas City?

A. It would.

[fol. 1360] Q. That would come direct?

A. Yes, if that is what you want.

Q. If I sent it in C. O. D.?

A. Or send a check with it, or send a money order.

Q. That would come direct to me at Wiota, that is correct?

A. Yes, out of Kansas City.

Q. Is there much of that traffic moving direct to the customer out of the Kansas City mail order house?

A. Yes, there is considerable in this area.

Q. Now, state whether or not your company has been using the service of the Rock Island Motor Transit Company out of Kansas City into the Iowa territory.

A. Yes, we have.

Q. You have been using that service since you have been with Montgomery Ward & Company at Kansas City?

A. Yes, I have.

Q. And does that include, does that include volume shipments as well as small shipments?

A. Well, our shipments to these points will run from about one hundred fifty pounds to approximately six thousand. In addition to having the mail order house in Kansas City we have a rug pool. We do all of the rug cutting for the eastern part of the United States, and since the inception of that rug cutting we have volume shipments to some of these points, Iowa City, for instance.

[fol. 1361] Q. That would be a truckload quantity?

A. Not over six thousand pounds.

Q. Then the transportation of volume shipments, it is less than six thousand pounds?

A. Yes, L. T. L. shipments.

Q. State whether or not the service which has been provided your company by the Rock Island Motor Transit Company has been satisfactory or otherwise.

A. It has been satisfactory.

Q. And state whether or not you know of any transportation agency which serves all of the points between Omaha and Davenport on U. S. Highway No. 6 and off-route points such as Muscatine, Washington, Iowa, and Ottumwa, with the regu-

larity of service that the Rock Island Motor Transit Company has been giving you.

A. None can give us the direct service to Muscatine, Washington, Newton and Iowa City that the Rock Island has been giving us.

Q. And have you made inquiry and investigation to see whether or not you could get such service?

A. We have tried everyone on it, interline.

Q. And state what the effect would be upon your company's business if the Rock Island Motor Transit Company was required to cease operating or substantially curtail its operations.

A. Well, we would be seriously handicapped at the points I mentioned because we must promise the customer some kind [fol. 1362] of a schedule. He comes in and buys merchandise. We must give him some idea when he can expect to get it, and we try to maintain it on a close schedule. These points I mentioned we consider a two days' service from Kansas City. If the service goes beyond two days, we get a dissatisfied customer, and they go elsewhere to make their purchases.

Q. They go to Sears?

A. Sears would have the same problem we have at Kansas City.

Q. They have the same regional setup you have?

A. Yes, they do.

Q. And their problem would be about the same?

A. It would be identical.

Q. Now, these shipments or mail orders direct to the consumer, of course, they may go anywhere, isn't that it?

A. That is correct.

Q. But you say these unit shipments, those are to your stores located in the points you enumerated?

A. That is where we police the schedule.

Q. Has your company had any experience in regard to shipments of over five thousand pounds since the authority of the Rock Island Motor Transit Company was limited to that?

A. Yes, we have had some shipments over that.

Q. And what, how have you handled those shipments?

A. Well, we have interlined with other carriers, Watson, Bruce, whoever had, and rail carriers, too, in some cases.

[fol. 1363] Q. And was that service as satisfactory as a direct service by the Rock Island Motor Transit?

A. No, it is not as fast.

Q. How about satisfactory? A. Well, it is satisfactory. You mean from the claim standpoint?

Q. No, I am talking about satisfying your customers.

A. No, it is not as satisfactory.

Q. I believe you said you know of no carrier that provides the same service to points east of Des Moines on U. S. Highway No. 6 out of Kansas City that the Rock Island Motor Transit Company does?

A. To the points I mentioned, yes.

Q. And your shipments are from one hundred pounds up to six thousand?

A. That is right.

Q. Now, Mr. O'Connor, do you have a traffic association in Kansas City?

A. A traffic association?

Q. Is there a traffic association in Kansas City?

A. There is a traffic club there, and different traffic bureaus.

Q. Do you have a traffic association, an association of different traffic representatives for which you have a director of that bureau?

[fol. 1364] A. Well, not exactly. You see we have traffic clubs. We have the transportation club, the traffic club, the industrial traffic managers club, and we have various rate bureaus who perform traffic work for concerns without traffic departments. Is that what you are getting at?

Q. Yes. Is there any organization, for instance, a traffic association or department of the Chamber of Commerce that handles traffic problems for organizations that do not have their own traffic department, or where they have their own traffic department, they may work with them?

A. Yes, there are several in Kansas City.

Q. You have certain of those organizations?

A. That is right.

Q. You don't have one that represents all of the various interests?

A. No, not to my knowledge. I do not believe they are organized that way.

Q. You are acquainted with a man by the name of Mr. Tedrow?

A. Mr. Tedrow is deceased. He was the Transportation Manager of the Chamber of Commerce.

Q. He has a successor?

A. He has a successor now.

Q. What is his name?

A. It escapes me. He has only been there a short time.

Q. Are you a member of various traffic organizations there?

[fol. 1365] A. I am a member of the traffic club.

Q. And participate in its work, too?

A. Oh, yes.

Q. And from your acquaintance with traffic out of Kansas City and the other organizations, would you say that they have the same traffic problem, transportation problem, that your company has?

Mr. Bradshaw: I object to that as hearsay, irrelevant.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. Do you have any other shipments over five thousand pounds other than the shipments out of the rug pool?

A. No. They have to be rugs to make it.

Q. And I think you said they go to Iowa City and Muscatine?

A. Iowa City and Newton would be the principal.

Q. Those are the only two?

A. That get into the six thousand pound class.

Q. That get into that classification. What other services, transportation services, do you have between Iowa City and Kansas City?

A. And Kansas City. Well, we can use Watsons or Bruce, but it involves an interline, and we have tried that. We have also tried express service, and it has been very unsatisfactory.

Q. And how about Newton? You have several carriers [fol. 1366] going through Newton?

A. That is right, but it involves an interline at Des Moines or at Omaha.

Q. Do you have some rails that go into both of those cities?

A. We have rail service to both cities.

Q. And you have carrier service, then, and rail service to both of those cities on both types of shipments?

A. That is correct.

Q. That is under five thousand and over five thousand, other than the Rock Island Motor Transit?

A. That is right.

Q. Now, a lot of this, those delivered stuff that Mr. Nolan was talking about, that goes by mail, doesn't it?

A. Some of it goes by mail. The parcel post has some very strict limitations since the first of the year.

Q. I understand, but a lot in the past has gone by mail?

A. A lot has gone by mail.

Q. Now, you have plenty of carriers between Des Moines and Kansas City?

A. As far as Des Moines proper is concerned, the service is very satisfactory.

Mr. Bradshaw: I believe that is all.

Exam. Carpenter: Redirect.

Mr. Nolan: I believe that is all.

Exam. Carpenter: You are excused.

[fol. 1367] (Witness excused.)

Mr. Nolan: Mr. Kilmer.

B. J. KILMER was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name and place of residence?

A. B. J. Kilmer, 906 Grand Avenue, Kansas City, Missouri.

Q. And what is your occupation, Mr. Kilmer?

A. Assistant Manager of Traffic and Distribution, Sinclair Refining Company. That is the Western District.

Q. How long have you lived in Kansas City?

A. Thirty-six years.

Q. Are you a native of Kansas City?

A. No, sir.

Q. Did you ever live in Iowa?

A. No, Kansas, Kansas and Missouri.

Q. Now, tell us what products your company handles, or what you handle in your traffic department in the Sinclair Refining Company.

A. We handle the marketing products for the Western District, beginning with the Mississippi River, west to the Rocky Mountain States, and south to the Arkansas-Oklahoma border.

Q. And what embraces the State of Iowa?

A. It does.

[fol. 1368] Q. Minnesota?

A. And, of course, we have our supplies for these stations, pumps, tanks, stationery, air compressors, signs, and many other items.

Q. And are those supplies, etc., all warehoused in Kansas City and shipped into this territory?

A. All of the supplies for the stations are handled in Kansas City, that is other than the marketing product.

Q. That is other than gasoline and oil?

A. And we have insecticides, and anti-freeze, and many other items that we market.

Q. You say those aren't warehoused in Kansas City?

A. Not for Iowa destinations.

Q. Then, as I understand your testimony, you handle out of Kansas City for the Iowa territory filling stations supplies and equipment, is that correct?

A. That is correct.

Q. Now, are you familiar with the service of the Rock Island Motor Transit Company involved in this case?

A. I am.

Q. And state whether or not your company has been using the service of the Rock Island Motor Transit Company out of Kansas City for these station supplies and equipment during the past several years.

A. We have.

[fol. 1369] Q. And what has been the nature of that service as satisfactory or otherwise?

A. It is satisfactory.

Q. Now, tell us to what points, particularly in Iowa, that

you have been using the services of the Rock Island Motor Transit Company out of Kansas City.

A. We have customer and dealer accounts at Adair, Atlantic, Griswold, Davenport, Harlan, Ladora, and our own bulk plants located at Cedar Rapids, Clinton, Council Bluffs, Des Moines, Iowa Falls, Mitchellville, Monroe, Newton, Oakland, Oskaloosa, Ottumwa, Wellman, and West Liberty.

Q. Now, are those stations or bulk plants all served out of the Kansas City warehouse?

A. They are as to supplies. As to the marketing product, we formerly used the Rock Island Motor on all truckloads where we possibly could from East Chicago, Indiana, and then there is some distribution in smaller quantities from Omaha into Iowa.

Q. Now, are you familiar with the transportation facilities used by your company from Omaha and Whiting, Indiana, into the Iowa territory?

A. Yes, sir.

Q. And state whether or not the Rock Island Motor Transit Company was used by your company from those points into the Iowa territory.

[fol. 1370] A. On the truckloads from East Chicago we have used the Rock Island Motor wherever we could. We have preferred their service on account of the promptness in which they pick the shipments up at East Chicago. We have a situation at East Chicago, we are limited to space, and we schedule those shipments and get them ready and place them on the loading dock, and unless those shipments are removed promptly it ties up our operations there. We have a very large volume from Chicago, they not only supply, or to the territory in Iowa, Missouri and Minnesota, but supply our Central District, which has a very large volume into the States of Illinois, Indiana and Ohio, so it is important that we have good service in getting these shipments out when they are made ready.

Q. Now, in regard to your operations out of East Chicago in truckload quantity shipments, you are familiar with the fact the Rock Island Motor Transit Company are restricted in such operations at the present time?

A. Yes, sir.

Q. And has that caused any inconvenience and difficulty with your company getting such shipments out?

A. Yes, it has. As a matter of fact our manager in this territory is very much disappointed. He is not getting the service we formerly had.

Q. And if the Rock Island Motor Transit Company's rights are restored so they could handle that truckload [fol. 1371] traffic from East Chicago into the Iowa territory, would that traffic be given back to them?

A. It would be.

Q. And state whether or not you feel it is reasonably necessary for the expeditious service of your company out of the East plant to have the facilities of the Rock Island Motor Transit Company in handling such truckload traffic?

A. It is very necessary.

Q. Now, going back to Omaha, what shipments do you have coming out of Omaha in the Iowa territory?

A. Well, we have emergency shipments from Omaha throughout the State. They are usually small quantities. We have had as much, as high as ten thousand pounds, but the majority are small shipments.

Q. Those are the marketable products of your company?

A. That is right.

Q. Greases, oil, tires and things of that character?

A. That is correct.

Q. You also handle a line of insecticides and also a spray which is used by farmers, do you not?

A. Yes. The insecticide is manufactured at Chicago, and we sometimes mix those shipments, lubricating oil and insecticide.

Q. Now, this spray which I am referring to, that is new insecticide chemicals?

A. Yes, that is right.

[fol. 1372] Q. Now, these shipments coming out of Omaha, do they go to various small towns as well as the larger places?

A. Yes, they do.

Q. And what service has your company used out of Omaha to the Iowa territory in the past?

A. Well, we have used any number of carriers there.

Q. Have you used the Rock Island Motor Transit's service?

A. Yes, we have.

Q. State whether or not you have found the Rock Island Motor Transit Company serves points that no other carrier serves.

A. That is correct.

Q. Which points are involved in this proceeding?

A. There are several. I didn't have an opportunity to check into it too thoroughly, but I believe Harlan, Iowa, is one of them, and Newton, Iowa.

Q. How about points over in eastern Iowa such as Wellman? I think you say you have a bulk station there.

A. Yes, we do. As I recall it that is a local point.

Q. And the only company that serves Wellman is the Rock Island Motor Transit Company?

A. That is right.

Q. That is an off-route main highway point. Well, now, from the service which you have received from the Rock Island Motor Transit Company, state whether or not the continuation of that service is reasonably necessary to your company's business.

[fol. 1373] A. It is necessary.

Q. Out of Omaha.

A. We also require prompt service on our supplies, particularly paint. Any installation, any supplies where it is required to make an installation such as pumps or C. & M.——

Q. Mr. Kilmer, may I interrupt a minute. As I understand it all of your supplies come out of Kansas City?

A. Almost all of them. I would say ninety-five per cent.

Q. Do some of them come out of Omaha, too?

A. Very little any more. They did at one time, but we moved our supplies from Omaha to Kansas City, so there is very little out of Omaha.

Q. Where does the other five per cent of your supplies come from that don't come out of Kansas City in this territory?

A. They might come from any point. They might come from a warehouse in Des Moines or Cedar Rapids.

Q. Or might they come from the point of manufacture of those products?

A. Sometimes the shippers that we buy from make ship-

ments direct from the east, our pumps probably from Muskegon, Michigan, and other points east.

Q. Now, let's finish Omaha. As I understand it your marketable products come out of Omaha into this territory?

A. Principally marketing, yes.

Q. Now, in regard to your supplies, I understand most [fol. 1374] all of those supplies, repairs for pumps, your station equipment and products, and things of that character, including paints for keeping the places looking nice, soaps, and things of that character, come out of Kansas City?

A. That is right.

Q. And what facilities have you used on those shipments mainly into the Iowa territory involved in this case?

A. We have used the Rock Island Motor wherever we can.

Q. And what are the ordinary size of those shipments?

A. Well, they will run from a minimum on up to several thousand pounds.

Q. And has the five thousand pound limitation placed on the operation of the Rock Island Motor Transit Company interfered with your company's ability to get shipments to these various points?

A. Yes, it has.

Q. Involved in this application, and have you had difficulty in getting service to replace the service formerly given by the Rock Island Motor Transit Company for such sized shipments?

A. Yes, we have had a lot of trouble, particularly where the shipments are interlined. In some cases we have had delays and when we checked into it we found that the interlining carrier had used rail service beyond, such as beyond Des Moines, or other points, and that has tied it up for this reason. Our people that are making these installations, they go out and have a contractor scheduled to paint a sta- [fol. 1375] tion, or install pumps, and unless that shipment arrives on schedule, we are going to pay that contractor for a day's work until those shipments show up, so our people are very particular about this routing.

Q. If it doesn't show up for two or three days, you will pay him for two or three days' pay, is that right?

A. That is correct.

Q. Now, do you know of any other transportation agency out of Kansas City that would give you the same type of, and character of, service into this Iowa territory served by the Rock Island Motor Transit Company, other than the Rock Island?

A. I do not, not for the entire territory.

Q. Now, the fact is you do have service between Kansas City and Des Moines, isn't that true, you can get motor carrier service?

A. Yes. There are certain points that could be served direct.

Q. Now, do you have an opinion, Mr. Kilmer, as to whether or not a carrier that serves a small town shouldn't also have the right to serve the big towns in order to make up some of the loss that would be incurred by providing service to small towns?

A. It is my opinion they should have.

Q. And, in your experience as a traffic man, you have thousands of miles of roads of different truck companies, have you not?

A. We have.

Q. And from your observation and dealing with these companies do you have an opinion as to whether or not it is necessary for a truck company to have the so-called overhead freight——

[fol. 1376] Mr. Bradshaw: That is objected to——

Mr. Nolan: Wait a minute. I am not through.

By Mr. Nolan:

Q. —between the larger points in order to enable it to serve the smaller points with a regular service?

Mr. Bradshaw: It is irrelevant. The witness has not been qualified to answer any such question as that.

Exam. Carpenter: The objection overruled.

A. It is my opinion they should be.

By Mr. Nolan:

Q. Now, Mr. Kilmer, as I understand your testimony in regard to these supplies, and parts, and repairs, and so on and so forth, that you ship out of the Kansas City ware-

house into this Iowa territory, those supplies and parts may run anywhere from one hundred pounds up to several thousand pounds?

A. That is right.

Q. And would those several thousand pounds exceed five thousand pounds?

A. They do in some instances, yes.

Q. Will you tell us, for instance, take a place such as Wellman, Iowa. That is a town of about one thousand people. Do you know where Wellman is?

A. Yes. I have never been there but I know where it is on the map.

Q. Yes. What in the way of supplies and parts, etc., would reasonably be going into Wellman that would consist [fol. 1377] of several thousand pounds? What would that be, or what it might be?

A. I just doubt that we would have to exceed five thousand pounds to that particular point.

Q. Well, could you give us a point where you would make a shipment that would weigh in excess of five thousand pounds?

A. Well, I would say Newton, Iowa.

Q. And what would that shipment consist of?

A. Tanks, farm tanks, small storage tanks.

Q. That is where your company provides the storage tank for the farmer if he uses Sinclair products, is that right?

A. Yes, sir.

Q. Now, does he buy the tank, or is that given to him to use as long as he is a Sinclair user?

A. I am not too sure about that.

Q. And what else—would one of those tanks weigh in excess of five thousand pounds?

A. Not one tank. They will weigh about four hundred pounds, I believe, three to four hundred pounds.

Q. Would there be several of those tanks go on one shipment to that station?

A. Yes.

Q. That is where you ship in excess of five thousand pounds?

A. That is right.

Q. And how about if you are establishing a new station, would you ship out of Kansas City one shipment, the pumps, [fol. 1378] motors, compressors, hydraulic lifts, and so on?

A. Yes, we do have those combination shipments, and sometimes those exceed five thousand pounds. We might have several pumps. Those pumps crated will weigh about five thousand pounds or better.

Q. Now, supposing you are putting in a so-called super-station, where you have a hydraulic lift, a plate for one of those lifts, you have pumps, you have compressors, you have motors. Will all of those go in one shipment to that point of destination?

A. They do sometimes.

Q. And that would be a shipment in excess of five thousand pounds?

A. Yes.

Q. And do those shipments move out of Kansas City into the Iowa territory?

A. They do.

Q. And would they move by the Rock Island Motor Transit Company?

A. They have.

Q. And would you like to have that service available in the future?

A. We would.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. A couple of questions. Mr. Kilmer, what is it that comes out of East Chicago into the Iowa territory?

A. Just the marketing products, lubricating oil, insecticides.

[fol. 1379] Q. Now, does the routing of those shipments come within your jurisdiction?

A. It does in the, to the marketing district 1 described, from the Mississippi west.

Q. I see, and what are the size of the shipments?

A. They run from twenty to thirty thousand pounds.

Q. And who is handling those shipments into Iowa now from East Chicago?

A. Some of it is being handled by the railroads, and various truck lines.

Q. Would you be specific?

A. Well, we use quite a number of them. We have Brady, Des Moines Transportation, and some of the smaller companies such as—we also use the Burlington Transportation to some points.

Q. Those are to points on Highway 6 in Iowa or points covered by this application?

A. Well, to these points I named a while ago, yes.

Q. By that you mean Adair, Atlantic, Griswold, Harlan and Ladora?

A. Yes, that is right.

Q. Do some of those shipments from Chicago also go to your bulk plants?

A. Well, everything to our bulk plants is in truckload lots. Now, the customers——

Q. Just a moment. What I mean is some of the Chicago, [fol. 1380] these Chicago shipments, do they go to your bulk plants?

A. Well, that is the only shipments we make from East Chicago are truckloads to our own bulk plants and a few of our customers order in truckload lots. If they don't order in truckload lots, we ship it out of our warehouses, Omaha, Des Moines or Cedar Rapids in small quantities.

Q. Yes.

A. But our own stations are supplied direct out of East Chicago in truckload lots.

Q. What I am alluding to, I think you gave two groups of towns.

A. Yes. The first group was the customer accounts or dealer accounts.

Q. Do the customer accounts get anything out of East Chicago?

A. Yes, they do, in truckload lots.

Q. In truckload lots, and that is carried by Brady, Des Moines Trans., Burlington Trans. or the railroad, is that right?

A. That is right.

Q. And is the same true now as to the list of towns that you have bulk plants, in so far as Chicago shipments are concerned?

A. That is right.

Q. All right. Now, then, what do you ship out of Omaha to the points in Iowa?

A. Well, those are mostly emergency shipments where we might run out of certain items of oil, or some item that we have sold and we need it right now, but the station can not take a truckload.

[fol. 1381] Q. And what is the size of those shipments?

A. They will run all of the way from a minimum shipment, I better say a barrel of oil, five hundred pounds on it, to several thousand. They have been as great as ten thousand pounds I would say.

Q. And who handles those shipments from Omaha?

A. Well, we use the carrier that has direct service whereever it is possible to do so. We use any number of carriers out of Omaha.

Q. And can you name those carriers?

Mr. Nolan: I think that should be confined to points involved in this case.

Exam. Carpenter: You can confine your question to points involved in this case.

By Mr. Bradshaw:

Q. Carriers used out of Omaha to points on Highway 6.

Exam. Carpenter: Don't necessarily limit it to Highway 6.

Mr. Bradshaw: No, limit it to this application.

A. That would be difficult to say off hand. We use rail service in many cases.

By Mr. Bradshaw:

Q. What rails?

A. Well, we use the Rock Island. We use any railroad that will serve the point. We have no preference except that we try to use the direct service.

Q. Do you use any other common carriers, that is trucker [fol. 1382] common carriers?

A. Yes, we use Brady.

Q. Do you use the Iowa-Nebraska?

A. We have used them some but very little. Just off hand, I couldn't say what points they serve that are involved in this application. Then we use a number of small carriers I don't recall just who they are.

Q. Well, on your shipments over five thousand pounds are you able to get them to destination now out of Omaha to points covered by this application?

A. I don't know that we have had any recently.

Q. Now, then I wondered, you said it was supplies that you ship out of Kansas City into the Iowa points involved in this application?

A. That is correct.

Q. Do you use any other carriers, other than the Rock Island Motor Transit?

A. Yes, we use Bruce, Burlington Transportation.

Q. And I believe you stated that you did use the Rock Island Motor Transit for shipments over five thousand pounds prior to the restriction?

A. Yes, we have.

Q. And who have you used since the restriction out of Kansas City to the points involved in this application?

A. Well, I doubt that we have had any because in July [fol. 1383] our plant was under water, and we lost practically all of our supplies, and we have been shipping those in direct wherever we could, direct from the factory. However, we are getting stocked again, and we are ready to go ahead and ship direct, and, with the spring weather coming on, there will be a large movement of supplies. Our supplies move in small lots during the winter months for the reason there is no work being done, but they will start moving into Iowa right away.

Q. In your job as Traffic Manager, have you made any investigation to find out if there are any other carriers that can handle this traffic from Kansas City to the points involved in this application?

A. Well, I haven't because we haven't had occasion to start this movement.

Mr. Bradshaw: I believe that is all.

Mr. Nolan: Just couple of questions.

Redirect examination.

By Mr. Nolan:

Q. Mr. Kilmer, have you been informed that the Brady Truck Lines, or Brady Motor Freight, are embargoing any less than truckload shipments out of Omaha?

A. I understood they were. I haven't had any shipments that were for any points that were embargoed right at this time, but we will probably run into those.

Q. But that is the information you have in the instructions, Brady has so restricted his operation?

[fol. 1384] A. Yes.

Q. Now, what is the fact out of Chicago you are able to get many trucking companies that are able to handle the truckload operation but are not handling the small shipments into the small places, or do you have any small shipments coming out of Chicago?

A. Not out of East Chicago. We do have some supplies coming from the Field people in Chicago. That is our polish and lighter fluid that moves in small quantities. However, that usually goes direct to the warehouses, such as Des Moines, Cedar Rapids, and those shipments will run at times over five thousand pounds.

Q. Well, they go to the so-called larger centers?

A. That is right.

Q. Now, when you refer to Brady and the Des Moines Transportation Company handling your shipments out of East Chicago, those are truckload quantity shipments?

A. That is correct. They are all truckloads shipped out of the refinery at East Chicago.

Q. Now, you say your own stations are operated under a lease arrangement with your operator, and do you have stations, do you have customer stations where the customer owns the station and merely handles your products?

A. We have some, yes.

Mr. Nolan: That is all.

Exam. Carpenter: Recross.

[fol. 1385] Mr. Bradshaw: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: We will adjourn for lunch until 1:45 I guess.

(Whereupon at 12:15 p. m. a recess was taken under 1:45 p. m. of the same day.)

AFTERNOON SESSION 1:45 p. m.

Exam. Carpenter: If you are all ready.

G. C. MARTIN was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name and speak so we can all get it?

A. G. C. Martin, M-a-r-t-i-n.

Q. Where do you live, Mr. Martin?

A. Underwood, Iowa.

Q. Underwood, Iowa, is located where with reference to Council Bluffs?

A. Twelve miles north on Highway 64.

Q. Underwood, Iowa, is not on U. S. Highway 6?

A. No, sir.

Q. And about what is the population of Underwood?

A. About two hundred seventy-five, three hundred.

[fol. 1386] Q. And that being located close to Council Bluffs as it is, I take it that Underwood has the retail service installations of a small Iowa town.

A. Limited, yes, they are limited there.

Q. What is the nature of the places of business in Underwood?

A. Well, we have an insurance business, hardware, we have a blacksmith shop there that does some manufacturing in a small way, a lumber yard, oil businesses, there is three oil companies represented there, cafes, recreation parlors, and I have the general store and locker plant.

Q. And you have a line of general merchandise?

A. A line of general merchandise, yes, sir.

Q. And also operate the locker plant there in connection with it?

A. Locker and processing plant, yes, sir.

Q. How long have you been in business in Underwood?

A. It will soon be seven years.

Q. Now, do you have occasion to purchase some of your merchandise across the river over in Omaha and have it shipped in from other outside of the State points?

A. Yes, we do that almost daily.

Q. And I take it your principal source of supply for the merchandise that you handle is probably Omaha, is it not?

A. The greater volume comes from Omaha, yes, sir.

Q. Including supplies and materials for the locker plant, [fol. 1387] that would be your principal source of supply?

A. Yes. We have foods, groceries also there.

Q. What trucking service have you used for the transporation of your merchandise and supplies to your place of business?

A. We use the Kroeger Transfer of Omaha in most instances. However, incoming freight from various other suppliers, we also exclusively use the Rock Island Motor Transit.

Q. Now, the Kroeger Transfer Company, is that a local dray line?

A. That is a local dray line.

Q. And it is not what we commonly refer to as a motor carrier, that has through rates with the other common carriers over the country, has it?

A. I believe that, well, I couldn't say.

Q. Well, your principal business is Omaha?

A. That is correct.

Q. More so, and from other points of origin your principal common carrier is the Rock Island Motor Transit Company?

A. Yes, sir.

Q. Now, I take it there are a number of trucking concerns who go by Underwood on the highway?

A. Yes, there is.

Q. Are there, so far as you know, do any of those com-

mon carrier concerns render a regular daily service for picking up and delivering freight at Underwood, other than Kroeger and the Rock Island Motor Transit Company? [fol. 1388] A. I am not familiar with any daily service there.

Q. No one has solicited you with the representation they do provide that type of service?

A. No one has solicited me, no. I don't recall ever having occasion to receive freight. Well, it would be a rare exception.

Q. All right: What would you say as to whether your business would be affected there by the elimination or substantial reduction in the service now rendered by the Rock Island Motor Transit Company to Underwood?

A. Well, I think we would be at a kind of a disadvantage, inasmuch as we depend on them almost exclusively now.

Mr. Bradshaw: Just a moment.

Mr. Howland: Do you want the objection to precede that?

Mr. Bradshaw: Please. I would like to object unless this is limited to interstate commerce.

Mr. Howland: Well, I am referring to out of State transportation service.

A. I believe that is about the only type that we would use the Rock Island Motor Transit for because our local drayage agent, Mr. Kroeger, carries all of it.

Exam. Carpenter: Do you show the objection on there?

Mr. Bradshaw: I will withdraw it.

By Mr. Howland:

Q. In other words, the wholesalers who do business in Omaha and Council Bluffs, they make deliveries out there at Underwood to a large extent, do they, the food houses, [fol. 1389] and things of that sort?

A. Oh, yes.

Q. So, the Rock Island Motor Transit Company is the only regular common carrier that renders a daily service in there from the east and other points?

A. Other than the local carrier that I mentioned, that would be correct, yes.

TRANSCRIPT OF RECORD

Supreme Court of the United States

OCTOBER TERM, 1956

No. ~~101~~ 6

AMERICAN TRUCKING ASSOCIATIONS, INC., ET AL., APPELLANTS,

vs.

UNITED STATES OF AMERICA AND INTERSTATE COMMERCE COMMISSION, ET AL.

No. ~~110~~ 8

RAILWAY LABOR EXECUTIVES' ASSOCIATION, ET AL., APPELLANTS,

vs.

UNITED STATES OF AMERICA AND INTERSTATE COMMERCE COMMISSION, ET AL.

APPEALS FROM THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

NO. 101 FILED MAY 22, 1956
NO. 110 FILED MAY 24, 1956
PROBABLE JURISDICTION NOTED OCTOBER 8, 1956

Mr. Howland: You may cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. Are you on a rail line?
A. Yes, sir.
Q. Which one?
A. The Rock Island and Milwaukee. Now, I would——
Q. That is all right.
A. The Milwaukee is only mail service, no freight.

Mr. Bradshaw: That is all.
Mr. Nolan: Let me develop that a little bit.

Redirect examination.

By Mr. Nolan:

Q. Are you familiar with the fact, Mr. Martin, that Underwood is on this line of the Rock Island Railroad which the Interstate Commerce Commission has authorized to be abandoned, with a new line of railroad between Atlantic and Council Bluffs?

A. That will soon be eliminated. That is my understanding.

Q. Now, the Milwaukee, does it perform any local service [fol. 1390] to Underwood?

A. Only mail service.

Q. As a matter of fact the Milwaukee has no station or agent at Underwood?

A. It has no station or agent, that is correct.

Q. Unless the Milwaukee would take over the facilities which the Rock Island has there at the present time, you wouldn't get much service, so far as the town is concerned, from the Milwaukee Line, would you?

A. No, we wouldn't have any service at all. It is going to be quite a handicap to us, the town there, if the Milwaukee doesn't.

Q. Doesn't take over the service?

A. Doesn't take care of our heavy freight such as lumber, etc.

Mr. Nolan: I think that is all.

Exam. Carpenter: Any further cross?

Recross-examination.

By Mr. Bradshaw:

Q. I believe you stated you didn't know of your own personal knowledge whether or not any other common carriers came into Underwood?

A. I can't recall any now. It would be the rare exception in a small town of that kind.

Q. You haven't investigated?

A. No, sir, not with the other businessmen. I can only speak for myself.

[fol. 1391] Mr. Bradshaw: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Schneekloth.

LESTER SCHNEEKLOTH was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation?

A. My name is Lester Schneekloth. I am from Poweshiek County, Malcom, Iowa. I operate a garage and distribute petroleum products in the country, rural dealer.

Q. How long have you lived in Malcom?

A. All of my life, fifty years.

Q. How long have you been engaged in the garage business?

A. 1920 to 1952, would be thirty-two years.

Q. Are you an automobile dealer, or only run a repair garage there?

A. I operate a repair garage. I formerly did have an automobile dealership but I gave it up.

Q. Now, Malcom is located about ten miles east of Grinnell, is it not?

A. That is right.

Q. And it is a station on the Rock Island Railroad?

A. That is right.

[fol. 1392] Q. You are located off of U. S. Highway No. 6 are you?

A. We are, about a mile and a quarter.

Q. About a mile and a quarter south of U. S. Highway No. 6?

A. That is right.

Q. What highway are you located on?

A. We are not definitely located on any highway where my place of business is. Highway 63 goes through Malcom.

Q. That is a road that runs from U. S. Highway No. 6 down through Montezuma to Oskaloosa?

A. That is right.

Q. Now, in your business there do you handle automobile supplies and parts?

A. I do.

Q. Do you handle tires and batteries?

A. I do.

Q. And other automobile accessories?

A. That is right.

Q. Now, you were a witness in the other hearing in this case?

A. Pardon?

Q. You were a witness before in this case?

A. That is right.

Q. In the temporary hearing?

A. That is right.

Q. Now, what shipments do you have coming in or going out, from or to out of State points?

[fol. 1393] A. Well, sir, I receive oil burners from Grafton, Wisconsin, and I receive some oil from the Illinois Oil Company, oil and grease.

Q. And are those less than truckload shipments?

A. Oh, yes.

Q. And how have you been receiving those shipments?

A. By Rock Island Motor Freight.

Q. And have you been receiving those shipments for a good many years that way?

A. Well, the oil business is just recently started, a year ago, the oil burner business.

Q. You are the dealer there for oil burners?

A. That is right.

Q. A space heater or house heater?

A. That is right.

Q. Those are single unit heaters?

A. They are individual space heaters.

Q. For home use?

A. That is right.

Q. Or office use?

A. That is right.

Q. Or business use. They are not connected with an oil burner furnace?

A. No.

Q. They are the single heat unit controls?

[fol. 1394] A. They are a unit in themselves.

Q. A heating stove?

A. Yes, a space heater.

Q. How has that service for the oil and oil burners by the Rock Island Motor Transit Company been?

A. Very good.

Q. And what other use do you make of the Rock Island Motor Transit's service at Malcom?

A. Oh, occasionally we are forced to get our pumps for our trucks from the Independent Manufacturing Company at Omaha. Occasionally we have to send those pumps in for repairs, and on different occasions get exchange pumps and send the meter off the old truck back to Omaha so they can have the tank and complete pump assembly by the tractor.

Q. What transportation company have you used for that?

A. The Rock Island, the only one we could get for that.

Q. Now, what is the fact as to whether or not the Rock Island Motor Transit Company is the only company that serves Malcom from both the east and the west?

A. What is that?

Exam. Carpenter: Read the question.
Mr. Nolan: Read the question.

(Question read.)

A. That is right, so far as I know that is the only trucks that come in from east and west.

[fol. 1395] By Mr. Nolan:

Q. Now, there are a number of truck companies that operate on No. 6, are there not? You have seen them on the highway?

A. That is right, but they are not allowed to come into Malcom.

Q. They don't come to Malcom?

A. Now, here is a case I had to get a motor from Indiana, a complete motor assembly, and I tried to use the Des Moines Transportation. The Des Moines Transportation could not bring that motor because they could not stop at Malcom. They had no stop, so it had to come by the Rock Island.

Q. What would be the effect on your business if the Rock Island Motor Transit Company should cease operating or materially restrict its operations?

A. Well, for shipments such as those stoves shipped from out of State shipments, it would inconvenience us a great lot.

Q. You would have to go to some other point?

A. Either be forced to go to Grinnell and make our shipments out of Grinnell, or some point where the truck line had a point, see.

Q. Now, do you not ship motors in for reconditioning, automobile motors?

A. We don't ship any for reconditioning at all.

Q. Do you ship new motors in occasionally for automobiles?

A. That is right.

Q. And from where do you get those?

A. In one case we had to get one from Indiana, and [fol. 1396] in another case from Bloomington, Illinois.

Q. In your repair work you occasionally have to install a new motor in an automobile, is that right?

A. That is right, and when the motor is available within the State, we buy it within the State. There are occasions we can not buy them and we have to buy them outside of the State.

Q. You operate what is known as a tank wagon delivery among the farmers for oils and greases, do you not?

A. That is right.

Q. In other words you have a tank wagon or tank truck, and you go around and deliver gas, and oil and grease to the farmers for their tractor engines and motors, is that right?

A. That is right.

Q. How many of those tanks do you operate?

A. Just one.

Q. And are you required to get repairs for that, and parts for that occasionally?

A. Occasionally we do for the pump, not for the truck, but for the pump and meter, and we get that repaired out of the Independent Manufacturing Company at Omaha.

Q. I see. Now, you say the Rock Island Motor Transit Company is the only company that serves Malcom. Therefore, you would have no other means of getting this merchandise in if the Rock Island Motor Transit didn't serve Malcom, isn't that right?

A. We have Van Wyk comes in from the south for local [fol. 1397] shipments, but for out of State shipments, we have no facilities at all except the Rock Island east or west.

Q. You have a local operator that operates through Ottumwa to Malcom and Marshalltown?

A. Yes.

Q. That is only for local shipments?

A. Yes.

Mr. Nolan: That is all.

Exam. Carpenter: Just a minute before you cross-examine. Off the record.

(Discussion off the record.)

Exam. Carpenter: All right, back on the record. Go ahead.

Mr. Gradshaw: I move this testimony be stricken on the ground it is all irrelevant and has no bearing on this application because of the fact that the Rock Island Motor Transit Lines already has the authority under their permanent authority.

Exam. Carpenter: The motion is denied. Go ahead, cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. What size shipments do you have out of Wisconsin?

A. Usually from three to five oil burners.

Q. What do they weigh?

A. Around two hundred, two hundred twenty pounds a piece.

Q. In other words, six—seven hundred pound shipments? [fol. 1398] A. That is right.

Q. Do you have any occasion to have over one thousand pound shipments out of Wisconsin?

A. No.

Q. Do you have any occasion to have any shipments from out of State of over one thousand pounds into Malcom?

A. Well, that would depend upon, of course, I haven't had anything in the past, but it could be hardware for some of these motors you have to get from Indiana and various places like that. You have to pick them up where you can find them.

Q. What would a motor weigh?

A. The Buick motor weighs eight hundred ninety some pounds.

Q. That would be under the one thousand?

A. That is right, but you can not know whether that would stay under that minimum or not.

Q. Would you be likely to stay under two thousand pounds?

A. Yes, I am sure of that.

Q. That is for any out of State source?

A. Pardon?

Q. From any out of State source?
A. Yes, I am sure of that.

Mr. Bradshaw: That is all.

Redirect examination.

By Mr. Howland:

Q. Where is the headquarters of this concern called the Illinois Oil Company?.
[fol. 1399] A. The headquarters?
Q. Yes.
A. Rock Island.
Q. Rock Island, Illinois?
A. Mmmmhuh.
Q. Can you tell us about what the population of Malcom is?
A. Well, it is between four hundred fifty and five hundred.
Q. Any manufacturing concern there?
A. No manufacturing. We have, I think I could be safe in saying, one of the largest cooperative elevators in the State of Iowa.

Mr. Howland: That is all. Thank you.
Exam. Carpenter: Any recross?
Mr. Nolan: That elevator, does that handle——
Exam. Carpenter: Wait a minute.
Mr. Bradshaw: No recross.

By Mr. Nolan:

Q. Does that elevator handle farmer supplies like wire and hardware, seeds, feeds, and things of that character?
A. We handle elevators, portable farm elevators, wire, and feed and seed, refrigerators, stoves, and just everything from hardware.
Q. Soup to nuts, in other words?
A. Yes.
Q. O. K.
[fol. 1400] A. That is right.

Mr. Nolan: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: I will ask Mr. Howland a question. Malcom is in the same position as Washington and some of these other points that are not on Highway 6?

Mr. Howland: That are on other routes connecting with Highway 6 via Des Moines, or some other point.

Exam. Carpenter: In the next couple of days can you give me the Sub. number that carries the Malcom authority?

Mr. Howland: I will get that. Will you inject that, Mr. Millett? It is in Sub. 1. I might read it to you.

Mr. Millett: Service is authorized to and from the off-route points of Malcom, Downey, and Stockton, Iowa, in connection with carrier's presently authorized regular route operations.

Mr. Nolan: That is all. Let's get over here.

ALLEN KIES was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Give us your name, place of residence, and occupation.

A. Allen Kies, Malcom, Iowa.

Q. And you live at Malcom, Iowa?

A. Yes, sir.

Q. You are engaged in the hardware business, is that right?

[fol. 1401] A. Yes, sir.

Q. You have the retail hardware store there?

A. Hardware and plumbing.

Q. Heating, any heating equipment?

A. Oh, yes.

Q. And general farm supplies?

A. Yes.

Q. Now, as I understand it, you have recently established your business there, is that correct?

A. Yes, the last six months. I was there for seven years prior, and I was out five years, and I am back again.

Q. Were you in business there seven years ago?

A. I was in the hardware, the same business.

Mr. Bradshaw: I would like to enter an objection to all of this testimony on the grounds it is irrelevant and immaterial. It is taking up time. Malcom is not involved in this application.

Exam. Carpenter: The objection is overruled. It is involved in the application so far as traffic moves over Highway 6 to get in there. As I understand it that is correct, Mr. Howland?

Mr. Howland: That is correct.

Exam. Carpenter: Just the same as any of these other points on the Rock Island line north of Highway 6 and the Rock Island lines south of Highway 6, am I correct?

[fol. 1402] Mr. Howland: We have authority to serve.

Exam. Carpenter: On lines south, don't you?

Mr. Howland: Yes.

Exam. Carpenter: And on lines north?

Mr. Howland: On lines north out of Des Moines and into Cedar Rapids.

Exam. Carpenter: The only reason you are putting on witnesses from those points, the traffic has to move to points on those lines is over Route 6.

Mr. Howland: That is correct.

Exam. Carpenter: Proceed.

By Mr. Nolan:

Q. Were you in business there before, did you use the Rock Island Motor Transit Company's service?

A. I did.

Q. How was the service then?

A. Very good.

Q. Did you have shipments coming in then from out of State points?

A. Yes.

Q. What were those points?

A. Some from Chicago, and Freeport, Illinois, and some bathrooms out of Wisconsin.

Q. Bathroom, you mean equipment like the Kohler bathroom?

A. Yes.

Q. That would include the tub, lavatory, stool and gen-
[fol. 1403] eral bathroom equipment, is that right?

A. That is right.

Q. And you say you are back in the same business in Malcom?

A. The same place.

Q. And do you presently use the Rock Island Motor Transit Company's service?

A. I am for outside shipments, but for local shipments I use the other.

Q. You use the line that operates between Ottumwa and Marshalltown?

A. Yes.

Q. On out of State shipments you are using the Rock Island Motor Transit Company?

A. Yes, and out of Cedar Rapids I use the Rock Island.

Q. Now, state whether or not there is any other east and west service into Malcom, Iowa, other than the Rock Island Motor Transit Company?

A. I haven't seen any trucks of any kind in there.

Q. Now, you heard the testimony of your fellow townsman, Mr. Schneekloth?

A. Yes.

Q. And if you were asked the same questions in regard to service in Malcom, would your answers be about the same? There isn't any other service there than the Rock Island Motor Transit Company affords out of State shipments?

[fol. 1404] A. That is right.

Q. And what would be the effect on your business, so far as these out of State shipments are concerned, if the service of the Rock Island Motor Transit Company should be terminated or substantially reduced?

A. Well, I don't know how we would get it in there.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. Is there a railroad through Malcom?
A. The Rock Island.
Q. Do you use them at all?
A. I don't believe they haul freight, do they, on small shipments.
Q. I am asking you.
A. Than carload lots. I don't believe they unload it.
Q. Do you know that is a fact, or are you just guessing?
A. I don't know that as the fact. I have been told that. I have never tried to use it.

Mr. Bradshaw: That is all.
Mr. Nolan: That is all.
Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: Mr. Howland, are you through with these gentlemen from Malcom?
[fol. 1405] Mr. Howland: Yes, they may be excused.
Mr. Nolan: Mr. Lindberg.

C. E. Lindberg was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. You are Mr. C. E. Lindberg of Minneapolis, Minnesota?
A. Yes, sir.
Q. You live at Minneapolis?
A. That is right.
Q. And what is your business, Mr. Lindberg?
A. I am Traffic Manager for the Janney, Semple, Hill & Company, wholesale hardware, Minneapolis, Minnesota.
Q. Is that "Semple" the same as "Simple" is spelled?
A. S-e-m-p-l-e.

Q. "e" instead of "i". You say you are Traffic Manager for that company. As I understand the Janney, Semple, Hill & Company is a wholesale hardware dealer?

A. Yes, sir.

Q. And all allied lines of hardware, is that right?

A. Yes, sir.

Q. And how long have you been connected with the company?

A. Oh, about twenty-five years.

Q. And you have testified before in the temporary application hearing?

[fol. 1406] A. Yes, sir.

Q. You are familiar with the character of the service proposed by the Rock Island Motor Transit Company in this case?

A. Yes.

Q. In this case it is an application for motor carrier operating rights without restriction either in regard to the size of the shipment, or key point.

A. Yes, I understand that.

Q. You understand that. Now, Mr. Lindberg, in the territory involved here between the Tri-Cities and Omaha, Nebraska, and the off-route points which would be served by the use of the line along Highway No. 6, state whether or not your company has regular customers in those points?

A. Yes, we have in, Oh, at least a dozen points.

Q. And can you state at this time the names of those points where your company has regular customers?

A. I can.

Q. And will you so state?

A. Atlantic, Brooklyn, Casey, Cedar Rapids, Iowa City, Marengo, Mitchellville, Vinton, Oxford, Oakland, Shelby, Walnut, West Liberty, those I know. There may be a few others, too.

Q. And do you have occasion to have new customers in various points?

A. Yes.

Q. In this territory. Now, you ship to the regular retail [fol. 1407] hardware dealer in the various towns involved here?

A. Yes, sir.

Q. And in other parts of the country, is that right?

A. Right.

Q. You don't have franchised dealers, or franchised stores?

A. No.

Q. Your company is a wholesale hardware company that sells to whoever wishes to buy of you?

A. That is right.

Q. Now, what would you say as to whether or not there is a regular flow of traffic into these points you have enumerated from your wholesale house in Minneapolis?

A. There is a regular flow. We have salesmen travelling all through Iowa, and several of them working along Highway 6, so that daily there is some shipment for some town on the line.

Q. So what would you say would be the size of the ordinary shipment to these points?

A. They are all L. T. L. shipments. I would say they would probably not run over one thousand pounds, possibly eleven hundred.

Q. And do you have occasion, however, to make volume shipments in excess of five thousand pounds to some of these points?

A. No, we don't.

Q. Now, Mr. Lindberg, what transportation facilities have you been using to these Iowa points that you have enumerated?

[fol. 1408] A. We use the Rock Island Motor.

Q. And would you say you have used that company almost exclusively to all or most of these points?

A. Yes.

Q. And how has that service been, satisfactory or otherwise?

A. Very satisfactory.

Q. Now, do you know of any other carrier serving the Twin Cities and these points on a daily schedule other than the Rock Island Motor Transit Company?

A. No, I don't.

Q. And what would be the effect upon your company's business in these points if the service of the Rock Island Motor Transit Company should be terminated or substantially curtailed?

A. Well, we are afraid it may be reduced because we have competition from Omaha and Des Moines, and Waterloo, Cedar Rapids, and the Tri-Cities. We have got to have service in these towns if we are going to compete.

Q. Do you know of any other transportation facility that could give you the same service the Rock Island Motor Transit Company is giving you from Minneapolis to these points you have named in Iowa?

A. No, I do not.

Q. Now, are you a member of various traffic associations in the Twin Cities?

A. Yes, sir

[fol. 1409] Q. And you have been active in the traffic field for a good many years, have you not?

A. Yes.

Q. And in your work of handling traffic for your company I assume you have had experience with a great number of trucking companies?

A. We have.

Q. And do you have an opinion as to whether or not it is reasonably necessary for a trucking company to give local service to the small intermediate points, they must also have overhead lines to the bigger points?

A. I believe they must.

Mr. Bradshaw: That is objected to. Did he answer?

Exam. Carpenter: I will overrule the objection.

By Mr. Nolan:

Q. I am asking you if you have an opinion on that subject.

A. I have.

Q. What is that opinion?

Mr. Bradshaw: Now, that is objected to, irrelevant, immaterial. Is is not the best evidence.

Exam. Carpenter: The objection is overruled.

By Mr. Nolan:

Q. You may state your views on that subject, Mr. Lindberg.

A. Well, I believe it is necessary there. An individual, owner-driver, possibly could get by with possibly small [fol. 1410] shipments, but a fairly good sized common carrier surely must have, not only L. T. L. shipments, but truckload volume shipments and overhead business, too.

Q. Could you reasonably expect some carrier to give service out of the Minneapolis area into these points in Iowa based say upon these local shipments to the small towns you have enumerated, could such a service be maintained without overhead volume service?

A. I am of the opinion they couldn't.

Q. State whether or not you have observed various trucking companies going to more overhead service than local service in recent years.

A. I think that is true. There are a good many of the truck solicitors coming in and looking for truckload business and large volume shipments. It appears to me that they have more or less neglected the L. T. L., the smaller shipments.

Q. And state whether or not that is particularly true where those smaller shipments are destined to the so-called small towns or intermediate points?

A. That is true.

Q. Between terminal points?

A. That is true.

Q. Have you experienced various trucking companies who operate between terminal points, refusing to accept the so-called small L. T. L. shipments destined to small points? Have you had that personal experience?

[fol. 1411] A. I can't say they have absolutely definitely refused to accept them, but they neglect to make a pick-up. It may be two or three days before they finally get around to it. They tell us they can not make the pick-ups on a certain day and will come tomorrow. Tomorrow never comes, and we have to find someone else to handle these shipments for us.

Q. You have a number of carriers operating between Minneapolis and Des Moines, do you not?

A. Yes, sir.

Q. And those carriers, are those some of the carriers that prefer that overhead volume freight?

A. Yes, they do.

Mr. Nolan: That is all.

Exam. Carpenter: Cross-examine.

By Mr. Archambo:

Q. Mr. Lindberg, during the years you have been employed by the Janney, Semple, Hill & Company, has your company been a member of the Minneapolis Traffic Association?

A. Yes, they have.

Q. And, as Traffic Manager of that company, have you directed any questions to the Traffic Association with respect to service, or freight claims, or complaints, I should say directed any complaints to the Association with respect to service or rates?

A. Yes, we have.

By Exam. Carpenter:

Q. Within the territory covered by this application? [fol. 1412] A. I am afraid I can not answer that.

Mr. Archambo: Mr. Examiner, I am doing that to clarify the statement I have prepared.

Exam. Carpenter: All right.

Mr. Archambo: It is true that is not for this company on this line, as I understand it.

Mr. Bradshaw: Pardon me. I think it ought to be limited to this application.

Mr. Archambo: I am only doing this for your benefit, Mr. Bradshaw, to clarify the position of the Traffic Association as to those members. We could not bring all of the members here today, and this is the only member I have here, and that is why I asked this question.

By Mr. Archambo:

Q. Under a former President of your company, do you know whether or not he had anything to do with the organization of the Traffic Association?

A. Yes, he did. He was one of the founders of it.

Mr. Archambo: That is all. Thanks.
Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. What other service besides the Rock Island Motor Transit Company do you have from Minneapolis to Atlantic, Iowa?

A. I believe that Watson holds out to serve that point, [fol. 1413] but as far as I know we have never used them.

Q. Any others?

A. To Atlantic?

Q. Yes.

A. No, not so far as I know.

Q. Now, you are talking about direct service from Minneapolis?

A. Yes.

Q. Now, you have available interline service to Atlantic from Minneapolis?

A. I can't tell you that either because we have never used it.

Q. And I assume the same is true as to Brooklyn?

A. That would be true.

Q. You can not tell because you have never had occasion?

A. We have never used it, no.

Q. And these other smaller points along Highway 6, would the same answer be true if I was to ask that question?

A. Generally, yes.

Q. I am excluding as not being smaller points, Iowa City. Now, do you have other service to Iowa City?

A. Yes, we have right now. I can't tell you who it is if that is what you mean.

Q. And how about Newton?

A. Newton, I know, I am sure there is a connecting line service there, but we haven't used that, either.

Q. In other words, Mr. Lindberg, you have been using [fol. 1414] the Rock Island Motor Transit, and you are satis-

fied with their service, and you haven't looked particularly for other services, is that right?

A. That is right.

Mr. Bradshaw: I believe that is all.

Redirect examination.

By Mr. Nolan:

Q. Mr. Lindberg, have you ever been solicited, or have you been offered service by any other motor carrier on a direct line service from the Twin Cities to any of these points you have enumerated, other than by the Rock Island Motor Transit Company?

A. No, we haven't. We have used other lines occasionally but that has been frequently due to some dealer routing his order in some other manner.

Q. You say that service has been "frequently". What do you mean by that word "frequently"?

A. I guess I will have to see the record on that. What I mean we have used someone else, we have been instructed to do so by either the dealer himself, or instructions on his orders.

Q. Has that been frequent or infrequent?

A. That has been infrequent, but the times it has been—I am getting balled up here a little bit, it is because the orders have been routed in that manner.

Q. Now, do you ordinarily control the routing rather than your customers?

[fol. 1415] A. No, we don't, but we have got to have service, and we are interested in it for that reason. If the dealers don't get service, we are not going to have any business.

Q. Who is your account in Iowa City, account or accounts? Slager Hardware Company?

A. Slager is one of them.

Mr. Nolan: I think that is all.

Exam. Carpenter: Recross.

Mr. Bradshaw: No recross.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Archambo.

HENRY ARCHAMBO was sworn and testified as follows:

Direct examination.

My name is Henry A. Archambo, A-r-c-h-a-m-b-o. I am the Assistant Director of Traffic for the Minneapolis Traffic Association of Minneapolis, Minnesota. I am a Class B Practitioner. I have had over thirty-five years of experience in traffic and transportation matters in the industrial, rail and association lines. My industrial positions have been with wholesale paper houses or with grain commission houses and grain commission merchants. For the last, since 1932 I have held my present position. In connection with the rail service it had to do, my experience had to do with the checking of freight rates, [fol. 1416] assistance in the preparation of tariffs, the checking and supervising of, prior to the truck service, less carload rail service for merchandise freight. The Minneapolis Traffic Association, organized by the industrial interests of the City of Minneapolis, has on its membership list about seven hundred sixty members. About eighty-five of those members are of the grain group exclusively, and would not be interested in the proceedings here. The other grain members and industrial members, however, do ship less carload, less truckload, volume by both rail and motor. The Minneapolis Traffic Association may have on its membership railroads, motor carriers, air lines and express companies. Those members, however, have no say in the policy of the Association. They come into play through this means. Our Association derives part of its revenue from the grain members. The balance, or greater percentage of our membershp does come from the joining with the Minneapolis Chamber of Commerce in the solicitation of funds, so that automatically, when an industrial member becomes a member of our Association, he is also a member of the Minneapolis Chamber of Commerce. He

serves on their Board of Directors, or its Committees, but, as I previously explained, the Traffic Association speaks for the manufacturers, wholesalers and jobbers. For the benefit of the record I would like to clarify this further. I mentioned we had some seven hundred sixty members. The total membership would be in excess of that, but those in excess are Doctors, Dentists, Lawyers, etc., [fol. 1417] that would not be interested in transportation, and for whom we do not speak. One of the policies of the Association, supported by the Board of Directors, since I have been with the Association——

Mr. Bradshaw: May I inquire, just a moment. As I understand this Traffic Association is equivalent to the Chamber of Commerce.

A. No. It is organized and established merely for the purpose of protecting the members in their traffic and transportation matters. We have nothing to do with civic functions, beautification of the city, airline passenger fields, or of that nature.

By Mr. Bradshaw:

Q. You are a branch of the Chamber of Commerce?

A. No, we are separately organized and merely join with the Chamber to consolidate the solicitation of funds like you have a community effort.

Q. Who are you appearing here on behalf?

A. The industrial portion of the City of Minneapolis, shippers and receivers.

Q. By what authority?

A. The authority of the by-laws and articles of incorporation. The Board of Directors, as I explained, are exclusively industrial men, and they, in turn, elect a Sub-Committee.

Q. Did you have a meeting of the Board of Directors before you came here?

A. No, sir. The members of our Association have a [fol. 1418] Director of Traffic and Assistant Director of Traffic, whose duty it is to determine what is necessary for the City of Minneapolis in traffic and Transportation matters and keep it alive; and only in those matters where

we are going to spend some excessive amount of money, or it is a policy we have question in our mind, do we go to the individuals through the Board, or I may go direct to a member, a group of members.

Q. Well, your Board of Directors hasn't taken any action on this particular application, have they?

A. Not on this particular one has the Board of Directors. However I can say to you that six of the Executive Committee of it have already been informed of what I am going to do down here today.

Q. Informed by you?

A. So if there was any question in their minds I would have known about it, and of all of the truck transportation since 1921 I have been involved in, I have never yet had to go to the Board for any one of the problems. Every bit of testimony I have presented and briefs I have filed, have been approved by my Board of Directors, this Board as well as previous Boards.

Mr. Nolan: May I interpose a question here.

By Mr. Nolan:

Q. As I understand your position, Mr. Archambo, you and your superior Director are clothed by your Board of Directors with the discretionary power, when to participate and when not to participate in some traffic matter [fol. 1419] affecting the industrial shipping and jobbing welfare of Minneapolis?

A. Correct, and if we don't do that, and the industry suffers for a lack of service, we will be removed, and they will put somebody in who can run it.

Q. So then you exercise that discretion, yet with a great deal of judgment, etc., is that right?

A. I have reason to believe the experience I have had, and the contact I have had with the members, I do know the needs of the market, having been in the industrial field, the rail field, and this present field.

By Mr. Bradshaw:

Q. In other words, you set the policy and your members don't have anything to say about it?

A. The policy was set by the Board of Directors when it was organized.

Q. So far as this application is concerned, there has been no policy except in your own mind?

A. I disagree with that.

Exam. Carpenter: It is plainly argumentative. Go ahead.

Mr. Bradshaw: I want to object to the testimony of this witness.

Exam. Carpenter: The objection is overruled.

The Witness: In this particular application the market is affected in this way. When we have had for so long efficient peddler truck service and built up our sales on the small units, we can not afford to let it go by and let [fol. 1420] the other markets who are more aggressive supporting trucking operations, for example, to get into our trade territory and take it away from us.

By Mr. Nolan:

Q. May I interpose one question? What do you mean by "the market"?

A. Minneapolis market versus Chicago, Omaha, Kansas City.

Q. O. K.

A. We think we have as good industry as they have, and all we need is transportation to keep it alive. It is strictly a selling proposition, and you have reached a point where you have sold the buyer on the theory he need not buy large quantities of freight. Therefore, buy hand to mouth as it may, and to do that he must have the best possible service. That means rail, truck, water, airline and everything. We need every bit of it. In this particular instance of the Rock Island Motor Transit Company, our own check, and, by the way I have four rate clerks under my direct supervision, and they check those rate slips that we quote to these members every month, and those rate slips show that we are gradually increasing monthly the use of the motor carrier transportation to the detriment of the rail line, and it is all done because of service, as I asked Mr. Lindberg for clarification purposes, and mainly so. Then our office is receiving complaints.

not that the carrier will not render a service to the industry, but he doesn't have the pick-up truck available at the time the shipper wants it, so we can't do anything with that. You have got to take the motor carrier's word for it. He didn't have the equipment available. Then [fol. 1421] when we obtained a check to determine where we are at, and I have spent a good many nights doing that, we have decided, for instance, the Rock Island Motor Transit Company is a common carrier rendering to the general public, our shippers and receivers, the type of service they are authorized to render under the Interstate Commerce Commission's authority, but they tell our shippers, "I am sorry. I can't handle anything over five thousand pounds, I am limited to that." That is a restriction, so far as the Minneapolis market is concerned, which results in very poor service to us because I know I, as Traffic Manager, I find from a check most of our members do the same thing. They want to be able to deliver the traffic to the carrier they choose, and they want him to have it, say one hundred pound shipments, five thousand pound shipments, or a truckload shipment, whatever they have got, and that should be true of all truck lines. The competition should be free and equal and should be flexible. I don't know of any railroad that has ever been forced to curtail its operation to one specific type of traffic. Of course, the Commission was correct in reopening this case. They had a perfect right to do it. We only now urge this petition or application be granted as sought, there not be any restriction placed against it in the use of that carrier.

Mr. Examiner, if I may, I would like to ask for permission now to put in this record—first may I ask this. Has there been any part of the interim record introduced [fol. 1422] as part of this testimony?

Exam. Carpenter: You mean the temporary record?

A. Yes, sir.

Exam. Carpenter: No, sir.

A. Then may I have the permission to introduce, then, the testimony of one of our members, the Coast to Coast

Stores, Inc., by Frank Cohen, Traffic Manager of the Coast to Coast Stores? I received a wire from him at the hotel this morning in which he asked, he would like to have me do that, if possible.

Mr. Bradshaw: Unless I have an opportunity to examine the testimony, I object to it.

Exam. Carpenter: I will have to exclude it. You have no opportunity to cross-examine the witness.

The Witness: He has been cross-examined.

Exam. Carpenter: I know he has.

Mr. Bradshaw: This is a different hearing.

By Mr. Nolan:

Q. Mr. Archambo, you know of your own personal knowledge that Mr. Cohen, who appeared here as a witness in the application for the temporary authority, is indisposed and unable to appear here at the hearing?

A. That is correct. He has caught the flu and his doctor has advised him to stay away. Otherwise I would have him here today.

Q. And you know, to your knowledge, the Coast to Coast Stores ship into the Iowa territory?

[fol. 1423] A. He asked of my own knowledge. He was a member of my Traffic Committee. It is just through conversation I have had with him.

Exam. Carpenter: The objection withdrawn?

By Mr. Nolan:

Q. Well, you haven't had occasion to follow the shipments or trace the shipments of the Coast to Coast Stores in this territory?

A. No. You see I have checked the plan as to loading the freight, but did not go so far as to see who carried it and how.

Q. You expected Mr. Cohen to be here?

A. I saw it loaded on the pick-up truck. That may be Minnesota category, but I didn't notice.

Q. Now, by the way, is Mr. Cohen's organization, the Coast to Coast Stores, a member of your Traffic Bureau?

A. Yes, sir.

Q. You are speaking for the Coast to Coast Stores as well as the other industrial wholesale and jobbing interests of Minneapolis?

A. That is correct. I just took a rough list of the firms from our rate slips, indicating rate calls to that area, and I had sixteen when I stopped checking.

Mr. Nolan: Well, you go ahead, Mr. Archambo. You are an intervenor here.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: I would have to exclude that anyway.

[fol. 1424] A. That is all right.

Exam. Carpenter: Cross-examine.

Mr. Nolan: I want to inquire of the witness.

Exam. Carpenter: This is direct I take it.

Mr. Nolan: I am an intervenor, too.

By Mr. Nolan:

Q. You say you are speaking for the market of Minneapolis?

A. That is right.

Q. And by that do I understand the jobbing and shipping interests, manufacturers, etc., who have occasion to make shipments out of Minneapolis into the trade territory of Minneapolis?

A. That is correct.

Q. And from your many years of experience in the traffic field and acquaintance with the trade territory of Minneapolis, state whether or not the territory served by the Rock Island Motor Transit Company between the Twin Cities, and the Tri-Cities on the east, on the one hand, and Omaha, on the west, is within that trade territory for specific items jobbed and shipped out of Minneapolis.

A. Definitely and more since the advent of the trucking in 1921.

Q. And can you tell us, Mr. Archambo, the general nature of the commodities or items that emanate out of Minneapolis into its trade territory?

A. Yes, for instance our biggest shipments, taking them first, would be in lines like the Minneapolis & Moline Im- [fol. 1425] plement. Those are agricultural implement dealers. The Webber Company. Those would be plows and agricultural implements. There they would be shipped either out of the Minneapolis plant or the Moline, Illinois plant. Then you have your Lavoris, a chemical. You are in the drug line now, a mouth wash. Then you come to the Gamble Stores, similar to the Coast to Coast. They handle general merchandise, the Coast to Coast and Butler Brothers in the same lines, those three. In the hardware lines are companies, the Janney, Semple, Hill & Company, Own Hardware Company. It used to be called the Hall Hardware, Minneapolis Iron Store. These three, the principal hardware interests. Then we have, I am trying to take the larger shippers. It would take all day to get the little ones. Lindsay Brothers, another agricultural house.

Q. You mean agricultural implements, and spreaders?

A. Yes, spreaders, harvesters, etc. International Sugar Feed, animal and dog feed. Liquid Carbonic. That company, by the way, is limited to only the northern Counties of Iowa. They will reach to Des Moines but not east and west. Munsingwear, Inc., knit goods. Olson Fish and Briardale Fish, those two big fish houses. The others wouldn't get in here. Atwood Coffee and Bemis Brothers Bag and Chase Bag. The Chase Bag is not shipping out of Minneapolis. The new plant is under construction, and we are working on the shipping arrangements now. Superior Separator Company. I must add something in here now if I may, [fol. 1426] Mr. Nolan. We were speaking of our Minneapolis shippers. It must be understood in the suburbs of Hopkins, St. Louis Park, New Brighton, Edina, E-d-i-n-a, those industries have been moved from the Minneapolis City limits to those outskirts, and continue to do business through us and all of the transportation agencies located in Minneapolis.

Q. Well, isn't it true, Mr. Archambo, that many of your industrial plants are moved outside of the city limits of

Minneapolis but still Minneapolis is their main business point?

A. Yes, and we will have two large houses in there this year. I would like to add, if I may, our Association in connection with its members now are organizing a pooling organization. We have one started now called the Minneapolis Shippers Association. Mr. Lindberg is a Director. We get the thing organized and the shippers themselves handle it. That is for the purpose of consolidating shipments into larger quantities from the several shippers to eliminate L. T. L. shipments and turn them into volume. That is why I am so insistant that the Rock Island Motor Transit's distribution be flexible enough to permit the line to handle volume as well as L. T. L. shipments. We do that to save freight charges to the trade areas.

Q: Now, going back a minute to my original line of questioning, do I understand, then, that with these lines of merchandise which you have enumerated from the main manufacturing and jobbing houses in Minneapolis, I will say area rather than the City of Minneapolis, do they [fol. 1427] have to your knowledge a regular flow of merchandise into the territory served by the Rock Island Motor Transit Company in the east and west movement from Des Moines?

A. They have a regular flow of merchandise into that Iowa territory I am reasonably certain without having those rate slips in front of me. Wait a minute. I can answer that direct. The January check I made showed thirty-two of the shippers or members shipped into points on Highway 6. That is the month of February.

Q. Thirty-two of your members shipped into the Iowa territory served by the Rock Island Motor Transit Company in the territory covered by this application?

A. That is right.

Q. And do you know how those shipments moved?

A. No, I don't know. We don't have anything to do with the routing. We tell the member to choose his own line.

Q. Do you know how many points in the territory served by the Rock Island Motor Transit Company?

A. I find Griswold, Wellman, Walnut, and Mr. Lindberg gave you, his trade are on here. They are shown as Janney, Semple Hill.

Q. Mr. Lindberg of the Janney, Semple, Hill & Company?

A. That is right.

Q. Who preceded you on the witness stand?

A. That is right. Newton, Marengo, Harlan, Grinnell. Here is Lindsay Brothers to Homestead, Avoca, Oxford, [fol. 1428] Victor, Harlan and Marengo, and they run along that way.

Q. We might as well make the record complete, if you have that information, and take the various companies and the data for the month of January, 1952. Let's take the companies and the shipments they made during that month.

A. We had Janney, Semple, Hill and Lindsay. Take Munsingwear, we had Newton, Grinnell and Oakland. Minneapolis—Moline had only two, Oakland and Homestead. I want to say now I didn't check the number of hauls we had on this.

Q. These companies, as I understand from their freight bills, they made shipments to these points during January 1952.

A. There may be more than one. I did not check to see if it was repeated. Newhouse Paper, only one point, Grinnell. Olson Fish, Harlan. Butler Brothers, one, Audubon. I have missed one, International Harvester. Our records show six points, but I forgot to list them. Atlantic for Atwood Coffee. These are duplications. Hilltop Laboratories had Marengo, Audubon and Brooklyn. Pearson Candy, Coralville. S and M; that is a supply house similar to Coast to Coast. They handle tires and automotive supplies, Newton. Western Electric, Mitchellville, Audubon, Atlantic, Colfax and Grinnell. Now, the Western Electric is located in what we call the northwest terminal district. It is in the Midway district. It is almost between Minneapolis and St. Paul, but it is in the Minneapolis area. That is a representative house. Schaffer, Inc. They make house-[fol. 1429] hold refrigerators, store coolers, freezers, and these small home low temp freezers like the deep freeze. They ship to Grinnell.

Q. Now, Mr. Archambo, are you acquainted in a general way with the quality of service which the Rock Island Motor Transit Company has performed from Minneapolis and the Minneapolis area to points in interior Iowa along the line which is involved in this case?

A. Yes, and to explain how I am so familiar, I haven't it pasted on here, when the motor carrier industry started in the Twin Cities I sat on the Minneapolis-St. Paul truck terminal Board of Directors, as a shipper representative on a truck group Board of Directors to help them organize it. That is how much we wanted truck service.

Q. And what has been the quality of that service?

A. Very good. I think I am responsible for some of them because I have given them some complaints to get it right.

Q. And do you know of any other motor carrier performing the same type of local service to these points on U. S. Highway No. 6 between the Tri-Cities and Omaha, and the off-route points such as Wellman, Kalona, Malcom, etc., from Minneapolis and the Minneapolis area other than the Rock Island Motor Transit Company?

A. I have got to answer that this way. We have got some very good truck service which we want to keep out of the Minneapolis market, principally Watson, H & W, Des Moines Transportation, but when you come to peddle service, my experience has been this in investigations I have [fol. 1430] made, and, of course, you retain it, the Rock Island Motor Transit Company has been complying with its common authority, where the other fellows who should give us this kind of service are picking and choosing the freight, and that is very detrimental to our industry.

Q. You find the H & W gives a very good local service, do you not?

A. Very good service. I could answer that more but I don't want to.

Mr. Nolan: Off the record.

Exam. Carpenter: This is all off the record.

(Discussion off the record.)

By Mr. Nolan:

Q. Now, I believe that you have an opinion and have expressed it on the need of a carrier which gives local peddle service and having volume shipments between key points.

A. Yes, and on that basis must have more than local business. He must have the large town with the small town.

Q. And must he also have volume shipments in order to stay in business?

A. Definitely.

Q. And, as I understand it, you are appearing here on behalf of your Association as an intervenor in support of the application?

A. That is correct.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross-examine.

[fol. 1431] Mr. Nolan: Cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. Do your records show what the thirty-two members shipments were composed of that were shipped into these points on Highway 6?

A. They would, yes, they would. He asked the rate clerk for a rate on refrigerators.

Q. I mean what type it was.

A. Yes, the article and the way it would get there, but you understand, our Association—

Q. Well, what was the weight of the shipment that went into Griswold, for instance?

A. I am sorry, Mr. Bradshaw, I did not bring those rate slips with me. I wish I had.

Q. Do you know whether it was under one thousand pounds or not?

A. I can say this to you. Our rate slip I have for these points, the Rock Island handled it. They must have handled the ones under five thousand, indicating to me the shipper at the time he asked for the rate knew that was restricted.

Q. You might know that so far as the Rock Island is concerned, but didn't you testify you did not know what carrier took any of these shipments in to any of these points on Highway 6?

A. Right, because the policy of the Association is not to direct any shipper on any line. We will tell them who can serve this line and they choose it.

[fol. 1432] Q. Actually you are here representing a large

Association, see if I have this right, with the idea in mind you have some transportation and you want to keep it?

A. Right.

Q. And if you can get something more, you want to get it?

A. We need something more.

Q. Of course, as you stated before, it was your personal feeling that even though there was service there, the restriction ought to be lifted because you felt the shipper ought to be able to choose from a number of carriers, isn't that right?

A. Yes, and you will find in previous testimony of mine, I have opposed duplication where duplication is detrimental to the transportation agencies. You don't have that here.

Q. You are not saying anywhere in your testimony, if I have it right, there isn't sufficient carrier service between Des Moines and Minneapolis?

A. No.

Q. Or Minneapolis and Des Moines?

A. That is one of the points where we have wonderful service.

Q. And how about Minneapolis to Omaha?

A. That is very good, but again there is a line, as well as at Des Moines, where your carrier chooses what he wants by that method of not being able to pick up freight.

Q. Now, Lindsay Brothers have a house here in Des Moines, do they not?

[fol. 1432a] A. I won't say where their branch is. I don't know where their branch is. It is possible.

Q. And a great many of these other clients of yours?

A. Lavoris has a warehouse down here, I know it does.

Q. So wouldn't this be true, that shipments to these smaller towns on Highway 6, that would normally go out of these local warehouses than direct from Minneapolis?

A. No; no, not normally. They will do just as they want it done. They will determine where you are shipping this particular order, whether you want it out of the warehouse stock, or out of the main plant.

Q. You tell Lindsay I happen to know it is more than a warehouse here.

A. I don't know what he has here. He is one of the organizers of the Association, by the way, Lindsay Brothers.

Mr. Bradshaw: That is all.

Mr. Nolan: I have a couple of more questions on cross-examination, Mr. Archambo.

Redirect examination.

By Mr. Nolan:

Q. So far as your complaint records are concerned on your pick-ups by the Rock Island Motor Transit Company in the Minneapolis area, has it given reasonable satisfactory service?

A. I will say I have never had a complaint as to motor truck service. I have as to other carriers, but none as to the Rock Island.

[fol. 1433] Q. You have no complaint as to the Rock Island Motor Transit Company?

A. None.

Q. If there had been delay, would you have received a complaint?

A. I am very certain, and Mr. Graybill would have heard about it.

Q. Mr. Graybill is the Agency Manager?

A. For the Twin Cities, St. Paul and Minneapolis, and we have had several conferences.

Q. Now, you understand, Mr. Archambo, do you not, that the Rock Island Motor Transit Company is now operating under temporary authority with a five thousand pound limitation on shipments?

A. I do.

Q. And with certain key point restrictions?

A. I do.

Q. You understand, do you not, that the Rock Island Motor Transit Company is simply attempting in this proceeding to reclaim, or have restored, the service and authority it had prior to last summer?

A. That is correct.

Q. And you understand, do you not, that this is not an attempt on the part of the Rock Island Motor Transit Com-

pany to duplicate or to invade a field served by other carriers where it did not serve before?

Mr. Bradshaw: I object to this testimony by Mr. Nolan. [fol. 1434]. If he wants to ask the witness questions, that is all right.

Mr. Nolan: This is cross-examination.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Nolan: I have got a right to cross-examine some other intervenor here whether he is hostile or not.

Mr. Bradshaw: You don't have to testify for him. He is capable. I would like a ruling.

Exam. Carpenter: I will sustain the objection. Go ahead and reframe your question if you want to.

By Mr. Nolan:

Q. Mr. Archambo, what is the fact as to whether or not you understand this application as an application to restore the service that the Rock Island Motor Transit Company formerly performed in the area involved in this case?

A. I will answer that in this way. We understand that the Rock Island has applied here for not only the interim authority but for unlimited authority to transport L. T. L., volume and truckloads to every point along Highway 6, plus those off-route points north and south.

Q. And state, in your opinion, whether or not the proposal made by the Rock Island Motor Transit Company, from your experience, any service which the Rock Island Motor Transit Company formerly performed to Minneapolis and the Minneapolis area, is reasonably necessary to provide the Minneapolis shippers and the Minneapolis area shippers with an adequate service into the territory [fol. 1435] presently, which had been served and which is presently served under temporary authority by the Rock Island Motor Transit Company?

A. It has been very satisfactory and we have supported you twice. Our former Director, Mr. Frank Townsend was in your original case back in, I think, 1938 when you held that Chicago hearing.

Q. You didn't support me because I didn't have anything to do with it.

A. The Rock Island.

Mr. Howland: November 18, 1937.

A. November 18, 1937, thanks.

By Mr. Nolan:

Q. The point I am trying to make, from your opinion, from past experience with the Rock Island Motor Transit's service in this Iowa territory involved in this case, whether or not a restoration of that service is reasonably necessary to give adequate service to your shippers in the Minneapolis area?

A. Not only our Association believes so, but every member I have contacted has been one hundred per cent for it.

Q. I am only asking for your opinion as a representative of the Minneapolis Association.

A. That is right.

Q. And do you so believe?

A. I do.

[fol. 1436] Q. Or else you wouldn't be here?

A. That is correct.

Mr. Howland: I would like to ask one question, Mr. Archambo.

By Mr. Howland:

Q. From your observation of the situation which exists in this territory, and your knowledge of the situation, are you aware of any action taken by the Rock Island Railroad Company with respect to dominating the affairs of the motor carrier subsidiary, the Rock Island Motor Transit Company, in its operations, are you?

A. I wouldn't know.

Q. You would have no information on that. Let me ask you this question. Has the Rock Island Motor Transit Company, in your knowledge of its operation, complied with the obligations which are imposed upon a motor carrier?

A. I so stated on direct testimony.

Mr. Howland: Thank you.

Exam. Carpenter: Anything further, Mr. Bradshaw?

Mr. Bradshaw: Nothing further.

Exam. Carpenter: I take it you are through, Mr. Howland?

Mr. Howland: Yes, sir.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: We will take a five minute recess here.

(Short recess.)

Exam. Carpenter: Go ahead whenever you are ready.

[fol. 1437] Mr. Howland: Is Mr. Faust here?

Mr. Graybill: No, he was called to Chicago.

Mr. Howland: We will call you. Your name is Graybill?

Mr. Graybill: Yes.

Mr. Howland: Come forward and be sworn.

Ray W. Graybill was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. State your name, please, so we can all get it.

A. Ray W. Graybill, G-r-a-y-b-i-l-l.

Q. And you live where?

A. St. Paul.

Q. And your occupation is what?

A. Commercial Agent for the Rock Island Motor Transit.

Q. And in what area?

A. I have the whole Twin City area with occasional trips over to Eau Claire and Chippewa Falls.

Q. What is the nature of the work that you do there as Commercial Agent in the Twin City area, Mr. Graybill?

A. Calling on the shippers and receivers of freight.

Q. And are you familiar with the general type and character of the business conducted by the Rock Island Motor

Transit Company in the Twin City area, both inbound and outbound?

A. Yes, sir. I have been up there nine years this time. [fol. 1438]. Q. What experience did you have before going to the Twin City territory?

A. I started with the company in July after they started operating in June. It will be fourteen years this year. Opening new routes to start with.

Q. In what territory were you first employed?

A. I worked two days a week in Kansas City, and the other three I spent north of Atchison and Lansing, and another route out of Topeka.

Q. What service has been performed by the Rock Island Motor Transit Company into the territory along U. S. Highway 6 and adjacent to it on either side from the Twin City area? How has that business been handled?

A. Well, it comes down to Des Moines, and then it is served east and west out of here.

Q. And about what time do the units depart from Minneapolis and St. Paul with freight destined to these?

A. We try to get them out by seven o'clock in the evening.

Q. And that is on a six day a week basis?

A. That is right.

Q. Then, what is your normal schedule of service with respect to effecting deliveries, say to points like Victor, Iowa, on the east, Victor and Brooklyn, and places like Anita or Adair and Wiota?

A. Normally second day service out of there, and occasionally——

[fol. 1439] Q. And that means second morning delivery?

A. That is right, and occasionally we slip up and it would be a third morning.

Q. What are the principal types of traffic which are moving out of the Twin Cities territory into this area, generally?

A. Well, it is various. I have got a little list here of seventy three shippers, and points to which they shipped, taken from our actual shipping orders for the month of February.

Q. February, 1952?

A. February, 1952, that actually used this service. I

didn't list the number of shipments each one made, but I did list the shipper and the points to which they shipped.

Q. You say there is seventy-two individual shippers?

A. Seventy-two individual shippers, that is right.

Q. And how many points of destination on the routes that are involved in this particular application?

A. Well, for instance, Mr. Lindberg testified as to his actual shipments. Our bills of lading showed we received from him..

Q. There is Liquid Carbonic, do you have them, any traffic from them?

A. You asked a little while ago about Lindsey. They actually made shipments to Homestead, Avoca, Oxford, Victor, Harlan and Marengo from the Twin Cities.

Q. Now, these shippers shown on this list have as destinations as high as six and seven different destinations? [fol. 1440] A. That is right, and others have single points.

Q. Would it be agreeable to mark that as an exhibit?

A. Surely, if I can take it as a reference.

Q. Then, have you made any examination there with respect to the shipments made by the Coast to Coast Stores to representatives located in the territory that is involved here during the month of February, 1952?

A. I didn't list those points. I called Mr. Cohen up to the last minute, and I thought he was coming down. I didn't show those points, to every place on this system. I get around one hundred thirty to two hundred thousand pounds a month from the Coast to Coast, and ninety per cent of that comes into Iowa.

Q. And a substantial part of the shipments made by the Coast to Coast, then, would be located on or adjacent to U. S. Highway 6, or on routes that could only be reached from Minneapolis?

A. A substantial amount of them, yes.

Q. What is the service from these Iowa points into Minneapolis and St. Paul, Mr. Graybill?

A. It will consistently run second morning. Straight loads, sometimes we get those in the next day. Sometimes they pick up a straight load and wheel it right on through, and we get it the next day.

Q. Now, prior to the latter part of July, or the first part of August, 1952, what is the fact as to whether the Rock

Island Motor Transit Company did consistently handle [fol. 1441] truckload shipments on request from Minneapolis to the Tri-City area or the Omaha area?

A. Well, I can only speak for the Twin City area.

Q. That is what I am asking.

A. Instead of the Tri-City.

Q. The question calls for whether service was rendered from the Twin City area to the Tri-Cities or to Omaha.

A. Prior to that time?

Q. Prior to that time, August, 1951.

A. Yes, we did.

Q. And what were the general type of commodities that were handled in truckload quantities?

A. Well, in truckload lots we had quite a number of shipments of tires from the United States Rubber at Eau Claire. Then there was some straight loads of groceries going down to Nash-Finch at Ottumwa. On this list I haven't listed any of the larger points like Iowa City or Cedar Rapids, and those points that have several services available.

Mr. Howland: I will ask the reporter to mark the statement as an exhibit.

Exam. Carpenter: For identification, Exhibit No. 17.

Mr. Howland: For identification as Exhibit No. 17.

(The statement referred to was marked as "Applicant's Exhibit No. 17, Witness Graybill," for identification.)

By Mr. Howland:

Q. I will ask you with respect to this paper marked for identification as Exhibit No. 17, whether that correctly [fol. 1442] discloses the names of the shippers and the destinations to which shipments were made for the month of February, 1952?

A. It discloses the name of the shipper. It doesn't give the name of the consignee, sent to the destination, the town to which the shipments were made.

By Exam. Carpenter:

Q. And it consists of two pages?

A. Yes.

Q. Two sheets, rather, would be better.

By Mr. Howland:

Q. There are two sheets in the exhibit?
A. That is right.
Q. And if any one here, any one requests it, are you willing to supply the pro numbers and the bills?
A. Yes, sir. I would be glad to.
Q. For that purpose.
A. This doesn't list the number of shipments. It is just the shipper and the town to which the shipment is made.

Exam. Carpenter. Do you desire a copy of it, Mr. Bradshaw?
Mr. Bradshaw: Yes, I do.
Mr. Howland: We will have a copy made.

A. I didn't show on there the points the International Harvester shipped because my understanding was they would have a representative from Chicago here at the hearing. That is what they told Anderson, or he would have come down.

Mr. Bradshaw: Just a minute. I would like to have this restricted to question and answer.
[fol. 1443] Exam. Carpenter: All right. That is all right.

By Mr. Howland:

Q. Let me ask you this, Mr. Graybill. Have you in recent months had requests from shippers in the Minneapolis-St. Paul area for the performance of volume service, and by that I mean for the transportation of shipments in excess of five thousand pounds?
A. Yes, I have.
Q. From the Twin City area into this territory east and west adjacent to Highway 6 across the State of Iowa?
A. Yes.

Mr. Howland: I will offer and introduce in evidence at this time the document marked for identification as Exhibit No. 17, consisting of two sheets, and we will provide additional copies for the opposing counsel and the record.

Exam. Carpenter: Any objection?

Mr. Bradshaw: May I inquire?

Exam. Carpenter: Yes, sir.

By Mr. Bradshaw:

Q. Did you make this list yourself?

A. Yes, I did.

Q. And where did you get your information from?

A. From the orders actually on file in our office.

Q. The orders from which you got this information show the individual shipments to each town?

A. Sure, the consignee and consignor, the weight, the rate and the total revenue.

[fol. 1444] Mr. Bradshaw: Off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: Back on the record. All right, go ahead on cross-examination.

Mr. Bradshaw: Subject to the additional information shown on the bills of weights and the consignee, and days of shipment, I have no objections if it is agreeable that information be shown.

Mr. Howland: We will furnish that information as promptly as possible.

A. I am going back tomorrow. Tomorrow is Thursday. I can have that down here——

Mr. Howland: By Monday?

A. By Monday, yes.

Exam. Carpenter: The document is received in evidence as Exhibit 17.

(Applicant's Exhibit No. 17, Witness Graybill, was received in evidence.)

Cross examination.

By Mr. Bradshaw:

Q. Your office is in Minneapolis, Minnesota?

A. St. Paul.

Q. St. Paul?

A. Yes, sir.

Q. Where?

[fol. 1445] A. 187 East Filmore, the Rock Island Freight House.

Q. That is the Rock Island Freight House, the Freight House for the Rock Island?

A. Yes.

Q. And also the Rock Island Railroad?

A. Yes. Also for the National Battery Warehouse space, and the Dorr-Redpath Fruit Company. It used to be Gamble-Robinson.

Q. The Rock Island Motor performs pick-up and delivery service?

A. Yes, sir.

Q. And do they pick up the shipments that are rail billed?

A. No, sir.

Q. You have a separate?

A. That is all done by a local transfer concern that picks it up and brings it in to the Rock Island dock. When I say "Rock Island" I mean Rock Island Rail. We don't do any pick-up and delivery for the rail at all. We don't do any pick-up and delivery for the rail at all.

Q. At that point?

A. At the Twin Cities.

Q. At that point. You stated there were some tire shipments to the Tri-Cities in truckload lots prior to the restriction?

A. Prior to the restriction, yes.

Q. Do you know who is handling those tires now?

A. No.

Q. Do you know whether or not they are being handled?

[fol. 1446] A. Sure they are moving, but I don't know who. The Minnesota-Wisconsin was bringing them in.

Q. What shipments did you make to Ottumwa in truckload lots?

A. The Nash-Finch Grocery Company, from their headquarters in——

Q. Where are their headquarters?

A. In Minneapolis.

Q. And who is handling those truckload shipments now?

A. I don't know.

Q. Do you know they are being handled?

A. I think they are. There was a steady movement prior to this restriction.

Q. Do you know of any shipper, or any carrier that can carry truck loads from Minneapolis or St. Paul to Ottumwa?

A. I believe Merchants and Bruce both have rights in there. That is a case where they take the cream and leave the L. T. L.'s.

Q. In other words, they do carry some truckloads?

A. They will take truckloads in there, yes.

Q. And who operates from Minneapolis to the Tri-Cities on truckloads?

A. I believe Gateway goes down through there, and the H & W.

Mr. Bradshaw: That is all.

Exam. Carpenter: Redirect.

Mr. Nolan: I have a couple of questions on cross-examination as an intervenor in this case.

Redirect examination.

[fol. 1447] By Mr. Nolan:

Q. Do I understand, Mr. Graybill, in connection with Exhibit No. 17, that you did not include such points on U. S. Highway No. 6 involved in this proceeding as Des Moines, Iowa City?

A. That is right.

Q. And the Tri-City area?

A. Right.

Q. Now, I notice on Exhibit No. 17 that from Janney, Semple, Hill, as the shipper, there were shipments made to the towns of Marengo, Oxford, Atlantic, Brooklyn, Newton, Casey, Wellman, Colfax, Oakland, Mitchellville, Exira, and Griswold by the Rock Island Motor Transit Company during the month of February?

A. The month of February, yes, sir.

By Exam. Carpenter:

Q. 1952?
A. 1952.

By Mr. Nolan:

Q. Do I further understand those were the destination points, but do not necessarily reflect the number of shipments to those points, is that correct?

A. That is correct.

Q. What do you mean here by the International Harvester Company, as shipper, to all points that have International distributors?

A. They have a number of distributors in practically every town of any size, has an International dealer. They receive parts from the parts depot out on Eustis here in Minneapolis.

Q. Do you know from your own knowledge whether or [fol. 1448] not the International parts for the Iowa territory involved here are supplied out of the Minneapolis center?

A. To a large extent, they are. Some comes out of the Kansas City branch, but the largest majority comes out of the Minneapolis branch.

Q. This supporting abstract you are going to furnish, will you furnish the points to which the International Harvester made shipments during the month of February?

A. Yes, and we can also of the Coast to Coast as well.

Q. And can you include that in your abstract?

A. Yes.

Q. I notice the transportation involved of the Fuller Brush.

A. They also have shipments coming to practically all of these points. Mr. Faust was supposed to come down with us but he was called into Chicago.

Q. And can you have that abstract of shipments for February include shipments made by the Fuller Brush Company to the Iowa points involved in this case?

A. Yes, sir.

Q. I notice the transportation involving the Great Lakes Pipe Line. What reference do you have to that on Exhibit 17?

A. They called they had forty thousand pounds of pipe going down. I said, "We can not take it. We have a five thousand pound restriction." He says, "If I make out eight bills of lading with five thousand pounds on each one, can [fol. 1449] you handle it?" I said, "Yes".

Q. Did you handle it?

A. We handled it that way. You are penalizing yourself. It is much higher than the truckload rate. He come out here seventeen miles and picked up the pipe, and you are entitled to this business, and we got it.

Q. I will ask you what other shippers in the Twin Cities area have voluntarily reduced volume shipments to come within your five thousand pound limit?

A. Off hand I couldn't specify a certain company. We have had a number of calls and we had to just tell them we couldn't handle it. Most of them don't feel like the Great Lakes boy did, and the shipments go some other way to get them here.

Q. Now, on this Exhibit No. 17 where you have the towns of Homestead, Avoca, Oxford, Victor, Harlan and Marengo, as the towns opposite the shipper Lindsay Brothers, the shipments were made to those towns during the month of February?

A. That is right. They have a warehouse here, and even the Traffic Manager and the Shipping Clerk gave me those shipments. The Traffic Manager said, "We did ship down there." We have the billing for handling the shipments, and the Shipping Clerk shipped them out of there. Probably something they were probably out of stock here, and for some reason they were shipped out of the main house there.

Mr. Nolan: That is all.

[fol. 1450] Exam. Carpenter: Anything further, Mr. Bradshaw?

Mr. Bradshaw: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: Off the record.

(Discussion off the record.)

BRUCE THOMAS was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation?

A. Bruce Thomas, Auditor of the Ideal Manufacturing Company, Oskaloosa, Iowa.

Q. The Ideal Manufacturing Company, Oskaloosa?

A. That is correct.

Q. And what products does your company manufacture?

A. Well, we make a wide variety of metal fabricated products, trailer hitches, small wire brackets, milking machines and water systems, are the major division.

Q. How large a City is Oskaloosa?

A. About twelve thousand.

Q. And are there other industries there besides your company?

A. Yes.

Q. What other manufacturing concerns are there?

A. Well, the Iowa Valve is there, probably the major [fol. 1451] other industries. Then, there are some smaller industries.

Q. And, in addition to your industries you have the usual retail service establishments there for a city of your size?

A. Yes.

Q. Now, Oskaloosa is located on what highway?

A. Well, it is 92 and 163. 92 is the east and west highway, and 163 is the north and south primary highway.

Q. And have you had experience in shipping your products outbound by the Rock Island Motor Transit Company?

A. Yes.

Q. And how long have you been with the Ideal Manufacturing Company?

A. About four years, four or five years.

Q. Do you have duties in helping direct or observing the traffic moving in and out of your place?

A. Yes.

Q. Does that come under your duties as Auditor?

A. Yes.

Q. First, do you have any inbound shipments coming into your plant from out of State points?

A. Yes.

Q. In less truckload or truckload quantities?

A. Both.

Q. And how have those shipments been moving? What companies handle those?

A. The Rock Island handles some, Western Transportation, P. & W., Watson, and Bruce, or did I mention that, [fol. 1452] occasionally, and the Burlington Motor. The major ones, I would say, are the Rock Island Motor, Western Transportation and the Burlington are the three major truckers on incoming shipments.

Q. And where do those shipments primarily come from?

A. Chicago, Kansas City, St. Louis, that is those general areas, are probably the major points of supply.

Q. Now, the Bruce Motor Freight, that is a St. Louis, Des Moines, Minneapolis operator, is it not?

A. That is right.

Q. And does that firm bring in your St. Louis shipments?

A. Most of the St. Louis stuff is carload lots by rail.

Q. Well, now——

A. Bruce doesn't bring in very much.

Q. I see. Now, does the Rock Island Motor Transit Company have an agent at Oskaloosa, and a station there, a terminal?

A. Yes. Millstrand is the agent, and they have a terminal.

Q. Do they have pick-up and delivery service there?

A. Yes.

Q. Do any of the other trucking companies have the same facilities that the Rock Island Motor Transit Company has in the way of a terminal agent, pick-up and delivery service, or do they operate through some local cartage firm?

A. The Burligton, I think, has a separate organization. They make special pick-ups. The rest of them are all handled through the Oskaloosa Bus and Transfer Company.

[fol. 1453] Q. That is a local dray line?

A. That is right.

Q. They don't have an agent or terminal of their own, or rate information, and things of that sort?

A. That is correct.

Q. Now, prior to August 1, 1951, state whether or not your company has been using the facilities of the Rock Island Motor Transit Company for both inbound and outbound shipments in truckload quantities.

A. We would have had some, we might have had some, and probably did have some incoming truckload quantities, but outbound truckload quantities would be occasionally.

Q. But you did use the Rock Island Motor Transit Company for that service prior to August 1, 1951?

A. We would have if the occasion demands. I don't know specifically that we did. We probably did. I would have to check the records to know that.

Q. Has your company, since the time you have been with it, you have been using the service of the Rock Island Motor Transit Company for both inbound and outbound shipments?

A. Yes.

Q. In interstate commerce?

A. Yes.

Q. Now, where are your outbound shipments, where are they destined?

[fol. 1454] A. We ship almost everywhere in the United States and Canada.

Q. And are you presently using the services of the Rock Island Motor Transit Company for your outbound shipments?

A. Yes.

Q. And with what regularity do you use the services of the Rock Island Motor Transit Company?

A. Every day.

Q. And do those shipments move in through the Chicago area or Omaha area, and other points like that?

A. Outbound?

Q. Yes.

A. Well, yes. I don't know whether I should be more specific or not. We have a particular type of shipment where we prefer the Rock Island Motor to any other. Now, it may or may not include the points you mentioned.

Q. Can you give us certain out of State shipments where you prefer the Rock Island Motor service?

A. Well, southwest shipments we ship to Kansas City quite often, and route them on from there, or if the Rock Island can handle it all of the way. We do the same thing to Omaha and Denver, from there on.

Q. You route them Rock Island Motor?

A. Rock Island Motor out of here, and sometimes we know and designate the delivering carriers, and sometimes we do not where it isn't a Rock Island Motor service. We [fol. 1455] do the same thing to Chicago to a lesser degree.

Q. Do any of those shipments exceed five thousand pounds, would they exceed five thousand pounds in weight?

A. It might, but it is comparatively rare. Minneapolis is another town, of course, out of State we ship to.

Q. Where you specify and use the Rock Island Motor Transit Company?

A. Yes.

Q. And you say you use that company exclusively for shipments through the Kansas City gateway, the Omaha gateway, the Chicago gateway, and the Minneapolis gateway?

A. Not exclusively. We favor them. Quite often the routing will be specified by the consignee, and he may or may not specify. We do favor the Rock Island.

Q. Why do you favor the Rock Island Motor Transit for your shipments?

A. Because they give us excellent local service. They follow up on shipments very well, and we have been very pleased with them throughout the years.

Q. Now, has your company's business been expanding over the past years you have been there? Have you increased your business in volume?

A. Not from the standpoint of territory covered, no.

Q. I mean so far as the volume of business in the territory covered.

[fol. 1456] A. That would require qualifications or an explanation. We used to have plants in Des Moines. Two years ago we consolidated everything in Oskaloosa, so there has been both a growth in the total, but a very large growth in Oskaloosa by consolidating the two plants here with the one that was formerly here.

Q. And I will ask you whether or not that consolidation at Oskaloosa was done in contemplation of the type and character of service that you had for transportation in and out of Oskaloosa?

A. It is vital to us.

Q. And at the time that consolidation was made, state what the fact is as to whether or not the Rock Island Motor Transit Company wasn't giving you a complete service in truckload service as well as less than truckload service?

A. I can't authoritatively state what the truckload situation was in Oskaloosa before two years ago. I moved there then.

Q. I see.

A. We probably did not do very much truckload business prior to two years ago.

Q. I see. I will put it this way, and say transportation service was vital at the time you consolidated your operations at Oskaloosa?

A. That is correct.

Q. And I will ask you if you didn't have a complete service in all directions out of Oskaloosa you would have consolidated your plant in Oskaloosa?

A. It certainly would have been a determinant factor.

[fol. 1457] Q. What?

A. It certainly would have been a determinant factor if we hadn't had complete service.

Q. And do you know whether or not it is a fact that the Rock Island Motor Transit Company has established a terminal and agent at Oskaloosa after your company opened up its consolidated plant?

A. I know they have had a terminal since we moved there. Whether they had one before, I don't know.

Q. I see. What effect would it have upon your company's business in and out of Oskaloosa in the event the operations of the Rock Island Motor Transit Company were terminated or materially reduced?

A. We have a daily service back and forth to Davenport, which is very important to us, and which the Rock Island Motor handles very satisfactorily. It would be a very great handicap to us if that were terminated. The Rock Island Motor is our best, probably our best supplier to Kansas City where we ship regularly. It is our best sup-

plier for local deliveries west of Des Moines, of whom we have shipped a considerable number. I would say in those three situations, particularly Davenport and the local hauls west of Des Moines, the loss of the Rock Island's service would be a very severe handicap.

Q. And do you know of any transportation agency that [fol. 1458] would take the place and give to your company the same type of service that the Rock Island Motor Transit Company has been giving from Oskaloosa to Davenport and the Tri-City area?

A. I know of no such substitute there. They are our best service, I believe, from Oskaloosa to Des Moines, and, of course, west of Des Moines. It means we don't have to transfer, so I know of no substitute service there. There is a substitute service which is very nearly as good to Kansas City. There is a substitute service to Minneapolis which is not as good so far as I am concerned.

Q. I am taking into consideration all of the service which the Rock Island Motor Transit Company has given you in regard to time in transit, servicing of claims, tracing of shipments, the agent, the rate facilities, and things of that character. Is there any carrier that has given you the same type of service in and out of Oskaloosa the Rock Island has been giving since you have been with the company there to the various points the Rock Island serves?

A. There is none that gives us the service to the points we are using the Rock Island Motor that could replace it.

Mr. Nolan: That is all, thank you. You may cross-examine.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. On your inbound goods do you use the Rock Island Motor Transit and the Western Transportation Company [fol. 1459] from Chicago?

A. Yes, that is correct.

Q. Anybody else from Chicago?

A. Not voluntarily, no. They are the only two.

Q. Anybody else?

A. We would never specify anybody else.

Q. Would you use anybody else voluntarily or involuntarily?

A. If a shipment comes in from some other source.

Q. Well, name the carrier.

A. Hawkeye, Watson. Those are the only ones I believe into Oskaloosa.

Q. Now, from St. Louis I take it you use Bruce and Watson?

A. Yes. You understand most of our shipments from the St. Louis area come in by freight car. It would be Watson probably, or P. & W., or Bruce.

Q. Do you know of any other carriers serving Oskaloosa from the——

A. St. Louis area?

Q. The St. Louis area?

A. Not unless it is contract haulers.

Q. And where does the Burlington Motors fit into this picture?

A. They have service to Des Moines, and they have services to Ottumwa, Omaha, Kansas City.

Q. Those are the only points that you have inbound traffic from?

A. Oh, no. No, we have materials from, we get steel from wherever we can get it, for instance.

[fol. 1460] Q. What carriers bring your steel?

A. It is primarily carload.

Q. Rail carload?

A. Yes, we get cars on a rail carload basis.

Q. Do you get any other inbound shipments we haven't mentioned here today?

A. By carrier you mean?

Q. Either by rail or by carriers.

A. You mean transportation companies. It would be rare, very rare. I think Keeshin has once a week service in Oskaloosa.

Q. From what point?

A. Probably from Marshalltown. I am not sure.

Q. Now, on your outbound you mentioned that you use the Rock Island but there were substitute carriers, I believe you called them substitute, go to Kansas City. Will you name these substitutes?

A. Burlington, also Hawkeye-Churchill, which is not satisfactory so far as we are concerned.

Q. Just answer the question, are there any other carriers from Kansas City, either rail or motor carriers?

A. Watson will take a shipment for anywhere.

Q. And what service do you have from Oskaloosa to Minneapolis, whether you avail yourself of it or not?

A. M. & St. L. Railroad, Bruce Motor, Rock Island Motor, and Rock Island Rail. Is that four? I think that is it.

[fol. 1461] Q. I believe you stated you seldom have shipments of over five thousand pounds going out, is that correct?

A. Individual shipments above that are comparatively rare, except carload. We ship more than that every day but it is small units.

Q. Your carload goes by rail?

A. That is right. I suppose a truckload, maybe, once a week.

Q. And who would you designate on that?

A. That is, that is to Chicago, and it is specified by the person who orders that. That is Western.

Q. They specify?

A. They specify Western Transportation.

Q. And that is the way you ship it?

A. That is right.

Mr. Bradshaw: I believe that is all.

Mr. Nolan: Just a couple more questions, Mr. Thomas.

Redirect-examination.

By Mr. Nolan:

Q. In regard to the service by Watson Bros., state whether or not that company prefers volume or larger shipments rather than so-called small shipments, if you have any knowledge on that.

A. I really have no knowledge. It is my personal experience.

Mr. Bradshaw: Well, just a mimute.

Mr. Nolan: He has got a right to tell about his personal experience.

[fol. 1462] Mr. Bradshaw: Just answer his questions.

By Mr. Nolan:

Q. Do you have any personal experience on which you gained knowledge?

A. No, whether they will take large shipments or small shipments, they have never told me about that.

Q. Now, in regard to the service into Kansas City, you called the Hawkeye and Churchill. It was an interline between the Hawkeye of Cedar Rapids, hauling your merchandise to Ottumwa, and interlining with the Churchill Truck Line from Chillicothe, Missouri, to Kansas City.

A. I don't know. From time to time we have had customers who have specified that service.

Q. You know that would be a two line haul, do you not?

A. I am sure it would be.

Q. You know the Hawkeye Motor Freight, that is a concern in Cedar Rapids that operates between Chicago and Cedar Rapids?

Mr. Bradshaw: Now, just a minute. Let the witness testify as to the question.

Mr. Nolan: I am just expediting it.

A. I am no authority on it. We use it so seldom I could not say with authority. I can say with authority it is not as fast as the Burlington or Rock Island Motor.

By Mr. Nolan:

Q. The point I am trying to make, Mr. Thomas, is when you spoke of Hawkeye-Churchill, you meant, did you not, that was a two line operation?

[fol. 1463] A. That is right.

Q. And when you referred to Hawkeye-Churchill, that was the Hawkeye Motor Freight of Cedar Rapids interlining with the Churchill Truck Lines of Chillicothe, Missouri, from Ottumwa on into Kansas City?

A. I don't know Chillicothe. It is the two carriers.

Q. You don't know Chillicothe or Kankakee?

A. No.

Mr. Nolan: That is all.

Mr. Bradshaw: That is all.
Exam. Carpenter: You are excused.
Mr. Nolan: That you, Mr. Thomas.

(Witness excused.)

L. L. JOHNSON was sworn and testified as follows:

Direct-examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence and occupation?

A. L. L. Johnson, Cedar Rapids, Iowa, General Manager of the Harper & McIntire Company.

Q. Will you tell us the business of the Harper & McIntire Company?

A. The distribution of wholesale hardware, heavy and shelf hardware.

Q. And what do you mean by "heavy hardware", Mr. Johnson?

[fol. 1464] A. Oh, such things as nails, barb wire fence sheets, fence posts, commonly known as merchant trade products.

Q. And does that include roofing materials?

A. Corrugated roofing, felt base roofing, etc.

Q. And when you refer to "shelf hardware", nuts, bolts, and things like that?

A. Nuts and bolts, tools, household wares, electric appliances.

Q. And have you been using the Rock Island Motor Transit Company's service in your distribution of those products in the territory involved in this proceeding?

A. Quite extensively, yes.

Q. And has that service been a satisfactory service to the H & W Motor Express Company—I will withdraw that. Has that service been satisfactory?

A. It has.

Q. I will eliminate that H & W. Now, insofar as this proceeding is concerned, Mr. Johnson, what shipments

would you have occasion to use the Rock Isl. ' Motor Transit Company's service?

A. In so far as interstate commerce?

Q. Interstate shipments.

A. We ship steel products on a direct shipment basis from the mill to our customers along this line, as well as to other points in Iowa, primarily from South Chicago, Illinois, and presently it is impossible for us to ship because of the difference in rates between less truckload and truck-
[fol. 1465] load to the points along Highway 6. There are occasions when contract carriers haul merchandise into these points, but it is impossible for us to work with any regular scheduled carrier on that basis.

Q. Why is that?

A. Because service isn't available to these points.

Q. You mean other than by the Rock Island Motor Transit Company?

A. That is right.

Q. Now, when you say you have customers at the points along U. S. Highway No. 6, are you referring to practically all of the small towns?

A. Virtually every one of them. The majority of the towns represented in this case are served out of our Cedar Rapids house, wherein a few that are served from our Ottumwa house. We also have a house in Ottumwa.

Q. What about the overhead shipments from Chicago or out of State points of origin, where you have shipments direct to your customers, do those customers get their shipments from out of State points?

A. Yes. However, that would largely be confined to truckload shipments because it is uneconomical to purchase that type of material in anything other than truckloads.

Q. And prior to the restriction imposed on the Rock Island Motor Transit Company in regard to the volume of shipment, did your company use their service for these out of State shipments into these small towns?

[fol. 1466] A. Yes, we did.

Q. And was that service satisfactory?

A. Yes, sir.

Q. What has been the effect on your company since the restrictions have been imposed on the Rock Island Motor Transit Company with respect to these volume shipments?

A. In most cases we simply lost a portion of that business. It means that a small dealer, whose requirements might be for a truckload, is forced to buy a carload less frequently, and, as a result, there isn't as much business available based on the normal way that type of dealer does his business. As a general rule he buys his business between two or three jobbers.

Q. And has your company lost business by reason of that restriction?

A. It is my considered judgment we have, yes.

Q. State whether or not if the Rock Island Motor Transit Company were permitted to give the same type of service, both in volume that it did prior to August 1, 1951, would your company be able to reclaim some of their business and use the service of the Rock Island Motor Transit Company for that service?

A. Yes, we would.

Q. Now, how long have you been connected with the company in Cedar Rapids?

A. Twenty-five years.

Q. And since the time that the Rock Island Motor Transit [fol. 1467] Company has been in business, has your company used its service?

A. From the inception of their service, yes.

Q. And you have, do you not, available at Cedar Rapids the terminal facilities of the Rock Island Motor Transit Company?

A. Yes.

Q. Which includes the rate service, tracing, claims, etc.?

A. Yes.

Q. Then, as I understand your answers your company has been affected by the limitations placed on the operations of the Rock Island Motor Transit Company?

A. We have, yes.

Q And what is the fact as to whether or not your company would be further adversely affected if the Rock Island Motor Transit Company was required to terminate its operations or substantially further reduce its operations as they are now conducted?

A. Well, it would affect us quite seriously. There are a number of distributors of hardware in the State of Iowa,

as well as out of State distributors, and about all a hardware distributor has to sell is service. When he fails to render service he has no excuse to be in business.

Mr. Bradshaw: Interstate?
Mr. Nolan: Interstate, yes, interstate.

By Mr. Nolan:

Q. You also use the Rock Island Motor Transit Company, do you not, in intra or Iowa State commerce?
A. That is right.
[fol. 1468] Q. You are using it extensively, isn't that correct?
A. That is right.

Mr. Nolan: That is all I believe. You may cross-examine.
Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. Well, let me clear up this point. A minute ago when you said you would be affected if they were further restricted, were you referring to intrastate shipments?
A. To shipments within the State, yes.
Q. In other words, those are shipments that come out of Cedar Rapids?
A. That is right.
Q. And go to these towns. It doesn't have anything to do with interstate commerce, does it?
A. Not interstate, no, intrastate.
Q. Yes. Now, then, let's clear this up a little. Give me a specific example of one of these towns where you had an account that you couldn't service out of Chicago with truckload lots, and consequently lost the business, as you say.
A. I don't think I came prepared to do that. I am General Manager. I have a sales manager who handles sales.
Q. You testified, didn't you, that your company lost some business out here?
A. Yes, my Sales Manager told me.
Q. You testified your company lost some business on

[fol. 1469] Highway 6 because they couldn't get shipments, truckload lots out of Chicago. Did you mean to tell us there wasn't transportation available?

A. My Sales Manager told me we couldn't get truckload shipments into certain of these towns, and we were losing business, and he wanted us to get service down there to them.

Q. You have no personal knowledge of that?

A. I have no personal knowledge of that. I have the say so of my Sales Manager.

Q. Is your Sales Manager going to be here as a witness?

A. I think he can.

Q. What is his name?

A. D. S. Beck.

Q. Do you know the names of any of these towns along Highway 6 you were describing a moment ago when Mr. Nolan was examining you?

A. Where we formerly shipped truckloads?

Q. Yes.

A. Kalona, Ladora, and formerly Wellman.

Q. Those are the only three you know of?

A. Those are the only three I recall.

Q. And do you know whether or not there is any transportation available, other than the Rock Island Motor Transit Company, from Chicago to any of those three points?

A. No, I don't.

[fol. 1470] Q. Have you ever had occasion to make any investigation?

A. Not personally.

Q. Then when you so testified a while ago, it was strictly on a hearsay basis?

Mr. Nolan: Just a minute. That is objected to as argumentative. This man is testifying as General Manager, and, as General Manager he can only know the details of his operation as reported to him by his subordinates or his representatives. To trace down in a minuteness of detail everything that transpired, he would have to bring in one hundred witnesses from his company.

Mr. Bradshaw: These details are not very minute. A man has testified.

A. Pardon.

By Exam. Carpenter:

Q. You obtained the information in the normal course of business?

A. Yes, sir.

Q. From the Sales Manager?

A. Yes, sir.

Exam. Carpenter: Objection sustained.

By Mr. Bradshaw:

Q. Did you inquire of the Sales Manager as to any specific accounts that were lost by this concern, or was this a general statement by him?

A. General discussion. As a normal thing when you lose a certain dollar volume of sales, you ask your Sales Manager what happened, and I am telling you in a general way [fol. 1471] what his general answer was to me.

Q. His excuse was transportation was not available, is that right?

A. Yes.

Mr. Bradshaw: That is all.

Redirect-examination.

By Mr. Nolan:

Q. Mr. Johnson, you know of your own personal knowledge that the towns of Kalona and Wellman are off-route points, so far as Highway 6 is concerned, that is true?

A. That is right.

Q. And they are isolated, so far as highway traffic is concerned, by motor trucks, is that true?

A. That is right.

Q. And you no doubt are acquainted with the accounts in Kalona and Wellman, are you not?

A. The accounts we now sell, yes.

Q. Yes, and also at Ladora, and are you able to state for the record those names of these accounts in Kalona and Wellman?

A. In Kalona, the Snair Hardware; and in Wellman, the Wellman Implement Company, R. E. Snavely; and in Ladora, the Ladora Hardware.

Mr. Nolan: That is all.

Exam. Carpenter: Any recross?

Mr. Nolan: That is all, Mr. Johnson. Thank you.

(Witness excused.)

[fol. 1472]

HAROLD F. EWOLDT was sworn and testified as follows:

Direct-examination.

By Mr. Nolan:

Q. Your name is——

A. Harold F. Ewoldt.

Q. Harold F. Ewoldt?

A. Right.

Q. And how do you spell your last name?

A. E-w-o-l-d-t.

Q. You are the Manager of the Traffic Bureau of the Cedar Rapids Chamber of Commerce?

A. That is correct.

Q. Is that right? How long have you been so engaged?

A. It will be a year and two months.

Q. And were you associated with the Traffic Bureau prior to that?

A. Yes, I have been with it since 1948.

Q. 1948. What does the Traffic Bureau consist of?

A. It is set up for the purpose of giving daily assistance to the firms of Cedar Rapids with reference to rates, traffic and transportation problems, routings, etc.

Q. Now, tell us what is the size of the City of Cedar Rapids?

A. Seventy-two thousand.

Q. Seventy-two thousand?

A. Yes, sir.

Q. And what are the major industries in Cedar Rapids?

[fol. 1473] A. Wilson & Company, Quaker Oats, the heavy

machinery companies such as La Plant-Choate Manufacturing Company, Universal Engineering, Link Belt Speeder Corp., National Oats, Quaker Oats, they are two separate firms. In addition to that you have the wholesale distribution houses, such as Welch-Cook-Beals, such as dry goods, Harper & McIntire, which is hardware, McKesson & Robbins, drugs and medicines. I believe that is the bulk of them. You have smaller firms.

Mr. Howland: Collins Radios.

A. Pardon me. I shouldn't have overlooked the Collins Radios.

By Mr. Nolan:

Q. What is that dairy supply manufacturer?

A. Cherry-Burrell.

Q. And you have Dearborn Brass Company?

A. Yes. They come under the smaller industries.

Q. Now, Wilson & Company, that is, of course, that is one of the plants of Wilson & Company, packing company?

A. That is correct.

Q. And what they pack, meats there of different kinds?

A. Mmmmhuh.

Q. Now, Mr. Ewoldt, since you have been in Cedar Rapids, have you been acquainted with the services of the Rock Island Motor Transit Company in and out of Cedar Rapids?

A. I have.

Q. And, so far as you know, have those services been satisfactory to your shippers there in the territory served?

[fol. 1474] A. Very satisfactory.

Q. Now, you understand, of course, that this application embraces only interstate operations of the Rock Island Motor Transit Company?

A. That is correct.

Q. Including Cedar Rapids and U. S. Highway No. 6, Omaha to Chicago. Now, does the curtailment of service of the Rock Island Motor Transit Company from Cedar Rapids along that route, or would the elimination of its service affect Cedar Rapids, and if so, in what way?

A. You are speaking on interstate?

Q. On an interstate basis, yes, primarily.

A. Well, it would affect us in this way. A carrier has to have the overhead freight into those towns in order to partially subsidize the loss they incur on the small, local hauls. If they don't have the longer haul revenue, they won't have the revenues to subsidize any possible losses they will have on the small hauls. In that way they will be forced to curtail the shorter haul traffic.

Q. And the local service?

A. That is right.

Q. Now, do you have firms in Cedar Rapids which have so-called overhead shipments from factory to destination, that is wholesale firms, jobbing firms, that might have an order filled in Chicago destined to one of these small towns [fol. 1475] along the route here?

A. It is very possible, yes.

Q. Have you had experience with such type of shipments by some of your wholesalers and jobbers in Cedar Rapids?

A. Not actual experience. I could not say anything specific.

Q. But, knowing the jobbing and wholesale operations in general, is such type of service handled by jobbing firms where they do not have the supply on hand, and fill the order from another source of supply, which may be shipped from an out of State point?

A. Yes, that is correct.

Q. That is a general thing, is it not, in the jobbing and wholesale business?

A. Yes.

Q. But you say your primary interest in appearing here is to protect the shipping interests of Cedar Rapids by urging the maintenance of the overhead shipments in order to insure the local service, is that correct?

A. That is correct, yes, sir.

Q. Now, are there firms in Cedar Rapids which have shipments destined to points such as Omaha, Kansas City and the Tri-Cities?

A. Oh, yes, any number of them.

Q. And do you know whether or not the Rock Island Motor Transit Company has been handling their traffic, or some of their traffic?

[fol. 1476] A. You mean prior to the restriction?

Q. Yes.

A. Yes, they have.

Q. And do you know whether they are now handling part of their traffic with the restriction of five thousand pounds?

A. There have been instances where they have split up their bill of lading, in other words, make two bills of lading in an effort to give the Rock Island the haul, but as a rule they have to forego the Rock Island's service due to the restriction, and accept another service which, in many instances, was not as acceptable to them as they would be if they could have used Rock Island Motor.

Q. I was going to get to that a little later, but the point I was trying to make, are there shipments that move between Cedar Rapids, either inbound or outbound, on the one hand, and Omaha, Kansas City and the Tri-Cities, on the other, of less than five thousand pounds?

A. Oh, yes.

Q. And would you say there is a regular flow of such traffic between Cedar Rapids, on the one hand, and those interstate points, on the other?

A. Oh, very much.

Q. And how about Chicago?

A. There is a considerable movement between Chicago and Cedar Rapids.

[fol. 1477] Q. And does the Rock Island Motor Transit Company handle, has it handled part of that traffic?

A. Oh, yes.

Q. Now, do you have shippers in Cedar Rapids, or receivers of freight who, so far as you personally know, specify and designate the Rock Island Motor Transit Company as a carrier on these interstate shipments moving between Cedar Rapids, on the one hand, and, on the other, such points as Omaha, Kansas City, the Tri-City area, and Chicago?

A. Yes, they do.

Q. And do you know why they so specify and request such service?

A. It can only be for one reason, they are satisfied with the service. That is the only thing the carrier has got to sell them is the service, and if they are used by a shipper, it means their service is satisfactory in preference to other carriers.

Q. Now, you were speaking a minute ago about shipments in excess of five thousand pounds. Have you had called to your attention in your duties, in the regular course of your work as Manager of the Traffic Bureau of the Cedar Rapids Chamber of Commerce, of shippers in Cedar Rapids who have split volume shipments so they could be shipped under the five thousand-pound limitation of the Rock Island Motor Transit Company?

A. Yes, I have.

Q. And have shippers consulted with you about that matter?

A. Yes, they have.

[fol. 1478] Q. And have they consulted with your office about getting rates on such shipments?

A. Yes, they have.

Q. And why did they split their shipments, which would cost them more, to ship by the Rock Island Motor then they could ship the volume shipment by some other carrier?

A. Because they believe that the service which would be rendered to them by the Rock Island Motor would be preferable to shipping by another line at a reduced rate. In other words, the value of the service outweighed the increased rate they would have to pay.

Q. Now, you do have a substantial number of motor carriers operating between, I mean in and out of Cedar Rapids from such points as Chicago, the Tri-Cities, and Omaha, do you not?

A. That is right.

Q. And how about between Cedar Rapids and Kansas City, do you have any other carriers?

A. Yes, you have got Bos Freight Lines operating between Cedar Rapids and Kansas City.

Q. Is that on a scheduled operation, or merely where they have loads?

A. That is on a scheduled operation. You have got Merchants Motor which operates between Cedar Rapids and Kansas City, but their operation is very unsatisfactory because it has to go through the St. Louis terminal, and then over to Kansas City.

[fol. 1479] Q. That would be very circuitous, would it not?

A. Yes, sir.

Q. Now, what has been your experience in so far as you have observed in the regular course of your duties as Traffic Manager, in regard to the handling of claims and tracing of shipments with the Rock Island Motor Transit Company as compared with other carriers?

A. It has been good.

Q. And how about with other carriers; have you had complaints?

A. I receive quite a few complaints during the course of the week regarding claims handled by other carriers.

Mr. Bradshaw: Is this restricted to the application?

By Mr. Nolan:

Q. On shipments moving in interstate commerce in the territory involved in this application or over the route in order to get to destination, is that right?

A. Yes.

Q. Now, Mr. Ewoldt, state whether or not in your opinion the shipping, wholesaling and jobbing interests of Cedar Rapids would be materially affected if the service of the Rock Island Motor Transit Company were either eliminated or materially and substantially reduced.

A. In my opinion I believe they would be affected.

Q. And do you know of any other transportation agency that gives the same quality and type of service as the Rock Island Motor Transit Company does to the points [fol. 1480] served by the Rock Island Motor Transit Company in and out of Cedar Rapids?

A. There may be some that give as good a service, but I would say there is none that give any better service than the Rock Island Motor Transit Company.

Q. You say some would give as good a service. That would be between points like Cedar Rapids and Chicago?

A. Yes, key points there, where the service is fairly comparable.

Q. Yes, and how about between Cedar Rapids and Kansas City?

A. As I mentioned, we only have one carrier, to my knowledge, that gives a scheduled service. The other carrier has to go through St. Louis, which is not satisfactory.

Q. And have you observed recently, Mr. Ewoldt, that carriers who are serving Cedar Rapids prefer, and do primarily give an overhead service between key points rather than local delivery to small points?

A. Yes, it seems to be a tendency to more and more neglect the short line points. They are concentrating more on key points, where the revenue is the greatest and where their handling costs will be the least.

Q. And state what the fact is as to whether or not those restrictions of operation on the average over-the-road carrier are brought about by economic conditions, labor costs, operating costs, and things of that character, or have you made any investigation of that?

A. I don't think I can answer that question properly.

[fol. 1481] Q. I will ask you whether or not you have observed any tendency on the part of the Rock Island Motor Transit Company to curtail its local service to small points?

A. I can answer definitely no there.

Q. There hasn't been any tendency. I will ask you further, Mr. Ewoldt, whether or not the Rock Island Motor Transit Company in its operations has been operating strictly as a motor carrier independent of the Rock Island Railroad, the parent company?

A. In my opinion they have.

Q. And in your opinion, I mean in your work do you find it participates in the motor carrier tariffs and performs motor carrier service independent of the railroad?

A. Yes.

Q. And it is operating the same as any other motor carrier?

A. In my opinion it has, yes.

Q. I mean have you observed anything where there is any influence or domination by the Rock Island Railroad in its operations so far as you have observed in Cedar Rapids?

A. Not so far as I have observed.

Q. Have you had any complaints come to you in that respect?

A. None.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. Have you had any occasion to observe the operations [fol. 1482] between the Rock Island Railroad and the Rock Island Motor Transit?

A. Personally, no.

Q. Then you don't have a personal knowledge of the information you are just testifying to?

A. No personal knowledge.

Q. Give me the carriers, both rail and truck, that operate between Chicago and Cedar Rapids, other than the Rock Island.

A. How long a time do I have?

Q. Well, we have wasted quite a bit on the Rock Island. Let's waste it on the others.

Mr. Nolan: We will concede for the sake of brevity there would be at least fifteen.

By Mr. Bradshaw:

Q. Do you want to say there is at least fifteen common carriers that operate?

A. That go in and out of Cedar Rapids and have rights between Chicago and Cedar Rapids?

Q. And approximately how many are there, then?

A. I would concede there are at least fifteen or sixteen.

Q. Then, you have a pretty substantial service from a common carrier basis between Chicago and Cedar Rapids, is that right?

A. That is correct.

Q. And you have got only two other carriers besides the Rock Island you know of operating to Kansas City?

A. That are giving service to Kansas City, yes.

[fol. 1483] Q. And how many to Omaha?

A. Well, you have got Merchants Motor that handle their Omaha operation via St. Louis.

Q. Just the names.

A. You have Union Freightways. That is the only truck lines I can think of.

Q. What rails have you coming into Cedar Rapids from Chicago?

A. From Chicago you have the I. C., Rock Island, North Western, and the Milwaukee.

Q. And what rail service do you have between Cedar Rapids and Kansas City?

A. You have the Rock Island and the Milwaukee.

Q. Is there a rail freight service in conjunction with that?

A. What do you mean?

Q. Does the Rock Island Railroad haul freight?

A. Yes.

Mr. Howland: You mean less than carloads?

By Mr. Bradshaw:

Q. Does it haul L. C. L.?

A. So far as I know it does. It must because we route freight via the Rock Island Railroad at times.

Q. To Kansas City?

A. Yes.

Q. And what is the rail service to Omaha?

A. L. C. L. or carloads?

Q. My question was intended to be, do you have freight [fol. 1484] service on L. C. L. shipments by rail to Omaha?

A. Well, you have got the Rock Island Railroad going into Omaha. You have got the I. C. going into Omaha. You have got the Milwaukee going into Omaha. You have got the North Western going into Omaha.

Mr. Bradshaw: I believe that is all.

Exam. Carpenter: Redirect.

Redirect-examination.

By Mr. Howland:

Q. On this Cedar Rapids-Omaha service, the North Western is the only direct line between Cedar Rapids and Omaha, is it not, the main continuous line?

A. Well, let's see.

Q. Let me ask it this way. The Rock Island route between

Cedar Rapids and Omaha is by way of West Liberty, with the junction of the line through Davenport to Des Moines and into Omaha?

A. Yes. The Milwaukee freight has to go up to Marion and on to the main line. The I. C. freight has to go up to Manchester and on to the main line.

Q. And that is about a ten mile haul in the case of the Milwaukee Road, or a little less, and about forty miles in the case of the Illinois Central to reach the main line?

A. Yes, that is right.

Q. The North Western main line does go direct through Cedar Rapids?

A. Yes, direct from Cedar Rapids to Omaha.

[fol. 1485] Q. West Liberty is about forty miles south and east of Cedar Rapids, and that is the junction between the Rock Island's east and west line?

A. Yes.

Q. And the north and south line of the Rock Island which serves Cedar Rapids?

A. That is correct.

Exam. Carpenter: Recross.

Mr. Bradshaw: That is all.

Exam. Carpenter: You are excused and off the record.

(Witness excused.)

(Statements off the record.)

O. E. SCHAEFER was sworn and testified as follows:

Direct-examination.

By Mr. Howland:

Q. Mr. Schaefer, your name is spelled how?

A. S-c-h-a-e-f-e-r.

Q. And your initials?

A. O. E.

Q. And you are the Rock Island Motor Transit's Terminal Agent in Cedar Rapids?

A. Yes, sir.

Q. How long have you been located there?

A. About five years.

Q. What experience did you have before being employed there?

[fol. 1486] A. I was Terminal Agent at Mason City for the Rock Island Motor prior to transferring to Cedar Rapids.

Q. Now, what facilities does the Rock Island Motor Transit Company have at Cedar Rapids?

A. Pick-up and delivery, dock, rating, general routine.

Q. What facilities the Rock Island Motor Transit Company has at Cedar Rapids are located in the Rock Island Freight House and used under lease with the Rock Island Railroad?

A. Yes, sir.

Q. All right. Now, about what size dock, platform space, do you have there?

A. I believe we have a frontage of five doors.

Q. And do you have a rate clerk, and tariffs, and matters of that sort?

A. Yes.

Q. How many employees do you have there altogether, office and dock?

A. I believe it runs eighteen to twenty.

Q. Eighteen to twenty?

A. Yes.

Q. And that is exclusive, or does that include your over-the-road drivers?

A. No, sir, that is exclusive.

Q. Exclusive of over-the-road drivers. What pick-up trucks do you have?

[fol. 1487] A. We have five.

Q. Do you perform a pick-up and delivery service for the Rock Island Railroad?

A. No, sir.

Q. Freight in Cedar Rapids?

A. No, sir.

Q. Do you solicit business for the Rock Island Railroad?

A. Do I?

Q. Yes.

A. No, sir.

Q. And what runs do you dispatch from Cedar Rapids, and what are their terminal points?

A. Well, we have three trailers from Cedar Rapids to Des Moines. We have two from Cedar Rapids to Davenport and one daily, Cedar Rapids to Chicago.

Q. That is by way of Iowa City and Davenport?

A. Yes, and one to Oelwein, and one to Decorah.

Q. The Oelwein and Decorah are beyond the scope of this application?

A. Yes.

Q. That is a service limited to the transportation of rail freight?

A. Yes, that is strictly a rail freight operation.

Q. Do you have any runs going south through Iowa City?

A. Yes, we go through Iowa City to Ottumwa.

Q. And that is a daily except Saturday and Sunday operation?

[fol. 1488] A. Yes, sir.

Q. Now, at one time you had service direct from Cedar Rapids to Omaha, I believe, or Omaha to Cedar Rapids. Do you still operate that?

A. No, sir, that is broke at Des Moines.

Q. That is included in one of the Des Moines trucks?

A. Yes, sir.

Q. Omaha-Cedar Rapids business or Cedar Rapids-Omaha business would be placed in one of these Des Moines runs?

A. Yes, sir.

Q. Was that operated until, that Cedar Rapids-Omaha through run, was that operated until about August, 1951?

A. No, sir, it was curtailed before that.

Q. About how long before that?

A. About four years, I believe it was, if I remember correctly.

Mr. Howland: You may cross-examine.

Cross-examination.

By Mr. Bradshaw:

Q. Where is your terminal?

A. 201 5th, Southeast.

Q. Is that in the railroad depot?

A. Yes, sir.

Q. And what sort of a partition do you have there between the rail freight and your freight?

A. Well, there is a runway and a steel wire door separates the two operations there.

[fol. 1489] Q. Now, these three trailers from Cedar Rapids to Des Moines, do they carry both rail and motor freight?

A. The one trailer carries rail and two of them carries motor freight, yes, sir.

Q. Is that always the balance, or is there sometimes a different balance than that?

A. I don't understand your question.

Q. Is there always one trailer with rail?

A. No, sir.

Q. Or might it be mixed more than that?

A. If one of the trailers has room, we move it.

Q. You move it?

A. Yes, sir.

Q. And is the same true on your trailers moving to Davenport?

A. Yes, sir.

Q. And the trailer moving to Chicago?

A. Yes, sir.

Mr. Bradshaw: I believe that is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. These trailers that you referred to, in fact all of your runs handle both inter and intrastate, or within the State freight, in the same units, do they not?

A. Yes, sir.

Mr. Howland: I think that is all.

[fol. 1490] Exam. Carpenter: Any further cross-examination?

Mr. Bradshaw: No.

Exam. Carpenter: You are excused.

(Witness excused.)

Exam. Carpenter: The hearing is adjourned until tomorrow morning at 9:30 a. m. in the same room.

(At 5 p. m., March 26, 1952, hearing adjourned to 9:30 a. m., March 27, 1952.)

[fol. 1491] TRANSCRIPT OF PROCEEDINGS OF MARCH 27, 1952

Exam. Carpenter: We will come to order, gentlemen. You may proceed, Mr. Howland.

Mr. Howland: Mr. Bagby, will you please come forward and be sworn?

R. W. BAGBY was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. R. W. Bagby.

Q. You reside where, Mr. Bagby?

A. Beatrice, Nebraska.

Q. Your business is what?

A. I am traffic manager for Dempster Mill Manufacturing Company.

Q. What is the type and character of the business in which the Dempster Mill Manufacturing Company is engaged?

A. We are manufacturers of implements, agricultural implements, windmills, towers, beams, cylinders, general line of farm supplies; and then we are also jobbers of a complete line of plumbing and heating supplies.

Q. At what places is the Dempster Mill Manufacturing Company operating? That is their manufacturing plants or warehouses or distributing centers?

A. All of our manufacturing is done at Beatrice. We also have warehouses for distribution at Omaha, Des [fol. 1492] Moines, Sioux Falls, Kansas City, Amarillo, Sweetwater and Antonio, Texas.

Q. I take it, then, you distribute your products that you either manufacture or merchandise in a pretty wide area through the middlewestern part of the United States?

A. Well, it includes all the United States; in fact, we have quite an export business too.

Q. About how many people are employed in your company all told?

A. Between six and seven hundred.

Q. Do you have products that are manufactured at Beatrice, Nebraska that you ship into the Iowa territory?

A. Yes, sir.

Q. In what territory in Iowa are such products shipped?

A. Well, we ship to very many points in Iowa. I mean it is a pretty wide coverage.

Q. In your general line of business do you sell direct to the retail merchants or do you sell direct to your consumers?

A. We sell entirely through dealer organizations.

Q. And what is the fact as to whether you have dealers throughout the State of Iowa?

A. Yes, we have dealers, I would say, at most of the towns in Iowa handling our products.

Q. And is that true also of the communities located on or immediately adjacent to U. S. Highway 6 across the State of Iowa and also U. S. Highways 59 and 64 and Highway 83 out in the western part of the state?

[fol. 1493] A. Yes, that is true.

Q. How about the territory up into Audubon or down into Griswold?

A. That is the general coverage. We serve all those towns.

Q. Is there a flow of traffic that is moving from Beatrice into that general territory?

A. Yes.

Q. What service do you customarily use to reach those points in western Iowa and on U. S. Highway 6 across the State of Iowa or adjacent to Highway 6?

A. Well, we use the Rock Island Motor Transit Company and other similar forms of transportation and rail.

Q. With respect to the service of the Rock Island Motor Transit Company, how has that service been with respect

to time in transit, and with respect to other features of the service such as tracing shipments, handling any claims that might arise, or similar matters of that character?

A. We haven't had any complaints on the service, and as far as my knowledge goes the shipments move through in good time.

Q. Now, you say that you use other carriers. Are there points and places on U. S. Highway 6 or adjacent thereto, to intermediate points, that you have had any experience in endeavoring to obtain delivery by any other carrier? Have you had the experience of making a small shipment, say 250 to 300 pounds, to some small intermediate point [fol. 1494] with a population of three, four or five hundred people by other carriers?

A. Well, as I indicated before, we use a lot of carriers——

Q. I understand that.

A. —in distribution, and we handle many shipments to points on Highway 6.

Q. Well, my question was whether you had had any particular experience in tendering a shipment, say, of 300 pounds to some particular carrier destined to a point on U. S. Highway 6 and what your experience had been in obtaining service other than the Rock Island Motor Transit. Have you had that experience?

A. We have had that experience, yes.

Q. What is it? How does the service you have received correspond with that which has been performed by the Rock Island Motor Transit Company?

A. Well, the service has been all right. We haven't had any complaints on it. We use the Rock Island Motor Transit to the points you indicated in the routing guides that they serve, and we use other carriers to other points which they do not serve.

Q. Well, of course, you necessarily require transportation to a great variety of communities.

A. That is right, yes, sir.

Q. Are there points on U. S. Highway No. 6 where you have found by experience or otherwise that the Rock Island Motor Transit Company renders the only regular peddler service to those points?

A. Yes, we have had several points like that.

[fol. 1495] Q. If this Rock Island Motor Transit service to these points across the State of Iowa should be eliminated or the service thereto should be substantially curtailed and cut down, would that have any effect on your business?

A. It most certainly would. It would materially slow down the distribution of our products and hamper our operations.

Q. And would that have an adverse effect on your ability to serve your customers or compete with your competitors who are operating in the same territory?

A. It naturally would, yes.

Q. I take it you have competitors at other points in this midwest territory?

A. Yes, sir.

Q. Who are offering to serve the general type and character of merchandise that the Dempster Mill Manufacturing Company is offering?

A. Yes, we have many such firms competing in the same territory.

Q. Are you informed of the fact that at the present time the Rock Island Motor Transit Company is unable to transport shipments from Omaha into the Tri-Cities of Davenport, Rock Island, and Moline and East Moline, Illinois?

A. Well, I understand there is a strike on.

Q. I am not speaking about the strike. I am speaking about restrictions imposed by the Interstate Commerce Commission to key points.

[fol. 1496] A. No, I was not aware of that. We have used the Rock Island Motor on shipments to us from Chicago and other eastern points, but I don't believe we use them to the Tri-Cities.

Q. Do you ship from the western Illinois territory?

A. Yes, sir.

Q. Do you know how those shipments to your plant at Beatrice from Chicago have been moving?

A. Well, I know some of the shipments have been shipped from Rock Island.

Q. I mean what routing. Has the fact it has been necessary to have an intermediate carrier to perform part of that service had any effect in the transit time from Chicago and eastern points into your Beatrice plant?

A. Yes, it has. We try in all cases to secure a one-line haul if we can. If we can't have a one-line haul, why, then, we have a two-line haul. From some points in Illinois we have to have two and sometimes three-line hauls to Beatrice.

Q. Do you have occasion to make any truckload shipments from your plant at Beatrice or from your warehouses to points in this territory?

A. Occasionally we do, yes, sir.

Q. And were you informed the Rock Island Motor Transit Company has a restriction of 5,000 pounds maximum weight on any one shipment?

A. No, I was not aware of that restriction.

[fol. 1497] Q. Would that restriction affect the needs of your business? That is, would that affect you in your ability to get service if this 5,000-pound restriction continues?

A. It would, yes.

Q. In your business do you need transportation service into this territory for shipments in excess of 5,000 pounds?

A. Yes.

Q. About how frequently do you have occasion to make those shipments in excess of 5,000 pounds into this territory or through this territory in interline?

A. Of course, it depends on seasons. During the spring season our implement movement is heavy; we have quite a diversified line of merchandise. We have known of wind storms which necessitated a movement of windmills or some other item in excess of 5,000 pounds. I would not say it is——

Q. It would not be a daily occurrence, would it?

A. It is not daily, no, but it has happened we have had several during a month.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: On the record.

By Mr. Howland:

Q. Does the Rock Island Motor Transit Company serve Nebraska?

A. Yes, sir.

Mr. Howland: You may cross-examine.

[fol. 1498] Cross-examination.

By Mr. Bradshaw:

Q. Mr. Bagby, the 5,000-pound restriction that Mr. Howland is talking about, you understand, applies only to the Rock Island Motor Transit.

A. Well, I told him I was not aware of the 5,000-pound restriction.

Q. And it hasn't bothered you to date, has it?

A. No.

Q. In other words, you have been able to get these over 5,000-pound shipments moved into this territory in emergencies and when you had to?

A. We have so far, yes.

Q. I take it that you used other carriers than the Rock Island Motor for that purpose?

A. We use practically all carriers.

Mr. Bradshaw: I believe that is all.

Exam. Carpenter: Redirect?

Mr. Howland: Nothing further.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Howland: At this time I would like the record to show that, as requested by Mr. Fowler when Witness Maurer was on the witness stand, that we have produced and delivered to counsel for the protestants a copy of the Minutes of the Meeting of the Industrial Traffic Council of the Chicago Association of Commerce and Industry held [fol. 1499] on March 6, 1952, on page 246 of which appears the Minutes of the Meeting with respect to the application of the Rock Island Motor Transit Company in MC-29130, Sub 70, for hearing beginning March 18, 1952, in Des Moines, Iowa; and we ask that these Minutes be identified as exhibit 18 in this record.

Exam. Carpenter: It will be so identified.

(The Minutes referred to were marked as "Applicant's Exhibit No. 18, Witness Maurer", for identification.)

OFFER IN EVIDENCE

Mr. Howland: We offer exhibit 18 in evidence at this time in connection with previous examination of Witness A. J. Maurer. This is furnished in accordance with the arrangement heretofore made with Mr. Fowler when Mr. Maurer was on the witness stand.

Exam. Carpenter: The document will be received in evidence as exhibit No. 18.

(Applicant's exhibit No. 18, Witness Maurer, was received in evidence.)

Mr. Nolan: Mr. Wegmuller, will you please come forward and be sworn?

JACOB P. WEGMULLER was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you please state your name, residence and occupation?

[fol. 1500] A. Jacob P. Wegmuller, Manager of Barron Motor Supply, Iowa City, Iowa.

Q. How long have you been connected with the Barron Motor Supply?

A. It will be 21 years the 21st of next May.

Q. What is the general nature of the business of your Company?

A. We are wholesalers of automotive parts and equipment along with operating a machine shop, and accessories, of course. It is anything that has to do with the automotive industry.

Q. What retail territory do you serve?

A. My particular branch operates in Johnson County, Scott County, part of Muscatine County, Washington County, Keokuk County, Iowa County, and a little of the county on this side of Iowa County, Poweshiek County.

Q. Then, it would be fair to say you serve a radius of about 50 miles around Iowa City except on the north?

A. We have a little bit better than that, 60 to 65 miles of Iowa City with the exception of on the north.

Q. Your place of business is a branch of Barron Auto Supply Company of Cedar Rapids, Iowa, is it not?

A. That is right.

Q. You have testified before in these proceedings and you are familiar with the service proposed by the Rock Island Motor Transit Company, are you not?

A. Yes, sir.

Q. And which now includes truckload service as well as [fol. 1501] less-than-truckload service. How long has your company been using Rock Island Motor Transit service in Iowa City?

A. We have used it ever since its existence.

Q. Ever since the White Line Motor Freight has been doing business?

A. Yes, sir.

Q. What sort of supplies do you have for servicing your business there?

A. A variety from practically all over the United States. More especially we try to get our merchandise in from close warehouses; for instance, from Omaha via United Motor service, batteries from Minneapolis, welding rods and welding equipment from Chicago; levelers, springs and various other lines from Chicago warehouses; and then of course we have a lot of factory shipments from Detroit, New York, Pennsylvania, some from the Pacific coast.

Q. How about the Kansas City area? Do you get in merchandise from there?

A. Yes; sir, and from the Cities of St. Louis and Springfield.

Q. What are some of the larger items that you have shipped in?

A. Well, when you go to the larger items—let's put it this way—the largest items are units like air compressors, big pieces of equipment, drop shipments both direct to our customers and to us. Of course, we would use railroad on carload lots.

Q. But what I am driving at, do you have shipments [fol. 1502] either into your place of business, or drop shipments to your customers where they come directly from the factory, on shipments that exceed 5,000 pounds?

A. That is not so popular, no, sir. Most of ours would be under 5,000 pounds on drop shipments. That is 2½ tons. Yes, the largest drop shipments would be under 5,000 pounds.

Q. You say you have used the Rock Island Motor Transit service. Is that on inbound shipments?

A. Both. As a matter of fact, right now they are doing us more good, as far as business is concerned, on drop shipments from Iowa City to Wellman, Iowa City to Victor and any of the towns in the area I mentioned by counties where we do business. Right now we are in the process of getting in a carload of merchandise which we will ship out four cases here, six cases here, six cases there and so on. They are a Godsend on shipments like that.

Q. And are those shipments already ordered before you get the merchandise in?

A. Yes. We have it packed already to go, and unload it like that and deliver it.

Q. And in addition to having shipments shipped into your place of business in Iowa City from out of state, you say you have shipments directly to your dealers that don't come through your Iowa City branch?

A. We have shipments delivered like batteries and filters and seasonable items like lubricants for implement dealers [fol. 1503] and such; we have those items delivered in drop shipments from the factory direct to those people.

Q. One of your dealers, say, in Marengo, Iowa, might receive shipments from Minneapolis that might never come through your place of business at Iowa City?

A. That is true. There are many shipments shipped to Marengo which do not pass through our branch at Iowa City.

Q. Is that a frequent occurrence?

A. We encourage our sales people to ship that way.

Q. Well, is that a regular occurrence?

A. Yes, sir, routine business.

Q. How frequent would you say you use Rock Island Motor Transit on shipments going into Iowa City?

A. Every day.

Q. How frequently would you use Rock Island Motor Transit on your so-called overhead drop shipments from factory to customer?

A. I would say 4 days out of 6 days' business. I can't say every day because I might miss a day or two once in a while, but practically every day our salesmen bring in orders that are direct drop shipments. They may be shipped today; they may be shipped next week; they may be shipped 6 weeks from now.

Q. In other words, your dealers order ahead?

A. Yes, sir.

Q. Have you had experience with other transportation companies bringing shipments to your place of business in [fol. 1504] Iowa City or some of those overhead drop shipments?

A. Yes, sir.

Q. State whether or not that has been as satisfactory a service as the Rock Island Motor Transit service has been?

A. It has not been as satisfactory and I can explain some of the reasons why some of their drop shipments direct are not as satisfactory. I can show you. On the 12th day of December, 1951, I telephoned Lynch at Cleveland for an air compressor to be shipped to Marengo to a man by the name of Knipple who makes the Iowa corn shows, "Ship it right away".

On the 24th of December I had a bill of lading marked to ship by truck via Watson Brothers at Chicago. I went over to the Watson dock in Kansas City and said, "How about this thing?" He says, "We won't pick that up in Chicago". I says, "I need it; I want it". "We haven't any way of getting that to you; we won't even pick it up". "What is the matter calling up about it"? "Well, we will try to have somebody else pick it up for you". That is the kind of business we run into.

Do you know what happened? I had to take a new air compressor out of my place and hook it up for Knipple. Then I called the factory and asked them for that air compressor. It stayed on the docks in Chicago for 2 weeks and 5 days; then it was carried to Marshalltown and sat there for 5 days.

That is a sample of some of the things that have happened. I got one here in my pocket: Des Moines Transpor- [fol. 1505] tation Company Bill of Lading 979051, dated 9-26-'51, one box of welders.

Q. Where did that originate?

A. Minneapolis. Bill received 10-3-'51; freight received in Iowa City 11-14-'51; and I needed that merchandise. Rock Island Motor Transit can get that to me in 3 days. They are interested in the business.

Q. The shipment you referred to last fall was handled by the Des Moines Transportation Company?

A. This one was, yes. I have some on McCoy. I telephoned United Manufacturing Company in Chicago, if I remember correctly, around the 16th or 18th of November——

Q. What year?

A. 1951. —for 24 spotlights going to Millers Sales & Truck Service. About 2 weeks later I still didn't have that stuff. They said it was shipped around the 18th or 19th of November. I wrote back and says, "How?" They wrote back and said it went McCoy. I called McCoy and said, "Where is my United stuff?" He says, "I got the bill here; there are 5 packages; I got one. You don't want just one package. I didn't bring it down." I says, "What have you done about it?" Well, he says, "I traced it through Waterloo". I said, "Give me the man's name at Waterloo". I called him on the phone. He said he would see what he could do about it.

I waited 4 or 5 days more and then I calls United again and said, "I have to have spotlights. Get a new shipment [fol. 1506] out today via Rock Island Motor Transit; they will pick them up tomorrow morning." About 5 days later I got the McCoy shipment, so I had two sets of spotlights.

Q. The McCoy Truck Lines are supposed to serve Iowa City?

A. Not as far as I am concerned. I don't ask them to serve me.

Q. Watson Brothers are supposed to serve Iowa City?

A. That is what I thought, but you can see what they care about it. They have no delivery service. I can get better service out of Minneapolis and I have them delivered by Coleman & Wellman.

Q. Do you have overhead deliveries by Coleman & Wellman?

A. Yes, sir.

Q. Every time you think of it do you specify The Rock

Island Motor Transit Company preference to other companies?

A. Yes, sir. They are nice people; they want to do business with us, they give service and that is all I care for. It is the business that you are after.

Q. Now, what would be the effect on your company's business in the event the Rock Island Motor Transit Company should be required to terminate its operations or materially reduce its service?

A. I don't think it would make Barron Motor Supply go broke, but it would force me to buy a truck and do my own delivery service in these counties I am talking about.

Q. Do you feel you would have difficulty getting shipments into Iowa City?

[fol. 1507] A. Yes, sir. Well, you can see what I told you. Those are facts I can verify.

Mr. Nolan: I will take your word for it. That is all. You may cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Now, the incoming shipments you spoke about, other than your rail carload lots, how many shipments have you had in the last year that exceeded 1,500 pounds in weight?

A. By truck?

Q. By truck.

Q. Over 1,500 pounds?

Q. Yes.

A. Oh, Gosh! quite a bunch of them. I would say 10 percent of them.

Q. How about those exceeding 2,000 pounds?

A. They come down pretty fast, probably down to 5 percent.

Q. And at 3,000 pounds you would not have much to speak of, would you?

A. No, sir. Our shipments are from a ton to two ton, up to that.

Q. As I understand it, these shipments that come in go direct to the person who ordered through you?

A. A lot of them, yes, sir, every day.

Q. And out of your place in Iowa City you would not give to the truck company anything exceeding 3,000 pounds by truck. Isn't that so?

[fol. 1508] A. Not as a general rule; that is right; no.

Mr. Bradshaw: That is all.

The Witness: Right now we do have, as I say, this carload stuff. It comes in maybe 3, 4 or 5 times a year. They are shipments of oils and anti-freeze, When we ship out 40 or 50 cases at a time we have to break them down. We will ship out 5,000 pounds today and 5,000 pounds tomorrow. That is what we have to do in a case like that.

Mr. Bradshaw: That is all.

Exam. Carpenter: Redirect?

Redirect examination.

By Mr. Nolan:

Q. Just one other question, Mr. Wegmuller.

Do you know of any transportation company that provides the same type and character of service the Rock Island Motor Transit Company renders to Iowa City and the other points along Highway No. 6?

A. Not that I know of.

Mr. Nolan: That is all.

Exam. Carpenter: Any recross?

Mr. Bradshaw: No.

Exam. Carpenter: That is all.

(Witness excused.)

Mr. Nolan: Mr. Slager, please.

TRUMAN SLAGER was sworn and testified as follows:

[fol. 1509] Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence and business, please?

A. Truman Slager, Iowa City, Iowa. I own and operate a complete hardware store, appliances and farm implements.

Q. How long have you been so engaged?

A. I am in my fourth year for myself. I have been in business prior to that for other concerns about 12 years.

Q. From what points do you have shipments coming into Iowa City in less-than-carload quantities?

A. Well, from Blair, Nebraska; Minneapolis, Minnesota; Moline, Chicago, Illinois. I think probably those are the chief sources of supply. We do have some from Warren, Ohio, and South Milwaukee, Wisconsin.

Q. Are those what we would call volume shipments or less than carload?

A. Well, we get quite a lot of farm implements from Moline, Illinois, and Minneapolis, Minnesota, which would be more than 5,000 pounds. We have received one semi-truck load of one item from Minneapolis out of Moline, Illinois. We did haul a lot of that ourselves. We do have quite a little volume coming out of Moline, Illinois.

Q. Do you handle a tractor line?

A. Minneapolis-Moline, a complete line manufactured at Moline and Minneapolis and Hopkins, Minnesota.

[fol. 1510] Q. And you also handle a general line of farm supplies?

A. That is right.

Q. Which are made by other companies?

A. That is right.

Q. Like corn elevators?

A. Yes; we get those out of Blair, Nebraska.

Q. And feed grinders and things of that kind?

A. Yes.

Q. What companies have you been using into Iowa City on less-than-truckload shipments?

A. Rock Island Motor Transit.

Q. What has been the nature of that service?

A. It has been very satisfactory.

Q. And have you used the Rock Island Motor Transit from all points north, east and west?

A. Wherever we can; always out of Minneapolis. In fact, our hardware source has a letter written about 2 years ago to ship nothing but Rock Island Motor Transit.

Q. And you have specified the Rock Island Motor Transit?

A. That is right.

Q. And you do that wherever you can?

A. Wherever we can.

Q. Now, there are a number of truck companies serving Iowa City or operate through Iowa City, are there not?

A. That is right.

[fol. 1511] Q. You know that to be a fact?

A. Yes.

Q. Have you had any experience with service via any other truck companies operating through Iowa City other than the Rock Island Motor Transit Company?

A. Yes, we have in some isolated cases; cases where we failed to direct Rock Island Motor Transit we have.

Q. Can you give us any examples of the service you have had via lines other than the Rock Island Motor Transit Company on shipments from any particular places the freight bills for which you have pulled out of your files?

A. I just went over some of the freight bills we had after the first of the year last night. Here is one, Western Transportation Company from South Milwaukee. The service was not too bad. It was shipped March 12, we received it March 17. It was not too bad a service. We have received overnight service in the past.

Q. Give us the date of that shipment and the volume of it.

A. It was consigned to the Western Transportation Company March 12, 1952, and we received it March 17, 1952; it weighed 589 pounds.

Then, from the same company on March 4, 1952, they shipped 405 pounds and we received it March 11th. We were in a little hurry for that, which was not too bad.

Q. Did that come out of South Milwaukee too?

[fol. 1512] A. Yes, sir. Then, we have one here by Western Transportation from the Hettrick Manufacturing Company of Huntington, Indiana, shipped December 19, 1951; we received it January 3, 1952. That was in amount of 164 pounds. We were in a hurry on that; it was a special order for tarpaulins for a customer.

Here is a shipment by Rock Island Motor Transit; that

is our other regular service. We telephoned Minneapolis for some rush merchandise March 20, this year. It was consigned to the Rock Island Motor Transit on March 21st, which would be Friday, and we received the merchandise Monday about 10 o'clock. We were one piece short and it was found and brought to us yesterday.

Q. Now, that included a weekend, did it not?

A. We ordered it on Thursday, it was shipped on Friday and we received it on Monday.

Q. You say there was one piece short. Would you say that is the usual service of the Rock Island Motor Transit?

A. No. It is very seldom we ever have a shortage. There were 88 pieces in the shipment which included some stepladders, and when we checked the merchandise in we counted 88 pieces because there were two stepladders which were fastened together and the twine enroute was broken. After we had checked the merchandise against the invoice I telephoned the Rock Island Motor Transit and they immediately located the piece for us. Now, that is the motor service that means a lot of business to us, especially out of Minneapolis and Des Moines.

[fol. 1513] Q. You are referring to the Rock Island Motor Transit service?

A. That is right.

Q. Any others you think of?

A. Here is one shipped by rail.

Q. From where?

A. From Minneapolis also. This was shipped March 15, 1952; it consisted of a minimum shipment. It was received in Iowa City March 24 and we received it March 25.

Q. That was shipped by rail?

A. By rail.

Q. That was by the Rock Island rail?

A. Yes, sir. That is about the regular rail transit service, about 10 days to 2 weeks.

Q. Did you specify the routing on the shipment or did the shipper just happen to ship it that way?

A. They just happened to ship it that way. They have a standing order, I presume, but maybe somebody mislaid the order.

Q. When you referred to the freight bills from Western

and Rock Island Motor Transit, would you say they reflect fair examples of their service throughout the year?

A. I think these are typical freight bills. Luthe Hardware at Des Moines is one of our biggest sources of farm supplies and hardware, and they have a standing order to ship only by Rock Island Motor Transit.

Q. In fact, the Rock Island Motor Transit is the only [fol. 1514] company which can serve Des Moines and Iowa City on intrastate traffic?

A. That is right.

Q. You have interstate and intrastate shipments coming into your place at Iowa City?

A. That is right.

Q. Do you know of any company serving Iowa City that gives the same type and character of service the Rock Island Motor Transit Company has been giving you?

A. I do not. That has not been my experience. I specify Rock Island Motor because they have given me very substantial service and they have taken care of me very well on claims. The claims are handled very, very well.

Q. Have you had any experience with other transportation companies at or passing through Iowa City on claims?

A. I have.

Q. And was that satisfactory?

A. It depends on what you call satisfactory. I have one now with Watson Brothers on a shipment shipped to me in October 1950 and the claim amounting to $50 still is not paid.

Hedrick hauls out of Burlington, Iowa, into Iowa City. In about 1947 I had three claims with him which are unpaid yet. I have given up on those.

Q. Are you getting any merchandise out of Burlington now via Rock Island Motor Transit?

A. Yes, I get merchandise from there.

[fol. 1515] Q. Is that routed through the Davenport gateway and then comes in on Rock Island Motor?

A. I can't tell you; I haven't paid any attention to it. I just received several shipments from Burlington the last couple of months but I don't know how they came, whether by rail or truck or in what way.

Q. What would be the effect on your business there in Iowa City if the Rock Island Motor Transit Company was required to cease operating or substantially curtail its operations?

A. It would mean one of two things to me. You mean if they discontinued to haul out of Des Moines too?

Q. Completely.

A. I would have to give up my source of supply here in Des Moines and buy from a firm in Cedar Rapids. I would have to change my source of buying, or it would increase my inventory with a longer inside basis by four to six thousand dollars. In merchandise receipts that is a big item. If we can get one piece of merchandise and use it, as probably other men do in the same type of business as I am in— Say we receive merchandise the first week of the month, we order it, we get it right in, we get it on the shelves; a lot of that merchandise is sold before we even have to pay for it. Probably the 10th of the month we would have to increase our order to every 90 days instead of every 30 day which would increase our inventory.

Mr. Nolan: That is all. You may cross examine.

[fol. 1516] Cross examination.

By Mr. Bradshaw:

Q. Referring back to the freight bills, if you please, would you give me the pro number on the Western Transportation bill of March 12th?

A. C-184745.

Q. Where was that shipment originated?

A. South Milwaukee, Wisconsin.

Q. And destined to Iowa City?

A. Right.

Q. And weighed 589 pounds?

A. 589 pounds, right.

Q. What was the freight charge?

A. $1.37 per hundred; $8.31 total.

Q. The total charge was $8.31?

A. $8.31 including the tax.

Q. And the next one on March 4th you referred to?
A. The pro number is C-176578.
Q. That was received March 11th?
A. That is right.
Q. And given to the carrier on what date?
A. March 4, 1952.
Q. And where was that originated?
A. South Milwaukee.
Q. And what was the weight on that one?
A. 405 pounds, $1.37 rate, a total of $5.72.
[fol. 1517] Q. $5.72 charges?
A. That is right.
Q. And the third one by Western on December 19th?
A. The pro number on that is C-122593. That consisted of four bundles of tarpaulins, weighed 164 pounds, rate $1.85.
Q. Total freight bill?
A. $3.12.
Q. Where did that originate?
A. That originated at Huntington, Indiana, from the Hettrick Manufacturing Company.
Q. And the one by Rock Island Motor Transit on March 21?
A. The pro number of that is 366961.
Q. Where was that from? Where did it originate?
A. Minneapolis, Minnesota.
Q. And consisted of stepladders?
A. Stepladders, glassware, steelware, auto brushes, rubber hose.
Q. And the weight?
A. The total weight was 904 pounds, and it had various rates.
Q. What was the total charge?
A. The total charge was $18.85. A lot of this is very bulky merchandise with no large weight.
Q. Is the majority of your inbound shipments under 2,000 pounds?
A. Oh, yes.
Q. Under 1,500 pounds?
A. Yes, because we get a lot of small shipments.
[fol. 1518] Q. Do you have any over 2,000 pounds?

A. A number of them, yes.

Q. Do you have any over 3,000 pounds?

A. Yes.

Q. How do you handle those?

A. Well, we haven't had any over 3,000 pounds right recently. From Moline, Illinois, we get a lot of shipments that may run anywhere from 1,200 to 8,000 pounds.

Q. How do you handle those shipments?

A. A lot of that merchandise we go after ourselves if we can get a full truckload.

Q. Is that your farm machinery?

A. That is farm equipment, just plows and merchandise of that kind.

Q. Do you have any heavy equipment over 5,000 pounds which comes in from any other source?

A. From Minneapolis, Moline and Hopkins, Minnesota, but that usually comes in by rail in full carloads. We also get full carloads from Joliet, Illinois, wire shipments.

Q. By rail?

A. By rail. Shipments of 5,000 pounds or over are made on an average of once or twice every other month. I would say probably ten times a year.

Q. And most of it is this farm machinery you go after yourself?

A. Occasionally we have a heavy shipment of hardware [fol. 1519] that may weigh from three to six thousand pounds a shipment, sir.

Q. Well, if it is over 5,000 pounds, who handles it for you?

A. Well, they have not shipped over 5,000 pounds to the shipment since the restriction was established.

Mr. Bradshaw: That is all.

Mr. Nolan: That is all.

Exam. Carpenter: That is all. Thank you, sir.

(Witness excused.)

Mr. Howland: Mr. Vieth, please.

C. C. VIETH was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name?

A. C. C. Vieth.

Q. You live where, Mr. Vieth?

A. Oakland, Iowa.

Q. What business are you engaged in?

A. Hardware, furniture, appliances, and I operate a funeral home there.

Q. How long have you been engaged in business at Oakland?

A. It has been 64 years since the firm has been established, but I have been there personally for 38 years.

Q. I take it that, in connection with your business, you have occasion to have shipments of merchandise coming in to Oakland from outside the state of Iowa?

[fol. 1520] A. Oh, yes.

Q. What points do you principally receive merchandise from? What are your sources of supply?

A. Well, locally, that is within the state, we have——

Q. Well, I am particularly interested in out of state.

A. Well, Chicago, St. Louis— Oh, there is really quite a variety of places. We get furniture from a good many places; Kansas City, you know, a lot of shipments; just once in a while from different points.

Q. Different points of origin?

A. Yes.

Q. Now, on your furniture shipments, are those customarily delivered to you by the manufacturer's own truck or are they handled in some other manner?

A. We get most of it by Rock Island Motor Freight because we buy most of it here in Des Moines.

Q. Well, I am speaking about out-state shipments. You see, Mr. Vieth, this case is entirely concerned with interstate service. Do you get shipments of furniture and similar articles from outside of the state also?

A. Yes; we get furniture from Kansas City. I think that

firm is in Kansas City, but the shipments, I guess, originate in Leavenworth, Kansas.

Q. On your hardware lines, do you get any of your hardware items from outside of the State of Iowa?

[fol. 1521] A. Oh, yes; we get a little hardware from Chicago.

Q. How are those items usually transported?

A. Well, in different ways. Sometimes it comes by rail freight, and it is picked up by the Rock Island Motor Transit because we have no rail freight coming in by railroad.

Q. That is, the less-than-carload or smaller shipments are not handled on trains?

A. No; there is nothing handled on the train.

Q. Oakland is a community of about how many people?

A. About 1,500.

Q. And it is located in the southeasterly portion of Pottawattomie County?

A. Yes, sir.

Q. It is about how far from Omaha?

A. About 30 miles.

Q. And your rail service there by a branch line of the Rock Island Railroad that extends north and south?

A. That is right.

Q. How frequently do you have train or rail service into Oakland?

A. I think it is three times a week; but we do not get any less-than-carload freight, just carloads by rail.

Q. And your less-than-carload freight, even though moving on railroad billing, will be delivered by the Rock Island Motor Transit Company?

[fol. 1522] A. That is right.

Q. How frequently does the Rock Island Motor Transit Company serve Oakland?

A. Well, we get shipments there almost every day, but I will say on an average of probably four times a week.

Q. What types of business are located at Oakland? Do you have any manufacturing establishments there?

A. No, I believe not.

Q. They are the retail stores?

A. Yes.

Q. The usual retail and service establishments for an agricultural community the size of Oakland?

A. Yes, that is right.

Q. Now, I believe there are certain other motor carriers that render service to Oakland?

A. Yes.

Q. What carriers are there that render service to Oakland?

A. The other principal one is the Iowa-Nebraska Transportation Company.

Q. And that comes in from Omaha?

A. From Omaha.

Q. On shipments coming in from the east does the Iowa-Nebraska Transportation render a direct service, or does that merchandise move to Omaha and then come back to Oakland?

A. Well, we get nothing from Iowa-Nebraska from the east.

[fol. 1523] Q. Do you know what their service is from the east?

A. I don't think they operate from the east at all.

Q. At least your experience is confined to Omaha-Oakland service?

A. That is right.

Q. Have you been solicited to route any other shipments then Omaha shipments?

A. No; that is right.

Q. Do you have occasion to have any shipments made into your place of business where the weight exceeds 5,000 pounds in a single shipment?

A. Very seldom.

Q. 5,000 pounds would take care of most of your shipments?

A. It has mostly. It is generally around a thousand pounds.

Q. Now, Mr. Viett, if this Rock Island Motor Transit service were eliminated entirely or substantially reduced, do you think that would have any effect on your business or on your community there?

A. Oh, yes, I am sure it would, because we frequently called Des Moines for something urgent and it is loaded out of there and we usually get it the next day.

Q. Is there any other carrier that renders service into Oakland from the east or from points outside of the state located east of the State of Iowa?

A. No, there is not.

Mr. Howland: I think you may cross examine.

[fol. 1524] Mr. Bradshaw: No cross examination.

Exam. Carpenter: That is all. Thank you.

(Witness excused.)

Mr. Howland: Mr. Kinner, please.

C. E. KINNER (Recalled) was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Mr. Kinner, you were on the witness stand earlier in the hearing and testified concerning the situation in Chicago. You were to produce certain information for us, I believe, that was requested by Mr. Fowler last week.

Have you before you an abstract of the shipments received from connecting carriers at Chicago, Illinois, during the months of January, February, March and April, 1951, where the shipments were originally routed by other carriers but were given to the Rock Island Motor Transit Company for delivery?

A. I have.

Mr. Howland: I would like to ask that the tabulation produced by the witness be marked for identification as exhibit 19.

Exam. Carpenter: It shall be so marked.

(The tabulation referred to was marked "Applicant's Exhibit No. 19 for identification.)

By Mr. Howland:

Q. Now, referring to this tabulation which you have produced, which has been marked exhibit 19 for identification, how was that made up? Is that an abstract of the bills [fol. 1525] you had here with you at the time and to which you testified?

A. Yes, that is right.

Q. In the first column on the left of the paper marked for identification as exhibit 19 you have the originating carrier's pro number, and that is followed by the point of origin, point of destination, the originating carrier and the original routing as shown on the bill. Is that correct?

A. That is right.

Q. The information shown on the tabulation marked for identification exhibit 19 is a tabulation of the information shown on those bills that you had? Is that right?

A. Yes, that is right.

Q. Is there anything further that you can add with respect to this tabulation, as to the way it was made up, or the occasion for the Rock Island Motor Transit receiving these shipments rather than the original routing?

A. Well, I have the bills here covering this abstract and, in checking them, I find that the class of merchandise covered by these bills is not what is known as desirable freight in the trucking industry. It is freight of low rate or of a bulky nature which makes it more or less undesirable.

Q. What would you say was the general class of this freight as to the classification it would take?

A. There is quite a bit of first-class merchandise in here but it is bulky freight and freight susceptible to damage [fol. 1526] and is merchandise of that character on which the claim ratio is usually higher than on other types of merchandise, very high.

OFFER IN EVIDENCE

Mr. Howland: We will offer at this time and introduce in evidence exhibit 19 in connection with the testimony of Mr. Kinner.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. I want to ask you, Mr. Kinner, if this is the information you got entirely from the bills which were here at the previous time you were on the stand?

A. That is right.

Q. And none of this information is taken from other records?

A. No, sir.

Mr. Bradshaw: That is all.

Exam. Carpenter: The document consisting of 8 sheets is received in evidence as exhibit 19.

(Applicant's exhibit No. 19, Witness Kinner, was received in evidence.)

Redirect examination.

By Mr. Howland:

Q. In preparing this tabulation, which has now been received in evidence as exhibit 19, do you know, as a matter of fact, whether the carrier shown on the original routing had, in fact, authority to serve the points of destination named in the bills?

A. Yes. I have checked the tariffs and find the original [fol. 1527] routing could have been protected by the carrier designated by the shipper if they so desired.

Q. In other words, in each instance, according to their tariff authorities, the carrier shown on the billing had authority to serve the destination point?

A. That is right.

Q. And these shipments were given to the Rock Island Motor Transit Company at Chicago and the service actually performed from that point to the destination named?

A. That is right.

Q. Now, while you were on the witness stand, Mr. Kinner, you produced some information, or some estimates I guess it was, with regard to the quantity of tonnage handled during the months since the restriction of 5,000 pounds has been in effect on the operations of the Rock Island Motor Transit Company. You were asked and it was suggested by the Examiner and requested by Mr. Fowler that you produce some data from the records supporting some of the statements that you made. Have you attempted to do that?

A. Yes; I have those records.

Mr. Howland: I will now ask that the document consisting of 5 sheets headed "The Rock Island Motor Transit Company, Daily Record of Terminal Operations," Form 19, be marked for identification as applicant's exhibit No. 20.

Exam. Carpenter: It may be so identified.

[fol. 1528] (The document referred to was marked as "Applicant's Exhibit No. 20, Witness Kinner", for identification.)

By Mr. Howland:

Q. I notice these 5 sheets are dated October 31, 1951, November 30, 1951, December 31, 1951, January and February 29, the last two months being in 1952. What are these sheets that are included in the document which has been marked for identification as exhibit 20?

A. These are extracts of our permanent record in Chicago which shows the tonnage handled for the day of February 29, 1952, then the total for the current month of February 1952, then in the next column we have the tonnage handled the same day last year, which in this case we used the last day of February 1951, and on the extreme right hand of the sheet is the total tonnage handled for the entire month of February 1951.

Q. So, on the first sheet of that exhibit, the total tonnage for the month of February 1952, handled at the Chicago dock of the Rock Island Motor Transit Company, was 4,372,833 pounds. Is that right?

A. That is right.

Q. Whereas, for the month of February 1951 consisting, as I take it, of 28 days?

A. That is right.

Q. Was that 7,631,729 pounds of freight handled across the dock?

A. That is right.

Q. For the purpose of making the record clear, as I [fol. 1529] understand it, on each of the sheets of this document, marked for identification as exhibit 20, under the headings "Today" and "Total for current Month *do* date" you show the tonnage handled for the last day of the month and the total number of pounds handled in that par-

ticular month; and on the right hand side you show the same information for the year preceding.

A. That is right.

Q. So that on the top sheet of this document, marked for identification as exhibit 20, the total for month to date last year would be the month of February 1951.

A. That is right.

Q. Now, going back to October, as shown on the back sheet, you would there have the information in the right hand column for the month of October 1950 compared with that information for the month of October 1951. Is that right?

A. That is right.

Q. I notice you show some percentage figures on each one of those sheets and it lists a certain decrease in each instance. Does that decrease refer to the day or does it refer to the month?

A. That is for the entire month.

Q. Now, these records of the merchandise handled across the dock are daily records kept under your supervision and which you are required to send in each day?

A. That is right.

Q. Of course, on the last day of the month you show the [fol. 1530] information for the whole month?

A. Yes, that is right. In fact, the total is carried forward daily so, at the end of the month, you have the grand total by adding what you have until the 28th of February in this case, and when you have the 29th day's business for February added on to that month you have the grand total for the month.

Q. Now, of course, any truckload shipments that you might have made would not be included in merchandise handled across the dock. That is correct, isn't it?

A. That is right.

Q. If you had a volume shipment of 5,000 pounds, where it was never unloaded at the dock but delivery was made from the road unit, would that be included in this report?

A. That would not be included in this report.

OFFER IN EVIDENCE

Mr. Howland: I will offer and introduce in evidence at this time applicant's exhibit No. 20.

Exam. Carpenter: Any objection?
Mr. Bradshaw: May I inquire first?
Exam. Carpenter: Sure.

Recross examination.

By Mr. Bradshaw:

Q. As I understand it, Mr. Kinner, this document covers all of the freight handled across the dock in Chicago except truckload lots, regardless of destination.
A. That is right.
Q. In other words, you don't maintain this is the traffic [fol. 1531] coming into the territory covered by this application.
A. Not entirely.

Mr. Howland: It would be at this particular time, wouldn't it, unless you had a 5,000-pound shipment that was loaded in one of the road units?

By Mr. Bradshaw:

Q. Well, that is not the case, is it?
A. What you mean is, did all this tonnage in this case move into the points embraced in this application?
Q. Yes.
A. No; there is some Illinois intrastate involved.
Q. In other words, it includes the intrastate as well as the interstate traffic?
A. That is right.
Q. Do you have any way of breaking it down to show what was coming into the points involved in this application?
A. No; I have no way of doing that.

Mr. Bradshaw: May we go off the record just a minute?
Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: Back on the record. The document will be received in evidence as applicant's exhibit No. 20.

(Applicant's exhibit No. 20, Witness Kinner, was received in evidence.)

Redirect examination.

By Mr. Howland:

Q. Is it your desire to leave at 2:15 this afternoon?
[fol. 1532] A. Yes, sir.

Mr. Howland: If there is any further question about his examination or the production of any further documents, I would like to have it raised now.

Mr. Bradshaw: Are you through with him?

Mr. Howland: Yes.

Mr. Bradshaw: I have nothing further with him.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: On the record.

By Mr. Howland:

Q. Mr. Kinner, with respect to exhibit No. 20 indicating a decline in traffic handled at your Chicago terminal of the Rock Island Motor Transit Company, can you tell us what reasons existed for this decline in the volume of tonnage handled across your dock in Chicago in the months of October, November and December 1951 and January and February 1952 compared with the corresponding months the year previous? What causes were there for that?

A. Well, we know definitely that part of the decrease was caused by our 2,000-pound restriction, which was later increased to 5,000 pounds, and the fact that we could not handle Omaha and points west in Nebraska direct.

Q. All shipments originating at Chicago and destined to Omaha, Nebraska, were entirely eliminated?
[fol. 1533] A. We have continued to handle Omaha and points west in connection with another carrier beyond Des Moines.

Q. Then, I take it one of the principal causes of this decline in volume would be the restriction first of 2,000 pounds maximum limitation and then the 5,000 pounds maximum limitation?

A. That is right.

Q. Are you familiar with the situation in the Chicago terminal area as to whether or not there has been any reason in recent months for a decrease in volume handled by the carriers generally?

A. Well, I can state specifically there has been no decided decrease, and I base my opinion on the fact we must make deliveries of our freight from the west moving into the eastern, northern and southern territories, and it has been a big problem to get rid of that merchandise in some cases to connecting lines; which means they are running to full capacity.

Q. Well, you say, as far as your experience indicates, there has been no general, drastic decrease in volume of shipments handled by the motor carriers in Chicago?

A. No decided decrease, no, sir.

Q. Well, what causes would you attribute for the declines that are shown there in exhibit 20 other than the imposition of the maximum restrictions of 2,000 pounds and 5,000 pounds in your opinion?

A. Well, as I stated, the fact we cannot serve Nebraska [fol. 1534] and Iowa points direct tended to decrease our business. A two-line haul is not good service when there are many carriers making Omaha on a single-line proposition.

Q. And you have been required on Omaha business and business moving through the Omaha gateway to interline with other carriers?

A. We have continued it that way, yes, sir.

Q. Do you have any opinion or judgment with respect to which of the two major items you referred to, the 5,000-pound maximum limitation restriction or the Omaha restriction, is the greater factor in producing this decline in quantity of freight handled at your Chicago terminal?

A. Well, it is definitely due to the weight restriction. Our Omaha business normally runs about 10 percent of our entire operation; Illinois intrastate about 20 percent of our entire operation. That leaves 70 percent that moves over Highway 6.

Mr. Howland: I think that is all I have.

Recross examination.

By Mr. Baxter:

Q. Mr. Kinner, do I understand your testimony to mean that, in your opinion, there was not a decrease in the amount handled in the industry during the month of February 1952 as compared to February 1951?

A. Well, I can't speak for the industry as a whole, but I can give you my observations in Chicago, and that is what I have done.

Q. In other words, your observations are limited to your [fol. 1535] own truck line, Rock Island Motor Transit Company.

A. Definitely not with 50, 75 or 100 operators in Chicago.

Q. Are you speaking of all freight in and out of Chicago or just freight going into this area covered by the application?

A. I am speaking of freight moving in all directions out of Chicago.

Q. And you claim there has been no decrease in any of these months compared to the comparable month in the year before in industry so far as Chicago is concerned?

A. That is right.

Q. What percentage of this decrease do you attribute to your weight resfriction?

A. I probably can answer that in this way, that our normal tonnage to Omaha was running approximately 40,000 pounds per day and that has dwindled down to five to ten thousand pounds. The rest of the decrease would be due to weight restriction.

Q. So that your tonnage Chicago to Omaha has decreased?

A. That is right.

Q. And you are familiar, as you testified, with the operations of some of these other carriers in Chicago?

A. Yes.

Q. Do you happen to know who gets that tonnage now?

A. Well, I imagine it is split up among the other motor carriers.

Q. That is the other motor common carriers operating between Chicago and Omaha?

[fol. 1536] A. I presume a good share of it is going that way. Perhaps some of it is moving rail.

Q. Maybe carriers not connected with the railroads?

A. I imagine the Burlington is getting some and other railroad-owned truck lines.

Mr. Bradshaw: I believe that is all.

Redirect examination.

By Mr. Howland:

Q. To your knowledge there are no restrictions imposed as yet on the operations of the Burlington Transportation Company out of Chicago?

A. Not to my knowledge, no, sir.

By Exam. Carpenter:

Q. Did any part of the decrease result from interchange of traffic in connection with the Rock Island and other carriers serving Chicago?

A. Yes, I would say that decrease has been as heavy as our local traffic out of Chicago. In my testimony of March 18 I presented an exhibit that showed where we had been forced to turn down shipments of over 5,000 pounds that originated east, north and south of Chicago due to this restriction.

Exam. Carpenter: Anything further?

Mr. Howland: Nothing further.

Mr. Bradshaw: Nothing further.

Exam. Carpenter: That is all. You are excused.

(Witness excused.)

Exam. Carpenter: We will have about a 5-minute recess.

[fol. 1537] (Recess.)

Mr. Nolan: Mr. Boat, please.

J. G. BOAT was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you please state your name, place of residence and occupation?

A. J. G. Boat; I live at Pella, Iowa, and operate the Dowden Manufacturing Company at Prairie City, Iowa.

Q. What products do you manufacture at Prairie City, Mr. Boat?

A. Principally farm equipment, wagon boxes, Hammermill tires, Ford tractors, hydraulic units.

Q. How long have you been engaged in business at Prairie City?

A. At Prairie City since 1885.

Q. Do you have shipments of less-than-carload quantities coming into Prairie City?

A. Yes, we do.

Q. And that is the different types of materials used in the manufacture of those products?

A. Principally steel.

Q. In what size quantities does steel come in?

A. It varies from small shipments up to four and five thousand tons.

Q. What company has been handling those small shipments into your place of business?

[fol. 1538] A. Principally the Rock Island Motor.

Q. Where do you get the steel?

A. I would say 90 percent of it from Chicago.

Q. And you say the Rock Island Motor Transit Company has been handling practically all of those inbound shipments?

A. Practically all of them.

Q. What has been the nature of the service the Rock Island Motor Transit has rendered, whether satisfactory or otherwise?

A. Well, I will say it has been very good. We are well satisfied with the way the Rock Island Motor Transit handles our freight.

Q. In what way?

A. Any time we need something in a hurry or a shipment is lost or takes a little longer than we think it should we can call Des Moines and generally get pretty good service.

Q. How far is Prairie City located from Des Moines?

A. Twenty miles.

Q. You are on Highway 163, are you not?

A. That is right.

Q. Now, on outbound shipments do you use the Rock Island Motor Transit?

A. Almost exclusively.

Q. Why?

A. Well, they are about the only ones that stop there and solicit the business, and they have always taken good care of us.

Q. Where are those outbound shipments destined?

[fol. 1539] A. Well, we do business in about seven of the midwestern states. It varies, but mostly in Nebraska, Minnesota, Illinois and down in Missouri.

Q. I assume some of those shipments will be brought to Des Moines and then shipped east over U. S. Highway 117 via the Rock Island Motor Transit. Is that right?

A. Yes, quite a few of them.

Q. How about through Omaha and into Des Moines?

A. Yes.

Q. What would you say would be the frequency with which you have shipments handled by the Rock Island Motor Transit out of your plant at Prairie City? By that I mean how often you ship out of Prairie City.

A. Daily.

Q. What would be the average size of those daily shipments?

A. They vary from a hundred pounds to occasionally 5 and 6 thousand pounds.

Q. Now, you understand the Rock Island Motor Transit Company is now restricted to the handling of shipments of 5,000 pounds maximum limitation?

A. That is right.

Q. Does that interfere with the flow of your traffic both inbound and *in*bound?

A. I would say yes.

Q. The fact that the Rock Island Motor Transit might [fol. 1540] be compelled to cease operating in this territory or materially reduce its service, would that adversely affect your company?

A. Definitely.

Q. Do you know of any transportation agency serving Prairie City to and from the territory served by the Rock Island Motor Transit Company which could take the place of the Rock Island Motor Transit?

A. I am not aware of any.

Q. Have you been offered any such service by any other motor truck company?

A. No, we haven't.

Q. In addition to your plant or factory at Prairie City do you have an interest in any other company?

A. Yes, in the Pella Foundry at Pella, Iowa.

Q. What work do you do there?

A. Castings, moldings.

Q. With regard to your products both inbound and outbound at Pella, do you have practically the same situation as to service that you have at Prairie City?

A. Yes, we do, except most of our raw products come in by rail.

Q. How about your outbound shipments?

A. A large percentage of them goes out by our own truck or the Rock Island Motor Transit.

Q. What would be the size of those shipments?

A. They vary from two thousand to five to six thousand pounds.

[fol. 1541] Q. And do they go into the midwest territory about the same as your products from Prairie City?

A. That is principally to Iowa; very little goes outside of the state.

Q. But the Rock Island Motor Transit Company does take care of those Iowa intrastate shipments?

A. Very definitely.

Q. Do you know of any company which would provide the same service for your plant at Pella that the Rock Island Motor Transit Company is now providing?

A. No.

Q. And would the cessation of operations or material reduction in service of the Rock Island Motor Transit adversely affect your business at Pella?

A. It definitely would.

Q. Pella is located on U. S. Highway 163?

A. Yes.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Mr. Boat, how do you spell your name?

A. B-o-a-t.

Q. Am I right in saying your situation is something like this, that you have a satisfactory service from the Rock Island Motor Transit Company on inbound and outbound [fol. 1542] freight under 5,000 pounds at the present time?

A. I would say so, yes.

Q. And you are not looking for any other carrier?

A. No.

Q. And you haven't had occasion to investigate to see if there is any other transportation available?

A. We really haven't, no.

Q. And you have very few shipments over 5,000 pounds outbound? Is that right?

A. A very few. I would say that is substantially correct.

Q. And if you have one from your Pella Foundry it is intrastate or within the State of Iowa?

A. That is right.

Q. Do you have any shipments over 5,000 pounds going out of the State of Iowa from either place?

A. Yes, we do.

Q. And what is the frequency of them?

A. Oh, during our season I would imagine it is one a week.

Q. Who handles that for you?

A. Prior to this time?

Q. Who handled it for you the last 6 months?

A. Well, in one or two cases we made two shipments.

That is, we shipped part of the hydraulic units in one day and followed it up with the other shipment.

Q. Did you use any carrier other than the Rock Island [fol. 1543] Motor Transit on those shipments?

A. No.

Q. You said you had no occasion to investigate to see if anyone else could handle them.

A. That is right.

Mr. Bradshaw: I believe that is all.

Redirect examination.

By Mr. Nolan:

Q. Where you have a shipment outbound in excess of 5,000 pounds you break that down so it would be under 5,000 pounds so you could ship via the Rock Island Motor Transit?

A. That is right.

Q. Have you ever been solicited and offered service by any other carrier who would provide the same type of service or substantially the same type of service the Rock Island Motor Transit Company provides?

A. Not to my knowledge.

Q. You would know it if anyone was around there looking for business?

A. That is right.

Mr. Nolan: That is right. That is all.

Mr. Bradshaw: That is all.

Exam. Carpenter: That is all. You are excused.

(Witness excused.)

Exam. Carpenter: Call your next witness.

Mr. Nolan: Mr. Smith, please.

[fol. 1544] C. R. Smith, Jr. was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you please state your name, place of residence and occupation?

A. C. R. Smith, Jr., Oskaloosa, Iowa; Production Manager of Iowa Valve.

Q. Tell us a little bit more about the nature of the business of Iowa Valve.

A. Iowa Valve is a manufacturer of fire hydrants and gate valves used principally in water systems by towns and cities around the country.

Q. Do you ship direct to the consumers or the wholesalers?

A. We ship about 95 percent directly to the consumer.

Q. How long has your company been in business?

A. Since about 1909.

Q. Are you familiar with the transportation agencies used by your company on inbound and outbound shipments?

A. Yes.

Q. What company has your plant used on both inbound and outbound shipments?

A. The majority of it, I would say has been handled by the Rock Island Motor Transit truck for both inbound and outbound.

Q. What products do you have coming into your factory?

A. Iron and steel, that is bar stock, and nuts and bolts, [fol. 1545] brass tubing, brass rods.

Q. What size quantities do your shipments move in?

A. Well, until just recently, with the allocations imposed, we used to be able to buy in a fairly decent quantity and get a price break, but generally they come close to 5,000-pound shipments.

Q. What are your sources of supply of steel and brass?

A. Most of the steel comes out of Chicago; the brass comes out of Connecticut. That is by motor truck out of Chicago.

Q. That comes through the Chicago gateway?

A. Yes.

Q. What would you say would be the average size of your outbound shipments?

A. That is rather difficult to say because our items are very bulky, that is weightwise. The fire hydrants, I would say, average 400 pounds and sometimes get down to as low as 200 pounds; we have some that will weigh four and five thousand pounds.

Q. Do those shipments move into points that are out of the State of Iowa?

A. Yes, sir.

Q. And those shipments have been primarily handled by the Rock Island Motor Transit Company?

A. On the outbound.

Q. Has the 5,000-pound limitation on the Rock Island Motor Transit operation between the Tri-Cities and Omaha [fol. 1546] affected your ability to use the Rock Island Motor Transit Company on your outbound shipments?

A. I couldn't answer and say "Yes" definitely because, as I said, these shipments vary in quantity. I can't recall shipping anything beyond Omaha that has affected us, but I would assume it had because occasionally we do ship to those points.

Q. Well, from your past operations by the Rock Island Motor Transit Company, would you say you do have shipments that exceed 5,000 pounds that are moved out by the Rock Island Motor Transit Company?

A. Oh, yes, definitely.

Q. What would the cessation of or a substantial reduction in the service of the Rock Island Motor Transit Company result in as far as your company is concerned? Would or would it not adversely affect your business?

A. I don't think it would affect our business, but it would affect the service we would render to customers in the immediate vicinity. In other words, one of our selling points is if anyone in the vicinity have an emergency and they need valves or hydrants we make schedules in our production service to take care of it. Our items, as mentioned before, are bulky and sometimes we get an order of 20 fire hydrants and I can't put them in a Rock Island

Motor truck billed at our plant. Sometimes the Rock Island Motor Transit can make the haul or make possible a two-line haul out of it. In other words, we don't have the [fol. 1547] constant interline on these hydrants and valves.

Q. Do you know of any other transportation agency that will give or has offered to give the same type of service the Rock Island Motor Transit has been giving your plant at Oskaloosa, Iowa?

A. Well, several have offered but have never been able to give the service.

Q. Have you tried to use other service?

A. We have occasionally yes.

Q. Has it been as satisfactory as that of the Rock Island Motor Transit Company?

A. No, it has not.

Q. Why not?

A. Well, the Rock Island Motor Transit has a terminal in Oskaloosa. They spot a truck at our plant, it is there for our convenience and we can load it any time during the day and they haul it out every night. We know it is scheduled, we know it is going to be there. If we have to trace shipments we can trace them quite easily, and if we have claims we can usually handle them without too much difficulty.

Q. Now, in connection with the Rock Island Motor Transit service, I think the record shows that they maintain an agent and terminal with dock facilities at Oskaloosa, also including rate information and facilities for tracing lost and damaged articles.

A. That is right.

Q. Does any other highway carrier provide the same service there?

[fol. 1548] A. No, there is no other service.

Q. There are other companies operating through Oskaloosa, are there not?

A. That is right.

Q. But none of those companies provide a terminal agent or dock facilities there?

A. No.

Mr. Nolan: You may cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Does not the Burlington Transportation Company have a terminal at Oskaloosa?

A. I beg your pardon. They do. Burlington does have, but it is not the same type of terminal as the Rock Island Motor Transit as far as service goes.

Q. What other truck lines operate between Oskaloosa and Omaha?

A. I think the Burlington does; I may be wrong on that. But our method of shipping has been to load anything westbound on Rock Island Motor Transit and they take it to Des Moines; they handle it for us.

Q. Yes; but my question was what are the other carriers that serve Oskaloosa and Omaha, Nebraska.

A. That I can't tell you right offhand.

Q. In other words, your service has been satisfactory and you haven't had occasion to check into it too thoroughly, have you?

A. No, we haven't because, as I say, the service the [fol. 1549] Rock Island Motor Transit has rendered us has not led us to seek anyone else.

Mr. Bradshaw: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. Mr. Smith, as a matter of fact, is it not true the Burlington Transportation Company's operating authority north and west out of Oskaloosa into Des Moines is restricted to intrastate business?

A. I can't answer that.

Q. If you were going to route a shipment by the Burlington Transportation Company it would have to go south to Ottumwa and then west to Omaha. Isn't that true?

A. Yes, it would have to go down to Ottumwa.

Q. You are not sure whether the Burlington Transportation Company has any authority interstate in a westerly or northwesterly direction out of Oskaloosa?

A. No; I haven't checked that.

Q. Now, there are certain other carriers such as the Bruce motor who operate between St. Louis and Des Moines. Are you familiar with their service?

A. Slightly, yes.

Q. Have you had occasion to use their services?

A. On occasion I have used them, yes.

Q. Bruce has no east and west service through Des Moines, do they?

A. No, not that I know of.

Q. Are there any other carriers that serve Oskaloosa [fol. 1550] on a regular basis other than Burlington Transportation Company, Rock Island Motor Transit Company and Bruce Motor?

A. Western Transportation.

Q. Do you know over what routes they operate?

A. No; I haven't paid too much attention to Western because they are more or less straight into Chicago.

Q. Well, that was one of the things I was going to ask, if they had any service west out of Oskaloosa.

A. No; they have no service west.

Q. And they come in solely from the east?

A. That is right.

Q. And, of course, the Rock Island Motor Transit Company does have authority interstate to operate to interstate points via Des Moines or via Ottumwa and Davenport?

A. Yes.

Q. Are there any other carriers that you know of that serve Oskaloosa other than the ones we mentioned on a regular basis?

A. No, not on a regular basis.

Q. Keeshin comes in from the north, do they not?

A. They come in maybe two or three times a week.

Mr. Nolan: One other question.

By Mr. Nolan:

Q. With regard to this truck the Rock Island Motor Transit Company spots at your place of business, you mean a trailer unit?

A. Yes.

[fol. 1551] Q. Do you load one of their trailer units practically every day?

A. I would say every day.

Q. Is it more convenient for you to have one company with dock and terminal facilities right there in Oskaloosa to take your output every day?

A. That is correct.

Mr. Nolan: That is all.

Exam. Carpenter: Recross.

Mr. Bradshaw: No questions.

Exam. Carpenter: That is all. You will be excused.

(Witness excused.)

Mr. Howland: Mr. Millstead, please.

HARRY MILLSTEAD was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name?

A. Harry Millstead, Oskaloosa, Iowa.

Q. Your business is what, Mr. Millstead?

A. I am the agent for the Rock Island Motor Transit at Oskaloosa.

Q. How long have you been located there?

A. I have been there just a month over two years.

Q. What personnel does the Rock Island Motor Transit Company have at Oskaloosa?

A. We have an agent, a clerk, a rate clerk, three dock men, and one of our over-the-road drivers that works out [fol. 1552] of Oskaloosa lives at Oskaloosa.

Q. And you are the agent?

A. That is right.

Q. Do you maintain pickup and delivery service in Oskaloosa?

A. Yes, sir, we do.

Q. With company-owned trucks?

A. That is right.

Q. How many units of equipment have you there?

A. We have two pickup and delivery units and one trailer and tractor we use.

Q. Oskaloosa's population is approximately what?

A. Between 13,000 and 14,000.

Q. What industries do you have there in the way of manufacturing?

A. Iowa Valve, Ideal Manufacturing Company, Continental Overall Company and— I was going to say General Mills, but they have just recently moved out.

Q. Are those the principal receivers and shippers of materials and the principal manufacturing industries of the City of Oskaloosa?

A. That is right.

Q. What other carriers serve Oskaloosa besides the Rock Island Motor Transit Company?

A. Western, Hawkeye, Bruce, and there is a carrier, the P. & W., I will say have rights in there.

[fol. 1553] Q. Well, isn't P. & W. primarily a livestock hauler?

A. That is right.

Q. And they bring loads back on an irregular-route basis?

A. Yes, sir.

Q. The other concerns you have mentioned are regular-route carriers?

A. Yes, sir.

Q. Keeshin Motor Express does have authority into Oskaloosa from the north, does it not?

A. Yes, that is right, but you very seldom see them in there.

Q. What about the service of the Burlington Transportation Company into Oskaloosa? What type and character of authority does Burlington Transportation Company perform?

Mr. Bradshaw: Just a moment. I object to this testimony as not being the best evidence, and it is hearsay.

Mr. Howland: I think I would like to qualify the witness a little further.

Exam. Carpenter: Very well.

By Mr. Howland:

Q. Are you familiar with the type and character of transportation service which the Burlington Transportation Company offers to the public there at Oskaloosa?

A. Yes, sir.

Q. They are a competitor of yours on some business, are they not?

A. That is right.

Q. Now, I will ask you——

[fol. 1554] Mr. Bradshaw: Same objection.

Exam. Carpenter: The objection is overruled.

Read the last question.

(Question read.)

By Mr. Howland:

Q. By that I mean, Mr. Millstead, does the Burlington Transportation Company handle interstate shipments out of Oskaloosa to Omaha via Des Moines, or east and west via Des Moines, or do they operate on some other basis?

A. Most of their shipments are interlined at Ottumwa. They take that route down to Ottumwa and it is moved out of Ottumwa.

Q. As a matter of fact, they don't have any interstate authority into Des Moines, do they——

A. No.

Q. —from Oskaloosa?

A. That is right.

By Exam. Carpenter:

Q. Do they interline Omaha traffic at Ottumwa?

A. At Ottumwa.

By Mr. Howland:

Q. Mr. Millstead, have you had any experience in rejecting shipments in excess of 5,000 pounds since the limitation of 5,000 pounds has been on since November of last year?

A. As far as that is concerned we haven't rejected them but as far as we could take them would be to Des Moines or to Ottumwa or Davenport; and we have had a number of them we had to turn over to another carrier.

[fol. 1555] Q. In other words, the 5,000-pound restriction is not applied on the authority between Oskaloosa and Des Moines or between Oskaloosa and to points as far as Davenport?

A. That is right.

Q. But you are affected by it in that when you get to Des Moines or Davenport you have had to deliver those shipments to other carriers instead of performing the line-haul service over the Rock Island Transit territory?

A. Very definitely.

Q. And have you had some instances where some shippers have made up more than one shipment when otherwise they might have made it all in one shipment?

A. We have had very little of that situation of breaking shipments down. Our problem has been with the customer that has 10,000 pounds in one shipment, he has two or three other shipments of maybe five or six hundred pounds, and he wants them to be carried right straight through together, say, for instance, to Omaha or Chicago. Then, we will have to tell him that we are going to have to tra-sfer the 10,000-pound shipment at Des Moines. Well, he hesitates about giving us the whole business. The carrier down there is the one we have competition with, the same as we do at other places.

Q. And has the imposition of this 5,000-pound restriction operated to curtail your business, the volume business, you have handled there?

[fol. 1556] A. I would question that to some extent. I don't think it has been tremendously curtailed. There has been a lot of cases, especially in seed corn, stuff like that, 5,300 pounds, where they have had to turn it down or turn it over to a carrier going east.

Q. That is interlined?

A. That is right.

Q. Instead of giving the Rock Island Motor Transit Company the haul to destination or as far as they are in a position to handle it?

A. That is right.

Mr. Howland: You may cross examine.

Cross-examination.

By Mr. Bradshaw:

Q. Is your freight warehouse in the railroad station down there?

A. No, sir. We are a little over a block due east of the railroad station.

Q. These two pickup and delivery trucks of yours, do they also pick up and deliver rail freight?

A. Yes, sir.

Mr. Bradshaw: That is all.

Redirect examination.

By Mr. Howland:

Q. There is one question we omitted to ask you, Mr. Millstead. What rail carriers presently serve Oskaloosa?

A. The M. & St. L. is the only one besides the Rock Island.

Q. Does the Burlington Railroad have any rail facilities [fol. 1557] in Oskaloosa?

A. No, sir.

Q. At one time the Burlington had a branch line that came in from the southeast, did they not?

A. I think that is right.

Q. But that has been abandoned some years ago?

A. That is right.

Q. And the M. & St. L. operates north and south, and east to Peoria, Illinois?

A. That is right.

Mr. Howland: That is all I have.

Exam. Carpenter: Any recross?
Mr. Bradshaw: Nothing further.
Exam. Carpenter: Thank you. You are excused.

(Witness excused.)

Exam. Carpenter: We will recess for lunch until 1:45 p. m.

(Whereupon, a recess was taken at 12:15 p. m. until 1:45 p.m., the hearing reconvening at that time as follows:)

AFTERNOON SESSION

Exam. Carpenter: We will proceed with the hearing.
Mr. Nolan: Mr. Mauer, will you please take the stand?

WESLEY C. MAUER was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you state your name, place of residence and [fol. 1558] occupation?
A. Wesley C. Mauer, Minden, Iowa, partnership with Hansen and Mauer Hardware Store.
Q. What business are you in?
A. Hardware and supplies.
Q. How large a town is Minden?
A. Oh, about 300.
Q. Does it have the general retail service establishments found in an agricultural community of that size?
A. Yes.
Q. How long have you been in business there?
A. Well, I have been in business going onto 6 years as a partner, but he has been there about 20 years.
Q. Where is Minden located?
A. Well, it is 25 miles east of Council Bluffs, Iowa on Highway 64.
Q. Do you have shipments coming in from out-of-state points to your place of business?
A. Not very many.

Q. Where do you get most of your merchandise?

A. From Luthe and Brown-Camp, Des Moines, and from Omaha.

Q. Do you use the services of the Rock Island Motor Transit Company?

A. Yes, we do.

Q. Does it give a daily service in and through Minden?

[fol. 1559] Mr. Bradshaw: May we limit this to interstate commerce?

Mr. Nolan: Well, we will develop that.

By Mr. Nolan:

Q. Do you use the Rock Island Motor Transit on your shipments from Omaha?

A. Well, not so much. We have a transfer line right there in Minden, and we do haul quite a bit of our own freight from Omaha ourselves.

Q. Do you have occasional shipments that come in from Chicago?

A. Yes, we have occasional shipments from out of state.

Q. Do those shipments come in via the Rock Island Motor Transit Company?

A. Mostly all.

Q. Is the service of the Rock Island Motor Transit necessary for you to get those shipments?

A. We get better service on shipments coming in via the Rock Island Motor Transit.

Q. Would it be detrimental to your business if you should lose the services of the Rock Island Motor Transit?

A. Well, it would hurt it some.

Q. Do you have a local trucker at Minden?

A. Yes.

Q. Who is that?

A. Kruger.

Q. Does he have a truck haul into Omaha?

A. Yes, he has.

[fol. 1560] Q. Do you know whether he interlines on through billing at Omaha?

A. I couldn't tell you.

Q. But the Rock Island Motor Transit is the only com-

pany that serves Minden on direct shipments from Chicago? Is that true?

A. I think you are right.

Q. Is that service a daily service?

A. Yes.

Q. I assume those shipments you get in from the east and Chicago and points like that are what you would call small shipments?

A. Yes, small shipments.

Q. Anywhere from 100 to 500 pounds?

A. That is right. We never get in big shipments.

Mr. Nolan: That is all.

Exam. Carpenter: Cross examine.

Mr. Bradshaw: No questions.

Exam. Carpenter: That is all. Thank you, sir.

(Witness excused.)

Mr. Nolan: I will call Mr. Erickson.

CLINTON ERICKSON was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name and place of residence?

A. Clinton Erickson, Neola, Iowa. I am a partner in the [fol. 1561] implement business known as the Neola Farm Equipment. We have the International Harvester and New Idea contracts.

Q. You are a local distributor for those two companies?

A. That is right.

Q. Do you handle the entire line of the International Harvester Company's plows, discs and such as that?

A. Yes, sir.

Q. And also from the other company?

A. Their hay equipment, farm implements, plows and things like that.

Q. How long have you been connected with the implement business in Neola?

A. It will be 4 years in May.

Q. Where is Neola located?

A. About 20 miles east on 64 from Council Bluffs.

Q. Is it a station on the Rock Island Railroad?

A. It is, but I guess it won't be long.

Q. Neola is one of the towns that is on the present line of the Rock Island but which will be on a branch line after the main line of the Rock Island is changed to a direct line from Atlantic to Council Bluffs. Is that right?

A. Yes.

Q. Where do you get your parts and farm supplies from?

A. Well, our parts are coming from Kansas City now.

Q. I assume the tractors and larger machines will come [fol. 1562] in already set up.

A. Yes.

Q. How about your New Idea equipment? Where do you get that from?

A. We get that out of Omaha.

Q. What transportation company has been handling your shipments from Kansas City?

A. The Rock Island Motor Transit has been handling some of them from Kansas City.

Q. How about your Omaha shipments?

A. We haul most of our Omaha shipments ourselves.

Q. Did you formerly get your International parts from Omaha?

A. Yes. Kruger hauled those.

Q. What has been the quality of the service you get from Kansas City via the Rock Island Motor Transit Company?

A. Well, the service on all of our parts has not been too good from Kansas City since they changed it down there, but we have had the best service by the Rock Island Motor Transit.

Q. You mean it naturally takes longer to get shipments out of Kansas City via the Rock Island Motor Transit Company?

A. Yes, sir.

Q. Than out of Omaha, Nebraska?

A. That is right.

Q. Do you get anything from the Tri-Cities?

A. No.

Q. Now, you say the service from Kansas City has not [fol. 1563] been too good. Do you mean the Rock Island Motor Transit has not given you good service or does it take longer by reason of the location of your plant from Kansas City?

A. Well, I think we are just spoiled from Omaha.

Q. In other words, you can get shipments about every hour from Omaha?

A. That is right.

Q. And it takes what from Kansas City? About 2 or 3 days?

A. Just about that.

Q. Does the Rock Island Motor Transit serve your town every day?

A. Yes.

Q. How frequently do you use the service of the Rock Island Motor Transit Company for out-of-state shipments?

A. Well, I would say possibly twice a week.

Q. Do you know of any other transportation agency that can give you as good a service as the Rock Island Motor Transit Company?

A. So far I don't.

Q. What, in your opinion, would be the effect on your business in getting parts from Kansas City if the Rock Island Motor Transit Company were required to terminate or curtail its operations?

A. Well, we have received so little from down there to this time, the movement just started this year, that I don't know just what effect it would have.

Q. But you know of no other agency or transportation [fol. 1564] company that would give you the service the Rock Island Motor Transit Company gives you out of Kansas City?

A. No.

Q. State whether or not you feel the services of the Rock Island Motor Transit on shipments you are now receiving from Kansas City is necessary for the proper conduct of your business there at Neola.

A. I think it is.

Q. You are the only International dealer, I suppose, at Neola, are you not?

A. Yes.

Q. In other words, the International dealers are franchised to different localities?

A. Yes, sir.

Q. And you have the exclusive International line there? Is that right?

A. That is right.

Q. What would you say would be the volume or size of the shipments that you ordinarily get from Kansas City?

A. Well, we are placing stock orders now and they will run probably 400 pounds, maybe 600 pounds.

Q. How would a corn picker come out?

A. They come by rail.

Q. Now, you take a corn picker or a tractor or an implement like that, they come in volume lots, do they not?

[fol. 1565] A. That is right.

Q. In other words, there would be a carload of corn pickers or tractors to Council Bluffs and you would get your share from that volume lot, is that correct?

A. That is right.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. How long have you been getting these parts from Kansas City?

A. Just since the first of the year.

Q. How many shipments does that amount to?

A. Oh, I suppose we have had possibly five shipments.

Q. And if I understood your testimony, Kansas City and Omaha are the only two points you get your freight from out of state?

A. Well, occasionally from Rock Island special new parts would come from the factory.

Q. That would be parts it is impossible to get out of Kansas City?

A. Yes.

Q. What would the frequency of that movement be?
A. Oh, possibly four or five times a year at the most.

Mr. Bradshaw: That is all.

Redirect examination.

By Mr. Nolan:

Q. Those shipments that come out from the factory at [fol. 1566] Rock Island or Moline, have they come by the Rock I[illegible] Motor Transit?
A. I believe they have.
Q. Do you know of any other service direct from Rock Island or Moline other than the Rock Island Motor Transit service?
A. No, I can't say I do.
Q. When you say you have had very few shipments from Kansas City so far this year, isn't it a fact you are just getting into the season of the year when you will require more shipments from Kansas City?
A. That is right.
Q. In other words, you don't have many breakdowns in farm implements during the winter time, do you?
A. No.
Q And from now until after corn picking time those shipments will no doubt be very frequent?
A. That is right.

Mr. Nolan: That is right. That is all.
Exam. Carpenter: Any recross examination?
Mr. Bradshaw: No.
Exam. Carpenter: That is all. You are excused.

(Witness excused.)

Mr. Nolan: Mr. Godby, please.

GRAHAM GODBY was sworn and testified as follows:

[fol. 1567] Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence and occupation, please?

A. Graham Godby, Dexter, Iowa.

Q. Where is Dexter located?

A. About 35 miles west of Des Moines.

Q. On U. S. Highway No. 6?

A. On No. 6.

Q. What is the size of the town of Dexter?

A. About 8 or 9 hundred.

Q. You are in what business?

A. Implement and automobile.

Q. What line of farm implements do you handle?

A. John Deere.

Q. Do you have an automobile agency there?

A. Yes.

Q. What make?

A. Pontiac.

Q. Do you handle a full line of John Deere Farm implements?

A. Yes.

Q. Do you also handle some other special make or special line of farm supplies and farm implements?

A. No, unless it would be manure spreaders or something like that.

Q. Do you receive shipments in both your implements [fol. 1568] and automobile business from points out of the state?

A. In the automobile business it is all transport business except for parts, and in the farm implement business the most of it is from Des Moines and Chicago.

Q. On the parts that come out of Chicago, what transportation company brings those to Dexter for you?

A. The Rock Island Motor Transit Company.

Q. How frequently do you get parts from Chicago?

A. Oh, I would say at least three times a month probably.

Q. And I assume your farm implement parts and your smaller farm implements, your tractors and corn pickers and binders and things of that character, come in block lots and you get your share of the block? Is that correct?

A. That is right.

Q. How about the repair parts and things of that character? Where do you get those?

A. Well, our warehouse is at Des Moines, and they come out of Moline, Illinois.
